Branches in all the principal cities of Canada, and agents in New York, San Francisco, Seattle, Tacoma, Portland, Spokane, Boston, Chicago, Etc.

ASSAY OFFICE

Gold Dust Assayed, Purchased or Taken on Consignment.
Quartz Assaying at Reasonable Rates.

McKEE CREEK.

Meeting of Shareholders of the Atlin Mining Co.

Held in London Reports Excellent Prospects for This Season's Work.

At the statutory meeting of the Atlin Mining Company, says the B. C. REVIEW, the Chairman, instead of announcing as is so frequently done on these occasions, "that the directors in the exercise of their discretion, had not seen fit to purchase all the properties mentioned in the prospectus," made the gratifying statement that in addition to the 72 ordinary claims and the whole of Discovery claim on McKee creek (which exceeds an area of 10 ordinary claims), they had since acquired 43 other claims. From a plan, shown at the meeting it was shown that the Atlin Mining Co. owns a very extensive portion of McKee creek, which, added to the dumping ground of 80 acres, gives every facility for extensive hydraulic operations.

The gravel of this creek has been proved to be highly auriferous by the most conclusive test, as gold to the value of £20,000 was taken out by individual miners with the primitive appliances of shovel and rocker. The local manager reports that there is as much gold still left in the ground worked over by the placer miners, as has been taken out, and as the greater portion of this company's holding is virgin territory the directors would seem justified in forming the most encouraging anticipations. By the end of June hydraulicing will have commenced, and after that monthly clean-ups will prove how valuable a property is owned by this subsidiary of the Nimrod Syndicate, which, together with the B. C. Enterprise Company must largely profit by its success.

Work is being pushed ahead by Mr. Featherstonhaugh, and the flume is in course of construction. The snow has all been cleared from the right of way, and only four inches of frost in the ground to contend with. Mr. Featherstonhaugh is confident that all will be ready to start by June 1st.

The pipe and plant are still on the lake but will be delivered on the company's property by next week.

Dr. Robert Bell has been placed in charge of the Geological Survey of Canada in place of the late Dr. Dawson, and it is said that he will be appointed director. He has been assistant director for a number of years, and is well known, both by his work in the field and by the many valuable reports and papers which he has written.

RACE HORSE GROUP.

Work Resumed On the Property by the Trustee, No 2 Shaft to be Sunk to Bedrock.

On Sunday, 31st March, work was shut down on the Race Horse—Pine Tunnel Syndicate—property owing to a multiplicity of causes, but not on account of shortage of funds as alleged by some "know-alls."

La Grippe struck the camp two days after starting up and when both engineers got knocked out, Mr. Brownlee thought it time to quit temporarily.

A new contract has been let to D. G. T. Paterson to sink to bedrock on No. 2 shaft, and it is expected this will be reached in about 48 feet, as it is supposed that No. 3 (44 feet to bedrock) is on the south rim of the old channel.

For the information of all concerned we are authorized to say that favourable negotiations are under way for this property to be further exploited by capitalists, and if found up to representations, it will be opened up and worked on a large scale.

Mr. Paterson has steam up and is now sinking.

ST. ANDREWS CHURCH CONCERT.

The postponed concert in aid of the Building Fund of the Presbyterian church was held on Thursday last. There was a large and appreciative audience, and a nice little sum should have been raised.

A well prepared programme was successfully carried out. Mr. Lumsden, in spite of his recent severe attack of la grippe, acquitted himself in his usual excellent style. Special mention should be made of the song, "Poverty Row," by Miss Maggie McDonald and Miss Pillman's recitation entitled, "When the Minister comes to tea." Mrs. Woods kindly accompanied the vocalists in the most charming manner. Mrs. Blackett was in excellent voice, and the rendering of the duet, with Mr. Lumsden, simply charmed the audience. The quartettes, by Messrs. Williams, Lumsden, Wollaston and Pringle were very good. The extremely successful concert was brought to a close by the singing of the National Anthem, "God Save the King," and was never more enthusiastically sung.

MR. McKAY OFF TO PORCUPINE.

Mr. Joseph McKay of the Gold Commissioner's office, left on Tuesday last to take the position of assistant to Mining Recorder Rant at Porcupine. We wish Mr. McKay every success in his new sphere of labour.

The Atlin Claim.

Published every Saturday morning by THE ATLIN CLAIM PUBLISHING CO. A. C. HIRSCHFELD, EDITOR and PROPRIETOR. Office of publication Pearl St.

Advertising rates made known on application.

The subscription price is $5 a year payable in advance. No paper will be delivered unless these conditions are complied with.

SATURDAY, APRIL 13th, 1901.

MR. Henry J. Woodside, late editor of the YUKON SUN, vigorously opposes the proposed incoration of Dawson, as calculated to strengthen the dominance of American influence in the town, and lead to the adoption of American methods and lawlessness. "The Board of Trade," he says, "is at present controlled by those whose interests are chiefly in Alaska or whose interests are in the Yukon and Canada only temporarily, and it is they who are the chief advocates for incorporation. It can easily be inferred that their private and future interests will be paramount in the discussion of any subject in which the interests of the Yukon and Alaska clash.

"There is constant clash between the interests of these two territories, and I want to empathize the fact. Alaska is profiting by the reputation of the Yukon and not vice versa."

In his communications to the "outside press," Mr. Woodside uses very forcible arguments to bear out his contentions, and suggests that Canadian newspapers should recognize and empathize the fact that Dawson is not in Alaska but in Canada, and that they should use every effort to impress the public accordingly.

The Skagway DAILY ALASKAN takes up the cudgels against Mr. Woodside, but to all reasonable thinking people that paper's efforts to confute Mr. Woodside are puerile in the extreme. It sums up as follows:

"Although 'Alaska' may be hereafter tabooed in Dawson, Vancouver and Victoria print shops, the Canadians need feel no alarm that such advertisements will be missed. The importation of Canadians into the district is not at all desired by the white people living here, and the gold output from American Alaska will hereafter give it all the advertising required."

It must be borne in mind that Skagway owes its very existence to Dawson, and not a little to Atlin; without which there never would have been a Skagway.

The same paper, referring editorially to a proposed big celebration to be held in Dawson in July next, says:

"If the large excursion occurs it would not be a bad idea to have a few attractions at Skagway to catch them going and coming. We know how to entertain here, and besides, we don't want to have the chechacos attack the trail too heavily loaded with finances. They might weary of this load—and besides there is a chance that they might be robbed en route."

If that "city by the sea" should endeavour to renew the days of "Soapy Smith," as might be inferred from the above quotation, the sooner the "All Canadian Railway" to the Yukon is built the better for all concerned. When this consummation "devoutly to be wished for" is a reality, we wonder where Skagway will be then—moss-grown!

ATLIN DISTRICT.

Its Geology and Auriferous Deposits:

The Glacial Gravels of Pine-Spruce Valley.---IV.

GLACIAL GRAVELS:--The upper valleys of the two creeks are separated by a low range of bald mountains, which end somewhat abruptly nine miles east of Lake Atlin. The trend of this range is continued westward some miles by a series of rocky ridges and gravelly foothills, rapidly lowering in elevation and eventually joining the floor of the main valley about six miles from the lake shore. At this distance up the valley its altitude is 600 feet above Lake Atlin.

Where the upper valley of Pine thus begins its grade commences to lessen very markedly, and in the succeeding five miles it gains in height little more than 200 feet, ending in a lake basin, which, at an elevation of 825 feet, occupies the remaining thirteen miles of the ancient depression.

Upper Spruce valley, on the contrary, continues to rise at the grade of the main valley and finally terminates in a broad, drift-covered plateau 1700 feet above the lake. This plateau forms the watershed whence now descend the headwaters of Spruce, McKee, Dixie and Otter creeks, and whence also descended in an earlier period the extensive glacier mass, whose superficial and lateral moraines mantle the twin valleys and the connecting valley of Otter.

The direction in which this ice mass advanced is clearly shown in the many evidences it has left behind it, suggesting its probable source and general movement. It appears to have followed down the valley of Spruce and to have diagonally crossed the main valley, moving in a generally north-westerly direction. Once free of the confining range of Bald or Spruce mountain it seems, however, to have spread northward and eastward across upper Pine valley, and the morainic hills north and south of Discovery basin are doubtless the terminal moraines of this outward spread.

No evidence exists of any great westerly ice movement down Pine valley from the direction of the granite highlands surrounding Lake Surprise. The general flatness of the upper valley of Pine, together with the undisturbed condition of its pre-glacial gravels seems to preclude any such hypothesis: the glacial drift in its higher reaches being plainly derived from a northward spur of the main mass indicated descending the valley of Otter creek. Of the many moraines left by this ancient glacier evidencing its direction of flow the most prominent can be traced, with but little break, from the Spruce flank of Bald mountain to the foot of Discovery basin, thence across the bed of Pine creek and westerly along the northern bank of that stream for upwards of a mile, ending ab-

ruptly in the vicinity of Spruce Junction camp.

This lateral moraine may be regarded as the key to much of the surface topography of Pine valley as a whole, as well as to the glacial streams whose buried channels are at once the hope and the reliance of the hydraulic miner and dredger at whose hands they must find development. It is due to its existence that the main drainage system of the receding glacier was almost wholly in the direction of Stevendyke and Spruce creeks, and that the valley of upper Pine was early transformed into a lake basin of which Surprise lake formed but a part.

The glacial deposits, whose presence is due to the long continued action of this extensive glacier, constitute a distinguishable series, of which boulder clay and more or less stratified silts, sands and gravels represent the several members. Fluvio-glacial gravels are often the basis of the whole, interchangeable with the boulder clay in part, and in part also representing the lowest member of the series with silts, boulder clay and partly stratified gravels immediately succeeding.

From this latter order of arrangement it would appear that the advancing as well as the receding glacier assisted in the general deposition.

According to the superficial evidences at hand, the close of the glacial period was marked by a sudden flooding of the main valley from above, from which phenomena appears to date the age of concentration to which we owe the low-level channel of Pine creek, on which the discovery of Fritz Miller was made, as well as the shallow placers of Spruce creek so rich in "runs" of the precious metal.

The cause of this phenomena can only be conjectured, however marked its evidences. A sudden change in temperature, due to altered climatic or to physical conditions, affecting the general region, may be given as one of the more reasonable hypotheses. Such change, moreover, appears to have affected only the lower valley, not exceeding in elevation 3000 feet above sea level, for the glacier mass continued for some considerable time thereafter to occupy the foothills of Bald mountain and the upper valleys of Spruce and Otter creeks.

As has been stated, the glacial gravels of fluvial origin are to be ascribed to the earlier and later glacial periods the general mass of boulder clay and glacial drift being morainic matte laid down independent of fluvial action. These three classes of deposit greatly vary in economic importance, and the general observation concerning their several values may be thus set down.

The morainic material carries little value even in fine gold, and it seems extremely doubtful whether it would pay, under existing conditions, to hydraulic the hills and terraced banks composed solely of this unstratified material. When, however, it is found to overlay a stratification of fluvial gravels and forms the capping, so to speak, of an early glacial stream its values are sufficient to pay the cost of its own removal, and the lower stratas of gravel and silt would raise the average of the whole, per cubic yard, to a very satisfactory margin of profit. The depths of these mixed deposits exceeds 100 feet in places, running, however, from 60 to 80 as the rule. The high level channels of Pine and Spruce creeks may be instanced as an example of this class of glacial deposits. Their bedrock runs have proved of exceptional richness in streaks, and so far as they have been worked by drifting have uniformly paid labor, material and profit.

The later class of glacial streams, represented by the low level channels of Pine and Spruce have concentrated a wide area and depth of glacial drift, which, so far as these channels have themselves been worked, seems to be largely composed of disturbed gold gravels of pre-glacial times. The result has been an area of comparatively shallow ground of uniform great richness. Whether this will hold good as the channels are traced downward to the lake remains yet to be definitely ascertained. This season's developments on the Stevendyke property, will, it is expected, add not a little to our present knowledge on this interesting point.

Such in brief are the reasons for my belief in the future of Atlin as a hydraulic camp, equal in promise to any on this northern continent.

My observations have not yet carried me into the domain of lode mining, so that I can offer no hope as to the permanence which this class of mining alone gives to a mining district, other than to remark that our formations more nearly resemble those of certain highly mineralized areas of the California gold belt than any of which there is knowledge in British Columbia.

FRANK WEIR.

IN the issue, just received, of the ENGINEERING & MINING JOURNAL of New York, March 23rd, we are pleased to note the addition of a Canadian supplement. If this supplement, consisting of 16 pages, keeps up to the record of its first issue the benefit to the Canadian mining industry is undoubted. Atlin is not forgotten in this supplement, and the CLAIM will not be backward in furnishing reliable information regarding the district to such a responsible and enterprising journal as the "Engineering and Mining Journal."

J. A. FRASER RETURNS.

Mr. J. A. Fraser got back to Atlin on Tuesday afternoon. He reports that the tone in respect to Atlin and district on the outside is very favourable, in fact, better than it has ever been since its first year. The development of the country is being watched with no ordinary interest. Enquiries are being made for Atlin properties by capitalists from eastern Canada and the United States, particularly the eastern States. Mr. Fraser believes that much attention will be given the district by people who mean business and who are looking for safe and profitable mining investments such as he firmly believes exist in this camp.

We congratulate Mr. Fraser upon his appointment as Postmaster, to succeed Mr. E. C. Mahoney, retired. Mr. Fraser will enter upon his official duties immediately.

J. M. Ruffner, of the Sunrise Co., went to White Horse this week.

NOTICE OF MEETING.

The Monthly Meeting of the BOARD OF TRADE will be held at 8 P. M. on Tuesday next, the 16th inst, at the Court House. All members are requested to be present.

DISSOLUTION OF PARTNERSHIP.

NOTICE is hereby given that the partnership heretofore existing between the undersigned, A. J. Baker and E. G. Tennant, or under the firm name of The Atlin Lumber and Mining Company, has this day been dissolved. The business of the firm will be continued by Mr. A. J. Baker, who will also pay all outstanding liabilities. All accounts due to the late firm will be collected by him.

Mr. and Mrs. Cancellor arrived in town yesterday.

Baths Hot, Troy Laundry.

Group of Seven Bench claims for sale. Best part of Pine creek.—Apply CLAIM Office.

The largest circulating library in Atlin; only 10 cents exchange, at Pillman & Co.'s.

Jack Byrom desires us to state that he leaves for the coast on or about the 22nd inst, and that all parties having claims against him will receive payment on presentation of their accounts, and all parties indebted to Mr. Byrom are requested to make settlement before that date.

Full line of stationery at Dockrill's.

Tom Hinchcliffe has returned to the old stand at Taku and is prepared to cater to his old friends as of yore. Mrs. Hinchcliffe will put up the same good old meals as the weary traveller used to get at home.

The latest maps of Atlin district at Pillman & Co's.

W. M. Brock returned to Atlin on Thursday accompanied by F. T. Hamshaw and C. B. Gaddis. Mr. Brook is heavily interested on Pine and Spruce creeks, and it is expected he will shortly begin active operations.

Oranges, $1 per dozen, at Pillman & Co's.

Just arrived! Fresh potatoes and onions and strictly fresh Eggs. Best Creamery Butter, Oranges, Lemons and Apples at Pillman's.

F. T. Hamshaw, an hydraulic mining engineer, is in town. He is on the lookout for good a hydraulic proposition. Mr. Hamshaw will only spend a few days in the camp just now, but expects to return shortly and complete his investigations. He represents New York capitalists.

Use Dockrill's Climax Cough Cure.

Many familiar faces are being seen on the streets, having returned from their southern pilgrimage. We see some strangers whom we are glad to welcome.

Hot Baths, Troy Laundry.

There have been over sixty arrivals this week, and among these we have noticed the following:

Mr. and Mrs. Morris of 28 below on Boulder.

Fred Wrong and wife, Miss Obar, Horace Leach, Mr. and Mrs. Short, B. Parrott, P. Anderson, J. Clinton, F. H. Crane, John Standly, Tom Kerns, Jack Tittinger, J. H. Marquis. Jack Letherdale is on his way in, he is bringing in some freight by way of Caribou.

Another shipment of those fine chickens has arrived for Fraser & Co. Come early and get your choice at 30 cents per pound.

W. E. Gibson, manager of the Willow Creek Hydraulic Co., is back, and work will be resumed as soon as the snow flies. H. McEdwards accompanied Mr. Gibson.

Store to rent in best part of town. 20 x 38.—Apply CLAIM Office.

Harry Pavey and S. M. Blodgett mushed in this week.

Try Hot Baths, Troy Laundry.

The Pioneer Store was the first store opened in Pine City, and has always had the reputation of carrying the best stock of goods the camp can get. Mr. C. D. Newton has opened with a full line of fresh goods just in from the coast, and he will be pleased to see all his old friends back again.

Mr. Mitchell Brophy arrived in Atlin last Saturday. He is an expert hydraulic miner, having spent many years in Caribou and California. He comes well recommended, and whoever secures his services will get a good man.

O. T. Switzer has returned from Philadelpdia. He reports that Mr. Low is bringing in an hydraulic plant for his property on Ruby creek.

Gould and Kent are doing well on Gold Run. They are working on bedrock and have a fine dump ready to sluice as soon as the snow goes.

R. C. Lowry has returned from a two month's trip to the coast.

Ask for Picadilly Club Scotch at the Leland Hotel.

A. C. Hirschfeld carried off first prize in the shooting contest, making 34 out of a possible 35.

OPENING OF THE NUGGET HOTEL AT DISCOVERY.

Those who missed the opening of the Nugget Hotel, missed one of the treats of the season. Last Tuesday evening Mr. Hayes, the genial proprietor kept open house and a large number of Atlinites journeyed up to Discovery. Their reception was well worth a much harder trip, for Mr. Hayes "did himself brown" to entertain his guests. A dance was held in the spacious hall adjoining the Hotel, and its capacity was fully tested to accommodate Mr. Hayes many friends. A bounteous supper was served at midnight to which ample justice was done by all. It was in the "wee sma' hours" that the company dispersed voting Mr. Hayes "a jolly good fellow," and hoping that many another such happy a night might be spent under his hospitable roof.
