SERIES OF STRIKES.

ANOTHER WEEK OF BIG SHOWINGS

Winnipeg Again Fortunate—The Monarch Ledge. A Big Strike on the Buckhorn—The Arlington-Burns Property—Another Body of Ore Exposed on the Sunset—West Fork Properties to the Front—The Similkameen Sunset

The number of big strikes in the mines of Boundary Creek district are easily accounted for. The near approach of the railway and consequent opportunities to ship ore has induced mineowners to more active measures in the development of their properties. The result is that big ledges which outcropped on the surface have been encountered at lower levels with increased values. Then the railway itself has done unusual work in the matter of opening up the bodies. Mining history furnishes no precedent for the many strikes made by the railway in this district. In other mining districts the railways generally escaped the ore bodies, but here the main line and the branch lines have themselves demonstrated that Boundary Creek is one of the richest mining districts in the world. If Boundary Creek had nothing to show but the ore bodies exposed by the railway on the Emma, Oro Denero, Snowshoe, Winnipeg, Golden Crown, Mother Lode, and Sunset, it would still occupy a prominent place in the mining world. The work of the railway has been eclipsed by that of the owners and the last two weeks have been record breakers.

Good luck and chattering Italians are doing wonders for the Winnipeg and Golden Crown mines. Last week a new ledge was crosscut on the Golden Crown and this week another ledge was encountered at the dividing line between the two mines. The ledge runs through both properties. The ledge is fully 30 feet wide. The ore is solid and carries higher copper values than any which has yet been taken from the Winnipeg. Those who saw the ore state that it is the largest and richest looking surface showing of this character of ore yet uncovered in the Boundary creek district. A force of men are at work stripping the ledge.

From present indications, the big properties of Greenwood camp are going to have a keen rival for first place in the Monarch. The Monarch was not considered among the big properties until recently. It had been bonded and developed but the indications did not justify the taking up of the bonds. A short time ago R. E. L. Brown who had bonded the property gave it more serious attention. A large force of men under W. Hanna started in opening up the ore body. Open cuts running parallel demonstrated that the ore body is fully 800 feet wide. The walls of this enormous ore body have not yet been discovered. Two shafts one 60 and the other 75 feet are in the ore. The values are high, $40 in copper and gold being an average assay. Mr. Empey, Mr. Brown's engineer will install a plant on the Monarch in a short time.

Smith Curtis is meeting with flattering success in the flotation of the Sunset property in the Similkameen district. He was handicapped somewhat by the unusual course pursued by ex-Governor McIntosh in connection with this property. Mr. McIntosh had a bond on the Sunset. For reasons which are common in connection with mining deals, he did not meet the payments on the bond and then spoke disparingly regarding the property. The mineral richness of the Sunset is beyond dispute. Dr. Deeks, the eminent geologist, who spent nearly all summer in the Similkameen, thoroughly examined the property and his report is of the most encouraging discription.

A new ledge on the Sunset, at least 25 feet wide, has been uncovered where excavation is being made for the big compressor plant. The ore had not been assayed at the time of writing, but from appearances it is sure to carry good copper values. This lead is distinct from that opened up by the railway and had not been exposed at any point heretofore. It adds a new and large body of ore to the known mineral wealth os the Sunset.

Jno. Dunn and J. L. Steele two Boundary creek pioneer prospectors have returned from a two years' trip to Omineca and the northern coast. During the last year they have been developing properties at Kitimat above the Skeena river. They have here large bodies of rich ore. E. A. Bilenberg is associated with them in the venture.

W. F. Robertson, provincial mineralogist, reached Greenwood on Thursday, after visiting Central and Summit camps. Mr. Robertson on Thursday afternoon visited the Mother Lode. He intends visiting all the camps in the district and is gathering data for the annual report of the minister of mines.

A big strike was reported today in the Buckhorn at a depth of 65 feet. The ore is a rich chalopyrite assaying 30 per cent copper and $[illegible] in gold. Development work is showing up a magnificent body of ore on the Arlington-Burns an adjoining property.

John Mack, the well known mining man, was in from Spokane this week. Mr. Mack is owner of the Athelston, a Wellington camp property, which it is reported is being sold in Toronto at a large figure.

Business and Professional Men

Facilitate your office work and make attractive your office by providing yourself with the many up-to-date things in stationery and writing material which you will find in our up-to-date stock.

Paper Trays, Baskets, Clips, Pins, Letter and Bill Files, High Grade Blank Books and Stationery of all kinds will be found here at low prices.

SMITH & McRAE.

Books, Stationery, Office Supplies Etc.

MUSIC HALL.

Greenwood Will Shortly Have a Large Variety Theatre.

Ald. A. Fisher has decided to build an hotel and music hall in the city. The site selected is at the corner of Greenwood and Silver street. The 50-foot lot owned by Jas. Kerr has been secured and the contract for the building will be let at once.

REDUCE TELEPHONE RATES.

Vernon & Nelson Telephone Company Make a Big Cut.

Competition in telephones has reduced rates. The Vernon & Nelson Telephone company, which heretofore charged $3 per month for a 'phone, have made a reduction to $2.50 for business houses and $2.00 for residences. Business houses using two 'phones get a $2 rate for each 'phone. This applies to the city only.

Another Telephone Cut.

The Boundary Creek Telegraph & Telephone company have met the cut made by the Vernon & Nelson company. They announce a rate of $2.50 for business houses and $2 for residences. This includes service with Phoenix, Midway and all outside points to which the company's lines extend.

Madden & Dalles have built a new Pacific hotel to replace the one destroyed by fire. The new Pacific is if anything a better building than the one destroyed. There is a large and comfortable dining room and comfortable bed rooms. The bar has been moved into the new building and the restaurant will be opened in a few days.

THE TORY PLATFOM.

A Disjointed Platform Adopted in Convention.

The Liberal-Conservative convention at New Westminister last week adopted the following rather rambling platform:

"The Parliamentary system of the Mother Land adopted in the Dominion of Canada and Province thereof by the British North America Act, when properly carried out, is opposed to faction, and serves to safeguard national interests.

Political parties with party organization represent the cardinal principles of British Government and tend to suppress divisions, conspiracies and confusion in the State.

The distinctive features of the Liberal-Conservative party in Canada have been essentially—

1. Loyalty to Queen and faith in Country.
2. Faith in the people.
3. Equal civil and religious liberty.
4. Government according to the principles and precedents under the British Constitution, including (a) Parliamentary control of public expenditure. (b) The responsibility of Government to Parliament. (c) The utmost good faith enforced as between Government and the public touching all executive and legislative acts to preserve public credit and the good name of our country.
5. The improvement and betterment of the condition of the wage-earning classes.
6. The encourgement by the state of the introduction and investment of capital in the country.
7. Active State aid in: (a) The development of transportation facilities by sea and land. (b) The advancement of agriculture and of the natural resources of the country. (c) The improvement of education.

With such principales the record of the Liberal-Conservative party in Canada since 1867, among other things, is notable for the following:

The consolidation and union of the province and territories of British North America.

The maintenance of British connection.

An inter-oceanic and transcontinental railway.

A network of railways over Canada.

An independent national canal system connecting the middle of the Continent with the Atlantic Ocean.

The development and protection of Canada industrial life.

The establishment of steamship communication with foreign countries.

The establishment of experimental farms and the introduction of cold storage.

Increased allowances for the Militia and the formation of permanent corps.

The establishment of a Government coast teldgraph system.

The construction of dry-docks at Quebec, Esquimalt and Kingston.

The establishment of a fishery protection service.

Under these circumstances, at the first Convention of the Liberal-Conservative Union for British Columbia the following resolution was unanimously adopted:

'Resolved, that in the opinion of this Convention it is desirable that the Liberal-Conservative party should, as a party, take part in Provincial elections for the purpose of ensuring the Government and Legislation of this Province and Liberal-Conservative principles, and in order to carry this into effect "at the next general election for the Province" that candidates be invited to stand for such constituencies as are likely to return Liberal-Conservative members, pledged primarily to support a Liberal-Conservative Government as distinguished from a Government composed of Liberals or partly of Liberal-Conservatives and partly of Liberals, and that a platform or statement of principles, applicable to local politics, be drawn up.'

For the purpose of enforcing the cardinal principles of the Liberal-Conservative party in the local Government of British Columbia, we have the honor to recommend the affirmation and approval of the foregoing outline thereof so far as applicable to local affairs, and in addition, to pledge this Convention, and the members of the Liberal-Conservative party who support it, to the following programme for the Province of British Columbia.

That true to the maxim of our party, 'by the party, with the party, but for the country,' the interests of British Columbia shall be paramount, regardless of the political complexion of the Federal Cabinet.

It is proposed—

To revise the voters' lists.

To actively aid in the construction of trails throughout the undeveloped portion of the Province, and the building of Provincial trunk roads of public necessity.

To provide for the official inspection of elevators and hoisting gear.

To improve the administration of justice and secure the speedy disposition of legal disputes.

To provide an effective system for the settlement of disputes between capital and labor.

To adopt the principle of Government ownership of railways, in so far as the circumstances of the Province will admit, and the adoption of the principle that no bonus should be granted to any railway company which does not give the Government of of the Province the control of rates over lines bonused, together with the option of purchase.

To assume control and administration of the fisheries within the boundaries of the Province.

To actively assist by State aid in the development of the agricultural resources of the Province.

To make the London Agency of British Columbia effective in proclaiming the natural wealth of the Province, and as a place for profitable investment of capital.

In the interests of labor the Liberal-Conservatives party sympathizes with and endorses the principle of an eight hour law.

To provide an improved system of education.

To recognize and reform the system of provincial aid to medical men and hospitals in outlying parts of the province.

To actively support the advancement of the mining interests of British Columbia.

To aid in the immigration of female domestic servants.

We regret to learn that the government of Canada does not intend to assist in sending and maintaing a volunteer military contingent to South Africa to co-operate with the forces of the mother land and sister colonies in protecting the rights of British subjects.

That this union desires to congratulate the Hon. Sir Charles Tupper, Bart. on his able and vigorous leadership during the past session and trusts that he may long be spared to occupy the high position he now holds, and we hereby pledge anew our confidence in him and in the cause that he has so ably represented, and that this resolution be telegraphed to him.

This convention views with alarm the introduction of large numbers of indigent aliens into the Dominion to compete with our own people in the field of labor, and regrets that the federal administration has failed to introduce the legislation respecting Chinese immigration pledged to the people of this province by the present prime minister of Canada."

Dissolution of Partnership.

Notice is hereby given that the partnership hitherto existing between Leutfried Portmann, Anton Portmann and Frank Hartinger, brewers, Greenwood, trading under the name of Elkhorn Brewing Co., is this day dissolved by mutual consent, Frank Hartinger retiring from the firm, and L. and A. Portmann continuing the business. Debts due by the firm will be assumed by L. and A. Portmann, and debts due the firm are to be paid to them.

Witness: D. A. Cameron.

DOMINION COPPER COMPANY.

Development Work Being Done on the Brooklyn, Stemwinder, Idaho and Rawhide.

On the Brooklyn the shaft is down 250 feet, and drifting and crosscutting is being carried on at the150 and 250-foot levels. The power used is from a 5-drill air compressor.

The shaft on the Stemwinder is down 225 feet and will be continued to the 250-foot level. Drifting and crosscutting is being carried on from the level established at a depth of 114 feet. As soon as the 250-foot level is reached drifting will be commenced.

Surface work is being prosecuted on the Idaho, with the object of determining the best point at which to commence sinking.

Work on the Rawhide has been shut down until the difficulty in connection with the eight-hour law is settled, one way or the other.

Large working plants will be installed on the Brooklyn and Stemwinder claims as soon as they can be got in over the railroad. The machinery will consist of a 20-drill air compressor and four 100-horse power boilers. Suitable buildings will be erected for the machinery, near the present pumping station, below the Stemwinder shaft-house. The boilers, engine and air compressor from the Brooklyn and Stemwinder will be moved to the Idaho and used for sinking purposes on that claim. The purchase of a compressor plant for the Rawhide is contemplated, and will probably be installed during the winter. Between 30 and 40 men are employed on the company's properties at the present time, and Mr. Robins states that he could place 50 more men now if the eight-hour troubles were satisfactorily settled one way or the other. —Phoenix News.

THE TRACKLAYING MACHINE.

A Wonderful Plant For Laying Railway Rails.

On Sunday and during the week a large number went out from the city to witness the tracklaying machine placing the big heavy rails in their proper position along the grade. The machine is patented. It is run by George Roberts a nephew of the inventor. Roberts turned out the first machine in 1897 and it was tried on the Northern Pacific near Spokane.

At present there are only five of these machines in use—one each in Dakota, Arkansas, Idaho (Nelson & Bedlinton) and Arizona. Under the most favorable circumstances a machine will lay from two to two and a half miles of steel daily, including the needed ties, requiring from 90 to 100 steel handlers, tie buckers and spikers. They easily handle 1000 feet per hour. So far the machines have been made in Seattle.

The operation of the machine is interesting to a layman. It consists of an upright Nagel engine, made in Erie, Pa., of 16 h-p, and is placed on the front end of an ordinary flat car, getting its steam from the locomotive that is pushing the steel and tie cars. A tram with live rollers runs from the tie cars to the front, and on the other side a similar tram brings forward the steel rails. Both sets of live rollers are controlled with levers by the engineer of the track-layer, who can stop them at any desired point. Men on the flat cars tumble the steel and ties into their respective trams, the machinee doing the rest until they are seized by several gangs in front, who places ties and rails, and bolt the latter together with lightning speed. The distribution of the ties in front saves little time, if any, as the machine must run just the same, and the tie and steel gangs vie with each other in keeping up.

Mountain Ride to Greenwood.

Mr. R. Mathison, superintendent of the Dumb and Deaf Institute, Belleville, Ont., visited his son, Dr. Mathison, in Greenwood a few weeks ago. Mr. Mathison publishes an interesting paper called the Canadian Mute. In a recent number appears the following account of his trip:

"While on the Press association excursion during vacation, Superintendent Mathison enjoyed or rather endured an unique experience, and one he hopes never to repeat. On the trip he left the excursionists at Revelstoke and branched off to Rossland, then on to Bossburg, in Washington state, where he took the stage for Greenwood, in southern British Columbia. The distance is 65 miles, making 130 miles for the round trip, and though Mr. Mathison has travelled extensively in many parts of the world, and has endured may trying experiences, this stage coach of 130 awful, interminable miles, crowned them all for wearisom discomfort. The stage was constructed with a view to durability rather than comfort and convenience, while the road was composed alternately of mud and dust. and ruts and boulders of varying magnitude, but of unvarying hardness and solidity. Much of the journey was up and down steep mountains and along precipitous crags with towering rocks above and terrible abysses beneath, and where the swerving of the stage a few feet would have sent it and all it contained crashing into the valleys hundreds of feet below. The only redeeming feature of the drive was the sublimity and beauty of the scenery which in ever changing loveliness unfolded itself in magnificent panorama. At Greenwood Mr. Mathison spent a few pleasant days with his son, Dr. Robert Mathison, and his charming wife. Dr. Mathison has established a good practice in this progressive town, which is bound to become in the near future an important mining and industrial center. It is situated about seven miles from the international boundary and is beautifully located in a valley at the base of several mountains, upon whose summits and slopes are the mining camps of the district. It is in the center of what is known as the Boundary Creek mining district, a tract of country some twenty miles square, consisting of a series of low rounded hills, seldom reaching an altitude of 5,000 feet. These peaks are well timbered, and numerous small streams afford water for mining purposes. The whole district is rich in gold, silver and copper, and its possibilities are almost illimitable; and with the recent advent of the railway and smelter the attention of the whole mining world is directed that way. Railroad construction is now being pushed in every direction and each camp will soon be supplied with shipping facilities. Greenwood, the metropolis of this district, was founded in 1894, and has now a population of 2,500. At least that was the number of inhabitants a few weeks ago, but it is difficult to tell how many there may now be, for the rapidity of its progress can be imagined from the fact that its population has doubled within the past six months. It has two newspapers, several good hotels, sawmills and brickyards, a large number of business firms, including several wholesale establishments, and is adequately supplied with banks, insurance agencies, professional service and all the other necessaries and conveniencies of municipal life. The next time Mr. Mathison goes to Greenwood it will be in a Pullman car, as Chief Engineer Tye says the Canadian Pacific railway will be completed to that place about the end of October."

SATURDAY, OCTOBER 14, 1899.

THAT HAPPY FAMILY.

THE remarkable unanimity of opininion that dwells in the Tory camp was again shown in convention in New Westminister last week. The enthusiasm displayed in passing the many resolutions that go to make up the provincial platform of the British Columbia Liberal-Conservative association augurs well for the future of the Conservative party. It is remarkable how party discipline can govern and control a strong man. Only two months have passed since another convention was held in Rossland. It was not a political convention. It was a convention of business men, representing business institutions—men gathered together for the purpose of taking such steps as would promote the interests of the mining sections of southern and eastern British Columbia. There were present at the convention strong Conservatives and strong Liberals. Hon. T. Mayne Daly was there, John Roderick Robertson was there. The one was a leader of Conservatives in the good old days when Tory doctrines were at a premium and Tory leaders were on top; the other endeavors to lead the Conservatives of Nelson under the careful direction of David Mark Carley. Those two loyal conservatives endeavored to commit a non-political organization to hostile action in reference to the eight-hour law. They did not mince their words. No men could holde stronger views regarding the eight-hour law. Hon. T. Mayne Daly was also at New Westminister. He was one of the active delegates to the Conservative convention which declared, "That in the interest of labor, the Liberal-Conservative party sympathizes with and endorses the principle of an eight-hour law." Published reports do not state that even a still small voice was heard in opposition to this resolution. The incident points a moral and adorns a tale. Politicians have strong views when away from the restrictions of party discipline, but when the bugle sounds and the faithful are called, principles are cast aside and a strong bid is made for votes. Good old Tories will tell the people that certain legislation is ruinous and calculated to destroy the best interests of the country. The same Tories as party men endorse the legislation they so vigorously denounced as business men. Party is stronger than principle.

Those who refused to take an active part in the agitation, looking to the repeal of the eight-hour law, pursued the wiser course. Those who believed in the principle of the law did well to discourage agitation; those who did not must have been taught valuable lessons by past political events. They could have learned that men who wander in the field of politics are finally on the side that brings the most votes to the party to which they belong.

Those Conservatives who are opposed to the eight-hour law will curse the stupidity of their colleagues who loaded the platform with a resolution endorsing the eight-hour law, but they will not cut loose from the party. They will fight shy of the eight-hour law on the stump and wave the old flag more vigorously.

CONSERVATIVE PLATFORM.

THE wonderful variety of subjects included in the Conservative platform is its most striking feature. There is some difficulty in determining what part is preamble and how many appendixes are added to the platform proper, but even with this drawback, one cannot but admire that wonderful versatility that endeavors to please everybody, from the dignified imperialist to the anti-Chinese agitator. It is interesting to notice that an effort was made to blend a resolution on encouraging female servants with one sending some of our brave boys to their death in South Africa. Just below these two happy resolutions are two others that harmonize equally well. One congratulates Sir Charles Tupper, Bart., and the other tends to discourage Chinese immigration. The good Conservatives evidently presumed that the electors would be so lost in admiration of Sir Charles that they would fail to discover the inconsistency of British Columbia Conservatives resoluting against Chinese. The platform taken in its entirety, is the most wonderful production that has yet made its appearance in the political world. It so systematically arranged, so concise, views are so clearly and definitely expressed that no elector can have the slightest difficulty in determining just where the Conservatives are at.

THE initial number of the Phoenix News is a healthy looking sheet. The advertising pages tell a story of liberal patronage on the part of the enterprising merchants of Phoenix. The news columns are full of interesting information appertaining to the mines. The News is sure to take a leading place among the bright weeklies of the interior.

WHAT a wonderful advertising agent Paul Johnson would have made! He has the knack of saying just the right things at the right time. The interview in the Rossland Miner, copied elsewhere, is full of interesting information regarding the big smelter. Mr. Johnson never fails to say a good word for Greenwood.

C. A. GREGG, of Victoria, was a delegate to the Conservative convention. Ye gods! What will a man not do with a normal temperature of 105?

THE Conservative platform is so erratic and illogical that the Midway delegate must have been appointed a committee of one to prepare it.

ACT I.—Put in water pipe. Act II—Remove earth of water pipe. Act III—Lower water pipe. Act IV—Borrow more money.

THE present street work is a monument to the impartialiaty of a man towards his political opponents.

GREENWOOD is the mining, smelting, banking, commercial, railway center of the Boundary Creek country.

Street Improvement.

To the Editor: Dear Sir—I respectfully ask space in your valuable paper for the following letter:

In regard to the street improvements, it seems to me that the money voted for that purpose has been injudiciously expended; when you take into consideration the fact that upon some streets money has been wantonly spent, notably, Greenwood and Copper streets, from Dundee to Deadwood street, whilst upon others there has not been one dollar used for improvements, one instance is Silver street, from Dundee to Deadwood, which portion the street committee have deliberately overlooked, and which is an almost impassable condition for travel, owing to the large stones and boulders with which portions of it are covered, and everything seems to look as if there would be nothing done this season.

Now it seems to me that it is high time to call a halt on this mode of procedure, whereby a few members of the street committee use, at their own discretion, all moneys voted by the people for improvements. As a remedy, I would suggest, that when there is any more money to be raised for that purpose that the people request that an estimate of cost of improvements of each street be embodied in the by-law for that purpose, which would secure more fully, a measure of fairness to the ratepayers of the city. Thanking you for your valuable space, I am respectfully yours, A RATEPAYER.

THE REVIEW MINE.

MYERS CREEK LEADING PROPERTY

The Toronto World Man Visits the Property and Gives His Impressions—A True Fissure Vein—Development Work.

Frank D. L. Smith, mining editor of the Toronto World, visited the Review recently and described the property as follows:

"The lead upon which the company is working, like the other ledges in the same belt, runs nearly east and west, cutting the formation and being classed by experts as true fissure vein. The lode is remarkably strong and well defined deposit, having been traced on the surface for practically the entire length of two claims. A heavy "wash" of earth and gravel covers the lead for the most of the distance, but by means of several open cuts the outcrop of the ledge has been definitely proven for fully 1,000 feet, where it runs down over the face of the hill, upon which the company's two claims lie. The most westerly opening that is to say the one highest up the side hill, reveals the lead where it has an outcrop 12 feet in width. The other surface cuts make similar showings.

"The development done on the property consists of nearly 500 feet of drifting, crosscutting and sinking. The Review and Bird locations, lying as they do upon a steep incline, constitute a good tunnel proposition, and the management have taken advantage of this fact by driving a drift into their lead from a point half way down the height, thus attaining a depth on their ore body of 50 to 135 feet. This tunnel has now been driven 400 feet into the bowels of the hill, and it gives the owners of the property a good idea of main characteristics of their deposit, which stands up almost perpendicular with a dip of perhaps 8 or 10 degrees from the vertical, and is divided from the country rock by a perfect footwall, upon which there is every where a clear salvage of from one inch to several inches of soft, greasy talc. This wall is as clean and well defined as a board partition and the ore follows it uniformly the entire length of the tunnel, with one exception, where at a point 150 feet from the mouth of the working a dyke of country rock shuts off the ledge for 12 or 14 feet. This temporary obstruction once passed, however, the ore appears again on the foot wall and continues with varying width to the face of the tunnel, where the lead shows five feet of clean ore.

"In this tunnel the position of the hanging wall has not been so clearly demonstrated as has that of the footwall as just described. It is true that the south side of the tunnel follows a talc seam, but it has not been proven by any means that this salvage forms the limit of the vein in that direction. In fact, by means of a crosscut run at a point 250 feet from the mouth of the tunnel it has been shown that this talc salvage probably does not mark the hanging wall. This crosscut has been driven in a southerly direction from the tunnel for a distance of 41 feet, and it is in vein matter more or less all the way, with a high grade pay streak of quartz running through it. This proves that at point, at least, the ledge matter measures 46 feet across. No other crosscuts have been made to show whether the ledge possesses a similar width at other points along the tunnel, but this further development work will show.

"The management is now sinking a double compartment winze from a station cut out 260 feet in from the mouth of the tunnel. This winze will be sunk 100 feet, and from the level thus attained another crosscut will be made and drifts will be run both ways on the lead. It is also the company's policy to continue driving the present tunnel into the hill and later on to run in a second tunnel from the base of the hill, which will give a maximum depth of 440 to 500 feet on their deposit. This second tunnel will also, of course, be connected with the winze being sunk from the main tunnel.

"The Review management now have on their stock pile something like 1,000 tons of ore, and the quantity blocked out in the mine may be ascertained by calculating upon the basis of a 400-foot tunnel, giving a vertical depth of 50 to 135 feet on the ledge, the lateral dimensions of which have already been indicated.

"As to the ore from the Review mine, it may be classed as a regulation quartz, generally of a dark color, impregnated with carbonate of lime, and resembling Republic ore in appearance. It carries iron pyrites and some times shows free gold, visible to the naked eye. The company has not yet decided what method it will adopt in treating the rock.

"As to the values carried in the ore, I will not risk any personal statement but will quote an expert, who has tested it. Mr. E. J. Warren, M. E., of Camp McKinney, made a thorough series of tests of the ore from different parts of the ledge. Samples of the surface rock found in the outcrop at the top of the hill, according to Mr. Warren, ran 80 cents to the ton, and further assays showed that the values increased with depth. Two samples of rock from the face of the tunnel, 135 feet below ground, yielded returns of $132 and $16.40 respectively to the ton. The lead where it is 30 inches wide, at a point 40 feet from the mouth of the tunnel, gave $86, and 80 feet from the face the lead averaged $16, while 100 feet from the face it yielded $13.60. An eigth sample from the small quartz body in the crosscut above mentioned ran $80 per 2,000 pounds of rock.

"The company is contemplating equipping its property with a steam hoist and other machinery. It may be mentioned, by the way, that the Review deposit forms a very easily and cheaply worked proposition. The ground is very soft and three or four feet a day can be readily made on it by hand drill. The fact that the C. P. R. line to Penticton will run within three or four miles of the property is a circumstance in its favor."

Association Football.

On Saturday afternoon, October 7, the first football game ever played in the Boundary Creek district, came off on the Greenwood ball grounds. There was a little rain falling, but not enough to dampen the enthusiasts of the lovers of the game who turned out to the number of 14.

Rev. Balderston had the honor of kicking the first goal. Several pretty plays occurred during the afternoon which showed that there is good material in the district. The sides were as follows:

No. 1—Chesterton, Capt.; Smith, goal; Shaw, Grey, Meyer, McGowan and Mortimer.

No. 2.—Palmer, Capt.; Robertson, goal; Lewin, Coulter, Paget, Balderston and Hill.

Next Saturday afternoon another game will be played, weather permitting. Saints vs. Town. Those willing to play for the town will please send their names in to Ed. Mortimer at Bealey & Co.'s office.

An attraction of a singular order of merit, will be presented in the spacious room in the "New George (brick) block," next Monday evening, 16th instant, Prof. Ferguson's wonderful and unique performance upon the Violin. You have never heard anything similar to it whatever.

THE STOCK MARKET.

Good Demand For Stock in Local Companies During the Week.

The local stock market was active during the week. There was good demand for Morrison, Rathmullen, Winnipeg and Oro Denoro. Winnipeg was particulary sought after and some shares changed hands at 31. Below are the current quotations:

B. C. M. & M. Co.	$ .07½
Brandon and Golden Crown	.30

Mr. Paul Johnson.

Mr. Paul Johnson of the British Columbia Copper company, limited, arrived in the city yesterday from Greenwood. He came for the purpose of interviewing Mr. Tye at Trail, and will pass the day there today. In relation to the smelter which his company is erecting at Greenwood, he said:

"On the start we will erect a 300-ton copper smelter, and this will be enlarged so that the daily capacity will be 1,800 tons. The plant will be so arranged that there will be room for six furnaces of 300 tons capacity each. We have an ideal smelter site for the reason that the ore as it comes from the mines can be handled by gravitation, and this, of course, cuts dow expenses. The ore will first be dumped into stock bins. From these it will be taken to the sample mill, and there with mechanical samplers it will be sampled. From the samples the portion of the ore which is not necessary for sampling will be taken by gravity to the bins and mixed for the smelting operations. From here it will fall into cars and be taken direct to the furnaces, into which it will be fed. Then the slag is drawn off and taken to the dump. The matte from big settlers will be tapped into ladles, and from these it will be poured into the convertors. From the convertor the blister copper will be poured into the steel molds, making ingots of copper, which will then be dumped out of the molds and be placed in railroad-cars for shipment to eastern markets.

"The excavations for the smelter are completed, office buildings have been erected and the men are now starting on the retaining walls. We are also going ahead preparing the labratory, office building, storehouse, etc. We expect to have the plant ready for operation early in April, and then we will commence to reduce the ores of that section. Besides smelting the output of the Mother Lode, we will reduce that of the 10 or 15 producing mines within a radius of four or five miles of Greenwood, and perhaps from properties which are farther away, provided we can secure their custom. The plant will be increased to a capacity sufficient to meet the output of ores in that vicinity, and I expect it will be very large.

"I have been pretty much all over the world, and the ore deposits in the Boundary Creek section are the largest that I have seen anywhere. The general impression formerly was that the ore bodies of Boundary were of too low a grade to be worked at a profit. They have, however, steadily improved with depth, and there have been some important high grade finds made recently, and these have demonstrated beyond a peradventure that the ore is of a high enough grade to be mined and treated and to leave a large margin of profit.

"Take the Mother lode, for instance, the ore has improved considerably going down, and at the 200-foot level it will average 6 per cent copper and some $14 to $15 gold per ton. In the main shaft, at a depth of 262 feet, they have struck a large ore body of chalcopyrite that goes 30 per cent copper. The B. C. mine has on the dump several thousand tons of copper ore that will go from 10 to 18 per cent copper. The Morrison mine has crosscut an ore body over 80 feet in width, which runs high in copper. Mr. E. A. Bielenberg have discovered very large ore bodies bornite and chalcopyrite on four of his claims, which are located in Deadwood camp. The Winnipeg mine has very high grade ore going upwards of $80 in gold. The ore is pyrrhotite, similar in character to the ore of the Rossland camp. The Golden Crown has, within the past week, made a strike of very rich ore. Ross Thompson's company, the King Mining company, has had, perhaps, better luck than any of the rest, the railroad having cut through a ledge which is over 100 feet wide of very good copper ore. This is on the claim called the Oro Denoro. In the shaft on the Buckhorn mine they have recently struck almost pure copper pyrite. Most of these mines have ordered compressors and drills, and as soon as transportation facilities are given by the railway, they will commence mining in earnest and on a larger scale than at present.

"The general character of these diffierent copper ores when combined, seem to make a natural flux, as all carry besides the necessary amount of silica large quantities of lime spar and iron ore, so that they will smelt very easily without any extra trouble for the smelter man to figure out the smelting charges. In fact, the ores can be dumped just as they come from the mines into furnaces without and addition of lime or iron ore for fluxing.

"The C. P. R. has constructed to every mine of any consequence or importance, spur tracks. The railroad now is so far advanced that in another week the rails will be laid into Greenwood. I predict for Greenwood, that if any town will be able to rival Rossland it will be Greenwood. Besides the natural advantages, with the big mines all around, its inhabitants seem to be gifted with the same spirit and energy that characterizes Rossland, and which has given this city that distinction over all other towns in British Columbia, that I predict a very great future for Greenwood."

Mr. Johnson will leave to day for Trail for the purpose of interviewing Mr. Tye in reference to getting in side tracks to the smelter site at Greenwood. From there he will on Monday leave for Greenwood via the Columbia & Western railway. He is a very busy man at present.—Rossland Miner.

MINING NOTES.

Crosscutting has been started on the Oro Denoro, in Summit camp, at the 200-foot level. Good ore has been taken out of the shaft all the way down. Crosscutting will be continued until the walls are reached.

The ore in the winze of the Review claim, Myers creek, is gving remarkable values. The winze is down 35 feet, giving a depth of 175 feet from the surface. A Chesaw assayer secured $448.61 in gold from ore in the winze, while Guess Bros., Greenwood, assayed the ore and gave $298.28 as the value.

Chas. Brown and J. Mulligan are doing assessment on the Detroit, a claim located by them the past summer. A shaft 10 feet in depth has been sunk on a good body of copper-gold ore. The Detroit lies east of the Pheasant in Greenwood camp, and was first located in 1895, and relocated every year since, but no work was done on it until the present owners got possession of the claim. From the work done there are good prospects of the property turning out well.

John M. Connick, representing R. E. L. Brown syndicate, and Messrs. Pitcher and Marshall were in Greenwood on Tuesday, on their way to Spokane. The had just returned from the West Fork where Mr. Connick had been working the properties recenty bonded by his principles from Pitcher and Marshall. Mr. Connick stated that the hill upon which the Washington, Idaho and Rambler are located is the most remarkable he ever saw. The seven-foot ledge runs through seven claims, and whenever opened up gives the same high values. An open cut has been run on the Rambler, near the Washington, and on the Washington lead. The following values were received: Gold, $23; silver 3 ounces and lead 20 per cent. Quarters have been built for the men and everything is in shape to do a large amount of development work this winter. Sixteen men will be employed on the different properties. A 9x7 shaft will be sunk on the Washington. Messrs. Kennedy and Gorman West have opened up the same lead on the Standard and Black Diamond claims, Robert Wood's property, the Sally, has also the same ledge. It has been stripped on this claim for some distance.

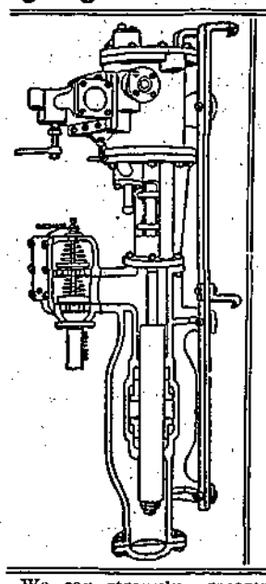
VERTCIAL SINKING PUMPS



For Mine Duties

We can strongly recommend this Pump to those requiring its special type. The extreme convenience of the outside packed form enables it to be readily packed and taken up. The absence of the projecting valve gear etc. is a feature in avoiding breakages during hoisting and lowering in the confined space where these pumps are used. It is fitted with convenient suspending hooks and the piping arrangement takes up the least possible space. Mining superintendents and those interested in Mining Machinery would consult their interests by sending for catalogue and quotations before installing their plants. We manufacture Pumping Machinery for every conceivable duty.

PHOENIX BUSINESS HOUSES.

Buildings Already Erected and Under Construction.

The following is a list of houses already doing business in Phoenix, with dimensions of buildings and those in course of erection. The town of Phoenix is being built on three mineral claims—the Cimeron, owned by Geo. W. Rumberger; the Phoenix, the property of the Old Ironsides Mining company, and the New York, the local agent for which is Geo. E. Breakenridge. The Ironsides company have not yet placed their property on the market. Dominion avenue, is on the Cimeron claim:

The Wynkoop-Stephens company is the pioneer mercantile concern of Greenwood camp. Until about two months ago the business was conducted under the firm name of Wynkoop & Stephens, when a joint stock company was formed. The company have two stores, one at the Ironsides and the other at the corner of Dominion avenue and Phoenix street. The Ironsides, or main store, consists of a building 33 x 40, in which are the offices of the company and the dry goods, clothing and boot and shoe departments, and a building 28 x 82, two-story, the ground floor of which is used for hardware and groceries and the upper floor as a warehouse. In the rear of these buildings there is in course of construction a tin shop, 28 x 34 feet. The store on Dominion street is 16 x 24, but there is in course of construction a building 45 x 50. The Phoenix postoffice is kept in this building.

The Hunter-Kendrick company occupy a building 30 x 60, and have under construction a warehouse 12 x 50. The store is situated near the Wynkoop-Stephens company's place of business. A full line of dry goods, clothing, boots and shoes, hardware and miner's supplies is carried by this well known firm. The Phoenix branch is under the management of Mr. McNaughton.

Bourke & Co. occupy a building 30 x 40 feet, on Dominion avenue, as a general store. A part of the building is occupied by Thompson & Harber, as the Mint restaurant.

Morrin & Thompson, general merchants, have opened out in a building 24 x 40, two-story, on Dominion avenue. A part of the general store is occupied by Hughes & Co., as a real estate office.

A. P. McKenzie & Co., druggists and stationers, intend shortly to commence the erection of a store 16 x 30.

Smith & McRae, books and stationery, are building a store 24 x 50 on Dominion avenue.

The Ironsides hotel is 60 x 40 feet, two-story, with a kitchen 20 x 30 feet. The ground floor is divided into offices, wash rooms, and two dining rooms. The upper story contains 14 rooms. The building is owned by the Old Ironsides Mining company, but is under the management of Wynkoop & Stephens. No intoxicants are sold on the premises.

The Hotel Phoenix, owned and operated by Harry Nash, is situated on the corner of Dominion avenue and Phoenix street. The main building is 48 x 50 feet, two and half-story, with kitchen 18 x 20. The ground floor is divided into dining room, office, club rooms and bar. On the upper floor are 18 bed rooms. The building is heated by hot air.

Three new Hotels the Butte owned by McCreath & Co., the Imperial by Weeks & Hogan and an hotel owned by Ira W. Black will shortly be opened.

On the New York claim a large hotel has been built by the owners of that part of the Phoenix townsite. The building is 72 x 30, two-story, and is now open for business. The hotel is about 100 yards from the postoffice.

Vaughn & McInnes have erected a building 30 x 20, at the Ironsides, which is occupied by them as a butcher shop.

P. Burns & Co. will shortly open a butcher shop in their new building on Dominion avenue. The shop is 20 x 30 feet.

C. W. Greer has started a bakery on Phoenix street, near Dominion avenue. The building is 16 x 20.

Mueller Bros., formerly of the Columbia brewery, Rossland, have erected a substantial building and will shortly commence the brewing of beer.

Wm. Bennin is doing a general blacksmithing business in a building 20 x 30, on Dominion avenue.

Jos. Hedges has for some time conducted a livery and feed barn on Phoenix street. He contemplates erecting larger buildings in the near futuue.

Besides the business enumerated there are three barber shops, a shoemaker shop, and a bath room.

Mullen & Pierce, building 20 x 30, two-story, carry cigars, soft drinks, stationery, fruits, etc.

W. Twist will open his cigar store and billard parlors, adjoining the Hunter-Kendrick store, today. The building is 24 x 40.

Geo. Murphy is building a livery barn, 24 x 40 feet, on Dominion avenue.

Paul Fischer, for a considerable time connected with the Greenwood bottling works, has opened a bottling works on Dominion avenue. The building is 24 x 40.

Miller Bros., druggists and jewelers, 24 x 36, with basement; Martin Bros., of Rossland, hardware, building 25 x 50; W. H. Wolverton, general merchant, 24 x 40; W. H. Bell, hotel, 30 x 50, two-story; E. C. Keith, real estate and mining, 20 x 24. These buildings are all under way and will be finished as fast as the sawmill turns out lumber.—Phoenix News.

The Marshall.

McNulty and Bresnahan are doing assessment work on the Marshall, one of a group of five claims owned by them and lying north of the New York and Brooklyn. There are two leads on the Marshall, running from 7 to 12 feet in width on the surface. A large amount of surface crosscutting has been done, and two shafts sunk—one 9 and the other 10 feet in depth. The ore is copper-gold, running from $15 to $36 all values. In the group are the Marshall, Little Burne, Little Annie, Little Brown and Brandon.—Phoenix News.

Camp McKinney.

Thos. Graham one of the original owners and a large shareholder in the Waterloo company, Camp McKinney, was in the city last week. Mr. Graham reports that Camp McKinney is quite active and properties are being steadily developed with good results. On the Waterloo the 5-stamp mill be ready in about ten days. The Waterloo never looked better. The shaft is down 85 feet. At 65 feet the drilt runs in a 6 foot ledge of ore that gave average mill tests of $37 in gold. On the Fontenoy and Wiarton a large amount of work is being done. The Wiarton has struck the Waterloo ledge. The Cariboo is of course turning out dividends as regularly as ever. The Minnehaha mill is being hauled in from Penticton. The hoisting plant for the sailor is on the ground and a hoisting plant is now on the way for the Kamloops. Harry Howson agent for the William Hamilton company has sold a 5-stamp mill to the Lemon Mining company. The Granit mill is running steadily. In fact Camp McKinney has never been more active.

RENDELL & CO.

GREENWOOD AND DISTRICT.

James Kerr has returned from a trip to Spokane and Seattle.

Blood and liver pudding like mother used to make at Burns' meat market.

A. E. Michaels superintendent of Corbin telegraph system was in the city this week.

A. H. Wallbridge of National cash register fame was booking orders in the city this week.

Paul Johnson and F. J. Finucane returned from the Kootenay country on Saturday last.

The furniture for the Leland house is expected here shortly. The house will be opened about Nov. 1.

Graham & Parry's new hotel has been commenced. It will be a large three story building which will cost $20,000.

Baltimore oysters always on hand at Burns' meat market.

M. E. Frazee has now a handsome delivery wagon and a still handsomer horse. Bread and groceries will be delivered to all parts of the city.

Wm. Young formerly of San Francisco and Portland has accepted a position with the Queen Cigar Co., of Rossland and Greenwood.

Chas. Hinckley, alias A. S. Morris, was released in Rossland the other day. Judge Forin held that the extradition law would not cover the case.

Owing to his municipal work occupying the whole of his time G. B. Taylor has resigned the position of deputy sheriff. His successor is F. M. Elkins.

Hewitt Bostock, M. P., and Hon. Sidney Fisher, minister of agriculture, will visit Greenwood in a few days and will probably address a public meeting here.

L. M. Rice and P. Welch the well known railway men have returned. Mr. Rice has been to the coast, while Mr. Welch was east to New York and Washington.

Prof. Ferguson, greatest of all specialty artists upon the Violin, at the George block, next Monday evening, 16th. Prices 50 and 25—Reserved seats 75. At the door only.

The first annual meeting of the Greenwood Steam Laundry company will be held in the Bealey company's office next Wednesday evening at eight o'clock. Officers will be elected.

Mrs. Foreman's friends will be pleased to learn that her father, whom she has not seen for twenty years, has written favorable news of his valuable mining properties in southern Utah.

Miss Isabel F. Kerr of Toronto a humorous and dramatic leader will appear in the Methodist church Greenwood on the evening of October 18th. Miss Kerr will be assisted by local talent.

A miner at the Rathmullen accidentally run the sharp point of a miner's candle stick into his lung while ascending the shaft. Dr. Oppenhemier brought him to the city where he is recovering.

D. McMillan and S. Harris are building near Graham & Perry's new hotel on Copper street. The will engage in business as soon as the building is erected. Mr. McMillan has been at Camp McKinney during the summer.

J. Defresne a Nelson mining man is in the city.

Get your weinerworst and Frankfurters at Burns' meat market.

W. L. Hogg has arrived from Montreal and will spend a week in the district.

The Greenwood Club gives a ball in the club room on the evening of Tuesday October 17th.

A. A. Sanderman and Jas. Young two well known Montreal commercial men were in the city this week.

Dried beef smoked as good as the best at Burns' meat market.

The meeting of the carpenters held on Thursday evening was largely attended. A local union was formed. They decided upon $4 for a nine-hour day. This rate goes into effect after November 1st.

R. Young, Winnipeg, general manager and J. B. Ferguson, Victoria, B. C., agent of the Western Life Association were in the city this week. Mr. Young is a heavy shareholder in the Golden Crown.

Ralph Smailes returned on Thursday accompanied by Mrs. Smailes and family whom he met at Robson. Mr. Smailes states that the amount of freight at Robson is simply enormous. Car after car is there awaiting transport to the Boundary country.

A. G. Buck of Sherebrook, Que., will reside in Greenwood in the future, Mr. Buck is a son of F. P. Buck who is largely interested in mining ventures in the Boundary country. Mr. A. G. Buck will manage the companies controlled by his father.

If the people could but properly apprehend or understand the nature or merit of Prof. Ferguson's specialty performance upon the Violin he would be greeted by a large attendance on the occasion of his appearance here next Monday evening.

Eugene Stubbs whose name was associated with the Columbia hotel fire during the preliminary trial of Cameron and Mullen, was arrested at Eholt on Tuesday by Officer Dinsmore of Grand Forks. Stubbs had been travelling in the States but returned to B. C. a few days ago. Cameron in his evidence stated that Stubbs was the man who actually set the fire. Stubbs maintains his innocence and has witnesses to swear that he slept in Phoenix on the night of the Columbia fire.

Ed. Shears of Phoenix started in to celebrate the Dewey victory on his own account. His wife not relishing the celebration expressed her disapproval. This enraged Shears and he chased her into the Phoenix school with a double barrled gun. Shears succeeded in throughly alarming the pupils and teacher. He was quite sober and repentant next day when he appeared before Police Magistrate Hallett who gave him some good advice relative to carrying firearms while on a jag.

W. F. Tye chief engineer for the Columbia & Western and A. C. Dennis assistant engineer were in the city this week. Mr. Tye visited the smelter site with a view to ascertaining the best means of running a spur to the ore bins. He announces a change in the time table from Grand Forks. In order that Greenwood passengers may catch the train there on the same day, it will leave at 12:20 p. m., instead of in the morning. Passenger trains will not be run to Greenwood until the road is completed but passengers will be carried on the work train in a few days.

Try our pressed corn beef. Burns' meat market.

Every Friday evening the series of cotillion parties at Mrs. Foreman's school. Near the postoffice.

D. D. McLaren, of Carson, was in the city this week, having just returned from the Similkameen.

D. A. Matheson, formerly of Cascade, has charge of the school which was recently opened at Phoenix.

J. F. and Mrs. Hemenway are enjoying the Spokane fruit fair.

Thos. McAuley of Midway has returned from the Spokane Fruit Fair. He also visited his mining properties near Northport.

Fresh pork sausage daily at Burns meat market.

Geo. R. Naden and W. F. Smith, of Smith & McRae, have gone to Keremeos.

AFTER MANY YEARS

RAILWAY AT LAST IN SIGHT.

The Welcome Whistle of the Railway Engine Heard in Greenwood—Track is Laid to the Outskirts of the City.

After years' of very patient waiting, after the hopes deferred that made the heart sick, after numerous promises made only to be broken, after laws that were more honored in the breach than the observance, the welcome whistle of the railway engine is at last heard in Greenwood The track is laid to the big trestle above the brewery and will reach the station here early next week. As the government inspector must examine the road before it is taken over by the Canadian Pacific Railway company, no passenger cars will be run until the railway is completed, which ought to be in about 10 days. Good progress has been made with tracklaying from Phoenix, the only delay having been occasioned by lack of steel.

The city council are making an effort to build the street to the railway station. The bridge across Boundary creek is nearly completed and Louisa street is being graded.

Eholt is a lively place these days on account of the large amount of freight which has arrived there for Greenwood. Next week freight will be forwarded to Greenwood.

The C. P. R. company intend laying the steel on all the branch lines this winter. The Deadwood camp grade is completed, but considerable work has yet to be done on the Wellington-Greenwood camp branch.

The Greenwood gentlemen who contributed $45 a piece to W. L. Hogg's exchequer were out just 45 days—a dollar a day.

WANTED

We want empty tables and a drawer full of cash.

We want to say Good-bye every day this month to some of our Overcoats, Ulsters, and Winter Suits.

We want to impress upon you that we can give you more for your money than you ever got before.

THE MINERS' BALL.

A Large Number Present and an Enjoyable Evening Spent.

On Monday evening last the Phoenix Miners' union, W. F. M., held their first ball, the object of which was to defray in part the expense of erecting a new hall in Phoenix. The dance was held in the Imperial hotel, the splendid new building just completed for Weeks & Hogan.

The ball room was handsomely decorated with bunting and evergreens. The Union Jack and Stars and Stripes were grouped together in prominent positions, while around the room were hung Canadian, Scotch, Irish, French and German flags, showing the cosmopolitan character of the local miners' union.

The ball was opened with the grand march at 9 o'clock. There were a large number present and dancing was kept up until 3 o'clock in the morning. At 12 o'clock an excellent supper was served in the dining room of the Butte.
