TULAMEEN PLATINUM

Chinese Work Placers More than Whites and are Careful Miners.

Mining Project on Granite Creek is Expected to Pay Promoters Ample Profits.

[Continned from last week.[

Within the last four or five years, placer mining operations have been actively prosecuted by a few individuals only. Chinese have worked over the bed of the Tulameen river in the portions about the mouth of Slate creek and between the mouths of Eagle and Champion creeks. The heavier constituents of the gravels were recovered during the season of low water by diverting the course of the water by wing dams from the centre of the stream to either bank, thus leaving the centre of the stream free for working. Other miners have been simply extracting pay from cracks and from under large boulders as were left by the earlier operations.

Placers on Granite Creek.

A short distance above the mouth of the North Fork, on the main Granite creek, Messrs R. A. Lambert and Stew art are doing the only serious placer mining in the district The preliminary development has been carried on by five men for the past three seasous, but the actual sluicing of the gravels may only commence in the coming season. Lambert and Stewart have a lease of 1½ miles of the creek bed above the North Fork, a very small part of which has been worked in former times. The gold recovered from these portions was very coarse, though the bed rock was only reached in one spot. In this particular portion, which was but 200 feet in length the yield is said to have been $1,200 to the length of a sluice box, where the gravels in the stream bed had a width of 40 to 50 feet. This yield included nuggets the gold value of which was from $100 to $150; the platinum, however, was fine. The remainder of the creek bed covered by the lease is deep ground, and could not be bottomed. Lambert and Stewart are now engaged in cutting down the bed of the stream in the lower part of their lease, in order to reach bed rock and recover the gold and platinum lying upon it. Commencing at the lower end of their ground, a dam has been constructed across the stream bed, while 600 feet of a board flume carries the water over a portion of the channel which it is proposed to first work. The large boulders and rock in the lower part were blasted away, thus enabling the removal by ground sluicing of a depth of about 25 feet of gravel, which before formed the bed of the stream. The depth of gravel overlying the bedrock is now but five feet, and the point has been reached when the gravels can be shovelled into the sluice boxes. This, however, can only be done after the season of high water has passed. The returns should show a proportion of about four parts of gold to one of platinum, and should amply repay the cost of the preparatory work. *

To Mine in Platinum Belt.

A company recently organized in Vancouver, the British Columbia Platinum Co, has obtained from the provincial government three leases in what was formerly the most productive platinum district. One of these leases applies to an area on Slate creek, and the others to areas on the Tulameen river above Slate creek The company proposes to first prospect the ground with a Keystone drill, and then mine it with ground sluicing or by drifting on the bedrock.

Origin of the Placers.

Much of the gold and platinum found in the Tulameen section is coarse, and has that rough unworn surface charecter istic of nuggets which have not travelled far from their original source. Even in the beds of rapid streams the distance to which coarse gold travels is as a rule not considerable, and the same rule applies to platinum, which has a specific gravity not greatly different from that of gold. Much of the gold is still found imbedded in quartz, while the platinum is often associated with pyroxene, olivine or chromite. It is to be concluded, therefore, that the present placers are not very old; that they have been derived from the breaking down of rocks not very far distant, and are not the result of the working over of more ancient placer deposits formed by earlier streams.

[To be continued.]

* Since the foregoing was written the dam referred to has been carried away by recent high water and mining operations again delayed, this being the second time it has been destroyed. The mining public were anxiously awaiting the result of Mr. Lambert's undaunted labors and sympathise with him in his serious loss.—Ed.

RAILWAY CONSTRUCTION.

Railway construction west of Princeton to Tulameen is proceeding rapidly along. Some of the lighter portions of the grade have been completed and the heavier work is well advanced.

The tunnel on the western border of the town is being worked both night and day from both ends. Approximately one-third of this work is done. The tunnel cuts a strata of coal.

It is fully expected that the grading will be completed by October 1st, leaving the bridges and tracklaying to be finished within the year.

No fleshly ills or labor troubles have occurred to delay construction and the management is such as to cause no friction or loss of time.

LOCAL AND GENERAL

Two Railways Begin Construction Soon, Both will Help.

Hospital Board in Session—Fruit can be Made Profitable Industry Around Princeton.

The Kettle Valley and Canadian Northern railways will immediately begin construction.

The hospital board met today and discussed plans for building, adjourning for one week in order to receive reply from Dr. Fagan, provincial medical health officer.

Never mind the knocker but keep right on 'sawin wood and sayin' nothin.'

Stuart Campbell, a star in lacrosse circles some twenty years ago at the coast, dropped into Princeton the other day, looking as though he had discovered the elixir of life. He is travelling for the firm of Campbell & Thompson, wholesale liquors, of which he is senior partner. Mr. Campbell was some years on the staff of the Province but since the boom struck Vancouver he don't have to work hard. He thinks Princeton the pick of inland towns for beauty and prospects.

Jim Grier has a record surpassed only by the late John Huston for starting newspapers. His latest move is to New Denver, where he has established the Record, a bright and newsy paper and one likely to bring him fortune and fame.

Clearing the ground for the hospital has been completed, the work being done as a contribution toward the hospital by Ben Baker, Charlie Crisfield and Billy Fearless.

The parting dance given by Mrs. Swanson last Friday night was an emphatic testimony of her popularity and of the high regard in which she is held by a large number of citizens. She left today for Dundee, Scotland, and will be absent about six months, returning about Xmas

C. B. Garrison, of Portland, Ore., is in town on a business mission. He was here two years ago inspecting timber limits for Fred. Kribs, the big timber operator. Mr. Kribs is expected here shortly.

J. O. Coulthard recently sold part of Lot 9, 50 feet frontage on Bridge St., to Rufus Tree.

H. A. Turner, road superintendent, is making an inspection trip over this end of the district.

There is only about a month to Dominion Day and that is little enough time in which to prepare for our great annual celebration. The baseball club is making strenuous efforts to arrange a match for that day and, no doubt, other events will have their usual place on the program.

Baby carriages, gocarts, in great variety at the New and Second Hand Store, A. L. White, proprietor. †

Miners' licenses expire on the 31st of May, Tuesday next, at midnight. Renew before that date and save additional costs.

COMET AND ECLIPSE.

There was something doing in the heavens Monday night. The 'stranger' which came out of eternal space and is now hurrying back again was plainly visible with a portion of its long tail. Fair luna hid her full face behind the earth's penumbra, making the fuzzy headed comet readily distinct from any of its neighbors. These wonderful phenomena kept eyes riveted on them till wearied nature called out for rest. The comet and the total eclipse of the moon give one an idea of immensity and the great precision with which the Master Hand turns these bodies in their long orbits. To the comet we bid a long farewell, but the jolly old moon we hope to be on nodding terms for many years yet.

BUILDING OPERATIONS.

Buildings in various parts of the town are in course of erection and others are about ready to begin, of which the hospital, and a store on the northwest corner of Bridge street and Fenchurch Av., are principal. Under construction are the following:

Two cottages of pretty design, on Fenchurch and Endcliffe Avs., for the Vermilion Forks Co.; cottage on Tapton Av. for Robert Gourlay; addition for Gordon Murdock, and other smaller structures. The Similkameen Lumber Co. is doing a large and increasing business and will shortly begin the erection of a large store and offices near the Great Northern depot.

FRUIT GROWING HERE.

Valentine Dynes, of Nelson, was in town Wednesday, going on to Nicola via stage on Thursday. He is general agent for the Riverside Nurseries at Grand Forks, established by Martin Burrell, M.P., in 1900, and is placing some large orders for fruit trees in the Similkameen. He has had large experience in fruit culture and is pleased with the outlook for for fruit growing in this section and visited the Westwood-Nathan young orchard near town. For certain varieties of apples he considers the climate here particularly well adapted. He pointed out that Nelson with a sea elevation of 1769 feet and Rossland, 3461 feet, were producing big crops of fruit and that Princeton with an elevation of 1885 feet should do as well.

NOTES AND COMMENTS.

This year marks the beginning of greater development and larger industrial undertakings in British Columbia than has ever been known in its history. Four big railway companies are constructing road in various parts of the province, thus making new territory accessible and providing means for development of our latent resources. The province, after many years of puny existence, is at last laying hold of its birthright and demonstrating to the world its worth as a field for the investment of capital. Where there was formerly distrust and discouragement, now there is confidence and brightest hope. And it has all been brought about by a healthy self-confidence and appreciation of the natural wealth by the people through the government of the province. If the government had been content with a do-nothing policy the railway situation would have remained dead and stagnation, like some gaunt spectre of woe and want, would pall the land. The construction of railways has long been recognized our greatest need and now that there is no lack of it progress and thrift are observable everywhere. Capital could have no better field for investment than this province and the Similkameen affords gilt edge opportunities which are not met with elsewhere.

No matter where one turns in Princeton there are evidences of progress and improvement. Buildings in course of erection dot the town and road and street improvements are going on. The water works system to be installed this year must have a very beneficial effect on the status of the town as a place to live in and this coupled with the immediate prospects of a large payroll make Princeton one of the most inviting places for a homeseeker or investor. Then, its sanitary condition, its natural beauty and superb climate all enhance its value as a place in which to reside.

With the preliminary and development work now in progress mining in Princeton district is now about to be put on a permanent productive basis and made an industry of similar importance to that of other mineral sections in the province. Several coal and ore properties are now at that stage of development which allows them to be termed mines, although they are not actually shipping. It is very probable that within another year several mines will have become constant shippers and a smelter and coke ovens begun construction.

NOTICE

YALE LAND DISTRICT.
DISTRICT OF YALE.

Notice is hereby given that Lewis Hind, of Victoria, B.C. intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen, river:—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers and marked Lewis Hind, S.W. corner, thence north 80 chains, east 80 chains, south 80 chains, west 80 chains to point of commencement, and containing 640 acres. LEWIS HIND,
April 7, 1910. P. Y. Smith, agent.

Notice is hereby given that John Henry Jackson, of Tulameen, B.C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the South Fork of the Tulameen river:—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked J. H Jackson, S.E. corner, thence north 80 chains, west 80 chains, south 80 chains, east 80 chains to point of commencement and containing 640 acres. J H JACKSON,
April 7, 1910. P. Y. Smith, agent

Notice is hereby given that Edith Mary Hind, of Victoria, B. C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked E. M. Hind, N. E. corner, thence south 80 chains, west 80 chains, north 80 chains, east 80 chains to point of commencement and containing 640 acres. EDITH M HIND,
April 7, 1910. P. Y. Smith, agent.

Notice is hereby given that Rowland Fennings Taylor, of Victoria, B C, intends to apply to the chie commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river.—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers and marked R. F. Taylor, N W. corner, thence south 80 chains, east 80 chains, north 80 chains west 80 chains to point of commencement and containing 640 acres. R. F TAYLOR,
April 7, 1910 P Y. Smith, agent

Notice is hereby given that John Willis Ambery of Victoria, B C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river.—Commencing at a post planted about 4 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked J. W. Amberry, S.W. corner, thence north 80 chains, east 80 chains south 80 chains, west 80 chains to point of commencement, and containing 640 acres J. W. AMBERY.
April 7 1910. P. Y. Smith, agent.

Notice is hereby given that Charles Willarson, of Princeton, B.C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 4 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked C. Willarson, SE corner, thence north 80 chains, west 80 chains, south 80 chains east 80 chains to point of commencement a d containing 640 acres. C. WILLARSON,
April 7, 1910. P. Y. Smith, agent

Notice is hereby given that Peter Johnson, of Princeton, B C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 4 miles from and south of the junction of the South Fork and the Tulameen rivers and marked P. Johnson, NE corner, thence south 80 chains west 80 chains, north 80 chains, east 80 chains to point of commencement, and containing 640 acres PETER JOHNSON.
April 7, 1910.

Notice is hereby given that Mary Hewat, of Princeton, B. C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 4 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked M. Hewat, NW corner, thence south 80 chains, east 80 chains, north 80 chains west 80 chains to point of commencement, and containing 640 acres. M HEWAT,
April 7 1910. P. Y Smith, agent.

Notice is hereby given that Emilie A. I. Martin, of Victoria, B.C., intends to apply to the chief commissioner for a license to prospect for coal and petroleum on the following described lands situat on the south fork of the Tulameen river:—Commencing at a post planted about 6 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked E. A. I. Martin, SW corner, thence north 80 chains, east 80 chains, south 80 chains, west 80 chains to point of commencement, and containing 640 acres. E. A. I. MARTIN.
April 7, 1910. P. Y. Smith, agent.

Notice is hereby given that Philip Y. Smith, of Princeton, B C, intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted abou 6 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked P. Y. Smith. SE corner, thence north 80 chains west 80 chains south 80 chains east 80 chains to point of commencement, and containing 640 acres. P. Y. SMITH.
April 7, 1910.

Notice is hereby given that Jessie Renton Hunter, of Princeton, B.C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 6 miles from and south of the junction of the South Fork and the Tulameen rivers and marked J. LOCAL AND GENERAL.

The tennis club plays every Saturday afternoon and new members are being added.

Spokane Interstate Fair will be held Oct. 3 to 9. The mineral prize list is extensive.

Victoria Day passed off without any special demonstration, it being generally understood that Princeton would forego any celebration, reserving Dominion Day as in former years for its annual observance of the national holiday.

Through trains were resumed on the 24th after an interruption of two weeks due to the damaged bridge by high water. About thirty cars of freight have been delayed but are now arriving.

W. C. McDougall has quite recovered from his serious accident of last winter and he is the recipient of congratulations from a legion of friends who are glad to see him in his usually active condition of physical health.

A movement for stocking some of the numerous lakes in this section with, say, bass, whitefish and shad and the introduction of songbirds to the now silent woods and glens, is about to be made. These matters might, quite properly, be taken up by the board of trade if formally brought to its attention.

D. McCurdy, Keremeos, was in town today and reports prosperity and happiness in the town that produces the apple, melon, and the luscious peach with such profusion and other fruits galore.

Harry Armstrong took in the celebration Victoria Day at Keremeos and reports a good time.

J. D. Lumsden, W. C. Brown, C. Drinkwater and K. C Brown went up to Granite on the 24th to spend a holiday and enjoy the glorious scenery.

FOR SALE.—Two milk cows, 5 and 6 years old, fresh calved. Too many chickens—will sell about 30 White Leghorns and Wyandottes. Apply to A. F. MACKENZIE, Tullaharh. Ranch.

Divine service (Presbyterian) in the courthouse on Sunday at 11 a.m, and 7.30 p.m.

SITUATION WANTED.

Cook, hotel or otherwise, wants to engage. Apply, P. POUPARD,
Tulameen Hotel, Princeton.

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper miuing shares.

PRICE: $5 in buokram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?
