PUBLISHED WEEKLY IN THE INTERESTS OF THE BOUNDARY CREEK MINING DISTRICT.

Vol. VII. GREENWOOD, B. C., SATURDAY, SEPTEMBER 16, 1899, No. 1.

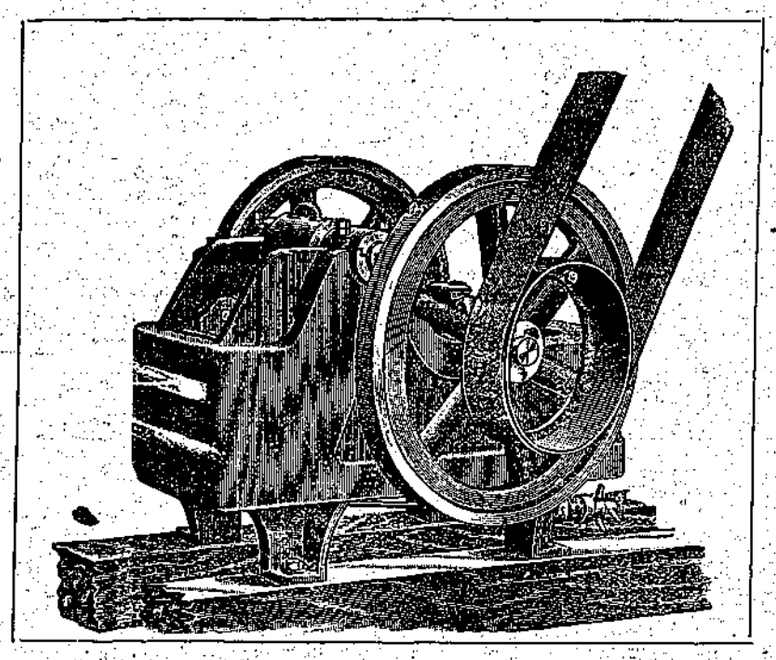
The Wm. Hamilton Manufacturing Co. Ltd.

BUILDERS OF

MODERN MACHINERY. MINING

Contractors for the design and construction of complete Stamp Mills, Concentration, Chlorination, Cyanide and Smelter Equipments.

Sole Agents for British Columbia for John Bertram & Sons' Iron Working Machinery, MacGregor, Gourlay Co.'s Wood Working Machinery.



Sole Agents for British Columbia for R. Hoe & Co.'s Celebrated Inserted Tooth Saws, M. Beatty & Sons' Dredging Machinery.

Head Office and Works: PETERBORO, ONT.

Branch Offices: Vancouver, B. C., Rossland, B. C., And Greenwood, B.C. HARRY HOWSON, Agent.

Put up in 400 Barrels and 200 lbs. Sacks.

PORTLAND CEMENT.

Manufactured by the B. C. Portland Cement Co. at Vancouver and guaranteed equal to any imported cement in the country

Agents for British Columbia
BOYD BURNS & Co. Vancouver, B.C
Wholesale Dealers in Plumbing and Engineering Supplies

HARRY HOWSON Local Agent GREENWOOD, B. C.

Used Largely by C.P.R. and by Contractors Generally.

THE STOCK MARKET.

LOCAL SHARES IN GOOD DEMAND.

Boundary Creek M. & M. Co's Stock Gone up. Other Local Shares. The Lottie F. Mining Notes.

Local stocks are again in good demand and the brokers are wearing a happier smile consequent upon the arrival of better times in their business. The development of the Gold Bug and the shipment of rich ore from this property has attracted considerable attention to the Boundary Creek Mining & Milling company's stock. Several blocks have changed hands locally at eight cents and there is a good demand at this figure. Most local holders of this stock are holding it expecting them to go up shortly. Winnipeg is quoted locally at 30 cents but is difficult to secure at this figure and it has been sold as high as 34 cents. Another stock which has gone up is that of the Morrison company. The shares in this company went down with the slump a couple of months ago but is now up to 18 cents. The shares which are selling locally are quoted as follows:

Boundary Creek M. & M.	08
Winnipeg	30
Brandon & Golden Crown	29
Rathmullen	8
King Company (Oro Denoro)	25
Morrison	18
Waterloo	10½
Minnehaha	15
Okanagan Free Gold	15

The Pathfinder mine on the North Fork is looking better ever day. The tunnel driven at a depth of 85 feet on No. 3 ledge is not a crosscut, but really a drift. It is now in 142 feet, and is in ore all the way except for a distance of 35 feet. The end is now directly underneath the big surface cut. From the former point a crosscut was started to crosscut the ledge in order to determine the width of the ore at that depth. The crosscut is now in 16 feet of ore, and has not yet struck the hanging wall. Seven feet was driven this week. The drift will also be extended further. A main working double compartment shaft was started on Tuesday. It is not expected that it will strike the ledge until the 400-foot level is reached. Crosscuts will be driven from intervening levels to the ore body. Recent assays give average values of $6.40 to $12 in gold, and from 3½ to 6 per cent. copper. At the face of the crosscut in No. 3 ledge assays as high as $41.20 in gold and 2½ per cent. copper were obtained.

Work on the Humming Bird on the north fork of Kettle river, in the Boundary, was resumed last week. J. J. McCauley of Rossland, who formerly had charge of the Snowshoe mine in Greenwood camp, will be the new superintendent in place of Alex J. McMillan, who resigned in order to attend to his private business. Eleven men will be employed. It is proposed to sink a winze in the drift for the purpose of determining the extent of the ore body. The drift is in 105 feet and starts from a point 30 feet above the road way, a short distance from the Kettle river. When the ledge is properly explored a tunnel at the base of the hill may be run in to strike it.

Some of the old time prospectors must look to their laurels unless the railway contractors cease opening up big bodies of ore. The railway work has opened up several large bodies of ore, to which reference has already been made. The latest big strike is on the Snowshoe. Last week the branch line cut through a 70-foot vein of ore to the south of the present shaft. The vein can be traced for a distance of 700 feet. The ore is very rich chalcopyrite, giving high gold and copper values. It is as pretty ore as can be found anywhere in the district and large specimens have been received for the Spokane fruit fair.

Alex Sharpe, superintendent of the Boundary Creek Mining and Milling company's properties, is making arrangements to construct an aerial tramway from the Gold Bug to the railway. As soon as this is completed regular shipments will be made from the mine. Already a ton of high grade ore has been sent to the Trail smelter. The shaft on the Gold Bug is down 80 feet.

Ald. Cameron returned on Tuesday from the Lottie F., up the main Kettle fiver, bringing with him several samples of ore. There are four men at work on the Lottie F. Development work is exposing a large body of ore. The development of the Lottie F. will be watched with interest as it appears to contain an extraordinarily large body of rich copper ore.

An error crept into the article on the Review company, published in this column last week. The capitalization is $375,000 not $500,000, there being only 1,500,00 twenty-five cent shares. This does not affect the treasury which contains 500,000 shares.

F. P. Buck, of Sherbrooke, Quebec, is incorporating a company to acquire the Lulo in Greenwood camp, a property acquired by him during his visit here.

The secretary of the board of trade has received a telegram from B. T. A. Bell, secretary of the mining institute, regretting the inability of the members to visit Boundary Creek.

Artistic Wall Decorations.

There is not a leaf colored by the magic touch of autumn that gives the forest more beautiful effects than the same colors blended by the hand of an artist have given to our fall stock of Wall Papers. We offer the greatest variety of patterns at the very lowest prices. We would especially call your attention to our extensive line of ingrains.

SMITH & McRAE,

Books, Stationery, Office Supplies, Etc.

STEAM LAUNDRY.

Will Be in Operation in a Very Short Time—Plant is Ordered.

Greenwood will have a steam laundry in a short time. A company is being incorporated and the plant has already been ordered. A meeting of those interested was held in Bealy company's office on Wednesday last. The following provisional directors were elected: A. T. Kendrick, G. H. Collins, J. H. Macfarlane, W. M. Law, W. L. C. Gordon. Geo. R. Naden was appointed treasurer and E. H. Mortimer secretary. The capital of the company is $5,000, divided into 10,000 fifty cent shares.

MIDWAY NOTES.

Mr. Deans, of Eholt, was down on Tuesday.

Messrs. Fred McLain and J. Tuzo are up the river on a hunting trip.

J. Milton Martin, of the Crystal Butte, Myers creek, was in town last week.

James Atwood has gone to Summit camp to do assessment work on the Wake and other claims.

Mr. Crowell has gone over to Cascade for a few days. He expects to move his family here shortly.

Mr. Casson, United States government agent for allotment of Indian lands, passed through last week on his way to Chesaw.

Messrs. C. O'Brien Reddin and J. Donald of the Columbia Telephone company, were through on Wednesday on a tour of inspection.

J. A. McLellan, of the Seattle Post-Intelligencer, was in town Wednesday.

J. O. Norbom left for Seattle, via Vancouver, on Saturday.

The Corbin telegraph line will be completed to Midway in a few days. They will open their office in the building next to the butcher shop.

New Clergyman.

Rev. W. Robins, B. A., curate of St. Mary Redcliffe, Bristol, has been offered the charge of the Church of England mission in Greenwood. Mr. Robins is a nephew of Dr. Gott, bishop of Truro, and a son of a well known clergyman of Cheshire. He is about 30 years of age and unmarried. Bishop Gott says of him: "He is exceptionally devout, energetic and gifted in parish work of all kinds, a good preacher and is very successful in dealing with men." Mr. Robbins is expected to arrive shortly, but the exact date is not known. Archdeacon Pentreath will visit Greenwood the end of this month to confer with the members of the Church of England on church matters.

Lead Smelting Bonus.

An Ottawa dispatch says: Mr. W. G. Parmelee, deputy minister of trade and commerce, left today for the Pacific coast, to inspect the books of the smelters. In 1896 parliament authorized a bonus of $150,000 to assist the smelting in British Columbia of silver-lead ores, there being three smelter then in existence. The terms of the bonus provided for the payment of not more than 50 cents per ton, and the total subvention was divided over five years, at the rate of $30,000 per year. As the term of the bonus has nearly expired, the department considers it advisable to have the accounts of the companies examined.

Provincial Politics.

Reverting then to provincial affairs, Hon. Mr. Cotton who visited Rossland, said there was not the slightest chance of a dissolution this fall and that the legislature would meet on the 4th of January next with a clear majority of two, that was assured for the government, and it was expected that this would be increased. The only defections the government had were Hon. Joseph Martin and Hon. D. W. Higgins, and in travelling through the country he had found that the leaving of the former out of the government had been one of the most popular moves ever made by a government, while the cause of the latter's defection was well known.

As to the eight-hour law Mr. Cotton said that had come to stay and the history of all legislation of this class made it evident that there was never a retrograde from a movement of this kind. He thought eight hours was long enough for any man to work underground, and he was well aware that there was no trouble in Rossland on account of the passage of the law, but the people in whose interest it had been passed might be well assured that the law had come to stay.—Rossland Record.

The Diamond Hitch.

A great strike is reported on the Diamond Hitch claim, about 15 miles from Grand Forks. Frank Stonechest, who has been employed on the property for the past year, was in Spokane with news of the discovery, says the Spokesman-Review. In sinking a winze at the tunnel face after tunneling on the vein for 30 feet, rich ore was encountered at a depth of about 12 feet from the tunnel floor. Mr. Stonechest reports three assays of $84, $601 and $673, and says there is a streak of six or eight inches which shows values of over $600, while the $84 was an average assay across the foot of the winze.

The Diamond Hitch and Mammoth are adjoining claims, and last spring they were consolidated and a company was formed to operate them. Evan Eans was the principal owner of the Mammoth and S. F. Ralston owned the Diamond Aitch. The consolidation made the development of the two claims as one mine easy of accomplishment. The properties have long been famous for their surface sqowings, and development is proving them far richer than their owners ever believed.

"The properties have been under development all summer," said Mr. Stonechest. "About 200 feet of work has been done on the Mammoth. This consists of shafts and inclines on a vein which is north and south. It has been prospected for a length of 250 feet, and shows up favorably.

"On the Diamond Hitch we have a shaft down 50 feet, and a 12-foot crosscut was made from the foot of the shaft which has shown up eight feet of ore assaying $16 per ton on an average. We have about 60 tons of this on the dump. The ore is like that of Rossland camp. It is a quartz matrix, with pyrrhoite, and carries but little copper. The vein has been practically proven for a distance of 200 feet by trenches, crosscuts and prospect shafts. Two hundred feet east of the shaft we started a tunnel on the vein and ran it 30 feet. In the face we had three feet of ore which assayed $30 per ton, and and at that point we started a winze. After sinking this 12 feet we came into the bonanza values. I sampled the vein across the bottom of the winze and the return was $48 in gold. Two hand samples showed $601 and $673, respectively. To pick a sample is impossible, as the ore does not carry the visible indication of its value. It is the typical Rossland ore. There is, however, a streak of about eight inches in which high values are found.

"Water has bothered us so much in both the shaft and winze that work has been progressing slowly. The company has ordered extensive machinery, and it will be installed as soon as the railroad can transport it. The plant will comprise a pump, hoist and a small compressor. When this is in place there will be good news from the property, that is certain. It has all the indications of making a great mine.

"The Diamond Hitch, Mammoth, Bertha and War Cloud and adjoining properties in the order named. On the Bertha a 400-foot cross-cut tunnel is being driven to tap the ore at a depth of 300 feet. Favorable progress is being made. On the War Cloud, which is owned by a Spokane company, work is progressing nicely, and the showing is three to four feet of fine ore with important showing with every foot of progress."—Grand Forks Miner.

A Spokane paper says: "The number of miners employed in the Boundary country today reaches about 3,290. The figures, of course, are only approximate. This small army of toilers is earning in wages monthly an amount exceeding $315,000."

ORO DENORO MINE.

BIG SHOWINGS OF COPPER ORE.

Railway Construction Uncovered a Monster Ledge—Copper Ore Found Everywhere—The Development Work.

W. A. Corbett, the locator of the Oro Denoro, in Summit camp, always believed that he was the owner of a big property, but he scarcely imagined that the hill upon which it is situated was a veritable treasure vault or it is hardly probable that he would have transferred the property to the King Mining company. The development work by the company and the exposure made by the contractors for the branch from Eholt to Greenwood camp have demonstrated the fact that the hill contains copper of high values. The branch line skirts around the hill on its way to Greenwood camp. For fully 300 feet along the side, the work exposed copper ore that assays 20 to 25 per cent copper. Development work is necessary to demonstrate the character of this enormous body. It is supposed, however, that it contains three parallel ledges that run back through the hill. This body of ore is one of the largest in the district. It possesses the additional merit of giving exceedingly high copper values. Railway workmen are busy throwing tons of high grade copper over the side and carting it away to make "fills" in the roadbed. A few tons have been saved and piled along side the railway. The rich pyritic ore glistens in the sunlight and speedily attracts the attention of the passerby, who cannot but be impressed with this new method of exploring ore bodies.

The writer visited the Oro Denoro a few days ago. He found the work of development being pushed under the direction of David O'Neill. At the very summit of the hill has been erected a commodious shaft house in which has been installed an engine and hoist. The shaft which is an exceptionally good one is down 180 feet. In 20 days Mr. O'Neill expects to have the shaft down 225 feet when crosscutting will begin. Then the actual value of the Oro Denoro will be clearly demonstrated. The shaft, like short tunnels, open cuts and everything else on the Oro Denoro, is in ore. The crosscut must surely encounter zones or ledges, or veins of ore which are exposed on the surface.

The Oro Denoro will have every facility for shipping ore. The railway passes around the rather precipitous hill, about 100 feet below the top where the shaft-house is situated, thus affording a good a economic dump.

The Oro Denoro is at present owned by the King Mining company, limited. The property was first bonded by Ross Thompson, of Rossland. The King company was then incorporated and the Oro Denoro transfeered. Its capitalization is $2,000,000 divided into thn same number of shares. Of this amount 500,000 shares were placed in the treasury. The officers include Geo. R. Maxwell, M. P., president; vice-president and manager, Ross Thompson; secretary, Angus McNish, and Smith Curtis and Alex. J. McMillan are on the directorate. The shares have gone up rapidly and are in good demand. Waldmar Wallach is at present in Scotland where shares in the company are being purchased at 35 cents. Locally shares have sold for this figure, although small lots are being exchanged at 29 and 30 cents. No one could visit the Oro Denoro and not come away convinced that the shares are a "good buy" at this figure. The visitor will come to the conclusion that the Oro Denoro must make a big mine and consequently shares will increase in value as development proceeds.

Adjacent to the Oro Denoro is the Emma claim which also has been forced into fame by the operations of the railway builders. Indeed, the irrepressible newspaper man, writing from Tacoma, has added a few millions to Mackenzie & Mann's wealth, because a ledge on the property has been cut by the railway. The railway grade cuts through the vein for a distance of 60 feet. The ore is rich looking iron, containing copper pyrites. It should assay high in copper. The Emma is owned by the Mackenzie-Mann syndicate and W. T. Smith, of this city.

W. A. CARLYLE GOING TO SPAIN.

Will Manage the Famous Rio Tinto Copper Mines.

Mr. W. A. Carlyle, at present general superintendent of the properties of the British America Corporation in Rossland, has received the appointment of manager of the historic Rio Tinto copper mines in Spain.

No other Canadian has attained such prominence as a mining expert as has been given to Mr. Carlyle by his connection with the B. A. C. and the success which has attained his operations for that company, and the appointment offered him is in itself an evidence that as a mine manager he is in the very front rank.

Great as the responsibility of his present position is, it can hardly compare in any degree with that which he is about to undertake, the Rio Tinto being the largest mine of any description in the world, though it ranks only third in the list of copper producers, being surpassed by the Anaconda of Montana, and Calumet-Hecla of Lake Superior.

The Rio Tinto, which is situated in the province of Auelva, in the south of Spain, at present employs 14,000 men, from which it will be seen that it is operated on a very extensive scale, yet though it has been worked from time immemorial, and it is the oldest mine now yielding ore, it bids fair to remain one of the greatest copper-producing mines for centuries to come. Over 2,000 years ago, long before those cunning miners, the Phoenicians, secured the mine, leaving behind them, as the result of their smelting operations, 20,000,000 tons of slag, good evidence that the production of the mine in bygone ages was enormous. These ancient miners left 180 miles of underground workings as evidence of their industry, or the industry of their slaves.

The ore body of the Rio Tinto, is undoubtedly the most wonderful in all the history of mining, in which history the mine has from the beginning played a leading part. Practically the only known limit to the ledge is its width, which is 1,000 feet. The ore is solid pyrites, carrying 2.8 per cent. copper. Last year the mine produced 1,500,000 tons of ore. Of this amount 800,000 tons were shipped and sold, the remainder being treated on the ground in the manner originated by the early workers. The ore is placed on large roast heaps, where, after being roasted it is allowed to leach, the copper running out in the form of copper sulphate, to be precipitated as metallic copper in large trenches filled with scrap iron. This system of treatment has been followed from time immemorial.

Last year the mine produced nearly 75,000,000 pounds of copper, and paid $4,500,000 in dividends. The amount of profit yielded during the life of the mine it is impossible to estimate, but it would certainly cover the national debt of every nation in Christendom. The estimated value of the mine at the present day may be told from the price of the stock, £5 shares being quoted on the market at over £40, which would make the market value of the property $90,000,000. The stock is held principally in England, Scotland and France, the Rothschilds and their associates holding the control.

Mr. Carlyle expects to assume his new position on January 1, but will not take charge of the Rio Tinto until April 1, as it will take him fully three months to familiarize himself with the property. He will hand over the charge of the B. A. C. properties to his successor, who has yet to be appointed, on December 1.

Mr. Carlyle's salary as manager of the Rio Tinto will, it is reported, be not leso than $25,000 a year.—Rossland Miner.

THE GOLCONDA GROUP.

Eastern Capitalists Secure a Promising Property in Smith's Camp.

The new Golconda company which is being incorporated to acquire the Golconda group, is capitalized for $1,500,000. Rufus Pope, M. P., is at the head of the company and strong financial men are interested with him. The group is owned by J. C. Haas, M. E., and Hon. Geo. E. Foster, ex-minister of finance. The group consists of the Golconda, Gold Bed, Wild Rose, Laocoon and York. They are situated on a hillside in Smith's camp about three miles from Greenwood. Throughout the properties runs a wide vein of iron pyrites in a silicious gangue.

The greater portion of the development work has been done on the Golconda claim. The vein is from three to eight feet wide. A 60-foot shaft has been sunk on the vein. The first 20 feet is in solid ore. To the south of the shaft, about 160 feet, is an open cut exposing the vein and there are two open cuts to the north of the shaft. There is also a tunnel about 75 feet in length along the vein. On the Gold Bed there is an immense showing of arsenicol iron which has been exposed by about 400 feet of open cuts. The ore carries, but little copper, but gold values average $45.

SATURDAY, SEPTEMBER 16, 1899.

WISDOM FROM MIDWAY.

PAUL JOHNSON blundered. Before giving expression to his views on the mineral resources of Boundary Creek he should have consulted the gentleman who is the editor of the Midway Advance and the Midway correspondent of the News-Advertiser. Mr. Johnson was certainly indiscret in not securing data from this gentleman before venturing to make a speech. He has had a long and successful experience in almost every mining country in the world, it is true, but still he could profit by lessons from Jacob. Had he consulted the Midway sage, he would have been furnished with an 1895 copy of the "Mineral Industry," and could make up-to-date comparisons. He would also have learned the possibilities of each property in the district and the exact number of tons that the mines can ship daily. Incidentally, Mr. Johnson could have ascertained the very best site for a smelter. He would also be relieved of the responsibility of figuring upon the capacity of the smelter or the kind of plant required to successfully treat Boundary Creek ores. Mr. Johnson is showing a great lack of judgment in not allowing the Midway man to do his thinking and acting for him. He would thereby escape hardwork and a great deal of responsibility. Mr. Johnson has still time to profit by the vast amount of wisdom that is gratuitously furnished by the gifted and versatile townsite agent, editor and newspaper correspondent. Let him read this week's Midway Advance or last Sunday's News-Advertiser and we feel confident that in the future all his actions will be governed by the suggestions of the Midway sage.

THAT STREET GRADE.

IT WAS amusing to watch Ald. Sutherland while Mayor Hardy was announcing the strong determination of the street committee to follow the profile irrespective of the damage caused to property in the city. Ald. Sutherland is not slow to denounce the folly of the work on Copper and Greenwood streets and doubtless he was praying for the power of a Demosthenes to repudiate the mayor's contention that the street committee are a unit in favor of the work. Unconsciously the mayor in his anxiety to place the responsibility on last year's street committee, condemns his own course. In his peculiar elegant language he tells the council that the work of last year and the grade were a disgrace to any committee on the continent. In the next breath he states that the street committee of which he is the head, are going to adopt the grade without the slightest variation! If the grade is a disgrace why should it be so religiously followed? Is it because it entails a great loss upon his municipal opponents?

Ald. Sutherland is naturally a man of common sense and good judgment. He allowed himself to be a voting machine to satisfy one man's egotism. He can redeem himself by taking the same sensible stand at the meetings of the council that he does in private.

UNBUSINESS-LIKE METHODS.

THE ratepayers themselves are much to blame for the useless expenditure of their money. Last year the Times strongly urged that the work be done according to the schedule furnished by the city engineer. This year, before the money by-laws were voted upon, the Times took the ground that a schedule of the contemplated work should be made part of the by-law. Had the ratepayers insisted upon this precaution, the council would be forced to spend the money where improvements are most needed and not on streets that have already been graded. There is nothing new about this suggestion. It is done in all cities where municipal affairs are conducted in a business way. The present haphazard method of spending money can result only in confusion. We venture to assert that not one member of the council has an accurate idea of the amount of money left for further improvements. Neither the street committee or finance committee have reported on the amount of work done or the cost of the same. They are apparently going ahead until the bank calls a halt.

THREE DOLLARS A DAY.

DURING the last municipal campaign there was a great deal of talking to the gallery. The rights of working men were championed, and the tyranny of employers denounced. Shortly after the election, those who really have the interests of the working men at heart and who believe in paying good wages without making a noise, were gratified to notice that the council declared in favor of $3 per day on all municipal work. Those who made the noise, however, have failed to carry out the the principle of good wages. Recently a contract was awarded for grading Center street. Some contractors put in tenders under the impression that the $3 a day rate was to be enforced. The tender was awarded to a contractor without any stipulation regarding the rate of wage, and men are being employed at a much less rate than $3 a day. If $3 per day is a fair rate of wage, it should be paid on all city work, irrespective of whether work is being done by contract or day labor. Workingmen ought to have learned ere this that their best friends are not those who make the most noise.

THE SEMLIN GOVERNMENT.

CERTAIN opposition papers are howling at the lieutenant-governor because he fails to dismiss the Semlin government. They base their arguments upon the assumption that Mr. Semlin does not command a majority of the legislature and that it was for this reason that the Turner government was dismissed. While their argument may be sound, the opposition papers do not inform the lieutenant-governor regarding the substitution for the Semlin government. The Semlin government is weak; the opposition is weaker. If a government be necessary it is good policy to keep the present one until material for another is available.

THE TRUNK ROADS.

THERE are four trunk roads connecting the mining camps with Greenwood. Within the city limits they are certainly in an almost impassable condition. Before the money is all misspent in the center of the city, aldermen who are not wedded to a certain grade, should insist that Government street is made passable to the Elkhorn brewery; Greenwood street graded from the reservoir; the road from Anaconda repaired, and also the road to Deadwood camp.

ONE engineer built the Greenwood street flume on street grade; another engineer gave the grade for Rendell's block; a third put in the hydrant at the corner of Copper and Greenwood streets. All three are on the same grade and all three are now eighteen inches above grade. Were the three engineers wrong or is there a "nigger in the wood pile?"

TRAINS ON MONDAY.

Passengers Will Be Brought in Every Other Day to Columbia.

Last week's Record stated that passenger trains would be running on the new railway into the Boundary in two weeks. This is literally true and was corroborated by Assistant Chief Engineer Sullivan and Superintendent of Construction Jack Stewart this morning. The following from Chief Engineer Tyle tells the story:

"We will take over the road from Robson to Grand Forks from the contractors some day next week, and run the first passenger train on Monday, the 18th. We will run from Robson to Grand Forks on Mondays, Wednesdays and Fridays, and from Grand Forks to Robson on Tuesday, Thurdays and Saturdays. Will make connections with the Crow's Nest Pass and Rossland trains. Time table to follow."

This, means, as stated in the last issue of the Record. that trains will leave Rossland and Nelson about 7 a. m., and on alternate days depart for Grand Forks also in the morning.

The Rossland Record of Thursday says that the rate from Rossland to Cascade City is $5.95, and $6.95 to Grand Forks, but it is probable that passengers will have to re-purchase tickets at Robson on account of the road not being turned over to the traffic department yet.

Next week some of the C. P. R. inspectors will go over the road as far as it is completed, after which it will be turned over to the operating department. There has been rumor of an excursion of Rossland and Nelson business men to the Boundary on the first passenger train, but this will be deferred, as the requisite rolling stock is not yet at hand.—Cascade Record.

GANG OF ITALIANS USE KNIVES.

But Fortunately No One Was Damaged Beyond Repair.

Last Monday night Officer Darrough gathered in a number of Italians who got mixed up in a cutting scrape near the railway bridge, over the gorge. Incidentally, in the melee, two or three of them were chopped up considerably, necessitating several stitches by the contractor's surgeon.

It appears that these sons of sunny Italy, some of whom bear the euphonious titles of Vestione Gallo, Frank Scalzo, S. Piccolo, Joe Garcia, etc., etc., were railway laborers, and had came down from the camp, a few miles west of town, to do some trading. On the return they got into a quarrel as to the wisdom of putting the hand-car on the track when a train was expected at any minute. Not agreeing, a general carving match followed, with the result as above stated.

Wednesday evening Justice of the Peace Rochussen heard the case and one of the men was fined $50.—Cascade Record.

News of the Rathmullen.

Mr. J. M. O'Toole of this city, who for the past four months has had personal charge of the development on the Rathmullen property, returned to Rossland on Sunday leaving Tom Burden in charge of the work. Mr. O'Toole said yesterday that for a while he would look after his own affairs and later on would return to the Rathmullen.

During the four months Mr. O'Toole has been in charge a great deal of work has been accomplished. A complete hoisting plant and a three-drill compressor has been installed, a 78-foot shaft has been sunk and a crosscut has been driven 85 feet from the bottom of the shaft cutting the ledge at 55 feet. Mr. O'Toole said yesterday that the ledge will show a width of from 20 to 25 feet. Twelve men are now engaged sinking the shaft to the 200-feet level and excellent progress is being made. The main work has been done on the Maple Leaf, but the company now owns a bunch of 16 claims and a considerable sum of money has been expended in prospecting all these claims under Mr. O'Toole's supervision. A good wagon road has been constructed from the C. P. R. line of railway up to the mine buildings erected on the Maple Leaf and trails have been cut from this point to all the other claims. The line of the Columbia & Western railway will very shortly be completed to the shipping point on the company's property, and the management state that it is their intention to commence the shipment of ore on the turn of the year.

J. K. Gill, superintendent of inland revenue, Victoria, J. E. Miller of the Vancouver office, and Hugh McCutcheon of Nakusp, arrived in the city Monday evening. Mr. McCutcheon succeeds A. K. Stuart as collector of inland revenue in the city. He will also be customs officer for here. Messrs. Gill and Miller left for home via Penticton on Tuesday.

Hare-Brained Scheme.

A Victoria special to the Nelson Tribune says: The latest hare-brained scheme of the political mugwumps represented by the Victoria Globe is to circulate a petition for the dismissal of the lieutenant-governor. The text of the petition has been published and fails to include any valid reason which might be urged. Meanwhile, the Vancouver News-Advertiser joins today in the denunciation of W. W. B. McInnes for his anarchistic preaching, and there are those who say that if McInnes, in turn, were to tell what he knows of Cotton's political plans something stirring might result. For instance, if it could be shown that Semlin and Cotton have recently repeated Turner's folly of inviting McInnes to join the cabinet the lieuentant-governor might be moved in self-defence to show his resentment of what would be called at attempt to improperly influence him. It is said that the lieutenant-governor is not impressed with the strength or popularity of his ministry, but is at a loss for a proper man to replace Semlin.

Free Miners' Certificate Fees.

The following scale will show the fees to be charged for free miners' certificates covering only a portion of the year: Certificates issued between June 1st and 18th, $5; between June 19th and July 6th, $4.75; between July 7th and 24th, $4.50; between 25th and August 11th, $4.25; between August 12th and 30th, $4; between August 31st and September 18th, $3.75; between September 19th and October 7th, $3.50; between October 8th and 26th, $3.25; between October 27th and November 14th, $3.00; between November 15th and December 2nd, $2.75; between December 3rd and 20th, $2.50; between December 21st and January 7th, $2.25; between January 8th and 25th, $2; between January 26th and February 12th, $1.75; between February 13th and March 2nd, $1.50; between March 3rd and 20th, $1.25; between March 21st and Ayril 7th, $1; between April 8th and 25th, 75 cents; between 26th and May 13th, 50 cents; between May 14th and 31st, 25 cents.

NOTICE

NOTICE is hereby given that I intend to apply to the board of license commissioners of the City of Greenwood at their first meeting after the expiration of thirty days, for a license to sell liquor by retail on the premises known as the Log Cabin Hotel, situate on Government street, near the city limits. CITY OF KEREMEOS.

THE METROPOLIS OF SMILKAMEEN

Has Been Placed on the Market—The Center of Rrich Agricultural District and Minior Properties of Great Promise.

Townsiting has become so prevalent in southern British Columbia that it is almost epidemic. Almost every piece of level country has been subdivided or is being reserved for townsite purposes. Many have no merit while others are sure to grow. A townsite is justifiable when it possesses those advantages that attract trade. If it is the natural center of a rich mining section or a rich agricultural section, it is sure to grow. Trade has a habit of following natural channels and the natural center is always the big business town of a district.

Keremeos, the latest town to be placed in the market, has both advantages. It is the center of 20,000 acres of the richest land in the province and in the hills on either side of the rich and beautiful valley are some of the largest mineral showings in the province.

Keremeos is situated on the Smilkameen river, at the mouth of Keremeos creek. It is 45 miles from Princeton and about 15 miles from the international boundary line. Then it is the natural point to which the mineowners of Twenty Mile creek, Keremeos creek, and Oolala creek will come to secure supplies and transact business. Considerable has already been written of the big and promising showings in the locality. Development work has uncovered big ledges of copper ore. There are also ledges of arenical iron giving high gold values, and on Keremeos creek, adjacent to the town, are two or three free-milling properties.

Keremeos townsite contains 160 acres, all level land. The land has been well subdivided. The main street is 100 feet wide and the lots have a 30-foot frontage. The townsite is owned by a syndicate, represented by Geo. R. Naden of Greenwood.

THE CITY COUNCIL.

Street Grades Provoke a Hot Discussion—Donations to Fair.

Mayor Hardy, Alds. Wood, Galloway, Sutherland and Beath were the members of the council present at the regular meeting on Monday evening. The city engineer reported having given grades for Fletcher's, Masonic, and Delsheimer's buildings, and the report was filed. Silver street residents petition the council to turn some of the money being spent in their direction. The matter was referred to the street committee. Several bills were referred to the financial committee.

The Standard Publishing company's request for $25 for 25 copies of the annual was refused.

Mr. Barnard will be informed that the council cannot make any reduction in taxes on account of the Windsor hotel ffre.

The building committee have accepted John Robertson's plans for the city hall. Work has already been started.

Ald. Galloway reported that Mr. Shaw was engaged in making a survey of the tramway from Greenwood to Phoenix.

The council decided to exempt the hospital grounds from taxation.

Alds. Galloway, Wood and Sutherland were appointed a committee to attend to scavenger matters.

Thos. Miller, Wm. Law and Jas. Kerr interviewed the council relative to securing money to defray the expenses of an exhibit to the Spokane fair. Mr. Miller made a strong talk in favor of a big vote, and the council decided to place $150 at the disposal of the committee.

Chief Henton urged the council to open an alley between Copper and Silver streets. He also reported that fire insurance companies had refused to donate anything towards the fund to purchase a hose wagon.

The meeting ended in a brilliant display of fire works. The principals being Mayor Hardy and Ald. Galloway. The mayor said: "We are going to call for tenders for sidewalks in a few days and want to lay a sidewalk on the north side of Greenwood street. Them people have a stone wall out on the street and it should be lowered to the street level. I want the council to take action."

Ald. Galloway: "The street committee decided far more important questions without asking the council. They might decide this also."

Mayor Hardy: "What more important questions did the street committee decide?"

Ald. Galloway: "Well, they decided to cut down the street to the present level without reference to the council."

Mayor Hardy: "I want to tell you and some of those calamity howlers that we are following a grade and are going to follow it. If last year's committee had done its duty there wouldn't be so much kicking now. The grade is, I say, a shame and disgrace to any street committee or engineer on the continent. The engineer is doing the work according to profile."

Ald. Galloway: "Why don't you remove the wall if its in the way of the grade. You moved the earth and boulders—you might move the wall as well."

The mayor: "We don't want to do that."

A motion to adjourn brought the discussion to a close.

BOARD OF TRADE.

Business Transacted at a Special General Meeting.

There was a large attendance at the special general meeting of the Greenwood board of trade, held in Rendell hall. Wm. Law and Mayor Hardy reported having had a conference with Messrs. McMullen and Crowhurst who were looking for a site for machine shops. The gentlemen did not accept a reasonable proposition made to them.

W. T. Smith, F. Keffer, J. H. Macfarlane and A. Fisher were elected members.

By-laws were passed, initation fee being fixed at $10, and quarterly dues at $2.50.

President Galloway reported the steps which had been taken in reference to the tramway to Phoenix. Some discussion ensued but action was deferred until the scheme assumed more tangible shape.

The board decided to send a good exhibit to the Spokane fruit fair. W. T. Smith was appointed to take charge of the exhibit and Messrs. Wm. Law, Thos. Miller and James Kerr were appointed a committee to collect $350 to defray the expenses. Suitable advertising literature will be sent with the exhibit. The secretary was authorized to collect initiation fee and pay outstanding bills.

Smith Curtis was in city for several days this week. He is as enthusiastic as ever about the Oro Denoro.

Mr. R. J. Bealey, senior member of the Bealey Investment and Trust company, and Mrs. A. La Chappelle, of Oregon City, were married at the Episcopal church, Portland, on the 6th inst. Mr. Bealey has a host of friends throughout the Kootenay and Boundary Creek who extend congratulations.

Dated this 13th day of July, 1899.

His Recent Trip.

Professor Harry Montgomery, of Trinity University Toronto, has almost concluded his inspection of the British Columbia Gold Fields. For the past two or three months the professor has been going over properties in the Slocan, Lillooet and the Boundary country. He came into this camp last week and has been busy since sorting and arranging the many samples which he secured. Some of these will be used for museum and laboratory purposes at Trinity but many of the samples have been obtained for assaying purposes at the request of the owners and will be used in making up the reports on the various properties. Mr. Montgomery will return to the Boundary Creek country on Thursday for a short visit to complete some of his work now in hand, and by October 1st he will be back at old Trinity taking up his usual course of lectures.

While a large field has been covered and many properties visited and sampled, the professor mentioned among the most interesting properties a group consisting of four claims, the Ample, Monarch, Gladstone and the Whale, situated in Lillooet, three miles from the Golden Cache, near the town of Lillooet.

There is now being completed a good wagon road from the main line of the Canadian Pacific railway to the properties in question, which will reduce the distance hitherto required to be travelled, from 80 to 45 miles. Cayuse river affords an abundant water power, and all the machinery of the Golden Cache is driven by this power, and there is plenty of unused power for the properties.

A potassium cynide mill, having a capacity of 50 tons daily, is now in course of erection, and will be completed and in running order before the winter sets in.

Concerning the four claims, the professor said that they contained a large body of arsenical gold bearing ore, 18 feet in width, having values from $8 to $50, and an average values from $12 to $14. The professor said that he traced this ore body on the surface through the properties for over 4,000 feet. "I was instructed," said the professor, "to obtain, if possible, a conservative estimate of the ore in sight on these four claims, and after considerable trouble I have done so. I am of the opinion that there is now in sight on these properties ore to the value of over $400,000, and I think my figures are within the mark."

About 10 men are now employed, and the owners are Mr. Chaplin, president of the Welland Vale compony of St. Catharines; Messrs. Fox and Ross of Toronto; and Mr. T. Hawley of Vancouver, the same parties who purchased the Golden Cache mine this past summer.

The Review, just over the line in Washington state, 15 to 18 miles southeast of Camp McKinney, near Rock creek, is another property the professor had examined closely. It contains a large body of free-milling ore, and is being worked by Mr. McEntire of Greenwood.

The North Star of Long Lake camp, north of Greenwood, some 10 or 15 miles, adjoining the Jewel mine on the north, was also mentioned. At present the property was being handled by Robert Wood, ex-mayor of Greenwood. The ore contains good values in gold and silver and is concentrating.

"I expressed a very high opinion of all the sections referred to on the occasion of my last visit. I then stated that I thought British Columbia would prove as rich a mining country as any of the states to the south of us. My visit this summer has not only confirmed my former views, but has advanced them considerably. I don't think the province need fear comparison with any of the American gold-producing states. I think a few more years of development will prove how marvellously rich the province really is." In conclusion the professor said that he was very much struck by the large number of farms and ranches he met while going through the Boundary country in particular.—Rossland Miner.

A Poor Smuggler.

A meeting of the shareholders of the Smuggler Company was held in the Confederation Life Building, Toronto, the other afternoon, when it was decided to secure the report of an independent expert before any further move was made.

The President of the Company, Mr. Hartley Dewart, occupied the chair. There was not a large attendance. The President read a report made by the mine Superintendent, Mr. John H. Campbell, dated August 12th. In it he said that work had been discontinued on the Dewey claim after a shaft had been put down 40 feet. The work disclosed a body of good ore, but of what width the shaft had not yet determined. The Dewey, he held to be the best of the Company's properties. The Smuggler mine he reported against, saying that the ore body was in a gash vein and its extent not be depended upon. The Dewey vein, however, appeared to be of fissure origin. The President stated that the liabilities of the Company amounted to about $24,000. About $10,000 of that sum had been advanced by the Directors: about $11,000 was due to the Jenckes company which had supplied the stamp mill, the money being secured by a mortgage on the mill, and the remainder was made up of working expenses.

Then followed a long discussion, in which the policy of the Management was rather severely attacked, after which the President stated that the Management had been unable to proceed further from lack of funds. When the Company was reorganised and the capital stock increased, the Directors had subscribed and paid for a large block of stock, but the response of the individual shareholders had been discouraging, the amount of money received from general subscription not exceeding a couple of hundred dollars.

Dr. Aikins moved, seconded by Dr. Primrose, that the mill and mill site should be sold and the proceeds devoted to paying off the liabilities.

To this strong objection was made, and it was finally decided, on a motion made by Mr. Arthur Harvey, to have the properties of the Company examined by a competent and independent engineer before any steps should be taken to dispose of the mill. The examination of the mine will have to be made instantly, as the payments on the mortgage are now due. The meeting adjourned, to assemble again at the call of the President.

The following resolution was passed at the meeting of the board of trade: That whereas the district over which C. A. R. Lambly, Esq., exercises jurisdiction as gold commissioner, is so extensive as to render it advisable, in view of the delay and expense attendant upon personal application to him at his office in Fairview, that the said district should be divided: Be it therefore resolved that this board strongly recommends the lieutenant-governor in council, that Messrs. W. G. McMynn, Midway, and S. R. Almond, Grand Forks, mining recorders, should be vested with the powers of gold commissioners in their respective districts. And that the secretary be instructed to forward a copy of this resolution to the honorable provincial secretary at Victoria.

GREENWOOD AND DISTRICT.

Fred Munns is opening a hotel in Eholt.

John Keough was in the city this week.

Ross Thompson, of Rossland, was here this week.

N. Lamont is about again after a five weeks' seige of typhoid fever.

Joe C. Luckenbel has opened his assay office in W. B. Paton & Co's old office.

Thos. McDonnell and R. M. McEntire made a flying trip to Chesaw this week.

D. C. McRae of Smith & McRae is away in Rossland purchasing goods for his firm.

The board of license commissioners met on Tuesday last. No new licenses were granted.

The track is now laid six miles on this side of Grand Forks and should reach here about October 1.

B. C. Murray, of the Snowshoe mine, is on crutches, having sprained his ankle a short time ago.

J. Edward Leckie has returned from Fort Steele where he examined some properties.

Sam Larsen, of the Riverside hotel, Rock Creek, paid the metropolis a flying visit this week.

Geo. McKenzie, with the Hunter-Kendrick company, is sick in the Greenwood hospital.

Mr. and Mrs. M. J. Phelan have moved into their handsome residence recently erected on Knob Hill.

John McGregor has returned from Portland, where he was called by the illness and death of his mother.

A. W. Smith, the well known Montreal cigar manufacturer was here on a business visit this week.

Mr. and Mrs. W. J. Harber return today after spending a four months' holiday in the vicinity of Vernon.

I. Robert Jacobs is getting his stock of cigars and will open in the Imperial block as soon as his fixtures arrive.

Frank Robbins and Mrs. Robbins of Phoenix, and J. F. Hemenway and Mrs. Hemenway were in the city this week.

Thos. McDonnell and W. T. Smith were busy visiting the different camps this week collecting ores for the Spokane fruit fair.

Mr. Williams, of Winnipeg, father of W. R. Williams, of the Dominion Copper company, Phoenix, is paying his son a short visit.

Mrs. Arthur Mowat and family are expected from Toronto in a short time. Mr. Mowat has taken Ald. Galloway's residence for the winter.

Herbert Bolster, the energetic manager of the Spokane fruit fair, has set apart an international day when special attention will be given to visitors from British Columbia.

R. Greiger manager of the British Columbian Liquor company has returned from Penticton where he was moving stock for his company. The company has 20 tons of foreign liquors in transit.

Mrs. J. C. Scott Galloway and Masters Jack and Charles, will leave in a few days for Victoria. The boys are going to the high school, having successfully passed the entrance examination some time ago.

J. D. Sword, general agent for the James Cooper Manufacturing company, and four members of the Canadian Mining institute, arrived from Rossland late last evening and left early this morning to visit the Sunset and Mother Lode mines.

D. W. Morgan of the Clarendon was in the city this week. The Clarendon is undergoing some extensive alterations. The dinning room was opened on Tuesday. John Hardy of the Rossland Clarendon arrived on Thursday to take a position in the Clarendon here.

Hugh McCutcheon has opened an office in Wood's block at the corner of Deadwood and Government street. A. K. Stuart intends to open a customs brokers office in the same building. Mr. Stuart's experience as collector of inland revenue fits him for the work. He will be of great service to the merchants as soon as a customs office is established here.

Frederick Keffer, M. E., manager of the B. C. Copper company left on Wednesday for Portage laPrairie and Toronto to purchase several lots held by N. Garland and required for the smelter site. Mr. Johnson has the site surveyed and all the plans made for the different buildings. Men are now at work clearing the ground and excavating the foundations for the buildings which will be commenced as soon as all the land needed is required.

J. B. Moody, of Spokane, is in the city.

The Spokane fruit fair opens on October 3rd.

Fred Oliver, of the Morrison mine, was here for a few days this week.

C. W. Vedder, the well known insurance man, was in Greenwood for a few days.

E. C. Wilson, representing the Toronto Type Foundry, was in the city this week.

J. B. Donald and C. O'Brien Reddin, of the Columbia Telephone company, were in the city this week.

J. A. McLellan the veteran representative of the Seattle Post Intelligencer was in the city this week.

W. C. Adams, of Sandon, son of Capt. Adams of the Midway Townsite company, was in the city this week.

Julius Erlich of P. Burns & Co., has returned from a trip to the Similkameen district.

Geo. R. Naden leaves today for Keremeos. There are several buildings being erected in this new town.

A. J. McMillan of the Snowshoe mine was in the city last week. He had just returned from a visit to the coast cities.

W. G. McKenzie, representing Wood, Vallance & Co., wholesale hardware, Hamilton, paid Greenwood a business visit this week.

A. E. Ashcroft returned on Saturday last accompanied by Mrs. Ashcroft and two children. He went out to Sicamous to meet them.

Ross Thompson, of Rossland, was in the city today. He said that he never saw Greenwood look more more prosperous than at the present time.

Dr. J. Christie is a happy man these days. His many friends are congratulating him upon the arrival of a little daughter on Sunday morning last.

R. S. Hall of Penticton who is well known in Greenwood where he once resided and Miss Annie Manery of Okanagan Falls were married recently.

Hon. F. C. Cotton, chief commissioner of lands and works, was in Rossland, last week and left for Cariboo. He intends visiting the Boundary Creek district this fall.

Frank D. L. Smith, mining editor of the Toronto World was in the city this week. He is making a tour of the mining sections of the province in the interests of his paper.

The Anaconda Townsite company are bridging Boundary creek at the foot of the smelter site. This will straighten the road between the two townsites.

County court will be held in the courthouse Greenwood, Wednesday, September 20. On the 18th, C. A. R. Lambly gold commissioner will be in the city to hear the applications for water records.

Thos. McAulay, of the Midway hotel, was in the city this week. Mr. McAulay, is now sole proprietor of this popular hotel, Mr. Keightly having sold his interest in order to look after his mining properties.

The government have consented to turn over $1,500 to the board of trade for the purpose of building a road to Central camp, a similar amount having been subscribed by the citizens. Work will be started immediately.

Duncan McIntosh of the Winnipeg mine was in the city on Thursday. He had with him some splendid specimens from the mine which he is sending east to R. Mathison, principal of the Deaf and Dumb Institute, Bellville.

R. C. Clouston, the general manager of the Bank of Montreal, will be in Rossland next week. F. J. Finucane, manager of the local branch, will go there to meet him, as Mr. Clouston is unable to visit the Boundary Creek district this year.

Provincial Officer Dinsmore passed through Greenwood on Tuesday en route to Kamloops with Chas. Mullen in charge. Mullen and Cameron were committed at Columbia for the Columbia hotel fire. Cameron was brought over previous to this by Officer McMynn, of Columbia. Jean Stubbs has been arrested on the other side and will be taken across the line.

The party with J. D. Sword, M. E., includes D. Beatty of Montreal who is heavily interested in mining ventures. Geo. Meacham a prominent mining man of Cripple Creek and S. G. Simpson of the James Cooper Mf'g company Montreal. They are all well pleased with the wonderful showings and the large amount of development work. Mr. Mencham is so impressed with the possibilities of the country that he intends investing here. The party intend visiting the Cariboo and other Camp McKinney properties and will go to the coast via Penticton.

Rendell's Arcade

A. W. Strickland, of the Bank of Montreal, returned today from a holiday trip to the east.

Have you looked at your subscription label? It will tell you whether you are in arrears or not.

The branch line to Greenwood and Wellington camps is being rushed in order that the track may be laid before heavy snow falls.

Word comes from Rossland that several members of the Canadian Mining institute intend coming to Boundary creek during the next few days.

Geo. McL. Brown, executive agent of the C. P. R., was ill at Rossland last week from blood poisoning. His many friends will be glad to learn of his recovery.

There was a large crowd on Silver street on Saturday afternoon to witness a foot race between P. G. McLeod of Greenwood, and W. Raysdale of Curlew. The race was for $500 a side and 100 yards. The race was exceedingly close and the judges declared it a draw, although many were of the opinion that McLeod came in ahead.

PRESCRIPTIONS

Need special care in compounding as well as pure drugs. "Many a broth is spoiled in the making." Any cook may make rich, light pastry with the same materials that another converts into a soggy mass. A skillful diamond cutter may quadruple the value of a gem by artistic cutting. Care in handling and good material go hand in hand. That is what we assure you of when you bring or send in prescriptions to us.

BRUSHES.
