IS SKYLARK BONDED?

Reported That O. B. Smith and Associated Secured

THIS FAMOUS PROPERTY

In Skylark Camp—Vein of Very High Grade Ore.

A report is current here and at Phoenix that O. B. Smith, superintendent of the Granby mines, and his associates have bonded the famous Skylark mine from the owner in Butte. The report could not be confirmed since Mr. Smith left for the east a few days ago but it is generally accepted as true.

The Skylark is one of the oldest and best developed claims in Skylark camp. It was located in July 1893 and bonded to the Spokane and Great Northern company who went to work shortly afterwards and during the winter of 1903 04 shipped about 100 tons to the smelters, the first class ore running 150 to 300 ounces silver and $15 to $20 in gold; the second class 90 to 150 ounces in Silver and up to $75 in gold per ton. In the autumn of 1897 another shipment was made to the Montana smelter by the present owner. On the claim is a vein having a northerly and southerly trend with an easterly dip of high grade silver-gold ore varying in width from three inches to 18 inches wide. The property is developed by an incline shaft 100 feet deep and about 300 feet of drifting and some surface cuts.

Considerable work was done on the property in 1898, under the superintendence of C. E. Ruger of Butte, but owing to lack of transportation facilities it was then closed down and the owner never resumed operations on the property. Several parties attempted to secure it under lease or bond but without success.

It is hoped that the report that O. B. Smith and his associates have acquired the property is true since it is sure to become another dividend payer on Greenwood's high grade belt.

BESSEMERIZING PLANT

At The Smelter of The B. C. Copper Company, Ltd.

The current issue of the Mining Record contains a well written and well illustrated article descriptive of the B. C. Copper company's reduction works. Regarding the Bessemerizing plant it states:

"A Bessemerizing plant has been installed and the product now turned out is 99 per cent. blister copper instead of 45 per cent. copper matte as formerly. This plant consists of two converting stands, equipped with five shells of the trough type, 84 in. in diameter and 126 in. long. The converters are tilted by power supplied by a hydraulic accumulator.

For the purpose of conveying the molten matte from the blast furnaces to the converters, and for moving the shells from their stands to the re-lining platform, an electric travelling crane is used. Four motors operate this crane, which is equipped with a main hoist of 40 tons capacity and an auxiliary hoist of ten tons.

The fumes from the converters are taken off by an independent stack, having first passed through steel boxes at the back of the stands, a suitably-shaped steel flue of twenty square feet cross-section, and finally a brick chamber of 285 square feet cross-section, in order to collect the flue dust, before being conducted into the stack. (The brick chamber and stack are shown in illustration No. 1, and the boxes and steel flue in illustration No. 2.)

The converting plant is housed in a steel building, 46 ft. x 90 ft. with a lean-to of 60 ft. x 30 ft. At one end of this building is located the re-lining machinery. The silicious ore used for the linings passes directly from the sampling mill, through a 7 x 10 inch Brake crusher, and a set of 24 inch rolls, into a bin, from which chutes lead to a 6-ft. Carlin mixing pan. The clay used as a bond for the silicious ore of the lining is delivered by similar means into the pan which automatically discharges the mixed product, ready for tamping, in front of the converter shell. (Illustration No. 2 shows the shell in the re-lining stand at the left of the picture).

The blast for the converters is furnished by a Nordberg blowing engine with cylinder 40 in. diameter and 42 in. stroke (see illustration No. 3) having a capacity of 5,000 cubic feet of air per minute, at 12 lbs. pressure. This compresser is operated by a rope drive the fly-wheel being 18 ft. in diameter and power furnished by a 300-h. p. variable speed motor, operating at 2,000 volts.

A briquetting plant, of a capacity of 100 tons per day, is to be at once installed to handle flue dust and concentrates. This will consist of a mould briquetting press with lime slackers, mixers and conveyor belt, the flue dust being automically fed from a bucket elevator. This plant will be operated by a 40-h. p. induction motor.

Prior to the installation of the above described Bessemerizing plant the copper matte producted at this smelter had to be sent elsewhere to be converted into blister copper. Now this work is done on the spot, and in making provision for it the B. C. Copper Company has advanced another stage in the progressive policy it is steadily pursuing. The total tonnage of ore treated at this smelter during the three years and a half it has been in operation is in excess of 5000,000 tons. Mr. McAllister has been in charge since the early part of last year, after having been for some time assistant superintendent at the Tennessee Copper Company's smelter at Copperhill, Tennessee, U. S. A., and his modern and economical metallurgical practice has been the chief factor in making the smelting works a commercial success."

C. P. R. OFFICIALS

Greenwood was visited this week by prominent C. P. R. officials. The party was headed by Robt. Kerr general passenger agent and with him were W. R. McInnes chief of the freight department, F. W. Peters, assistant chief E. J. Coyle who has charge of the passenger department in the west, J. S. Carter passenger agent at Nelson, and Harry McDonnell of the freight department at the same place. They travelled in Mr. Kerr's private car and went to Midway on the regular passenger train. They visited the smelters at Boundary Falls and Greenwood and spent the night here, leaving in the morning by rigs for Phoenix and Grand Forks. The visit has no particular significance as the chief officials of the big road always come west once a year.

ELECTIONS THIS FALL

Mr. W. A. Galliher, M. P., of Nelson, was in Toronto recently, and while there "Big Bill Galliher, as he is popularly known in his constituency gave the Telegram his views as to the date of the elections. Here is the interview rs published in the Telegram:

"No, the Dominion elections have not been fixed, but they're as sure as if they had They'll take place this fall without fail," said Mr. W. A Galliher, Liberal ., Nelson, B. C., to a Telegram Representative.

"Any changes likely to be in the cabinet?"

"None that I know of."

"You noticed the report about Mr. Ainsworth?"

"Yes, but I'd place no credence in that."

"What about G. P. Graham of Brockville?"

"What place is there for him in the cabinet? If any new blood is to be introduced introduced introduced into the cabinet, British Columbia must get the first chance. Just now it has only a minister without portfollo."

LIBELLING THE COURTS

Chicago Capitalist Credited in Butte Paper With

MALICIOUS STATEMENTS

Regarding The Bench—The Providence Case.

A Butte newspaper to hand contains the following:

"While up in Canada the other day I saw a specimen of British justice," said M. S. Hyland, of Chicago, at the Thornton today. "The manager of a mining company was prosecuting a clerk for padding the payrolls, and the evidence was so conclusive that there could not be any doubt of the man's guilt and the flagrancy of the theft of the company's money. Lord Somebody, who occupied the bench, when asked for judgment, remarked: "This case is so palpably bad, the crime is so plainly evident, that I cannot believe it possible for any man in his right senses to commit such an outrage I cannot conceive how a man could do so rank an injustice against the laws of Canada, and I must give him the benifit of the doubt and believe that he was not responsible for his conduct. 'The prisoner is therefore discharged.'

"Another instance I noticed. An American was obliged to give a surety bond in the sum of $10,000. He secured the bond from a reliable surety and bonding company in the United States. His lordship wanted to know if he could not just as well have secured a bond in Canada. The American thought he could, but the rates were more reasonable in Uncle Sam's domain. 'Well' drawled the lord, 'I will continue this matter for a week, and in the meantime see if you can't get a bond in Canada.' I guess those Canadians don't know how to plug for one another."

The Mr. Hyland mentioned was here a short time ago and the statements alleged to have been made by him doubtless refer to the application for an injunction against directors of the Providence Mining company. The merits of the application nor the reasons for the making, need not be discussed here but Mr. Hyland's strictures on British Justice should not pass unchallenged. The statements with which he is credited are so outrageously untruthful, that one is slow to believe that a business man—even a Chicago business man—would be guilty of libelling the judiciary of a neighboring and friendly country. It is more likely to be the pipe dream of an irresponsible newspaper reporter.

Of course assailing the bench is a popular pastime in the Republic to the south and lynch law is almost the rule there now, not the exception There is not the same high high regard for the bench nor the law that exists on this side of the line. It may be possible then that Mr. Hyland intimancy with Chicago courts has led him into making statements regarding the courts here that are in no way warranted by the facts.

The incidents said to have been quoted by Mr. Hyland never took place in a British Court. Nor were the statement with which "Lord Somebody who occupied the bench," is credited ever uttered.

There is the thing of which Canadians are justly pound and that is the integrity and incorruptibility of their bench and the people of this country are not slow to resent wild malicious reflections made by irresponsible men for the other side who have no respect for their own judiciary and evidently none for that of a country who is more blessed in matters of this kind than the boasted land of Liberty.

RESIDENT SUPREME COURT JUDGE.

Now that Mr. Justice Drake has retired from the supreme court bench and his successor is shortly to be appointed, the time is opportune to direct attention to the desirability of having a resident supreme court judge in the interior. A great deal of the litigation with which the supreme court has to deal originates in the interior and there is no good reason why litigants should be compelled to bear the additional expense occassioned by the fact that all judges of the supreme court reside at the coast.

BATTLE OF LIAOYANG.

One of the decisive battles of modern history was fought at Liaoyang—decisive like the battle of Waterloo where the great Napoleon was finally crushed, or like the battle of Sadowa where where the Austrian army was defeated and Austrian prestige humiliated, or like the battle of Gettysburg which practically decided the fate of United States as a nation. Russia was a bogey man to many of the European nations and the strength of the Bear was exaggerated to such an extent that none of the great powers was particularly anxious to engage in a conflict. The yellow-skinned Jap driven to desperation by Russian aggressions, tackles this supposedly invincible foe and at Liaoyang the magnificent army under Kuropatkin is forced to retreat.

Russian prestige in the far East was destroyed and Japan takes a place among the great nations of the earth.

MINIMG TAXATION.

John Houston is full of good ideas. In discussing the recent attempt of the provincial government to collect from the Granby anc Le Roi company alleged arrears of taxes, he says in the Tribune:

"The question mine and smelter taxation came up in Rossland yesterday in an attempt made by the provincial government to collect what is claimed to be arrears from the Le Loi and the Granby companies. Both companies own mines and smelters. The smelter of the Le Roi mine is in the state of Washington, the smelter of the Granby company's mines is in British Columbia. Both claim that to the cost of smelting should be added a reasonable smelting profit and a reasonable sum for depreciation of plant. While not combatting these contentions, The Tribune maintains that no deductions should be allowed mining companies for any expenses incurred outside of British Columbia; but that all expenses incurred in British Columbia should be deducted from the value of ore and the mineral tax paid on the value after such deductions were made."

The Myers Creek News is now edited by a lady in the person of a Miss Georgie E. Blaine. The change of editors has not detracted from the merits of the paper. However Miss Blaine like a sensible woman has taken a partner in the enterprise and he is a man. After all even a newspaper cannot be conducted without one of the sterner sex.

The importance of having a strong railway commission was shown at Vancouver and Victoria, where the railway company complained of, found it convenient to remedy the grievances rather than have them aired before the commission. Without such a tribunal railway companies would give but little heed to complaints made by shippers.

The Machivelli of the provincial government, F. C. Carter-Cotton, is now endeavoring to fasten upon the Liberal government at Ottawa all blame for the non-construction of the Coast-Kootenay road. Will he be good enough to tell us what became of that famous summer session?

The land grabbers and speculators are curious to know where President Hayes is going to fix the western terminus of the Grand Trunk Pacific.

William Randolph Hearst is fishing near Bonington and the waters of the Kootenay haven't turned yellow.

And now Phoenix finds it necessary in the public interests to make the town less open.

Kouropatkin cannot rest even at Mukden.

HIGHLAND MINES.

Noted Experts Examine Copper Properties There.

William Yolen Williams, of Spokane one of the best known mining men in the Pacific Northwest, formerly of the Granby mine, in the Boundary district and still its consulting engineer, has just made an examination of the Highland Valley properties near Ashcroft, having been accompanied by O. Sussam, of New York, and J. D. Sward, of Rossland, the latter being interest in these properties with Smith-Curtis and others.

While not expressing any opinion in regard to Highland Valley, having first to report to the principals, he admits that the expenditure to prove the values would be light. The visit of Mr. Willaims is of considerable importance to the mining interests of Ashcraft, as his reputation is so thoroughly good thoughout British Columbia and the mining states to the south, that his opinion will carry weight.

Mr. Sussam is the representative of the American Metallurgical Company, one of the largest dealers in copper in the United States. He took several specimens of ore with him to Spokane, which he selected from various parts of the Highland Valley properties.

Death of Mr. Ferguson

ADOLPHUS FERGUSON DIES AT SACRED HEART HOSPITAL TO-DAY.

At noon today one of the Boundary district's pioneers passed away in the person of Adolphus Ferguson. Mr. Ferguson was taken ill at his home a few days ago and was ordered to the hospital by his medical adviser. The immediate cause of death was heart disease.

"Fungus" as he was popularly called was born in Kent, England, about 62 years ago. While still a young man he went to Shanghai, China, and engaged in the silk trade amassing a fortune. He returned to England where he met with financial reverses and aftermards went back to China. About sixteen years ago he came to this province settling in New Westminster where he engaged in the dairy business. He lost everything in the Fraser river floods of 1894, and came to the Boundary in 1896. He engaged in mining until about three years ago when he started the market garden at the northern end of the city.

Mr. Ferguson was a splendid type of the English gentleman. In appearance he was an exact replica of John Bull and the striking similarity was commented on wherever he went. Generous to a fault and of a particularly sunny disposition he left many friends but no enemies.

Mr. Patterson his partner is making arrangements for the funeral which will take place tomorrow afternoon from Gulley's undertaking parlors at 3:00 p. m.

Wise and Otherwise

Pat. Kennedy who has valuable mining interests on the West Fork has returned to the city after a year's work on his properties.

The railway Commission held a sitting at Nelson yesterday.

Mrs. J. W. Ellis left today for her old home in Wenatchee, Wash., where she will spend a couple of weeks visiting her parents, Mr. and Mrs. C. Hoyne.

J. A. Russell left on today's train for Vancouver.

RICH SIMILKAMEEN

W. Yolen Williams Enthusiastic Over Prospects.

IN THIS FAMOUS DISTRICT

Fine Bodies of Ore Awaiting Transportation.

Wm. Yolen Williams, until recently superintendent of the Granby mines, believes in the Similkameen. He recently made a trip through the district and in an interview in the Spokesman-Review he predicts a great future as soon as transportation facilities are secured. He said in part:

"The Similkameen country in southern British Columbia looks to me like a mining district of great promise. The district has long been known for its gold and copper, and now the prospectors are excited over a silver lead camp which they think will make a second Slocan. It is on the summit of the trail between Princeton and Hope, B. C. I wanted to see it, but I was deterred by the advice of the natives, who told me that the rain then prevailing in the valleys would probably prove to be snow on the summits, and the trip promised to be a hazardous one.

"I went into the country by way of Kamloops on the Candian Pacific railway, whence a stage runs weekly for 130 miles down into the Princeton country. The roads are the finest mountain highways I have ever seen and the trip is a delightful one. It is a paradise for wood, water, grass, game and fish, and the mineral outcrops are beautiful.

The propectors do muck of their work with the aid of a compass. When the prospector strikes a good outcrop and determines its strike, he takes his bearings and travels on foot a quarter of a mile, confident that he will get the lode there with a little surface work. The undergrowth and the timber are pretty heavy, and the prospectors need a compass, too, in getting back to camp.

"The Morning Glory group, in which I am interested with three others, is on Otter flat, about 18 miles from Princeton. It was staked four years ago, and we have not done much work. However, we have a fine showing of chalcopyrite with gold and silver, which give assays around $50.

"At Nicola I found the people confident of having a great coal camp, and they were using their own coal for domestic purposes and for smithing.

"The people generally in the Similkameen are discouraged over the delay of the railway to run a road through the district. The camps can do nothing without transportation, and many of the prosbectors are getting disheartened by the interminable wait.

"The Nickle Plate mine at Hedley, B. C., which is controlled by the Rogers interests, is running its 40 stamp mill, and should have a great future."

SIR THOMAS IS COMING

There is reason to beleive that Sir Tomas Shaughnessy, president of the Canadian Pacific Railway company, will take a trip through the west in the near future, and a number of the principal directors of the company wil probably accompany him.

It is some time since Sir Thomas visited the Kootenays, but the industrial progress of the last eighteen months, of which he is fully aware, demands a personal inspection of the district.

It is said that the party will visit every western branch of the vast system, and that impertant developments of great general interest are certain to follow.—Rossland Miner.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered coal in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5 00.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the has been expended or paid, the locator may, upon having a survey made, and upon complying with the other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 ft. square; entry fee, $5 renewable yearly. On the North Saskatchewan river claims for either bar or bench the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental, $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles, within six years from such date Rental $100 per mile for first year, and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being 1,000 to 2,000. All other placer claims shall be 200 feet square.

Claimes are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of mining recorder's office. One additional day allowed for each ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two 1,500 altogether, on the output of which no royalty will be charged, the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and one half per cent. on the value of the gold shipped from the Yukon territory to be paid to the Comdtroller.

No free miner shall receive a grant of more than one mining claim on each seperate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned, and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done a claim each year to the value of at least of $200.

A certificate that work has been done must be obtained each year. If not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion Lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640 acres Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well and such other land as may be determined will be sold to the discoverer at the rate of $1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

JAMES A. SMART,
Deputy of the Minister of the Interior.
Department of the Interior, Ottawa.

NOTICE OF FORFEITURE.

TO DAVID BEATH, HENRY SHIELDS, or to any person or persons to whom they may have transferred their interest in the Paymaster mineral claim, situate in the Greenwood Mining Division of Yale district.

You are hereby notified that I have expended the sum of $1000 for surveying the above mentioned claim and $2.50 for recording the same for an assessment, such being required and necessary to hold the said claim for the year ending October 11, 1903, under the provision of the Mineral Act and Amending Acts; and if at the expiration of ninety days from the date of the first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure, namely, $81.25, together with all costs of advertising, your interests in said mineral claim shall become invested in me, [your co-owner] upon filing in the proper office in that behalf the affidavit required by section 4, of the Mineral Act Amendment Act, 1900."

Dated this 9th day of June, 1904.

ROBERT WOOD.

THOS. PIECKART
PHIL McDONALD

ated July 15, 1904.

IS ENTHUSIASTIC

Chicago Cagitalist Discuss Greenwood High Grade Mines.

S. P. Brannan of Chicago, who visited this district a short time ago has given out the following interview:

"I am deeply impressed with the extensive development that has taken place in Greenwood camp since my last trip west a year ago. Public attention was then almost exclusively devoted to the Providence mine, the first property to demonstrate the high grade fissure veins on both sides of Boundary creek. A large portion of the dividends regularly dispersed by the Providence go to Chicago investors. The Providence is looking better than ever. Although a depth of only 300 feet has been reached the ore reserves are estimated at over $125,000. This is a good showing when it is realized that 60 per cent of the purchase price has been paid for out of the profits, exclusive of dividends earned since the incorporation of the company was affected. A new compressor plant was ordered from Chicago a month ago.

"The Elkhorn during the past year has also demonstrated the possibilities of the camp by paying hundsome dividends every three months. Other high grade properties in the same camp are being developed and give promise in the near future of rivalling the older mines. I refer especially to the E. P. U. and the Helen, both of which obtained substantial returns from recent shipments to the Trail smelter. The Helen may yet prove to be the bonanza mine of the Greenwood camp. It has a lead averaging ten inches wide and the ore varies from $150 to $200 per ton, 90 per cent of the value being gold. In the Providence and Elkhorn, located in the north belt, the silver values on the other hand, predominate. I went through the workings of the Helen, whose ore reserves are estimated at $75,000. This forms a good object lesson of the profits in the Greenwood high grade belt, as the Helen was a mere prospect six months ago.

"I am interested in the Barbara, which is separated from the Helen by only one claim. As a member of the Chicago syndicate which purchase the Barbara some months ago, I shall have an encouraging report to make to my colleagues on my return to Chicago. The plan of development has been intelligently carried out. At the 90 foot level the showing at the bottom of the shaft is simply magnificent. The vein is from 15 to 18 inches wide, and recently the values have increased from $55 to $75 per ton. This encouraging improvement would indicate still further enchancement of values at depth. I also visited the Strathmore and Defiance, which are destined to become steady shippers.

"After leaving Greenwood I inspected the Betts and Hesperus group, situated on Hardy mountain, four miles from the Granby smelter. These properties are controlled by Chicago capitalists, the principal shareholders being Charles J. Magee, John Clancy, W. W. Bishop, W. M. Thornton, M. S. Mosler and T. H. Rae. A large ore body has been opened up since my last visit. A phenomenal surface showing has also been opened up disclosing 30 feet of solid gold-copper ore. The group can be worked as a surface quarry as well as by tunnels and shafts. A compressor plant will be installed this fall and T. H. Rae, the general manager states that ore shipments to the Granby smelter will be started with the completion of the Phoenix branch of the Great Northern early in January. The main ore body is over 25 feet in width and several crosscuts veins will be cut later at a depth of over 200 feet. The values are about $12 in copper, gold and silver per ton. I am a large shareholder in the company and am well pleased with my investment."

Mr. Higgins BooK.

There is now in the press of William Briggs, Toronto, a volume of unique interest, a selection from a remarkable series of reminiscent sketches contributed to the press by the Hon. D. W. Higgins of Victoria, late Speaker of the Legislature of British Columbia. The interest excited by the stories while running serially was so spontaneous and so widepread that publication in permanent form become a necessity to meet the demand from all quarters. Morgan, in "Canadian Men and Wemen of the Times," states that Mr. Higgins, who is a native of Nova Scotia, went to California in 1856, and founded The San Francisco Morning Call, which he published until his removed to British Columbia in 1858, where he founded, in Victoria, The Morning Chronicle, which was afterwards amlgamated with The Victoria Colonist. He continued to edit the latter paper until 1886, when he sold out to engage in other interests. For nine years he presidad as Speaker over the Provincial Legislature and served his city and Province in various other capacities. Entering the Province while it was yet in the Hudson's Bay Company's hands, Mr. Higgins has been closely identified with the social industrial and political changes that have since occurred. And has had quite exceptional opportunities of gathering material for the vivid sketches with which he has enriched western literature. Mr. Higgins presents pen-picturs of interesting events and incidents that, but for his rare descriptive power and industry, would never have been preserved. The volume is to be entited, "The Mystic Spring and Other Stories of Western Life." Mr. John Innes who has made a specialty of departing western life, has prepared a series of illustrations for the book.

Wise and Otherwise

W. J. Porter of Phoenix was in the city this week.

E. G. and Mrs. Warren are taking a holiday on the coast.

L. B. Hodges superintendent of the Granby mines was in the city this week.

W. A. Harkin the well known newspaper man was over from Grand Forks this week.

Mrs. G. B. Taylor and family have returned home after visiting her sister in New Denver.

Messrs. Blabon, Eden and Jackson of the Great Northern railway visited Phoenix this week.

Rev. M. D. McKee and Mrs. McKee have returned from their mouth's holiday spent under canvas.

E. Foyle Smith of T. M. Gulley & Co., is away on a holiday. Rumor has it that he will not return alone.

W. J. McGregor of the C. P. R. telegraph office, Rossland, and Miss McGregor are visiting friends here.

There are several fever patients at the Sacred Heart hospital, the majority of them coming from the surrounding districts.

Several Greenwood families are camping on the grouse belt, among them being H C. Shaw and family and H. L. Johnston and family.

The Rossland Miner in the authority for the statement that Sir Thomas Shaucenessy and prominent directors of the C. P. R. will visit the west this fall.

Fire Chief Hallett who went east on account of the serious illness of his father will shortly return to his duties, his father having almost completely recovered.

The police commissioners at Phoenix has given orders that gambling must be stopped there. Since railway construction began, gambling was conducted pretty openly in Phoenix.

Dr. Edwards of Dawson was a visitor to the city last week the guest of J. E. McAllister an old friend. He was also entertained by Drs. Foster and Oppenheimer two college classmates in old McGill.

Mrs. C. Æ. Shaw left last week for the coast with her eldest daughter who will be placed in the boarding school at Yale. Miss Muriel Wickwire daughter of E. T. Wickwire has also gone to the same school.

Careless campers set fire to the bush near the Eholt Trading Company's powder magazine and manager Bayley and a force of men spent Sunday in removing the powder to a place of safety. No damage was done.

King, Morrison and McKay, three of the old time prospectors returned this week to Greenwood after spending the summer in the West Fork and in the Similkameen. They have some fine claims on West Fork and on Bear Creek in the Similkameen.

Ben Stubbs an employee of Chisholm's hotel at Denoro was stabbed by James Hill, a Russian, last week. Stubbs was taken to the Greenwood hospital. He is not seriously hurt. Hill made his escape.

Clifford C. Steer who has been a resident of Greenwood for several years will leave in a few days for his old home in St. John's, Nfld. Clifford's many Greenwood friends wish him a full measure of success in the east.

O. B. Smith, superintendent of the Granby mines, Phoenix, left for the east on Wednesday last. It is reported that while there he will join the blessed order of benedicts and in anticipation of the happy event he was given a royal send off by his Phoenix friends.

W. S. Keith sends the Times a copy of the Portland Oregonian in which is given a report of the blowing in of the smelter at Takilma, erected under the direction of Albert I. Goodell at a cost of $250,000. Mr. Goodell is coming to Northport as manager of the smelter there and in all probability Mr. Keith will accompany him.

A very slim audience greeted the Bohemian Concert company at the Auditorium, Wednesday evening. The entertainment was worthy of a larger house. Mr. Herbert Taylor has a splendid bass voice and his numbers were happily chosen; Miss Marrack has a sweet contralto while little Glen is an exceptionally clever performer.

C. Elting Merritt left on Monday lost for the coast where he will visit friends afts which he will go to his old home in St. John, N. B., where a lucrative position awaits him. Mr. Merritt has been a resident of Greenwood for several years and his many friends here gave him an enthusiastic "send off" on Saturday evening.

Mrs. T Griffin who conducted a laundry in Greenwood a few years ago and is now engaged in the same business in Phoenix was robbed of $320 last week. Two masked men entered her laundry in the evening and at the point of a gun forced her to give up the key of the trunk in which her savings were kept. The provincial police are endeavoring to apprehend the burgulars.

Bemport Startenberg was killed at the Knob Hill mine last week. He fell 30 feet down a rocky incline into the glory hole while carrying steel to the machine men above. His back was broken and he died in the hospital five hours after the accident happened. The deceased was a native of Germany, was 31 years of age and leaves a young widow.

C. A. Bruee, manager of the circulation department of the Spokesman-Review was in the city this week.

J. J. Campbell of the Hall Mines smelter accompanied by Mrs. Campbell and daughters was in the city this week.

His Honor Judge Leamy and Mrs. Leamy were in the city this week guests of Mrs. F. W. McLaine.

C. N. Collins the veteran prospector is seriously ill at the Pioneer hotel.

W. M. Law has returned from a business trip to the coast.

TATLOW TO VISIT ENGLAND

VICTORIA, Sept. 8.—Hon. R. G. Tatlow, minister of finance and agriculture, leaves for England on a holiday in three weeks, accompanied by Mrs. Tatlow. On his return the family will reside in Vancouver, as the residence here which they have occupied has been sold by J. Fred Hume, formerly minister of mines, to lawyer Innes, of Victoria.

SPOKANE FAIR.

Every indication points to a record-breaking attendance at the Spokane Interstate Fair, October 3 to 9. The railroads have been more generous to Spokane this year than they have been for several years. Each community will have one day when an excursion will be run to Spokane, the fare being the one fare rate for the round trip. Persons going on this excursion can return any day up to and including the day after the Fair. Beside this, there is a general reduced rate of a fare and a third, good all days.

Amusement features will be amusing enough to keep every one busy. Nat Reiss, with the Southern Carnival company, will furnish the downtown evening entertainment. Letters from high railroad officials and others responsible parties say he has the best carnival this year which ever came to the Pacific coast. The Fifth Regiment British Royal Artillery band of Victoria, B. C., now playing at St. Louis for the Canadian government, will furnish music, giving a giving a band concert in the morning and music for the parades and races in the afternoon. Manager Robt. H. Cosgrove is arranging a midway at the Fair grounds which will be a "hot" number Vaudeville turns, the very best in America, have been secured to entertain the grandstand crowds between races.

Racing this year will be of a high order. The fastest horses in Montana British Columbia and on the Pacific coast, are coming to run for the big purses which are offered. More entries are being made than ever before. The afternoon programs are crowded full of racing events which will occupy every minute until dark. One of the most thrilling events will be the relay race for horsewomen. Each woman rides four miles a day for five days. It is dangerous competition, but wonderfully interesting.
