WORK.

ON HOT SLAG.

Dumping System.

At the smelter there is much activity, and a general cleaning up is going on. That part of the high fence, which extended from the furnace floor to above the water tank was taken down and packed away. The solid slag floor around the furnaces is being removed preparatory to laying the track for th hot slag plant.

Ties are being cut and the switches and frogs are nearly ready. Every thing will be in shape as soon as the locomotive and cars arrive.

Engine No. 1039 presented a fine appearance this morning. Gay flags were waving and wreaths of evergreen were festooed about the boiler and cars, all of which is in honer of Rossland's big celebration.

ABOUT TOWN

We seem to have entered and the rainy season.

School opened last Monday, two weeks late because of whooping cough.

A car loaded with coke ran off the track below the railway at the Anaconda smelter on Thursday. The entire day was spent in rerailing it.

A. Archambeault who moved down from the Mother Lode on Monday, has taken the house formerly occupied by Mr. Hermanson of the smelter.

At the Grauby Co's mines there was a serious accident to the fine new compressor plant. An explosion occured in one of the cylinders and shortly afterward in the other cylinder also. Mr. Geo. Fraser was so near that it seems a miracle that he escaped with his life.

New Boat for the Creek

Boundary Creek above the pump house promises to give much pleasure, in affording a little boating.

One boat has been built and does fine work. It is to be hoped that other boats may be built and thus give more fun to the boys of Anaconda.

Every person wastes enough money in six or seven years to realize a handsome capital if part even were saved.

MINING NOTES.

Work is going on on the Elkhorn and it is producing rich ore.

Development work will be resumed shortly on the Dynamo, which is likely to become a shipper.

Work is progressing on the Gold Bug which promises to become a shipper of rich ore in a few months.

The Gold Finch has changed hands to Mc.Vicar and Co. and regular shipments of rich ore will be made.
