Legislature Library 1901

COAST-KOOTENAY ROAD.

McLean Bros. and J. J. Hill Have Amalgamated Their Interests and Work will be Commenced at Both Ends Immediately.

An Ottawa dispatch says: J. N. Greenshields, solicitor for Mackenxie & Mann, and Norman McLean and D. G. Macdonnell, of Vancouver, are arranging with the government regarding the proposed Coast-Kootenay railway. It is stated that Mckenzie & Mann, who have a charter for the same route, previously purchased from Vancouver parties, have withdrawn their opposition to McLean brothers. With Mackenzie & Mann, the Great Northern is acting, and Mr. Greenshields' claim that they have a bona fide intention of building the line. The withdrawal of opposition to the new plan of McLesn brothers is said to be due to an understanding arrived at between all the parties, to the effect that the line will be built as a Great Northern proposition by McLean brothers, backed locally by Mackenzie & Mann. The line will also have direct connection with the Crow's Nest, where president Hill of the Great Northern, is largely interested.

This dispatch confirms the opinion held by a great many that while J. J. Hill did not ask for a bonus or did not believe in bonussing railways, he was two shrewd a business man not to accept over one million dollars when it went begging. Last session while Hill was trying to get a chance to build the Coast-Kootenay without a bonus, McLean Bros. successfully held up the government and legislature for one that aggregates about one million and a quarter dollars. Mr. Hill becoming convinced that the present government will not allow anyone to build a road unless he accepts a large sum of public money made arrangements with the McLean Bros., thus making himself perona grata with the government. McLean Bros, will make a nice thing. Mr. Hill will not quarrel at receiving a present of over a million dollars; the policy of the government will be preserved and the people will pay the piper. Fortunately the long delayed and much desired work of constructing the Coast-Kootenay road will now be carried out.

AT WORK AGAIN

A Supply of Coke Enables Smelters to Blow in.

THE GOLD FINCH

Another Shipment will be sent to Trail Next Week.

WORK AT THE MINES IS EASY ORE TO TREAT

B. C. and Other Properties Resume Active Operations.

Work on Other High Grade Properties near Greenwood.

The Boundary district is almost back to its normal condition. The Greenwood and Granby smelters have blown in and the mines are again working. At Greenwood only one furnace is running. When the furnace started on Wednesday there was a reserve of about 1500 tons of coke on hand, sufficient to run both furnaces for about 16 nays. Coke is coming in pretty freely but Superintendent Johnson refrained from blowing in both furnaces until the coke reserve is increased. As soon as he receives assurances from the coal company that a regular supply will be forthcoming the other furnace will be blown in.

A. I. Goodell the superintendent of the Sunset smelter and Harry Johns superintendent of the mine is expected back from Montreal next week. As soon as they return work will be resumed at the smelter and the mine. The smelter is receiving daily shipments of coke.

Work at the B. C. mine has been resumed with an increased force of men and shipments will shortly be begun to the Greenwood smelter. A. H. Lawder of this city has been appointed accountant at the mine and he and his family will move there.

William Downie, superintendent of the Kootenay division of the C. P. R., and Grant Hall master mechanic with headquarters at Revelstoke were in the city this week. Mr. Hall was accompanied by Mrs. Hall and daughter. The officials were making a tour of inspection.

The Methodist church of Greenwood will hold their Church Anniversary and Harvest Thanksgiving services on Sunday, Sept. 21st, when Rev. J. F. Betts of Grand Forks will officiate during the day. On Monday the 22nd a social and concert will be given.

The exploitation of the high grade properties in the immediate vicinity of the city is developing into an industry of considerable importance. At the Providence to which extended reference was made last week the force of men will be increased and regular shipments will be maintained. At the Gold Finch above the city hall Messrs. Sutherland and McDonald have two shifts of four men at work. Another car of high grade ore is ready for shipment to the Trail smelter. A tunnel is being driven into the hill to crosscut the vein about 30 feet below where the first shipment was taken from the surface. Another lead that apparently runs at right angles to the main vein will also be prospected. The ore gives high gold values and admits of easy treatment. In fact the smelter management says it is the easiest high grade ore to treat that was ever received at the smelter. Twenty tons will be sent to Trail early next week.

D. A. Holbrook who owns the Gold Bug in Providence camp is hurrying back from Tnunder mountain. He will resume work on the property from which several shipments of high grade ore were made about two years ago.

Odd Fellows at Home.

On the evening of Monday next, Labor Day, Boundary Valley Lodge I. O. O. F. will be at home to members and visiting brothers at their hall in the Wood block. There will be a card tournament and refreshments will be served. All Oddfellows are cordially iuvited to attend.

A special meeting of the Fire Department will be held on Friday, Sept. 5th, at the usual hour. A large attendance is requested so that officers may be elected for coming year.

CITY COUNCIL

A Lot of Business Transacted at Regular Meeting

PUBLIC IMPROVEMENTS

Conference With Phoenix Council to Discuss the Tramway.

At the regular meeting of the city council on Monday evening, Mayor Naden presided, and all the members except Ald. Swayne were present. A communication was received from Collingwood Schrieber, secretary of the railway committee of the Privy Council, acknowledging the receipt of the petition from the council in reference to the V. V. & E. railway and stating that the same would have the consideration of the committee at its first sitting.

Geo. C. Hodge superintendent of the V. & N. Telephone company was present in reference to the objections made to increasing the long list of unsightly telephone poles on Copper street where the company are establishing their central office. It was pointed out that the lines of the Columbia Telephone company and Boundary Creek Telephone company were still up and that unless the Vernon and Nelson company would take them down the council would see that they were taken down. Mr. Hodge stated that owing to legal complications his company had no control over these lines but as soon as this was secured they intended to take them down. In fact his company had arranged to place a new line of poles in the city. This line would be fully 50 feet high and cables would be used thus doing away with the numerous wires. As soon as this was done all the short poles would be taken down. Finally the company were given consent to erect the necessary poles, the city engineer to see that they were placed where they would be the leas objectionable.

The street committee and the city engineer reported upon necessary work that should be done this fall. This included improvements to Boundary creek above Louisa where the banks have been washed away, improvements at the Alhambra and Deadwood street bridge, improvements to the South end bridge and several drains to carry off surface water. The total cost of these improvements will be about $500. The council authorized that the work be carried out.

City engineer Johnson reported on the cost of continuing the water system along Loug Lake street and Kimberley ave to Louisa street where the C. P. R. will take water for their tank. The estimate is about $2,500 and if the council can arrange for the necessary money the extension of the system will be made.

City solicitor Grey reported that he had interviewed Mr. Silas White of New Westminister who desired to purchase $5,000 city debentures. Mr. White offered 99 net for that amount and the council authorized their sale at that figure.

The clerk was instructed to invite the city council at Phoenix with a view to securing a conference to diseuss the interurban tramway. If possible the conference will be held early next week.

As next Monday is Labor Day the council adjourned to meet at the call of the mayor.

Reports from Anarchist mountain are to the effect that crops there were never better and there are the most enconraging prospects of an abundant harvest.

Harry Pettendrigh of Rock Creek mourns the loss of a three year old son who succumbed to cholera infantum on Wednesday last.

The Court House.

Government Agent McMynn received orders from the coast this week to begin the erection of the court house in Greenwood. Everything has been left with Mr. McMynn. He is to secure plans; call for tenders and award the contract. Mr. McMynn has been in conference with architect Curtis and as soon as the plans and specifications are prepared tenders will be called for.

RECONNAISSANCE

James Kennedy Chief Engineer of V. V. & E.

LEAVES TO CONTINUE SURVEY

From Similkameen River to the Pacific Coast.

James Kennedy, chief engineer fo Victoria, Vancouver and Eastern railway was in Greenwood on Wednesday. Mr. Kennedy is Scotch and looks it. A newspaper man can be in conversation with him only a few minutes when conviction strikes him hard and he knows that Mr. Kennedy is It. Mr. Kennedy could give the newspaper man a good story for publication but he didn't. He talked about the weather and the glorious possibilities of Greenwood's being a second Butte but he knew nothing about railways. He was even ignorant of where he was going save that he, a young old man was moving westward.

It can be stated here however that Mr. Kennedy's position is about as follows. He started in from Marcus, Washington, to build a railway for one J. J. Hill and his associates. His objective point was the Pacific coast, but the railway has not reached there yet. After passing Cascade he ran up against injunctions and had a full measure of the law,s delays. While the lawyers were fighting out last year he continued his survey from Midway westward to the Similkameen. Dispite the law and the courts, Mr. Kennedy succeeded in building into Republic. He then wanted to build to the Granby smelter but then he had to deal with that august body the railway committee of His Majesty's privy council. The majority of the railway committee are spending the summer in Europe so that until they return, the branch to the Granby smelter will not be built. Mr. Kennedy likes to be busy so he started Thursday morning for the Similkameen river. From there he will reconnoitie the country to the coast. Mr. Kennedy is a brave man not easily discouraged and he thinks that when Canadian law makers and Canadian courts get tired of trying to prevent people from building a railway then he will know where to go in that great lone land that separates British Columbia proper from that little portion of it that is situated on salt water.

The Victoria, Vancouver and Eastern railway will be continued from Curlew to Greenwood and Phoenix and further westward just as soon as the company are allowed to build.

The vagaries of legilators are truly mysterious and inscrutable. While they are anxious to bankrupt the province to bonus one set of men to build a railway they use the most strenous efforts to prevent another set of men from building a railway through the seme territory without a bonus.

Accompanying Mr. Kennedy on his trip to the coast is A. M. Lupfer of Kalispel, Montana. Mr. Lupfer was one of the locating engineers of the main line of the Great Northern and he has since been connected with the engineering department of the company. They will endeavor to find a lower pass than that through the Hope mountains via a tributary of the Skagit river on the American side.

HAS GOOD COAL

Paul Johnson Well Pleased With Samples From

SIMILLAMEEN AND NICOLA

With Railway New Measures Should Furnish Cheap Fuel.

Paul Johnson, superintendent of the Greenwood smelter, returned last week from a visit to the coast. He inspected the Crofton smelter which is being built by James Breen and his associates. Mr. Johnson was delighted with the plant but is somewhat dubious regarding the supply of ore for the furnace. While the properties on Vancouver Island are high grade, they are badly broken up and some difficulty may possibly be experienced in maintaining a steady supply of ore for the furnace.

Mr. Johnson also looked into the matter of Similkameen and Nicola coal fields and through reports from experts and by the careful examination ef samples from the coal measures, he was convinced that in Similkameen and Nicola can be found coal that for blacksmith and steam purposes is superior to either the Crow's Nest or Vancouver Island eoal. He was particularly impressed with samples taken from the measures of the Nicola Valley Iron and Coal company, Ltd. This company has five seams ranging from five feet to eleven feet in width. It is apparently good bitumuous coal an average assay giving the following returns:

Fixed carbon	58.41	per cent
Volatile carbonaceous matter	34.27	"
Moisture	2.18	"
Ash	5.14	"
Sulphur	none	
Coke (firm and hard)	63.53	"

The Nicola coal fields are situated about equal distance from the coast and the Boundary. The distance to Greenwood by the V. V. & E. will not be more than 140 miles or less than one half the distance from the Crow's Nest Pass. As soon as this road is built coke can be landed at the local smelters at a rate of from $3 to $4 a ton and coal from $2 to $3.

The Tulameen Coal company has also some promising coal measures. On their property are three seams, 6, 16, and 20 feet in thickness. An assay gives:

Moisture	4.62	per cent
Volatile combustible	41.16	"
Fixed carbon	49.04	"
Ash	5.18	"
Coke	52.22	"

With the railway constructed to the coast there is no good reason why the Nicola and Similkameen coal company should not furnish what is all important in the treatment of low grade ores cheap fuel.

Jas. Lawrence, the Nelson hardware man registered at the Imperial this week.

J. P. Keane, superintendent of the Cariboo mine returned this week from Camp McKinney.

HEALTHY RECREATION.

The business men of Greenwood should encourage the movement to secure a combined curling and skating rink. During the winter months, there can be secured no better form of recreation than that found in an ice rink. The factors that combine to make a live, healthy, enterprising town are many and varied. A town to be balanced must have its avenues of healthy recreation. In mining districts particularly, it is often a difficult matter to provide enjoyment for the many young men who have neither homes for themselves nor attendant comforts. An ice rink well conducted is one of the agencies that can be successfully used in preventing young men from yielding to those numerous evil temptations that are set before them. Greenwood needs a good rink in winter and good recreation grounds in summer. Both may be secured by concerted action.

A FISH STORY.

Large trout, have been caught above Boundary Falls. During the past week trout weighing over four pounds have been caught and it is said that the waters are fairly alive with healthy vigorous specimens above the smelter dam. Two years ago F. C. Holden who was an enthusistic fishermen planted a lot of fish caught below the falls in Boundary creek above McPherson's mill. Evidently these fish did not venture over the falls but lived and grew above. Now the creek is said to be alive with big trout.

If fish can be successfully planted immediately above the falls there is no good reason why there should not be good fishing at Greenwood. All that is required is someone to catch the small trout below, carry them in water and plant them in the creek in the vicinity of the city. Efforts have been made to stock Long Lake with fish and the Dominion government have agreed to do so at the earliest possible date. In the meantime there is no good reason why the citizens of Gaeenwood should not take the initiative and have fishing right at home.

ROSSLAND FIRE.

The fire at Rossland this week was a most serious one. It destroyed a large amount of property and at one time it looked as if the greater portion of the town would be wiped out. The Evening World says that the water supply was inadequate, a most serious matter in a mining town with a large percentage of wooden buildings. The pesple of Rossland have plenty of grit and we feel sure that the fire will not discourage anyone. All will go to work with renewed energy and in a short time there will be a better Rossland than ever. Every great city has had its baptism of fire.

ROYAL COMMISSION.

The provincial government have appointed a royal commission to investigate the colliery disasters at Fernie and on Vancouver Island. The commission comprises John Bryden, ex-M. P., a brother-in-law of Premier Dunsmuir and formerly manager of the Wellington Collieries, Tully Boyce a Nanamio miner and Peter S. Lampman a barrister of Victoria.

Game Laws

It is lawful to shoot game ar follows (dates inclusive):

September 1 to December 14--Deer, buck or doe; mountain goat, mountain sheep (ram).

September 1 to December 31—Caribou; elk, wapiti, (bull); grouse of all kinds, including prairie chickens; hare; moose, (bull).

September 1 to February 28—Bittern; duck, all kinds; heron; meadow lark, plover.

November 2 to March 31—Beaver, land otter, marten.

William Powers has purchased Bernard Lequime's interest in the Midway sawmill and sash and door factory and will carry on the business on his own account.

The Vernon and Nelson Telephone company will remove their central office to the Mellor block next Sunday, consequently there will be no telephone service on that day.

Farewell Party.

Presentation by Ladies of St. Jude's Guild to Mrs. Smythe.

Last Friday afternoon in St. Jude's hall the ladies guild entertained Mrs. J. W. H. Smythe at a farewell tea. There was a numerous attendance of members of the guild and other friends of Mrs. Smythe including men also desirous of taking part in this expression of the esteem in which that lady is held and in assuring her of their regret at her impending departure from Greenwood to reside at Cranbrook. The function proved a veritable surprise party for Mrs. Smythe, who had not received any inkling of the intention of her coworkers in the guild to make her a little presentation. This took the form of an address, tastefully engrossed and illuminated by Messrs. A. E. G. Ashcroft and E. W. M. Lysons, and signed in colored inks by the ladies contributing towards the purchase of an accompying sterling silver bon bon dish. Prettily arranged in ornamental borders and fancifully tied up with the address were several interior and exterior views of tne church. The silverware was beautifully embossed and the initials of the recipient were engraved on it. The address. read by Miss Minkler. voiced the appreciation of the signers of the personal worth of Mrs. Smythe- of her devotion to the work of the guild and other church effort, and the sincere regret felt at her removal from Greewood. Mrs. Smythe feelingly acknowledged the kindness of her friends and reciprocated their regret at having to say good-bye. Tea followed and after an hour had been spent in social intercourse the assemblage dispersed. Mrs. Smythe, accompanied by her mother, Mrs. Keay, will leave for Cranbrook next week.

Have Filed Plans.

V. V. & E. Filed Plans For Main Line to Similkameen.

The Victoria, Vancouver and Eastern railway have filed plans at Ottawa for the continuation of their road from Midway to the Similkameen. The company intends pushing the construction of this portion of the road as soon as the railway committee of the privy council gives its consent. The cry was raised by the opponents of this road that the company did not intend to build a main line and the piece between Cascade and Carson was simply for the purpose of securing a way of building to Repnblic. When the company made application at Ottawa for permission to build a branch line to the Granby smelter, the minister of railways held that a branch line could not be built from a main line which did not exist and held up the application. Now that the company have shown at least an earnest of their intention by filing plans for the continuation of the road westward, it is possible that the objections to a company building railways without public aid of any kind will be removed.

THE EDITOR'S EASY CHAIR.

The scene has changed. It is no longer a farce comedy. It is now a spectacular extravaganza. The mighty men of the Gateway City have disturbed the peace of Spokane and shouted "Fe fi fo fum I smell the blood of an American." The victim is Wylie C. Morris and the armed host are officials of the Hot Air line. At the present writing the Grand Forks braves are just looking for little Wylie but before we go to press we expect to hear that he has been scalped, hanged, quartered extradited and that several other serious things have been done to him. Those who went after the erstwhile counsel and manipulator of charters in the city of Washington represent the brawn and sinew of more than one province. First there was George H. Cowan, barrister of Vancouver, who wears the scars of many a hard fought battle in British Columbia courts where he did his best to prostrate the railway opponent of the Hot Air line by means of injunction and quo warranto. Then came W. A. Stratton, a scion of the noble race of Strattons who have been the terror of the Tories back in Peterborough and who incidentally are connected with a Toronto loan company that wandered away from the peaceful farms of Ontario to the exhilarating Hot Air of Grand Forks. And Tracy was there, not the Tracy that will shortly be the hero of yellow covered books but a greater and holier Tracy—Tracy W. Holland, resident agent of the aforesaid loan company and manager of the Kettle Valley Ruilway; also mayor of Grand Forks. The company would not be complete without John A Manly, good old John who was closely connected with those spectacular episodes that brought fame and name to the Gateway City. No caste would be complete without a promiscuous assortment of actors including end men and supernumaries. Alfred Jacques, a railway contractor, C. W. Davey, auditor, O. T. Skerrit, general freight agent, E. A. Gardner, chief of detectives, and four men were among those who contributed to the gaiety of at least two nations.

And they were after Morris. Morris holds the stock of the company, claims one-sixth interest in the road and when the Canadians kicked, he turned loose, the prosecuting attorney of Ferry county who threatens to confiscate the road under the anti-alien law.

Since the passing away of the Canadian frog which was wont to discourse music for the enjoyment and edification of the denizens by Kettle River, Grand Forks has been fruitful of sensational espisode—not the least of these has been the hunt for Morris.

There is no competition among railways. To borrow some of Eugene V. Debbs' metaphors: As well legislate against the law of gravitation; as well try to force the apple back into the apple blossoms as to try to secure cheaper rates and better service by railway competition, or to use one of Jim Hill's, as well try to mend a broken limb by statute. Now these phrases sound well particularly when rolled round as a sweet morsel and given the proper unction but what are the facts? Here is a home illustration. The Canadian Pacific railway had a monopoly of the Boundary trade. It began by quoting a 75 cent rate to haul ore. In that patronizing, sympathetic, big hearted way of C. P. R. officials, this rate was cut in two and again in two and the officials patted themselves on the back. "We are doing this to help you" they said. "There is nothing in it for us. We want to help you but really you should quit mining and grow fruit"! Of course it is easy to overlook the million dollars that Boundary paid the C. P. R. last year. It is only a mere bagatelle anyway. The C. P. R. were taking things easy in the Boundary. They ran their trains at a slow rate and in all matters moved along with a calm dignity that admirably suited such a worthy and influential corporation.

The Great Northern came to Curlew. A stage line ran from Greenwood to Curlew. Travellers found that they could take the stage, reach Spokane and all parts east and west and south 24 hours ahead of the C. P. R. time. The most of them took the stage. The C. P. R. is now going to get up before daylight and hustle all day. It is said the outgoing train will leave Greenwood at six in the morning and will loose no time in getting to Robson. The swift steamers will then take the passengers northward in order to catch the Pacific express the same day. This will save 24 hours on the old time and place the C. P. R. on a footing with the Great Northern. The rate to the west is also going to be reduced. In addition to the exhiaration of travelling at a faster rate than 12 miles an hour passengers will save time and money.

Of course there is no competition among railways. This is only another evidence of the fatherly interest the C. P. R. takes in the Boundary. That interest will lead to a further reduction in freight rates. May that spirit of pro bono publico be still further quickened!

Back From Thunder

Fred Munn has returned from Thunder mountain. He went in there with the first rush. He located properties, one of which he bonded. Mr. Munn is of the opinion that Thunder mountain will make a big low grade mining camp but no one will get rich there in a hurry. Thousands of people crowded in there, many of whom were without money and a good deal of privation is likely to follow this summer. The wagon road is now within 60 miles of the camp. In the meantime large quantities of machinery are going in over the pack trail.

COMPANIES ACT, 1897.

THE MORRISON MINES, Ltd.

(Non-personal Liability.

Take notice that the shares in The Morrison Mines, Limited, (Non-Personal Liability) hereinafter described, have been declared in default and will be sold at public auction to the highest bidder for cash, at the office of the said Company, Rendell building, Copper Street, Greenwood, B. C., on Monday, the 8th day of September, A. D., 1902, at the hour of four o'clock in the afternoon, to satisfy assessments which have been made thereon and are in default for a period exceeding sixty days after notice and demand of payment of such assessments.

Look to Your Eyes

Consult an Optician.

When your eyes dim and when you cannot continue for any length of time to regard small objects as in reading.

When you involuntarily frown or parily close the eyes when looking at an object.

When things "swim" or become dim after being looked at for some time.

When the eyes ache, smart or water; when your eyelids get inflamed often, or when you have pain in the eye ball, orbit, temples or forehead.

When you have any nervous derangement that you cannot otherwise account for.

Don't let the matter of expense keep you from visiting us. Sight is as precious to you as life itself, and we test the eyes free of charge.

That' Base Ball Game.

The game of base ball between the musheaters and the fisheaters was rather a surprise party. A fish ball diet was supposed to be conducive to good ball playing, but the musheaters with a score of 24 and an inning to spare against their opponents 19 demonstrated that there is still virtue in rolled oats. The rooter was there in all his glory and his work was of the most picturesque description. The players were badgered in every imaginable variety of piscatorial language and dubbed every portion of a fish's anotomy from the local salmon bellies to the majestic product of the waters adjacent to Cape Cod. On the other hand the fisheaters appeared to have an intimate acquaintance with the constituent parts of mush and dealt in a catalogue that included everything from Quaker oats to the old fashion kiln dried variety. It was a much better game than the score showed. Feeney for the fisheaters pitched a swift and treacherous ball but received poor support in the field. Coles and young McDougall were in the box for the musheaters and did good work. A return match will be played on Labor Day.

Phone No. 33.

F. J. Mitchell who has been away visiting in the Northwest for several weeks returned on Monday. He has decided to open out a tailoring establishment at Fernie and will move there early next week. Fred will be greatly missed particularly in athletic circles where his services often secured the pennant for Greenwood.

A meeting of the Board of Trade was held on Tuesday last. It was decided to invite the English editors now making a tour of the Dominion to visit here. Mayor Rumberger of Phoenix was in the city and he joined in the invitation on behalf of Phoenix. A joint telegram was sent to the visiting newspaper men.

Monday next, Labor Day, will be quietly spent in the Boundary. The Phoenix Miner's union are holding a picnic there to which they have invited neighboring labor organizations. In the evening a ball will be held in Miner's Union hall in aid of an injured miner. At Greenwood the Sunday school children will be given a picnic at Boundary city. Parents and friends are invited to participate. Business houses will be closed on that day.

E. B. Dill and wife left to-day for California.

The Rambler Lawn Tennis Club will hold a tournament the first of next month. At a meeting held last night a committee was appointed to arrange a schedule for both handicap and open events.

A very successful picnic was held on Thursday last in connection with St. Jude's Sunday school. Nearly all the children connected with the school were present, and enjoyed the day in the woods immensely. The following were the winners of the prizes for sports. Big girls race, Alice McMynn. Boys race, Sonny Lauder. Small girls race, Elsa Johnston. Small boys race, Alex Shaw. Obstacle race, Ida Shaw. Obstacle race, small children, Sonny Lauder. Three legged race, Alice Bunting and Berta Shaw. Egg and spoon race. Marjorie McArthur. Hopping race, Alice McMynn. Consolation, Gladys Harvey. Mr. McArthur kindly supplied the conveyance which was gaily decorated for the occasion.

Activity at Fernie.

The town and the mines is again displaying an activity that has been very noticably absent for the past two months. Considerable building is going on, an addition is being built to the store to be used as a storeroom or warehouse, it will be completed in a few weeks and the company will be able to carry a stock large enough to supply the community domiciled there. The new school-house will be started next week, already the grounds are cleared up and the lumber placed on the ground for the building which will be rushed to completion with all possible speed. The new reservoir has become a reality and the pipe is already laid from the dam which is a mile above the mines to a point almost above the old dam. A large force of men will be kept at work until it is finished. No. 2 tunnel is being put in first class working shape and will soon commence its regular output No. one is at present supplying all the coal which is being brought down, but it is not yet being worked to its full capacity. Every indication points to a very busy fall, and work for all.—Free Press.
