OUR TIMBER ASSETS

Canada the Last Great Timber Growing Country.

Forests Must be Protected from Fire and New Growth Cultivated.

World's Supply Must Shortly Come From B. C., and Investment Necessary.

Canada is one of the very few countries which can be depended on to produce more timber than is sufficient for its needs. Such is the opinion of a great French authority, M. Melard, who has made a careful study of the source of the world's timber supply. There are only seven countries in the world which now export wood in any quantity. Besides Canada, these are the United States, on this continent, and, in Europe, Austro-Hungary, Norway, Sweden, Russia and Finland. In Asia, only Russia has more than enough for her own use; Africa and South America can send little or no timber suitable for ordinary use, and Australis can supply little.

Of the seven exporting countries mention, the United States, Russia and Austria Hungary have been increasing in population and developing their resources so rapidly that they must soon cease to rank among exporting countries. Norway is overcutting her forests and must soon decrease her export. Only three countries remain, namely, Canada, Sweden and Finland, as sources that can be depended on for the timber supply.

Canada's forest area has been estimated at 800,000,000 acres, but so much of this is of little value naturally, or has been burned over that more recent estimates fall much below this, even less than half. The rmount of wood produced annually is no doubt much in excess of what is now being cut each year. It is important, however, if Canada is to hold her position as a timber producing country, that her forests be protected from fire and so managed as to ensure the greatest amount of timber being cut year after year, so as to keep them producing in perpetuity; and it is to this end that efforts are being made to secure better care of her forests.

The demand for wood is sure to keep up and increase; it is wanted for building, for furniture, for tools, and for a mulsitude of other uses; and as a nation progresses so the amount of wood used for each individual of its population increases, and so the country which can supply the demand for this commodity has a source of ever increasing importance, and one that will well repay considerable expenditures in its care.

LOCAL AND GENERAL

Other Provinces Own Telephone Lines Why not B.C. and Better Management.

The thermometer took a dip last night registering 10 deg. below zero, the coldest below zero.

Messrs. Geo. Wardle and Chas. Carlson left last week on a holiday trip to the Nicola valley and will return first of next week.

The province of Manitoba has assumed control of the telephones within its borders, and Alberta and Saskatchewan are about to do the same. Where does British Columbia stand in this public ownership business?

Mrs. J. Thynne, of Otter Valley, had the misfortune last week to break a bone in her left deg by coming in contact with a tree by the side of the road while out sleighing. Her many friends will be pleased to know that she is recovering rapidly and will soon be around again.

Don't think because you didn't receive an invitation to the grand opening of the new Hotel Otter Flat at Tulameen City on Friday, 17th inst., you are not welcome. Mr. and Mrs Henderson extends a cordial invitation to all.

On Friday evening next Rev. J. Thurburn Conn will deliver a lecture in the Court House, the subject of which will be "Three-Storied Man." The reverend gentleman will also conduct Divine services on Sunday evening.

The London Times has passed from the control of the Walter family, which has owned and controlled it ever since it was established, to a company of which Mr. C. Arthur Pearson will be manager.

Work on the V.,V. & E. between Keremeos and Hedley is progressing as rapidly as can be expected considering the small force of men employed. Shortage of labor can no longer be held out as an excuse for dilly dallying with this road; it is either shortage of money or a desire to hold off as long as possible to gain some material end.

That great Conservative false alarm, Sir Charles Hibbert Tupper, has been asked by a few of his political admirers in Vancouver to contest that constituency in the forthcoming Dominion general election. Sir Hibbert graciously acknowledged the honor and said he was "in the hands of the Conservative party." The gallant knight had better stay with his friends 'way down in Nova Scotia, if he knows what's good for himself. He'd make easy pickings for most any old Liberal opponent in Vancouver.

COPPER MINES ACTIVE

Granby Smelter is to Largely Increase Capacity.

Differences Between Employees and Owners Ended Satisfactorily.

Second Largest Smelting Plant on Continent will Treat 4,500 Tons Daily.

"At the outset of the new year", says J. P. Graves, president of the Granby Co., "as an indication of the harmonious relations between the Granby interests and their employees, we may say that we will not only start the new year operating at full capacity, but further than that, in view of the exceptionally promising outlook for 1908, we plan to greatly increase the capacity of our plant, the largest copper smelting plant in Canada, and with the exception of Anaconda, the largest on the continent. At full capacity from now on we will be turning out at the Granby smelter from 3,000 to 3,500 tons of ore daily, Mr. Graves is reported as saying. "This is our present full capacity," said Mr. Graves, "and there is every indication that we will be running at full capacity, and there is every indication that we will be running at full capacity from now on until the middle of next summer. So exceptionally encouraging is the outlook in the Boundary country that I think I may safely say that by the middle of next summer we will be in such a position as to feel in every way justified in increasing our capacity by at least 1,000 tons a day. This will bring the Granby smelter up to a total capacity of fully 4,500 tons daily. Our present aggregate monthly output is 100,000 tons or about 1,500,000 tons a year. The point that I wish particularly to emphasize is that all differences which may have existed between the Granby smelter and its employees have been adjusted on a most satisfactory basis, and there is not the slightest reason why we should not have a most prosperous year. The management certainly feels like expressing its gratification at this satisfactory turn of affairs, notwithstanding the fact that, owing to the present low price of copper, the company's profits will be greatly reduced from what they might ordinarily be expected."

WISE IMMIGRATION LAW.

Ottawa advices say that that the Interior department is drawing up regulations which will require that all emigrants seeking admission to Canada must come into this country direct from their place of birth, or their country of citizenship. This will apply both to the Atlantic and Pacific and will put an end to the immigration of Japanese from Honolulu to British Columbia. The new regulation will also control immigration to the Dominion from southern Europe and will check immigration to Canada via American ports.

PAYMENT ON MINING DEAL.

The first payment on the Reco bond was made this week by J. E. McCauley, who is in charge of the property, and the money for the second payment has already been provided for. Mr. McCauley was seen at the Hotel Tulameen this morning and stated that everything was turning out satisfactorily at the mine and that as soon as spring opened up an increased force of men would be employed and work vigorously pushed.

Bituminous coal fields which promise to rival those of the Crow's Nest Pass district in size and importance have been discovered on Bear river, in the northern part of the Cariboo district. They are situated ten miles from the Grand Canyon on the Fraser river, and are located on the main line of the Grand Trunk Pacific railway and a hundred miles northwest of Barkerville.

A meeting of western members of the Canadian Mining Institute is being held at Nelson this afternoon for the purpose of forming a western branch of the institue and for the reading and discussion of papers affecting the mining industry.

Saturday, January 25th, is the anniversaty of the birth of the great Scottish bard, Robert Burns.

A man named Clarke was arrested last week in Kelowna on a charge of burglery, and it is probable he will also be held for the murder of Zimmerman at Penticton about a year ago. He was arrested in connection with this crime shortly after it happed, but lack of evidence at that time cleared him. It now appears fresh evidence has come to light which makes it look bad for Clarke.

There are rumors of the early retirement of Sir Henry Campbell-Bannerman from the premiership of the British House of Commons, says Old Country advices, and that he will be succeeded by Herbert H. Asquith. The latter is considered unsympathetic in the cause of Home Rule and his succession to that office would lead to important developments in the policy of the Irish party and its relations to the Liberal party.

The famous Harry K. Thaw trial is again before the courts of New York and is attracting widespread interest. The former defence of "not guilty" has been amended by the specification that the defendant was insane when the alleged homicide was committed.

A McBRIDE LIE NAILED.

Premier McBride and his organs have been found guilty of the most wilful misrepresentation and deception regarding the recent utterances of Sir Wilfrid Laurier on the Japanese question. Of course those acquainted with McBride will express no surprise at his actions in deliberately misquoting Sir Wilfrid in an attempt to make it appear that the Federal Premier ignores the views and sentiments of British Columbians on the Japanese immigration question, but had Premier McBride been possessed of ordinary horse sense he might have known that the true facts of the case would be forthcoming, and the falsity of his assertion proven. In a letter to the Vancouver World Sir Wilfrid Laurier disposes of the McBride falsehood. The letter reads: "My attention has been drawn to an editorial in the Victoria Colonist of December 18th, and a statement made by the Hon. Richard McBride in a speech to the Young Conservative Club of New Westminster, and reported in the Columbian of December 21st, both referring to certain words said to have been uttered by me at a public meeting in Ottawa, on December 3rd. In discussing the views and sentiments of the people of British Columbia, I am quoted as saying: 'You have your views on this question. You are hostile to the immigration of the Oriental races. I DO NOT CARE FOR YOUR SENTIMENTS, and I believe you are making a mistake.'

"Had the editor of the Colonist, and Mr. McBride, gone farther, and quoted the words immediately following: 'But these are your sentiments and I am bound to respect them,' it would have at once been apparent that I was misquoted, and that the words which were actually used by me were: 'I DO NOT SHARE IN YOUR SENTIMENTS.'

"I would also refer to my speech in the House of Commons delivered the day immediately preceding (see Revised Hansard, page 61): 'The people of British Columbia have certain views upon this question. I would not be honest with myself or with them were I to say I share those views, but whilst I do not share them I am bound to respect them. We are bound to see that the views of all people in a free country like this are given respect to."

What could be more fair and honest than the above, and how different from the statement misquoted by that political trickster, the Hon (?) Richard McBride.

A tickling cough, from any cause, is quickly stopped by Dr. Shoop's Cough Cure. And it is so thoroughly harmless and safe, that Dr. Shoop tells mothers everywhere to give it without hesitation even to very young babes. The wholesome green leaves and tender stems of a lung-healing mountainous shrub, furnish a curative properties to Dr. Shoop's Cough Cure. It calms the cough, and heals the sore and sensitive bronchial membranes. No opium, no chloroform, nothing harsh used to injure or suppress Siniply a resinous plant extract, that helps to heal aching lungs. The Spaniards call this shrub which the doctor uses, "The Sacred Herb." Always demand Dr. Shoop's Cough Cure. Sold by J. R. Campbel'.

NOTICE.

Notice is hereby given to whom it may concern that one red heifer (hornless) and one ball-faced steer, both about three years old the coming spring strayed on to my premises and unless they are redeemed within thirty days and expense of keep paid for they will be sold by auction to recouer expenses.

ANGUS McLEOD.

Wolf Creek, Jan. 1 1908.

Synopsis of Canadian Northwest Homestead Regulations.

Any even numbered section of Dominion lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

1. At least six months' residence upon and cultivation of the land in each year for three years.

2 If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

3. If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal—coal mining rights may be leased for a period of twenty-one years at an annual rental of $1 per acre. Not more than 2,560 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

W. W. CORY,
Deputy of the Minister of the Interior.

PAIN

Pain in the head—pain anywhere, has its cause. Pain is congestion, pain is blood pressure—nothing else usually. At least, so says Dr. Shoop, and to prove it he has created a little pink tablet. That tablet—called Dr. Shoop's Headache Tablet—coaxes blood pressure away from pain centers. Its effect is charming, pleasingly delightful. Gently, though safely, it surely equalizes the blood circulation.
If you have a headache, it's blood pressure.
If it's painful periods with women, same cause.
If you are sleepless, restless, nervous, it's blood congestion—blood pressure. That surely is a certainty, for Dr. Shoop's Headache Tablets stop it in 20 minutes, and the tablets simply distribute the unnatural blood pressure.
Bruise your finger, and doesn't it get red, and swell, and pain you? Of course it does. It's congestion, blood pressure. You'll find it where pain is—always. It's simply Common Sense.
We sell at 25 cents, and cheerfully recommend

THE LEASING SYSTEM.

"It is an ill wind that blows nobody good." Since jobs are hard to get the miners have turned their energies to leasing. Leases that went begging six months ago are eagerly snapped up today. This feature of the present times is particularly noticeable in gold camps, Cripple Creek being probably the most popular because of the high grade of the ores and the facilities for marketing them. The same news is coming from all gold districts, however, and high grade silver camps are a close second in demand. Austin, Nevada, is mentioned among others of the latter class. Even in camps that produce those metals most injured by the slump there is an unprecedented demand for leases. This is especially observable in the Missouri-Kansas zinc-lead mines, in the copper mines at Butte, and in the lead copper-silver mines at Tintic, Utah. The recuperative power of the mining industry is something remarkable. When things go wrong in one quarter the miner cheerfully shifts his energies to another and steadily forges ahead.—Mining Science, Denver, Col.

FREDERICK A. KRIBS.
By George Laidley, as agent.
Dated 23rd December, 1907. 3-9

NOTICE.

Certificate of Improvements.

King Solomon mineral claim, situate in the Similkameen mining division of Yale district. Where located: On Copper mountain.

Take notice that I, F. W. Groves, acting as agent for C. M. Snowden free miners certificate No. B9431, and E. E. Burr free miners certificate No. B78302, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 16th day of December, 1907. 49-9

SMILES.

Landlady: I hope you slept well last night, sir? Boarder: Well, not exactly. I was troubled with an attack of insomnia Landlady (indignantly): It's a falsehood, sir! I'll give you a sovereign for every one you can find in the bed.

They took him to the asylum moaning feebly; "Thirty-nine, thirty-nine." "What does he mean by that?" asked the attendant. "It's the number of buttons on the back of his wife's new frock," the family doctor explained.

A woman agitator, holding forth on the platform and presenting the greatness of her sex, cried out: "Take away woman, and what would follow?" And from the audience came a clear, male voice: "We would."

Mrs. Newlywed: My dear, what interior decorations appeal to your taste? Mr. Newlywed: Beefsteak and onions.

Hubby: Oh, do try and talk common sense! Wife: I would, but it would be taking an unfair advantage of you.

"Say, waiter, here's a hair in the butter." "Yes, sir. A cow's hair, sir. The revised rules of the department of agriculture requires us to serve one with each pat, sir, as proof that it ain't oleo."

"When did you become acquainted with your husband?" "The first time I asked him for money after we were married."
