The Coast is waiting for fine, Princeton domestic coal

SIMILKAMEEN STAR

Self righteous persons, blind to own faults, see many in others.

We hear the tread of pioneers,
Of cities yet to be;
The first low wash of waves where soon
Shall roll the human sea.

Vol. XI. No. 6. PRINCETON, B. C., WEDNESDAY, FEBRUARY 2, 1910. $2 a Year in Advance

SEES PROSPEROUS DAYS FOR PRINCETON DISTRICT.

Hon. E. Dewdney came up from Victoria last week, leaving for home on Monday last. The 'Governor' is in fine health and spirits after his trip to the Old Country. More than any other man in the province he has opportunity for learning the trend of events and the business prospects generally throughout the Dominion, besides his wide knowledge of the political and commercial history of B.C. make his opinion valuable and reliable. He thinks Princeton and district are on the brink of prosperous days, due very largely to the keen interest taken in the coal and ore resources of this section. He notes the lack of Dominion government buildings here, and thought waterworks, electric lighting and good sanitation necessary for a growing and progressive place. It is proposed to increase facilities for the manufacture of lumber by the Similkameen Lumber Co., in which Governor Dewdney is largely interested, the addition of an uptodate dry kiln being one improvement and an extensive cribwork to enclose log pond is also to be carried out. The Governor expects to return to Princeton shortly. He is so favorably impressed with conditions here, together with the excellence of the climate, that he may take up permanent residence in this section before long.

RESOLUTION REGARDING IRISH SELF GOVERNMENT.

That much inte est is taken in British politics, even in far removed Princeton, may be observed by the following resolution passed by Orange Lodge No. 2102 at its last session, Jan. 25th: "Resolved —That we, members of Loyal Orange Lodge, No. 2102, Princeton, B. C., believing in self government in local matters as a solution of many troubles now perplexing British statesmen regarding Ireland, and having in view the peace, comfort and welfare of our brethren in that country, beg to respectfully recommend for the consideration of His Majesty's government in granting a measure of home rule, that two self governing legislative bodies be formed, thus separating the dominant and opposing religious elements, thereby promoting peace and harmony." Copies of the resolution were ordered to be sent to the Worshipful Grand Master of British North America, to the Colonial and Home Secretaries, and to the Hon. Joseph Martin, member elect for St. Pancras East, London.

A party of mining engineers are at Granite Creek taking levels and defining the North Fork coal basin preparatory to putting the mine in shape for operation when the railroad reaches that point

Lewis Hind, M.E., Victoria, was in town yesterday on mining business.

RAILWAY AND COAL

Time Proves All Things: No Doubt Whatever About Hope Route.

Vancouver Must Benefit Largely by Completion of Road, Bringing Similkameen Trade.

Jim Hill's statement that he would build his railway line over Hope Mountain is about to be realized. It was learned this morning from A. E. Howse, who has just returned from Princeton and the Similkameen district that the Great Northern has let the contract for another 18 miles of road from Princeton. Some time ago it was announced that the contract for 50 miles of road from the Abbotsford side had been let to Foley, Welsh & Co., who have secured this contract, and together with the latest contract let there is now left but a distance of 34 miles of road to be constructed over the Hope Mountain to form the connecting link in the line.

Mr. Howse states that the people of Vancouver and vicinity cannot realize what the new line will mean to them commercially, and that there was a tremendously large reason back of Hill's daring feet of engineering is seen from a few facts about the country as related by Mr. Howse.

"The new line,' he said, "will throw a large part, if not the greater part, of the Similkameen trade to Vancouver, and will open one of the richest coal-bearing districts in the entire country. This trade at present is being diverted to Spokane, Washington, which is benefitting greatly thereby. However, Vancouver is the logical point of outlet for the thousands and thousands of tons of coal that must be sent out from the district. The coal itself is lignite, of the best imaginable quality for house use, and there are 20,000 acres of it untouched as yet. The entire town of Princeton is underlaid by a great coal seam, the wealth of which can hardly be realized. —Vancouver World.

HOSPITAL COMMITTEE MEET.

A private letter received by J. D. Lumsden, member of the Princeton hospital committee, from L. W. Shatford, M.P.P., urges immediate action in supplying him with data and amount required in order to place a sum in the estimates now being compiled for the fiscal year. A full meeting of the members of the hospital committee is called at 5 o'clock in the office of the Bank of Commerce (Tuesday, Feb. 1.) This matter is very urgent and the thanks of the community are due Mr. Shatford for his kindly interest.

THE WEEKLY GRIST

Personal, General and District News Boiled Down to Pithy Paragraphs.

Robins Came a Little Early but Halley's Comet Arrives on Time in West.

You mean mother's underwear.

The robins and crows came a little early last week, a touch of zero weather having caught them unawares. Who does not welcome these feathered friends, and who would not scatter grain or crumbs for them on a frosty morning?

Turn your optics toward the western horizon about sunset and try to locate the old man Halley's comet. It is approaching the earth at a speed of about a million miles a day and will be nearest Princeton some time in May.

The smoker to be held in the I.O.O.F. hall on Friday evening is expected to produce some real fun and a good time is anticipated. Clean sport, boxing and wrestling, step dancing are on the program. Refreshments will be served. This is the first smoker held in Princeton and on its good management will depend largely the success and popularity of future ones. See it and then be in a position to know whereof you speak.

Geo. H. Broughton, D.L.S., left on Monday for Penticton, having been engaged in this section surveying several properties. He will be at Princeton again as soon as business demands his presence.

It is reported that agents of the Great Northern have purchased T. Rabbitt's ranch above Granite Creek. It is said that the ground will be required for the location of coke ovens for the treatment of North Fork coal.

At the residence of the bride's mother on the 30th Jan., by the Rev. J. Thurburn Conn, Frederick Johnson to Amelia Faust.

A. Murchie left for Westbank, in the Okanagan district, yesterday, and expects to return in the early spring.

H. Massonat, watchmaker and jeweler, threatened with appendicitis, has been detained at Keremeos for the past week or two on medical advice in the hope that an operation might be averted. He is making fair progress, which, it is hoped will lead to quick recovery.

'Chatty' Chatterton, representing R. P. Rithet & Co., was in town last week. He is the same old familiar spirit and always looks forward to the time when he will settle down here.

Col. Stevenson returned Saturday from a trip to Spokane, and chief coast cities. He met many old tillicums who made urgent inquiries about this section. He predicts a boom in Similkameen minerals this year.

F. E. Groffman, of Groffman & Rose, Similkameen Lands and Mines, went down to Spokane yesterday on a business visit and expects to return Monday next.

W. J. Sanardge, of Coleman, Alb., coal expert, was in town yesterday and went up to Granite Creek.

Mr. Marshall, of Spokane, interested in the United Empire mining deal, was in town recently.

Board of Trade meeting next Monday night at 8 o'clock.

RUNAWAY ACCIDENT.

An accident that might easily have had a very serious ending, occurred to Gordon Murdoch last Thursday while coming down the trunk road near China creek. He had a sleigh load of wood, which got beyond his control, the horses being unwilling or unable to check the speed which resulted in upsetting the whole outfit. Mr. Murdoch was badly bruised and cut, receiving a fracture of the jaw and a rib. His nephew, on the load with him, jumped in time to escape injury. It will be some days before the patient is able to be about. Many friends will be glad to hear of his complete recovery.

WAR VETERAN MAY YET BE MODERN CRŒSUS.

H. Avery, sr., is a lucky man. As a veteran of the historic Fenian raid in 1866, in which he served his country with gallantry and distinction throughout a long, strenuous and bloody campaign, he was presented by the government (Cons.) with 160 acres of fertile agricultural land in northern Ontario near the line of the transcontinental now building from ocean to ocean. The title carries with it all mineral deposits. Mr. Avery's land is in the Porcupine district, which gives promise of rivalling the celebrated Cobalt silver mines. Ore in some discoveries run as high as $1,000 per and an old fashioned stampede of miners and prospectors is on. Mr. Avery has inquiries about his property but he is not anxious to sell. The whole acreage may yet prove to be ore producing, in which case Mr. Avery would be rich enough to buy and sell such men as Jim Hill and Andy Carnegie. May it be so.

STANDING OF PUPILS.

The following is the attendance for January of the pupils of the Princeton Public School, and the standing in their respective classes.

Pupils attending 29. Average daily attendance 26.95.

1st Pr. Ronald Hewat, Kathleen Kirkpatrick, Fred Gulliford, Eda Cook, Henry Allison.

NOTES AND COMMENTS.

Municipal ownership is fast becoming popular in every civilized country. In eastern Canada and the Old Country, wherever the experiment has been tried, much satisfaction has resulted. In the small town of Prescott in Ontario a year's trial of municipal ownership of water and light has just proven a profitable and in every way satisfactory venture. The necessaries of life, such as water and light, and travelling facilities, ought to be so cheap that the poorest citizen would not be stinted.

It seems now that Britain is to be again put in the political campaign crucible and submitted to the fiery test of purification. It is to be regretted that the working class of Britain will not accept or endorse a policy which aims to remove certain inequalities in taxation, and make of the house of lords a workable and sensible legislative institution. The will of the people as expressed in the house of commons becomes a burlesque of the most farcical kind when a collection of non-elected aristocrats apply the veto. Our Canadian senate is farcical enough as an appointed body but it must not be compared with a pedigreed, hereditary house, composed largely of men who have no other qualification for legislator than that of being their father's son.

There can be no real unity of the British empire among its widely separated colonies unless there is something more tangible than mere sentiment. A business compact as well as a defensive alliance must be formed if the unity of the Empire is to be maintained. John Bull cannot expect his sons and daughters across the seas to see things as he does through his old age lenses. Ever since the Boston tea party John has been more indulgent with his children, but he must treat them as equals and admit them to his counsel chamber if he would have their support in times of German or other equally ludicrous invasion.

What makes our Canadian senate weak and subject to distrust is the party hue it takes on, according to the predilections of the government appointing senators Legislation is largely horseplay when it is run by a clique, faction, compact or a set of men who owe their appointments to the party from whence they sprang. Remedial measures should be instituted and if possible a more logical form of government evolved before the people become entirely disgusted.

A large number of strangers and returning pioneers are expected in Princeton this year. This year is the deciding one, for the development and progress of the town and district will give some tangible clue to the future. Much hinges on the individual efforts of citizens to impress visitors with the permanency of the town. Sidewalks, electric light, waterworks and street grading are necessary. It would be a misfortune to allow promising investors to gain a pessimistic view of the town for want of a little enterprise. The government should improve its own property here with fences and sidewalks and continue the good work of grading between the Similkameen and Tulameen bridges. Last year, when grading was in progress an oversight of the road superintendent permitted a hump in this road that destroys a beautiful perspective from bridge to bridge. At slight cost this can be removed and a culvert so placed as to remove the accumulating waters of a freshet. Sidewalks to the station and to the bridges are very needful and these must be provided for in some manner, even to the extent of incorporating the town. Adequate fire protection and strict sanitary regulations demand early and serious consideration. What remains to be done in regard to a general hospital will be determined and announced by the board of trade.

NOTICE.

Take notice that I, F. A. Rose, of New Westminster, B.C., intend to apply for a licence to prospect for coal and petroleum under the following described lands situate in the Similkameen division of Yale district near Princeton, B.C.

Commencing at a post planted on the north line of lot 815, 20 chains west of the N.E. corner of said lot 815, and marked F. A. Rose's S.E. corner, thence north 80 chains, west 80 chains, south 80 chains, and east 80 chains to point of commencement:

POINTERS FOR KNOCKERS.

Knockers should observe the following rules if they want to do themselves full justice and really merit the name they have acquired :

Run the place down to strangers.

Oppose improvements.

Fight shy of the board of trade: ridicule it every opportunity.

Be particular to discredit the motives of public spirited men.

If a man wants to buy your property ask him two prices for it. If he wants to buy anybody else's, interfere and discourage him.

If he is a newcomer and pays cash for his goods, charge him 10 to 25 per cent. extra, he won't tumble to the game ; but he may leave town suddenly and locate

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: $5 in buckram with gilt top, or $7 50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?
