High in fixed carbon Princeton coal warms the home.

SIMILKAMEEN STAR

If we are intolerant we are also intolerable.

Vast water power and steam coal will make Princeton a cheap manufacturing center—Gold and platinum dredging, hydraulic mining are among our immediate possibilities—Cement industry assured—Coking coal in the district—Ore in variety for smelter.

Vol. XI. No. 46. PRINCETON, B.C., WEDNESDAY, NOVEMBER 9, 1910. $2 a Year in Advance

THE BOARD OF TRADE

Resolutions for Completion of Roads Connecting up Outside Points.

Trail to Big Goldfields in Skagit Section Would Make Good for Princeton.

The regular meeting of the Board of Trade was held Monday night, important matters relative to the progress o Princeton and district being discussed and legislated upon. The minntes of previous meeting being confirmed the election of S. C Briggs, Secretary of the B.C. Portland Cement Co., to a seat at the board was proceeded with and unanimously declared.

Bill of the Similkameen Star for printing posters re public meeting to reorganize fire brigade, ordered paid.

Action of the president in pledging $10 toward purchase of fire hose, subject to endorsation of board, was approved.

The following resolutions regarding the completion of Onemile road, so that direct communication with Nicola might be established, effecting a saving of some fifteen miles in travel ; and the building of the remaining link to connect the Okanagan with the Similkameen district via Fivemile, were unanimously adopted by the board :

Resolved : That the Princeton board of trade respectfully desires the Hon. Commissioner of Public Works, Mr. Taylor, and the member for Similkameen riding, Mr. Shatford, to place amounts in the estimates of the forthcoming session sufficient to cover cost of completion of the Onemile and Fivemile roads.

Direct Road to Okanagan.

In the deliberations of the board it was emphasized that the Fivemile road, now almost finished to Osprey lake, about 20 miles from Princeton, left an unfinished liuk of about 35 miles to connect with the Trout creek road on the Okanagan side, and that with the building of this road a continuous route for auto tourists would be given from the coast over the projected interprovincial trunk road to Vernon, besides it would be of immense advantage to settlers along the line of the Kettle Valley raijway now building from both ends. The Onemile road is a long standing necessity and requires a link of about ten miles to complete, which, when done, will afford quick transit and intercommunication between Nicola, Similkameen and Okanagan.

Nicola Must be Linked Up.

It was pointed out that Mr. Shatford had completed the Onemile and Fivemile roads to the boundaries of his riding and that it was up to the members for Yale and Okanagan ridings to procure appropriations for building the roads to connect. To this end the secretary was instructed to write Nicola, Penticton and Summerland boards of trade, also the municipal councils of Summerland and Penticton requesting their cooperation toward the construction of these necessary links in the development of the country.

Trail to Great Goldfields.

Resolved : That the Hon. Commissioner of Public Works and the member for Similkameen riding be respectfully urged to have a sum appropriated sufficient to make a trail from the head of Roche river to the Steamboat mountain mining section, a distance of about five miles.

This trail, when completed, will put Princeton in touch with this great mining section, which now promises to be one of the world's historic goldfields. It is distant from Princeton via trail to the head of Roche river, about 50 miles. This route is nearest for prospectors from the east and south and affords some of the best prospecting ground in B.C It is roughly estimated that the trail will not cost more than $500.

The secretary was instructed to post a memorandum to Martin Burrell, M.P., regarding the erection of federal buildings in Princeton for the proper accommodation of the public, regarding which an almost unanimously signed petition was sent to him last year.

The questions of incorporation and athletic grounds was brought to the attention of the board, action being deferred for the present.

Board adjourned.

FIRE HOSE NEEDED FOR TOWN

R. A Simmons, representing the Vancouver Rubber Co., selling agents for the Gutta Percha & Rubber Co., Toronto, was in town last week soliciting orders. More than usual importance attaches to Mr. Simmons' visit as he took up the matter of increased fire protection for the town and made an energetic canvass of citizens for the purpose of purchasing fire hose. He was successful in securing subscriptions amounting to $400 in a short while, an additional $100 being required to furnish the requisite number of feet of hose. For the present about 500 feet of hose will suffice, which, with an ample distribution of hydrants over the water system will provide good fire protection within the town area. Further subscriptions will be received at the A. E. Howse Co's store, where also may be paid the money already due, this firm having consented to act as agents for Mr. Simmons in the matter.

A. T. Anthony, District Deputy of the Modern Woodmen of America, arrived yesterday and will institute a lodge on Thursday night in the I.O.O.F. hall.

THE WEEKLY GRIST

Reorganization of Fire Brigade Necessary for Proper Fire Fighting.

Citizens Subscribe Toward Purchase of the Best Brand of Fire Hose.

The waterworks system will soon be in readiness for operation as good progress has been made in laying down distributing pipes Householders and business concerns generally are customers of the system and are glad to dispense with the wells, always subject to the dangers of contamination.

The tunnel on the V.,V. & E. on the western boundary of town will be completed this week. The grade is now practically completed to Cardiff. A lot of men are now employed riprapping, Nobody seems to know anything about bridge building or tracklaying.

Every lady is expected to join in the work of the Ladies' Hospital Auxiliary. It is an association, the charitable nature of which makes common cause for all who love and pity the sick, suffering and dying. The hospital in any town is an evidence of the better spirit in humanity and tends to bring about that great brotherhood of man in which all should take pari.

Indifference toward any cause neither thinks, talks nor acts ; in brief, it cuts no ice.

Frank Bailey, M.E., arrived by stage from Merritt last Thursday and went on to Hedley, where he has mining interests. He reports Merritt lively and a prodigions development of that district is going on. Mr. Bailey is optimistic and full of hope for the future of mining in this section. He will be in the Similkameen for two or three months.

G, L. Fraser, manager of the Columbia Coal & Coke Co., Cardiff, was in town Saturday on a business visit. The company is pushing the preliminary work of developing their great property. Many tons of machinery and material are being hauled by wagon from both Princeton and Merritt. The diamond drill is working steadily and the sawmill is preparing material for buildings. A gang of men are driving the tunnel and with many other projects to the fore Cardiff is a bustling embryonic town.

Nelson is raising $5000 for publicity work.

Dell Yeung has mohed into his fine new house on Billiter Av., which is still in the hands of contractor Irwin adding a spacious verandah which lends symmetry to the whole structure. Fvery convenience is provided in the internal arrangement of the house which has an artistic and comfortahle appearance.

Real estate is booming in Hope, values having more than doubled in the past three months. As mnch as $2500 is asked for corner lots in what is expected to become the business center.

The weather of late has been decidedly fall-like with a spice of winter thrown in. First covering of snow last week but it all disappeared in a few hours. Weather prophets have been busy predicting a hard winter. The Star meteorologist predicts a mild winter with lots of sunshine. He does not know why he predicts that but it just seems to look that way to him after some 40-50-60 or 70 falls he has observed on this terrestial sphere. It will be a mild winter, with just enough snow and frost for the boys and girls to skate and tobaggan down the hills.

A great influx of miners and prospectors is expected into the Steamboat mountain section in the early spring. There are fifty square miles of virgin country in which to prospect yet.

B.C. PORTLAND CEMENT CO.

A meeting of the directors of the British Columbia Portland Cement Co. was recently held in Vancouver at which it was decided to go ahead with just as much of the preliminary work toward establishing the factorv as could be done this winter. Plans for buildings and equipment are being prepared and will be presented to the directors at their next meeting some time this month. It is known that Great Northern railway people have had analyses made of the raw cement products at Onemiie and they are entirely satisfied with the results obtained and will soon begin the construction of the railway spur. Bonds of the B.C. Portland Cement Co. are selling rapidly, the first one hundred thousand dollars of them, with which is given 50 per cent. in stock, having been nearly disposed of. Intending purchasers will not have another opportunity to procure stock on such favorable terms.

FIRE BRIGADE WANTED.

The question of a thoroughly organized fire brigade is now before the citizens and should be upheld by them in every possible way. Princeton has the reputation of being one of the most cleanly towns, it now has the opportunity to become well protected from the ravages of fire. The waterworks system affords a pressure on Bridge St. of about 100 lbs. to the square inch, enough to throw a stream over the highest building in town. Equipped with the very best brand of hose made, the Paragon, it is possible to fight any ordinary fire with success. It remains with the citizens to organize.

The Similkameen Star.

INCORPORATION.

Without attempting to force the question of incorporation upon the citizens of Princeton the fact remains, nevertheless, that in the natural course of growth and events the matter must soon be grappled with. It is in the nature of man to organize and adopt some form of tribal or civic government. The rude barbarian will choose his headman and the lower animals have their leaders. It is not the purpose of this paragraph to discuss the merits of muncipal government, or of its various forms by commission, board of control or the ordinary aldermanic board and mayor, it is rather to point out the necessity for meeting the looming responsibility and present the subject in such form as will assist in its proper consideration and digestion. One of the first things to be decided will be the area to be included in the incorporation. To save any friction in the future and possible antagonism of interests it would be well to make the boundaries of the town so large that no additions would be requisite for some years. For the purposes of incorporation the present existing western boundary of the townsite might remain where it is, the other boundaries extending from Allison bridge north two miles south one half mile, both north and south lines reaching to the western boundary. These limits would dispose of any possible conflict of townsite interests and unite the immediate sections concerned into one compact, and let us hope, harmonious, whole. It seems that municipal government by commission with addendum and referendum clauses, is successful wherever tried. But the success of any form of municipal government is, and must always be, due very largely to the diplomatic, executive and industrial ability of the mayor or other elected head.

NOTES AND COMMENTS.

The need of athletic grounds and a race track combined with a park and pleasure area has been emphasized more than once. a committee having been appointed to secure them last summer. If that committee is still alive it would be in order for them to report. There is no time like the present to acquire the land for the purposes stated. In another year or so it will be impossible to obtain the ground in a convenient quarter and the usual regret will ensue that the earlier opportunity was not embraced. It may be suggested that as Princeton will expand eastwards from its present center the better location for a park and athletic grounds would be in that direction. Any location west of Onemile creek is within easy access if near the roads running from town. If ground is not available through gift or purchase it is probable a long term lease could be obtained. Now is the time for action.

At a recent meetiug of the Vernon Board of Trade one of the members, Mr. Smith, directed attention to the 'rotten' nature of the telephone service furnished by the Dominion government in the district. He said: 'You pay for ten or fifteen minutes on the phone and then have to write a letter.' This is but a sample of the mismanagement and conditions that prevail over the whole system. Mr. Stevens, the superintendent, holds a similar position on a private owned telephone line, but the government dare not disturb him in his dual capacity. There is no discipline in the public service, each servant being master unto himself. The public works and postoffice departments are honeycombed with inefficiency and incompetency. It was this disgraceful condition of the public service which drove many old time Liberals into revolt in B.C. last election. 'Rottenness' is the proven conditioh of the various departments of the Dominion government. Sir Wilfrid is no longer master of his own house for his menials do as they please. It is time for a radical change.

The most distasteful form of criticism is that which has its root in malevolent ignorance. Persons wholly ignorant of the stupendous importance of subjects glibly condemn them because they are incapable of appreciating their worth or understanding their methods. The Vancouver World makes light of Christian Science and endeavors to discredit it in the eyes of its readers without first having tested the power or truth of its teachings: Wisely or unwisely the World does not, or cannot, prove its statements from that standard authority, the Bible, but calls in the aid of some obscure pamphleteer. So far as Star has learned Christian Scientists are the only professed believers in scripture who are practically carrying out its teachings; in spiritual regeneration, heaiing the sick and cleansing the leprous, in faith and works generally. Jesus said to the messengers Go and tell John the sick are healed, the lame walk, &c. Through C.S. thousands, including doctors and ministers, have been saved and healed by divine power.

THE PHILOSOPHY OF LIFE.

Labor is king—without it the world would soon end. But everyone must rest. Too much work is almost as bad as none.

Tell some people the truth about them and they will make faces at you.

It is only lawbreakers that dislike the laws. The law abiding citizen does not chafe under any law.

To enJoy a stale anecdote one must just grin and bear it.

Don't be common. It's the uncommon person who makes people sit up and take notice.

All life proceeds from God,

Early Christianity demonstrated faith in Divine power to heal the sick—now its the pill and the pellet.

WATER NOTICE.

Notice is hereby given that an application will be made under Part II. of the 'Water Clauses Consolidation Act, 1897,' to record the right to take, divert, convey and use water in the Kamloops Division of Yale District, for ordinary, domestic and agricultural purposes:

A. The name of the applicant is Samuel R. Gibson.

B. The name of the lake, stream or source is Christina Creek.

C. The point of diversion or intended ditch head is about three quarters of a mile from the mouth of Christina Creek.

D. The means by which it is intended to store and divert the water is a ditch.

E. The number of cubic feet per second applied for is two cubic feet.

F. The water is required for agricultural and domestic purposes.

G. The land on which the water is to be used is Lot 1402, and the number of acres to be irrigated is fifty.

H. This notice was posted on the 30th of September, 1910, and application will be made to the Commissioner on November 30th, 1910.

The first issue of 3,000 shares is now being made to cover the estimated cost of installment and other expenditure. Of this amount 2,000 shares have already been allotted.

The opportunity is now given to apply to the Secretary for any portion of the balance unallotted, preference being given to town resident.. Should no application be received within one month from this date the previous applicants are prepared to take the unallotted shares No promotion money, or commission is being paid Application forms can be obtained from the undersigned.

STEPHEN FREEMAN,
Secretary.

Princeton, Oct. 18, 1910.

WATER NOTICE.

Notice is hereby given that an application will be made under Part II. of the 'Water Clauses Consolidation Act, 1897,' to record the right to take, divert, convey and use water in the Yale Division of Yale District, for ordinary, domestic and agricultural purposes:

A The name of the applicant is the Princeton Coal and Land Co., Limited.

B. The name of the lake, stream or source is an unnamed stream or spring flowing out of a small lake situated about one hundred yards from the south boundary of Lot 157, Yale Division of Yale District.

C. The point of diversion or intended ditch head is at the northerly end of the small lake described above.

D. The means by which it is intended to store and divert the water is dam, flume and ditch.

E. The number of cubic feet per second applied for is one cubic foot.

F. The water is required for agricultural and domestic purposes.

G. The land on which the water is to be used is Lot 157, Yale division, Yale district.

H. This notice was posted on the 6th of October, 1910, and application will be made to the Commissioner on the 5th day of November, 1910.
