Princeton Coal—Clean and best heating.

SIMILKAMEEN STAR

As a rule bad habits are stronger than good resolutions.

This is the 'railway age' of the Similkameen; see the development to accompany it and invest before high altitudes are reached in prices—Normal progress of this district is good enough; so called booms are unhealthy and subject to reactionary laws.

Vol. XI. No. 9. PRINCETON, B. C., WEDNESDAY, FEBRUARY 23, 1910. $2 a Year in Advance

EXECUTIVE AT WORK

Committee in Session, Act on Hospital and other Public Issues.

Resolution Passed for Dominion Public Building and Petition to Ottawa.

The Executive Committee of the Board of Trade met on Monday night, W. C. Brown in the chair, there being present Messrs. Avery, Bell, Brown Lumsden, Marlow, Murdock, Wardle and Wright. The rules of order and debate submitted by a sub committee were adopted.

J. D. Lumsden reported on behalf of the hospital committee that he had received a further reply from L. W. Shatford, M.P.P., giving assurance of his earnest desire to help the hospital along insofar as government aid could be obtained. After due deliberation, the hospital committee was urged to proceed without delay, call a public meeting and start a subscription list toward the hospital building. The Vermiliou Forks Co. had already given a site, six lots in fine location, valued at $1500, and residents of Princeton and district would be solicited to make up the balance of $1000, making a sum of $2500, which it was expected the government would supplement with an equal amount, as in other places, the total outlay, minus equipment being estimated at $5000.

Resolution and Petition.

The following resolution, to accompany a petition from the general public for a Dominion public building in Princeton was endorsed by the committee: 'Resolved, That the growing importance of Princeton demands separate housing, distinct from store or other business, for the postoffice, telephone exchange, inland revenue inspector and sub collector of customs, and this committee respectfully urges immediate action in satisfaction of the public wish and convenience.'

It was pointed out in the debate ensuing that better accommodation for the general public and P.O. box holders in having access to boxes at all reasonable hours as in other places, is required. In the matter of telephones it was shown that applicants for them are subject to unnecessary delay. The very marked discrepancy in telephone rental here and at Nicola was alluded to, Princeton subscribers paying double those of Nicola.

The Executive committee will report at the next meeting of the Board of Trade, March 7. Committee adjourned sine die.

Incorporation of the town of Merritt has been postponed by decision of the people of that growing burg.

LUMBER CO. ENLARGING.

The Similkameen Lumber Co., has bought the sawmill and lumber owned by F. P. Cook, the business thus transferred being carried on by the first named It is the intention of the Similkameen Lumber Co. to enlarge their facilities for the building trade and for this purpose have secured six lots near the railway station, which will be used as a lumber yard. This company will keep in stock all kinds of wood material used in buildings, as well as hardware for structural purposes.

RAILWAY RUMBLINGS.

Large Quantities of Supplies Moving to the Front.

J. A. Macaipin, chief of commissary for J W. Stewart & Co., the big railway contractors, is one of the busiest of men these days Large quantities of supplies are received daily by rail and then sent on to the various sub contractors now strung out along the eighteen miles of line recently let. Excellent sleighing affords good haulage.

The steam shovel began work last Monday on the arproach to the tunnel In a few days Hill's artillery will attack the rock 'forts' beiween here and Granite creek and the whole Jimhillkameen valley will resound with the bombardment. Let 'er go! We are waitin', yes, waitin'.

The Vancouver Province of the 11th inst. in its report of the proceedings of the Legislature says:

"Mr. Shatford, Similkameen, asked leave to present a petition for a private bill for the incorporation of the Penticton Railway company. As announced in the Province yesterday this bill will confer power for the construction of a line of railway from Penticton southward through the lower Okanagan valley to the international boundary line. It is no secret that the V. V. & E. Railway—which is the Great Northern railway in British Columbia—is behind the application. Connection will be made at Oroville, Wash., with the V.V. & E. railway"

The party of Great Northern surveyors working this way from Oroville are now this side of Fairview. The party comprising about sixteen in number, are taking plenty of time in their work, which is evidence that the survey now being made is final. The route between Oroville and this point is probably the easiest for railway building of any section in the province, and, should construction start in the spring, the end of summer should see railway communication established between Penticton and Oroville.

F. E. Groffman, Similkameen Lands and Mines, left for Spokane today.

Is Halley's comet responsible for this late cold dip? Or did Cook monkey with the pole and leave the cold air chamber wide open. Something 's wrong.

MINES AND MINING

Spokane Market Glutted with Coal and Combination is Suspected.

Big Coal Deal in Nicola and others on Tapis—Wagon Loads of Silver for China.

The coal market in Spokane is in a disturbed condition just now owing to the sudden filling of September orders, causing a glut. A regular and continuous supply of coal is the normal condition of the Spokane market, but, from some cause not yet made plain a vast volume has been poured into the city from the coal mines of Wyoming and other fields. There is good ground for suspecting combined action of producers and dealers to prevent inroads of Princeton coal on what they possibly construe as their preserve. They have reason to fear the encroachment of Princeton coal owing to its superior qualities but sooner or later this combine must be ousted from their stronghold. Once used, always used, is the chorus one hears from consumers of Princeton coal.

Options have recently been taken on a large number of Nicola coal properties, including those of John and James Smith, Henry Lindley and Barclay Bonthrone.

The Midway coal mine tunnel is now in over 140 feet.

The C.N.P. Coal Co. will shortly reopen the mines at Morrissey.

Ninty-two vessels are tied up in Sydney Harbor, N.S.W. as a result of a coal strike.

Three wagon loads of silver were shipped from Trail for China last week.

Work on the Swede group, at Poplar, is shortly to be worked by a wealthy syndicate.

TOWN AND DISTRICT.

The Passing Throng—Weather takes Slump to Zero, then Some.

E. Waterman, manager of the Vermilion Forks Co., returned last Friday from a business visit to Spokane and other Washington points.

G L. Fraser, manager of the Columbia Coal & Coke Co., was in town last week on his way to Lethbridge.

J. Nathan arrived trom yarious points, including Coleman, Alb., yesterday. He will plant 700 more fruit trees this year.

A dance party at the home of Mr. and Mrs. J. F. Waddell on Friday night at Allison was largely attended by friends of theirs. Two sleighloads of merrymakers from town, besides private rigs, enjoyed the ride in the crisp, moonlit atmosphere, returning just as chanticleer began to flop his wings and crow at early dawn. Everybody voted that it was a pleasant and enjoyable occasion, affording proof of the popularity of host and hostess who are now removing to Princeton.

Avery & Avery sold at mortgage sale on the 17th inst, the house and lot of Block 11, for $500, William H. Lambert, purchaser.

Walter Martin aud wife are removing to the Similkameen Lumber Co.'s millsite, where they will have charge of the large boarding house.

R. Fitzgerald was at the head of Bromley Creek recently and found seven feet of snow there. He reports fur scarce but large herds of deer are in the Granite Creek basin and are very poor. Stormy weather has prevailed on Granite Creek Summit since the 1st of January. He has quit trapping for the present.

W. G. Norrie was in town last week returning to Granite Creek Saturday, where he is surveying for the Columbia Coal & Coke Co.

The revenue from timber licences during the month ot January received by the provincial treasury amounted to $170,337.65.

F. A. Rose, of Groffman & Rose, arrived last Wednesday.

A. L. White, the furniture man, arrived last week from Greenwood.

Dr. Jackson, dentist, will be here all this week.

One of those very popular social dances will be held Friday evening in the I.O.O.F. Hall, beginning at 8:30 p.m. Good time, good music and a genuine welcome.

CHURCH OF ENGLAND.

By kind permission of the trustees of the school, services will be held (D V.) in the vacant room as follows:

8:30 a.m., 1st Sunday in March (and alternate Sundays until further notice.)

Holy communion—11 a.m., morning prayer and holy communion.

7:30 p.m., evening prayer.

Sunday school (as may be found convenient later.) Any teachers will be welcomed.—COM.

FAVORS SEPARATE BUILDING.

Regarding the isolation of government offices from stores or other business, no less an authority than the late member for Yale-Cariboo, D. Ross, writing to the Liberal Association in 1907, said: 'If a suitable building can be obtained I shall be very glad to do what I can to have all the government offices placed in one building under the charge of one man. This policy has been successfully carried into effect elsewhere and I am confident that it can be made effective in Princeton. It has also the distinct advantage of being such a policy as will commend itself to the public.' Further comment is unnecessary.

LAYING THE FOUNDATIONS OF A TOWN.

The year 1909 was the best in a commercial and progressive sense in the history of Princeton. Large increases in the volume of trade, building operations and public improvements were noted. All these are mere processes through which the foundation of every town and city must pass. Nothing more surely points to the prosperity or importance of a place than the progress made in its infancy. Just as the child is healthy, growing and well cared for, so will its manhood be vigorous and strong. Still in its infancy and its growth retarded for years back by the long looked for railway, Princeton now makes its bow to the world and takes its part in the western drama of development.

If vigilance is the price of victory so also is well directed energy the price of success. Having once, as residents and taxpayers, put our hands to the civic plough, there must be no folding of hands or idle lamenting over what might have been. Towns and cities do not grow by chance or good luck. Ceaseless care and attention must be given to all that pertains to their welfare and development. In an unorganized community, until municipal self-government arrives, every taxpayer and citizen is or ought to be an unsworn alderman working for the common interests as though he had a thousand votes behind him. Cohesion of this kind must and will win.

As a distributing center with vast coal and ore resources Princeton has unrivalled and unquestioned opportunities. Nature has done her part; it remains for citizens to do theirs. Some matters that demand immediate attention are the hospital, grading of streets, sidewalks and Dominion public building, (it is generally understood that an auxiliary company of the V. F. M. Co. is organized for the purpose of installing waterworks and electric light this year). Every sane citizen admits the necessity of a hospital. Every town with any pretensions toward modern civilization has its hospital for the proper care and attention of patients, rich or poor. On humanitarian grounds alone there is sufficient reason for building a hospital but there are business reasons also which must be considered. As an asset of the town it will well repay the investment. The fact of a hospital being in a town gives it a standing and is an inducing factor to people to reside here in the sense that schools and churches are. The hospital proposition now before the people of Princeton and district is worthy of their generosity and best efforts. The grading of streets and building of sidewalks must be carried out. As the town is and always has been a large contributor of taxes into the provincial coffers it is our undoubted right to expect if not all, at least a goodly proportion of them, returned for needed road and street improvements. It does not require any imagination to see dust ankle deep on Vermilion avenue next summer and clouds of it whisked through the air to the discomfort of all. In past seasons vehicles and passengers have been so enveloped in this dust as to be completely obscured from view What will it be this year with a very heavy traffic from the railway station? Sidewalks along Bridge street and the completion of that on Vermilion avenue to the school house and the station are absolutely necessary. The need of a Dominion public building for the convenient and proper service of the people has been apparent for some time and men of all shades of politics have been outspoken on the subject.

The initiative for the improvements above mentioned must come from the citizens themselves in the usual form of a petition to the provincial and federal governments. If there be no asking there can be little hope of receiving. United action will produce the desired results.

NOTES AND COMMENTS.

In some of the eastern cities an agitation has begun to stop the big hat nuisance at all meetings. Women are to be respectfully invited to lower their big headgear at the doors of churches, theatres, &c., or wear smaller hats. Why not return to the old style and go bareheaded?

The debate in the commons on the navy question goes on cheerily. Apparently a large majority of members are in favor of a Canadian built and owned navy. The sum of $150,000 has been proposed for a naval college at Halifax as a means of providing technical training. Naval and shipbuilding yards are also proposed. The German war scare is nothing but political clap-trap which the jingoes are working for party ends, hoping thereby to slip into power through some fluke. To make the mother country a gift of many millions of dollars to tide over the unmanly and silly fright of the Germans is not good business, indeed any Canadian is 'dead easy' who upholds such an idea. It is not sentiment, but business, that knits Britain to her colonies, then why should Canada grow so suddenly sentimental? Only in case of decrepitude should the children provide for the parent, the greatest Lawgiver saying that the parent should 'lay up' for the children. The British embargo on Canadian cattle is a fine example of business before sentiment. The Monroe doctrine renders Canada immune from subjugation or annexation by any foreign power and we have no reason to take part in a senseless war scare of featherbed patriots and squander millions of money which are needed for development of this new country.

THE PHILOSOPHY OF LIFE.

Those who have time to burn never throw any light about them.

Great opportunities never come by chance. All things work according to law.

Nothing in this world that is worth doing is really impossible.

A lot of people are turning greyhaired and sallow minding other people's business and criticizing their superiors

The philosophy of life is such a deep study that mere theory can never explain —it must be lived and experienced.

A man may think his misdeeds are undiscovered. The law of compensation silently gets busy when unfair or crooked acts are committed.

Some young persons cannot give even a lame excuse for carrying a cane.

We would all go to heaven if we could manufacture our own religion.

Even a newspaper editor, who is supposed to be all things to all men, cannot please himself and everybody.

You can't always teli from his shoes whether a man is 'well heeled' or not.

An old saw says, add pence to pence for wealth comes thence.

GENERAL NEWS.

During January the Granby mines at Phoenix shipped 112,458 tons of ore. During that month the Granby smelter treated 3.500 tons a day.

The C.P.R. will spend $50,000 building a wharf at Summerland this year.

Thirty millions of dollars will be expended by the C.P R. this year in building railroads in the west.

About $5.000 monthly goes out of Nelson to the coast for real estate. Princetonians are more loyal to their town and invest at home.
