Princeton Coal, fine for domestic and steam purposes

SIMILKAMEEN STAR

Set no standard for others; do your own duty and never fret.

Prnceton is known the world over as the center of a district famed for its vast natural resources—Coal, Cpper, Gold, Iron, Paint and Timber—Almost unlimited water power—Coking coal for smelters—Manuacturing facilities unexcelled—Railway building.

Vol. X. No. 25. PRINCETON, B.C., WEDNESDAY, JUNE 16, 1909. $2 a Year in Advance

AS OTHERS SEE IT

Princeton Only Five Hours from Coast When Rails are Laid.

Divisional Points Equidistant—Coast Papers should Urge Pushing of Construction.

The following article from the Grand Forks Gazette is so apropos that space is readily found for it. It says: "The Similkameen Star reports 13½ acres bought by the Great Northern in Princeton and expects a divisional point estal-lished there. It looks likely.

"The Saturday Sunset of Vancouver, which has been urging for direct communication from the Boundary to Vancouver, without noticing this purchase, uses Princeton as a point of view from which to argue further. The distance from Vancouver to Princeton is about five hours run, or 125 miles; from Princeton to Grand Forks is about the same.

"Grand Forks is now the distributing point for goods coming in from the States into the Boundary; the train crews also change here and a general agent has resided here, as is the case with the C.P.R. From these it is natural to suppose that Grand Forks will be the first divisional point over the boundary line and Princeton will be the next, half way to Vancouver.

"Vancouver is losing much valuable trade by the present arrangement. With a nine or ten hour run to Vancouver the whole Boundary trade would be done there instead of much of it going to Spokane as at present. Why the other coast papers do not push this is hard to see.

SURVEY OF C. N RAILWAY.

A start has been made on the location of the Canadian Northern line between Kamloops and the coast. One party of fifteen men is working down the Fraser from Lyttot, and another party has started up from Yale, on the opposite bank to that occupied by the C. P. R. From the junction of the Thompson and the Fraser, the C.N.R. will take the same side as the C.P.R., running on a lower level, and crossing under the approach to ths cantilever bridge at Cisco flat.

It is expected that the location survey from Yellowhead Pass to the Coast will be completed before the end of the year.

THE BIG CELEBRATION.

The celebration on Dominion Day is going to be one of the best ever held in Princeton. Contingents from outside points are expected and private letters received from friends indicate that a lot of merrymakers will be present to participate in the fun and if possible make the lion roar louder than before. The Printing and Publicity Committee have literally sown the country with posters and advertising literature, so that no one need say they 'didn't know.' Some fast racing is promised from owners of local steeds and 'dark horses' may be strongly in evidence that dav. Hedley and Kereemeos baseball teams are expected to take part in the tournament which will result in some team taking down the $100 cash prize.

A CAUSE OF DIVORCE.

Probably the most prolific source of divorce is that disagreeable habit of snoring in sleep with which we have all had more or less experience. An inventor has on exhibition at the A.Y.P. a snore silencer, which works on the cold storage principle and can be emptied every morning of the accumulated snores, ready for use next night. Wonder if this inventor would turn his attention to a contrivance for warming feet. Equipped with snore silencers and foot heaters there must be a great decrease in family jars and divorces. We live in a wonderful age.

PRINCETON GUN CLUB.

The formation of a Gun Club last Friday evening marks an important addition to the sporting field of Princeton. There was a good turnout of crack shots and enthusiasts who will, no doubt, give a creditable record of themselves in the forthcoming shoot for the Shatford cup on Dominion Day. The following officers were elected: President, E. Waterman; Secretary, Dr. Lazier; Committee, J. D. Lumsden, D. M. French, Bert Irwin. Fifteen members are enrolled and more in sight. Ladies are invited to join. The entrance fee has been fixed at $2.

'LORD RASPBERY.'

Dead to all sense of propriety and the eternal fitness of things that toriest of Tory newspapers, the Vancouver Province, recently printed Lord Rosebery's name as 'Lord Raspbery.' What contemptible spleen and spite would thus change a name fragrant and pretty for one that is always seedy, and sour more or less. Because his lordship is a Liberal it is no reason why the Province should thus desecrate a name that is high on the scroll of fame and somewhat notorious for recent war scare utterances. Take it back, Province.

H. B. Brown of Hedley was in town last week on a business visit. He shows some excellent ore from his mining property near Hedley. He is optimistic and the kind of man that ought to win and will win. He has faith and he works.

School meeting will be held on the 10th of July.

LOCAL AND GENERAL

Copious Showers of Rain Lift Crops Out of Their Earthy Homes.

Tenders Wanted for Telephone Poles in Town—Dam Washed Out on Granite Creek.

P. Marquette is in town from Nicola arranging terminal facilities for his newly acquired stage line. He has recently bought out M. P. Stewart, and will conduct the line in future, having Driver Hunter still on the box.

Rev. G. Wilson, Superintendent of Presbyterian missions, visited Princeton Saturday and Sunday, leaving in the afternoon for Hedley. He held conference with the board of managers, considerable business and important matters being dealt with. Mr. Wilson was accompanied by his wife.

Tenders are being called for by the Superintendent of the telephone line for 75 telephone poles, 30 ft. long, 7 inches at the top end, delivered in Princeton. Tenders must be addressed to C. S. Stevens, Summerland, B.C.

A big beaver was observed in the Similkameen river near McLean's camp the other day. These animals are said to be increasing rapidly since the law prohibits trapping them at any time.

Col. Stevenson has an expert examining some of his valuable mineral properties in this section.

The Sunday School picnic will be held at One-Mile, near Allison, on Friday the 25th instant.

The telegraph and telephone lines will surely afford all the accommodation for Princeton that will be required, besides giving patrons a choice. The telegraph line is expected here in mid autumn.

Bert Irwin has the contract for two structures, one a dwelling house and the other an addition to the slaughter house.

Gordon Murdoch, with a gang of road repairers, has completed work on the Ashnola road. A bridge at Bromley Creek, lowering the grade in places and removal of all obstacles makes this road fit for all traffic.

Divine service Sunday morning at 11 evening at 7:30, in court house.

E. Baynes Reed, meteorlogical inspector, or the weather man, was in town last week. He inspected the observer's instrnments here and found them in serviceable condition, requiring but slight repair.

Dr. Whillans, of Hedley, was in town Monday.

P. Y. Smith is back from Gowganda. He was very favorably impressed by the prospects of that camp, but has shown his confidence in the future success of Princeton by returning here. He has been away since October.

Hans Richter came up from Keremeos last week and was fortunate in having two saddle horses going back.

D. McRae of Hedley is in town today on a business visit.

We have reliable information, says the Revelstoke Observer, that it is the intention of the McBride government to bring on the provincial elections this fall. Complicated with the usual political issues will be the plebiscite on the question of local option, which will be taken the same day as the poll for members elect, so that besides the work of the Conservatives, Liberals and Socialists, we shall have the province canvassed on behalf of locol option on the one hand and against it on the other.

GRANITE CREEK.

(From Our Special Correspondent.)

High water last week washed out Charlie Lambert's flume and dam about 3 miles up Granite Creek and carried away the results of almost two years hard labor. He will start work again in a short time.

Geo. Benny went to work with J. W. McCann, gold digging, last week.

Louis Marcotte of the Granite Creek hotel, paid a visit to Princeton and Hedley on Tuesday last.

Roy Jamieson and wife from Hedley were at the Granite hotel last week. They will leave on Thursday's stage for the A.Y.P., Seattle.

W. H. Holmes has moved his road gang to within a mile of Otter Flat. Thomas Murphy's gang suspended operations on Thursday last.

Charlie Lambert received a telegram from Vancouver last Wednesday informing him of the serious illness of his wife. Hughie Holmes drove him to Thynne's where he caught the stage on Thursday morning.

A very pleasant surprise party was held at the home of Mr. and Mrs. W. H. Holmes on Saturday. Among those present were Mr. and Mrs. Jamieson, Mrs. Catlett, Mr. and Mrs. Brown, H. McCallister, L Marcotte and R. Lawrence. Music and dancing were kept up until the wee sma' hours of the dawning.

The weather has been very hot and Dan Ross's spuds be a sproutin' jes' the same, by gum!

Perley Russell paid us a visit on Sunday. He was unable to explain his long absence from our little burg. Query: 'Who is she?' He will probably build in Welldo, as he was seen going over the ground there very carefully.

Jimmy Brown leaves this week to do assessment work at Aspen Grove.

The Similkameen Star.

MAKE THE FOUNDATIONS OF EMPIRE SOLID.

One good result of the Anglo-German war scare is the interest aroused among thoughtful and patriotic Canadians regarding construction of warships and guns in Canada. Hitherto all, or nearly so, of the gunboats and cruisers required for customs and fisheries protection and ocean going mercantile ships have been built in Britain. There is an abundance of raw material in Canada for the manufacture of everything required in the building and equipment of warships. To purchase a navy in the old country sufficient to defend Canada's vast seaboard and a thousand or more miles of lake shore, would mean an expenditure of at least two hundred and fifty millions of dollars. Then, there are those who advocate the gift outright of a large sum of money for construction of Dreadnoughts in Britain, costing ten millions of dollars apiece, and handing them over to the English for use as they see fit.

In the earlier stages of the recent war scare the Star expressed disapproval of any scheme of defence which fell short of fostering our own industries and developing our great natural resources. It is a matter of some gratification to learn that the Dominion government now takes the same view and is favorably receiving representations for the establishment of a national arsenal and shipyards and drydocks on the Atlantic and Pacific coasts. It would be a great and serious blunder to spend millions of money for warships built and manned in England and donated to her, for the mere spectacle it would create, and for which Canada would in return receive loud clapping of hands and probably the thanks of parliament. The gift of money or Dreadnoughts to Britain is only an outburst of emotional loyalty which cannot survive the calm, sober thought and action of those who desire the progress of Canada as well as its proper protection.

There are in Canada a few Little Englanders and Little Canucks who aim at self glorification and the tawdry praise of the passing throng, who prefer the plaudits of the gallery to the undemonstrative approbation of well balanced, thoughtful people. These classes of people pooh-pooh even loyalty which does not have the glitter of sensationalism. Canada is no longer a child in dad's house, it is full grown in stature and manhood, and, as with all dutiful sons will, as in the past, defend the old folks from devouring enemies. In doing this she must be allowed to take such steps as will make her self reliant, and able to defend herself.

A great deal is said about the debt of gratitude Canada owes Britain for defending it. History does not show that Canada ever provoked a war or instigated trouble of any kind without settling it, virtually, with her own money and with her own blood. Business and political reasons prompt nations to conquest, annex and colonize, and as a colony Canada has responded to all the responsibilities of a self-governing dominion, relieving the mother country of garrisons and military occupation generally. As a business investment Canada has been, and is, a good customer of England's manufactured products, borrowing immense sums of money on gilt edge security and providing homes and employment for its overcrowded masses, and as a field for investment none better.

To boast of one's loyalty to home and country is superfluous and obnoxious. No Canadian of intelligence prates about his country or assumes a superior air before people of another birth, nor will he tolerate needless affronts from the stranger to the soil. He claims equality with the better class of nations, asking no favor but to be left alone in working out the problems of nationhood. In building, equipping and manning its own fleet it will give an impetus to imperial unity and create industries without which no country can compete for commercial supremacy. It is hoped that the Canadian ministers at the coming conference will urge that Canada builds, maintains and equips its own navy, to be used for defence of the Empire as a whole and any portion thereof.

NOTES AND COMMENTS.

The Interior Department has issued a pamphlet entitled 'Canada's Western Heritage,' being a description of British Columbia, its farms, forests, fisheries, fruit growing, mining, etc. A resource map has also been issued by the same Department for free distribution to anyone writing for them.

Good character shows better and is better than all the fashionable mannerisms of so-called society. If fashion decrees that toast shall be eaten butter side down is that to say that they who 'feed' that way are better or superior to those who eat toast butter side up? Yet there are silly people who hold themselves aloof from those who do not do so-and-so, or as they do.

ODDS AND ENDS.

C. S. Stevens, Superintendent of the Lake Shore Telephone Co., and Superintendent of the Dominion Government Telephone Line Co. has recently bought a fine automobile. Nothing slow about C. S.

Charles Camsell, Dominion geologist, is expected to arrive soon to complete the work begun last summer at Otter Flat, in the platinum zone.

British companies will spend $15,000,000 in developing mining properties in the state of Washington. Just a trifle slow in B.C. or a like amount would be invested in the development of mining and other resources.

A party of miners made a cleanup of $1200 in gold last winter in the Big Bend.

The law in B.C. provides for turning to the left in meeting another vehicle. In all the other provinces the law says turn to the right.

The Greenwood-Phoenix tunnel is now in 100 feet and averaging five feet per day.

NOTICE.

Yale Land District, District of Yale. Take notice that I, Martin Bresnik, of Otter Valley occupation rancher intends to apply for permission to purchase the following described land:

Commencing at a post planted at the S. W Corne of lot 1009, thence south 20 chains, east 20 chains, north 20 chains west 20 chains to point of commencement, and containing 40 acres more orless. MARTIN BRESNIK.

23rd March, 1909.

COPPER
HANDBOOK

(New Edition issued March, 1908.)
SIZE: Octavo.
PAGFS: 1228.
CHAPTERS: 25.
SCOPE: The copper industry of the world.
COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper miuing shares.

PRICE: $5 in buokram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits Can you afford not to see the book and judge for yourself of its value to you?

MICH., U. S. A.

ODDS AND ENDS.

Admiral Charles Beresford, addressing a gathering of Australians on the naval question recently, urged that the colonies instead of contributing towards the building of a Dreadnought, should build cruisers to protect their trade and commerce, and to form the nucleus of navies of their own. This, he said, should not be difficult for the colonies. What the British Empire wanted was a navy that was able to go out and attack and protect routes. He considered that "our insane advertisement of Dreadnoughts" offended other nations and involved Europe in terribly exgensive naval competitions.

The Nickel Plate mine at Hedley has been bonded by the Daly estate to M. K. Rogers, who was instrumental in bringing the property as a prospect to the attention of the late Marcus Daly, for several million dollars. The identity of the parties to whom Mr. Rogers is now trying to sell the property is a secret, but their agents and experts are on the ground directing diamond drilling operations that will determine whether they take hold of it or not.
