Princeton—like Rome—all roads and trails lead to it.

SIMILKAMEEN STAR

Divine Love always has and will meet every human need.

Without any imaginary or delusive methods Princeton and district recommend themselves to the homeseeker and investor—Payrolls are the logical result of investment and industrial energy and these result from natural resources: Coal, iron, copper, gold, platinum, diamonds, are found here.

Vol. XII. No. 31. PRINCETON, B.C., WEDNESDAY, JULY 26, 1911. $2 a Year in Advance

THE WEEKLY GRIST

Tracklaying Begun at Last with First Crossing in Sight.

Owing to Strike Coal Famine with Attendant Hardships in Winter Is Predicted

The Ladies' Hospital Auxiliary beg to thank the public for their patronage of the recent social, making it the success it proved to be, and also sincerely thanking A. Oelrich for his generous contribution of strawberries for the occasion.

W. H. Colquhoun, representing Guthrie & Co., tracklaying contractors, has steel laid through the tunnel to the first crossing of the Tulameen. The bridge builders have not arrived as yet and soon the harvest days will be over. What about that 'rush' Uncle Jim talked about at Seattle and Vancouver a year ago regarding early completion of the VV to Vancouver? Where are you Jim? Gone a-fishin'?

R. E Ward, agent for East Princeton townsite, left for Vancouver after selling a number of lots.

Crops on Onemile will be good and the ranchers are happy. At the Hagerman ranch an average yield of hay and grain will be gathered. This excellent ranch has vast possibilities of production when its 300 acres are in use.

At Victoria, on the 20th inst., Major G. M. Heinekey departed this life. He was a citizen of Princeton about a year ago and was much esteemed.

Luke Gibson is a visitor from Hope for a few days.

Summerland hospital is about to close for want of patients.

W. C. Nicoll, of San Francisco, was a visitor last week and may reside here permanently.

Relying on common report Star erroneously stated last week that 160 lots had been sold to a Vancouver syndicate. Instead, it should have said that 15 lots have been purchased in different parts of the town by Vancouver people.

A new lumber town will be started at the mouth of Silver Creek two miles below Hope and the C N.R. will lay out a town half way between Hope and Popcum.

A rather unusual case of one lawyer suing another for debt has developed at Penticton in which Gahan vs. Kelly afforded the cast for the comedy.

The Superintendent of provincial police, F. S. Hussey, died last Friday at Victoria.

C. O French returned last week from Victoria where he was in consultation with the government. He has recently purchased a fruit ranch in 'Sammyland' and like thousands more is waiting for the V.,V. & E. to be completed.

See the ad. for tenders issued by the Coalmont Hotel Co., L. Marcotte, mgr.

Mildred I. Schisler passed the high school entrance examination with 569 marks.

C. V. Semerad has a half section of valuable land near Edmonton which he acquired about ten years ago very cheaply and is now worth about $100,000.

The Tulameen hotel recently received a pair of splendid black eagles which are mounted in the highest style of the taxidermist's art.

Max Wilson shows oats 6 feet high loaded with well filled grain—evidence of good soil and climate.

Knudson & Rainbow, contractors and builders, are at work on a fine dwelling house for Forsyth Bros.

MINES AND MINING.

With the payment of a $6 quarterly dividend on June 28, the Calumet & Hecla Mining Co., has returned to the shareholders, since incorporation, a tota of $115,450,000. When it is taken into consideration that this has been done on an issued capital of only $2.500,000, the achievement ranks as one of the most remarkable in the history of American industries. The report is made that the Calumet & Hecla is pinching out, which is causing a lively demand for copper properties.

Owiug to the great scarcity of coal in the northwestern provinces, due to the strike of coal miners, the board of trade at Calgary has asked the Dominion government to remove the duty on coal for six months. There are 100,000 tons at Spokane ready to export to those provinces. Why not export some of the coal from Princeton district?

P. Y. Smith is prospecting for anthra cite coal on the upper Tulameen.

Two coal miners were fined $10 each o 1 informalion of Sup't Graham given Morgan, J P, for carrying matches into the Middlesboro mine.

EXHIBIT YOUR ORE.

H. B. Brown will be glad to communicate with anyone having ore exhibits for the Vancouver exposition from Aug. 28 to Sept. 4. Vancouver is a center for mining capital and any proposition of merit can be financed there. Show the goods to the world and mining men at the exposition can enter into preliminary negotiations. If there is nothing to exhibit it is probable there is nothing for sale. The board of trade and citizens generally as well as mine owners and prospectors should take a working interest in this big exposition. Mr. Brown is an official of the exposition and his address is 443 Pender St. W., Vancouver.

MINES AND MINING

Descriptive Reports of Voigt's Camp and Princeton Coal Basin.

Coal Measures Extend Fourteen Miles Long and Vary from 3 to 4 in Width.

The prominence given to Voigt's camp by reason of the magnitude of the deal now in its final stages by which some sixty mineral claims will be transferred, is sufficient to warrant publication of a concise article begun in last week's issue, from the pen of E. Jacobs, the well known mining writer, concerning this camp. It is as follows:

Similkameen river at this point flowing towards the north, adjoins some of the property on the west side of the camp. The nearest town is Princeton, which lies some 10 to 11 miles to the north, and is the present terminal of the Great Northern railway. From the camp to Princeton is reached by a good wagon road, crossing one divide.

Altitude—The camp is about 2600 feet above sea level, 800 feet above the smeltery site, and 1000 feet above the Similkameen river.

Climate.—The climate is good both summer and winter, permitting outdoor operations to be carried on practically throughout the entire year. The rainfall is moderate and snowfall light.

Transportation.—The Victoria, Vancouver and Eastern railway, (part of the Great Northern railway system), is extending its line westward, making a direct route from Spokane, Wash., to Vancouver, B. C. The line has been completed to Princeton. Further construction will be proceeded with as rapidly as practicable until the line shall be completed. Previously the district had been without railway communication, making development or construction work economically prohibitive. With the advent of the railway these conditions have been changed.

History.—The development of the mineral deposits of Voigt's camp was commenced 10 or 11 years ago. The country was difficult to prospect owing to its comparative inaccessibility, the steepness of its mountains, and the undergrowth and fallen timber. It was first believed the mineral veins ran east and west. A considerable amount of clearing trail-cutting, open-cut and prospect work was required to reach the various mineral

Continued on page 4.

THE INTERPROVINCIAL ROAD.

Engineer Cleveland arrived over the Hope trail on Saturday, having come to further investigate the route of the interprovincial trunk road. His party has reached the head of Silver creek and are now surveying on the Muddy. This route, following the Roche and Similkameen rivers to Princeton is undoubtedly the best to be obtained across the Hope mountain range. From the standpoints of mileage, snowfall and country to be served this route has no superior. The mining camps along this route have ore tonnage, machinery and supplies to haul over it, besides the scenic, fishing and hunting attractions are without a peer. It is probable that construction of the road will begin soon.

BUSH FIRE BREAKS OUT.

What threatened to be a serious bush fire broke out in some, as yet, unaccountable manner yesterday on the bench back of the hospital. Prompt action by Fire Chief Gellatly and Fire Warden Coulthard and the ready response of citizens averted what might otherwise have been a disaster. The ground is strewn with dry and dead limbs and tree tops and affords ready ignition for a match, cigar stub or stray spark. Fire Warden Macphail of Merritt has issued orders that no campers or others will be allowed an open fire within the danger zone of the town under penalty of the full limit of the law.

COALMONT TOWNSITE LOTS.

As will be observed by advertisement on page 3, lots in the townsite of Coalmont are now on sale at very reasonable prices. When one stops to think of the great prosperity and development which usually follow the production of coal on a large scale and observes the large and thriving towns and cities built on the foundation of coal mining, it will not be surprising to find that Coalmont is no exception to the rule. It is a fact that the Columbia Coal & Coke Co. is making preparations to mine on a large scale and it is a fact that they own a big basin of the finest bituminous coal, on these corner stones of fact will be reared the city of Coalmont.

THE PHILOSOPHY OF LIFE.

It may be wisdom to toady to ignorance but that policy cannot elevate or edify anyone.

Knocking is a mental dssease soon detected in a short talk with those thus afflicted. Envy and jealousy supply the motive power for the little hammerers.

Neglect of religious worship is a long step toward infidelity and heathenism.

Some persons do a kind and generous deed, then sap all the virtue from it by telling everybody about it.

The hatchet and the hammer are the tools of depraved mankind—bury them.

The generosity of some persons merely consists of passing the hat to 'next.'

There is a N. Cleveland surveying with Gregory cut-axe

THE OLDEST RELIGION.

The Victoria Colonist comments as follows on Christian Science: 'Speaking as a Christian Scientist, Senator John D. Works, of California, held the senate quiet and attentive for an hour recently in Washington, with the temperature at 95 deg., while he told the story of how he, his wife and son had been restored to health. He spoke with an earnestness and force that supplied its own evidence that he was performing what he regarded as his duty. He disclaimed, for himself and for Christian Scientists generally, any hostility to any school of medicine. He had tried them all, he said, and they had done the best they could. The medical profession is doing a great work in the healing of disease, he said, and Christian Scientists never would be found opposing legislation that tends to improve the medical profession. The remarks of Senator Works were provoked by the bill of Senator Owen, of Oklahoma, providing for the consolidation of existing government medical bureaux in a department of public health.'

'I propose to discuss this question from the standpoint of the Christian Scientist,' said Senator Works in opening, 'and to describe my own personal experience for ten years. I was a scoffer and derided and ridiculed the claims of Christian Scientists to heal disease. But the time came when I was to put their claims to the test. I had suffered for many years from a complication of complaints. At the last I suffered acutely night and day. I was extremely weak. Death seemed near at hand. I tried all the schools of medicine, regular, homeopaths and osteopaths, the latter conceiving the idea that the headaches from which I suffered were due to a displacement of one of the vertebrae which pressed on the spinal cord. I have no word of condemnation or criticism of the physicians who did the best they could for me; but from the time I began to take the treatments I began to improve until I was completely healed. My wife, who had been an invalid 15 years, began the treatments at the same time. She had been told that her only relief was the surgeon's knife. She was healed in three treatments through Christian Science. But the one thing that appealed to us more than anything else was the curing of our son of the strong drink habit, which had taken hold of him so completely that we had to take him home and nurse him like a child. He resisted our pleadings for a year, and finally, after a long debauch, he said: 'I know what Christian Science has done for you and mother. Call in your Christian Science healers.' This was almost seven years ago, remarked Senator Work, and from the time he took the first treatment the desire for drink was completely destroyed.'

The medical trust which strove to gain monopolistic legislation, depriving all others of the right to cure, has met with defeat in the U.S. congress and any like move in Canada or any enlightened country is likely to, and should, receive similar defeat. Freedom of thought in religious, political, social and medical matters is ours and the conscience of every person must be respected. Christian Science is the oldest curative agency in the world healing as it does by divine power alone. It is obedient to the command of Jesus Christ, saviour of mankind, who himself healed and said that those who obeyed his commands and believed on him should do the works that he did and greater. Christian Science takes the bible as its sufficient guide unto eternal life and teaches that there is 'none other name (Jesus Christ) under heaven given among men whereby we must be saved.' To have the mind and follow in the footsteps of the Master is to, first in importance, cause the sinner to seek salvation then heal him. To think no evil and to be filled with love is the aim of all true Scientists. A multitude of people bound many years by satan in sickness have been cured through Christian Science, thus it is a provable, demonstrable religion and has no relation to spiritualism, theosophy, hypnotism, mind healing or mental suggestion. Scientists do not make proselytes, have no controversy with other religious bodies, are not sensational in their methods and avoid aggressiveness, preferring to work as the leaven, quietly and unobtrusively. There are 1200 Christian Science churches throughout the world and is growing at the rate of a new church every week besides thousands of believers who have not yet become members. A few persons misunderstand and misinterpret Christian Science not knowing that it is spiritual and cannot be apprehended by the carnal mind for it is enmity against God, Spirit.

An orthodox minister says: 'As I have studied this people from the Atlantic to the Pacific I have seen their spacious temples filled with reverent worshipers and have read anew the prophecy, 'A little one shall become a thousand, and a small one a strong nation.'

THE NEW TOWN

EAST PRINCETON

A Payroll City

Manufacturing is the Backbone of GREAT CITIES

The British Columbia Portland Cement Co's Plant represents an expenditure of a Half Million Dollars and will manufacture Portland Cement of the highest quality, Shale Brick, Lime, and Vitrified Clay Products.

The United Empire Co. is now producing a Sub-Bituminous Coal of first quality for domestic use. This Company is also opening up immense Copper deposits which will require a large reduction plant.

Other mining companies operating near East Princeton are spending large sums in development and will employ many men.

Do You Realize what Industrial Works and Payrolls mean to a city?

It is reported that Dunc Ross is on deck for nomination in Comox-Atlin. He wrecked the Liberal party in Yale-Cariboo and now he will 'play the game' elsewhere. Of course he will be defeated.

Big fires in Grand Forks and Cedro-Woolley today. Details later.

Sidewalk extension to Similkameen bridge will soon begin.

Coalmont Townsite

Beautifully situated on the Tulameen River, 14 miles west of Princeton, B.C.

The main line of the V.V., & E. runs through the town with depot to be built on the property. Tracklaying will be completed by October 1st.

The Columbia Coal & Coke Company, Limited

Now engaged in opening up their property here, have over TEN SQ. MILES OF COAL LANDS. THE COAL IS OF THE HIGHEST BITUMINOUS TYPE, AND IS ONE OF THE LARGEST BODIES OF COMMERCIAL COAL YET DISCOVERED ON THE NORTH AMERICAN CONTINENT. The workable seams are 6 in number, varying in thickness from 4 to 60 feet each.

300,000,000 tons can be extracted

A plant of the latest type, capable of handling an output of 2,000 tons every 8 hours is to be installed immediately. This will include a modern coal washing equipment.

Lots are Now On Sale at Prices Varying from $175 to $550

Terms ¼ Cash, and Balance over 18 Months

Reservations made in order in which deposits are received.

MINES AND MINING.
From First Page.

locations and to ascertain from the trend of the veins and their probable size. This work has been carefully and intelligently carried out, with the result that the occurrence of enormous veins or mineralized zones has been demonstrated. Approximately $125,000 has been expended in bringing the property to its present condition, besides years of time.

Princeton Coal Basin.

Progress is being made with the development of the coal measures at and about Princeton, Similkameen. The most advanced work is that of the Princeton Coal & Land Company, an auxillia y organization of the Vermillion Forks Mining and Development Company, of which Ernest Waterman has for years been resident manager. Next of importance are the operations of the Princeton Collieries Limited. Among others, the Osoyoos Coal Mining Company of Nelson and the United Empire Company of Spokane have also done mining work on their respective properties.

In his "Preliminary Report on a part of the Similkameen district," published in 1907 by the Geological Survey of Canada, Charles Camsell, who, during several field-work seasons has done much geological work in the district remarks, under the subhead "Oligocene": "These sedimetary rocks alone in the northern part of the district cover an area of fifty square miles, the basin being fourteen miles long with a variable width of from three to five and a half miles.

[To be continued.]

Sewing machines to rent at White's.

Presbyterian church services.—Sunday school, 11 a m. Evening service in the court house, 7:30. Coalmont—Morning service, 11 a.m.

Methodist church service, Sunday, July 30th. In the Oddfellows' hall, 7:30 p.m. Service at the cement works at 3 p.m.

No Anglican church service at Princeton next Sunday. Rev. J. Williams holds his monthly service at Hedley. The right rev. Bishop DePencier of New Westminster diocese has promised to visit Princeton on Wednesday, August 16th and address the congregation.

Christian Science lesson-sermon subject: 'Love.' Shew thy marvellous lovingkindness, O thou that savest by thy right hand them which put their trust in thee.—Psalm 17:7. Sunday, July 30.
