BASEBALL "DOPE" FOR PAST WEEK

HOME TEAM DEFEAT COALMONT —SENIOR BOYS WIN OVER K. OF P. TEAM

"Doc." Smith's town team of ball players emerged victors over Coalmont's best ball team at the Race Track grounds last Sunday afternoon at 3.30. Poor fielding was exhibited on both sides and practice will indeed improve matters for both teams. The final score was 16 to 7.

Del Young handled the indicator gave decisions without batting an eye.

A large number of followers from Coalmont accompanied their team down.

The line-up was as follows: Coalmont—Brydone, 1st b.; Muir, 2nd b.; Baggy, s.s.; Lee, c.; DeMers, p.; Sheer, l. f.; Roe, r. f.; Brydone, c. f.; McLean, 3rd b. Princeton—Prest, p.; Burr, 2nd b.; L. Smith, 1st b.; Slevin, s.s.; Allen, 3rd b.; Avery, r.f.; Almstrom, l.f.; V. Smith, c.; Colton, c.f.

Senior Boys vs. K. of P.'s

In Thursday's ball game between the Senior Boys and the K. P.'s the boys upheld the reputation made in the game played with the Masons last week. In yesterday's match everything seemed to be in favor of the boys, and it was not until the sixth inning that the K. P.'s got a "look in." In this period Farrar, Avery, Burr and Hansen managed to reach the plate, making the only four runs of the game for their side.

For the Boys, Mattin made a start in the fourth inning, followed closely by Campbell and Wright, leaving the score 3-0 at the finish of the fourth. In the fifth inning Pesut and Campbell scored again. Only seven innings in all were played, in the latter two of which the Boys failed to "register."

Judging by some of the stunts that were pulled off by some of the Seniors, it looked as if the youngsters had them "buffaloed." Throughout the game there was some good fielding work done, although the batting was not of a very high order. The score at the end of the seventh inning was 5-4 in favor of the Senior Boys. Follwoing is the line-up:

Knights of Pythias—G. Farrar, p.; H. Avery, c. f.; E. B. Slevin, c.; W. Almstrom, 3rd b.; L. Smith, 1st b.; G. Lyall, r. f.; E. L. Colton, s. s.; E. Burr, 2nd b.; H. E. Hansen, l. f.

Senior Boys—G. Schisler, 1st b.; D. Muir, c. f.; L. Prest, c.; W. Mattin, 3rd b.; J. Pesut, r. f.; J. Campbell, l. f.; M. Wright, 2nd b.; M. Prest, s. s.; E. Measuette, p.

COALMONT NEWS

(From our own correspondent.)

Mining Recorder Hugh Hunter, of Princeton, paid us a short visit on Wednesday.

* * * *

Miss Rose Dick, of Vancouver, is here visiting the family of Mr. Prentice.

* * * *

Miss Lily Pickthall left on Sunday for a visit with her mother in Allenby, returning here on Monday.

* * * *

Mr. and Mrs. Wm. Nelson motored down to Princeton Sunday to attend the ball game.

* * * *

We hear that the Coal company intends putting on another shift right away. Our town is growing fast.

* * * *

Mr. I. McTavish has just had built a cold storage room, in connection with his grocery store. If this weather keeps up he will surely need it.

* * * *

Miss Kirkpatrick and a party of friends motored up from Princeton Saturday to attend the Bungalow dance.

* * * *

There will be a dance at the Coalmont hotel Saturday night. We hope to see some of the Princeton people there. A good time is assured.

* * * *

Mr. C. R. Malcolm, manager of the Union Bank here, returned on Monday from Victoria, where he has been visiting his people over the week end.

* * * *

We are much pleased to learn of the continued improvement of Mr. Walter Holmes, who was unfortunate enough to have his leg broken a couple of weeks ago, in a motor accident.

* * * *

Our Junior ball team went to Princeton on Saturday for their first game away from home. The score was sixteen to thirteen in favor of Princeton. After a little more practice the Coalmont lads will make a better showing.

* * * *

We expected the Merritt ball team over on Sunday for a game with Coalmont, but owing to illness, some of the Merritt boys are "out of condition," so the Princeton team will come here instead. We look for a fairly "close" game.

* * * *

On Saturday evening a dance was given in the Bungalow, the proceeds to be used in purchasing equipment for the Junior ball team. A splendid crowd turned out and a jolly time was had by everybody. Thanks are due Mrs. McLeod and Mrs. McLean, who had charge of the affair.

* * * *

Watch Coalmont grow!

DISCUSS HIGH SCHOOL WORK

Cawston and Keremeos School Boards Hold Joint Meeting

The trustees of the Cawston and Keremeos school districts, with Mr. Lockhart and Mr. Towell, principals of the respective schools, and School Inspector Lord of Kelowna, attending in an advisory capacity, met at the home of Mr. D. McCallum last week, to discuss means whereby high school work could be carried on at Cawston and Keremeos.

The matter was discussed from every angle. Principal Towell prefaced his remarks with the statement that he was leaving Keremeos at the end of the present term and therefore felt free to offer his suggestions. He stated that the advanced work in the Keremeos school had now reached the stage where the principal could no longer carry on both the high-school and entrance work. There are at present 11 high school students. Some of these, however, would not be available another term and it was extremely doubtful if the successful candidates at the approaching entrance exams would swell the number to the fifteen required by the School Act as the minimum for a high school class.

Cawston, it was estimated, would have from five to seven pupils for high school work, but in order to carry on the work in their own district it would be necessary to engage another teacher and become a "superior" school.

Inspector Lord gave much useful information and expressed himself as thoroughly convinced that the only solution for the problem lay in the two districts acting together.

Cawston delegates to a man accepted as fair, the proposition that their district provide for the transportation of the Cawston pupils and bear a pro rata share of the high school teacher's salary, less a reasonable deduction to be made for his work in supervising the Keremeos public school. The cost of transportation was estimated at $400, of which the government would pay half, and the amount required per pupil to meet the principal's salary and other expenses was fixed at $45 per year.

Keremeos delegates accepted the responsibility of providing and equipping the school room, estimated at $4,000, of which the government stands half, and of bearing all other expenses in connection with maintenance and teacher's salary, the latter beig estimated at $1800 per year.

A tentative written agreement to this effect was signed by the trustees of both boards and will be submitted to the ratepayers of both districts at the approaching annual school meetings for approval, amendment or rejection as they see fit.

DONATIONS TO HOSPITAL

The secretary of the Hospital board gratefully acknowledges the receipt of the following donations during the month of May, 1922:

W. Freeman	$1.50
Robt. Taylor	1.00
P. W. Gregory	2.50
C. Cornish	1.00
R. Herbison	1.00
J. H. Gauld	2.00
L. P. Harrison	1.00
E. E. Burr	2.00
W. B. Ewart	1.50
E. B. Hall	1.00
C. Summers	2.00
E. Waterman	2.00
A. E. Wilson	1.00
Proceeds of wager	1.00
Surplus from collection, Charl-Dinner, Allenby	2.05
Miss Knowlton, proceeds portion picture raffle	15.00
R. A. Lambert	2.00
Mr. Horrocks	Eggs
Mrs. McFadden	Eggs
Mr. Holmes	Eggs
Mr. White	1 bottle cream

OLALLA NUGGETS

(From our own correspondent.)

On Saturday, Mrs. E. M. Daly, of "The Willows," Mrs. T. Daly and three little daughters were visitors to Mrs. McDougall and Mrs. Irwin.

* * * *

On Friday Mrs. L. M. Chase and daughter, of the Lone Pine ranch, entertained at afternoon tea, Mrs. McDougall of Morningside, Mrs. Archibald Irwin and Miss Minnie Smith.

* * * *

The honor roll of Olalla school for May: First primer, Sophy Verdan, 85 per cent.; second primer, Jennie Verdan, 80; Melena Marsel, 75; first reader, Willie Foster, 78; second reader, Cecilia Verdan, 76; senior third, Beatrice Bolivar, 81.

* * * *

Godfrey Reynolds and John Himmell left on Sunday to work with Fred Howell's road gang somewhere beyond Squaw lakes on the Penticton road. William Shuttleworth is looking after Godfrey's ranch during his absence. It is stated that Charley Jordan also joined up for work with the same gang.

* * * *

District School Inspector A. R. Lord, of Kelowna, visited Olalla school on Thursday and put the scholars through their paces, there being eleven children present. Mr. Lord's report states that the control is good, tone fairly good, character of teaching reasonable; the standing of the school and progress of pupils are both fair.

* * * *

While doing assessment work on the Prince of Wales, Peter T. Williamson has struck a rich-looking bunch of ore. I have not the time this week to give particulars and Pete was not at home when I called; but I hope to be able to give a full account next week. The Prince of Wales adjoins the Copper King and the Golconda, two splendid claims that only need the expenditure of some money—not very much—to become shippers.

* * * *

George and Willie Brewer have been in bed for the past several weeks but are convalescing now. George had a close call one night when his father had to fetch Nurse Purcell from Keremeos at eleven o'clock. He was unconscious for several hours, but when the nurse arrived she soon had things going the way they ought to be and George was brought back from the unknown regions of the silent land by the nurse's skill. Horace, the father, states emphatically that he believes Nurse Purcell saved George's life. The cause of illness was pneumonia.

* * * *

Olalla is fast losing its old-time masculine solitude which seems to be the usual fate of deserted mining camps and the ladies, of whom we have quite a few, are making us all sit up and take notice. I have not been in the habit of recording social visits in this column of Nuggets, but of course Olalla ladies must be enabled to hold their own with the best of 'em, and as such society items seem to be the ne plus ultra vogue of your fair correspondents at Keremeos and Cawston, it is up to me to give our ladies a chance to take a hand in the social game that is so dear to the feminine heart.

* * * *

Dunc. Campbell's crew had a strenuous time on Saturday saving the Cedar creek bridge from disaster, its destruction being threatened by a large tree which had become undermined and fell across the creek damming back the roaring torrent which then began cutting deep trenches around the bridge and across the road. But Campbell's gang is equal to any old side issue of that sort and soon the tree was ousted, the bridge saved and the roadway made fit and ready for its usual work, although looking quite a bit mussed up. Dunc. went up again on Sunday to see if the creek intended going on another rampage.

* * * *

For several days past the thermometer has reached 90 degrees in the shade, consequently the water in both Keremeos and Olalla creeks have reached as high a point as was ever recorded since the first reading of the water gauges for the Hydrographic Survey was begun in 1914. But very little damage is being done by the present rise, the log jam on the Christian ranch, which caused so much destruction last year, having been removed soon after the water went down. The danger point from high water has passed here, but in the big rivers, with their hundreds of miles of watershed, the trouble is yet to come—that is, if the weather continues to be of the torrid sort we have had lately.

* * * *

The present high water has solved one fact in natural history of which I had always been doubtful. It used to be said that mosquitoes did not appear until the high water had gone down. Well, today, as I write, June 5th, the water in all the creeks is at its highest, and—would you believe it?—the influx of the small, grey summer mosquito, the little grey cuss that stings, has begun. Where did they breed? One would have thought the high water would have washed away their breeding grounds. There is no still or standing water except Keremeos creek where it widens at the slough, but even that is always

(Continued on page four.)

CROP REPORT OF BANK OF MONTREAL

FRUIT CROP OF B. C. ESTIMATED AT 75 PER CENT. OF LAS YEAR

Below will be found a brief synopsis of telegraphic reports received at the head office of the Bank of Montreal from its branches. The branch managers have complete and intimate knowledge of each local situation and are in close touch with crop conditions in all sections of the districts mentioned:

General

Throughout the Prairie Provinces conditions are favorable and crops making good headway. Wheat seeding is completed and seeding of coarse grains nearly finished. Weather warm; moisture ample. Fruit trees have abundant bloom; hay promises to be a large crop. In Quebec seeding is being completed; prospects are fairly bright for good hay crop but more rain is needed. In Maritime Provinces the season is two weeks late. Fruit trees Annapolis valley show heavy bloom. In British Columbia the season is two weeks late. Crops are in fair condition. Details follow:

Prairie Provinces

Edmonton: Wheat seeding completed; growth 2 to 4 inches; oats 75 per cent. seeded. Fall rye winter-killed some points; rainfall general last ten days. Calgary: Wheat seeding completed, growth good; oats 25 per cent. seeded, some soil drifting, grasshoppers threaten but municipalities prepared to combat this pest. Lethbridge: Fall rye looking well; wheat seeding completed and oats about 60 per cent. Pasture good; moisture sufficient, acreage wheat in Alberta larger than last year. Saskatoon: Wheat practically all seeded, acreage slightly less than last year; increasing acreage expected in oats and barley. Regina: Wheat seeding completed; acreage estimated 15 per cent. less with corresponding increase in coarse grains. Moisture abundant and no soil drifting or insect pests. Winnipeg: Conditions favorable; wheat shows good growth and oats seeding nearly finished. Good crop fall rye promised. Pasture good; warm weather and plenty rain have given crops an excellent start.

Province of Quebec

Seeding nearly completed in some quarters and in others well under way. Prospects for a good hay crop fairly bright and with warm rains these prospects should be improved. This also applies to grass pasture. The season late throughout the province.

Province of Ontario

Recent general warm weather has proved very beneficial; seeding conditions have been ideal. Fall wheat has greatly improved and a good average crop is indicated. Spring wheat oats and barley are well up and looking promising. Hay a larger crop in sight; grass in splendid condition. Fruit trees have had an abundant bloom. The general tenor of reports is that prospects are bright and that the present condition of the crops is well up to or above the average.

Maritime Provinces

Seeding is well advanced and general conditions are good; the season is one to two weeks late. Hay promises well everywhere; fruit trees in Annapolis valley show heavy bloom. A somewhat smaller acreage of potatoes is planted in New Brunswick than was the case last year. In Cape Breton conditions are very backward as the ice has just moved off coast.

Province of British Columbia

Season 2 to 3 weeks late. Moisture everywhere sufficient; grains generally growing rapidly. Hay just under average; alfalfa 60 per cent. winter-killed. Potatoes good average; Okanagan apples, judging from blossoms will be 75 per cent. of last year's crop. Stone fruits above average. Damage by frost to small fruit in Fraser valley offset by increased acreage.

WIRELESS APPARATUS FOR PRINCETON

A syndicate has been formed in town to purchase a wireless apparatus. It was expected to have the machine installed this week all ready for "listening in," but delays have been occasioned which prevented this. In all probability the instrument, on arrival, will be installed in the dining room of the Hotel Princeton, the use of which has been kindly offered gratis to the local wireless syndicate.

Princeton Paragraphs

The Princeton Baseball team expect to play the Coalmont aggregation on Sunday afternoon at Coalmont.

Mr. P. B. Freeland, of Grand Forks, was in town on Wednesday.

Take your films to Howse's store to be developed. Quick service. 26-4

Mining Recorder Hugh Hunter was a visitor to Coalmont on Wednesday.

Mr. A. E. Howse returned on Tuesday from a business trip to the Coast.

School Inspector A. R. Lord, of Kelowna, was in town last week giving some special instruction regarding the coming exams.

Mr. T. W. Coleman, of Keremeos, was in town Wednesday on his return from a trip to the Coast cities.

Mr. C. A. Howse, of Merritt, was a visitor in Princeton over last week-end.

Mr. and Mrs. A. E. Irwin, of Olalla, were motor visitors in Princeton Tuesday, returning home the same afternoon.

Mr. and Mrs. F. J. Harrison returned on Monday from a fortnight's motor trip into the Cariboo country, going as far as Prince George.

Government Telephone Lineman R. Echlan, of Keremeos, and his assistant spent several days in town this week making some necessary changes and repairs to the local system.

Mr. and Mrs. C. H. Martin and child, of Wardner, B. C., spent several days in town this week, guests at the Hotel Princeton.

General Manager L. A. Campbell, of the Kootenay Power and Light Co., was in Princeton on Wednesday, accompanied by Mr. C. Fisher, of Grand Forks.

Dr. Henderson Bryce, M. D., specializing in diseases of the eye, eye testing, will be at the Hotel Princeton, Thursday, June 15th, and may be consulted there.

Mr. W. T. Jago, of Coquitam, Grand Organizer of the L. O. Lodge for British Columbia, was in Princeton for a coupe of days early in the week and paid his semi-annual visit to the local order.

We are asked to announce that there will be a big celebration at Coalmont on the first of July this year. Further particulars will be given in the course of a few days.

In another column of this issue will be found an advertisement of Mrs. Antille, hairdresser, of Penticton, who will be in Princeton on Monday next. If this first visit of Mrs. Antille's proves a success, she intends to come again. Now, ladies, it's up to you.

Fisheries Inspector G. N. Gartrell, of Summerland, motored over to the Similkameen on Wednesday. He spent Thursday in Princeton and today took a trip up to the Chain Lake district to locate suitable spots to "plant" a few thousand fish eggs, which he expects to distribute throughout the district in a couple of weeks. He was accompanied on the trip by Mr. Jas. Crawshaw, of Vernon.

BOARD OF TRADE MEETING HELD TUESDAY NIGHT

There was a good attendance of members at the adjourned meeting of the Board of Trade, which was held on Tuesday night in the office of the secretary, owing to his inability to be present on the previous evening.

The secretary was instructed to write the secretary of the Vancouver Automobile Association to ascertain how many members of the club would make the trip over the Hope-Princeton route next month.

A committee was appointed to interview the officials of the coal company regarding the possibility of procuring a cemetery site on the auto highway near the water tanks.

A committee was also appointed to interview Wing to see if any arrangements could be made for the use of some of his land near the mouth of One Mile for a tourist camping ground.

WM. RICHTER DIES SUDDENLY

OSOYOOS MEMBER OF PIONEER FAMILY EXPIRES IN PENTICTON

Penticton, June 7.—The death of Mr. William Richter, of Osoyoos, took place on Monday night in the Penticton hospital, following an operation for appendicitic, which was performed on Saturday night in the hope of saving his life.

The deceased, it is understood, had been ill for some time, but on Saturday became much worse, and was brought to Penticton. He was then in a very serious condition. He was slightly over 50 years of age and leaves a widow and five children.

Mr. Richter was the son of Francis Xavier Richter, who was one of the oldest settlers in the Similkameen valley. The deceased was born on the ranch which has since been developed into the Cawston district, owned at the time of his birth by his father, who later sold the property to Mr. Lowe. The Richter family moved further down the valley and still have extensive holdings in various parts of the Similkameen. The Richter Pass was named after the father of the deceased.

The funeral took place this afternoon from the Richter hall, Keremeos, to the Keremeos cemetery, Rev. Father Wagner officiating. Howson & Baker were in charge of the arrangements.

VALUE OF CHEESE AS A FOOD

Its Consumption Three Time More Per Capita in Britain than in Canada

A companion pamphlet to Miss Helen G. Campbell's "Why and How to Use Milk" has been published by the Dominion Department of Agriculture, Ottawa. hTis pamphlet is entitled "Why and How to Use Cheese." Besides giving a history of cheese making and of the different kinds of cheese, of which it will surprise most people to hear there are some 250 upwards of three dozen methods are described in which cheese can be used to make savory and nutritious dishes.

All cheese making in Canada was carVried on as a farm industry until 1864, when the first factory came into existence in Oxford county, Ontario. In the following year a factory was established in Massasquoi county, Quebec. The progress of factory establishment was so rapid that in a few years the system was generally adopted, and farm-made cheese became a rarity. While every one of the nine provinces has its cheese factories, about 97 per cent. of the production has to be credited to Ontario and Quebec. Incidentally it might be mention that the total value of the cheese made in this country runs up to between thirty-five and forty million dollars per annum and the quantity total up to around a hundred and fifty million pounds, sometimes over and sometimes under. The variation in production is considerable, as will be understood when it is stated that in 1914 it was 169,478,340 lbs. and in 1920 nearly twenty million pounds less.

In Canadian factories the manufacture of cheese is mostly confined to what is known as Cheddar, but genuine Stilton is turned out on the Dominion Experimental Farm at Agassiz, B. C., and the Trappist monks at Oka Agricultural Institute in Quebec make what is known as Oka cheese. Another form of cheese made in this country is Cottage cheese, which is made in many households from sour skim-milk without the aid of rennet. For cream cheese there is also a demand of some dimension. Miss Campbell dwells upon the advantages of cheese in the diet, tells how it can best be kept, and suggests that Canadians would be well advised to eat more of it than they do. This suggestion gains force from the fact that the consumption of cheese in Britain is about four times per capita more than in is in this country.

BETTER SERVICE FOR TOURING MOTORISTS

Vancouver, June 5.—For those motorists who with to tour from Vancouver to the interior an improved automobile transport service on the Kettle Valley railway rrom Hope to Princeton has been instituted, according to advices received by the Vancouver Automobile club.

A freight train leaving Hope on Thursdays and Sundays will have special cars for the carrying of motor vehicles. It is necessary to have the automobiles loaded on the train by eleven o'clock in the morning the advices state. The fare for cars, irrespective of size or weight, is $24.50 from Hope to Princeton.

RUSSIA AND GENOA

The purpose of the Genoa Conference is primarily to effect such conditions as will enable Russia to get back into the world family and help to restore the equilibrium which has been so upset by the chaos resulting from the war.

Mr. Lloyd George, representing his government, is firmly of the belief that it will be necessary to restore Russia to normal or something approaching normal before world conditions will settle down.

Some Canadians who do not sense the significance of these world events are prone to speak lightly of the harrowing conditions which confront many innocent people in Russia. In condemning Russia for her failures these same people forget that the masses of the Russian people are not responsible for the insane acts of some of their leaders.

The Save the Children Fund Committee is concerned only with the human question of rescuing millions of innocent children from the plight in which they find themselves by reason of the drouth of last year and the breakdown of the whole economic system of Russia. What Canada has done so far has been the means of relieving the distress among only 75,000 children. There are millions more in actual want, dying by inches because there is no help. Canadians must not rest until the greatest measure of relief has been given.

Send your subscription to Sir George Burn, Treasurer of the Save the Children Fund, Ottawa, or forward it through your local committee or bank.

PATRIOTISM AND TAXES

Taxes do not generally promote patriotism—it all depends. A delegation of South Americans, calling themselves native Tarapacans, has addressed President Harding in connection with the conference at Washington designed to settle the Tacna-Arico controversy between Chile and Peru. The Tarapacans, moved by the spirit of self-determination that has caused so much trouble in the world, believe that the best solution of the quarrel between Peru and Chile is to establish a new independent State of Tarapacan, in which they will administer the laws—and of course collect taxes. The desire to perform this last function, according to the "Engineering & Mining Journal-Press" is more stimulating to patriotic fervor than may be confessed by the Tarapacans themselves. The point is that a part of the huge deposits from which the world derives most of its nitrate for the manufacture of explosives and of fertilizers are in Tarapacan. These deposits are exploited by foreign companies and, the large export tax that the producers pay is naturally very attractive to the South Americans.

THE MATCH HAZARD

During the past several years, an alarming increase in the number of disastrous fires in Canada is said to have been caused by the use of defective matches. Records for the year 1921 show that 2,756 fires, involving property loss of $851,372, and the death of 52 women and children, originated from inherently defective matches and from the careless use of matches that were not manufactured in accordance with approved standards. In justice to Canadian firms engaged in the manufacture of matches, it should be stated that many of the fires referred to were caused by imported matches.

From time to time, it has been represented to the Dominion Fire Commissioner that as inferior grades of matches constitute a serious menace to life and property, the Dominion Government should enact legislation to control the quality of matches in general use. In order that evidence might be secured as to the extent of this demand for legislative control, the matter was brought before the last annual meeting of the Dominion Fire Prevention Association and it was decided to urge the government to take immediate steps to establish minimum standards regulating the manufacture, importation, sale and use of matches in Canada. The action of the Dominion Association was subsequently approved by the Ontario Fire Prevention League, whose secretary, Mr. George F. Lewis, is mainly responsible for arousing interest in the matter.

With a view to advancing the wishes of these representative organizations, conferences have been held with the match manufacturing and distributing interests, and tentative standards which appear to be generally suitable for adoption have been formulated. Legislation designed to give effect to any approved requirements have been drafted and, it is anticipated, will received the consideration of the government at any early date.

The Canadian Horticultural Council was organized at a meeting held in Ottawa on May 17. The Council will represent fruit growers, vegetable growers, fruit package manufacturers, florists and gardeners, nurserymen, wholesale fruit and vegetable dealers, jam manufacturers, canners, and horticultural associations. The object of the council is to promote the interest of all matters tending towards the improvement of these various industries concerned with the horticultural branch of agriculture.

The council shall consist of fourteen representatives, three of which shall represent the fruit growers, three the vegetable growers, two the wholesale fruit and vegetable dealers, and one each the package manufacturers, florists and gardeners, jam manufacturers, canners, nurserymen, and amateur horticulturists.

The organization expenses are being met by a federal grant of $5,000. For carrying on the work hereafter the various interests shall provide annual membership fees.

The following officers were elected: President, Col. H. L. Roberts, Gromsby, Ont.; 1st vice-president, F. W. Bishop, Kentiville, N. S.; 2nd vice-president, R. R. Scott, Winnipeg, Man.; secretary-treasurer, F. L. Burrows, Assistant Fruit Commissioner, Ottawa. Directors: W. E. Groves, Hamilton, Ont.; W. H. Stewart, Aylmer, Que.; Jas. Wagstaffe, Hamilton, Ont.; Mr. W. T. Macoun, Dominion Horticulturist, was elected chairman of the standing committee on plant registration. Mr. G. E. McIntosh, Transportation specialist in the Fruit Branch, Ottawa, was elected chairman of the transportation committee. Mr. C. W. Baxter, Fruit Commissioner, is chairman of the legislation committee, and Mr. E. B. Luke, of Montreal, chairman of the publicity committee.

CORRESPONDENCE

Princeton Star,
Princeton, B.C.:

I have just returned from an extended trip through Oregon, Washington and Idaho, where I went to look over the best herds of Ayrshire cattle. I saw many good Ayrshires in Oregon and Washington. I frequently met men who were farming with Holsteins and some with Jerseys. They all had the same tale to tell, going out of Holsteins in preference to the Ayrshires. I visited the University farms of the State of Washington and Idaho. At the State University farm at Pullman, Washington, I saw and examined the famous Ayrshire cow, Illa Willowmoor, now the property of the state. This cow was being milked under official test three times daily. The test is for 365 days and calve at the end of this period. In the last six months test, she has produced 12,000 pounds of milk testing 4 per cent. butter fat. This remarkable animal is a descendant, in fact a daughter of the famous Peter Pan, America's greatest Ayrshire bull. Its sire, Beuchan Peter Pan, was the greatest Ayrshire bull in Scotland and imported to America. Illa Willowmoor as a two-year-old, recorded in the Advanced Registry of Ayrshires in United States, produced 9,219 pounds milk with over 520 lbs. butter, and has beat that many times since. In the present test she has already produced 500 pounds butter in six months. She is sister to Willowmoor Vesta, who produced 17,755 lbs. of milk and 800 pounds butter in one year. Many other sisters broke this record. I then went to Lewiston, Idaho, where I interviewed a gentleman, who had ten direct descendants of this famous cow, all females. They were sired by the famous Peter Pan bull, Washington 75th, whose strain has many, in fact, 85 cows of advanced registry for high production. In competition with two other men I succeeded in purchasing the ten females, and shipped them to Keremeos. This is the Willowmoor Robin Hood strain. They are, in my opinion, the nucleus of a great herd of Ayrshire cattle that should in a few years help to bring more prosperity to the Similkameen valley.

DR. WM. THOMSON.

Keremeos, B.C., June 7, 1922.

A reward of $100 has been offered by friends for information resulting in the finding of Mr. Land, who recently disappeared from Naramata.

RE SPECIAL TIMBER LICENCES

The attention of Timber Licence holders who are taking advantage of the provisions of the 1921 Amendment to the FOREST ACT, whereby arrears of licence fees accrued prior to 31st December, 1920, have been funded and made payable in annual instalments, is specially directed to the fact that any renewal fee which became due in 1921 is not included in the instalments above mentioned, and such 1921 and all subsequent renewal fees must be paid within one year after the date of expiry of the licence in order to maintain the right of the holder to obtain a renewal of the Licence. 13-3m

Every Year She Suffered

Read of Mrs. Ryder's Relief from Eczema—A BRIEF STORY

Still another letter for the liquid wash for eczema, from a sufferer who had chronic attacks—covering her face—winter after winter. Mrs. Jas. H. Ryder of Pleasant Point, St. John Co., N. B., tells of the many dollars spent with doctors, and other remedies, of her suffering and disfigurement, winter after winter, and of her relief with one bottle of D. D. D.

If you have not been reading the weekly letters from Canadian sufferers, come in and we will tell you of what D. D. D. has done right in your own neighborhood. We don't hesitate to guarantee that the first bottle will give you relief or your money back. *Stop that itch at once.* $1.00 a bottle. Try D. D. D. Soap, too.

FOODS LACK NOURISHMENT

A prominent medical authority states that the present-day method of preparing food destroys the nutritive elements, with the result that we do not take enough Vitamines into the system.

Vitamines are the nutritive, life-giving, body-building portions of foods that are necessary to produce good health and build firm flesh, but Science has overcome the deficiency by evolving Nyal Vitamine Tablets.

They contain Yeast, which is rich in Vitamines, in concentrated form, combined with Iron and other valuable tonics, and are recommended for under-development, lack of weight, imperfect digestion, and unsightly skin troubles, such as pimples, blotches, etc. Price $1.00 at

WAGING WAR ON CODLING MOTH

THIS IS REPORT SENT OUT FROM THE OFFICIAL OFFICE AT VERNON

(By W. T. Hunter, District Horticulturist.)

For the information of the fruit growers of the Okanagan valley, the following brief summary of the campaign against the Codling Moth may be of interest at this time. A very effective quarantine is being carried out on all the areas at present infested in this valley, and no effort is being spared on the part of those officials responsible to make the work effective. In all sections affected a considerable area has been described as under quarantine regulations surrounding those orchards actually infested. These areas serve as protective zones, and as the same regulations are enforced in these adjacent areas as are put into effect in the infested orchards, this protective band serves to confine the infestation to a given point.

In the Summerland district the Dominion Experimental Farm has been placed under quarantine and an adjacent quarantine area of approximately 100 acres has been established by District Inspector J. Tait on the north side of Trout creek. Over the entire area, all apple, pear and crab trees will be scraped and banded, sprayed three times with arsenate of lead, and the bands and fruit carefully inspected all through the season, in an endeavor to confine the pest within the present known area of infestation, the Experimental Farm orchards. Here it is expected that most effective eradication methods will be carried out under the able direction of the Superintendent, Mr. R. H. Helmer and his assistant, Mr. R. C. Palmer.

In the Kelowna city quarantine district, the protective area has this year been slightly extended and there are approximately 110 acres under supervision in this quarantine. In the K. L. O. bench at Kelowna there are 671 acres under quarantine, which acreage includes the protective belt as well as those orchards actually infested. This is the largest quarantine area under control and the acreage in this case has been occasioned by the broad protective belt which it was deemed advisable to establish in order that the infestation could be completely isolated and surrounded. All pome fruit trees in both the Kelowna city and the K. L. O. areas have been scraped and banded with burlap bands. These bands will be closely inspected for worms all through the season. Three arsenical sprays will be applied; the calyx and two later cover sprays. No orchard boxes will be used in handling the fruit from either of these areas.

Careful regulations covering the movement of fruit through the various packing houses of the district have been issued in order that those sections of the district which are clean will be protected. In the Kelowna district the quarantine operations are under the supervision of Mr. Ben Hoy and Mr. H. Edwards, and the growers of this district can rest assured that the work is being carried out most efficiently.

In Vernon there are two acres under supervision. 235 acres at Okanagan Landing and an area at Swan Lake of approximately 155 acres. The protective area in both these sections has this year been slightly extended, and in all, the usual banding and spraying operations will be carried out. The operations in this district are under the supervision of Assistant District Horticulturist H. H. Evans and H. S. French.

Progress can also be reported at this time on the superheating of refrigerator cars. With the co-operation of the B. C. Traffic and Credit Association, the matter has been favorably dealt with by the C. P. R. officials and the installation of the service is assured for this year's movement. H. H. Evans, of the Vernon office, will have charge of this work at Kamloops and Revelstoke. The following working regulations have been issued to all orchard owners where property is under quarantine for Codling Moth, and the heartiest co-operation is being secured from every grower in the carrying out of the regulations and suggestions.

Methods of Control in Codling Moth Areas

1. The Horticultural Officials of the B. C. Provincial Department of Agriculture in their capacity of Inspectors shall issue orders covering the Codling Moth infested areas, which orders shall establish a quarantine covering all orchards within the quarantine area, which shall be subject to the rules and conditions herewith outlined.

2. The times of application and methods to be employed in the areas to be sprayed and banded, shall be determined by the officer in charge.

3. The Department of Agriculture, will, where a machine is not available, supply the spray machine, gasoline, oil and repairs necessary to efficiently carry on the spraying operations, and will supply an engineer-nozzle man with each outfit, at a charge of seventy five (75c) per hour, this charge to be paid to the Department of Agriculture by the grower on whose property the machines are operating. To secure uniformity of arsenate of lead used, and for convenience in handling operations, the Department of Agriculture will, if desired, supply this material, but the cost of same shall be borne by the grower. Daily statements of materials and costs will be issued to the growers at the end of each day's spraying. Payments of accounts when rendered shall be made promptly to the officer in charge.

4. The orchard owner shall be required to use his own spraying machine when such a machine is available on his property; on which case the Department of Agriculture will supply free of charge to the grower, a nozzle man, and this official shall have complete charge of the spraying operations on that property. In the event of the spraying being done by the machines owned by the Deparment of Agriculture, the orchard owner shall supply one nozzle man, and in case the engineer may not be able to handle both engine and nozzle, then the owner shall suppy a second nozzle man. If the Department have to supply the extra help the same shall be charged to the grower. Each grower shall also supply or arrange for team and driver for his orchard and for handling outfit to next orchard free of charge, where such work is arranged for by the Department, expenses shall be chargeable to the grower.

5. The expenses entailed by banding trees and the subsequent inspection of bands, will be borne by the Department of Agriculture and the work performed by their employees.

Handling Fruit in Quarantine Infested Areas

6. Under this quarantine, no fruit or fruit packages shall be removed except by permit of the officer in charge.

7. All tree fruits must be inspected before shipment.

8. Inspectors must be notified when shipments are intended.

9. Loose or unpacked fruit shall not be moved out of the areas in which quarantine orders are in effect.

10. Fruit from these areas must not be shipped to any point in British Columbia.

11. Fruit must not be handled or passed through any packing houses where fruit from areas not quarantined is being handled.

12. Orchard boxes used in quarantine sections must not be removed from such sections, until passed by the inspector in charge and in case such containers require to be treated for infestations, such treatment as may be deemed necessary and the costs of such treatment, shall be borne by the grower.

13. No fruit shall be stored in cellars or warehouses or other buildings, unless passed by the inspector and permit given for this purpose.

14. Cull fruit must be at once made up into cider, apple sauce or destroyed by such efficient measures that all worms will be killed. The inspector in charge must be notified so that he may determine whether the method proposed is satisfactory for the purpose.

15. All windfalls shall be gathered up and destroyed by cooking or such other methods as will destroy all worms in the fruit to the satisfaction of the inspector in charge. Boxes used in the above shall pass inspection before removal from the property and all bags used as containers shall be subjected to disinfection by scalding or burned. This work shall be carried out conjointly by the Department of Agricultulre and the owner of the orchard. This work must be conducted under the supervision and to the satisfaction of the official in charge.

The above is applicable under Section 6 and its subsections 1 to 8 inclusive, of the Revised Rules and Reguations, adopted by the Board of Horticulture, and approved by order-in-council, March 6th, 1919.

Section 6 and subsection 8 of the Rules and Regulations states: "Where an infected or infested area is under treatment for the eradication of disease or pest, the inspector in charge may establish a zone surrounding and contiguous to the area actually infected or infested, in which shall be carried out such measures as the inspector shall prescribe to prevent the spread of the said disease or pest beyond the area already infected or infested."

ARSENATE OF LEAD SPRAY KILLS HONEY BEES

Last week a representative of the Star called upon Mr. August Pedy of Keremeos, possibly the only man in the valley who has gone into the honey business to any great extent. Many people have experimented with a hive or two and their success has been in proportion to their knowledge of bees and the amount of attention bestowed upon them.

Viewing the profusion of blossom in the orchards in the spring and the abundant and varied bloom that prevails throughout the summer, one would conclude that the fruit belts of the interior of B. C. would be ideal for the apiary business. There is, however, one fatal obstacle, which has killed the industry in the Wenatchee and other important fruit growing districts in Washington and will doubtless have the same effect here—the use of poisonous sprays such as arsenate of lead, while the bloom is still on the trees.

So far as we could learn, this spray has not been previously used in the orchards at Keremeos at this time of the year, and Mr. Pedy has met with signal success with his bees

This spring, however, several orchards were sprayed with arsenate of lead and the deadly effect which it had on his bees was pointed out to us by Mr. Pedy in the countless number of dead ones lying around the hives.

The danger of serious loss from this source could of course be diminished by care on the part of the orchardist in not spraying as long as there is any vestige of bloom on the trees. The risk, however, would always be there and would be sufficiently great to deter anyone from entering very extensively into the business. The honey produced in this district has always been of excellent quality and flavor and Mr. Pedy has had no difficulty in disposing of his product on the local market.

WHAT WAS DOING HERE TWENTY YEARS AGO

From the Similkameen Star of Friday, June 7, 1902

Mrs. Silverson has a remarkably fine display of flowers in C. Barber's window.

Mr. C. Stewart of 15-Mile Creek, came up Tuesday from that place, returning home on Thursday.

Born—On One Mile Creek on Saturday, May 24, the wife of Mr. Al Oelrich of a daughter.

Mr. Arthur Hickling, manager of the Vermilion Forks Mining & Development Company, is expected today.

Two visitors from the Boundary were in town this week, Mr. F. W. Walker, a Midway merchant, and Mr. E. L. Steves, of Eholt.

Assessment work has been finished on the Kenley claim on Copper Mountain belonging to Messrs. Barr Hall and E. Waterman. The work consists of a 15-foot open cut, all of which is in ore.

Murdoch McIntyre returned last Saturday from Aspen Grove, where he has been doing work on the Dred Not claim. Mr. McIntyre took out over 30 tons of fine ore running a shallow open cut about 40 feet long.

A rumor comes in via Penticton to the effect that the railway bills have passed in the local house. The Canadian Northern is said to be subsidized to the extent of $5,000 per mile, and the Coast-Kootenay $4,500.

Messrs. Silverthorne and Rogers have finished work on the Georgia at Aspen Grove, and are now going to Friday Creek to do some work on their claims in that camp.

Mr. W. C. McDougall, general manager of the Olalla Copper Mining & Smelting Company, was in town this week. Mr. McDougall states that his company is preparing to develop its Olalla properties on a large scale. Mr. Brewer, president of the company, is now on his way in to inspect the company's holdings.

Calgary, Alta.—Considerable progress has been made in connection with the scheme of shipping chilled beef to the United Kingdom, according to William Spurrell, who is a member of the United Farms' committee appointed to inquire into the matter. Prominent Alberta stockmen have formed an organization, and it is proposed to make the first shipments in the course of the next few weeks.

SYNOPSIS OF Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and must make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LAND.

Provision made for insurance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

LAND REGISTRY ACT
Section 160

Re Lot 11, Map 301, Similkameen Division, Yale District.

WHEREAS proof of loss of certificate of title No. 6536D issued to Albert Edward Mattice and covering the above land has been filed in this office.

NOTICE is hereby given that at the expiration of one month from the first publication hereof I shall issue a Provisional certificate of title unless in the meantime valid objection thereto be made to me in writing.

Dated at the Land Registry Office, Kamloops, B. C., this 11th day of May, 1922.

C. OUTHETT,
26-5 Deputy Registrar.

GENERAL MERCHANTS

KEREMEOS NOTES

The water being so high on the Hedley road the old road has had to be used all during the week.

* * * *

Misses Kay and Bill Gibson, of Penticton, were visitors to Keremeos on Wednesday.

* * * *

Mr. and Mrs. Bruce Rolls and family motored from Hedley on Saturday and spent a few hours in town.

* * * *

A number of Keremeosites motored out to various places on Sunday and spent the day picnicking.

* * * *

Mr. and Mrs. Wm. Hansel, who have spent the last year in Keremeos, left on Monday's train for Seattle, where they will reside for the future.

* * * *

Miss Girlie Callaghan, of Vancouver, is spending her vacation here with her mother and brothers.

* * * *

Mrs. Irwin, who has been visiting her son, A. E. Irmin, of Olalla, for the past year, returned to Kamloops this week with her daughter.

* * * *

Wilfred Madore motored to Princeton on Monday with passengers for the K. V. train. They were unable to get there by the G.N.R. on account of washouts.

* * * *

Mrs. Mark Pike and daughter, Lorraine, and Mr. and Mrs. O. H. Carle were guests on Sunday at the Daly ranch.

* * * *

The girls of Keremeos gave a shower at the home of Mr. and Mrs. A. E. East on Monday evening in honor of Miss Gladys Ring, who is to be married shortly.

* * * *

Mr. E. F. Corbet, manager of the Canadian Bank of Commerce, spent the week end visiting his brother in Vernon.

* * * *

Mr. Pearce, manager of the Bank of Montreal, motored to Vernon on Friday afternoon and visited with friends until Sunday evening.

* * * *

Mr. C. DePhyffer, of the Bank of Montreal, with his wife, motored to Penticton on Saturday and spent the holiday with Mrs. DePhyffer's mother.

* * * *

Keep the seventeenth day of June in mind, as the Keremeos Girls' Basketball team will play the Penticton team at the school grounds, Keremeos, at five p. m.

* * * *

Mr. and Mrs. G. Willis and son motored to Hedley on Saturday where Mr. Willis had the stitches removed from the wound on his face and also his knee, where he had a small tumor removed.

* * * *

On Wednesday night the music lovers of Keremeos were favored by hearing the great Hungarian violinist and composer, Laszlo Swartz, assisted by Mr. and Mrs. Munshaw of Penticton.

* * * *

A delightful musical evening was given last Friday at the home of Mr. and Mrs. L. S. Coleman. Music, cards and dancing was the feature of the evening. A delicious luncheon was served at twelve o'clock by the hostess, to about forty-five guests.

* * * *

Mr. H. Smart, ledger keeper of the Bank of Commerce, motored to Salmon Arm on Friday and spent the week-end with his parents. He returned here on Sunday evening and left again on Monday for Ladner, where he has been transferred. He will be very much missed here, as he has endeared himself to all who knew him. We all wish him the best of luck in his new place.

* * * *

Mr. Wm. Richter, of Osoyoos, the second son of the late Frank Richter, died very suddenly at the hospital in Penticton on Monday from appendicitis. The funeral was held on Wednesday afternoon from the Richter hall, Keremeos Centre, this being the first death in the family of five boys. William was well and favorably known all through the Boundary and the Similkameen country. He leaves to mourn, his widow and three children.

* * * *

On Sunday morning the Similkameen river was the highest it has been since the noted flood of 1894. The weather turning cooler it has now fallen about three feet, seemingly with all danger of high water passed. The anxiety of the people is now over as there were a good many, in great danger, especially across the river, the Pilkington brothers having quite a lot of damage done to their property. The Campbell bridge near their property was carried away. The Cedar creek bridge on the Penticton road was carried away on Saturday night which made it impossible for traffic until a crew of men worked a couple of days repairing it.

The annual meeting of the W. C. T. U. was held ot the home of Mrs. (Dr.) Thomson on Wednesday afternoon. A splendid report of the year's work was given by the secretary, Mrs D. J. Innis; also a report of the district convention which was held at Revelstoke. Mrs. G. G. Keeler took the chair for the election of officers for the coming year, which were as follows: Honorary president, Mrs. Currie; president, Mrs. W. G. Mattice (unanimously elected); first vice-president, Mrs. G. G. Keeler; second vice-president, Mrs. Morrant; recording and corresponding secretary, Mrs. D. J. Innis; treasurer, Mrs. Thomson; superintendent of mothers' circle, Mrs. Harris; supt. of flower mission, Mrs. O. H. Ring. Hostesses for the day were Mesdames Morrant and Thomson.

FOR SALE—Remainder of my laying hens, $11 doz. to clear. C. Cornish.

CAWSTON NOTES

Mr. and Mrs. H. W. Silvester spent Friday with friends in Penticton.

* * * *

Mrs. W. J. Hammill is confined to her bed with a badly inflamed foot.

* * * *

Buster Thomas, of Keremeos, spent the week end with Mrs. R. J. Armstrong.

* * * *

Sine Nielson, iltle daugater of Mr. and Mrs. N. Nielson, suffered from a severe fainting spell on Saturday.

* * * *

The Cawston Board of Trade held their regular meeting in the Community hall Tuesday evening.

* * * *

Mr. Kinch, of Winnipeg, is now occupying the Geo. Cole residence. Mr. Kinch expects to build on his own lots soon.

* * * *

Cawston experienced the highest water in thirty years on Sunday. Several roads and lots were covered with water, but no damage is reported.

* * * *

Mr. and Mrs. W. L. Lockhart and daughter, Wilma, Miss M. Newton, Silas Newton and N. Sinclair spent Saturday up Keremeos creek on a fishing trip.

* * * *

The regular meeting of the Cawston Women's Institute was held in the Community hall on Thursday, June 1st. About thirty members of ofe Keremeos Institute were present as guests. After the regular business Mrs. Prentice gave Current Events for the month, followed by graceful folk dances, given by Ethel Hammill, Jennie Hammill, Agnes Lang, Alma Sheridan, Margreta Rooney and Elsie Wainwright, under the direction of W. L. Lockhart. Piano duet by Mrs. R. B. Sheridan and Mrs. W. L. Lockhart, and a vocal selection by Mrs. Lockhart completed the program. Each number was well given, and much credit is duel those having the program in charge. Refreshments were served, Mrs. W. D. Lang and Mrs. M. Chamberlin acting as hostesses. Mrs. P. Madden and Mrs. Geo. Wainwright will attend the convention in Vernon as delegates from the Cawston Institute.

ADDITIONAL OLALLA NUGGETS

(Continued from page one.)

in movement at this time of year. Ans as we have had no rains for weeks there are no rain pits or even damp holes anywhere within many miles. But the skeeters are here all right, and the screen door industry is quite lively.

* * * *

Keremeos valley (some parts of it) is an ideal place for holding picnics these hot summer days, and our neighbors of Keremeos are not slow to take advantage of its nearness to their populous burgh and the ease with which it can be reached. They usually hold several such outings during the summer. Last Sunday for instance, several cars passed through, each loaded to capacity with Keremeos citizens, young people of course being in the majority. This was the inauguration of the picnic season and it certainly was pleasant if not delightful to drink the ice-cold water of Olalla or Cedar creeks or the West Fork, and to isten to the different tones of old Keremeos creek itself as its tumbling waters dash themselves against the rocky walls of the canyon or beat themselves into white foam as if in protest against some obstructing log jam. That they enjoyed themselves goes without saying, because such cheerful faces as were noticed on the homeward journey could only mean that the enjoyment had come up to expectations. Come again, friends, and come often.

* * * *

The deepest sympathy of every resident of this valley will be felt for Mr. and Mrs. Thomas Melville in their very sad and sudden bereavement. It can be imagined how terrible it was to the parents in its awful suddenness. Their youngest boy, Freddie, about two years and four months old, had been playing in front of the house, where he played every day, and was not missed for some time. Then when they began to search for him the thought of his having gone to the creek did not at first occur to them. But when the hope of his being in one of the outbuildings or in the orchard began to die out there remained but one dread solution of the tragedy—the creek, a rushing, roaring torrent that a powerful man could hardly stand against. After two hours of anxious search the little body was found washed up against a log jam just below the Liddicoat ranch, lifeless of course. The funeral took place on Saturday after an inquest had been held by the coroner at Keremeos. On behalf of Olalla I extend the condolence of our village to the bereaved parents.

SEND IT IN

If you have a bit of news,
Send it in;
Or a joke that will amuse,
Send it in;
Or a story that is true,
An incident that's new,
We want to hear from you—
Send it in;
If it's only worth the while,
Never mind about the style,
We want to hear from you—
Send it in.
