The cook and housewife prefer Princeton coal: There's a Reason

SIMILKAMEEN STAR

Don't worry over things that may never happen.

It is true that the Similkameen is a Settlers' Paradise—Climate, Conditions and Surronndings Favorable.
Coal is the backbone of Priuceton and must make a City of it.—Property is rising in value and Investments made now will bring early reward.

Vol. XI. No. 21. PRINCETON, B. C., WEDNESDAY, MAY 18, 1910. $2 a Year in Advance

TULAMEEN PLATINUM

Big Flume on Granite Creek gave Poor Results and Legal Squabble.

Found Platinum at Mouth of Eagle Creek on Tulameen River in Quantity.

[Continned from last week.[

The washing was an operation either in a string of long sluice boxes or a rocker, by which means the platinum was concentrated with the gold in the black sands. The earliest attempt at hydraulicing on Granite Creek was that undertaken by R. Stevenson and W. E. Hogg in 1891. A flume four miles in length was installed on the west bank of Granite Creek and work started on claims lying about three quarters of a mile above the mouth of the creek. The promoters of this company became involved in litigation with the owners of ground below them, and were forced into liquidation. The court, acting as receivers, secured, it is stated, from the sluice boxes about $900 principally gold. Mr. Hogg afterwards worked a small pit four miles below the mouth of Granite Creek, and washed the gravels from an old high channel of the Tulameen river. This venture was continued far in the season, but in the following spring the pit filled with wash from the mountain side and was never reopened.

Packed a Saw Mill on Horses.

In 1892 the Tulameen Improvement Co. began operations on a bench on the Tulameen river below the mouth of Eagle Creek. A saw mill was imported at a time when the only means of transport was pack horses, and placed at the mouth of Eagle Creek. A flume was built to convey water from the Creek, and hydraullcing operations were carried on for two seasons under the direction of Judge Murphy. The proportion of gold to platlnum at this point was about one to two, and the recovery of platinum was high; but the available ground was limited and the results obtained did not pay for the cost of plant and management. At the mouth of Slate Creek hydraulic operations were conducted by Alexander Swan on a high bench above the Tulameen river, but the boulder clay met with was so compact and stiff that water had little effect upon it and the undertaking was consequently not a success.

[To be continued.]

Owing to pressure of job and other work Star is delayed beyond its usual day of publication. With its one-man-power and impossibility of procuring help subscribers will understand the situation and kindly forbear.

FIRE WARDENS.

Proper Precautions for Preventing Destructive Forest Fires.

The provincial government evidently is fully alive to the necessity for the prevention of forest fires. A system of patrol has been instituted and the province divided into districts with fire wardens in charge. Those officers are to be ever vigilant and upon the outbreak of fire will take every means to control it and discover the person responsible for the fire. Anyone finding fire in remote or settled parts should immediately report it to the nearest warden. By cooperating with the fire wardens settlers and other property owners will not only protect themselves but prevent the destruction of valuable timber on private and public lands. J. O. Coulthard has been appointed fire warden for district No. 31 which begins at Princeton and includes the territory north, west and south from that point. W. T. Atherton is warden for the district easterly from Princeton. With these watchful wardens patrolling the country damage by running fires will be reduced to a minimum and the incautious firelighter will have difficnlty in escaping the strong arm of the law. W. C. Gladwin, Vancouver, is chief fire warden for the province. The pay of the fire wardens is $5 per day and expenses.

BASEBALL, THE GAME.

Princeton Baseball Club are in fine fettle, with their daily practice and club exercise and it is too bad no date has been arranged for the immediate future in which to try conclusions with another nine. It is no fault of the Princeton boys that a match is not on for the 24th for Secretary 'Mike' (Carmichael) has been corresponding with local aggregates in the district, but to no purpose. The boys will all look fine ln their new suits and a better bunch of baseball talent is not to be found in the Similkameen or any other district. That is the sporting editor's view, anyway, and it ought to count some. Strike, one!

RAILWAY BRIDGES NOT YET READY FOR TRAFFIC.

The regular passenger trains have not yet been able to resume their former runs owing to the bridges still being unsafe between Hedley and Keremeos. Large gangs of workmen are busy repairing the damages to the piers by the high water of two weeks ago. It is thought that in another week or ten days passenger and freight trains will be moving regularly. Passengers and mails are now transferred at the bridges and brought to Princeton by the work engine and caboose. More than two dozen cars of freight are now lying at Keremeos for points west. For the present mails and passengers arrive at about 10 p.m. and depart at 5 a.m.

THE WEEKLY GRIST

Revolutionary Smelting Process Invented by Dentist of Toronto.

Roads and Bridges Throughout this Section Receiving Attention from Officials.

Penticton City Council has granted the Board of Trade $300 towards advertising the town. What is Princeton doing along this line?

Constable Hewat was at the Kamloops assizes and secured a conviction against Lovell, the pickpocket, who will serve 2½ years in the pen, thanks to his light and long fingers, and crooked thinking.

C. Snowden returned last week from a short visit to 'Uncle Sam.' While away he managed to acquire a hatchet which at one time belonged to the world famed Carrie Nation. This hatchet he will not bury but keep it for his heirs in memory of the great reformer.

J. R. Campbell returned from Vancouver via Nicola on Wednesday. He says business is good there and prosperity reigns. He saw no place, however, that looks so good as Princeton and with as bright future. So he left soon!

C. O Freuch has received a very handsomely printed invitation from the Northwestern University, Evanston, Ill., to join the faculty and students in a big blowout on June 6 Mr. French's son, Charles L. is one of the alumni of this great institution and on class day will orate to the assembly as president of the fourth year class. This youthful president also stands in line for president of the greatest republic the world has ever known. Stay with it, boy!

Gordon Murdock, road foreman, is at work repairing at Ashnola and will next complete the Tulameen river road as far as the waterworks and also widen the cemetery road, Podunk Davis and Sam Spencer are doing some work Whipsaw way and Bert Thomas has been repairing Copper Mountain road.

Mr. and Mrs. Nelmes of Chilliwack are visitors to Princeton, the guests of Mr. and Mrs. Max Wilson.

S. Pickleman and J. Noyes of Greenwood were in town last week on their way to Cariboo. Mr. Noyes is owner of the Boundary Creek Times and Mr. Pickleman is a mining man of continental experience.

Comet! Oh yes, I saw it. It has a peculiar comic look. It was full when I observed it.—This man was looking at the moon. on your dose.

Geo. Wardle is back from a trip to the coast, where he had been on business. He thinks Hope is bound to be a good point, especially during railway construction. About 400 men are employed on construction east from Abbotsford.

H. McAllister returned to Granite last week after spending the winter at Seattle and Bellingham. He expects to iuduce some mining men to take an interest in gold propositions up the creek.

Rev, G. A. Wilson, superintendent of Presbyterian Home Missions, was in town this week and cut the gordian knot of certain entanglements.

J. A. Freeman and family have recently arrived from England and are domiciled in the V.F.M. Co's suburban house on the Similkameen.

Dr. Jackson, dentist, is in town for a few days and those requiring his services should see him early in the Britton bl,k.

Ed. Tingley returned from the Kamloops assizes Tuesday, where he had been as principal witness in the Lovell theft case.

The Oddfellows have secured a splendid attraction for their hall on Saturday, June 4th, the Musical Eckhardts and Swiss Bell Ringers being engaged to appear on that date. Admission 50 and 75 cents, reserved seats, $1, at the A. E. Howse Co's store.

Owing to delay in receiving plans and specifications for hospital building no further steps toward construction can be made nntil they arrive. Meanwhile, the public are respectfully invited to subscribe toward the hospital fund, which is showing generous support.

A memorial service will be held on Friday at 3 p.m., the day of the funeral of His late Majesty King Fdward VII. The service will be held in the room at the school house used by the Church of England, to which all denominations are heartily invited to attend.

Chas. Camsell, Dominion geologist, is expected here about the first of June.

Bells! bells! beautiful cow bells.

NEW SMELTING PROCESS.

Railroad Magnate Agrees to Pay $6,000,000 for Patent.

A big smeltiug proposition involving millions of dollars and bringing fame and fortune to a young Canadian inventor, has been consummated and notices went out recently to the fortunate shareholders in the company interested calling a meeting for formal ratification of the agreement. The company in question is the Island Smelting & Refining Co., which has just been incorporated. This company controls patents on a process invented by Dr. Island, formerly a dentist in Toronto. Tests are being made by D. D. Mann and should the result be as favorable as Mr. Mann and the shareholders fully expect, he will pay $6,000,000 for the patent rights for the world.

KING GEORGE V.

Hail to the new King! His Majesty King George V. became ruler of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, Emperor of India, on May 7th. In his forty-fifth year, he has already had considerable experience in state affairs, and gives evidence of good, sound judgment in all that pertains to the great authority which he wields. While heir-apparent and Prince of Wales he visited Canada and made a very favorable impression upon the people. In the present political crisis in England he will have opportunity to prove his capacity not only as king but also as statesman. If, like his father, or his illustrious grandmother, he is able to command the confidence of his subjects, then, no matter what political tempests may arise, he will cope with them satisfactorily. However, there is ample room for the belief that he will rise to the occasion and prove a wise ruler with many of the affable traits of his father. Canadians will give to him the same loyal adherence that was given the late king and will wish him long life and a happy and prosperous reign. God Save the King!

The following extract from the London Observer regarding King George is timely and gives a home estimate of him. It says: 'He is better understood in other parts of the Empire than at home, but his subjects in Great Britain will soon know his worth, his serious self, his patriotism, his passion for the imperial ideal, the directness and candor of his nature, his sympathy and courage. Owing to his self-imposed quiet role, some believe him of reactionary mind, others as likely to set his own impression on affairs. Both are absurd errors. King George was indoctrined with the true meaning of empire during his early world tours. With all the fervor with his belief in Empire, His Majesty is not likely to forget that twentieth century kingship demands sociai service, and will be in a special sense the monarch of the masses.'

The London Times says: 'King George V. will come to the throne with all the knowledge of public affairs and all the training which it is possible to impart to an heir apparent. We have lost a beloved and a great constitutional King, but he has left us a successor in whom we may confidently repose our trust.' Thus, it will be seen, our King begins his reign under very favorable auspices and with promise of success

NOTICE

YALE LAND DISTRICT.
DISTRICT OF YALE.

Notice is hereby given that Lewis Hind, of Victoria, B.C. intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers and marked Lewis Hind, S.W. corner, thence north 80 chains, east 80 chains, south 80 chains, west 80 chains to point of commencement, and containing 640 acres. LEWIS HIND,
April 7, 1910. P. Y. Smith agent.

Notice is hereby given that John Henry Jackson, of Tulameen, B.C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the South Fork of the Tulameen river:—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked J. H. Jackson, S.E. corner, thence north 80 chains, west 80 chains, south 80 chains, east 80 chains to point of commencement and containing 640 acres. J. H. JACKSON,
April 7, 1910. P. Y. Smith, agent.

Notice is hereby given that Edith Mary Hind, of Victoria, B. C., intends to apply to the chief commissioner of lands for a license to prospect for coal and petroleum on the following described lands situate on the south fork of the Tulameen river:—Commencing at a post planted about 2 miles from and south of the junction of the South Fork and the Tulameen rivers, and marked E. M. Hind, N. E. corner, thence south 80 chains, west 80 chains, north 80 chains, east 80 chains to point of commencement and containing 640 acres. EDITH M. HIND,
April 7, 1910. P. Y. Smith, agent.

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: $5 in buokram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?
