HOPE-PRINCETON ROUTE CONFIRMED

THOROUGH INVESTIGATION WILL BE MADE BEFORE TENDERS ARE CALLED FOR

At the luncheon tendered the Hon. W. H. Sutherland and party by the Princeton board of trade in the dining room of the Princeton hotel on Friday last, the minister re-affirmed the fact that the link in the provincial highway connecting the coast with the interior would be constructed between Hope and Princeton. He referred to the advantages which would accrue to both the people at the coast and the interior by the construction of such a road. His deparment, however, would examine very carefully and minutely into the different choices of routes with the object of arriving at the best attainable. Fullest possible estimates would also be secured before application was made to the federal government and before tenders were asked for. This with a view of securing the greatest possible value for the money expended.

G. G. Lyall, president of the Princeton board of trade, acted as chairman and extended a hearty welcome to the visitors. Included in Dr. Sutherland's party were: Mr. Kergin, member for Atlin in the local legislature; Pat Phillips, provincial engineer; W. K. Gwyer, district engineer; Major Barker, Pat Powers and T. L. Thacker of Hope. Penticton honored the occasion by the presence of Reeve Chambers, representing the municipality; J. F. Park, president of the Penticton board of trade; L. A. Rathvon, Kenneth McKenzie and C. C. Hansen, representing the Penticton Liberal association. Alex. Morrison, of Keremeos, and H. R. Van Wagenen, of the Canada Copper Corporation, were also present.

Reeve Chambers and J. F. Park expressed pleasure at being present, complimented the Princeton board of trade on the splendid struggle they had made for the highway and pledged the whole-hearted support of Penticton and the lower Okanagan.

Mr. Van Wagenen gave a brief resume of mining matters, explaining what a salutatory effect the building of such a road would have on the development of the mineral resources of the Similkameen, of which Princeton is the hub. Apart from the money which tourists would leave in the province, in which the coast and interior would benefit on a fifty-fifty basis, in passing through they would gain a first-hand knowledge of the country and its resources and such could not fail to attract settlers and capital.

Pat Powers assured the gathering of the great interest which residents of Hope took in the highway project. The joining of the two towns by a highway would bring them into close touch both socially and politically. Hope had only been able to play a minor part, he stated, in the struggle to secure the highway but they were there with all the pressure they could bring to bear.

Mr. P. Phillips, although engineer for the provincial public works department, found himself a stranger in these parts. He could only find two familiar faces in the gathering—those of A. E. Howse and Alex. Morrison. He emphasized the remarks of the minister with reference to the necessity for the closest study of the various routes and the securing of all possible data.

Mr. A. E. Howse, though he has proved a tower of strength to the cause of the Hope-Princeton route since he came here, modestly enough threw all the credit to those who were here before him and had struggled so many years for the attainment of this project. He drew attention to the natural resources in timber, minerals and lands, which the Hope-Princeton route would open up and challenged anyone to show where the Fraser Canyon route could add one cent to the revenue of the province. He was assured that in Dr. Sutherland we have now a minister of public works, who is a man of his convictions, and that following his trip over the proposed route, which cannot fail to convince him as to its feasibility, we may confidently look for definite action.

Alex. Morrison, than whom the Hope-Princeton route has had no more ardent supporter, was accorded a rousing welcome. He was pleased to be present and for the second time welcome a minister of the government to Princeton on such a mission but he sincerely hoped that it would not be necessary to do it a third time. Mr. Morrison refuted his own statement of being long-winded, by reaching his point in a very few words. He related the story of the nigger, who after a hard run for his train arrived at the station out of brreath just in time to miss it. Told that he did not run fast enough, he replied: "No Boss, dat ain't it. I run fast enough but I didn't start soon enough." He had no doubt the government, once started, would travel fast enough, but he hoped they wouldn't be too long in starting.

While in Princeton Dr. Sutherland was interviewed by a deputation of ranchers from Five Mile with reference to some much needed road work in that district. About two-thirty the party were driven to the end of the automobile road, near where, at "Belgie's" cabin, they camped for the night and from which an early start was made Saturday morning.

At the time of writing the only information that we have been able to gain of the trip over is from Claude Snowden, who saw Mike Gaynor in Hope Wednesday evening. Mike, who acted as chef for the party, stated that the weather was fine till they reached 23-Mile, where they were detained by rain for a day, arriving in Hope on Wednesday.

WORK ON HIGHWAY

Rossland-Cascade Link Nearing Completion — Hope-Princeton Link Next

If the scenic beauty of the remainder of the link now being completed of the Trans-Provincial Highway from a point six miles from Rossland to Cascade, is maintained, auto tourists will traverse one of the most picturesque thoroughfares to be found in the province, if not in the Dominion.

The first six miles completed out of Rossland some time ago, has been put in excellent shape and is all that could be desired. Connecting with this is the remainder of the highway to Sheep Creek and this portion is not in shape yet for traffic.

Considerable surfacing of the new portion from the first six miles on to Cascade will have to be done when the work is completed before autos can navigate the road with any degree of smoothness, but it is believed this will be done immediately spring arrives.

From Rossland to the end of the first six mile stretch the road is as smooth as a floor with the exception of a few short stretches which were recently surfaced. It is now known among autoists as "the all high gear route," the grade being so little.

At present about 200 men are engaged in completing the work by the contractors, Messrs. Tierney & Co. and Deschamps, and Mr. Geo. Tierney announces it is planned to finish the work by the 15th of the coming month.

The rather steep grade to the new road from the outskirts of the city will soon be eliminated through the work now under way near the ranch of John Srdonovich, the right of way having been arranged by the city, which will make access to the highway quite easy.

Rossland should benefit greatly from tourist traffic over the new road next year, and when the Hope-Princeton link is completed autoists can make the trip to the coast. Then thousands of tourists from the south and east and west will come our way. —Rossland Miner.

PERCENTAGE OF APPLES SOLD IS DISAPPOINTING

Vancouver, Oct. 25.—Only 40 per cent. of the apples shipped out of the Okanagan for sale during apple week were sold, and some of these sales were disappointing to the growers, as they constituted only 30 per cent. No. 1's and 70 per cent. No. 3's, with very few No. 2's going out. The growers expected to sell 15 cars of McIntosh Reds, in the proportion of 75 per cent. No. 1's and 25 per cent. No. 3's.

During the campaign these apples sold for $2.40 per box, but as about 60 per cent. were left on the hands of the dealers the price has dropped 35c a box since.

Growers from the Okanagan who have been making an investigation of the system of selling apples in Vancouver have found that the small fruit stores operated by foreigners are doing much to retard the sale of all fruits in this city.

One of the facts located by the growers is that a box of McIntosh Reds or Jonathans can be had by the small fruit store for from $1.65 to $2, or at the rate of about two cents per apple. These stores are now marketing the same apples for 50c a dozen.

Grocery stores are complaining that they have endeavored to assist the situation whereby the grower was liable to suffer for lack of markets for his apples, by selling at a reasonable profit, but the small fruit stores failed to do their part.

The same applies to pears, which run from 100 to 120 per box, and can be bought by the small fruit man for $2 to $2.50 per box. These pears are then sold for five vents each in the majority of the stores.

NEW WESTMINSTER PAPER FOR FRUIT PACKING

Figures in connection with the New Westminster Paper Mills, Limited, whose plant in the Royal City is now under construction, have been received by the B. C. Products Bureau of the Vancouver Board of Trade.

The mill will turn out 15 tons of paper daily, much of which will be suitable for absorption in the Okanagan fruit industry for fruit wrappes.

About 50 workers will be employed, the pay roll being in the vicinity of $6,000 a month. The company is capitalized at $250,000.

All raw materials used in the manufacturing of paper goods will be bought in British Columbia and an effort will be made to sell as much of the output as possible within the province. The manager states that the mill will be ready to operate by the end of November and has asserted that the prices will be lower than those of eastern firms.

Among the kinds of paper turned out will be tissue paper, fruit wrapping paper, paper bags, crepe paper, M. G. kraft, colored kraft, drug wrapping, second sheets, white and colored.

Growers Must Control

FRUIT PRICES ON THE PRAIRIES DEMORALIZED BY LACK OF CONTROL

Fruit Market Bulletin No. 10, Calgary, October 21.—Weather conditions have been ideal during the week. Business has been slow. Potatoes selling from $16.50 to $20.00 per ton. Some very fine shipments from Vauxhall, Alta., command the top price and are competitors with B. C. stock. Butter trade has a healthy tone at present. Alberta made cheese is finding a ready market. Fresh eggs are very scarce and prices high. The apple market is featureless.

Calgary Wholesale Prices

Apples, McIntosh, No. 1 $2.00,	$2.25
Crates, $1.20 to	1.40
Greenings No. 1	2.00
Wagner and Jonathan, crates	1.40
Crab apples, Hyslop, per box	1.00
Grapes, Tokay, case, $4.00 to	4.25
Ontario, per basket	.65
Tomatoes, local, H.H., per lb.	.20
Green, per case	.75
Ripe, 65c to	.90
Sweet ptoatoes, per lb.	.06
Celery, per lb.	.04
Cabbage, Danish Ballhead	.02½
Citron, pumpkin, squash	.02
Potatoes, B.C., per lb.	.01½
Lettuce, onions, radish, doz.	.20
Onions, per ton, $37.00 to	40.00
Local carrots, beets, turnips	.02
Green corn, dozen	.40
B. C. Pears, D'Anjou No. 1	3.75
Duchess	2.75
Howell	2.75
Washington, D-Anjou, C Grade	3.00
Wash. D'Anjou No. 2	2.75
Cauliflower, local, doz.	1.20
Cauliflower, per doz.	1.00
Vegetable Marrow, per lb.	.02

Discrimination

As we understand the new storage in transit privilege for B. C. onions and apples is as follows: Cars of onions and apples may be placed in cold storage in Calgary, Lethbridge, Regina, Moose Jaw and Winnipeg providing they are routed after coming out of cold storage to points east of Port Arthur, U. S. or Britain. Such stored produce will only pay the balance of the through rate plus 6 1-2c per cwt. for terminal service.

We think that this storage in transit opportunity should apply to points on the prairies, so that when weather conditions are favorable outside points without storage could be supplied from nearby cities, when it would be too risky to ship from a B. C. point.

If we read the storage in transit privilege accorded potato growers at points of origin in Manitoba, Saskatchewan and Alberta rightly, they have secured the additional privilege B. C. growers need: viz., to any destination without restriction plus four cents for terminal services.

Why has B. C. been denied this privilege on potatoes, and why does it not apply to onions and apples where the bulk of our market is?

Growers Must Control

The present impossible condition of fruit marketing will do much to convince fruit growers that they must control the marketing of their produce.

Reports from every prairie point indicate that prices quoted everywhere were in most cases not sufficient to pay the expenses of marketing let alone paying for the fruit. Lethbridge report No. 1 Macks, Wagners, Jonathans retailing at $1.75 per box. Similar prices are being quoted in Edmonton, crates being offered for $1.00 and $1.50. At these prices red ink will be the growers' returns. It is the remedy not the blame that is needed, and we know that the remedy is in the hands of the growers.

ANIMALS THAT MAY BE TRAPPED

The following letter, received by Mr. Alf. Sorenson, secretary of the local game protective association, from F. R. Butler, secretary of the Game Conservation Board, is self-explanatory and will prove of interest to readers of the Star, who may wish to do a little trapping during the winter:

Dear Sir:

I beg to acknowledge receipt of your letter of the 16th inst., requesting information as to whether or not it is lawful to trap lynx.

For your information, I beg to quote hereunder the definition of fur-bearing animals under the "Game Act":

"Any "fur-bearing animals" which expression when used in this Act, shall mean and include any fox, beaver, marten, fisher, mink, muskrat, otter, raccoon, or any weasel or ermine."

You will note from the above that no mention is made of lynx, coyote, wolf, wolverine or cougar, and if any person desires to trap these animals he must be the holder of a special fire-arms licence for this purpose, and as these animals are not protected under the "Game Act" they can be trapped at any time of the year.

Yours truly,
F. R. BUTLER,
Secretary.

Motorists driving at night on the road between Summerland and Penticton have been seriously annoyed by a bull running at large in a herd said to belong to Indians. Apparently the lights of the cars enrage the animal. On one occasion he turned on W. Johnson's car and punctured one of the mudguards with his horns On the same night he put another car off the road and more recently a third car was attacked.

Poppy Day, Nov. 11

WILL WEAR POPPIES IN MEMORY OF FALLEN—WILL CREATE "MEMORIAL" FUND

Poppy Day, organized through the medium of the Great War Veterans, throughout Canada, last year as an appropriate memorial to their comrades resting beneath the poppies on the fields of Flanders, has been established as an annual institution by the Great War Veterans' Association, making November 11, Armistice Day, perpetually as Poppy Day from coast to coast. Planned last year to aid the war victims of France, Poppy Day exceeded expectations. The public liberally purchased the poppies made in France, and a good sum was raised to send back to sufferers in the districts of the former battlefields.

The sentiment attached to Poppy Day this year is changed, but no less worthy of making it as a fitting annual memorial of the Great War and those who fell. All the poppies on sale this year are being made at home. It was the intention to have the entire supply, which will represent some millions, made entirely by disabled soldiers, for whose benefit the fund is largely raised, but the time allowed did not permit of this being fully carried out for this year and orders have had to be filled otherwise.

While the returned men in Princeton have not maintained their organization in the G. W. V. A., they are none the less anxious to join in the general manifestation of honor to the memory of fallen comrades and have placed an order for 600 poppies, the number which it is figured can be disposed of in this district, including Coalmont.

These will be sold at 25 cents each and one-half the proceeds will be turned in to the G.W.V.A. fund for disabled soldiers. With the remaining half of the proceeds it is proposed to create the nucleus of a fund which it is hoped will, in time, permit of erecting in Princeton a monument to the fallen heroes who enlisted from here.

It is also proposed that instead of holding a smoker on Armistice day, as was done last year, to hold a dance in the Oddfellows' hall, the entire proceeds of which will go toward the "Memorial" fund. As the 11th falls on Saturday this year the dance will be held on Friday evening, the tenth. The co-operation of all returned men, both here and in Coalmont, is desired in order to make the occasion as successful as possible.

MUST BE A RETURNED MAN AND LIBERAL

Langley Prairie, Oct. 23.—Everybody in Langley Prairie was a Liberal on Saturday night. Alec Paterson, M. L. A., who had attended a meeting here to consider applications for the position of local government liquor vendor, said that the only qualifications needed for the job were that applicants should be Liberal supporters and returned soldiers. The result was a rush to join the local Liberal association from the supporters of the different applicants.

Liberals were there who never attended a Liberal meeting before, and may never attend another. They paid their dollar and became full-fledged Liberals right away for one night, and practically smothered the regular membership.

There were eight applicants for the job, mostly strangers in the municipality.

A lengthy discussion took place as to the claims of the association appointing a man without knowing his qualifications, Reeve Poppy pointing out that the association merely recommended its man.

B. Devine moved to bunch all the names of the applicants over to Victoria and have the Liquor Control Board tackle them on their merits, instead of the association selecting a man it did not know, and pointing him with one hand, saying, "Here is our man; we don't know him," and pointing a gun in the other hand, saying, "Take him, he is our choice."

The applicants were then called upon to address the meeting, after which Mr. Paterson moved to have Jack Donnelly's name included in the list, but this application, it appeared, had already been forwarded to Victoria. Balloting then commenced, and resulted in R. Irving obtaining 22 votes, or five above his nearest opponent.

The meeting was made necessary through the serious illness of Harry England, the association's earlier choice.

GRANBY COMPANY TAKES OVER SUNSHINE GROUP

Stewart.—A deal which has been pending for some time was closed Saturday, when the Granby Consolidated Mining, Smelter and Power Company bonded the Sunshine group of three claims, owned by Godfrey Anderson and Fred Young, both of Stewart. These claims are situated on the north fork of Glacier creek, about five miles by a good trail from the railway siding at the old Portland Canal mine, and about nine miles from Stewart.

This group was optioned to A. G. Hill, of Denver, Colorado, in July last. The option having expired on October 1, the property was taken over by the Granby people, and active development work has already commenced, and will be prosecuted throughout the winter.

ARTHUR CLAUGHTON ON TRIAL

Witnesses for Prosecution Heard on the Stand at Vernon Assizes This Morning

Penticton, Oct. 24.—The case of Arthur Claughton, of Osoyoos, charged with perjury, was opened this morning, in the assize court, Vernon, before His Honor Mr. Justice Swanson. Evidence for the prosecution was still being submitted when the court adjourned for luncheon. The prosecution was in the hands of W. C. Kelley, Summerland, while J. W. DeB. Farris, K.C., Vancouver, and M. M. Colquhoun, Penticton, defended.

The witnesses called this morning were Magistrate T. A. Pope, Penticton; Provincial Liquor Control Board Constables Denny and McCormick, William Montgomery, storekeeper, Osoyoos; Mrs. Richter, Osoyoos, Joseph Goldsmith, cook in a construction camp, Osoyoos, and Miss Lowery, Vancouver, who was employed at the establishment of Claughton at Osoyoos about the time of the alleged offence.

The evidence of most of the witnesses was practically the same as given at the preliminary hearing. Montgomery stated that on the evening of July 30, the day Claughton claimed to be in Penticton, he saw the accused and a man named Wagner sitting outside Claughton's place at Osoyoos, about 7 o'clock in the evening. He passed them, he said while he was driving Mrs. Richter's cow to the barn to milk it, and asked them if they wanted to buy a "beef." One of them replied that he had better fatten it up first. After milking the cow he again saw the two men outside Claughton's place.

Miss Lowery was not very decided in her evidence, saying she was not sure whether or not she saw Arthur Claughton in Osoyoos on the day in question. She left Claughton's employ and went to the coast about that time.

COPPER MARKET WEAKENS SLIGHTLY—CONSUMERS ARE OPERATING AT CAPACITY

Copper is distinctly weaker according to the current market report of the Engineering and Mining Journal Press of New York. Sales have been very unsatisfactory during the last few days, though consumers of the metal are, in general, working to capacity, and it is felt that the present lull can therefore be no more than a temporary one. As most producers are well sold up, there has been no great pressure of metal on the market, but a slight tendency to a price recession can be observed. Most of the large producers, if not all, are holding at 14c delivered, and in the last week have sold possibly 25 per cent. of their normal business. They seem willing to book business somefurther ahead than usual. There are persistent rumors to the effect that large consumers have had plenty of copper offered them at 13 7-8c delivered, even to Connecticut valley points, but we have been unable to find a producer who will acknowledge to have partaken in this business except to points near New York where the freight rate is around 15c per 100 pounds. Several orders of this nature have been placed, however, which we are compelled to reflect in our quotations, this being the first quotational break in the 13.75c refinery figure since Septecber 1. Export demand has fallen away, as well as the domestic, though some satisfactory orders have been received in the last two or three days, German buying of a substantial quantity giving added encouragement.

LIQUOR AND POLITICS

Victoria, Oct. 23.—The prominent part taken at the recent annual meeting of the City Liberal Association by members of the Provincial Government service, and especially by a large section of the staff of the Liquor Control Board, led to considerable comment, even by staunch party members.

It was alleged that the government employees rallied with force and with more than ordinary enthusiasm to the support of one of the factions at the annual gathering.

Since that contest there have been heartburnings among the rival factions. As a result the Liquor Control Board has promulgated an order demanding that hereafter employees of the board shall take no part in political gatherings or discussions.

NO NEW DEVELOPMENTS

Oroville, Ocober 20.—There have been no new developments in the placer mining situation during the past week. Many have visited the scene of the late gold find, and a number of parties are prospecting the ground. Mr. Coyle, who picked out the coarse gold that created the excitement, in conjunction with a partner, is putting in sluices preparatory to washing the gravel at the place where the gold was recovered. He is also carefully going over the ground in an effort to locate the ledge from which the gold must have originated. He may have struck a pocket at the time he made his discovery. That can only be determined by further and more extensive prospecting.

Owing to the serious illness of his youngest child Conductor Charley Stirling was unable to make his usual run on the G. N. to Princeton on Monday. Both Mrs. Stirling and the child are in the hospital now but both are fairly on the way to recovery.

PRINCETON TO PEACHLAND ROAD

PEACHLAND BOARD OF TRADE SETS MOVEMENT ON FOOT TO HAVE SHORT GAP COMPLETED

Penticton, Oct. 24.—A movement has been set on foot by the Peachland board of trade to secure the opening of a road from Peachland to Princeton, via Thirsk, and Osprey Lake, on the K. V. R. This was done by means of a resolution passed at the last meeting of the board of trade asking the government to complete the gap at present existing near Osprey Lake. The balance it is claimed has already been cleared and graded. A copy of the resolution was forwarded to the Kelowna board of trade, which it is understood is sympathetic towards the proposition.

S. T. Elliot, the road foreman for that district has been over the proposed road and, it is understood, is strongly in favor of going ahead with the work.

There is at present 17 miles of road constructed from Peachland to the irrigation dam at the head of the south fork of Deep Creek. From there to Thirsk in a straight line is approximately 5 3-4 miles of territory intersected with logging roads running in various directions, some of which could be utilized to provide a road with reasonably good grades. There is a gap of from six to seven miles from Thirsk to Osprey Lake, from which point the Five Mile Creek road leads to Princeton. Peachland to Princeton via this route is 60 miles. The distance from Peachland to Princeton via Penticton and Keremeos is 101 miles.

The road from Peachland to the south fork irrigation dam is known as the Glen Robinson road and was constructed about 25 years ago, thus being one of the oldest roads in the southern Okanagan. The road has, however, been but little used except for reaching the irrigation dams on Deep Creek and by pre-emptors and hunters. The first ten or eleven miles of the road has a good bed. Its chief disadvantage is narrowness, although there is a considerable amount of second gear work required by a car in making some of the grades. The upper portion of the road is somewhat rough. The elevation at the 17 miles post is 2600 feet above the level of the Okanagan Lake, which itself is about 1100 feet above sea level.

The country south west of the 17 mile post is reported to be fairly open, but the logging roads are too rough in their present condition to be used by autos.

It is understood that one consideration favoring the opening of this road now is that it would provide work which will be needed by settlers and others during the winter.

BRIDESVILLE HOTEL MAN SHOT

Grand Forks, October 20.—William Clayton Patterson, of Grand Forks, was found dead in the kitchen of the hotel at Bridesville, which he has been running recently, at about 6.30 this morning, with a bullet wound in his chin.

Up to the time of going to press the cause of death remains a mystery, though general opinion leads to the theory that he has been the victim of a bootlegger.

First information of the death was given this morning by W. Blythe, a rancher of Bridesville. As he passed each morning he has been in the habit of rapping on the hotel door to wake Mr. Patterson. When he got no response this morning he went inside and upstairs to Mr. Patterson's room. Not finding him there he looked about the house and finally found deceased lying on the floor in the kitchen with life extinct.

Greenwood and Grand Forks police officers were notified, and at 10 a. m. Constable G. F. Killam, Dr. Kingston (coroner), W. H. Kirkpatrick and Fred Kingsley left by motor for the scene. Arrangements were made for an inquest which was commenced at Bridesville at 3 p. m.

There Just a Few Months

Mr. Patterson went to Bridesville and took over the hotel there in the early summer. He did considerable business while tourists were passing through, but recently his cook had left and he was occupying the building practically himself.

Deceased was well known in Grand Forks, having resided here for many years and engaged in contracting for logs. He was about 40 yeas of age, and leaves a wife and five small children.

Illicit Liquor Route

Bridesville is a small village close to the international boundary line, about 60 miles west of Grand Forks. It is on the through highway between Greenwood and other Boundary sections of the Canadian borderland and the Oroville-Wenatchee route to Washington and Oregon territory, through which there is said to be a great deal of illicit liquor traffic.

Harry Royce is spending the week with his mother here. Harry says that the Nickel Plate mine will operate all winter and that the wages have been increased fifty cents per shift.—Greenwood Ledge.

GOLF

Bogey.—"Do you think it sinful to play golf on Sunday?"

Stymie.—"No, I don't; but if a man only plays golf once a week his game is apt to be considered a crime."

ORIENTALS AND COMMERCE

Orientals are gradually creeping into the commercial life of the cities of B. C., and the Occidentals in trade are just beginning to realize to what extent penetration has been made into the various lines of retail business. Records supplied by the Trades Licence Inspector, Vancouver, divulge the fact that in that city alone no fewer than 1658 Chinese and Japanese have been licensed to carry on merchandising business, and this does not include the Orientals who work for wages in the stores. Commenting on the situation the Vancouver World says editorially:

Within the past year a general branching out of Chinese and Japanese stores has taken place all over the city. There is hardly a business block, either in the downtown section or in the outer districts, where the local tradesman is not suffering from the effects of Asiatic competition.

Nor has the worst been reached, by a long way. Six months ago the World pointed out the menace which would come within a few years from the admission of last year's army of 1445 qualified Chinese merchants through the port of Vancouver. Not many of the 1921 class are yet in business. They came armed with the necessary capital to secure entry, but they are still busy learning English, studying Canadian business methods and preparing with patience for the time when they will be able to take their line in the ranks of the commercial contenders for Vancouver's retail trade.

Many of the Chinese retailers are doing business under assumed names. Possibly out of admiration for one of the leaders of the Vancouver bar one Chinese tailor has taken the name of "Charles Wilson." His explanation is that this is his real name "in English." Another, a grocer, has paid a delicate compliment to the Scotch by taking the name "MacLean." Others are content to take mere company names which sound like the names of Anglo-Saxon concerns, such as "The Royal" and the "North American," etc. But it would surely make the Bard of Avon turn in his grave to see who runs The Stratford Gents' Tailoring Club, or the Stratford gentlemen who patonize it.

Today the Victoria Chinese are using the strike, picketing and intimidation to prevent the principle of separate schools for Asiatics being introduced there. They and their mouthpieces are demanding that the Asiatic school populace shall be educated on terms of intimacy with the children of white people. Undoubtedly the equipping of their children with the fullest measure of intimacy with their white competitors in the business affairs of life is the governing factor in the refusal of the Chinese to attend the schools set apart for themselves.

The time has come for some enlightened self-sacrifice on the part of buyers as well as for the utmost efficiency on the part of tradesmen to meet the situation which is probably destined to reach much more aggravated proportions before relief comes.

DECLINE TO TAKE ACTION

According to the report which our Keremeos correspodent has sent in, the water users, under the Keremeos Land Company's irrigation system, at a well attended meeting held on Monday evening, decided against applying to the government for organization as an "improvement" district. This recommendation, made by a self-constituted committee after going thoroughly into the matter, was endorsed by the general meeting of the water users.

That the Keremeos fruit ranchers should reject a proposition that has been so generally accepted in similar districts throughout the Okanagan, is not altogether to be wondered. The conditions are different. Unlike the Okanagan growers, they have not experienced what a shortage of water really means. They have been served by a system, which has proved one hundred per cent. efficient at all times, even during the exceptionally dry season just ended. This, at a schedule of water rates that have been too attractive to be abandoned without an effort.

ROD AND GUN

Sportsmen and lovers of the outdoors ought to find a lot of solid pleasure in their perusal of the November issue of Rod and Gun in Canada. The usual collection of stories, articles and features is not only extensive and generous, as usual, but it is of particularly high quality as well. Raymond Thompson is the author of a thrilling tale, entitled, "The Scourge of God," while "Madawaska" is a charmingly illustrated article that is full of interest. The departments are all instructive and well-balanced. A feature is a complete table of the trapping laws of the provinces of the Dominion, while the Trap Line Department, edited by M. U. Bates, offers a wealth of valuable information which the trapper will not want to miss.

Rod and Gun in Canada is published monthly at Woodstock, Ontario, by W. J. Taylor, Limited.

Water Users' Meeting

(By Harry Tidy.)

Keremeos, Oct. 24, (Special to the Star.)—There is an old saying that the only way to get some men to take any interest in anything outside of their own homes is to get after them through their pocket book and it looked like it last night when the Board of Trade called a meeting of the water users of the valley. This meeting was held in the Victory hall and was attended by practically every fruit grower in the valley. Those that were not there were represented by proxy. If the Board of Trade could only get the growers to take as much interest in the growing of good varieties of fruit and in the marketing of the same, in five years time they would be only too willing to ercet a memorial to the present officers of the Board of Trade.

The meeting was called to order by the president of the Board of Trade, E. F. Corbett, with the secretary, H. C. N. Etches, at the books. After explaining the reasons for calling the meeting, the president called for nominations for chairman and secretary. Mr. E. C. Clarke was voted to the chair and Mr. Etches asked to take down the minutes of the meeting.

Letters were then read by the secretary from the following water districts: Glenmore, Black Mountain and Naramata. These letters gave information as to how to form water municipalities. Correspondence about the same matter was read from the Water Rights Department at Victoria.

The chairman then read the report and recommendations of the self constituted committee on the water situation, which was as follows:

Certain water users, on receiving the notice from the Secretary of the Keremeos Land Co. to the effect that the company had gone into liquidation, got together to discuss the situation and find out the position of the Water Users under this system.

This Self-Constituted Committee, held several meetings. These meetings being held separately from the Board of Trade meetings, where the situation was also being discussed, but with a knowledge of what the Board had accomplished as the majority were members of that body.

Having gone thoroughly into the standing of the Water Users and also into the Water Act as it applies to Irrigation Companies, they decided to make a full report to this meeting, with recommendations as follows:

It has been suggested that the Water Uusers under this system, apply to the goverment for formation of a Water Improvement District under the Act, with the end in view of taking over all the works pertaining to the system.

In thoroughly looking into this course, we have found a very complicated situation, owing to the number of agreements that have been entered by the Keremeos Land Company with outside holdings such as, the B. C. Fruit Lands Co. (Shatford Estate), the Daly Estate, The Richter Estate, Mr. Lee, The Indian Department, re Alex. Cease and others, also a special agreement with the Soldier Settlement Board.

It has been found in some of the above cases the sum of $40.00 per acre was paid, for the right of taking water from the ditch. This amount being paid with the understanding that it covered the per acre cost of construction of the ditch, and gave the right in perpetuity, subject to the annual toll for maintenance and upkeep of the ditch.

It must be thoroughly understood by the Water Users that this cost per acre for constuction of the ditch was added by the Land Company to the original cost or purchase price of their acreage, and the purchase of land from the Company by the Water Users carries this same right. The sale of irrigated land in this province invariably includes this right as has been shown by decisions handed down by the courts.

However, owing to the fact that a large portion of the original lands, held by the Company, not having been sold, they therefore have not been reimbursed for the construction of the ditch, by this per acre cost. Neither, for this same reason, we are given to understand, have they been able to collect sufficient tolls to cover the cost of maintenance and upkeep. The Water Users cannot, however,

(Continued on page six.)

$2,400,000 IN DIVIDENDS FROM A TWO-YEAR-OLD MINE

The rapidity with which money can be earned by even a small gold mine is shown in the record of the Premier Gold Mining Co., whose mine is near the Internatonal Boundary between Alaska and British Columbia, in the Portland Canal district. The company has just declared its fourth dividend, amounting to $750,000, for distribution in October. The total distribution to date aggregates $2,400,000, or a return to shareholders of almost half their investments in nine months. Active operations at the mine were commenced only about two years ago, according to the Engineering and Mining Journal-Press of New York. Since the beginning of the year the Premier Mining company has been shipping each month about 3,000 tons of high-grade ore, running about $80 a ton; 3,000 tons of medium grade, running about $35 a ton; and it has been milling between 3,000 and 4,000 tons of lower grade ore in its concentrating and cyanide plant. It is estimated that the mine has been turning out ore to the value of $400,000 each month, the high grade and concentrate going to A. S. & R. smelter, at Tacoma, and the medium to the Anyox plant, of the Granby Consolidated Co.

LAND REGISTRY ACT
(Section 227.)

In the Matter of Application No. 32250 F; and in the matter of Lots 1, 2, 3 and 4, Blk. 7, Map 1003.

Take Notice that the above application has been made to register Coalmont Hotel Company, Limited, as owner in fee of the above lands, and for the issue to the said Coalmont Hotel Company, Limited, of a Certificate of Indefeasible Title thereto, and that in support of such application there has been produced Deed dated 25th August, 1922, from Columbia Coal and Coke Company, Limited, to Coalmont Hotel Company, Limited.

And Further Take Notice that registration will be effected in pursuance of the above application and a Certificate of Indefeasible Title to the said lands, issued to the said Coalmont Hotel Company, Limited, after a lapse of 30 days from the service upon you of this notice (which may be effected by advertisement as hereunder directed), unless you shall take and prosecute the proper proceedings to establish your claim as to an unregistered agreement of sale, if any, to the said lands, or to prevent such proposed action on my part.

Dated at the Land Registry Office, Kamloops, B. C., this 18th day of October, A. D. 1922.

E. S. STOKES,
District Registrar of Titles.
(E.W.C.)

To Messrs. Marcotte and Ryan, and to John Ryan, Esq., Coalmont, B. C.

I direct service of this notice for 4 weeks in a local paper circulating within the district wherein the lands are situated.

E. S. STOKES,
49-4 Registrar (E.W.C.)

TIMBER SALE X4324

Sealed tenders will be received by the Minister of Lands at Victoria not later than noon on the 2nd day of November, 1922, for the purchase of Licence X4324, to cut 407,900 feet of Yellow Pine, situate on an area 2½ South West of Princeton, Yale Land District.

Two (2) years will be allowed for removal of timber.

Further particulars of the Chief Forester, Victoria, B. C., or Distict Forester, Vernon, B. C. 48-2

NOTICE

Take notice that the Western Power Company of Canada, Limited, of 425 Carrall Street, Vancouver, B.C., have filed in the office of the Controller of Water Rights, Victoria, B. C., petitions for the approval of its undertaking for the diversion, use and storage of water for power purposes on the Stave Rivers, in respect of which applications were filed August 25th, 1922, in the Water Recorder's office in New Westminster, B. C.

The petitions will be heard in the office of the Board of Investigation, Victoria, B. C., at a date to be fixed by the Controller.

Dated at Vancouver, B. C., this 11th day of October, A. D. 1922.

WESTERN POWER COMPANY OF
47-4 CANADA, LIMITED.

"Face Disfigured From Eczema"

Writes the Nurse who finally tried D.D.D.

"The disease had eaten her eyebrows away. Her nose and lips had become disfigured. Since the use of D. D. D. her eyebrows are growing. Her nose and face have assumed their natural expression."

Cases can be sent you from your own vicinity. Write for testimonals, or secure a bottle of D. D. D. today. *Why suffer itching torment another moment?* If you don't get relief on the first bottle we will refund without hesitation. $1.00 a bottle. Try D. D. D. Soap, too.

SYNOPSIS OF Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and must make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LAND.

Provision made for insurance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

TAX SALE

Princeton Assessment District

I HEREBY GIVE NOTICE that, on **Tuesday, the 7th day of November, 1922,** at the hour of 2 o'clock in the afternoon, at the Provincial Police Court, Penticton, B. C., I shall offer for sale at Public Auction the Crown-granted mineral claims hereinafter set out, of the persons in said list hereinafter set out, for the delinquent taxes unpaid by the said persons on the 30th day of June, 1922, and for costs and expenses, including the cost of advertising said sale, if the total amount due is not sooner paid.

The Collector will be pleased to receive any information respecting the following list, where the owner is or was a member of the Allied Forces, and is entitled to the benefits of Section 29 of the "Taxation Act Amendment Act, 1918."

Princeton Coal & Land Co., Ld.

ERNEST WATERMAN — General Manager — PRINCETON, B. C.

WHAT WAS DOING HERE TWENTY YEARS AGO

From the Similkameen Star of October 25th, 1902

W. Wilson was a visitor from Hedley City on Tuesday.

Jas. Jameson came in from Penticton Wednesday with a load of freight for the Hotel Tulameen, consisting of ten barrels of the famous Cascade beer.

Mr. Robt. Stevenson returned from a trip to Hedley City Thursday. He reports that the owners of the Nickel Plate mine are grading for a tramway between the mine and the mill site. The tram line will be about five miles long.

Messrs. Snowden Bros. finished their contract last week on the Vermilion Forks Mining & Development Co.'s tunnel and left for Olga, Wash., Saturday afternoon, going out over the Hope trail. They intend returning in a few months.

Mr. Jno. Bromley, who owns an excellent ranch twelve miles from here down the Similkameen river, reports having raised thirty tons of potatoes this season. The ranchers of this section will reap a rich reward when the building of the Coast-Kootenay begins. From present indications this long desired day is rapdly approaching.

Messrs. Ford and Todd, two of the prospectors reported to have struck it rich on Bear creek, left last week for the coast. They took with them 150 pounds of ore for the purpose of having further assays made.

Mr. Jas. Sutherland and Mr. G. R. Philip, members of A. E. Howse's staff, drove in from Nicola Lake on Monday last. Mr. Sutherland was formerly with the Horsefly Trading Co., in the new Cariboo placer fields. He will remain in Princeton. Mr. Philip returned to Nicola on Thursday.

Assays made by the local assayer from samples of Bear creek ore brought in by a number of prospectos, have proved rather disappointing, the tests failing to show the high gold values claimed to have been obtained by the discoverers.

Mr. J. A. Schubert, of Penticton, was a visitor to town Tuesday. Mr. Schubert has recently opened a branch store at Hedley City to cater to the wants of the people in the leading gold camp of the Similkameen. He reports business as being very fair at Penticton.

Mr. I. Laughead, foreman of the Boston and British Columbia Hydraulic Co., at Granite Creek, was a visitor to town Thursday.

Chas. Sterling arrived Wednesday from Spence's Bridge with a load of general freight.

F. W. Groves, P. L. S., is engaged in surveying the Copper Cliff and Copper Bluff claims on Copper Mountain, for the Ashnola Smelter Co., Ltd.

WINTER FEED FOR DAIRY COWS

(Experimental Farms Note.)

How to keep up the winter flow is a problem confronting a great many dairymen, more so in sections where the temperature is severe than in the milder climate of British Columbia. Invariably the price of milk goes up in the fall and down in the spring and just as untiringly the supply drops in in the fall and increases in the spring. Tse dairyman given good cows, the proper proportion to freshen in the fall, and conditions suitable for good general management in the matter of sanitation and thorough and regular milkers, it is then up to the feeder to keep the milk supply up to the maximum.

The dairy cow is a manufacturing machine and requires suitable raw material from which to manufacture milk. She can make excellent use of much rough feed if supplied in conjunction with concentrates in the proper amounts. Among the most popular or widely used winter roughages are hay, straw, ensilage and roots and for dairy cows legume hays are much more valuable than grass hays. For milk production good alfalfa hay has no equal, but, if this is unobtainable, good clover or mixed hay is satisfactory. Damaged hay can be made more palatable by cutting and mixing with ensilage or pulped roots. The same holds true regarding straw. To provide the necessary succulence in a ration fo dairy cows roots or silage, or both, are invaluable. Not only are these feeds succulent but they are bulky and comparatively cheap. Generally it is good business to give a milking cow all these feeds she will consume.

This does not hold true regarding concentrates. A popular practice is to feed the cows one pound of grain for every 3 to 4 pounds of milk they produce. This is a good rule to follow. What the grain mixture should be will depend upon prices of the different feeds at that time, bran, oats, barley, oil meal, shorts, soybean meal, brewers' grains and cotton seed meal are the commonly used concentrates. Bran, 4 parts; ground oats, 2 parts; ground barley, 2 parts; oil cake meal, 1 part; makes an excellent grain mixture for a commercial dairy herd. It should be kept in mind that a freshly calved cow abundantly and carefully fed will usually produce the cheapest milk. At this time a pound of grain is equivalent to several pounds given later after the cow has decreased in her milk flow.

Besides the roughage and concentrates heavy producing cows should have plenty of clean water and salt, and many successful feeders at the present time provide bone meal, lime, charcoal and other minerals.—W. H. Hicks, superintendent, Experimental Farm, Agassiz, B. C.

Merritt has inaugurated a night school with a large number of scholars enrolled.

FIVE MILE NOTES

(From our own correspondent.)

Captain Ramsay is busy making addition to his dwelling house and the work already accomplished does him credit.

* * * *

Rich. Dillard continues work on his big irrigation project which he hopes to have completed by spring.

* * * *

Mr. and Mrs. J. A. Morrison have moved to the ranch after an absence of almost a year, during which time they have resided near the Cement plant at One Mile.

* * * *

Mr. Thos. Morrison, of Kelowna, was a recent visitor to his brother, Mr. J. A. Morrison.

* * * *

Mrs. D. J. Garrison and Mr. Jay Dillard left for La Touche, Alaska, on Friday last. Their departure is much regretted by their friends and neighbors who join in wishing them all that they can wish for themselves and all that is best for them.

* * * *

Plans for the forthcoming big farmer's supper to be held in the Oddfellows' hall on Saturday, November 4th, are maturing rapidly, and an excellent ladies' committee headed by Mrs. Gordon Sellers as convener, has been appointed to take charge of the catering. There will be a delightful musical programme towards which Mr. H. Knighton and Mr. A. Butler have kindly promised to contribute. The object and work of the United Farmers of British Columbia will be briefly dealt with by the Rev. E. E. Hardwick and other speakers. It is up to every farmer in the district to be present, to bring his family with him and thus contribute towards making the event an unqualified success.

* * * *

The presence of the Hon. Dr. Sutherland, minister of public works, in Princeton on Friday last was taken full advantage of by the committee appointed by the Princeton Local, United Farmers of British Columbia, to place before him matters of importance as affecting the position of the farmers, particularly at Jura and the Five Mile. The deputation, consisting of Mr. Geo. Aldous (president), Rev. E. E. Hardwick (vice-president), and Messrs. C. K. Cunard, W. W. Triplett and T. J. Guinan, was introduced to the minister by Mr. A. E. Howse. Dr.Sutherland took considerable pains regarding the questions involved, and the meeting, from the point of view of the deputation at all events, was extremely harmonious and evidently successful. As a result orders were issued by the minister for the immediate construction of a short spur to connect the main wagon road with Jura station, and for provision to be made in the Department's estimates to be presented to the legislature during the forthcoming session so that the necessary alteration of the Baker Hill grade may be carried out as soon as weather conditions permit in the spring. The thanks of the farmers are due for the kindly interest taken in their behalf by Mr. A. E. Howse and whose presentation of their case, had without doubt, great influence with the minister. Mr. Howse, you are hereby warmly thanked on behalf of the deputation.

The banquet tendered the minister and other visitors was an interesting event, and it is not too much to say that Dr. Sutherland made a deep and favorable impression upon his audience irrespective of their political affiliation. The various speeches delivered sounded notes of lofty thought and deep patriotic intent. There was no wishy-washy flim-flam indulged in. Particularly fine constructive orations were delivered by Mr. A. E. Howse and Mr. R. H. Van Wagenen whilst the Rev. E. E. Hadwick very effectively, although unofficially, voiced the average farmer's sentiments.

LEASE BUILDING FOR MANUFACTURING PLANT

Frechette Snap Hook Company To Start Business Next Month in Steel Works Building

The Frechette Two-in-One Snap Hook Co., Ltd., have leased the steel works building, next the Boundary Iron Works, and will take possession on November 1st, according to President A. A. Frechette, who was in town from Trail the first of the week.

Only a nominal number of men will be engaged at first and these will be employed in fitting the building up generally for the work to be done and it will probably be the end of the month before equipment will be installed. Work of actually manufacturing the snaps and hooks is expected to commence early in the new year.

Mr. Frechette expects to start in business in a small way and grow. Wholesale firms to whom he has shown his inventions are of the opinion that both the hooks and snaps will find a ready market. E. Humphreys, M. P. for West Kootenay, has gone into the matter quite fully and feels that the invention is worthy of parliament's attention in requiring its use in certain operations as a safety device. Mr. Humphreys is a thorough and practical mechanic himself and his attitude with regard to the hooks is regarded of real value.—Grand Forks Gazette.

"Dell Hart," says the Oroville Gazette, "has a castor bean tree on exhibition at his real estate office, which was grown by C. E. Wiltfong. The bean has every appearance of being in a flourishing condition, offering the possibility of leading up to a castor oil plant, which, if established, would, in conjunction with the inexhaustible Epsom salts plant, make this the chief supply point for cathartics in the United States." Why not call it the "movie" city of the United States?

LAND FOR SALE AT KEREMEOS

THE Keremeos Land Company, having gone into liquidation it is the intention of the Liquidator to dispose of the unsold land owned by the Company at extraordinary reductions from prices previously obtained.

Unexcelled for Fruit

It is well known that the Keremeos District excels above all others in producing certain desirable varieties of fruit. Guided by the experience of the growers in the valley who have successfully brought the industry through its pioneer stages, the way is made easy for those who wish to follow their example.

Ask for Information

A visit to the Company's office in Keremeos is requested, where lists, maps and prices will be shown. Good schools, churches, excellent transportation and abundant water supply.

KEREMEOS LAND COMPANY, Limited

(IN LIQUIDATION)

How To Play Basketball

By ONE WHO KNOWS

III. FORWARDS

Basket Shooting

No other phase of the game demands the same technique or rigidity of form as basket shooting. Without the proper knowledge or understanding of this fact the player is likely to develop personal peculiarities which are frequently quite detrimental. The proper form in shooting can be readily likened to the swing of a golf club or of a baseball bat. The greatest and most satisfactory results can not be obtained unless rigidity of form is strictly adhered to, although occasionally a player may use some individual characteristics to advantage. A player who possesses a natural eye for shooting but poor form should be carefully coached.

Basket shooting during practice of a game demands concentration which established a proper co-operation between the mind and the muscles governing the shooting. The objective is to get the muscles under such control that the desired action comes automatically. I have watched players waste hours in basket shooting practice simply because their actions were the result of physical actions only, not the combination of mind and muscle. Deliberate shooting is the only shooting worth while.

Science of Shooting

Players should be impressed immediately with the relative size of the diameter of the ball and that of the basket. The hoop is eighteen inches in diameter and the ball nine or ten inches, thus leaving a clearance of four inches for a ball dropping directly to the center from above.

It is a self-evident fact, therefore, that the more direct the drop of the ball from above the more chance for the throw to be successful. Good shooting would therefore seem to demand a highly looped ball, the downward motion starting at some distance above the basket in order that the drop be direct and straight. A ball thrown in a straight line or at a sharp angle to the basket has little chance of passing through the hoop because of the elliptical shape of the basket.

Loop Shot Best

Though there are many various forms of shooting the "overhand loop shot" is universally recognized as the most scientific. It should be used for long, medium and short distance shots except when right under the basket. It affords players a comparatively safe start as the ball is raised and pushed upward and forward, leaving the hands somewhere above the face. This shot is difficult to block and practically impossible to intercept.

A player in the act of shooting should never look down at the ball properly adjusted; nor should he look up to see the ball leave his hands. The knowledge of these things must be gained by practice through the sense of touch. Loss of time in adjusting the ball may mean a blocked shot and the eyes must be employed in seeking the location of the basket.

Ease and confidence in shooting will come to the player if he but concentrates on the rim of the basket nearest him and loop the ball so that on its downward course it will just clear the rim and fall through the opening. On hitting the rim it will rebound to the backboard and fall again into the basket. If the shot is entirely for the backboard the ball must hit the exact spot at right angles. The backboard should never be used intentionally with the loop shot, however. Its use for the glancing shot will be described in the following article.

There is another shot often used in basketball, especially by the beginner. It is the underhand shot, executed by grasping the ball with the fingers and thumbs and swinging the arms from between bent knees. This is probably the most natural and is certainly the most easily acquired shot but it is practically useless in a game as it is very easily blocked.

TEACHERS MEET IN CONVENTION AT VERNON

(Contributed by A. S. Towell.)

One of the most successful conventions in the history of the Okanagan Valley Teachers' association was held in Vernon on Thursday, Friday and Saturday, October 19th, 20th and 21st, at the courthouse.

On Thursday afternoon teachers from all parts of the valley assembled to hear the presidential address by Mr. L. C. S. Kennedy of the Armstrong High school. In a well reasoned and inspiring speech Mr. Kennedy pointed out the need that all classes of teachers—public school, high school, manual training, domestic science and agricultural—should not lose sight, under the different problems of their special work, of the common aim and purpose that should animate all educators of children. He pointed out how much misunderstanding and mistaken criticism would be eliminated if all teachers could find a common viewpoint from which to examine all problems.

Later in the afternoon the teachers withdrew to hold a series of sectional meetings. The Rural School section, under the leadership of Inspectors T. R. Hall of Kelowna and A. E. Miller of Revelstoke, met to consider the special difficulties arising in connection with the management of small country schools. Miss E. Payne, of Vernon, addressed the meeting on the subject of First Aid, and Miss K. Scanlan, Victoria Model School, spoke on "Timetables to Economise Time." On Friday afternoon this section witnessed a demonstration by Mr. H. B. MacLean of the Vancouver Normal School of the MacLean Method of Muscular Movement Writing.

The Junior Grade section was also addressed by Mr. MacLean and by Miss L. A. Burpee, Vernon, and Mrs. Dimock, Armstrong.

The Intermediate Grade teachers, with Mr. A. S. Matheson, Penticton, as chairman, considered sources of information for the teacher, and methods and devices for teaching history and geography. The Senior grade, under Mr. R. K. Bell, Armstrong, heard Miss Scanlon speak on the teaching of composition. The following afternoon these two sections met in joint session to hear Mr. MacLean on writing and Miss Scanlan on arithmetic.

The High School section met with Mr. Kennedy, the president. The chief speaker, Dr. G. G. Sedgewick of the University of British Columbia, in discussing the lengthening of the High School course from three to four years, said that this province was falling lamentably behind Great Britain and the United States in educational progress, and he blamed those who wished to cut down our expenditure for education while those countries, in the face of almost intolerable taxation, were greatly increasing their outlay.

The Manual Training and Domestic Science teachers held round table conferences to discuss their pedagogical problems and the place of their subjects in the school curriculum.

An enjoyable social evening and dance on Friday was followed the next morning by a lecture from Inspector Miller on the modern scientific system of standardized mental tests. The much-criticized examination, as the term is commonly used in schools, seems destined to be supplanted at no distant date by more accurate methods of testing the products of the teachers' work.

A public meeting was held on Friday evening with Mayor Costerton in the chair. Dr. Sedgewick spoke to a capacity audience on the problems of the Provincial University, dealing mainly with criticisms that have been directed at that institution. In answer to those who find fault with its location, where, he asked, should it be placed except in the centre of population where most of its students must come from? Speaking of its value to the poorer people of the province, he said that only about forty of the twelve hundred students were studying for the learned professions, and further that possibly seventy-five per cent. of their male students were in some way or other paying their own way through the University. He pointed out the growing need of the province for a steady supply of trained technical men and asked where they were to be sad except from that institution.

Mr. H. Charlesworth, of the British Columbia Teachers' Federation, was the other principal speaker. He referred to the inexpert and indiscriminate citicism that was being levelled at our public school system. We are criticised, he said, for having too many subjects on our curriculum and for not having enough; for spending too much money on our schools and for spending too little; for paying too much attention to the material side of education and not enough to the cultural, and vice versa. He admitted that when fault was found so generally, a serious lack was indicated, but emphasized that it was for experts to diagnose the case. A detailed educational survey of this province by trained and impartial outside surveyors should, he asserted, immediately be held, and with their support in our hands we might proceed intelligently to reorganize along the lines of the best modern thought.

Mr. J. Harwood, of Vernon, the president of the Federation of B.C. School Trustees, was received with an enthusiasm which gave evidence of his popularity. In a brief speech he reminded his hearers of the simple but often forgotten fact that the welfare of the child is the sole object of all the work of the school. He asked that the work and the problems of the teacher be regarded sympathetically and understandingly.

At the final business meeting on Saturday, October 21, the executive for the ensuing year was elected as follows: President, Mr. Matheson, Penticton; 1st vice-president, Mr. MacDonald, Summerland; 2nd vice-president, Miss Thomas, Penticton; corresponding secretary, Miss Pitblado, Penticton; recording secretary, Miss Stott, Penticton; treasurer, Mr. Smith, Penticton.

Resolutions of sympathy were passed with Mr. L. J. Miller, of Penticton, who is ill; and with Mr. D. J. Welch, whose son has recently died. Further resolutions called upon the B. C. Teachers' Federation to take steps for the establishment of a sick benefit fund, and for urging upon the Education Department the immediate necessity of an educational survey of the province. With a vote of thanks to the retiring executive the convention came to an end.

The Cranbrook Herald says: "A movement is on foot to organize a company to promote a newspaper for the new town of McNab, which promises to develop into a large city, with a population around 4000. Should the deal materialize the new paper will be known as the McNab Telegram. A modern plant will be installed, including a late model linotype, carrying three magazines and a complete display of new type. The intention is to start building operations as soon as the lots are cast next December.

He asked her if she rolled her own,
She said she never tried;
Just then a mouse ran swiftly by,
And then he knew she lied.

Princeton Paragraphs

You'll miss it; if you miss the Calico Ball on Hallowe'en.

Mrs. J. Tyler, of Vancouver, is visiting her cousin, Mrs. P. Swanson.

Twenty years ago Sunday the Big Tepee hotel at Fairview was burned. Fairview was then a hustling mining camp of considerable importance.

Dr. Duncan C. Mackenzie, specialist, eye, ear, nose and throat, will be at Princeton Hotel, Princeton, for the practice of his profession on Wednesday and Thursday, Nov. 8 and 9. 49-1

Mrs. Pickthall, of Allenby, was the guest of Mr. and Mrs. G. S. Walters over the week-end on her way back from Trail. Mrs. Pickthall intends to move to Trail next week.—Greenwood Ledge.

R. A. Begg, buyer for Swifts Canadian, shipped seven carloads of cattle from here on Monday. Five carloads were from the Daly herd and two were supplied by Dell Young.

Tommy Daly has recovered from his recent illness. He was in Princeton the first of the week superintending the shipment of five cars of cattle. He was accompanied on his trip by his mother, Mrs. E. M. Daly.

Colonel M. V. Allen, of the Forestry department, of Vernon, was in Princeton the first of the week on one of his periodical calls on the local fire warden.

J. J. Malone was in town the first of the week, on his return from a trip to Nelson. After a short stay in town he left for Tulameen and Slate Creek.

A double wedding is scheduled to take place at the home of Robert Schulli, section foreman, on Armistice Day, November 11th.

Charley Richter and Steve Mangott, of Keremeos, spent a few days in town during the week returning home on Wednesday.

H. A. Turner, for many years road supervisor for the Similkameen, and Jonathan Rogers, a well known citizen of Vancouver and owner of the "Rogers" block on Granville, were in Princeton the first of the week on their return from an inspection of some mineral claims which they own at Hedley.

While it took Dr. Sutherland and party five days to make the trip over to Hope, the return trip by the escort, who will cross the Dewdney Trail summit, should not take more than three days. As they left Hope Thursday morning they should reach Princeton tomorrow.

Rev. J. A. Cleland, formerly Anglican minister at Penticton and well known throughout this valley, is now residing at Oregon City, Ore. In a letter to the Star he thus refers to Princeton: "I always liked to stop off for a few days at Princeton, as there seemed to be more of the spirit of the old days in B. C. surviving there than in most other places."

Mrs. Donald McCallum of Keremeos was in town on Sunday on her way to Tacoma. She had with her the two little children of her niece, Mrs. Murray, which she has been taking care of while Mr. and Mrs. Murray have been on a trip to the Old Country. Mr. McCallum and son Don accompanied Mrs. McCallum as far as here by car and spent a day in town the guests of Mr. A. E. Howse.

M. L. Grimmett, solicitor, of Merritt, and official administrator for Yale, was in Princeton on Tuesday. He was accompanied by Mr. Anderson, road supervisor. They came over by way of One Mile and returned via Coalmont. Mr. Grimmett informs the Star that Princeton, formerly under Fairview, is now included in the district which he covers as official administrator.

It pays to advertise, but you must have the goods. Last Saturday quite a number of ladies of Princeton and the surrounding district visited the store of the A. E. Howse Co., expecting, from an announcement made in the columns of the Star and circulars that had been distributed, to find an exceptionally attractive display of ladies' wear. They were more or less disappointed owing to the fact that the representative of the clothing company, who was to make the exhibit, did not arrive in town till the late afternoon train—too late to display his goods to any advantage.

Even if you don't dance, buy a ticket for the Calico Ball on Hallowe'en. The hospital needs the money.

Robt. Rennie, of New Westminster, arrived in Princeton yesterday on a visit to his uncle Mr. Alex. Bell.

The Okanagan Power Company has disposed of its power plant on the lower Similkameen to the Washington Power Company.

Free soap and slashing reductions. Read our ad. on page 2. A. L. White.

Mr. and Mrs. Van Wagenen were host and hostess to a number of Princeton friends at a Hallowe'en party on Monday evening.

Dr. Pirie, chiropractor, will be at Hotel Princeton from 3 to 9 p. m., November 2nd. Chiropractic and Electrical treatments. 1-p

A certificate of incorporation has been issued the Fairview Mining Company, Limited. The capital of the company is $50,000 and the names of Frederick Burbidge and H. A. Guess are mentioned in connection.

Dr. D. C. Mackenizie, specialist, will be pleased to have persons requiring examination of the eyes, or attention for any diseased condition of the eye, ear, nose or throat, consult him at Princeton Hotel on Wednesday and Thursday, November 8 and 9. 49-1

Mr. Claude Snowden returned yesterday from Hope, whee he met Mr. E. O. Weston, of Victoria, and Mr. W. E. Trafford, of London. They are here to examine some placer claims up the river controlled by Mr. Snowden.

E. Piecash (Bones), who has been spending the summer at the Nickel Plate mine, was in town during the week. The sight of "Bones" reminds us of hockey, and that suggests the question: Are we to have a rink this winter?

A great deal of interest is being taken in mining claims in the vicinity of Hedley and the hills are full of engineers. It is rumored that the Trail Consolidated is negotiating to take over the Apex property and that its engineers have recently been taking samples from that mine.—Penticton Herald.

Says the Peachland correspondent to the Penticton Herald: Road Superintendent S. T. Elliott, of Kelowna, was in town last week and with Foreman S. H. Murdin and a couple of others made a trip out over the Glen Road and the proposed extension to connect with the road to Princeton, thus making quite a considerable saving in mileage for tourists going into that portion of the province from here north.

Jimmie Jack, an Indian belonging to the Penticton reservation, who was committed for trial last week, on a charge of abducting a girl of 14 years of age, also a resident of the reservation, came up for speedy trial on Monday, before His Honor Mr. Justice J. R. Brown, in the county court. The hearing of evidence occupied the whole afternoon and on Tuesday the judge listened to the arguments of H. H. Boyle, prosecuting and C. S. Lyons, defending, after which he passed sentence of six months hard labor.—Penticton Herald.

The government exchequer was enriched to the extent of $100 on Friday morning last by the forfeiture of bonds to that amount in the local police court. The bonds were given to insure the appearance in court of one, Daniel Holmes, who had been arrested in a raid made the night before by enforcement officers Ferris and Bell on the Granite Creek hotel, of which Holmes has been proprietor since Mike Mirkovitch left. The charge was for having liquor on the premises. Holmes decided to forfeit the bond rather than appear.

Owing to an increase in numbers of the party that accompanied Dr. Sutherland over the Hope-Princeton route last week, it was found that there were not sufficient horses for all and T. L. Thacker, of Hope, who had intended making the trip was unable to do so. Mr. Thacker, who is a great student of natural phenomena, was somewhat compensated by a visit to the home of Mr. Kennedy, on Kennedy Mountain, where he spent a few hours examining some very interesting specimens of fossils. He was driven out to Mr. Kennedy's by Mr. Jas. Gellatly and Mr. A. S. Black.

MRS. MATTICE PASSES AWAY

Keremeos, Oct. 24, (Special to the Star by Harry Tidy.)—The Grim Reaper, Death, called one of Keremeos' most respected citizens, in the death of Agnes Sophia, wife of John L. Mattice, on Monday morning at thirty minutes past one. Although not unexpected the death comes as quite a blow to the family, especially the husband, whose partner she has been for the last sixty-two and three-quarter years, having been married on Sheik's Island, Ontario, on the 10th day of January, 1860. The late Mrs. Mattice was born on Sheik's Island, Ontario, on December 15, 1838, and moved to Keremeos, with her husband in 1908. In religion, Mrs. Mattice was a Methodist and although being practically an invalid for the last five years, has taken a great interest in the welfare of the church, especially the Women's Missionary Society, so much so that the Society, some years ago, honored her by making her a life member. Mrs. Mattice had ten children, five of whom are still living. They are: Mrs. Leadbeater, of Pelly, Sask.; Mrs. S. Smith, of Portage La Prairie; Mrs. Kerr, of Keremeos, and W. G. and A. W., of Keremeos.

The funeral took place from the Methodist church on Tuesday afternoon. The Rev. Currie assisted by the Rev. Morant, officiating at the service. The following old timers of the valley acted as pallbearers: Messrs. J. J. Armstrong, J. W. Armstrong, O. H. Ring, E. M. Crooker, G. G. Keeler and A. H. Hood. The floral offerings were most beautiful and were sent by Mrs. Kerr, Arthur and Husband an anchor; Will and Carria; Mr. and Mrs. J. W. Armstong, membes of the Methodist church, crosses; Women's Missionary Society, Laura Leonard, Mrs. Wooliams, Mr. and Mrs. R. Armstrong, Mrs. Masters, wreathes; Mr. and Mrs. Harry Tidy and family, heart; grandchildren, Mrs. and Miss Cameron, Mr. and Mrs. O. H. Ring, sprays.

After the meeting of the water users in the Victory hall on Monday evening a resolution was passed expressing sympathy with Mr. Mattice in his bereavement.

NEW TOWN OF McNAB

Infomation received this week from Elko, says the Grand Forks Gazette, is not of a kind that would attract much of a movement in that direction. It appears that the reported plans for the development there of a big pulp-making plant has brought in a large number of people and that only a nominal number have been able to find any work. It is stated that the proposed plant will be located some six miles south of Elko, but in the meantime lots in a proposed townsite are being placed on the market without being mapped and are being picked up like hot cakes.

RETAIL MERCHANTS MEET

George S. Hougham, provincial secretary of the Retail Merchants' Association of British Columbia, in addressing a well attended meeting of the merchants of Princeton in A. E. Howse's store on Wednesday evening, dealt with three problems which are of vital interest to the retail trade. The first of these was the personal property tax. He briefly described the opposition of the association in the past toward this unfair method of taxation as applied to the retail trade and assured the meeting that the battle would be renewed at the approaching session of the legislature.

Strong opposition will also be made against the proposed "receipt" tax. The objection is not so much against the amount of taxation, although it is considered severe, as against the multiplicity of taxes, requiring as they do so much extra work on the part of the merchant. In Mr. Hougham's opinion it would be more satisfactory to make the one tax—the sales tax—cover it all.

Another matter of vital importance to the retailer is the encroachment of Orientals into the business life of the country. The association is endeavoring to educate the public so that when the Treaty of Commerce and Navigation comes up for reconsideration in 1923 some much desired amendments respecting Oriental immigration may be secured.

Accompanying Mr. Hougham was A. B. Derifield, manager of the fire insurance department of the association. This department, which is conducted on a "mutual" basis, provides for a rebate of money paid on insurance premiums over and above the amount required to pay losses and operating expenses. It is Dominion wide in its scope and last year the rebate which they were able to allow amounted to 35% of the premiums paid in. Mr. Derifield is employed by the association to give its members advice and assistance in regard to insurance matters, which in many instances proves of great value.

Their visit to Princeton completes a tour of the entire province. From here they motor to Seattle via Oroville and Blewitt's Pass. According to Mr. Hougham the association now boasts of having a branch of the retail merchants' association in every district of any size in British Columbia and in consequence of this will be in a position to wield a greater influence in securing more favorable legislation.

HOG GRADING COMMENCES ON OCTOBER 30, 1922

The regulations under which the official grading of hogs will be undertaken have been approved by Council as submitted after final agreement by all interests represented by the Joint Swine committee. The swine graders appointed through the Civil Service Commission following the grading examinations have reported for duty to the Dominion Live Stock Branch.

The Honorable W. R. Motherwell, Dominion Minister of Agriculture, announces that the hog grading regulations will be made effective on October 30th, 1922. In the meantime, the new hog grading staff is being given a thorough course of instruction at the Toronto Stockyards, so that the official grading regulations as established will be uniformly applied at all stockyards and abattoirs in Canada.

Standard grading equipment is being adopted and is already installed at several stockyards where preliminary grading tests are being conducted and the necessary adjustments to expedite the grading and movement of hogs being made. Experimental work in ear-tagging for co-operative shipments providing for the identification of individual farmer's hogs is in its final stage and the Live Stock Commissioner will announce an approved identification mark simultaneous with the inauguration of grading.

COMING EVENTS

Annual Bazaar under auspices of Presbyterian Ladies' Aid on Friday, Nov. 24. Further announcement later. 49-1

* * * *

Shooting match; turkeys and geese, at Keremeos, November 4th (Guy Fawkes' anniversary).

KEREMEOS NOTES

(From our own correspondent.)

Mrs. R. L. Cawston, of Cawston, was a visitor in town last week visiting with friends.

* * * *

Mr. Millne arrived here on Saturday from Nelson, B. C., as teller for the Canadian Bank of Commerce.

* * * *

The season for pheasants opened on Saturday and it was hardly safe to step outside your own yard. There were such a number out shooting.

* * * *

A party of sight-seers climbed to the columns on Sunday, and were very much taken with the beautiful sight which nature has worked among the rocks.

* * * *

Mr. Bennet, of the Hudson's Bay Co., of Vancouver, was in town on Monday.

* * * *

Born—To Mr. and Mrs. Van Haircom, last week at the Vancouver General hospital, a daughter; both doing well.

* * * *

Dr. Butler, of Princeton, who has been practising here for the past two weeks, left on Monday's tain for Hedley, where he will practice for a few days.

* * * *

Mrs. H. B. Armstrong has been confined to the house for some days with a very severe cold.

* * * *

The Harvest Thanksgiving festival services will be held in the St. John's church on Sunday, October 29.

* * * *

The Misses Gibson, of Penticton, accompanied by some of their friends, motored over and spent Sunday with their sister Miss "Bill" Gibson, who is packing here for the Keremeos Packing Co.

* * * *

Word has been received wrom Mrs. A. F. Kirby and daughter, who are at Mayo Bros.' and both are getting along nicely. Mrs. Kirby has undergone an operation and Miss Midred is still taking treatment.

* * * *

Mr. Wilson, who has been here relieving at the Canadian Bank of Commerce as teller, left on Wednesday's train for Vancouver. He will be very much missed as he made many frends during his stay here, both in church and social circles.

* * * *

The executive of the Community Club met on Tuesday evening a the home of Mr. Bligh to make final arrangements for the winter programme. The meetings will be held this year in the Vicotry hall. Programmes will be on sale next week among the members, and the Boy Scouts and Girl Guides will also have some to dispose of. A very good programme is outlined for the winter which will make the club very interesting. Get your programme early.

(Keremeos News from Harry Tidy, Special Correspondent.)

The wind-up of the apple season as far as picking is concerned, is near. The Jonathans and Spitzenberg have all been picked and now the growers are busy with the later varieties such as Baldwins, Newtons and Winesaps and it is expected that they will all be in the packing houses by the end of the month.

* * * *

Something must have happened to our Go Easy Railroad on Friday the 20th, it actually arrived on time in the morning and got back from Princeton nearly on time in the evenig. The G. N. officials can not put up the old plea that the line does not pay as there is so much freight being handled that they are forced to send up an extra train at least twice a week and sometimes three times.

* * * *

After making a thorough investigation into the crops that have been produced this year by the local tomato growers, your corespondent has decided that the record for the largest yield will be given to Mr. R. H. Carmichael, the Keremeos "Cucumber King." His field averaged the enormous yield of twenty-two and a half tons of marketable tomatoes to the acre. Some yield, some grower, but then again, and this is what counts, some valley with some climate.

* * * *

By an order-in-council passed last Wednesday, Mr. George Baldwin has been appointed liquor vendor for Keremeos. Mr. Baldwin has been with the Liquor Board since its inception last year, first as assistant vendor at Abbotsford and latterly as travelling relieving vendor. The new vendor is a returned man who made quite an enviable record for himself during the late war. Going overseas with the 47th Battalion as a full fledged private he not only won his commission on the field of battle, returning home as a captain, but was also decorated twice for bravery. First with the Military Cross and the next time had the coveted bar added to it. Mr. Baldwin will be joined by Mrs. Baldwin and their young son as soon as he can make arrangements to get a house to live in.

* * * *

A number of the growers are storing their late varieties of apples over winter, in the hopes that there will be a better market in the spring. That is a question and only the result of the spring market will be able to answer it. There is only this much against it and that is that where last year, comparatively speaking there were only a few apples stored, this year there will be many carloads not only in this and the Okanagan Valley but also in the Yakima and Wenatchee Disticts. The growers of the latter places are not storing because they want to but because they are forced to owing to the shortage in cars for shipping. Now the question is will the grower, who sells on the present market, and takes his loss now, be better off than the grower who stores and has the worry of looking after his apples all winter and then takes a chance on the market. Time alone will tell.

* * * *

Two cars of box shook, about sixteen thousand boxes, arrived for the Keremeos Packing Co. last week and lasted about as long as a snowball on the first of July. Three more cars are rolling and it is expected that this will take care of the wants of the growers for this year. The Packing Company, including the three cars that are rolling, have brought in one hundred and five thousand apple boxes this year. This combined with the fifteen thousand that the private shippers hove bought makes a total of one hundred and twenty thousand apple boxes to say nothing of cherry, apricot, peach and tomato boxes. On top of this the canneries have imported over fifty thousand cases. There are several blocks of nice pine in the district and it is a wonder that some mill man has not seen fit to start a box factory here. Even a small portable mill ought to pay. What is the matter with the Board of Trade that they do not boost this along.

* * * *

The pheasant season opened on Saturday morning amid great salutations from the local sharpshooters. The casualty list has not been issued yet but it is known that several old cows are suffering from nervous prostration and stray shot and that several of the farmers have missed some of the Rhode Island Red roosters. Two of our young business men, who are also sportingly inclined, Messrs. B. E. Williams and C. E. DePhyfer, had it figured out that they would steal a march on the balance of the sporting fraternity. They set their alarm clocks for five o'clock, got up, had breakfast and started off for the flats about six o'clock. Much to their surprise they found out, when they got there that they had not figured on Mr. Farmer, who generally has part of a day's work done by the time that their alarm clocks were waking them up. The result of this was that the pheasants were like hens teeth, however, they managed to get a couple of very fine specimens. Moral: When in Rome do as Romans do and so do not forget, Mr. Businessman that when you go out into the country you had better start the night before, if you want to beat the farmer up in the morning.

* * * *

A suggestion for the Board of Trade. That they appoint a committee that will endeavor to interest capital that will put up a combined cider mill, pickle and jam factory. It is not suggested that there would be enough business to make a paying proposition of any of these three factories taken separately but there is no doubt that if a combinaion of the three were worked that it could be made to pay. There are tons and tons of apples that are going to waste here, windfalls and culls to say nothing of the apples that are grown and are not much use for anything but cider or vinegar. Then again there are acres and acres that could be planted to cucumbers, cauliflower, pickling onions and peppers, to support a pickle factory. We all know that there are tons and tons of soft fruit that only rot on the ground every year and the majority of the growers would prefer to sell their apricots, peaches, etc. to a factory rather than ship it to the worst market in Canada, Vancouver, and let the middle men do what they want to with it. Get busy, bury that hammer and boost.

* * * *

The Keremeos Packing Co., Ltd., are shipping at least five cars of apples to the Old Country and they expect to receive orders for another five. The majority of these apples are of the smaller grades such as 163, 175, 188, and 200. The demand in the Old Country is for a much smaller apple than is called for in Canada. Of course the grower will not realize as much out of the export apples as he will for the apples that are consumed in Canada but that serves him right for growing small apples. If he grew nothing but the larger size apples such as 96, 113, 125, 138 and 150, they would be all sold in Canada at a much better figure. After a while, when the sunset of life comes on us, we, the growers will begin to realize these things and wonder why we had not taken advantage of them before. Order your thinning shears now before you forget it.

* * * *

Mr. Business man, do you know that if the growers only get fifty cents per box for their apples, there will be distributed here in the next few months nearly seventy five thousand dollars? How much of this do you figure that you are going to get? No doubt the accounts that you have been carrying for the last six, nine and twelve months will be squared away but how much of the extra money or the real cream are you going to get? Eaton, Simpson, Spencer, Hudson's Bay, etc., know that there is the real cream to be got and go after it. How? By advertising. Letting the people know what they have and not waiting for them to ask for it. We have an advertising medium in this valley in the Princeton Star that reaches ninety five per cent. of the people here. Tell these people what you have got to sell through this medium and not have the outsiders coming in here and taking this money, that should be and would be yours if you go after it in the right manner.

CARD OF THANKS

Mr. Mattice and family take this means of expressing their sincere thanks for the many kindnesses shown them during the long illness of the late Mrs. Mattice and in their bereavement in her death. Also for the many floral offerings at the funeral.

MRS. A. KERR.

Keremeos, October 25, 1922.

COALMONT NEWS

Toilet utensils: Everything for the hands, face, hair, teeth and feet. Brushes, sponges, etc. D. J. Buckley, druggist. 49-1

Thanksgiving spices, so full of snap,
That puts cook's efforts on the map.
Spices so pure and of quality,
As only druggists' grade can be. D. J. Buckley.

* * * *

Stop a cold. More danger from a cold than any other simple ailment. For coughs, Buckley's Bronchitis Mixture; for colds, Cascara Bromide Quinine. 49-1

Kelowna, Oct. 20.—The Kelowna Fish and Game Protective association, after long waiting, has been successful in its efforts to induce the government to appoint a number of honorary game wardens for this district. These gentlemen, fifteen in number, have been sworn in as special constables, without pay, and have full authority in matters pertaining to the Game Act. Their names are not given for obvious reasons. The association has also arranged for a shipment of 20,000 Kamloops trout fry for the small lakes in this district and has put in an application for an additional 50,000. It has also requested the game authorities to establish a closed season for five years at the following lakes: Pear lake, Haynes lake and Cariboo lake.

Kamloops, October 24.—A special C. P. R. train of twenty box cars stopped at Kamloops depot Sunday morning, changed engines and quietly took its way eastward. There was nothing in its appearance to denote that it contained a valuable cargo, yet it was made up of goods worth in the neighborhood of $5,000,000, the second largest consignment of silk to reach Vancouver in many months from the Orient. It arrived at the port from Japan on the Nippon Yusen Kaisha S. S. Hakata Maru. There were 5100 bales and 145 cases of silk in the cargo. Running with all the privileges of a passenger train, the silk train is bound for New York.

WATER USERS' MEETING

(Continued from page two.)

be expected to shoulder these losses.

Had the Land Company been in a position where only twenty-five acres had been sold to one purchaser, it would be absurd to expect this one purchaser to take over all costs and expenses. This is given as an example to show the absurdity of expecting the part of the land sold to bear the burden of the whole.

We find after examing the Water Act that the Water Users are fully protected (Section 288). That redress can be had by application to the Board of Investigation if the tolls are unreasonably raised, or any breach of contract is made by the Company.

We therefore recommend, that no action be taken to form an Improvement District, but strongly recommend that a committee be appointed at this meeting to look after the interests of the Water Users, especially in case of a rise in the amount of tolls, and also to receive any communications from the Liquidators of the Company, and to be empowered to call a general meeting of the Users should they think it advisable.

This committee wishes to remind all Water Users that in voting, or acting that they are not doing so in their own interest alone but also in the interests of their neighbors. It is on this broad basis that we have put in considerable of our time.

Signed by members of this Committee.

After this report was read, Major MacDonald, the representative of the Water Municipalities (Government) was introduced and asked for his opinion. In a short speech he advised the water users to appoint a committee of five of the best men that they could get in valley and give them power to act. The Major was asked many question appertaining to the water rights, by the users present and answered them all satisfactorily.

It was then moved by Mr. Crooker and seconded by Mr. McCallum that; this meeting take no action in forming a water municipality. This was carried, after some discussion in which Messrs. Crooker, J. W. Lewis, D. McCallum, E. Christian and Dr. Thomson took part.

It was then moved by Mr. R. C. Clarke and seconded by Mr. J. W. Lewis that a committee of five be elected to look after the interests of the water users and that the meeting be held open for ten minutes to receive nominations. It was explained by the mover that the time clause was inserted so that due consideration could be given and no hasty action taken in choosing the committee as the best men were wanted. This was carried. It was then moved by Dr. Thompson and seconded by Mr. Knudson that authorized proxies be accepted. Carried.

The following gentlemen were then nominated: Messrs. McCallum, E. C. Clarke, W. G. Mattice, Lee, Etches, Tweddle, Crooker and Crowder. After two ballots were taken by the scrutineers, Messrs. Curry and Wilkes, the first five named gentlemen were elected on the committee.
