BROOKLYN RUNS HIGH

Shipments From New Strike Will Start Next Week--Runs Well Through Mine

The most encouraging feature of the Dominion Copper Company's operations, since resumption, is the strike made in the Brooklyn mine at Phoenix. Returning from there yesterday, Manager Roosa said that they had cut across the face of it 58 feet on the 200-foot level, and that it extended at least from the 80-foot to the 250-foot level. On the 350-foot level the mine has not yet been opened up where this ore would come in. The rock runs from $8 to $10 per ton. A little shipping has been done from the new find this week, but next week regular shipping will be started from it.

At the company's smelter operations are being carried on with excellent success. The tonnage, averaging just about 600 tons per day, shows what the big furnace is doing.

The Phoenix Pioneer gives the following details of the strike:

Since locating the new strike on the Brooklyn the forces at the mine have been largely augmented and a considerable amount of development work will be carried on. One hundred and eighty tons were shipped on Thursday from the Brooklyn, and by next week 200 tons daily will be shipped from the new strike.

Asked as to the new ledge of ore struck, Superintendent Rundberg said: "The Brooklyn has the best gold values of any mine in camp. The assays on the new lead located last week ran $4.40 to $4.60 gold, 40 cents to 60 cents silver, and 2.2 per cent. copper. The ore looks first-class, and there is an extensive body of it."

The new lead has been located on the 250, 150 and 80-foot levels and runs north and south parallel with the Brooklyn-Idaho underground workings. Some 150 feet of drifting has already been done and the ledge is widening in fine shape. Crosscutting is now being done to discover the width. The lead is thought to extend northward into the company's Montezuma claim, and drifting will be pushed. Raising on the ledge has been commenced from the 350-foot level, and shipping will commence on Monday.

The entire ore body is all virgin ground and Superintendent Rundberg is most enthusiastic as to the results of the exploratory work being carried on.

RAWHIDE LOOKING BETTER.

Active development work is being done at the Rawhide. "It looks better than ever," said Mr. Rundberg. "Every shot put in indicates better prospects. The Rawhide will be in shape to ship 1,000 tons daily when the copper market improves."

WILL SHIP ATHELSTAN ORE.

There is at present some 500 tons of ore on the Athlestan dump. The ore has to be teamed one and a half miles to the Winnipeg for shipment by the C. P. R. The contract for teaming the ore will be let today. Athlestan ore runs about $8 per ton, and is required at the smelter for fluxing.

At the lower end of Okanagan Lake, near Penticton, the C. P. R. is building a large six-track barge for transportation from the upper end of the lake down. The company's ship carpenters started to work on it this week. A barge of this unusual size would not be required on the lake were it not that the company intends to commence building operations there. It is understood that it is being constructed for this purpose, although it will also effect a saving in the handling of fruit, which can be loaded direct from the landing places to the cars.

BOUNDARY MINING

The Napoleon mine of the B. C. Copper Co., near Marcus, Wash., is now shipping 100 tons a day, most of it being purchased by the Granby mines at Phoenix.

The Smelter of the Dominion Copper Co. this week treated 3,808 tons, distributed as follows: Brooklyn 1,274, Rawhide 1,857, Sunset 612, Mountain Rose 65 tons.

The smelter of the B. C. Copper Co. this week treated 13,501 tons of ore, distributed as follows: Mother Lode, 9,345 tons; Oro Denoro, 3,941 tons; others, 215 tons.

The B. C. Copper Co. will erect at the Mother Lode a new reservoir tank to contain 35,000 gallons. This, with the 15,000-gallon tank, and the pumps in operation, will give the Mother Lode a water supply and a pressure that will equal, if not surpass, that of most cities.

The Diamond-Texas syndicate has a successful meeting on Wednesday night, at which a number of members of the syndicate in arrears came up, and several other people were admitted. Everything was reorganized and new work will be started on August 2nd. The next meeting is on August 1st.

Assessment work is being done on the Silver Reef, two miles from Greenwood, by Thos. Edwards and W. E. George. About $500 has already been expended in development work, consisting of a 42-foot shaft and surface work. The vein carries silver, copper and gold values, with copper coming in stronger as depth increases. A whim was set up at the mine last week.

With a view to avoiding accidents, the British Columbia Copper Company today posted notices that visitors to the reduction works or mines of the company must obtain a written permit from the office before going on the works. In this way it is hoped to make it reasonably certain that anyone visiting the works will have guidance necessary for their protection.

J. W. Douglas, E. R. McLean and Chas. Lewain, of New York, were in the camp this week and visited the Lakeview and Dividend claims six miles north of Oroville. About 12 men are kept at work on the property, which is on the Canadian side. The ore is heavy sulphide, bearing copper and gold. It is understood that F. Keffer, M. E., visited the property with them.

The Boston News Bureau says the B.C. Copper Co. is making copper for 9¾ cents and making 30 tons of it a day. Costs are one thing that the smelters don't tell and no information can be gathered here. The general impression that one picks up is that though the company is making an exceptionally good record at the present time, the News-Bureau's figures like all mining papers are probably optimistic.

James D. Sword expects to return tomorrow to the West Fork and will put a number of men to work at the Bell mine on Wallace Mountain near Beaverdell. Mr. Sword has been gathering together some outfit necessary and making preparations for work. It is now generally felt that the West Fork will experience quite an uplift with the building of the railway.

The tonnage of the B. C. Copper Co.'s smelter this week makes a record for the company, 13,501 tons, or a daily average of 1,928 tons. The new organization of the company's mines and works effected after the long shut-down is making itself felt, and tonnage of this kind can be looked for regularly now. None of the Boundary smelters will make public actual figures as to their costs, but it is understood that there are other favorable records being made, as there must be, if the company is to make money on the present price of copper.

PROTECTION AGAINST FIRE

Greenwood's Water Pressure As Good as Many Large Cities

In the light of the recent disastrous fire at Grand Forks, the question raised by a local contemporary, as to the condition of Greenwood's fire fighting apparatus is important. It may be added that investigation finds this highly necessary equipment in a fully satisfactory condition and the fire and light committee of the council alive to their responsibilities and the needs of the community.

Greenwood has a constant available reserve water supply today of 380,000 gallons and a pressure which varies from a 100 to 140 pounds according to the elevation of the hydrants. To empty the Twin creek reservoir alone, with a one inch stream and with no water coming in, would take over 10 hours. It contains 200,000 gallons, and as a matter of fact, there is a constant stream of water entering it. The pressure on Copper street and in the places where it is most needed is from 122 to 135 pounds; at the school house and at the south end of the town it runs up to 138 or 140 lbs. The lowest pressure is near the City Hall where the buildings are not situated closely to one another and where fire fighting would be easy.

The city has 18 hydrants, which are tested frequently in the winter time, and used by the sprinkling cart constantly in the summer time. There are eight alarm boxes, which are tested on an average of once a week, a test being put on this service every night in ringing the curfew. The letter of the Fire Chief, published in this issue, gives a clear statement of the care with which the hose and other apparatus of the Brigade is examined.

The Fire and Light committee has now under order considerable new equipment and is making investigations regarding other purchases. Some new nozzles, appliances for handling the hose, and a ladder truck are under order. Some new hose, which the committee are purchasing, will allow the supply of eight streams of water on Copper street.

The Fire Chief, when asked of any improvements that might be made, said that the committee had given the Brigade a more kindly hearing this year than usual, and were considering the purchase of a Deluge set which would give a service quite as effective as that supplied by the water towers in the big cities. Including the expenditure amounting to about $300, now being undertaken in purchasing the ladder truck, etc., $600 would give the Brigade a first-class equipment. The Fire Chief would advise the placing of a few more hydrants, one on the corner at the Pioneer Hotel, to get at the back of the buildings on Copper street, and one on Silver street, near Cropley's old feed store. It is much cheaper to place hydrants than to buy long strings of hose and it gives a quicker and more effective service.

Comparing the service as to pressure, etc., with that of other places, the Chief thought that Greenwood by its natural situation had a pressure that could be found even in very few large cities and one that should give the citizens cause for satisfaction Everyone feels, hower, that the Council should not stint themselves in any way in the spending of a few hundred dollars to make security doubly sure in the matter of fire protection. A few hundred dollars spent in making the city's equipment first class and in reimbursing the brigade for pratice might save a heavy loss whenever a fire does occur.

CITY COUNCIL.

Council opened on Monday night, with Alderman Gully in the chair, the Mayor and Alderman Wilson reporting later and making a full council with the exception of Alderman Sutherland.

There was no important business. The Council heard a request from Mr. Biner re the semi-annual license of $75 for transacting a wholesale liquor business. The Council could see no way out of it, and Mr. Biner thought he'd have to come up.

The city pound has been doing a mint of business and the receipts are becoming an embarassment. The city shares with the pound keeper, and the man who pounds the animal, each taking $1.

The Chief of Police will have a telephone installed; the fire and light committee will get what is required for the fire department, and property owners are requested to clean paper and inflammable matter from their premises.

A SAD ACCIDENT

Just before dusk, on Saturday, William T. White, the only son of Mr. and Mrs. Geo. White, sank while swimming in the pool on Copper creek, just behind the smelter. He was in the water in the neighborhood of half an hour when his body was rescued, life being extinct. About the manner in which the accident happened, there is considerable doubt, but the water where he sank was nearly 22 feet deep, and rescue very difficult. Deceased was a strong, large boy, and was one of the successful candidates at the recent entrance examination, and his death, coming just when he was looking with a great deal of ambition and courage to the life ahead of him, is very sad. His funeral was held on Tuesday afternoon at 2:30 from his father's residence to the Methodist church, his pall bearers being W. Watson, H. McGillivray, Rod. McCutcheon, Frank Thompson, J. Day and W. G. Swayne. In their sore bereavement, Mr. and Mrs. White have the sincerest sympathy of a large circle of friends both of themselves and their boy.

The Conservative nomination at Nelson makes the Kootenay look pretty nearly like a sure thing for Smith Curtis. A. B. Goodeve, of Rossland, received the nomination, none of the Nelson men thinking it worth while contesting the seat with Smith Curtis in the running.

BOUNDARY FALLS ROAD

Railway Commission Will Protect Public and See Road is Built.

It is understood that on Wednesday the C. P. R. had a contractor looking over the wagon road at Boundary Falls, B. C. The secretary of the Board of Trade received the letters given below from Duncan Ross, M. P., and from the Railway Commission, which explain themselves.

OTTAWA, July 17, 1908.

DEAR SIR—I have your letter of 9th inst., and in reply I beg to state that I have urged upon the Board of Railway Commissioners the necessity of prompt action on the part of the C. P. R. in connection with the construction of the road in the vicinity of Boundary Falls. I am advised that the C. P. R. have signified their intention of doing this work. However, I think that they have received further instructions from the Board of Railway Commissioners in connection therewith.

Yours very truly,
DUNCAN ROSS.

OTTAWA July 16, 1908.

DEAR SIR—Re complaint of the Greenwood Board of Trade:

I beg to acknowledge the receipt of your letter of the 9th inst., stating that at a general meeting of the Greenwood Board of Trade, held at Greenwood, B. C., on the 8th inst., it was unanimously resolved to bring before the attention of the Board the dangerous state of the road at Boundary Falls, near the Dominion Copper Co.'s smelter.

In reply I beg to state that the Board will at once take this matter up with the company, and also, if necessary, have it investigated by one of its engineers at the earliest possible moment.

Yours truly,
A. W. CARMAN.

The Hon. Secretary, the Greenwood Board of Trade, Greenwood, B. C.

There will be a meeting of the Fish and Game Association in the City Hall on Monday evening next, at 8 o'clock. Considerable business of interest is on the docket, including a discussion of the new Fishery Regulations. All fishermen are invited to turn out.

BOUNDARY ORE TONNAGE

July 24 '08

The following table gives the ore shipments of Boundary mines for 1900, 1901, 1902, 1903, 1904, 1905, 1906 and 1907, as reported to the Greenwood Times—

EDITOR A. D. MACFARLANE

UNION LABEL

FRIDAY, JULY 24, 1908

Friends of Duncan Ross in the Kootenay have been calling the Nelson News up short for its recent abusive editorials on Mr. Ross in connection with the deferred election in Yale-Cariboo. F. J. Deane, former proprietor of the News, and Dr. Hugh Watt, of Fort Steele, have written formal communications to the News on the subject, and many other of the staunchest supporters of the Kootenay district and of the newspaper, which in days past was its pride, will feel that the News has fallen very greatly in lending itself to the cheap and nasty methods of political warfare it has employed.

The News opens its editorial on Duncan Ross' defenders by saying "that the Liberals of Eastern, and particularly of South-eastern British Columbia, are gradually awakening to the unpleasant certainty that in the next Dominion parliament Yale-Cariboo and Kootenay are most likely to be represented by Conservatives, and hence we have another protest, which we publish this morning, upon the stand taken in these columns against Duncan Ross' cowardly postponement of the Yale-Cariboo election."

No one, not even the News, believes that any such reason or feeling moved the gentlemen in question to protest against the unmeasured and abusive articles appearing in that paper. These men are men who have had a large part in making the Kootenay, and in spite of the assertion of the News about that long, hard laugh that it imagined would resound throughout Yale-Cariboo at its bidding, there are more of their kind in Yale-Cariboo who realize the absolute impossibility of holding the elections on the day of the general elections in this constituency as in the districts of Gaspe, Saquenay, Chicontimi, Comox-Atlin and Kootenay.

Speaking of the support given the deferred holding of the elections by Mr. Macpherson, of Vancouver, the News said: "Mr. Macpherson in this matter is helping out Mr. Duncan Ross, who cannot be elected in Yale-Cariboo unless the election is postponed and who will likely not be elected even if the government is returned. Mr. Macpherson wants to give Mr. Ross another chance, especially as that gentleman will not now be allowed to tamper with the voters' lists, and he, therefore, represents the situation in Yale-Cariboo to be what every resident of the constituency knows it is not." Then the News proceeds to call Mr. Macpherson a liar. Well, well! as the Podunk Clarion would remark, comment on such an observation is unnecessary.

An attempt is made to compare the constituency of Yale-Cariboo today with the Kootenay and Yale of 1896. Such a comparison is obviously worthless. In 1896 there was nothing like the settlement in the inaccessible districts that is there today. In 1904 there was no such settlement as will be found along the lines of the G. T. P. when the election occurs. In the judgment of the government, its is impossible to have the ballots properly distributed to these distant points in time to have the elections seven days after the nominations. The matter is one for real and legitimate discussion and not for venomous and heated abuse.

Over Mr. Ross' justification few electors in Yale-Cariboo will worry. But the eagerness of the attack directed against this arrangement reveals very clearly the hollowness of Conservative pretensions regarding the defeat of Sir Wilfrid Laurier's government. They expect only an overwhelming victory. It also illustrates the avidity with which the campaign againt Mr. Ross will be conducted. And why? Sir John Macdonald once remarked that he always remembered that when a boy he found the most clubs under the best trees. Mr. Ross at Ottawa has made himself a very effective member, both for his constituency and in the larger affairs of the country. It was he, above all others, who destroyed the shallow pretense of the Bowser tactics on the question of Immigration. He got railway communication for the Boundary and the Similkameen. He has followed his vast constituency from end to end and looked carefully after the needs of its development. In his work as member, he has been tireless, efficient and effective, and these things the Opposition contemn beyond comprehension. And no truer word could be spoken of Duncan Ross than that of Dr. Watt, of Fort Steele, to the editor of the News: "Why, sir, every man who knows him (as you evidently do not), knows that no man is less afraid to 'fight beasts at Ephesus' (an ancient Sir John application of scripture), or the pack of howlers who would be let loose on him after the close of the general campaign elsewhere." Whatever may be said of Duncan Ross, it cannot be said that he is either small or a coward.

The New York Sun pokes fun at the Canadian House of Commons. It finds, however, one likeness between it and the Congress. It says: "The speaker reads prayers. The chaplains of congress have been known to include political oratory in their invocations. There is this similarity between the American House and the Canadian—most of the members come in after the prayer.

If the meek shall inherit the earth the Conservative papers should be well paid for their attitude over the utter failure of the Hodgins investigation. In a condensed inside page article, the Nelson News perhaps thinks the Government might assist, rather than attempt to block investigation. With an eight months' session of parliament, surely it is time that the men who make charges be required to hit the ball or pass up their bat to the next man. Major Hodgins was fanned out, and it's his turn to sit down.

NATION BUILDERS.

In the Tercentenary pageants that have been in rehearsal for a week, and are now in progress at at Quebec, there is a contrast that has been striking some of the press writers into making reflections over the excellence of a life of sacrifice. The pageant finds Champlain enjoying life as a geographer to the king of the most civilized and luxurious court of the day, of Henry IV., of France. He belonged to that fine old class of men of learning whose position in life was as pleasant and as full of satisfaction as many men could wish. But it was not for Champlain; in his blood there was a fire that would not let him rest in the lap of luxury. His place at court he used only to persuade the king to forward his efforts to go and to build in Canada an empire for France and a new kingdom for the church. Into the long winters of the new country the pageant brings Champlain. The story of the days that followed is known to every school boy and from the persistence of these men through continuous hardship, the following reflections gather:

"Such men must be measured by different standards than we are accustomed to apply to life. Their passion is not to get—it is to do. The most of us are hurrying about with our little scoop nets trying to gather in as much of the flotsam of life as comes within our puny reach; while men of this sort only give our selfish labours and rotting heaps of refuse a passing glance of scorn as they stride on the fields where quarried stone may be laid on quarried stone in solid permanence. They are the architects of the world, while the most of us are only chip gatherers dodging about between the legs of the Builders. We make ourselves very cosy and warm with our fires of chips, and we are very gay withal as we sit ruddy in the blaze or dance merrily about in the shadows. But, in the morning, there is only a heap of ashes to tell where we have been—and we are a part of it. But up in the morning light rises the stern, gray structure of imperishable stone which the Builders have made; and it will see a thousand such chip-gathering generations come and go, and cast the flickering light of their casual fires upon the names of the Builders carven over the portals of the edifice that lasts."

"We have such men in our day; but we can hardly see them for the thronging crowds made up of the rest of us. They never did jostle each other. But Cecil Rhodes was such a man. His accidental wealth may have disguised this fact from us somewhat, but he only got his wealth because it was the chief weapon of the time in which he lived. He was really an Empire-builder. Then Lord Cromer must have had something of that spirit. There are men of this character scattered throughout the country today who are thinking more of the future of the nation than of their own little pile of 'chips'; but they lack the opportunity or the ability to build high enough for the idlers to see. We stumble over their work on the way to the 'show grounds,' and heartily curse them for cranks. But they are the 'village Champlains' of the present, scorning our ruder Fontainebleaux in this tinsel age, and building as best they can the superstructure of the nation which Champlain died to found."

Provincial Items

Thanksgiving this year will be on a Monday instead of a Thursday.

Ernest Miller, of Grand Forks, expects to leave for Prince Rupert in August.

A hotel and store will be opened at English Point on Christina Lake, by H. Spalding.

The estimate put on the wheat crop by W. A. Black, general manager for Ogilvies, is $120,000,000.

The G. T. P. will extend their wharfage frontage at Prince Rupert by 1,500 feet, making it the largest on the Pacific ocean.

All the Conservative newspapers are publishing a government advt. over a column in length, changing the boundaries between the Kootenay and Similkameen land districts. The change takes place on September 1st.

That valiant independent Kootenay newspaper, the Nelson News, has taken to filling up regularly every day on Conservative campaign "hot air" sent broadcast over the country from Ottawa.

This year even the urgent warnings of the Ladies' Home Journal failed to prevent another big casualty list the result of pyrotechnics being substituted for patriotism over the border in celebrating the fourth of July. Seventy-one people were killed and 2,624 wounded.

A set of the new Quebec Tercentenary stamps will be presented to the Prince of Wales at Quebec, in small gold boxes, enclosed in a case of Morocco leather and inscribed. Less ornate sets go to Lord Grey. Sir Wilfrid Laurier and Hon. Mr. Lemieux.

Rossland and Nelson never loose a chance to scrap. At the Anniversary of the Miners' Union at Rossland, on Thursday week, a football match was the occasion, or perhaps only the excuse.

William Whyte, second vice-president of the C. P. R., puts the western crop total at 125,000,000 bushels. Harvesting will be fairly general throughout the West by August 15, and there will be no grain blockade.

A convention call for the Trades and Labour Congress of Canada has been received at this office. The Congress will meet at Halifax on September 21st. The last meeting of the Congress in Winnipeg, last September, was very interesting and produced some very creditable discussions on labor and national problems.

The investigation following the Medicine Hat wreck found that operator Ritchie, who delivered the train order, was overworked. One operator had been drowned and no substitute had been provided. Ritchie had been on duty 12 hours when he issued the clearance. He has left the country.

In Cranbrook the preachers have come up against "Old Man" Simpson. The old man does not like anyone who gives Cranbrook a bad name, and to the preachers request for an apology, "The Old Man" makes several observations. If preachers, as well as people, would only try to make their remarks serve some useful purpose, there would be less dissension and more progress in improving the world.

Making Good.

There is no way of making *lasting* friends like "Making Good;" and Doctor Pierce's medicines well exemplify this, and their friends, after more than two decades of popularity, are numbered by the hundreds of thousands. They have "made good" and they have *not* made drunkards.

A good, honest, square-deal medicine of known composition is **Dr. Pierce's Golden Medical Discovery.** It still enjoys an immense sale, while most of the preparations that have come into prominence in the earlier period of its popularity have "gone by the board" and are never more heard of. There must be some reason for this long-time popularity and that is to be found in its superior merits. When once given a fair trial for weak stomach, or for liver and blood affections, its superior curative qualities are soon manifest; hence it has survived and grown in popular favor, while scores of less meritorious articles have suddenly flashed into favor for a brief period and then been as soon forgotten.

For a torpid liver with its attendant indigestion, dyspepsia, headache, perhaps dizziness, foul breath, nasty coated tongue, with bitter taste, loss of appetite, with distress after eating, nervousness and debility, nothing is so good as Dr. Pierce's Golden Medical Discovery. It's an honest, square-deal medicine with all its ingredients printed on bottle-wrapper—no secret, no hocus-pocus humbug, therefore *don't accept a substitute* that the dealer may possibly make a little bigger profit. *Insist* on your right to have what you call for.

Don't buy **Dr. Pierce's Favorite Prescription** expecting it to prove a "cure-all." It is only advised for woman's *special* ailments. It makes weak women strong and sick women well. Less advertised than some preparations sold for like purposes, its sterling curative virtues still maintain its position in the front ranks, where it stood over two decades ago. As an invigorating tonic and strengthening nervine it is unequaled. It won't satisfy those who want "booze," for there is not a drop of alcohol in it.

Dr. Pierce's Pleasant Pellets the *original* Little Liver Pills, although the first pill of their kind in the market, still lead, and when once tried are ever afterwards in favor. Easy to take as candy—one to three a dose. Much *imitated* but *never equaled.*

St. Joseph's School
NELSON, B. C.

PARENTS who wish to secure for their daughter the benefits of a solid and refined education will do well to consider the advantages the Convent School, Nelson, offers.

The Convent is large and commodious and a large number of Boarders can be accomodated. The School is superintended and taught by the Sisters, who have much experience in training and educating children.

The course of study comprises Christian Doctrine, Grammar, Geography, Arithmetic, English and Canadian History, Stenography, Bookkeeping, Typewriting, Drawing, Algebra, Geometry, Needlework, Vocal and Instrumental Music, French and Hygiene.

For further particulars apply to—

Fruit Industry

Elbert Hubbard, who has many occupations connected with the Philistine idea, and who has a love for unusual things, appreciates Mormons and sometimes his Mormonia is worth reading. Recently, in the Philistine, he has been writing of some of the ideas the Mormons are putting into successful operation. Part of it touches on fruit raising, and runs thusly: "Adam Smith said that labor applied to land is the source of all wealth. Brigham Young said that water and labor, applied intelligently to desert land, would some day be America's greatest source of wealth. That Brigham Young was a genuine, sure enough class A prophet no one who visits Utah can doubt. There are thousands of acres of farming land around Salt Lake that are worth two hundred dollars and more an acre simply because the land produces sure returns on that sum. Brigham Young was the first man in America to tackle the matter of irrigation in a scientific way. He said to his people, 'Most miners die poor; but raise fruit, vegetables and cattle and feed the miners and you will all get rich.' Brigham Young was a planter of trees. He knew that flowers, trees and vines are civilizers. The Mormons have colleges at Salt Lake City, Logan and Provo that are radiating centres of inspiration. In order to produce men, these Mormons raise fruit. 'Less hell and more hogs,' was the advice of a great Southern statesman to his constituents. There are over five thousand students enrolled at these Utah universities. The system of teaching sets a pace for Christendom. For instance, at Provo, when the president of the college wanted a sewer dug a mile long, he staked it out, selected twenty boys as foremen, called for five hundred volunteers, and lo! the job was done in half a day. The students plant trees, lay sidewalks, make roads and dig irrigating ditches by the same token. Co-operation, youth, strength, good cheer—system!"

Farther on Hubbard refers to twe very big ideas the Mormons are working out, and the second of them is enough for this time—the economic value of dwarf fruit trees. Of it the writer writes:

"The second big thing the Mormons are doing refers to a little thing—dwarf fruit trees. The idea was born in Japan, carried to Paris, where apple trees were grown in flower pots, and fond lovers sent peaches on the tree to fair dames.

"An orchard of cherry trees, all three feet high, covered with white blossoms or red with fruit, is a sight to gladden your heart for a year. New Zealand first took the matter up as a commercial venture, shipping a perfect fruit to London, and now Utah is doing the same.

"The advantages are these: a tree a year old bears fruit, the tree being so small that you can look down all over it, allows you to pick off the imperfect specimens and also properly spray it, preventing the San Jose scale and destroying other parasites. The quick returns it gives make it specially desirable in a new country. For school gardens or as an ornament and asset to village homes, it is superb.

"In planting the standard orchard you count on forty trees to the acre. With dwarf trees you plant a thousand to an acre and cultivate them as you do corn. Most of the apples on an average tree in New York state are scrubby and imperfect. A very little work and your bantam tree gives you every apple perfect. Apples that weigh a pound are the regulation yield. Acre for acre, the bantam beats the big tree and has it skun a mile."

From four acres of cultivated land, within three miles of Greenwood, a rancher last year took by energetic application well directed $2,000. When this can be done, what is the value of his land per acre?

Irrigation in the West

A recent Government blue book gives some very interesting information in reference to the progress of irrigation in Saskatchewan and Alberta. Five years ago there were in these provinces 169 irrigation ditches, having a combined length of 469 miles, and capable of irrigating some 614,000 acres. Now there are 272 of these ditches or canals, having a total length of 322 miles, and capable of irrigating 3,033,008 acres. Of these Alberta has 167 ditches, capable of irrigating 2,998,321 acres, and Saskatchewan has 105, with an irrigation capacity of 34,688 acres. It is claimed that the great C. P. R. irrigation scheme east of Calgary will, when completed, be the largest individual irrigation enterprise on this continent. It has a length, east and west, of 150 miles, and an average width, north and south, of 40 miles. The total length of waterways covered by this scheme will be about 2,900 miles. It has been found, however, that irrigation is not always a necessity, even in the dry belts, but the irrigation insures a profitable crop even in the dryest years. There is little doubt that these irrigation schemes are doing much to assist in the development of some of the finest agricultural sections in Canada.

HUSBAND AND SON CURED

A Mother's Praise of Zam-Buk.

OAKWOOD, Victoria.

Dear Sirs—I have great pleasure in stating that Zam-Buk cured my husband of barber's rash with twice rubbing. It also cured my little boy of a dreadfully bad arm after vaccination. I know of several other cures it has effected and I cannot speak too highly of it. I am sure if people once try it they will always use it. Yours truly,

R. SAVILLE.

Zam-Buk is healing, soothing and antiseptic. It quickly heals wounds and skin troubles. Certain cure for piles. Sold by all druggists and stores, 50c. a box, 3 for $1.25.

MINERAL ACT.

Certificate of Improvements.

NOTICE.

Bristol Boy Mineral Claim, situate in Greenwood Mining Division of Yale District. Where located: West Copper Camp.

TAKE NOTICE that I, James Edward Schon, Free Miners' Certificrte No. B9580, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under Section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 15th day of July, A. D. 1998

JAMES EDWARD SCHON.

B. C. MINING.

A bit of sensible financing appears in the announcement that the usual quarterly dividend of the International Coal and Coke Company, payable August 1, has been cut down from 2 per cent. to 1¼ per cent., and the balance, of ¾ of 1 per cent., will be applied to the payment of the company's bonds, according to a decision reached at the last meeting of the directors, says the Review. The company owes a bonded indebtedness of $200,000, and it was deemed better policy to meet this from the dividends than to dispose of treasury stock at the present depressed condition of the market. The company is incorporated for 3,000,000 shares and 200,000 shares are still in the treasury. The company was not willing to part with this block of stock at 75 cents a share, which was the best figure likely to be realized, it is stated. The dividend to be declared, therefore, for next quarter will be for but $35,000, and $21,000 will be applied on the bonded debt. It is stated that the dividend may be still further curtailed at a future date to increase these payments. Regarding the operations of the company, F. E. P. McMaine, who is in charge of the Spokane office of the company, said:

"The mine is turning out 2,000 tons of coal a day, including that supplied to the coke ovens, and will increase its output this fall. This is in pursuance of a contract recently entered into with the B. C. Copper Company to take all the coke the International is producing. At present there are 200 ovens, and this number will be augmented by 40. Equipment is now on the way, and work of installation will begin soon. We expect no cessation of operations."

The Slocan has a few men who work constantly, and who work in a big way for the Slocan. Jno. L. Retallack, Louis Pratt and G. O. Buchanan seem to be ever on the war path for the development of that country. Last week Mr. Retallack made an important announcement to the effect that he has completed arrangments for the formation of a company to take over the Whitewater Deep property and continue the work on the long tunnel. About 2,500 feet have to be made to intersect the vein. The elevation of the work to be done is 3,375 feet, but it is 400 feet below the main tunnel of the property. The company will undertake very extensive work which should mean much for Kaslo.

The Kootenay Development Company has leased the Silver King mine, and the Hall Mines smelter at Nelson. The officers of the company are Leslie Hill, L. Pratt, R. S. Lennie and H. B. Rudd, who is secretary. The lower as well as the upper levels of the mine will be operated and work will be carried on something like the old scale when the Hall Mines smelter was built for the purpose of accomodating the mine. The new company has planned the erection of a pole line and will immediately proceed to its erection. This will be used for the electrifying of the property in order to unwater and properly work the lower levels, which extend some 800 feet and more below the surface outcrop. Just as soon as this work has been completed a large force of men will be placed at work.

The coal mines at Coleman started double shift again last week. Applicants for employment were numerous, and the class of men obtained is said to be of the best.

For a light lunch, afternoon teas, picnics and camp, there is nothing that will equal a

BOVRIL LIMITED

27 ST. PETER STREET, MONTREAL

"Copper is likely to be the first of the metals to respond to the commercial rehabilitation of commercial confidence," says the London Critic. "Copper and steel are more closely connected than is generally imagined, and the buying movement which has begun in the latter since the recent readjustment of prices, is bound to benefit copper. To mention only one instance bearing ing upon the attitude of consuming interests, there is the case of the Allis-Chalmers Company, which has recently definitely arranged for the whole of its requirements of the metal this year. An aspect of the situation, which, now that consumers are preparing for increased activity, naturally suggests itself is: Will producers repeat the folly of last year and increase the output beyond the requirements of the time? This is improbable, judging from the utterances of various authorities. Producers have learned their lesson and evidently intend to be less precipitate in the future."

On Thursday of last week, the Granby Company weighted Judge Williams, of Phoenix, down with about $12,000 for the Golden Eagle Fraction, which they added to their already large holdings. The Golden Eagle is about a half claim and adjoins the Granby property, also adjoining the Stemwinder and Montezuma, at the northern part of the camp. No development work has been done on the claim, but it is considered to be a valuable acquisition to the Granby properties. The C. P. R. spur from the Brooklyn mine runs through the fraction. Judge Williams has held the property since 1896.

A a new company, the Silver Cord, has taken over the Last Chance claims at Sandon, and will operate them. Louis Pratt, of Sandon, is secretary, and W. H. Stimson, of Los Angeles, president.

MORTGAGEE SALE.

UNDER and by virtue of the powers contained in a certain Mortgage, which will be produced at the time of sale, there will be offered for sale by public auction, at the Court House, in the City of Greenwood, British Columbia, on Tuesday, the 4th day of August, 1908, at the hour of 11 o'clock in the forenoon, all and singular, those certain parcels or tracts of land and premises, situate, lying and being in the town of Midway, in the Province of British Columbia, more particularly known and described as Lots 16 (sixteen) and 17 (seventeen), in block 45 (forty-five), in the Subdivision of Lot 501, Group 1, of the Osoyoos Division of Yale District, in the Province aforesaid, according to map or plan of said subdivision deposited in the Land Registry Office in the City of Kamloops, and therein numbered 3 (three), with the store and buildings thereon.

HOMESTEAD REGULATIONS.

ANY even-numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 150 acres, more or less.

Application for entry must be made in person by the applicant at a Dominion Land Agency or Sub-agency for the district in which the land is situate. Entry by proxy may, however, be made at any Agency on certain conditions by the father mother, son, daughter, brother or sister of an intending homesteader.

DUTIES—(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) A homesteader may, if he so desires, perform the required residence duties by living on farming land owned solely by him, not less than eighty (80) acres in extent, in the vicinity of his hon estead. He may also do so by living with father or mother, on certain conditions. joint ownership in land will not meet this requirement.

(3) A homesteader intending to perform his residence duties in accordance with the above while living with parents or on farming land owned by himself must notify the Agent for the district of such intention.

W. W. CORY,
Deputy of the Minister of the Interior

L. Craufurd spent the week end at his home in Nelson.

J. P. Flood returned yesterday from a short business trip to Spoane.

Mrs. M. D. McIntosh has been visiting in Rossland for the last week.

Thomas Gill, of Calgary, is visiting his daughter, Mrs. W. E. Warren.

F. M. Elkins returned on Thursday last from a two months' visit to England.

Mrs. N. F. Kendall left Nelson on Sunday night on a visit to her home at the coast.

J. W. O'Brien has taken over the Vendome Hotel in Anaconda and will conduct the business there.

Jas. Kerr and wife, formerly of Midway, have returned from Mullan, Idaho, and taken their home again at Midway.

R. G. Poe left on Tuesday to work in the Golden Eagle mine on the North Fork. Jack Monroe is also working there.

J. F. Brown, of Eholt, received a nasty scalp wound a few days ago and is now in Greenwood. It took 15 stitches to mend the wound.

Duncan Ross, M. P., is expected to arrive in Greenwood from Ottawa on Thursday of next week. The prorogation of the house occurred last Monday.

R. T. Lowery is one of the "old boys" of Ontario's oil metropolis, Petrolia, and may trip over the continent next month to see the boys and girls with whom he used to go to school.

Duncan McIntosh returned on Wednesday night from Spokane, having arranged the final details for the control of the tunnel right of-way. There is nothing left but the long swing and the start of work.

A. L. Reading returned on Friday last from the annual outing of the Alpine Club of Canada at Rogers' Pass. Mr. Reading joined the party the morning after the sad accident which took away the life of Miss Hatch, of Lethbridge.

B. de Wiele has vigorous objections to being known as a man without an eye. The Times received a strenuous protest from Mr. de Wiele this week because his name was spelled without this useful vowel in last week's issue. The Times regrets.

Miss Oppenheimer, who has been with her brother Dr. S. S. Oppenheimer for the greater part of the last year, left on Monday for Europe to join her father and mother who are at present travelling in Germany. Miss Oppenheimer will sail from New York for London and joining her parents in Southern Europe will spend an indefinite time travelling. Many friends in Greenwood will wish Miss Oppenheimer "bon voyage."

Watson-Stevenson — Tuesday's Vancouver World contains the following account of the wedding of Mr. and Mrs. J. L. Watson. Mr. and Mrs. Watson have returned to Chilliwack and are spending the balance of the vacation there: "The home of Mr. and Mrs. R. Stevenson, Chilliwack, B. C., was the scene of a quiet wedding on July 3, when their second daughter, Roberta, was united in marriage to Mr. James L. Watson, B. A., Greenwood, B. C. The bride, who was given away by her father, looked charming in a gown of cream silk eolienne, with which she wore a diamond and pearl pendant, the gift of the groom, and carried a shower bouquet of bridal roses and carnations. The ceremony was performed by the Rev. Mr. Manuel. The guests afterward sat down to a dainty wedding breakfast, the happy pair subsequently leaving on the afternoon train on a trip to the Sound cities."

TOWN TOPICS

Mr. and Mrs. Geo. White wish to thank the many friends who by their sympathy and kindly assistance helped to lighten their recent very sad bereavement.

Owing to circumstances beyond his control, Greenwood's Mayor was not able to figure in the ceremonies at Quebec in connection with the Tercentenary celebration.

There will be a joint installation of Midway and Greenwood lodges, Knights of Pythias, in Greenwood next Wednesday evening. Members of Phoenix lodge will assist in the ceremony.

If you are a judge of Wall Paper value, our 1908 line will appeal to you as no other can. McRae Bros.

One of the little windows of the heavens fell out Wednesday and Copper street was soon a river of running water. The rain did not touch either Mother Lode or Midway.

Tierney & Co. have completed the line of their grade on the Mother Lode branch and there is now about a month's work in bringing it up to the standard width.

Remington Carbon papers and ribbons are absolutely clean and long lasting. McRae Bros.

The grass on the lawn at the Sacred Heart church is fresh and beautiful as a daisy, and will make the best kind of a garden for the lawn party on August 11th. Remember it!

Entries for the annual tournament of the Tennis Club close tomorrow (Saturday). The events will be men's doubles and singles, ladies' doubles and singles and mixed doubles, all handicap. Games will probably start about Tuesday.

A split bamboo rod, 25 yards of silk line and a good reel, all for $2.00, at McRae Bros. Beat it if you can.

A cricket eleven will go from Greenwood to Myncaster on the 26th inst. Myncaster is said to have a good cricket team, and a good day's outing is looked for. Greenwood will be represented by de Wiele, Rochfort, Browning, Hawtrey, Dill, McMynn, Evitt, Wilson, Curtis, Taylor and Stow.

One of the smartest, snappiest, cheeriest and cleanest games of ball played in this district this year, was given at Chesaw on Sunday. Greenwood touched home once in the first, again in the third, and doubled it in the seventh, making four runs, while the Chesaw nine were shut out. The ball was said to be better than in the Grand Forks-Danville game here on July 2nd. The trip over and back was made between 3 a. m. Sunday and 3 a. m. Monday, and Uncle Sam's boys proved themselves royal hosts. Everybody looks for a good time when they play their return game here on August 2nd. Greenwood's line up was made up of Dill, Thompson, Meecham, Hunter, Clerf, Keefe, Miles, Stevenson and Thomas.

WANTED — Blacksmith's shop outfit, steel, etc., for mine work. Apply at once to R. T. Raven, Imperial Hotel, Greenwood.

Many an old timer over the country will regret to hear of the death of Duncan A. Cameron, of Camp McKinney, which followed the very serious accident sustained by him on Tuesday of last week. Mr. Cameron came into this country from the Cariboo with his brother, nearly 23 years ago, and Hughie and Duncan Cameron are known over its breadth. They have lived at Camp McKinney for many years. Death came to him on Saturday last, and on Tuesday of this week his remains were taken to the C. P. R. station ond forwarded, accompanied by his brother, to New Westminster, where he will be buried. Deceased was 52 years of age. The pall bearers were D. McBride, J. W. Nelson, Jas. Kerr, J. McLean, John Lucy and W. E. George.

A cool evening, under the stars, in a comfortable hammock, makes life almost divine. Coles' keeps the Hammocks. See them.

The Fire Chief's Defense.

Greenwood, B. C., July 23, 1908.

The Editor of The Times:

The following is an answer to a paragraph in "The Ledge," referring to the Fire Department in particular. The questions are well put, and the answers should be known by every citizen.

As for my part, here they are:

1st. The racing cart is the property of individual members of the Fire Department. It broke down in being taken up the hill and the wheels are being repaired. The owners contemplate purchasing a new one and will sell the wreck to Mr. Lowery, if he wishes it, at a reasonable price.

2nd. The captain of the racing team is responsible for the cart.

3rd. The city's fire fighting apparatus is well looked after, as its long continuous service will demonstrate.

4th. Practices of the Fire Brigade will take place as soon as we get the ladder truck.

5th. Hydrants are now in charge of the Superintendent of Waterworks.

6th. The hose is in good shape and requires constant attention.

7th. If the Fire Chief did not knw the water supply and pressure, he should be replaced by one who does.

8th. Have the fire and light committee any knowledge in reference to water pressure? Ask them in open council.

9th. Has the hose on the two emergency carts been unwound and examined at a recent date, say within six months? Yes, one of them within a week.

Any further questions within my jurisdiction will be cheerfully answered, or anything to provide better fire protection for the city will be carried out, if we get the necessary support from the city to do so. Yours truly,

A. D. HALLETT,
Chief of Fire Dept.

DENORO NEWS

CORRESPONDENCE.

J. B. Cooke and wife have left Denoro to reside in Grand Forks

C. Dawson and A. D. Clarke, from Phoenix, spent the week end in camp.

H. Scott, brother of O. T. Scott, bookkeeper at the Denoro mine, left for his home in Caledonia, Ont., on Monday.

Jas. Goldie, of the Goldie Milling Co., Ayr, Ont., who has been visiting Mr. and Mrs. Scott on their ranch, has left for the Okanagan.

P. W. Lover, Supt. of Denoro mine, and Frank Coates, took 100 fish between them from the North Fork of the Kettle river. Supt Lover never does things by halves.

All the friends of Mrs. W. Phillips, of the store, are pleased to see her around again after her recent illness.

Miss J Mizzen, Phoenix, is visiting in camp.

Mrs. H. Schurman and children of Spokane, are visiting her son, Ben Schurman, electrician of the Denoro mine.

A. J. Hughes, boss carpenter at the mines, has a crew of men moving James Cunningham's house down to the main street. It has been situated so close to the blasting at the mines that the company is undertaking the job.

W. G. Rose, Presbyterian missioner at Cascade, officiated at the series held here on Sunday.

Denoro mine shipped 700 tons last Saturday—quite a record for Denoro.

Your tailor may make good priceable clothes, but

Do they Lack Style?

He can't help it—he merely follows the lead set by the large clothing makers and, of course, is a season behind the styles.

We can make your clothes to measure and yet give them all the latest touches of Style and Finish.

The reason is, that by our system, the men who originate the styles, make our customers' clothes.

The cost of a suit, specially made, runs from $14 to $20. Come in and let us tell you about the
