Princeton expects every citizen to do his best.

SIMILKAMEEN STAR

Fear of punishment will not make a man honest or truthful.

Without any imaginary or delusive methods Princeton and district recommend themselves to the homeseeker and investor—Payrolls are the logical result of investment and industrial energy and these result from natural resources: Coal, iron, copper, gold, platinum, diamonds, are found here.

Vol. XII. No. 32. PRINCETON, B.C., WEDNESDAY, AUGUST 2, 1911. $2 a Year in Advance

WEALTH OF MINERAL

Coal Measures of Princeton Basin Vast Tonnage of Good Fuel.

Too Good to be Classified as Common Lignite, is Known Generally as Semi-Bituminous.

[Continued from last week.]

'They are thick beds of sandstone, with clay, shales and several seams of lignite. The base of the series appears to be a very coarse grained sandstone containing many large rounded white feldspars in a matrix of calcareous material. This rests on the eastern side of the basin, on the Copper mountain series of rocks, while on nearly all other boundaries the sediments dip under the more recent volcanic rocks, which lie as sheets on them. In parts also these volcanics have thrust themselves through the sediments and now appear as islands in the older rocks. The strata do not lie horizontally, but have been tilted at low angles, making an irregular series of folds. Some faults also occur.

"Many drill holes have been bored in this tertiary basin in search of lignite seams, and with some good results. Most of them, however, were put down at or near the western edge of the basin. By the kindness of Ernest Waterman, copies of the records of these drills have been obtained. These have disclosed the thickest seams to be in the vicinity of the town of Princeton where a bed of more than eighteen feet in thickness was struck at a depth of 49 feet below the surface. The hole in which this seam was found was sunk near the bridge over the Similkameen river to a depth of 180 feet. In this hole seams aggregating 35 feet 7 inches, were crossed in the first 90 feet, while the rest was in shales and sandstones.'

After giving tables, showing two drill holes, Mr. Camsell proceeds: 'The deepest hole bored in the whole basin was Blakemores's No. 2, sunk to a depth of 1000 feet at a point on the Similkameen river, about two miles above Princeton. The only workable seam was struck at 676 feet. This was found to be 10 feet 7 inches thick, with a clay parting of six inches near the middle of it.' (The record of this hole, quoted in detail by Mr. Camsell. shows the occurrance here of 14 seams, 13 of which varied in thickness from one inch to eight inches. The total thickness of coal, including the large seam above mentioned, is 15 feet). Continuing, Mr. Camsell says:

'Four miles up the Similkameen river a bore hole, sunk to a depth of 257 feet only went through 2 feet, 5 inches of coal, while a drill hole near the south end of the basin at Ashnola, which penetrated to a depth of 398 feet, gave no workable seams at all, and only a few bands of what has been called in the record 'coaly shale'.

'A bore hole was also drilled near the western edge of the basin, where the sediments dip under the volcanice, and not from where there is an outcrop of coal four feet thick. The depth of the hole is 863 feet, and in that distance 17 seams of coal were cut through, with an aggregate thickness of 50 feet 6 inches of which the thickest seam was nine feet.

'From a study of these records it would appear that most, though not all, of the workable seams are within 300 feet of the surface. It must be noted, however, that no prospecting by drilling has been

Continued on page 4.

EAST PRINCETON NOTES.

From Our Own Correspondent.

East Princeton, Aug. 1.—H. A. Solly and J. Coulter White of Summerland, and H. Murk of Penticton were visitors here last week and purchased a number of lots.

Good progress is being made on the large, solid masonry buildings in which cement will be manufactured.

Applications for lots are going to the head office every day.

Over forty men are at work grading the railway spur to connect with the main line.

The clearing of the townsite has been completed.

Fishing and picnic parties are very much in vogue. Probably nothing could be more entrancing than seated these warm days with a good friend by one's side, watching the trout and the pollywog sporting in the shaded nooks of rippling Onemile. There is such a thing as having bait on both ends of the rod. It is so romantic and poetical. Myomi!

Superintendent Osborne and family have taken residence at the cement works.

It is reported here that the Tullahard ranch has been sold for a large figure.

'DELAY!' THAT AWFUL WORD.

J. H. Kennedy, construction engineer of the 'V.V.' arrived yesterday from the coast and went up the line to Coalmont today. It is understood that the line is to be re-revised in the hope of improving the grade. There will be two parties of surveyors in the field, one on this side of the summit and the other is now working east in the Coquihalla pass. In view of the amount of work to be done in this revision and the 'jog along' speed with which it will be carried out, there is very little likelihood of any grading being done this year on the last remaining link to give Princeton direct connection with Vancouver. This is 'hard luck' and rather more than was expected from Jim.

LOCAL AND GENERAL

Showers Instil Life and Growth in Crops — Country is Prosperous.

Visitor Sees Great Mineral Resources and Notes Apathy in Regard to Them.

N. Thompson, representing a large Sheffield, Eng., steel firm was in town yesterday on his first visit. He is very pleased with Princeton and its abounding resources. Mr. Thompson wonders at Vancouverites straining to obtain the trade of districts a thousand miles away when right at their back door endless mineral wealth existed. Let them agitate for completion of the VV railway rather than a line to Peace river.

G. L. Fraser and family of Coalmont were visitors to town last Saturday.

See Carle, the grocer, about your cucumbers, tomatoes, apples and all other fruits and vegetables. Order now. *

Dr. Cameron left last week for the coast going via Nicola. Before going he entertained friends with delightful music on the concertona, an instrument which responds to his musical genius with a realism almost human. He left a record on Mr. Soutter's gramophone as a memorial to tillicums. Come again, doctor.

Superintendent Holden returned from a trip south last week and the Princeton Coal Co's mine is now shipping about one hundred tons daily.

A splendid program will be rendered at the band concert on the 18th inst. Will you be there? Yes, of course I will.

L. W. Shatford, M.P.P., arrived in town last Saturday in his mile-a-minute go devil. The machine kicked up such a dust on the dry roads that his respiratory organs became clogged and he was taken to the hospital for treatment. As a dutiful representative Mr. Shatford is a great traveller, keeping in close touch with his constituents. He recovered quickly and left on Monday for Vancouver.

COALMONT NEWS.

(From Our Special Correspondent.)

Coalmont, July 28.—Mayor Matheson and Mr. Faulkner of Phoenix, B. C., stopped here for a day last week en route to Ft. George on motorcycles. Messrs. Morrin and Cosgrove, also of Phoenix, were here for a day and all invested in Coalmont real estate. Barney had a mishap and got wet while crossing the Tulameen on horseback.

The boys of Coalmont entertained at a jolly supper party on Thursday evening at their pretty bungalow, 'Saint's Rest.' The table decorations were carried out in pink and green with a beautiful center of sweet peas. Mrs. Sing chaperoned, the guests being Miss Parrish, Miss Fraser, Miss Atkins, Misses Mabel and Nellie Parrish of Winnipeg and the Messrs. Dickson, McTavish, Heimbecker and Williamson.

MINES AND MINING.

Alex. Burnett, superintendent of the Lone Star mine for the B.C. Copper Co. near Greenwood, is here on mining business and goes to Copper mountain.

Messrs. Bates and Davis, mining men of Spokane, arrived recently.

The Princeton Copper Co., R. Stevenson, manager, will start work shortly on their properties.

C. O. Day came down from Whipsaw with a cut foot, inflicted while adzing timber for a track in the Lucky Pair. He expects to be at work again in a few days. The large ore bin at this mine has been completed.

Sam Spencer and Hughie Campbell are developing their high grade silver lead properties at Whipsaw.

On the Brown-Bulldog mineral property near Hedley and alongside the railway track there is a solid ice glacier outcropping beneath a rock crevasse. Here the thirsty railwaymen take their supply of ice and they bless Brown for having tapped this cold storage ledge. It is up to some wideawake Yank to tame the goats on the mountains above and start an ice cream factory next to the Brown-Bulldog, Now everybody knows why Brown was always cool holding four aces, thinking in millions or closing a deal for a gold mine.

Con Fewclothes arrived from Cambie creek the other day with some specimens of fine copper ore.

Col. Robert Stevenson, the veteran mountaineer and mining man, struck the camp last week looking fit and hale. He is now 73 years young, his hair and complexion showing little trace of the stealthy march of time. He has succeeded in obtaining some choice English capital with which to bond some of his best mineral properties. A legion of friends will be glad to hear of Mr. Stevenson's good prospects and hence his contribution to development of Princeton and district.

Chas. Camsell says that 23-Mile camp has the most convincing evidences of mineral wealth he saw in the Skagit valley.

THE ELECTION CAMPAIGN.

The date of the Dominion general elections has been fixed for Thursday, September 21, dissolution of parliament having taken place last Saturday. The campaign now on will be one of the

LOYALTY AND RECIPROCITY.

While there is a disposition in the minds of some of our public men and also in the hearts of certain editors to belittle the position to which Canada aspires, a nation within an empire, it is most refreshing to find outside opinion, unbiassed by political affinity, praising the spirit of independence possessed by patriotic Canadians. Freedom is not inconsistent with loyalty, neither is manly independence inconsistent with unity. If Canadians did not evince a spirit of self government up to the point of nationhood it would brand them as an incapable people. For it is the ambitions and aspirations of a people which give the cue to their strength and ability. Nothing should please the motherland more than to see her colonial children being weaned gradually from that weak and childlike dependence which stifles progress. There will be no separation from the parental roof if the home is made inviting and commands the respectful loyalty of the maturing members of it. No Canadian of intelligence or with the manly pride in his native land which characterizes all true sons wants to exchange the flag under which he was born. The talk of annexation to the United States is the greatest bugaboo ever foisted upon the Canadian public and will not cut any figure with thoughtful men.

The Premier of Tasmania, on his way home from the coronation recently said in Vancouver that Tasmanians 'are learning much from Canada and its splendid system of attracting immigration is a source of keen study to our officials. I am jealous of Canada s wonderful growth and phenomenal development, especially her solid commercial present and future, but I am proud to think that she is a most powerful factor in our British empire, and an object lesson to other nations of what British dominions can attain under British rule.' Such words are refreshing and encouraging for Canadians to keep right on with their nation building. The problem of empire cannot be solved by sentimental gawkies who profess to see in reciprocity and its consequent expansion of trade with a foreign country the hideous spectre of annexation. Partyism is indeed run mad when the libertine of politics will with eyes wide open, aye, and mouth too, oppose himself to fact and his country's welfare all for the passing satisfaction of posing as a patriot while denouncing his Liberal fellow countryman as a traitor. It is much to be regretted that the Conservatiye party has not shown any desire to share in the glory of passing a measure of such national importance as reciprocity. Ignoring the broad principle of the reciprocity measure, expansion of trade and more friendly relations with a great neighbor nation, the Tories narrow the question down to a mere party issue.

Britain and the United States are on most friendly terms and anything Canada may do to add to the existing cordial relations is in line with the spirit of the times—universal peace. Militarism is dying and but for a few bloodthirsty jingoes in every country who smell national insult and menace from afar, there would be less of mad armaments weighing down the nations with poverty dooming burdens. The glamor and jingle of military parade appeals only to the morbid appetite, and this unrestrained plunges nations into senseless war with its concomitants of misery, woe and hades generally. To minimize the probabilities of war between two nations the primary conditions of trade must be fair and free. The moment restraint is placed upon trade a thousand festering ills, internal and external spring into existence. Some punctilious customs official may cause strained relations between nations and under the fostering influence of a protective tariff monopoly thrives and trusts flourish. It is therefore the plain duty of every citizen to support any legislation that will promote peace within and along our international boundary. Although reciprocity is only a half measure yet it is a step in the right direction, the ultimate goal being free trade, which is natural trade. The glorious example set by Britain to the whole world is having its effect in mellowing the minds of leading protectionists in America and now there is reciprocity in that country pointing to full and free trade. Is it too much to expect Canada to follow in the good work and adopt reciprocity? If the Conservative leaders so please they may save this country the turmoil of an untimely election by consenting to reciprocity in the house, otherwise they must bear the odium of certain defeat on a question which is already sanctioned by the two leading English speaking nations. In a spirit of honorable compromise these leaders could at least give reciprocity two years' trial. For the welfare of the country and the good of the Conservative party Star hopes some agreement will be reached to avoid an election.

THE NEW TOWN

EAST PRINCETON

A Payroll City

Manufacturing is the Backbone of GREAT CITIES

The British Columbia Portland Cement Co's Plant represents an expenditure of a Half Million Dollars and will manufacture Portland Cement of the highest quality, Shale Brick, Lime, and Vitrified Clay Products.

The United Empire Co. is now producing a Sub-Bituminous Coal of first quality for domestic use. This Company is also opening up immense Copper deposits which will require a large reduction plant.

Other mining companies operating near East Princeton are spending large sums in development and will employ many men.

Do You Realize what Industrial Works and Payrolls mean to a city?

EAST PRINCETON, A MODEL CITY, PARKS, CEMENT SIDEWALKS, WATER

Invest now and watch your investment grow with the town. For full particulars see

D. G. McCURDY

RESIDENT AGENT.

Or write RAYMOND E. WARD, Pacific blk, Vancouver.

R. H. Parkinson has bought south half of Al Johnson's ranch on Riverside.

Aug. Thomas, vice-president of the Nelson Brewing Co., is now manager of the brewery in Princeton.

What about that 'dark horse' the Liberals are going to enter in the great race on Sept. 21? Stay with it Bert.

Podunk Davis is repairing the Allison bridge.

Coalmont Townsite

Beautifully situated on the Tulameen River, 14 miles west of Princeton, B.C.

The main line of the V.V., & E. runs through the town with depot to be built on the property.

Tracklaying will be completed by October 1st.

The Columbia Coal & Coke Company, Limited

Now engaged in opening up their property here, have over TEN SQ. MILES OF COAL LANDS. THE COAL IS OF THE HIGHEST BITUMINOUS TYPE, AND IS ONE OF THE LARGEST BODIES OF COMMERCIAL COAL YET DISCOVERED ON THE NORTH AMERICAN CONTINENT. The workable seams are 6 in number, varying in thickness from 4 to 60 feet each.

300,000,000 tons can be extracted

A plant of the latest type, capable of handling an output of 2,000 tons every 8 hours is to be installed immediately. This will include a modern coal washing equipment.

Lots are Now On Sale at Prices Varying from $175 to $550

Terms ¼ Cash, and Balance over 18 Months

Reservations made in order in which deposits are received.

WEALTH OF MINERAL.

From First Page.

done north of the Similkameen river.

'The coal basin undoubtedly extends some distance north of the Similkameen river and beyond the limits of the sheet mapped, for outcrops of lignite and sandstone were found at the mouth of Summers Creek. Two miles up this creek the sandstones are well exposed on the banks of the stream, and here found to be overlain with recent volcanic rocks. Farther north they appear to dip below the surface, but it is very likely that other areas of these coal measures may be discovered outcropping in places between here and Nicola Lake.

'Lignite outcrops in many places, both on the Similkameen and Tulameen rivers also on Summers creek, Bromley creek and Ninemile creek. At the last mentioned place a cut in the bank made by the stream discloses a bed of 15 feet in thickness of fairly clean lignite, with five very thin partings of clay, and all resting on white clay.

'A selected sample of coal from the 18 foot seam at Princeton worked by the Vermilion Forks Mining and Development Company, was sent to Mr. Hoffman of the Geological Survey department. After analyzing it he found it to be a lignite, but one of the better class. Analysis by fast coking gave the following result:

Suspect

(To be continued.)

THE ELECTION CAMPAIGN.

sharpest in the history of Canada. Appeal is made to electors on the question of reciprocity with the United States, and owing to the large interests involved, particularly those of the farmer and manufacturer, a large amount of oratory and argument may be expected from both parties. Who the Liberal candidate is or will be has not yet been announced. The member for Yale-Cariboo, Mr. Burrell, is, no doubt, the Conservative candidate, although conventions of either party have not yet been held. It was not officially known here until the Star's second page was printed that the elections were on, so startling and unexpected was the announcement for such an early date.

Presbyterian church services.—Sunday school, 11 a.m. Evening service in the court house, 7:30. Coalmont—Morning service, 11 a.m. Rev. G. A. Wilson, superintendent of Presbyterian missions for B.C., will preach next Sunday morning at Coalmont and in the evening at Princeton.

Methodist church service, Sunday, Aug 6. In the Oddfellows' hall, 7:30 p.m. Service at the cement works at 3 p.m.

Anglican church services, for Sunday next, August 6th, in Princeton school house: 11 a.m., matins, holy communion and sermon; 7.30 p.m., evensong and sermon. James Williams, incumbent.

Christian Science lesson-sermon, subject, 'Spirit': It is the spirit that quickeneth; the flesh profiteth nothing.—John 6: 63.

A Joy to Ride in.

Two-wheel cart, shafts; single buggy, buckboard style; hacks, two seaters. Guarantee with every rig sold. The good roads and the beautiful drives in and about Princeton will always create demand for pleasure driving and what form of driving can equal that of a spanking team and a Studebaker carriage, going a 2:40 gait down the country boulevards. There is exhilarating pleasure in driving unknown to gassy chug-chug.

Take a Look at these Wagons and Carriages and get prices before buying elsewhere.
