The Big Store | The Hunter-Kendrick Co. Ltd. THE BIG STORE | The Big Store

For Men Who Care to Dress Well

The BARRY SHOE . .

Stands above all. We carry a Full Line and can satisfy the most exacting. Let us fit you out for Fall and Winter wear. Our prices are $5.00, $5.50, $6.00 and $6.50 The most up-to-date shoe on the market.

Watch Logic

An old worn out watch requires considerable expense to keep it in repair. After years of constant running the delicate parts become worn and weak, and will not do their work properly. The only remedy is to replace it with a new one that carries a guarantee.

Regina - Watches FROM $7.00

MIDWAY. | A. LOGAN & CO. JEWELERS | GREENWOOD.

RENDELL & CO.

Early Season Goods

Ladies and Misses Coats and Skirts

We have the newest in styles, the best in quality, and the largest assortment of ladies and misses Coats and Skirts, for fall and winter.

NOW IS THE TIME TO SELECT.

Mohairs For Becoming Autum Skirts

For your becoming autum shirtwaist suit make a selection from our new Mohairs if you want something handsome. Just received an excellent line of colored Mohairs flaked with white threads, in new shades of brown blue and green. Don't miss this, only 75c. Just received some of the prettiest Mohairs for autum suits in plain and fancy checks. Price only $1.00.

THE NEW FALL READY-TO-WEAR HATS of the newest creations. Our milliner will arrive next week.

RENDELL & CO.

Store closes daily at seven o'clock, except Saturdays at 10 p. m.

HAVE YOU ZINC ORES?

If so Read the Following Letter and Give Information Desired.

The following letter was recently received by Gold Commissioner McMynn, and as it is impossible for him to give the desired information, he wishes claim owners having zinc in quantity on claims to send particulars to either himself or John L. Retallack, Kaslo, B. C.:

DEAR SIR: You will probably have noticed in the press that the Dominion government is about to conduct an examination and report on the zinc resources of this province, from physical and economic standpoints.

The investigation is to be conducted by Professor Ingalls, admittedly the first authority on this subject on the continent, who is expected to commence work on 1st September.

Although this plan originated locally, the investigation is to embrace all sections of the province in which zinc is known to exist in commercial, or what under mining and transportation development can be made commercial quantities.

In this connection, in order to assist the good work, will you kindly favor me at your earliest convenience with a reply to the following questions:

1. Does zinc ore occur in your district in what is locally considered to be commercial quantities?

2. If so, in what precise locality or localities?

3. Names of properties and owners.

Unless some development shows a definite tonnage or in the case of an undeveloped prospect the showing is so large as to be remarkable, it is hardly to be expected that Professor Ingalls will have sufficient time at his disposal to make a personal examination, in which case data supplied by yourself or any other thoroughly reliable local authority will be of much value. Yours truly,

JOHN L. RETALLACK.

Kaslo, B C., August 22, 1905.

PRESBYTERY MEETING.

The Presbytery of Kootenay will hold its half yearly meeting in Greenwood Tuesday, Wednesday and Thursday of next week in the Presbyterian church. On Wednesday evening at 8 o'clock a public meeting will be held, which the Rev. J. T. Ferguson, B. D., of Nelson, and the Rev. A. Dunn, B. A., of Fernie, will address the meeting on the subject: "The value of the Gospel to society." Special music by the choir. The public are cordially invited.

IN THE CARMI CAMP

On the West Fork of the Kettle River.

MACHINERY INSTALLED

And Development Work Done on the Properties.

Carmi camp on the West Fork of Kettle river is situate about 60 miles from Greenwood on the proposed line of the Midway and Vernon railway, and 28 miles from Pentiction, at the foot of Okanagan lake. There is a good wagon road between Greenwood and Carmi, on which a stage runs twice a week, leaving Greenwood Wednesday and Saturday mornings. Between Carmi and Penticton there is a government trail.

The first locations in the camp, the Carmi and Butcher Boy, were made by James C. Dale in the fall of 1896. The Carmi group comprises the Carmi, Butcher Boy, B A Fraction, No. 2 Fraction, May, and Hartford, all located on the same lead. On the Carmi the most extensive development has been done. It consists of of a number of open cuts, shafts and tunnels. Commencing at Discovery a shaft was sunk 100 feet and a tunnel run 85 feet, both on the lead, and surface crosscuts exposing the lead for a distance of 1200 feet. Shaft No. 2 is also on the lead and has been sunk to a depth of 65 feet, timbered throughout. West of No. 2 about two hundred feet No. 3 shaft was sunk to a depth of 183 feet on the ore. From this shaft drifts were run at the 100-foot level 50 feet east and 65 feet west, and at 165 feet a drift was run 105 feet. About 880 tons of ore were taken out. The mine is also equipped with a 50-horsepower boiler, a hoist, a Cameron and a Duplex sinking pump, a battery of two Tremain stamps, and a battery of five gravity stamps, making in all seven stamps, one concentrating table and two amalgamating plates. The Carmi was purchased some years ago by an English syndicate, at the head of which is E. H. Thruston. The purchase is not looked upon as one of the most fortunate happenings in the camp, as development has been of a rather intermittent nature since Mr. Thruston took charge.

West and adjoining the Carmi is the B H Fraction, 150 feet wide on the lead. No work has been done one the claim.

West of this is the Butcher Boy. The lead has been prospected across the claim by surface crosscuts, There is a 75-foot shaft, with drifts 50 feet west and 35 feet east at the 70-foot level, from which 65 tons of ore were shipped to the Greenwood smelter.

West is the May, with a 35-foot tunnel on the lead.

The Hartford is east of the Carmi and is developed by a 28-foot tunnel and open crosscute.

South of the Carmi is the Lillie, owned by J. O. Thompson and Wm. Morton. The lead has been expoed for a considerable distance by open crosscuts and a shaft has been sunk 50 feet.

The next group of claims is the Rossland and Detroit, about a mile and a half northwest of the Carmi, with a 35-foot shaft and a 65-foot tunnel and a number of smaller shafts and open cuts. The claims are owned by D. English, B. Schultz, and M. Gannon.

About a mile east of the Carmi are the Observatory, Chloride and Jumbo claims, owned by Jas. C. Dale, R. D. Kerr and Wm. Morton. Development consists of a 20-foot shaft, a 90-foot tunnel and a considerable amount of surface work.

West of Carmi are the St Lawrence, Copper Queen, Crown King, and Emma. Development of this group has been done on the St. Lawrence and Emma. On the St. Lawrence there is a 100-foot tunnel and several small shafts and open cuts. The Emma is developed by two tunnels, one 30 and the other 20 feet, both on the lead.

Lying south of the Carmi about two miles are the Colorado Madura and Cold Stream claims, owned by O. E. Anderson, Thos King and H. McKay. Development consssts of a 75-foot shaft, and four tunnels—150, 40, and two 30-foot tunnels. Besides these there are a number of small shafts and open cuts.

This is practically all the development, with the exception of one and two years' assessments, done in the vicinity of Carmi.

The ore of the camp is medium grade, shipments to the smelter giving returns of from $37 to over $100 per ton in gold and silver. Results from the ore put through the stamps have not beon obtained. The work so far done on the Carmi has not been what might be termed economical or practical mining. A large sum of money has been expended in equipment lor the development done. However, the machinery is on the ground and in good condition. The state of the machinery may be accounted for by the fact that an order comes to the mine occasionally to have it "unwatered." Then steam is got up and the pumps worked night and day until the mine is clear. A few days after a cable will be received: "Close the blawsted mine until the tennis season is ovea!"

At the junction of Carmi creek and the West Fork Jas. C. Dale has platted a very pretty townsite. And all that is required for the development of the camp and the growth of the town is transportation facilities, which will be secured with the building of the Midway and Vernon up the West Fork next year.

THE AMBULANCE FUND.

Following is the list of subscriptions received by Dr. Spankie towards the ambulance fund:

B. C. Copper Co	$ 50 00
Miners, Mother Lode	65 50
Benefit dance	80 10

Pacific hotel	5 00
Dr. Spankie	5 00
Total	$500 60

The cost of the ambulance at Philadelphia was $645 00. A reduced freight rate was secured over the Great Northern railway, and through the efforts of Duncan Ross, M. P., the ambulance was allowed in free of duty. The ambulance is expected here in a few days and will be the property of the city. Dr. Spankie deserves the thanks of the community for his efforts in raising the funds for this very neccessary conveyance, where the work is of a dangerous uature and injuries of frequent occurrence. The city donates the cost in excess of $500.

A tin-bearing formation is being prospected in a Transvaal district many miles from Bushveld. The country rock of this district is pegmatite. The cassiterite occurs in very distinct crystals in association with quartz and felspar. One or two samples have given high assay values, notably one in which the tin was associated with limonite The nature of the lode is not yet much understood, but it seems to pursue an almost serpentine course in the pegmatites.

FRIDAY, SEPTEMBER 8, 1905.

DR. OSLER, why did you trifle with the Greenwood Board of Trade?

AN expenditure of a small amount of money by the municipal council in shade trees for the cemetery would be a good investment. Attractiveness pays even in a mining town.

IF that threatened libel suit against the Boundary Creek Times does not materialize soon, the people will accept the charges made against the commissioners as true.—Grand Forks Sun.

IT IS pleasing to note that the provincial government has as far as possible made amends for the action of the Boundary license commissioners by appointing an experienced officer to protect the people of Midway.

THE world is not as bad as pessimists paint it. In this city two able-bodied men devote their services gratis for the purpose of giving the Tory party an organ. But up to the present the paper has persistently refused to come to the rescue of the Boundary creek license commissioners.—Grand Forks Sun.

DURING the past few weeks there have been many mining men in the Boundary. The big low-grade properties always attract outside mining men, but the high-grade belt is now becoming widely known in the mining world, with the result that many investors are coming here to examine for themselves.

THE Tariff Commission, composed of Hon. W. S. Fielding, minister of finance; Hon. Wm. Patterson, minister of customs, and Hon. L. P. Brodeur, minister of inland revenue, will visit British Columbia next week. Sittings will probably be held at Victoria, Vancouver and Nelson. The members of the commission will visit Rossland and the Boundary but will not hold meetings elsewhere in the province.

NORTH VANCOUVER is across Burrard Inlet from Vancouver. It is growing very rapidly and is sure to become a place of importance. The first requisite in a live growing town is a live newwspaper. North Vancouver is fortunate in this respect. The Times has received No. 1, Vol. I of the Express. Typographically it is a thing of beauty. George Bartley is director-general of the new venture and if the people of North Vancouver are an appreciative lot, George has at last found his true mission.

MANSON, the Conservative candidate in the recent provincial bye-election in Alberni, secured his majority with the assistance of impersonators brought from Vancouver to Wellington. One of those is now in the toils. Billy Saunders, who was a saloon keeper before Bob Green vested him with the dignity of the position of sergeant-at-arms, was very busy looking after the pluggers on election day. Thus does the first Conservative government British Columbia ever had observe the ancient customs of the party.

WORK has been commenced on the new transcontinental railway. The preliminaries took some time, but now that the actual start has been made things will move more quickly. Last week McMillan & Co. a Manitoba firm, secured the contract for 275 miles from Portage la Prairie to Touchword in the Northwest territories. This week the contract from Fort William northward to connect with the main line will be let. The Transcontinental Railway commission, which has charge of the government portion of the line, will also award contracts this fall.

THERE is some trouble about the composition of the zinc commission, and the wires have been kept hot with protests against against one of the minor appointees, It is greatly to be regretted that the efficiency of the work should be marred by any lack of sympathy with the personnel of the commission. In order to secure the best results it is essential that men should be employed who possess the fullest confidence of the mine owners, otherwise valuable information will be withheld. It is not yet too late to remedy a most unfortunate appointment, and Dr. Haanel should have the courage to admit and rectify his error without delay.—Nelson Tribune.

WM. BURROWS, a clerk in the Metropolitan hotel, London, Ontario, was the other day fined for selling cigars in the hotel on the Lord's Day. It is no more lawful for a hotelman to sell cigars than for a tobacconist or a druggist. Magistrate Love's judgment is clear cut and decisive. Several similar convictions have been recorded in the Toronto police court.—Lord's Day Advocate, From the foregoing it would be safe to assume that the very good people of Ontario are gradually drifting towards the worship of the Ancient Britains, and it would not be at all surprising to hear that they had picked on Wednesday or Thursday as a day to worship, and as a logical sequence had erected altars to Woden or Thor.

All manner of chances to win premiums for for fruit displays are given by the Spokane Interstate fair this year. Eight hundred dollars in premiums are offered for the best general exhibit of green fruit made by a county, district or individual. The money is divided so as to give everybody a chance. The exhibit scoring the highest will receive a prize of $150 in cash. The exhibit scoring the second highest wins $100, the third highest wins $75, and the fourth $50. This is not all. The exhibit which is made in the best taste, design and arrangement will be given $75, the second best $50, the third best $30, and the fourth best $20. Even this is not all. $250 will be divided among all exhibitors in this class who have exhibits scoring 70 points or more. This gives everybody a chance to win something. Entries in this class should be made by September 30 in order to secure space.

Chamberlain's Cough Remedy Aids Nature.

Medicines that aid nature are always most effectual. Chamberlain's Cough Remedy acts on this plan, It allays the cough, relieves the lungs, aids expectoration, opens the secretions, and aids nature in restoring the system to a healthy condition. It is famous for its cures over a large part of the civilized world. Thousands have testified to its superior excellence. It counteracts any tendency of a cold to result in pneumonia. Sold by all druggists.

Guns and tents for sale or rent. All kinds of ammunition at the O I C, New and Second Hand Store. A. L. White.

In Mexico 125,000 persons find employment in the prosperous mining and metallurgical industries.

Cured of Lame Back After Fifteen Years of Suffering.

"I had been troubled with lame back for fifteen years and I found a complete recovery in the use of Chamberlain's Pain Balm," says John G. Bisher, Gillam, Ind. This liniment is also without an equal for sprains and bruises. It is for sale by all druggists.

A little forethought may save you no end of trouble. Anyone who makes it a rule to keep Chamberlain's Colic, Cholera and Diarrhoea Remedy at hand knows this to be a fact. For sale by all druggists.

THE WASTE DUMP.

All precious stones found in Russia are the property of the czar, and the finest are sent to the imperial palace at St. Petersburg.

India furnishes 50 per cent of the world's output of mica, while Canada and the United States produce nearly all the remainder.

It takes from 300 to 350 gallons of sea water to produce one bushel of salt while the salt wells at Syracuse, N. Y., will produce a bushel of salt from 35 gallons of brine.

British coal mine inspectors report that boys are rapidly being superseded by girls and young women at the picking table on the cleaning plant. This increase of female labor is due to careless and inattentive work on the part of the boys.

The purest native silver known is that found with the native copper ores of Lake Superior, it being almost chemically pure. The Lake Superior native silver specimens when crystalized afford at times the most superb specimens of the metal in the world.

The most remarkable fall of meteorites known to history was that which occurred at L'Aigle in France in 1803. Between 2,000 and 3,000 meteoric stones fell over an area of nine miles long by three wide, some of which weighed 50 pounds or more.

The extreme length of Mexico is 1,900 miles and its greatest width is 750 miles. The lofty Rocky mountain plateau fills it nearly from ocean to ocean leaving but a narrow strip of coast. Its total area is 795,560 square miles, and the population about 14,000,000.

In 1829 a standard troy pound in brass, brought from England, was declared by act of congress the legal standard of the United States mint. The weight of a troy pound as compared with an avoirdupoise pound, is as 5,760 to 7,000, or as 144 to 175. The name troy weight is supposed to have been derived from the town of Troyes, France, when it was first applied by goldsmiths.

Galvanized iron is made according to two methods—the hot, or dipping method, and the electrolytic method. Tests on the two resulting products indicate that the electrolytic deposition of the zinc on the iron is more uniform and adheres better than does the coating produced by the hot method.

The manufacture of explosives ranks as one of the leading industries of southwest England. It is noteworthy that notwithstanding the large amount of explosive material manufactured, there were in 1904 but five fatalties in Devon and Cornwall, where the bulk of the product is handled.

A large majority of the Latin-American countries are on the gold standard, Bolivia and Colombia being the two most important countries to adopt silver. The unit of coinage in the Central and South American republics is almost always the peso, which has about the same value as the United States dollar.

The vitiation of mine air by firing explosives is due, of course, to the formation of a large amount of carbon dioxide. This, however, is formed without taking any oxygen directly from the air, and therefore reduces the percentage of oxygen by dilution only and not by consumption It has in fact been shown that the explosion of nitro-glycerine may add a small amount of oxygen to the air.

The division of applied geology of the United States National museum includes all those mineral substances which are supposed to be of practical value. The exhibit includes ores of the precious, base and rare metals; clays and abrasives; such earths as limes, plasters, cements, sands, mica, asbestos, chalk, tripoli, etc.; hydrocarbons and asphalts, and ornamental and building stones.

Ten years ago there was but little literature dealing with mine examination and the sampling and valuation of ore bodies. Today, however, the proceedings of scientific societies and the columns of technical journals are replete with articles relative to this subject. While much that has been written is poor, there is nevertheless a wealth of information left for the guidance of the inexperienced.

The earliest record of steam or heat engines is found in a manuscript written by an Egyptian mathematician about 200 B. C. A number of steam toys are there described, some of which were used in a small way for power purposes. In the seventeenth century. Branca of Italy applied a steam jet to a turbine wheel, which in turn operated a crushing apparatus similar to our present stamp mills. Another form of steam apparatus was used to elevate water.

Cement manufactured from chemical refuse is the latest evolution of the trade in England. The immense waste heaps, composed principally of sulphate of lime, which are to be seen at many of the chemical works in England, are to be used in making this new cement. The process consists of recrystallizing this waste into a patent white cement, which gives a perfectly smooth surface, with a polish similar to glass and yet sufficiently porous to take paint. This cement can be used for the same purposes as other cements and is said to have an advantage, in that while they require a backing of Portland cement, it can be used with Portland or backing of two parts sand and one part of the plaster itself. Other advantages claimed are that it takes less time to spread with the corresponding saving in labor and wages. This cement has been tested at the hydraulic cement works and it created much surprise by standing a tensile strain nearly equal to the best hydraulic cement.

Chamberlain's Cough Remedy.

This is a medicine of great worth and merit. Try it when you have a cough or cold and you are certain to be pleased with the quick relief which it affords. It is pleasant to take and can always be depended upon. For sale by all druggists.

The exhibit of farm implements and machinery at the Spokane Interstate fair in October will be larger than ever before. The management will place this exhibit near the grandstand where the dog show was exhibited last year. This is in recognition of the greater importance of this department. The largest manufacturing concerns find it to their advantage to exhibit farm implements at the Spokane fair. The attendance from farming communities is so large that they are enabled to show their implements to better advantage and to more people than in any other way. This year all the latest designs and improvements in implements, machinery, motors and engines will be shown.

THREE JURORS CURED

Of Cholera Morbus with One Small Bottle of Chamberlain' Colic Cholera and Diarrhoea Remedy.

Mr. G. W. Fowler of Hightower, Ala. relates an experience he had while serving on a petit jury in a murder case at Edwardsville, county seat of Clebourne county, Alabama. He says: "While there I ate some fresh meat and some sous meat and it gave me cholera morbus in a very severe form. I was never more sick in my life and sent to the drug store for a certain cholera mixture, but the druggist sent me a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy instead, saying that he had what I sent for, but that this medicine was so much better he would rather send it to me in the fix I was in. I took one dose of it and was better in five minutes. The second dose cured me entirely. Two fellow jurors were afflicted in the same manner and one twenty-five cent bottle cured the three of us." For sale by all druggists.

Cook's Cotton Root Compound.

The only safe effectual monthly medicine on which women can depend. Sold in two degrees of strength—No. 1, for ordinary cases, $1 per box; No. 2, 10 degrees stronger for Special Cases, $3 per box. *Sold by all druggists.* Ask for Cook's Cotton Root Compound; take no substitute.

NOTICE OF FORFEITURE.

To F. P. Ketchum or to any person or persons to whom he may have transfered his interest in the London mineral claim situate on Deadwood camp, in the Greenwood Mining Division of Yale District.

You are hereby notified that I have expended the sum of $100 for work on the above mentioned claims and $2.50 for recording the same for assessment work for one year, such being required and necessary to hold said claims for the year ending the 8th March, 1904 and 1905, under the provisions of the Mineral Act and Amending Acts and if at the expiration of ninety days from the date of first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure together with all costs of advertising, your interest in said mineral claim shall become invested in me, your co-owner, upon filing in the proper office in that behalf the affidavit required by section 4 of the "Mineral Act Amending Act, 1900."

Dated 1st June, 1905.

GEO. ANDREWS.

NOTICE OF FORFEITURE.

To Charles N. Collins, his heirs and administrators, or to any person or persons he may have transferred his interest in the Hard Cash mineral claim, situate on Wallace Mountain, West Fork Kettle River, in the Greenwood Mining Division of Yale District.

You are hereby notified that we have expended the sum of $500 for work on the above-mentioned claim and $12.50 for recording the same for assessment work for five years, such being required and necessary to hold said claim for the years ending the 2nd July, 1900, 1901, 1902, 1903 and 1904, under the provisions of the Mineral Act and Amending Acts, and if at the expiration of ninety days from the date of first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure together with all costs of advertising, your interest in the said mineral claim shall become invested in us, your co-owners, upon filing in the proper office in that behalf the affidavit required by section 4 of the "Mineral Act Amending Act, 1900."

Dated 9th June, 1905.

GEORGE M. MILLER
WILLIAM KINTZ.

In The County Court of Yale Holden at Greenwood.

IN THE MATTER of the Judgments, Act, and
IN THE MATTER of a Judgment obtoined in an action in this Honourable Court.
Between COSENS BROTHERS, Plaintiffs, and
JAMES WILDER, Defendant.

TO THE DEFENDANT.

TAKE NOTICE that by an order of the Honourable William Ward Spinks, Judge of this Honourable Court, dated the 26th day of July, A. D., 1905,

IT WAS ORDERED that unless cause to the contrary be shewn by the Defendant, on the 5th day of September, A. D 1905, at the hour of 10:30 in the forenoon, to the presiding Judge in Chambers, at the Court House, in the City of Greenwood, the interest of the Defendant or a competent part thereof, in the following lands, namely: The South West Quarter of Section 18 in Township 67, in the Osoyoos Division of Yale District, British Columbia, be sold by the District Registrar at Greenwood, County of Yale, according to the usual practice, to realize the sum of $109.61, being the amount of debt and costs upon a Judgment obtained by the Plaintiffs (Judgment Creditors) against the Defendant (Judgment Debtor) dated the 17th day of September, A. D 1904, together with interest on the said sum from the said date at the rate of five per centum per annum.

AND IT WAS FURTHER ORDERED that notice of the intention of the said Defendant to shew cause against the said sale must be given by the said Defendant to the Plaintiff's solicitor or his agent twenty-four hours previous to 10:30 o'clock in the forenoon of the said 5th day of September, A. D. 1905, and in default of the service of said notice IT WAS ORDERED that the sale do take place as above directed without further order.

AND FURTHER that a reference be made to the District Registrar of this Honourable Court at Greenwood, B C. to ascertain what judgments form a lien or charge against the said lands and to determine how the proceeds of such sale should be distributed, and to report all such findings to the Court.

AND FURTHER that the costs of and incidental to the application and order be taxed and added to the Judgment debt.

Dated this 1st day of August, A. D. 1905,

[SEAL.] WM. G. McMYNN, Registrar.

VOL. 10, NO. 1, SEP. 8, 1905

THE PATH THE CALF MADE.

One day, through the primeval wood,
A calf walked home as good calves should,
But made a trail, all bent askew,
A crooked trail, as all calves do.
The trail was taken up next day
By a lone dog that passed that way;
And then a wise bell-weather sheep
Pursued the trail o'er vale and steep,
And drew the flock behind him, too,
As good bell-weathers always do.
And from that day, o'er hill and glade,
Through those old woods a path was made;
And many men wound in and out
And dodged and turned and beat about,
And muttered words of righteous wrath
Because 'twas such a crooked path.
But still they followed—do not laugh—
The first migrations of the calf,
And through this winding woodway stalked,
Because he wabbled when he walked.
This forest path became a lane,
That bent, and turned, and turned again.
The crooked lane became a road,
Where many a poor horse, with a load,
Toiled on beneath the burning sun,
And traveled some three miles in one.
And thus, a century and a half,
They trod in the footsteps of that calf.
The years passed on in swiftness fleet,
The village road became a street;
And this, before men were aware,
Became a crowded thoroughfare.
And soon the central street was this
Of a renowned metropolis;
And men two centuries and a half
Walked in the footsteps of that calf.
Each day a hundred thousand rout
Followed the zigzag calf about,
And o'er his crooked journey went
The traffic of a continent.
A hundred thousand men were led
By one calf near three centuries dead.
They followed still his crooked way,
And lost one hundred years a day;
For such a reverence is lent
to well established precedent.
A moral lesson this might teach,
Were I ordained and called to preach;
For men are prone to go it blind
Along the calf-paths of the mind.
And work away from sun to sun,
To do what other men have done.
Ah! Many things this tale might teach—
But I am not ordained to preach.

Cured of Lame Back After Fifteen Years of Suffering.

"I had been troubled with lame back for fifteen years and I found a complete recovery in the use of Chamberlain's Pain Balm," says John G. Bisher, Gillam, Ind. This liniment is also without an equal for sprains and bruises. It is for sale by all druggists.

A little forethought may save you no end of trouble. Anyone who makes it a rule to keep Chamberlain's Colic, Cholera and Diarrhoea Remedy at hand knows this to be a fact. For sale by all druggists.

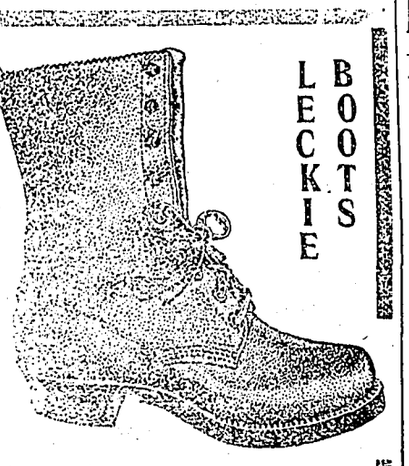
The earliest known record of a producing silver mine was that of mines operated by Hannibal of Carthage as far back as 200 B. C. The mines were located at Guadalcanal, at the foot of the Sierra Morena in the province of Cordova. The productiveness of these mines was great, as it is said that for several years they yielded Hannibal 300 pounds of silver each day. The mines were worked by horizontal tunnels which extended a couple of miles into the mountain.

Chamberlain's Cough Remedy Aids Nature.

Medicines that aid nature are always most effectual. Chamberlain's Cough Remedy acts on this plan, It allays the cough, relieves the lungs, aids expectoration, opens the secretions, and aids nature in restoring the system to a healthy condition. It is famous for its cures over a large part of the civilized world. Thousands have testified to its superior excellence. It counteracts any tendency of a cold to result in pneumonia. Sold by all druggists.

The color of a mineral is the kind of light which it either transmits or reflects. If transparent a mineral may transmit one kind of light and reflect another; hematite, for example, ordinarily appears black by reflected light, but on looking through thin crystals they appear red. Some minerals transmit different colors in different directions. The external or superficial colors are those which first appeal to the eye, but they are not usually of of great importance because not constant. The essential color or streak a mineral, which is the color of the mineral when powdered, is a character of first importance because it varies but little regardless of what the external color may be. Play of colors, change of colors, irridescence, tarnish and opalescence are properties whose study is full of interest.

Every man owes it to himself and his family to master a trade or profession. Read the display advertisement of the six Morse Schools of Telegraphy, in this issue, and learn how easily a young man or woman may learn telegraphy and be assured a position.



IF YOU WANT THE "LECKIE BOOT"

and your dealer doesn't keep them, ask him to get them. Tell him that you want the "Leckie Boot" because it is all leather, and is made for the hard usage that Boots get in a rough country like British Columbia.

We are British Columbians and know all about the conditions that make it necessary to have extra strong boots for the Western man who works out of doors.

LIQUID VENEER

MAKES OLD THINGS NEW

Liquid Veneer instantly restores the brilliant newness and finish of Pianos, Furniture, Picture Frames Interior Woodwork, Hardwood Floors, and all polished, varnished or enameled surfaces.
It renews and redresses everything it touches. Revarnishing is unnecessary, becauses scratches, stains and dirt instantly disappear, leaving a smooth, brilliant surface.
Liquid Veneer is not a varnish, but a surface food that is absorbed by the old finish, instantly restoring the latter to its original brightness. Easy to use—only a piece of cheese cloth is necessary. Dries instantly.
One delighted customer writes that it is worth $100 per bottle. The price is only 50 cents.

Land Registry Office, Kamloops, B. C., August 18, 1905. W. H. EDMONDS, District Registrar.

Synopsis of Regulations Governing t s Disposal of Dominion Lands within t e Railway Belt in the Province British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, eight and nine feet long, 1½ and 1¾ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales

A license is issued as soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B. M., for square timber and sawlogs of any wood except oak; from ½ to 1½ cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes sre issued for a term of twenty-one years at a rental of two cents per acre per annum,

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes map be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is reduired to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence on and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) or any person who is eligible to make a homestead entry under the provisions of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

DOMINION FAIR NOTES.

All machinery on exhibition at the Dominion Fair will be in motion, electricity and steam both being supplied by the management

The lighting scheme for the Queen's park during the eleven nights of the Dominion Fair will show the outlines of all the big buildings and will illuminate the forest at the rear of the grounds.

From the time of opening in the morning till 2 o'clock in the afternoon of each day at the 1905 Dominion Fair, September 27 to October 7, in New Westminster, will be given up to viewing the exhibits, and the Royal Irish Guards band will discourse music all the while.

Horse racing with klootchmen as riders will be one of the daily attractions in front of the grand stand durthe 1905 Dominion Fair.

The Sockeye Run, which will be the same sort of thing at the 1905 Dominion Fair as the Trail is at the Lewis & Clark fair in Portland, will have every line of attraction known to the show man. There will be more of these entertainments on the ground than has ever been seen outside of a world's fair.

The Dominion Fair opens at 1 o'clock on Wednesday, September 27, and closes on October 7

THREE JURORS CURED

Of Cholera Morbus with One Small Bottle of Chamberlain' Colic Cholera and Diarrhoea Remedy.

Mr. G. W. Fowler of Hightower, Ala. relates an experience he had while serving on a petit jury in a murder case at Edwardsville, county seat of Clebourne county, Alabama. He says: "While there I ate some fresh meat and some sous meat and it gave me cholera morbus in a very severe form. I was never more sick in my life and sent to the drug store for a certain cholera mixture, but the druggist sent me a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy instead, saying that he had what I sent for, but that this medicine was so much better he would rather send it to me in the fix I was in. I took one dose of it and was better in five minutes. The second dose cured me entirely. Two fellow jurors were afflicted in the same manner and one twenty-five cent bottle cured the three of us." For sale by all druggists.

Emery paper and cloth are made by dusting finely ground emery upon paper or cloth coated with thin glue.

TOWN TOPICS

A. H. McNeill, K. C., of Rossland was a visitor in the city this week.

Bobby Robinson left this morning for the south in search of better health.

A. M. Whiteside, barrister, went over to Nelson Tuesday and returned Thursday.

Dr. R. B. Boucher, of Phoenix returned this week after a month's visit to coast cities.

Blake Wilson, manager in Kootenay and Boundary for P. Burns & Co., was in the city the past week.

This week C. J. McArthur is hauling ore down from the Last Chance for shipment to the smelter.

The Minors' Union dance Monday evening was well attended. Good music by Bush's orchestra.

Isaac Brown, aged 59, an employee of the C. P. R., died at the Sacred Heart hospital Tuesday last.

Jas. C. Dale wishes to express his thanks to those who assisted at the funeral of his nephew Wednesday.

Dr. Foster of Greenwood arrived in town today on his way to Nicola where he may locate.—Similkameen Star.

Wednesday last, Alex Bethunr, employed at the Granby mines, was severely injured by a timber falling on him.

Carl Nelson, formerly proprietor of the Norden hotel here, but now of Whitefish, Mont., was a visitor in the city this week.

J. C. McLagan, accountant for McLean Bros., contractors on the Midway and Vernon, was in the city Saturday and Sunday last.

P. J. Kennedy came down from the West Fork last week. He has been working on his claims on Wallace mountain for the past two months.

A banquet was given on the evening of the 5th inst. to Duncan Ross, M. P., at Hedley. The menu card was headed "No Closed Door Policy for British Columbia."

Chief Engineer Lackie of the Midway and Vernon and Ralph Smailes leave today for the West Fork to go over the proposed route of the railway between Westbridge and Kelowna.

W. Simpson, for a number of years proprietor of the Greenwood hotel, has sold the business to John Cropley, and left last week to engage in the hotel business at Cochrane, Alberta.

Mrs. Frederic Keffer left Wednesday for Spokane, where she will join Mr. Keffer, who has been in New York for the past month. They will visit the Portland Fair before returning to Greenwood.

Louis Bosshart returned this week from a two months' prospecting trip in the Similkameen and on the West Fork of Kettle river. He made two locations in Arlington camp on the West Fork.

C. H. Fair brought a sample of ore down from the Duncan last week which assayed $937.75 in silver and $55.30 in lead, a total of $993.05. The Duncan is on Wallace mountain, adjoining the Sally, and is under bond to Mr. Fair and associates.

Ferry, Wash., across the international line from Midway, is said to be the "warmest" town on the continent. Everything is run wide open and wildcat. No danger signals are used. The danger is so evident on every side that flaging is unnecessary.

Frank Coryell, of Grand Forks was in the city this week. He says that his brother, J. A. Coryell, C. E., one of the old-timers in this district, is now in East Africa, exploring for a syndicate, and recently located what is believed to be a valuable diamond field,

J. A. Tuzo, with ticket No. 82, won the Robinson ranch Tuesday evening. Mr. Tuzo has been a resident of the West Fork for a number of years and owns valuable mining property on Beaver creek. He is at present on the engineering staff of the Midway and Vernon railway.

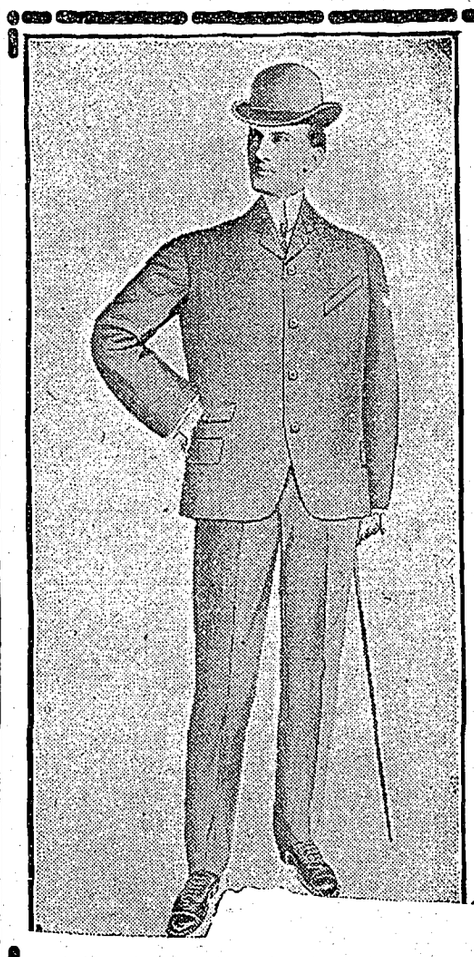
The Rev. T. Albert Moore, secretary of the Lord's Day Alliance for the Dominion, gave a very forcible and instructive address in the Methodist church last week. The speaker very clearly showed that the preservation of the Sabbath is in the highest interest of humanity.

Editor Keffer of the Anaconda News left Wednesday morning on a visit to the Portland Fair. He is one of the few country editors in B. C. who could afford such an expensive trip. The announcement last week that the subscription list of the News had increased 40 per cent may account for the reckless expenditure.

Jas. Drum and associates have thrown up their lease on the Wabash, situated near the Sally on Wallace mountain. Mr. Drum says there is good ore on the claim, but the vein is not large enough to mine at present with a haulage of 50 miles to the railway, but will be good enough to work when the railroad reaches Beaverdell.

C. W. Young of Nelson has been appointed provincial constable at Midway. Mr. Young has had considerable experience on the force. He doesn't look for trouble, but any trouble nosing his way will be taken care of. Midway will need careful handling in the next few months. There will be large numbers of men coming into the town on pay-days during construction work who will need police protection. The recent action of the licence commissioners made it necessary that the provincial government should station an efficient officer at Midway.

Angus Cameron returned from the Flathead this week. Three months ago he left in company with E. M. W. Lysons, P. L. S., to survey the oil lands located by the Greenwood Petroleum syndicate. Mr. Cameron spent three month examining the oil fields and visited the company's works in Alberta where they are pumping fifty barrels a day and sinking other wells. The oil is said to be the best in the world in its crude state and easily refined Mr. Lysons is still surveying oil lands, and will not be through for some time yet. Considerable dissatisfaction is expressed at the manner in which the government handled the the license question.



Where

ARE YOU GOING TO PURCHASE YOUR

Fall Clothes ?

TALK THIS QUESTION OVER CAREFULLY

Determine which store can reasonably do the best for you. Such talk will bring you here. We court discussion and investigation. We are now ready for fall buyers. Our variety is fascinating. WHITE BROS.

SUICIDE OF CHAS. A. DALE.

Tuesday morning about 9 o'clock Charles Alfred Dale, who has been in the employ of the Greenwood Liquor company for the past two years, committed suicide by shooting himself. He had been severly injured in the head in a runaway accident Sunday last and may have been temporarily deranged at the time of his death.

Deceased came to this country about four years ago from Illinois and lived for some time at Carmi, afterwards coming to Greenwood, where he resided until his death. He was a a nephew of James C. Dale of Carmi and a brother-in-law of Walter W. Wood of Greenwood, was 34 years of age and unmarried.

Deceased was a member of the Masonic order, and his lodge in New Haven, Ill., telegraphed requesting that the body be forwarded there for interment. The funeral took place from Gulley's undertaking rooms on Thursday morning, the pallbearers being C. Scott Galloway, J. S. Birnie, E. G. Warren, E. W. Bishop, J. D. McCreath and F. W. McLaine. The body was taken to Phoenix and from there by train to Illinois. James C. Dale, uncle, and Mrs. W. W. Wood, sister, accompanied the remains.
