Princeton—like Rome—all roads and trails lead to it.

SIMILKAMEEN STAR

Divine Love always has and will meet every human need.

Without any imaginary or delusive methods Princeton and district recommend themselves to the homeseeker and investor—Payrolls are the logical result of investment and industrial energy and these result from natural resources: Coal, iron, copper, gold, platinum, diamonds, are found here.

Vol. XII. No. 30. PRINCETON, B.C., WEDNESDAY, JULY 19, 1911. $2 a Year in Advance

COPPER MOUNTAIN

Voigt's Camp Deal is Reported to be in Final Stages of Completion.

Description of Camp and Conditions by Well Known Expert Mining Man.

It is not Coal

For some time negotiations have been in progress for the acquirement by New York and Boston men of the large mining property, situated on Copper Mountain in the vicinity of Princeton, Similkameen together with other interests owned by Emil F. Voigt and associates. The transaction has not yet been completed but it may be shortly, so the following information is published with a view to conveying an adequate idea of the prospective value of the property and the considerable importance of the peojected enterprize which may be expected to lead to the effective development of the property and the utilization of the large mineral resources it is believed to posses. Much of the information has been abstracted from a comprehensive report on the property made by C. W. Wheelock of New York City, whose work in this connection extended over a period of three months, from November 1909, to January 1910, inclusive.

Location.—Voight's camp is situated in Similkameen mining division of Yale district, British Columbia. On an air line it is about 120 miles east of Vancouver, 30 miles north of the International Boundary line, about 100 miles west of the Boundary district (where are situated the mines and smelteries of the Granby and British Columbia Copper companies), and 300 miles north by west of Spokane, Washington.

[To be continued.]

POLICE INVESTIGATION.

The investigation ordered by the Lieut. Governor and conducted by W. H B. Webster, S.M., of Nelson, was held today to inquire into the charges and complaints made against Nigel Ewart while constable here. Some 8 or 9 witnesses were examined, not a scintilla of evidence being adduced to bear out the 'numerous charges and complaints' as alleged by Superintendent Hussey. All the witnesses testified in terms of praise of Mr. Ewart at the Princeton hotel fire, and also of his general conduct since his appointment here. One witness said he knew that the ex constable was under the influence of liquor 'by his face,' but all the others swore as to his perfect competence for duty at and after the fire. To dismiss a constable and blot his character on evidence so flimsy is nothing short of a crime and on a par with the plot against Dreyfus. Insofar as the evidence produced against Ewart had weight it was farcical, puerile, silly. Rev. Kinney as one of the complainants, (who the others were was kept secret) will be made the scapegoat of what looks like a conspiracy. Mr. Ewart has a case for damages for wrongful dismissal, defamation and deprivation of livelihood. The whole matter shows incompetency and a fossilized condition in the department of provincial police, and public money wasted.

EDITOR WHO DOES THINGS.

R. T. Lowery, editor and financier of the Greenwood Ledge was in town last week, taking in also Granite Creek and Coalmont, and may start a paper at the latter place. The 'Col.' is a Harmsworth and Hurst boiled down into one, having started some 27 newspapers to date and always keeps a portable plant on hand with which to head the procession into a new mining camp or stampede into some gold diggings. In the early days he was considered to have good judgment in poker and sevenout, to have a fine taste for a beverage much in vogue on the frontier called 'scootch,' but he assured Star that he was $50,000 in the hole on account of these follies and that he had cut them all out. He thinks this country has a great future and reports prosperity in Greenwood.

PIONEER REVISITS CAMP.

Dr. H. B. Cameron, Vancouver, representing the B. C. Platinum Co., came down from the upper Tulameen Monday where he has been supervising placer drilling tests for gold-platinum. In a short time Messrs. Blair and Law of the company will arrive. A series of shafts will be sunk for testing values of the ground. Dr. Cameron was in this section 25 years ago and owns some fine land on the Stevenson meadows. He is an army surgeon, British and United States, and was editor of the Atlin Claim during the Klondyke gold stampede The Dr. is a genial gentleman, a musical virtuoso, of whom it is hoped will prolong his stay here.

COALMONT NEWS.

(From Our Special Correspondent.)

Coalmont, July 19.—Messrs. Williamson & Turner have opened a real estate office.

A syndicate of coast people have purchased a block of 160 lots and there is great demand for real estate.

Mr. and Mrs. G. D. Turner and daughter are visiting Mrs. Turner's father, G. L. Fraser, manager of the Columbia Coal & Coke Co.

J. T. Johnston, wife and daughters Marjorie and Grace left Tuesday for Orillia, Ont.

LOCAL AND GENERAL

Weather is 96 in Shade and Crops Ripening Fast are Good.

Big Land Deal at Keremeos will Provide Homes for Many—Spur Is Building

Westwood & Brooke are about to add hen breeding and raising to their fruit growing. Mr. Brooke is a poultry fancier and some fine birds are included in his stock. The building of henpens for scientific breeding of farm fowls is now in progress by J. W. Kansky, builder. A large dwelling is also to be erected and also an engine and pumping house for irrigating purposes.

W. S. Cleveland has gone to the coast on real estate business and will meet his brother, who has been goldhunting in Alaska for the past 15 years. Mr. Cleveland has been fortunate in Vancouver, Westminster and Port Mann 'stuff' and will soon be able to write a negotiable check in six figures.

Mr. and Mrs. J J. Armstrong of Keremeos were visitors two days recently with their daughter, Mrs. Carmichael, and incidentally celebrating the first anniversary birthday of their granddaughter, little Miss Gwen.

Dr. Jackson, dentist, will be in Princeton for a few days and may be found at the Similkameen hotel.

R. E. Ward, agent for East Princeton townsite, is in town and reports considerable demand for lots there. He is enthusiastic over the prospects of the new town and expects to see great activity there as the construction work goes on.

F. E. Groffman came up from Vancouver last Saturday on important business and states there are big doings at the coast but nothin' doin' in regard to thai personal matter.

Max Wilson is erecting a pretty cottage of the bungalow type corner of Lime and Billiter av.

Born—On the 15th inst., the wife of W. Garrison of a son.

It is understood an Italian firm has obtained the grading contract for the spur to the cement works. The bridge will be let by separate tender.

P. W. Gregory, P.L.S., has gone to the coast for a few days.

There is at least one successful institution in Princeton—the Ladies Hospital Auxiliary. The receipts of the lawn social were $77.

The Hon. E. Dewdney and wife arrived last Thursday from a tour of Nelson and the Boundary country going to Spokane and Victoria on Monday. He is disposing of his interests in this section and to this end will subdivide the old Allison townsite into acreage and place on sale. As a pioneer of the province he is an authority on its early history and has a wide circle of oldtime friends.

Hot weather, the thermometer ranging from 80 to 96.

H. B. (Bulldog) Brown and F. Walls arrived from Vancouver yesterday.

East Princeton is the cement city of British Columbia. It will be a boon to prospective builders here.

L. H. Patten of Hedley and M. B. Ewart of Keremeos were in town today.

A DEAL THAT MEANS PROGRESS.

Mrs. Lowe, of Keremeos, has sold her ranch to eastern capitalists through R. Cawston for the sum of $200,000. It is the intention of the new owners to divide it into fruit lots and possibly start a town on the line of railway. The salvation of Keremeos lies in the division of its large estates into small fruit holdings, thus providing homes for thousands where now only a few exist. This section may not inaptly be termed 'Appleland,' so luxuriantly do all fruits thrive and grow to perfection. The mining sections of the Similkameen valley want more Keremeos fruit and less of imported.

DUST EXPLOSIONS IN COAL MINES.

Franklin Bache, President of the Bache Denman Coal Company, in a recent paper on dust explosions in coal mines, contended that the best precaution is to remove the dust from all parts of haulage ways that are near enough to working places to be affected by blown-out shots. He considered it unnecessary to remove the dust from rooms, as the dust made in mining and loading coal is comparatively safe. The dangerous material is the impalpable dust, made by the continual grinding of passing men, mules and cars on the haulways. He contended that if the dust is got out of the haulways in possible juxtaposition to blown-out shots, 90 per cent. of dust explosions would be done away with; that if no shots were allowed to be fired except when all employees but the shot-firer are out of the mine the loss of life in explosions would be greatly reduced; and if the firing of shots in coal not undercut were prohibited there would be almost no dust explosions at all. He adds:—"Sweeping the sides, roof and floor of an entry for a few hundred feet, and loading the dust out every week or two is not an appalling task." He further suggests the adoption of dust proof pit cars, and considers that some time "we may get the miner to see that it is to his interest, as well as ours, to put a premium on mining more lump and less slack coal."

AN INDUSTRIAL CITY.

The stimulating influence which East Princeton, with its large cement works, brickmaking plant, smelter and coal mine, will have upon the whole district of Princeton is sure to mark a new era in progress when these proposed industries are all in operation. The railway spur, bridge and cement works are now under contract, the walls of the latter being well advanced. When all the industries which usually accrue to a large cement works and coal mining are in operation there will be a population of at least 2000 and this influx of people cannot fail to be of immense benefit all around. The two large companies operating in East Princeton have on their directorate men who are known to the commercial world as safe and reliable, besides having that capacity for enterprise which knows no defeat nor procrastination. Prosperity and success have marked their careers because they believe that a dollar in legitimate action is worth more than a hundred dormant ones which do not contribute to the progress of the country. From this time forward East Princeton will be a busy town, increasing and extending until it is a chief city of the interior. By all progressive persons the new town and later city will be a welcome addition on the map of the Similkameen valley. The citizens of old Princeton will watch with a profitable pride the development of the young giant soon to form a member of the incorporated family which will make one united and harmonious city of Princeton. What will build up East Princeton will in no wise detract from the importance of the old town as a strategical point and mining center. So closely allied in position and interests are the two towns that what benefits one must benefit the other and so with that spirit of live and let live, of fair play, healthy boost or optimism and honorable methods one great mining and industrial city will arise. Welcome, East Princeton!

NOTES AND COMMENTS.

The extremely hot weather of the past week has had the effect of making everything dry as tinder, requiring only the slightest spark to ignite and spread into devastating flame. Every care should be taken by travellers and campers to prevent fires from starting. The law is very plain and justly severe with offenders under the Bush Fires Act.

It is a serious reflection upon the presumed loyalty of those engaged in bnsiness to be seuding away from town for articles or jobs which may be obtained at home. Patronize home industry and help to swell the daily receipts.

It would be the height of folly for Princetonians to allow the splendid opportunities which are ours by right of priority and position to be dissipated through sheer neglect or indifference. If, as citizens and property owners, we do not follow our investments with a living, active interest, we cannot hope to maintain that supremacy to which we are fairly entitled by choice location. With our well known coal and metal resources and the great inducements of cheap fuel and water power for manufacturing purposes there should be no difficulty in persuading capital to establish manufacturing industries here. It is getting into touch with the men and the money, inducing them to cooperate in the building of smelter or any other works, that is the supreme duty of citizens. It is possible for the center of 'gravity' to shift from an inert to an energetic townspeople, from a town without manufacturing industries to one having them. In any case trade follows the payroll and where there is one a trade center is the natural result. Star has always tried to impress upon citizens the necessity for making Princeton the permanent trade center of this section. All persons of ordinary perspicacity in business will agree that the suggestion can only become effective in proportion as the citizens make it so. As every individual is the author, in a large degree, of his own success, so the community or town has the shaping of its own destiny. Publicity is the means used to attract notice in these days of the free use of printer's ink and in order to supplement the important and gratuitous work of the newspaper a large amount of other advertising matter, such as folders, maps and pamphlets, is required The possibilities of Princeton are so varied and vast that there is not much danger of overestimating, all that is wanted is the payroll to preserve the nucleus and the boost resultant from judicious advertising. Citizens have a magnificent heritage. The town and district teem with natural wealth and scenic attractions. It is possible that we, as a community, may have become stagnant, blind and indifferent as the result of years of enforced inactivity, but now that the railroad is here and another coming there is no sound reason why the town should not take a big step forward and become a mine producing and manufacturing center.

THE NEW TOWN

EAST PRINCETON

A Payroll City

Manufacturing is the Backbone of GREAT CITIES

The British Columbia Portland Cement Co's Plant represents an expenditure of a Half Million Dollars and will manufacture Portland Cement of the highest quality, Shale Brick, Lime, and Vitrified Clay Products.

The United Empire Co. is now producing a Sub-Bituminous Coal of first quality for domestic use. This Company is also opening up immense Copper deposits which will require a large reduction plant.

Other mining companies operating near East Princeton are spending large sums in development and will employ many men.

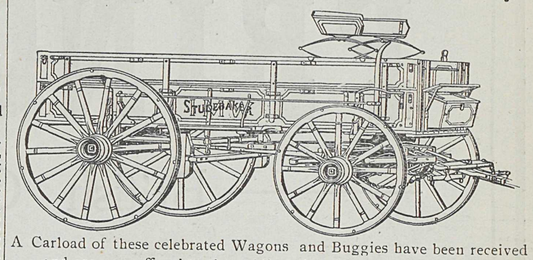
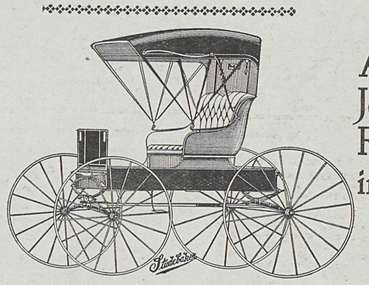
Studebaker Wagon

The Best Money Can Buy—The Best Buy for the Money



A Carload of these celebrated Wagons and Buggies have been received and are now offered to the public at lowest prices. Studebaker Wagons have stood most severe tests in war and in peace. As transport wagons for the war departments of many governments they have had unsurpassed success. The Farmer, Freighter or Liveryman will will find them satisfactory in every particular. These wagons conform to the law in width of tire a regulation which is now in force.

A Thing of Beauty and



A Joy to Ride in.

Two-wheel cart, shafts; single buggy, buckboard style; hacks, two seaters. Guarantee with every rig sold. The good roads and the beautiful drives in and about Princeton will always create demand for pleasure driving and what form of driving can equal that of a spanking team and a Studebaker carriage, going a 2:40 gait down the country boulevards. There is exhilarating pleasure in driving unknown to gassy chug-chug.

Take a Look at these Wagons and Carriages and get prices before buying elsewhere.

Hardware

Many tons of Building Supplies received and marked at a low selling figure.

Stoves in variety and all the requisites of the housekeeper for cooking.

Shovels, picks, axes and grading contractors' supplies, including powder.
