**Hunter-Kendrick**
--COMPANY, LTD.--

**SHOES**

**NEWEST STYLES BEST VALUES**

Our exhibit of new shoes is now nearly complete. Special attention is directed to the 'PORTIA' Shoe; one of the leading American makes of fine shoes for women. Also Bell's Fine Footwear—for men and women—and McCready's latest styles for men.

**LADIES'** Patent Blucher, extension sole, Cuban heel, dull calf upper, $4.50. Vici Kid, in two styles (walking and light sole) Cuban and Military heel-a high grade shoe, $4.50. The latest styles in Oxfords, exhibiting the Blucher cut and large eyelet.

**GENTLEMEN'S** Just received the following lines, with the flat-iron toe and Military heel. Patent Blucher, fancy cut, dull calf upper. An exceedingly dressy shoe for $5.50.

Patent Blucher Oxford, extension sole, $4.50

Light tan Oxford, very popular this season, excellent value at $4.00.

**CHILDREN'S** Our lines of children's, misses' and boys' is more complete than ever. Weston's school shoes have given good satisfaction in the past; they can't be beaten.

**RUBBERS**

Headquarters for rubber goods of all kinds. You will find our lines and sizes complete. Everybody is wearing the Granby Roll Edge.

**THE BIG STORE**

**The Russell-Law-Caulfield Co.**
LIMITED.

We have just received a nice assortment of

**TRUNKS**

**FROM $6.00 TO $13.50**

Suit Cases from $3.00 to $13.50. Grips from $2.75 to $5.00, and Telescopes from 60c to $1.50.

Our range of Gent's Furnishings, Hats, Shoes, Clothing, etc. is complete and at reasonable prices.

For fancy and staple Groceries, we make it a practice to order lightly, but often, thereby assuring you that our stock is always kept fresh.

**PAY DAY BARGAINS**

New Canadian Prints for ..... 8 cts yd.

Ladies' Shirt Waists for ..... $1.50
Regular Price was $3.75

Children's Shoes, sizes 8 to 2, for ..... 95cts pr.
Regular Price $2.15

Men's Smelter Shoes for ..... $1.50
Regular Price $2.00

Men's Fine Shoes in tan and black for ..... $2.50
Regular Price $4.50

Men's Fine Shirts for ..... 75 cts pr.
Regular Price $1 50

New Wash Dress Goods For Spring.

New Shirt Waists For Spring.

New Muslin Underwear For Spring.

See Our Big Stock Before Buying the above goods.

# VAST ORE RESERVES

## Detailed Description of the Elkhorn Mine.

## W. H. JEFFERY M.E. REPORTS

### An Up-to-Date Plant Will be Installed.

W. H. Jeffery, M.E., at the instance of the board of directors, recently made an exhaustive examination of the Elkhorn mine, the well known high grade shipper of this camp. The report of Mr. Jeffery has been incorporated in a prospectus issued by the company this week. It makes very interesting reading and tends to show the illimitable possibilities of this camp.

Appended are liberal extracts from Mr. Jeffery's report:

"The formation or country rock of the district is a pyroclastic greenstone overlying the grey granites. The greenstone varies in depth, in many places the granites are exposed to the surface, forming bosses.

"The Elkhorn mine is developed by an incline shaft 142 feet in depth, following the vein as nearly as possible. At the 80ft. level of the shaft, a drift is run on the vein 80 feet to the west and 250 feet to the east, all in ore. Over $74,000 worth of ore has been stoped above this level to date, and the end of the ore shoot to the east is not yet reached. And by continuing the drift 1000 feet east to the end boundary line of the property, a large area of stoping ground can be opened up.

"The Elkhorn mine was started at the grass roots on the 9th day of December 1902, with two men sinking the present shaft, and the force increased to 12 men on the 1st of May, 1903, since when the mine has worked continually in ore. Below the 80ft. level of the shaft, at the 142ft. level, drifts were run again on the vein 100 feet to the west, and 150 feet to the east, all in ore—in places 18 inches of solid ore is exposed. A little upraising and stoping has been done on this level merely to prove the ore bodies, which are most satisfactory and similar to the ore above on the 80ft. level.

"Three veins have been discovered on the property. Nos. 1 and 2 veins—known locally as the Elkhorn vein and the Providence vein, parallel each other in an easterly and westerly direction, pitching southerly, and are about 400 feet apart, No. 3 vein runs practically north and south, and pitches to the east. The ore consists of massive native silver, ruby silver, antimonial silver, galena, grey copper, and iron and copper pyrites in a quartz gangue.

"The richest native silver ever discovered in British Columbia has been found in the Elkhorn mine. Some fabulous assays has been taken but the ore averages $20 in gold and from 160 ounces to nearly 200 ounces in silver. Very little sorting is required as the ore comes out massive and clean.

"The intention of the company, now, is to sink the shaft 200 feet deeper than it is at present, on the same incline, about 40 degrees, and independent of any flattening or slight breaking of the vein, and crosscut the vein at each 100ft. level. The shaft on its present incline will catch the No. 3 vein on its pitch at the 342ft. level from the surface. This will open up an immense amount of stoping ground, where the ore can be mined and handled cheaply.

"The company intend erecting a 10-drill air compressor, hoist, and pumping plant of the most improved style, on the property. Sinking, drifting, and crosscutting will be done by large drills and in the stopes only baby drills will be used. This will facilitate and cheapen the mining and development work.

"The Elkhorn mine adjoins the Providence mine on the west, the Goldbug on the east, the Spokane on the north, and the Coronation on the south The Elkhorn and Providence mines are the largest shippers of high grade ore in the Greenwood camp and have shipped the highest grade ore.

"The Elkhorn can be developed into a very large producing mine and a big dividend payer. The mine is proved beyond doubt, and it is only a matter of sinking and developing the immeuse ore shoots below, which are already exposed above, by means of improved methods. Boundary creek flows through the west side of the property, where a concentrator can be erected at any time if so desired."

## RETURNS IN RICHELIEU.

### Harold Nelson's Latest Offering a Revival of a Strong Play.

"Richelieu," the great play in which Mr. Harold Nelson is shortly to be seen here, is more than a mere dramatic performance. It is a direct spiritual force—a marvelous illumination of history. Mr. Nelson, scholarly player that he is, has a temperament and personality peculiarly fitted to the effective portrayal of the famous prince of the Roman church. Critics everywhere concede Richelieu to be Harold Nelson's strongest character.

In the revival which Mr. Nelson presents here on March 30th there will be absolute completeness of costuming and scenic investiture. His manager, Mr. C. P. Walker, has provided sumptuous mounting. The supporting company will be even stronger than in the recent production of "Paul Kauvar," which pleased so much. Clearly Mr. Nelson's return in "Richelieu" means a treat for the lovers of worthy drama.

### RAILWAY SITUATION.

The C. P. R. wants a straight cash subsidy for the construction of a line from Spence's Bridge to Midway, also for the construction of the Kootenay Central line.

McLean brothers are asking for a guarantee of their bonds for the construction of a line of railway from Midway to Vancouver, known as the Coast to Kootenay.

The caucus has not heretofore been able to reach a decision in the matter The C. P. R. proposition has not met with support, several members opposing the idea of tying the entire southern portion of the province up to the C.P.R. and indefinitely postponing the construction of a short direct line of railway from the Boundary district to Vancouver. Moreover it is recognized that if the C. P. R. scheme should be adopted the government would have practically no control over it, whereas as the Coast-Kootenay scheme would be subject to government control and would afford an independent connection with both the C. P. R. and Great Northern lines at Midway.

The object of the visit of the C.P.R. officials at Victoria at this juncture is understood to be to make such modifications in their proposition as will ensure endorsement by the caucus.

### Champion Liniment for Rheumatism.

Chas Drake, a mail carrier at Chapinville, Conn., says: "Chamberlain's Pain Balm is the champion of all liniments. The past year I was troubled a great deal with rheumatism in my shoulder. After trying several cures the storekeeper here recommended this remedy and it completely cured me." There is no use of anyone suffering from that painful ailment when this liniment can be obtained for a small sum. One application gives prompt relief and its continued use for a short time will produce a permanent cure. For sale by all druggists.

H. E. Macdonald, contracting freight agent of the C. P. R., Nelson, spent a few days in the city this week.

Late advices are to the effect that the Silver Cloud mine promises to be one of the wonders of the camp.

The Strathmore mine has nearly two carloads of high grade ore on the dump, ready for shipment.

### WILL MOVE APRIL 1st.

Messrs. Cameron & Huff, the blacksmith's, wish to notify their customers that after April 1st they will be located in the old Russell-Law building, next to the Kootenay Hotel, Copper street.

# WEST FORK DISTRICT

## James Dale Tells of Its Possibilities.

## VAST MINERAL RESOURCES

### Most Promising Camp of the Kettle River District.

James Dale, a pioneer prospector and mining man, recently gave the Times some interesting data respecting the mining outlook on the west fork of Kettle river. Mr. Dale must be regarded as an authority because his acquaintance with the district dates back to 1896. It was to his explorations and discoveries that the West Fork first attracted the attention of mining men. He located the Carmi and Butcher Boy in 1896 but the rush of prospectors did not take place until the following year. The Sally, Bounty and Belle on Wallace mountain were located in 1897-98. During the past winter the Rambler, Sally and Bounty, which are situated on the east side of the river, were operated by their respective owners and shipped high grade ore in sleighs over the wagon road to Midway, 50 miles distant. The recent phenomenal strike on the Sally is well known. The ore body is 30 inches wide and averages $247 per ton. The output at present is 2½ tons daily. The ore on Wallace mountain occurs in true fissure veins, which have an east and west trend. The values are in silver. Six miles beyond, on the opposite side of the river, is Carmi camp where the Carmi and Butcher Boy mines are situated. The Carmi is equipped with stamp mill, which has been operated intermittently throughout the past winter. The values there are principally in gold. In addition to the clean-up at the mill, the management made several shipments of concentrates to the Trail smelter.

Mr. Dale is an enthusiastic believer in the future of the West Fork. He takes the view that the expenditure of very little capital will make the West Fork one of the richest producing sections of British Columbia. Just now Mr. Dale is patiently developing the Observatory group, just opposite Carmi mountain. He is running a tunnel to catch the lead and has already found indications of high grade ore. O. E. Anderson has awarded an interest to Tom King and J. McKay for driving a 170-foot tunnel on his group of claims on the summit of Carmi mountain. At the head of Dry creek, near Wallace mountain, have been located many promising free milling propositins including the Plucky, Napanee, Standard and Black Diamond groups. Mr. Dale says the West Fork is equally rich in mammoth zones of low grade copper-gold ore which only await development to rival the biggest mines in the Boundary. This mineral belt occurs at the head of Beaver creek, east of Carmi camp, and runs along the divide between the main river and the West Fork. Several of these ore bodies have phenomenal surface showings, their width in several instances being over 250 feet. Although the district has been neglected in recent years, Mr. Dale is hopeful that its high merit will soon be appreciated; and the extension of a railway up the river meets with his hearty championship.

Mr. Dale is likewise an old timer in the Boundary as he was the original locator of the Golconda group in Smith's camp.

For Wall Paper and new stock, see Smith & McRae.

Brown's Oregon grape wine is used by the best families. It is a world-renowned beverage.

The big tipple of the Crow's Nest Colliery at Fernie was destroyed by fire Sunday; loss $150,000.

UNION LABEL

FRIDAY MARCH 17, 1905

Foreign requirements are using up the bulk of current domestic production of copper and this fact, in connection with a large home consumption, contributes the essential requisits for a firm market. Copper consumers are very busy, and there is reason to anticipate increased activity among the users of the metal. The electrification of railroads, and the liberal employment of copper in the manufactures will create an urgent demand for enormous quantities of copper. With the important developments under way, and others to be projected, there are certain to be many channels of absorption for the output of copper. The Chinese empire has come into view as a conspicuous buyer of copper, and that country of tremendous population and great territorial extent, has recently developed the ability to take copper from here in immense quantities. The heavy buying for oriental account ranks as one of the prime features in the present extrememly interesting situation. Shipments of copper to the far east will continue to figure in a large way each month of 1905. This is known from the business for Asiatic delivery already secured and what further contracts may be obtained from Chinese sources becomes, therefore, an interesting subject of conjecture. It is apparent that the absorbing power outside of the United States gives assurance that copper cannot be forced down to the minimum prices of former years as long as the foreign outlet holds anywhere near the present level. With the enormous world demand now experienced the market has a problem of a different complexion, namely, how copper may be kept from advancing above what has hitherto been considered a reasonable basis of value. United States copper exports in 1904 had a valuation of $72,690,653, or $30,665,227 greater than those during 1903. These figures emphasize forcibly the growth of the foreign demand for copper. Domestic buyers have not made any extraordinary purchases very recently, but with produeers so well sold ahead the market is in position to maintain its firm tone.

## GRANBY COMPANY.

### General Superintendent Hodges Describes Proposed Enlargements.

A. B. W. Hodges, general superintendent of the Granby company, has been giving the News-Gazette some interesting details respecting the proposed enlargement of the smelter at Grand Forks. Said he:

"This week the concrete for foundations will be started, the stone work a little later, and brick work somewhere around the middle of April. The two furnaces are now being built in the east. They will be of a rather larger type than the present furnaces, with a capacity of 400 tons each. At present we usually smelt between 1,700 and 1,800 tons of ore daily, and expect to reach the 2,500 ton mark when the two additional furnaces are installed."

Asked as to the location and size of the big new stack Mr. Hodges stated that it would be built just above the carpenter shop above five hundred feet from the old stack, and with the base about fourteen feet higher than the old one. The flue dust chamber will be nearly five hundred feet long, eleven feet high and ten wide, and will take some 400,000 brick in constructing. The huge smokestack will be the same height as the old one, viz., 150 feet, and will use up another 400,000 brick. It is the intention when the additional furnaces are in place to divide the whole system so as to give four furnaces to each stack.

"What about the length of time on the construction work, Mr. Hodges?"

"Entirely depends on the way the brick comes in. We shall have some thirty or forty men on the work. The company's fiscal year commences on July 1st and I shall endeavor to have the whole work completed by that time and the full complement of eight furnaces at work. We shall probably cease running out Nos. and 2 in granulation at the same time, and use the slag pot for the whole system."

"It has been stated that the Great Northern is to take all the blister copper, can you say anything on this point, Mr. Hodges?"

"The statememt is decidedly wide of the truth. Our intention is to divide the freight with some fair degree of evenness between the C.P.R. and Great Northern. Each road will bring down so much ore from Phoenix, it will also haul the necessary coke to smelt it and will get the corresponding share of blister copper. Somewhere about half of the ore, coke and copper will be handled by each railway."

In this connection it may be mentioned that the Great Northern experienced some difficulty in getting to the converter building and proposed to build a spur, looping around the south end of the works and thus getting access to the converter. An arrangement was completed, however, with the C.P.R., whereby the latter agrees to put a switch to the Great Northern track on the north of the works, and to haul all copper for the Great Northern from the converter to the latter company's line.

---

A dispatch from Toronto concerning the declaring of a dividend by the St. Eugene Consolidated Mining Co., Ltd., was largely misleading. It stated that only 3,202,000 shares of the capital stock had been issued and paid up. As a matter of fact the number of shares issued is 3,500,000. There were some 300,000 shares in the treasury and these were purchased not long since by the Gooderham-Blackstock syndicate at 50 cents a share, and the proceeds were devoted to development. The dividend just declared is at the rate of two cents a share, and is for $70,000 and not for $64,040, as stated in the dispatch. Up to date the dividends aggregate $450,000 instead of $338,000, as stated in the Toronto dispatch. There have been two dividends of three cents a share, or $105,000 each, or $210,000 for the two. There have also been two dividends of two cents a share each or $70,000 or $140,000 for the two. This makes a grand total of $350,000. The St. Eugene is in splendid shape, has large reserves of ore in sight and the outlook is favorable for a continuance of dividends at regular intervals for a considerable period.

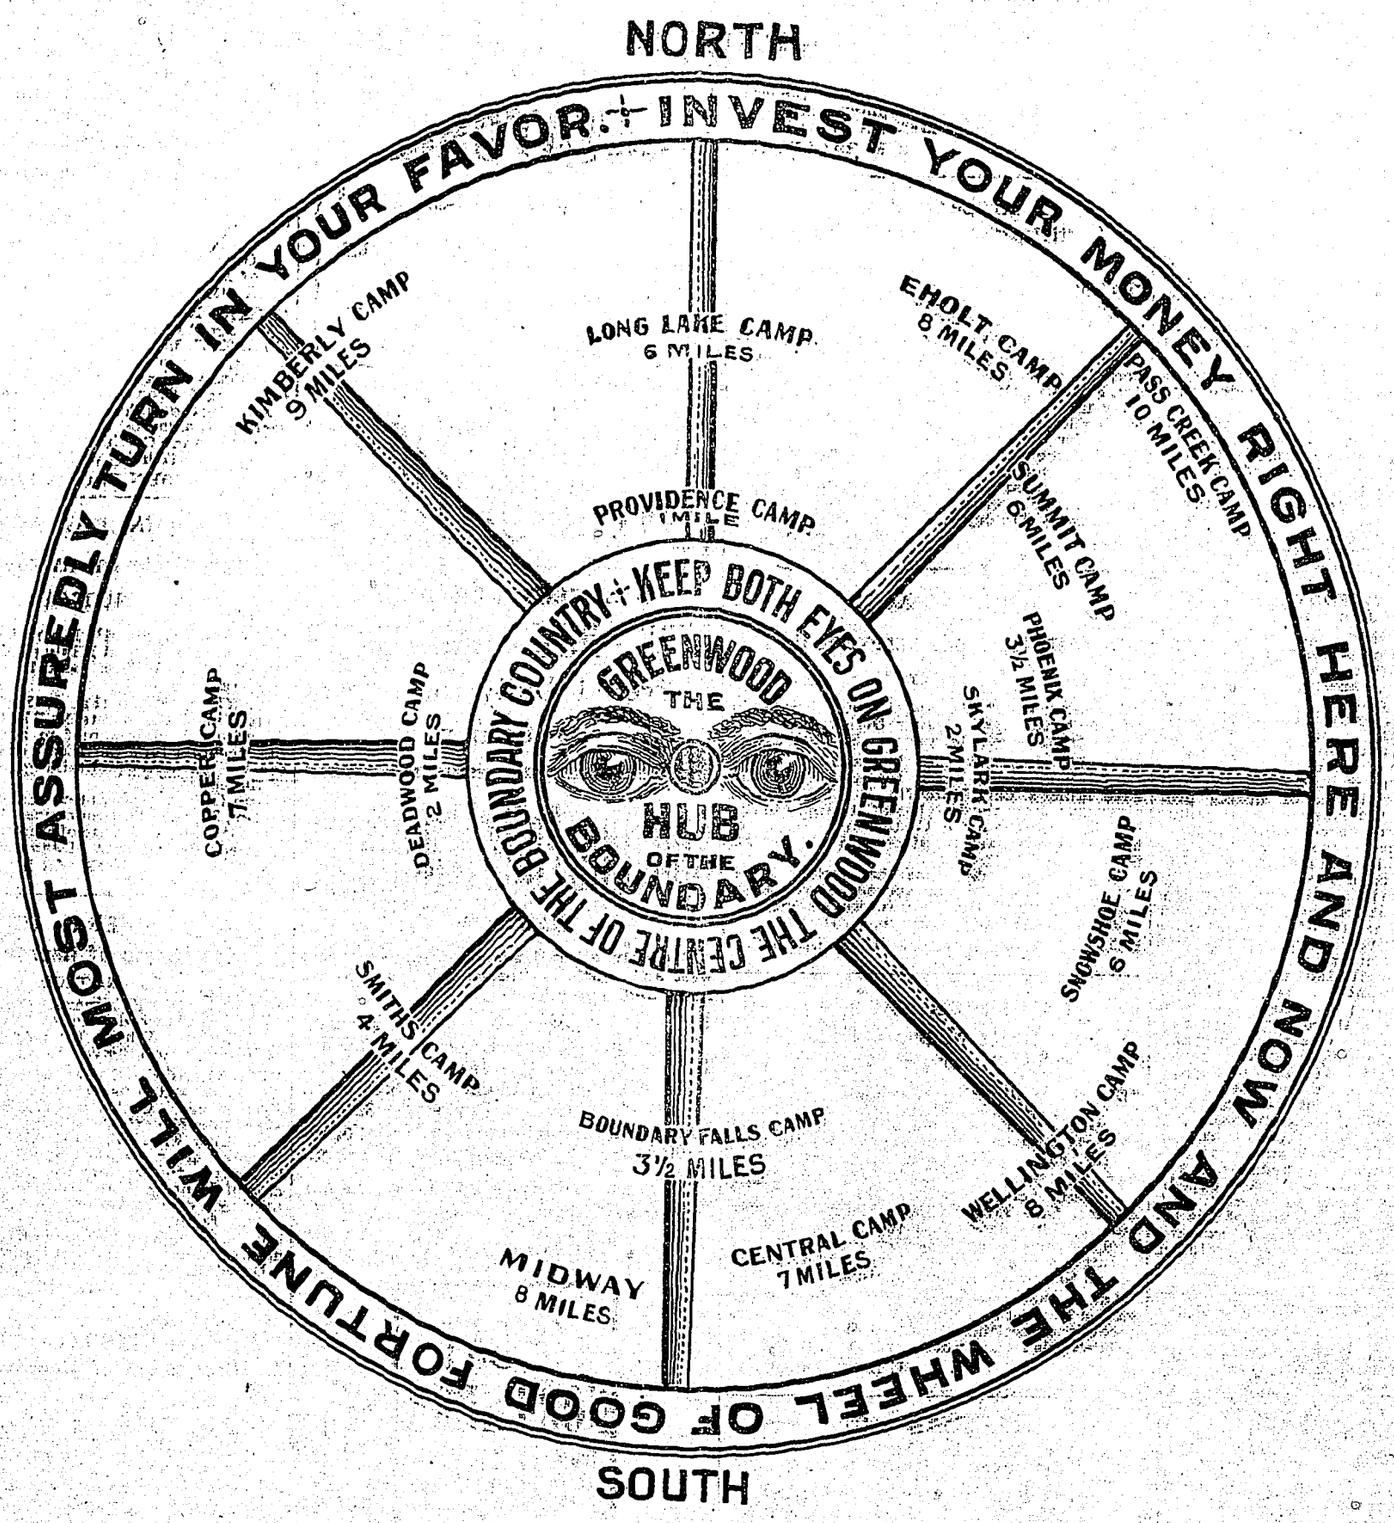
Job Printing
IS A WORK OF ART
Let us show you what we can do in that line for you.

# No Time Equal to the Present



Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitable operation has made the Boundary famous as a mining centre, and every day adds more to the list of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For **NINETY DAYS** we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from $50.00 up, at terms to suit the purchaser. Make your selection and make it early.

## RALPH SMAILES,

AGENT FOR THE GREENWOOD TOWNSITE COMPANY.

## TUNNEL AND STOPE

The amount of water raised per ton of ore varies very largely in different mining districts. The tendency is for the amount of water to be pumped to increasingly exceed the amount of ore mined. This rule apparently holds true to a depth of about 1,500 feet; below that depth there is not sufficient data to hand to properly determine the queston. In some district the amount of water appears to increase, whereas, in others it appears to diminish. We have in mind a mine where the water course apparently did not go down below the 700-foot level. Five hundred feet lower the mine was as dry as a bone, and water had to be packed from the levels above in order to give the men a supply of water for drilling purposes. In Leadville the amount of water pumped is about thirty tons to the ton of ore mined. In Cripple Creek the tonnage was relatively much greater, but since the El Paso drainage tunnel was driven the value of our data is questionable.

---

The Tennesee Copper company's annual report, just issued, shows operations of immense proportions. The mines and smelters of this company are located in the Ducktown district of Polk county, Tennesee. The mines now composing the property were opened in 1850. J. Park Channing, the president, in his report last week says: "Early in the year it was decided to permanently abandon roasting ore in open air heaps and to inaugurate pyritic for raw smelting as soon as possible. The disorganization due to the change materially reduced the production for the year and temporarily increased the costs. The present smelting plant contains three 15-foot blast furnaces. The new addition will consist of four 22½-foot furnaces, making seven furnaces in all, of which one will be a spare furnace, thus insuring a capacity of at least 600,000 tons of ore per annum. The available ore in the mines has been increased to 3,425,000 tons showing ore in sight for the enlarged plant for nearly six years, with the bottom of all the mines showing good ore under foot of undiminished grade. The gases from the pyritic or raw ore furnaces have proven to be of sufficient richness to produce sulphuric acid by the ordinary methods, and plans are now being made for a plant to produce 400 tons of acid per day so arranged that it can be enlarged to 800 tons." The report of the treasurer shows that the production for the year from the company's own ores amounted to 8,617,697 pounds of fine copper in the form of pig and refined copper, while the production from custom ores amounted to 186,411 pounds of fine copper in the form of pig copper.

---

### NOTICE.

I have had stray animal on my place since middle of October last, viz. a red heifer coming three year old, no visible brand or mark of any description. If not claimed within three week from date of this insertion will be sold to pay expenses.

Dated this 3rd day of March, 1905.

THOS. WISTED, Rock Creek.

---

**Synopsis of Regulations Governing the Disposal of Dominion Lands within the Railway Belt in the Province of British Columbia.**

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged :—

Sawn lumber, 50 cents per thousand feet B.M.

Railway ties, eight and nine feet long, 1½ and 1¾ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales.

A license is issued so soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B. M., for square timber and sawlogs of any wood except oak; from ½ to 1½ cents cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of twenty-one years at a rental of two cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead, is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligable to make a homestead entry under the provisions of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

Ottawa, February 4th, 1905.

### NOTICE OF FORFEITURE.

To John Nelson, J. A. Munson and H. Magnuson or to any person or persons to whom they may have transferred their interest in the Morning Glory and Rainstorm Mineral Claims situate on Cedar Creek, main Kettle River, in the Greenwood Mining Division of Yale District.

You are hereby notified that we have expended the sum of $400 for work on the above mentioned claims and $10 for recording the same for assessment work for two years, such being required and necessary to hold said claims for the years ending the 6th of June, 1903 and 1904, under the provisions of the Mineral Act and Amending Acts and if at the expiration of ninety days from the date of first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure together with all costs of advertising, your interest in said mineral claims shall become invested in us, your co-owners, upon filing in the proper office in that behalf the affidavit required by section 4 of the "Mineral Act Amending Act, 1900."

Dated 3rd March, 1905.

CHARLES E. JOHNSON,
JOHN BERGMAN.

**Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.**

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered coal in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5 00.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When 500 has been expended or paid, th has been expended or paid, the locator may, upon having a survey made, and upon complying with the other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 ft. square; entry fee, $5 renewable yearly. On the North Saskatchewan river claims for either bar or bench' the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental, $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles, within six years from such date Rental $100 per mile for first year, and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being 1,000 to 2,000. All other placer claims shall be 200 feet square.

Claimes are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of mining recorder's office. One additional day allowed for each ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two 1,500 altogether, on the output of which no royalty will be charged. the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and one half per cent. on the value of the gold shipped from the Yukon territory to be paid to the Comptroller.

Sidley, B. C.

CERTIFICATE OF THE REGISTRATION OF AN EXTRA-PROVINCIAL COMPANY.

"COMPANIES ACT, 1897."

I HEREBY CERTIFY that the "Spokane Boundary Mining Company" has this day been registered as an Extra-Provincial Company under the "Companies Act, 1897," to carry out or effect all or any of the objects of the Company to which the legislative authority of the Legislature of British Columbia extends.

The head office of the Company is situate at the City of Spokane, within the County of Spokane and State of Washington.

The amount of the capital of the Company is one hundred thousand dollars, divided into one million shares of ten cents each.

The head office of the Company in this Province is situate at Greenwood, and Arthur M. Whiteside, Barrister, whose address is Rendell Building, Copper Street, Greenwood, B. C., is the attorney for the Company.

The time of the existence of the Company is 50 years.

Given under my hand and seal of office at Victoria, Province of British Columbia, this 30th day of January, one thousand nine hundred and five.

[L. S.] S. Y. WOOTTON,
Registrar of Joint Stock Companies.

The objects for which the Company has been established and registered are:

The location, acquisition and operation of mines and mining property, and dealing generally in mining claims, both quartz and placer; the working, operating and conducting mines, and acting as a miner under the laws of Washington, and when lawfully registered, under the laws of British Columbia; to lease, work as a partner or otherwise, own and hold and control all charter of mining properties, and to equip the same with all character of machinery and necessary appliances; to deal in and dispose of mines, and to let the mining property of this Company to others to work as lessees or upon royalty, or in any other manner deemed to be proper by the trustees; to build smelters, concentrators and reduction works, and means of transportation in connection therewith, including trams and railways; to acquire timber and timber lands, and real property of all kinds whatsoever; to smelt, refine, reduce and concentrate ores of all persons whomsoever; to deal in and dispose of real and personal property of all and every character; to equip electric plants and waterworks, and to supply electrical power and water to the public generally; to borrow money and to issue debenture and other bonds therefor, and all character of evidences of indebtedness; and to mortgage hypothecate or pledge by mortgage, deed, deed of trust or otherwise, any and all of the property of this Corporation to secure its indebtedness, and to acquire funds for any business deemed expedient, proper or necessary; and to do each and every act deemed by the directors of this Incorporation necessary to carry out the general purposes of this Incorporation as herein set forth.

H.B.K. BRAND

# BIG SHIRT

Made big enough for a big man to work in with comfort. Has more material in it than any other brand of shirt in Canada. Made on the H.B.K. scale it requires 39½ to 42 yards per dozen, whereas common shirts have only 32 to 33 yards.

That's the reason why the H.B.K. "Big" Shirt never chafes the armpits, is never tight at the neck or wristbands, is always loose, full and comfortable and wears well.

Each shirt bears a tiny book that tells the whole history of the "Big" Shirt, and also contains a notarial declaration that the H.B.K. "Big" Shirt contains 39½ to 42 yards of material per dozen.

Sold at all dealers but only with this brand:—

I. H. HALLETT.

# Our Mines

In ten years Rossland mines shipped 1,929,304 tons of ore.

The Sullivan smelter at Marysville is in active operation.

The St. Eugene mine has declared a dividend of $65,000 payable on the 15th inst.

Sixty tons of ore were shipped from the Skylark last week, part going to the Nelson and part to the Granby smelter.

Wednesday was payday at the E. P. U. mine. The disbursements for wages and supplies for February exceeded $2500.

The lessees of the Bell mine at Whitewater are preparing to ship 400 tons of zinc ore which are on the dump. This will be followed by other shipments.

The output of the St. Eugene for the month of February was 2551 tons. Water from the flume is again being used and is furnishing about half the power for the mill.

The two new furnaces now being manufactured for the Granby smelter in Chicago, are expected to be shipped by the first of April. The makers are the Allis-Chalmers company.

Finding that the ores of the Rawhide and Brooklyn blend and flux so well, the Montreal & Boston Consolied has discontinued ore shipments from the company's Sunset mine in Deadwood camp.

Friday was the monthly payday at the Granby and Montreal & Boston mines. The amount of cash distributed was in the neighborhood of $50,000 or including that at the two smelters of these companies about $75,000.

In a few days it is the intention to increase the daily tonnage of ore from the Granby mines over the Great Northern to 700 tons, and in the course of a month to about 1,000 tons, if everything works out as arranged. The C. P.R. is now taking out 44 cars, or 1300 tons, daily for the Granby Co.

The pumping out of the Winnipeg mine still continues, and will probably last for another week or two, when the workings can be examined and sampled. It is anticipated that from 25 to 40 men will be employed there, and W. S. Macy is preparing to open a boarding house to take care of them. The boiler from the Senator mine has been installed there.

On the Helen in Anaconda work will be resumed in a few days. A sorting table has been put up for convenience in handling good-sized lots of ore. Several sets of square timber and a few cords of firewood are on the ground. The shaft is down about 80 feet and considerable drifting has been done. The lead is from 12 to 18 inches in thickness and carries good gold values.

The International Coal and Coke company at Coleman, has now 75 miners at work and about 50 men on repair and construction work and this force will be largely added to in the near future. The main entry on this property is now in on the coal vein a depth of 3000 feet. This with the working in the slope which has now a depth of 460 feet and gives a vertical depth on the coal of 325 feet below the main entry, will give plenty of room for miners and allow of the management largely increasing the output. At present the company is working but one shift and are getting out for shipment some 300 tons of coal per day.

Dr. Spankie, of this city, has bonded the Abercraig and Prince Henry group of claims situate north of Twin creek and directly opposite the Goldfinch mine. Development work was started this week. There are several leads on the group, which is regarded as one of the most promising propositions in the camp. The values are in gold and silver, the former predominating. A series of assays ranged from $25 to $227 per ton. The Abercraig and Prince Henry are practically full claims. Experimental shipments to the B.C. and Trail smelters several years ago gave very satifactory returns. The group is owned by G. A. Rendell, J. N. Paton and G. B. Taylor of this city. The bond is for a period of eighteen months.

Both the 30-drill compressors of the Granby mines are in commission.

Anthony J. McMillan, managing director of the Le Roi and Snowshoe mines, returned from England last week.

A bill has been introduced into the legislature compelling drummers selling goods to be imported into the province to pay a license. Liquor and cigar men are to pay $100 and others $50 every six months.

It is understood to be the intention to start active operations on the Stemwinder mine, Phoenix, whenever the Granby Co. can spare the compressed air. The property is owned by the Montreal & Boston Copper Co.

Part of the zinc machinery for the Kaslo sampler arrived in Kaslo on Monday from Denver, Colo., being in transit only sixteen days. The machinery will be installed at once and the plant will probably be in operation next month.

A Phoenix syndicate has bonded the Mavis claim, Skylark camp from Mr. Wickwire of this city, for $15,000. Its members include Dalley Morkill, J. A. Hannah, J. J. Strutzell, C. M. Campbell, Geo. McNicol and W. X. McDonald. Development work will be started immediately.

Work upon the smelter at Frank is being pushed and nearly 100 men are now given employment there. The office building is nearly completed and the foundations for the big engine and boiler house are up. Work upon the foundations for the main buildings will be begun next week.

Last Saturday at the semi-annual election of officers for Phoenix Miners' Union, No. 8, the following was the result: President, L. F. Holtz, vice-president, John McIvor; treasurer, William Tatham; conductor, Sam McLeod; financial secretary, Archie F. Berry; delegate to district convention, W. Rogers; delegate to W.F. & M. convention, A. F. Berry.

The only really satisfactory method of determining the weight of ore in place is to take a slope, carefully measure up an excavation and weigh the ore that has come out from the cavity so made. Of course to old rule of using the specific gravity of the average material, if carefully applied with the proper factor of safety, will give fair results. It is often the only one that can be adopted. The factor of safety applied, of course, is very largely a matter of judgment and experience. It has been found, however, that the application of the specific gravity rule usually gives results somewhat in excess of those obtained by the application of the practical method of breaking down ore, measuring the cavity made, and weighing the ore obtained from it.

The term "tunnel" is used in mining in quite a different sense to that used by the railway engineer. In railway engineering a tunnel is a horizontal opening through rock, or material in place, both ends of which are open to daylight. An adit in mining is a term that should be confined to a drift or level on a vein which starts at surface and follows the lode. This is not really a mining tunnel, although commonly so called. A mining tunnel, of course, is usually open to daylight at one end, but it differs from an adit by the fact that it is driven through country rock and not on the vein. We have seen some criticisms on the use of this term "tunnel" in mining operations, but we think it is a perfectly proper term if applied only to drifts started at daylight and driven through country rock, either for the purpose of exploration or for drainage purposes. Thus, it is perfectly proper to speak of the Newhouse tunnel, which was driven to drain and explore the mines of the Idaho Springs-Central City district.

"We expect to have the survey for the Kettle Valley line from Republic to Spokane completed April 15," said H. W. Warrington, chief engineer, of that road, in Spokane the other day. "The road will be 140 miles long and will cost $3,500,000,' he continued, "That will make it almost exactly the same length as the Corbin road to connect Spokane with the Canadian Pacific, and the cost will be about the same. Our company is also locking forward to an extension from Grand Forks north and west through McKinley camp to Vernon, B.C, and then on to Spence's bridge on the main line of the Canadian Pacific railway. In connection with the Canadian Pacific, it will give a road from the British Columbia coast to the Kootenay country almost as short as the route which James J. Hill proposes to build on from Midway B.C., to the tidewater. The Hill route would make frequent curves back and forth across the American line. The first section of 50 miles up the North Fork of the Kettle river would connect Grand Forks with the new mining districts of McKinley camp. The next section of 100 miles would carry the road to Vernon, at the head of Okanagan lake, on a branch from the main line of the Canadian Pacific. Another extension of 150 miles from Vernon through the Nicola coal fields would connect the system with Spence's bridge, 300 miles from Grand Forks. The road has secured a Dominion subsidy of $6400 a mile for the branch up the North Fork.

### A Chicago Alderman Owes His Election to Chamberlain's Cough Remedy.

"I can heartily and conscientiously recommend Chamberlain's Cough Remedy for affections of the throat and lungs," says Hon. John Skenick, 220 So. Peoria St., Chicago. "Two years ago during a political campaign, I caught cold after being overheated, which irritated my throat and I was finally compelled to stop, as I could not speak aloud. In my extremity a friend advised me to use Chamberlain's Cough Remedy. I took two doses that afternoon and could not believe my senses when I found the next morning the inflammation had largely subsided. I took several doses that day, kept right on talking through the campaign, and I thank this medicine that I won my seat in the council." This remedy is for sale by all druggists.

## TOWN TOPICS

For Wall Paper and new stock see Smith & McRae.

Born at Anaconda to Mr. and Mrs. J. R. Jackson, a son.

W. K. C. Manly, of Grand Forks, was in the city this week.

The new hotel at Sidley is completed. A store and hotel there would help the farmers.

Frederic Keffer, general manager of the B.C. Copper Co., was in Nelson this week.

The eighth annual meeting of the B. C. Provincial Teachers Institute will be held at Revelstoke on the 25th, 26th and 27th prox.

Notice is given that the examination of assayers for license to practice in British Columbia will be held in Victoria, commencing April 25th.

Geo. Brice, an old timer in the Boundary, will spend the summer improving his ranch near Chewela. He left Monday for that place.

For Sale—Furniture and furnishings of six-roomed house, including Singer sewing machine. Apply to K. M. Stephens, cor. Kimberley and Ida sts.

Rev. J. H. White, D.D. superintendent of Methodist missions in B. C., will deliver a lecture in the Methodist church here tonight at 8 o'clock. Admission free.

An effort is being made to establish a stage line between Hedley and Oro, Wash. If this is effected direct stage connections can be made between Phoenix and Hedley.

The Yale-Columbia Lumber Co. have decided to change their mill at Cascade from a circular to a double-cutting band mill, and have entered into negotiations with the Warterous Engine Works Co. for the new plant.

Baptist church. As the building is in need of some repairs there will be no services in the Baptist church for, it may be three or four weeks, when it is expected that some definite arrangement will be made for regular services.

Manager C. P. Walker has furnished Mr. Harold Nelson with a scenic production of metropolitan completeness for the forthcoming grand revival of Bulwer Lytton's great play, "Richelieu." A strong company, headed by Clifford Lane Bruce and Helene Scott, will be in support of Mr. Nelson.

A well-attended meeting of Greenwood Typographical Union, No. 358, embracing the Boundary district was held in Phoenix last Saturday evening when the following officers were elected and installed for the ensuing six months: President, Harry W. Falconer; vice-president, J. W. Ellis, of Greenwood; secretary-treasurer, G. A. Evans (re-elected), of Grand Forks; sergeant-at-arms, Brock Hillyard, of Phoenix; executive and auditing committe, W. B. Willcox and Brock Hilliard of Phoenix.

Less than four months ago the Conservative papers of the Boundary very assertively stated that, if elected, Duncan Ross, the Liberal canditate, would not or could not secure any Dominion aid for this district, and that the district didn't need anything anyway. Now these same papers are lauding our member for having secured a customs office for Phoenix and better mail facilities for both Phoenix and Greenwood. Score two for Duncan.—Grand Forks Evening Sun.

For that tired feeling drink Oregon grape wine. Family orders filled by McCreath

Mrs. A. E. Ashcroft and children will leave on Saturday for a visit to England.

Mr. Caron of Anaconda has moved part of his furniture to his ranch, where he spend the summer.

At Sidley on Tuesday, March 7th, at high noon John A. Gillis and Phoebe E. Johnston were married by the Rev. A. H. Cameron.

As a result of the improved demand for lumber, the sawmill of the Yale-Columbia Lumber Co. at Robson, which has been idle since last fall, will resume operations next month.

On Sunday the services in the Methodist church will be held at 11 a.m. and 7:30 p.m. The pastor will preach in the morning and Dr. White in the evening when a missionary service will be held.

The following extra-provincial companies have been authorized to carry on business in British Columbia, The Great Northern Express Company, with A. H. McNeil of Rossland, as attorney; the Southeast B.C. Land & Oil company, Limited, with Geo. W. Urquhart of Rossland attorney for the province.

The Warren cup in the inter-rink competition of the Greenwood Curling club was won this season by W. G. McMynn's rink. The honors are equally shared by W. Sherratt, T. H. Paterson, S. M. Johnson and W. G. McMynn, skip. They won 12 out of 14 malches. Soft weather prevented the playing off of a tie for second place between the rinks of E. W. Bishop and K. C. B. Frith.

Jonas Bushell of Seattle, who is organizer for the Independent Order of Good Templars for British Columbia, spent several days in Phoenix and organized a lodge of that order there. The lodge was started with 26 members. Mr. Bushell also instituted a lodge in Greenwood with 32 members and proceeds to Grand Forks on the same business. Since January 6 he has organized 12 lodges of the order in this province with 400 members, making a total now of 21 lodges and 684 members. The order has all told over 750,000 members with branches all over the world.

J. S. Dennis, of the C.P.R., has been in Victoria lately endeavoring to arrive at a settlement with respect to the land grant to the Columbia & Western line. Mr. Dennis wants land to take the place of the blocks cancelled by the famous bill 16, introduced by Col. Prior's government. According to the terms of the agreement between the company and the government the section of the road from Midway to Penticton was to be built before the land grant should be made for the section built to Midway. This was over-ridden when blocks 4593 and 4594 were given. The C. P. R., it is said, demand that a settlement shall be made in some manner by the government.

H. W. Falconer, who has been a resident of this city for two years and who has been connected with the Boundary Creek Times during most of that period, left today for Nelson to accept the position of foreman of the Daily Tribune. Mr. Falconer, during his stay here, took a deep interest in sports, curling being his hobby. He filled very acceptably the position of secretary treasurer of the local curling club for two years. Mr. Falconer will be followed by the good wishes of his numerous friends.

The Last Chance shipped two car loads of ore this week.

Good progress is being made on the driving of the Goldbug tunnel.

The development of the Morning Star is to be resumed next week.

J R. Jackson has built a commodious barn near his residence in Anaconda.

The Helen mine is looking well. It will soon be one of the largest shippers in the camp.

J. C. Haas, M.E., Spokane, is in the city. He has completed arrangements for developing the Golconda group. Smith's camp, on an extensive scale.

The work of sinking the shaft on the Bay claim an additional fifty feet has been resumed. Meantime ore is being extracted from the drift on the 42-foot level.

R. Machin, agent for the Bennett fuse and Holman drill, was in the city this week. Mr. Machin received a warm welcome from his numerous friends.

J. W. Lawrence, supt. of the Columbia & Western division of the C. P. R., was in the city Wednesday on one of his periodical tours of inspection. He regards the outlook for mining greatly improved.

I. Robert Jacobs, of Montreal, returned to town this week after a prolonged absence. Mr. Jacobs in the meantime has been studying art and high finance. He owns extensive mining interests in the Boundary and will remain in Greenwood for some months.

Paul Reese, of Chicago, visited Greenwood this week He is described as the psychological wonder of the age. Mr. Reese reads thoughts and is an adept in occult matters. During his stay here Mr. Reese was entertained by Mr. and Mrs. Frederic Keffer. Mr. Reese also visited the Mother Lode mine.

A Victoria dispatch says that G. R. Naden, mayor of Greenwood, and J. R. Jackson, representing the property owners of Anaconda, are there for the purpose of securing government assent to the city of Greenwood securing record of Lind creek water promptly in order that the city may carry out the proposed waterworks extension immediately. The property owners of Anaconda have agreed to waive their claims to the use of the water of this creek in consideration of an agreement by the city of Greenwood to supply them with water and fire protection service.
