Official Agents.

BUYS THE CRESCENT

Chicago Capitalist Secures Fine Property.

W. H. JEFFERY, MANAGER

Well Kuown Mining Engineer Placed in Charge.—Money and Machinery Ready for Active Work.

An important mining deal was closed this week when Colonel L. T. Dickason of Chicago purchased H. H. Shallenberger's interest in the Crescent mine in Skylark camp. The price involved has not been given out but it is known that it runs into five figures. The Crescent was first worked by Mr. Shallenberger and a number of Spokane people, the company being known as the Crescent Mines, Ltd. Mr. Shallenberger was the active partner in the company and was anxious to thoroughly develop the property but the Spokane people were not particularly active. About a year ago he closed a deal by which he secured the interests of the Spokane people and sold a half interest to Colonel Dickason. When the Colonel arrived last week he at once visited the mine and opened negotiations for securing Mr. Shallenberger's share with the result that the deal was finally concluded a few days ago.

The new propeietor is possessed of the necessary capital and enterprise to make the Crescent what it should be, one of the best high grade mines of Greenwood. The future of the mine is further assured by the management under which it has been placed. Colonel Dickason has placed W. H. Jeffery, M. E., in charge of the work. Mr. Jeffery has started a crew of men at work cleaning out the old shaft and the work of development will start as soon as possible.

In the course of the work done under previous management a shaft was sunk over 100 feet and considerable drifting was done and about 100 tons of rich silver-gold ore was shipped to the smelters. Before the mine closed last winter good buildings were erected and an electric hoist was installed. With these equipments at hand ready for use the work will be pushed along without interruption.

Flowers at Mrs. Bernard's, phone A31

SITUATION WANTED.

Engineer with third-class license wants position. Expert on air compressors. Long experience and best references, sober, industrious. Write F. J. Wright, Carbonado, B. C. 43-45

THE CITY COUNCIL

Debentures Sold.—Waterworks System to Be Extended.

The city council held its regular meeting last Monday night, with acting Mayor Bunting in the chair. The minutes were read by City Clerk Taylor and adopted as read. The acting mayor reported that the unsold portion of the newly issued debentures had been disposed of by the Toronto brokers.

The firm of Russell-Law-Caulfield Co. were awarded the contract for supping cement for the water works department, their tender being the lowest.

The question of extending the water system came up for discussion and it was decided to take immediate steps to carry out the work. Mr. Bunting and Sidney Johnson, superintendent of the water works, were appointed to open negotiations for the securing of a dam site on Providence creek and to report at the next meeting of the council.

It was decided to give the work of painting the street hydrants to George Evans, and to award the tender for paint to the lowest bidder.

Mr. Stutridge, the tenant on the city farm, applied for a 7 year lease. A committee and the city engineer was appointed to inspect the place and report before the request be granted. The only account presented was one by the city engineer of $75 for surveying the "Little House" mineral claim. The account was ordered paid. Council adjourned to meet in two weeks.

WILL PLAY ABROAD

Citizens' Band Will Visit Republic and Rossland Next Month.

The Citizens' band is a local organization that may be depended upon to do Greenwood honor, from a musical standpoint, wherever they appear. Towns less favored than the metropolis of the Boundary that have had the privilege of hearing these musicians in days gone by, have been longing ever since for the return of the boys in scarlet. Among these are Republic and Rossland, and the former has invited the band to assist in the Fourth of July celebration there, and the invitation has been accepted. Rossland has arranged for the band to take part in the Miners' anniversary to be held on July 16th. For the entertainment of local admirers the band will give a concert in the Auditorium on July 26th.

MARRIED IN SPOKANE

Elson-Henderson Nuptials Celebrated Abroad.

A quiet wedding was celebrated in Spokane this week when W. Elson, a popular young business man of Greenwood was married to Miss Meriam C. Henderson, also of this city. The bride is well known to a large circle of Greenwood people and is proprietor of a first-class millinery establishment. The happy couple are enjoying their honeymoon in the neighboring state. They are expected to return next week and will reside in Greenwood, where their many friends will wish them both happiness and prosperity.

FOUR-SCORE YEARS

Mrs. Charles Kinney gave a party Monday afternoon in honor of her mother's 80th birthday. About twenty ladies enjoyed the hospitality of their hostess, and Mrs. J. J. Canfield won the prize in the competition game. Mrs. Kinney's mother, in spite of her burden of four-score years, is bright and cheerful and greatly enjoyed meeting so many friends, old and new.

GOOD ORE AT EUREKA

Work started Wednesday on the Greenwood-Eureka Mining Co.'s property with five men in charge of Mr. Hamlin. A tunnel is being run on the lead and some fine samples of ore have been taken out. The Eureka is proving an economical mine to work. The owners expect that the tunnel will gain nearly a foot in depth for every foot in length.

CAMPAIGN STARTED

Socialist Leader Fires First Gun.

SPEAKS IN VANCOUVER

Will Visit the Boundary in a Short Time.—Organizing for the Fight.

That there is to be an election within the next three months is the positive conviction of J. H. Hawthornthwaite, M. P. P., the leader of the provincial socialists, and he and his party are making ready for the fray. Last Sunday night, in Vancouver, Hawthornthwaite started his ball rolling with a campaign speech in which he declared that the red flag of socialism would yet wave over government house at Victoria. The most striking parts of his speech are herewith reproduced from the Vancouver World's report of the meeting:

"It was a large audience that listened to J. H. Hawthornthwaite, M. P. P., in the Grand theater, Vancouver, last Sunday night. The date of Mr. Hawthornthwaite's visit was fixed some time ago as an important item in a program of addresses by various speakers chosen by the executive of the socialist party, but so rapidly the face of provincial politics changed since the program was printed that what might have been an educative address on the principle of socialism was altered to a vindication of the parliamentary record of Mr. Hawthornthwaite and his colleagues. In anticipation of an early contest in the province, Mr. Hawthornthwaite started last Monday on a tour of organization through the interior, in the course of which he will visit the Slocan, Rossland and the Boundary districts.

"Mr. Hawthornthwaite prefaced the main part of his speech by remarking that the people were probably face to face with another provincial election. From this statement he proceeded to remark that when he last spoke in Vancouver he read a list of 21 measures which he intended to introduce. Nineteen of these, and seven others, had been introduced. The first introduced was a bill extending the franchise to women. He had gone back a little on the women of British Columbia since then. They had not half the spunk of their sisters in the old country. If they had filled the galleries, these disgruntled, atrophied old tories would would have given way to the demands of the wives and daughters of the proletarians. He declared that he had made the effort of his life on that occasion, but the house seemed afraid of the speaker, an old chap 60 years of age, that any woman could shake out of his boots. He urged organization among the women of the province. and promised that he would continue to bring up this matter as often as was necessary till it was inscribed on the statute book. Proceeding Mr. Hawthornthwait referred to the introduction of a bill to amend the coal mining regulation act, requiring of foremen in mines a knowledge of ambulance work. After he had made it plain that this amendment would have the effect of diminishing the sums paid in compensation for injuries, it went through like clockwork. He said he found it impossible to deal with with the eight-hour day question otherwise than piecemeal, and it had been his intention to get it to apply to one industry, and then, by subsequent amendments, to other industries. His bill on the question did not become law, in spite of the fact that workingmen in smelters were the most inhumanly exposed of any workingmen in this province. Mr. Macdonald, leader of the liberal party, visited a number of the owners of smelters and induced them to grant an eight-hour day. 'When the matter was introduced,' said the speaker, 'I handed it over to Mr. Davidson, who went in as a capitalist-labor member and comes out a straight labor member. He introduced the bill,

RENDELL & CO.

SCHOOL REPORT FOR JUNE

DIVISION I.—J. L. WATSON.

Pupils actually attending..... 30
Average daily attendance..... 27.06
Percentage..... 90.02

Pupils present every session:

Jack Allison, Leonard Allison, Violet Archibald, Harry Archibald, Emma Broten, Jim Galloway, Theodore Hunter, Marvin McIntyre, George Redpath, Willie White.

DIVISION II—MISS C. M. MARTIN.

Pupils actually attending..... 38
Average daily attendance..... 37
Percentage..... 97.37

Pupils present every session:

Percy Archambault, Joe Archambault, Leo Barnett, Jack Cairns, Maude Eales, George Eales, Everett Eaton, Edward Hardy, Alex Hunter, Charlie McArthur, Lawrence Parker, Hazel Redpath, Grace Redpath, Ward Storer.

Three honor rolls are given by the education department to each division, to be awarded to the pupils standing first: 1. Punctuality and regularity. 2. Deportment. 3. Proficiency.

No. 1 was awarded to Jim Galloway, who missed but one half day during the entire year. No. 2 was given to Jack Allison. No award was made of No. 3, but it will be given to the pupil making the highest number of marks at the high school entrance examination.

In Division II No. 1 was awarded to Grace Redpath, No. 2 to Harold Hunter and No. 3 to Ilene Oliver.

YOUNG MEN'S CLUB

At a meeting of young men, held last Monday night, the question of forming a young men's organization was thoroughly discussed with the result that "The Greenwood Young Men's Club" was formed with D. Robinson and H. O. Lamb, provisional president and secretary, respectively. Those present at the meeting were Rev. M. D. McKee, S. E. Belt, Mr. Longworth, Murdoch McQuarrie, Mr. Fraser, A. Harry Hook, D. Robinson and the seeretary. The object of the newly formed club is to interest young men in outdoor sports and gymnastics and to stimulate an interest in literary subjects and in music. It was decided to make the membership interdenominational and a committee was appointed to see the young men of all the other churches and solicit their co operation, and invite them to join in the discussion at the next meeting to be held at the home of Rev. Mr. McKee on the evening of July 9th, when the details of organication will be more fully matured.

AIDED THE OUTLAWS

WINNIPEG, June 26.—A man who says that he aided the escape of the famous Youngers and James brothers, after one of their raids in the United States, was picked up by the police here in a badly demoralized condition. H. M. Wolverton is the name given by the weaver of the highly colored story, and he was found in a rear street lying unconscious on the sidewalk with his head cut in three places.

How the man came to have his head so badly injured is not known. He was dazed when brought into the police station, but revived later and related a stirring story to the officers.

It was after the raid of the Younger and James brothers upon the bank at Northfield, Minn., that Wolverton says he was compelled at the point of a revolver to supply members of the gang of desperadoes with two horses. The pursuit of the robbers was in full cry at the time, says Wolverton, and it did not take the robbers long to let him know what was wanted by them. He placed a high value on the steeds, but a piece of glinting steel pointed straight at his head overcame all objections to their loss.

New Mexico, the wilds of Arizona in the early days of the settlement of the was, the guerilla warfare in the south, furnished screens upon which Wolverton threw the calcium rays of his imagination. He had reached the height of his discourse when the strong arm of Sergt. Robertson suddenly checked his eloquence, and the whilom facer of dangers was ignominiously forced into a cell, to sleep off his alcoholic debauch.

How to Break Up a Cold.

It may be a surprise to many to learn that a severe cold can be completely broken up in one or two days' time. The first symptoms of a cold are a dry, loud cough, a profuse watery discharge from the nose, and a thin, white coating on the tongue. When Chamberlain's cough remedy is taken every hour on the first appearance of these symptoms, it counteracts the the effect of the cold and restores the system to a healthy condition within a day or two. For sale by all druggists.

PRINCETON A BUSY TOWN

Railway and Mining Activities—Water and Telephone Systems.

"Another milestone has been reached in the march of progress which has overtaken Princeton," says the Similkameen Star. "The final location of the V., V. & E. through the town and extensive improvements planned by the Vermillion Forks Co. are the most important features in the struggling life and history of the town that have yet been noted. All development of the town and tribuary country hinged upon the railway. And, but for the delay in its construction caused by jockeying politicians and jealous monopolistic influence Princeton is only today where she should have stood five years ago in relation to the rail way. However, the days of repining and oft deferred hope are ended, and the rising daystar of prosperity looms brightly on the horizon. Action must now take the place of lethargy and the hum of business must again echo through the streets of the once deserted village.

"The line of railway crosses the Similkameen river near the bridge and continues about 200 feet from the bank to near Vermilion avenue and then follows the river more closely to the point where the tunnel through J. Gulliford's farm will connect with the Tulameen river. Four hundred feet of right of way for side tracks and station were given by the Vermilion Forks Co. The station will likely be located in rear of the school house. The railway bridge will be about the same height as the one now in use.

"The Vermilion Forks Co. accepted the lowest tender of Snowden & McMullen for a shaft to be sunk back about 500 feet from the present tunnel mouth of their coal mine, near which a railway spur line has been surveyed. The company expects to be in shape to supply the demands of the railway when it reaches Princeton.

AN ASSAY OFFICE.

"The necessity for an assay office in Prenceton has been keenly felt since the time when C. B. Harris succumbed to the allurements of the farm and and there retired on a life competency after having served the camp well and truly for a couple of years. Now, after a lapse of some years, a thoroughly equipped office will be opened by Llewellyn C. Wynne, of the firm of Claudet & Wynne, Rossland. This firm, formed a year ago, have won the confidence of the mining public in the Kootenays. In reaching out to Princeton for business they do so because of the inviting field which the railroad will soon develop and the real need of an assay office in that development. Mr. Wynne holds a provincial certificate of qualification, besides having been assayer for the Le Roi Mining Co. and two years with the Canadian Ore Concentration Co. (Elmore oil process). He is also a practical miner, having attended mining school in Cornwall, Eng., and in Montana worked underground; has also had experience cyaniding in South Africa. The office will be open in about a month.

PRINCETON NOTES.

'Street improvements are to be carried on vigorously throughout the town, a beginning having been already made on Vermilion avenue. Water works will also be begun as soon as definite instructions can be received from the head office of the Vermilion Forks Co.

"The contract for building the V., V. & E. from Keremeos to Princeton has been let to Stewart & Welch, who are arraning with sub-contractors to build the lighter portions.

"A. Hogeland, chief engineer of the Great Northern, and J. H. Kennedy were in town Tuesday. They ordered a spur line to be surveyed from near Otter Flat to the Bear Creek mines, which is now being done by Mr. Amburn's party.

"The C. P. R. will open the Nicola branch for traffic on the 1st of July. A semi-weekly mail to Princeton from Coutlee is being applied for.

"Charlie Willardson and Peter Johnson have completed assessment work on the Brooklyn, Lela and Key West on Kennedy mountain, all of which are showing up fine ores. The Brooklyn has a large and well defined lead and will undoubtedly make a winner.

"C. W. Staples, part owner of the Reco mineral claim in Combination camp, has completed some development work on the property. He ran a crosscut tunnel 35 feet in length and succeeded in showing at least 10 feet of good copper ore, besides considerable ledge matter. He also opened up from four to five feet of fine ore on the same lead in different places. The Reco has given good values as high as $45 and is undoubtedly a valuable property.

"E. Barr Hall has ordered instruments for a private telephone line to connect his and Mr. Waterman's residences with a phone on the main government line. When required other phones may be connected with the wire which will be strung shortly.

Commercial Hotel. Copper Street.

As early as 1770, granulated blast furnace slag was recognized as a superior material for making mortar. From about 1820 to 1870, numerous attempts were made in England to utilize the slag commercially by casting it into blocks for road paving, but with indifferent success. In 1840, Edward Parry, of Wales, commenced the manufacture of slag wool, but it was not until about 1875, when Krupp of Essen, and Luurman at Georgomarienhutte, in Hanover, Germany, established the reputation of slag wool as an excellent fireproofing material. Bricks contain- 90 to 94 per cent of granulated slag, and 6 to 10 per cent of common lime were made by Luurman at Osnabruck, Germany, in 1870. These bricks were adapted to all kinds of subaqueous and subterranean foundation work, as well as to superstructure, and their refractory qualities made them suitable for the lining of lime kilns, for boiler furnace stacks, and for hot blast stoves.

If you knew the value of Chamberlain's Salve you would never wish to be without it. Here are some of the diseases for which it is especially valuable: Sore nipples, chapped hands, burns, frost bites, chilblains, chronic sore eyes, itching piles, tetter, salt rheum and eczema. Price, 25 cents per box. For sale by all druggists.

THE LORD'S DAY BILL

The Famous Measure That Has Commanded so Much Attention.

The following is the text of the Lord's day observance bill as presented to the house, amended by the select committee to which it was referred.

His majesty, by and with the advice and consent of the senate and house of commons of Canada, enacts as follows:

1. In this act, unless the context otherwise requires:

(a) "The Lord's day" means the period of time which begins at 12 o'clock on Saturday afternoon and ends at 12 o'clock on the following afternoon.

(b) "Person" has the meaning which it has in the criminal code, 1892.

(c) "Vessel" includes any kind of vessel or boat used for conveying passengers or freight by water.

(d) "Railway" includes steam railway, electric railway, street railway and tramway.

(e) "Performance" includes any game, match, sport, contest, exhibition or entertainment.

(f) "Employer" includes every person to whose orders or directions any other person is by his employment bound to conform.

2. It shall not be lawful for any person on the Lord's day, except as provided herein or in any provincial act heretofore passed, to sell or offer for sale or purchase any goods, chattels or other personal property, or any real estate, or to carry on or transact any business of his ordinary calling, or for gain, or to do, or employ any other person to do, on that day any work, business or labor.

3. Notwithstanding anything herein contained, any person may on the Lord's day do any work of necessity or mercy, and for greater certainty, but not so as to restrict the ordinary meaning of the expression "work of necessity or mercy," it is hereby declared that it shall be deemed to include the following classes of work.

(a) Any necessary and customary work in connection with divine worship.

(b) Work for the relief of sickness and suffering, including the sale of drugs, medicines and surgical appliances by retail.

(c) Receiving, transmitting or delivering telegraph or telephone messages.

(d) Starting or maintaining fires, making repairs to furnaces, and repairs in cases of emergency, and doing any other work, when such fires, repairs or work are essential to any industrial process of such a continuous nature that it cannot be stopped without serious injury to its product or to the plant or property used in such process, or if without the doing of such work on the Lord's day such process cannot be carried on continuously and safely during the other six days of the week.

(e) Any work without the doing of which on the Lord's day. electric current, light, heat, water or gas, cannot be continuously supplied for lawful purposes.

(f) The conveying of travelers and work incidental thereto.

(g) The continuance to their destination of trains and vessels in transit when the Lord's day begins.

(h) Loading and unloading merchandise, at intermediate points, on or from passenger boats or passenger trains.

(i) Keeping railway tracks clear of snow and ice, making repairs in cases of emergency, or doing any other work of a like incidental character without the doing of which on the Lord's day the traffic on any transportation line cannot be safely carried on.

(j) Work before 6 o'clock in the forenoon and after 8 o'clock in the afternoon of yard crews in handling cars in railway yards.

(k) Loading, unloading and operating any ocean-going vessel which otherwise would be unduly delayed after her schedule rate of sailing, or any vessel which otherwise would be in imminent danger of being stopped by the closing of navigation.

(l) The caring of live stock and perishable products arriving at any point during the Lord's day.

(m) The operation of any ferry or boat authorized by competent authority to carry passengers on the Lord's day.

(n) The hiring of horses and carriages for the personal use of the hirer or his family for any purpose not prohibited by this act.

(o) Any unavoidable work after 8 o'clock in the afternoon of the Lord's day in the preparation of the regular Monday morning edition of a daily newspaper.

(p) Any unavoidable work after 4 o'clock in the afternoon of the Lord's day, for or in connection with the setting of bakers' sponge.

(q) The delivery of milk and ice for domestic use and the work of domestic servants.

(r) The operation by any Canadian electric street railway company whose line is interprovincial or international, of its cars, for passenger traffic, on the Lord's day on any line or branch now regularly so operated.

4. It shall not be lawful for any person to permit any employee, other than employees on boats which do not complete their regular trips within 24 hours, to do on the Lord's day any work within subsections (c) to (n) inclusive, and subsections (q) and (r) of section 3 of this act or incidental thereto, unless such employee is given during the next six days of such week 24 consecutive hours without labor.

5. It shall not be lawful for any person on that day to engage in any game or contest for gain or for any prize or reward, or to be present thereat, or to provide, engage in, or be present at any performance at which any fee is charged directly or indirectly either for admission to such performance, or for any service or privilege thereat.

2.—When any performance at which an admission fee or any other fee is so charged is provided in any building or place to which persons are conveyed for hire by the proprietors or managers of such performance, or by anyone acting as their agents or under their control, the charge for such conveyance shall be deemed an indirect payment of such fee within the meaning of this section.

6 It shall not be lawful for any person on the Lord's day to run, conduct or convey by any mode of conveyance any excursion on which passengers are conveyed for hire, and having for its principal or only object the carriage on that day of such passengers for amusement or pleasure, and passengers so conveyed shall not be deemed to be travelers within the meaning of this act.

7. It shall not be lawful for any person on the Lord's day to open to the public any park or pleasure ground or other place maintained for gain, to which an admission fee is charged, directly or indirectly, or within which a fee is charged for any service or privilege.

8. It shall not be lawful for any person to advertise in any manner whatsoever any performance or other thing prohibited by this act.

2.—It shall not be lawful for any person to advertise in Canada in any manner whatsoever any performance or other thing which if given or done in Canada would be a violation of this act.

9. It shall not be lawful for any person on that day to shoot at any target, mark or other object, or to use any gun, rifle or other engine for that purpose.

10. It shall not be lawful for any person to bring into Canada for sale or distribution, or to sell or distribute within Canada on the Lord's day, any foreign newspaper or publication classified as a newspaper.

11. Notwithstanding anything herein contained, whoever conscientiously and habitually observes the seventh day of the week as the Sabbath, and actually refrains from work and labor on that day, shall not be subject to prosecution for performing work or labor on the first day of the week, provided that such work or labor does not disturb other persons in the observance of the first day of the week as holy time, and that the place where the same is performed is not open for traffic on that day.

12. Every constable or other police officer who suspects that a violation of this act is being committed in or upon any premises other than a dwelling house shall, within the limit for which he is such constable or peace officer, have the right at any time to enter into or upon and to search such premises for the purpose of ascertaining whether such offense is being committed.

2.—Every person who obstructs such constable or peace officer acting under the authority of this section shall be guilty of a violation of this act.

13. Every person who violates any of the provisions of this act shall for each offense be liable, on summary conviction, to a fine not less than one dollar and not exceeding forty dollars, together with the cost of prosecution.

14. Every employer who authorizes or directs anything to be done in violation of any provisions of this act shall for each offense be liable, on summary conviction, to a fine not exceeding one hundred dollars, and not less than twenty dollars, in addition to any other penalty prescribed by law for the same offense.

15. Every corporation which authorizes, directs or permits its employees to carry on any part of the business of such corporation in violation of any of the provisions of this act shall be liable, on summary conviction before two justices of the peace, for the first offense to a penalty not exceeding two hundred and fifty dollars, and not less than fifty dollars, and for each subsequent offense a penalty not exceeding five hundred dollars and not less than one hundred dollars, in addition to any other penalty prescribed by law for the same offense.

15. Nothing herein shall prevent the operation of any act now or hereafter in force in any province of Canada regarding any railway subject as such to the legislative authority of such province, or affect the rights of any other railway under any provincial act.

17. Nothing herein shall be construed to repeal or in any way affect the provisions of any act respecting the Lord's day in force in any province of Canada when this act is passed; and where any person violates any of the provisions of this act, and such offense is also a violation of any other act, the offender may be proceeded against either under the provisions of this act or under the provisions of any other act applicable to the offense charged.

The following proposed additions to section 3 were suggested by the minister of justice as possibly desirable, but were not passed upon by the committee:

(s) Between the 15th of September and the close of lake navigation, carrying grain in trains loaded exclusively therewith, transhipping grain at lake or river ports, and returning grain cars to shipping points.

(t) Loading and unloading at ocean ports and conveying, in trains loaded exclusively therewith, freight passing through Canada in bond from one foreign country to another.

(u) Any work which the board of railway commissioners for Canada, having regard to the object of this act, unanimously deem necessary to permit in connection with the freight traffic of any railway. The costs of all persons of applications to the board under this paragraph shall be borne by the applicant, and, if more than one, equally. Notice of application, in which the reasons to be relied on shall be fully set out, shall be given to the department of railways and canals.

In all other respects the procedure under the railway act, 1903, shall, so far as applicable, apply.

ELECTION PROBABLE

Hide it though the ministers by polite mendacity may, there is little doubt but that there will be a provincial election sprung within the next three months. Everything points that way Even the movements of Mr. Hawthornthwaite are among the straws showing the direction of the wind. He is to have a meeting here tomorrow night and there is not the slightest doubt in the mind of anyone who watches political movements but that as a reward for his faithfulness he has been given the tip to get ready and he is preparing to do so.

The liberals will not be caught napping, despite all the misleading stories of the ministers. Mr. J. A. Macdonald, leader of the liberal opposition, has issued instructions to the heads of the liberal organizations thoughout the province to prepare for an early general election. The local liberals received the notice a few days ago and are govering themselves accordingly.

The government has been fortifying itself as much as possible for weeks pas by distributing promises of all kinds of work as freely as if they did not cost anything, and evidently working under the idea that constituencies could be bribed by a bridge or a school house. The premier's "promising" trip is about concluded, and when the Hon. R. F. Green gets back from Cariboo an announcement may be looked for.

The government know of growing opposition in many quarters, but seems to be riding to a fall.—Vancouver World.

DOMINION DAY

Next Monday Canadians will celebrate the thirty-ninth anniversary of the confederating of the seven orginal provinces into the Dominion. This year the anniversary carries with it greater importance than ever before for two new provinces join hands with the older provinces in celebrating that epoch making event. The Dominion is greater stronger more prosperous and the several parts more firmly knit together to-day than ever before.

In entering upon the fortieth year of her national life Canada is entering upon what promises to be a period of commercial prosperity that will far surpass any of the records of the past. All departments of trade and commerce are experiencing remarkable growth and expansion, railways are being constructed, both east and west, with unequalled dispatch and thousands of settlers from beyond the border and from British Isles and the best counties of Europe are streaming in to fine happiness, prosperity and contentiment upon our broad acre. The past has smiled upon Canada but the future promises to shower blessings upon our people with a free and bountiful hand.

It is fitting therefore that Canadians here and everywhere, where the flag of Canada is thrown to the breeze, should celebrate their national day with all the enthusiasm of which a patriotic people are capable.

BOUNDARY ORE TONNAGE.

The following table gives the ore shipments of the Boundary mines for 1900, 1901, 1902, 1903, 1904, 1905 and 1906, as reported to the Boundary Creek Times:

Unknown Friends.

There are many people who have used Chamberlain's Colic, Cholera and Diarrhoea Remedy with splendid results, but who are unknown because they have hesitated about giving a testimonial of their experience for publication. These people, however, are none the less friends of this remedy. They have done much toward making it a household word by their personal recommendations to friends and neighbors. It is a good medicine to have in the home and is widely known for its cures of diarrhoea and all forms of bowel trouble. For sale by all druggists.

NOTICE

Parties desirous of tendering on the construction of the irrigation system to be installed by the Kettle Valley Irrigation Fruit Lands Co., Ltd., can now do so. Time for tendering will expire on June 30, 1906. Plans and specifications are on view at the residence of the secretary of the company at Midway, and at the engineers' camp, near Rock creek. Tenders must be sealed The lowest or any tender not necessarily accepted.

W. H. NORRIS,
Secretary.

W. R. PILSWORTH,
Resident Engineer, Rock Creek. 42-43

NOTICE

NOTCE Is hereby given that the undersigned have disposed of the business heretofore carried on by them as brewers under the name and style of the Elkorn Brewing Company to John Docksteader, who will hereafter continue the said business under same name and style from and after the date hereof.

All persons now indebted to the said Elkhorn Brewing Company are required to pay the several amounts of their indebtedness to the undersigned forthwith,

All persons having claims against the undersigned are required to submit statment of account and the amounts thereof will be paid by the undersigned, who will not hereafter be responsible for any debts contracted in the name of the Elkhorn Brewing Company.

Dr. Mathison, Dentist.

Fifteen cents up McConkeys chocolates at White Bros.

Just received brand new stock of fire works, flags, etc. at Coles & Frith.

Colonel L. T. Dickason and A. M. Whiteside went to Nelson Thursday.

W. Elson, the tailor, is visiting in Spokane. He is expected home next week.

Mrs. E. T. Wickwire entertained a number of ladies at her home Thursday afternoon.

Mrs. D. A. Bannerman entertained a number of friends at her home Wednesday evening.

It is understood that the firm of Law & Munroe, of Midway, are disposing of their business.

William Young of Cranbrook, is spending a few days with his sister, Mrs. H. O. Lamb.

Miss M. Charleson of New Westminister is spending a few days with her friend Mrs. N. F. Kendell

Word has been received in the city that Mr. and Mrs. Duncan Ross expect to return from Ottawa in a few weeks.

To make room for McConkeys chocolates, White Bros. are selling Lowneys and Webbs chocolates at a great reduction.

Miss whiteside who has been enjoying a three months visit with friends in the coast cities returned home last Tuesday.

Mr. and Mrs. W. H. Jeffrey have removed to the Crescent mine, where they will reside in the future, Mr. Jeffrey having been put in charge of that mine.

Mrs. R. K. Steven gave a card party at her home on Wednesday last. A most enjoyable time was spent by all those present.

Try McConkeys chocolates, best chocolate quality in Greenwood and each box is a work of art. You get them only at White Bros.

Alexander Muir, the author of Canada's national anthem "The Maple Leaf Forever" died Tuesday in Toronto at the age of seventy-two.

Times readers in the east are inquiring for Greenwood Eureka mining stock, having read the announcement in the Times a few weeks ago that shares are being placed on the market.

A $12,000 fire occurred Monday at Sandon, B. C. Fifteen houses, including that of Wm. Davidson, M. P. P., were completely destroyed. Very little insurance was carried on the property destroyed by the fire.

The work on the Anaconda substation of the West Kootenay Power and Light company is progressing satisfactorily. The company is building a pole wire line from Rossland to Boundary Falls at a cost of $500,000.

Have you read the book of the hour, "The Jungle," by Upton Sinclair? Other new books just in, "Pam Decides," "Fenwick's Career," by Mrs. Ward; "The Way of the Spirit," by Rider Haggard. Smith & McRae. 42-43

If your stomach troubles you do no conclude that there is no cure, for a great many have been permanently cured by Chamberlain's Stomach and Liver Tablets. Try them, they are certain to prove beneficial. They only cost a quarter. Sold by all druggists

E. H. Mortimer is expecting the arrival of his wife and child from England soon. Mrs Mortimer landed by the steamship Ionian at Montreal last Sunday. She remained a few days in that city with Mr. Mortimer's brother, and is now on her way to Greenwood.

J. F. Royer, manager of the Great Northern Stage lines running between Greenwood and Ferry and Hedley and Ferry was in the city this week. Mr. Rover has been making Midway his headquarters for the past few months but will make Chesaw his headquarters for the next month or so.

Mahara's Mammoth Ministrels who played in the Auditorium on Wednesday evening last was a frost as a minstrel organization. The only funny thing to be seen or heard throughout was a few mammoth coons laughing at their own old chestnut jokes. The Auditorium was comfortably filled with people.

M. Gillice of Midway has been awarded the contract for carrying the mails six days a week from Ferry to Greenwood. The mail contract provides for only a six day service. and unless Mr. Gillice gratuitously carries the mail on Sunday, there will be no service on that day. Mr. Gallice will operate a stage line in connection with carrying the mails.

Dr. Simmons, Dentist; Open evenings.

Colonel and Mrs. L. T. Dickason have rented J. R. Brown's house on Long Lake street and will reside there during their stay in Greenwood.

A number of Greenwood people are planning to spend July 2nd and 3rd camping and fishing beyond Rock Creek. Several rigs have been engaged and a jolly time is anticipated.

Mrs. C. H. Fair entertained a large company of friends at tea Tuesday afternoon. A pleasant time was enjoyed by all, in spite of the rain, which came down just before tea was served and drenched the tables.

PHONE IMPROVEMENTS.

Local System to be Equipped with New Cables.

G. C. Hodge, district superintendent of the B. C. Telephone company, and S. S. Irwin, foreman of construction, are in the city today. Mr. Hodge has just returned from a prolonged visit to Japan, and is here to make arrangements for the reconstruction of the Greenwood system. In conversation with the Times Mr. Hodge stated that it is the intention of his company to equip the local system with new cedar poles and new cables and wires. This has been made necessary by the damaging action of the smelter smoke upon the lines now in use. The new cables will be proof against the action of the sulphur, and the change will improve the service fifty per cent. The program of improvements has been drawn upon liberal lines, and while it is not definitely known to what further extent the work will be prosecuted, it is understood that other highly important changes will be made which will make it possible to serve the public still better.

SCOTCH ENTERTAINMENT

Gavin Spence and Miss Strachan Please Large Audience.

A large and appreciative audience enjoyed the entertainment given Thursday night by Gavin Spence and Miss Nannie Strachan, the famous Scottish entertainers. Mr. Spence is well known to Greenwood people, as he has played here several times before, and on his return this time met many old friends and made many new ones. He retains all the qualities of vocalist and entertainer that has made him famous, and his stories and songs were both instructive and entertaining. In Miss Strachan, lovers of Scottish song enjoyed a treat of unusual merit. Her rendition of "Caller Herrin'" was especially pleasing, and many a Scot in the audience was taken back to the land of his birth and lived over again the days of youth. The duet, "The Crookit Bawbee," was rendered with delicate taste and dramatic effect. "Cam Ye By Athol," by Miss Strachan, gave range to her remarkable powers as a vocalist, and Mr. Spence was heard to good advantage in "The Hundred Pipers."

The entertainment was given under the auspices of the Methodist church. Mrs. H. McCutcheon acted as accompanist in a manner that was most pleasing to both the entertainers and their audience. Miss Strachan is a native of Galashields, Scotland, where her father is proprietor of a large music store. While in the city she was the guest of Mr, and Mrs: L. B. Hodge.

LABOR.

Toil swings the axe, and forests bow,
The seeds break out in radiant bloom,
Rich hrrvests smile behind the plow,
And cities cluster round the loom.
Where towering domes and tapering spires
Adorn the vale and crown the hill,
Stout labor lights its beacon fires
And plumes with smoke the forge and mill.
—George W. Bungay in Busy Man's Magazine

CAMPAIGN STARTED

(Concluded from page 1.)

and I accused Mr. Macdonald of bringing about a condition of affairs in that house which made it possible for capitalist members to defeat the bill when next it came up. The bill was lost by two votes, because, it was said, the owners had already conceded the eight hour day. That is true of some owners in the upper country, but on the coast, at Ladysmith and at Crofton, the men are still working 11 hours a day, and 13 hours at night. Mark my words, if the working classes do not do their duty at the general election, the eight hour day which the smelter-men of the upper country have granted will be withdrawn.

"He tried to have the deposit required from members reduced from $200 to $50, but succeeded in having it reduced from $200 to $100. Last election the socialist party contested nine seats and won three. Next election they propose to contest every one of the 42 seats in British Columbia. "Give me nine men in that house," he declared, "and no business will be done till our business is done; or we will force the liberals or the conservatives —whichever happen to be in power— to tear the mask of hypocrisy from their faces, and join hand in hand to defeat the representatives of the working class.' (Applause.)

"With a prefatory remark about the crime of lese majesty, he said a capitalist who was distinguished above all other capitalists in this country as the largest employer of Chinese labor in this province, and the most determined and bitter opponent of trades unionism in the province, had been made, not king, but the representative of the king in the province. This was an insult to organized labor. (A voice: 'You bet it is.') A greater insult to labor in this province could not have been offered otherwise than by the selection of James Dunsmuir as lieutenant governor of the province. In the two towns in his grasp, Union and Ladysmith, a meeting could not be held to organize. No greater tyrant ever stood in this country. There was no greater law breaker in the province than the man who had been made lieutenant governor. Bill Miner had been sent to jail for the remainder of his natural life, because he stole $15 from the C. P. R.; Dunsmuir was made lieutenant governor for breaking every law in the interests and for the protection of labor in the province. The eight hour law was openly broken in his mines. The trades unionists of British Columbia should arise—'Arouse, ye slaves!'—and protest with all their might against this appointment. (Applause.)

"Speaking of the Columbia and Western land grant and the Kaien island deal, he declared that he had nothing whatever to do with 'the band of adventurers.' Never in the history of the house had he voted in favor of a land-subsidy bill, and he never proposed to do so, though his views on the question of land subsidies were different from what they were when he formed part of the independent labor party, which was the tail end of the liberal party. He claimed that the Columbia and Western bill, as introduced into the house this year, was not a subsidy bill. The subsidy bill was passed ten years ago by a government composed principally of conservatives. but the railway company did not comply with the terms, and it fell through.

"Someone in the audience asked whether the Kaien island deal was a direct transaction between the government and the Grand Trunk railway company.

Mr. Hawthornthwaite: "No. The company's offices are in the east; naturally, the company acts through an agent. Now, it is charged that the company acted through improper agents. Mr. Bodwell is a prominent liberal. A few years ago, when I was a labor member, I got into trouble through not assisting him against Col. Prior. I don't know whether he is a proper agent or not. That is a question for the Grand Trunk. That has nothing to do with the deal."

Someone in the audience asked whether the bill reducing the deposit required from candidates from $200 to $100 was not introduced by Mr. Bowser.

"Mr. Hawthornthwaite: Yes, Billy Bowser said that if I was willing he would make it $100 and it would go through. If it had not been for Billy Bowser I believe I would have got it through at $50. (Applause.)

"In closing, he said he could not tell whether the general election would take place now or not. He believed, himself, that it would. He saw the conservative party organizing and the liberal party organizing, and was determined that labor would not again be caught napping. In his peroration, he declared that the red flag that some laughed at, would yet wave over government house at Victoria.

"The sum of $27.50 was raised by collection."

PROSPECTOR'S GUIDE

(By A. Harry Hook, Assayer.)

SILVER.

Silver was one of the metals known in ancient times, and has always been regarded as belonging to the class of precious metals. Its ores are found in nearly every country, particularly in Mexico and South America.

Silver is usually employed in the arts, alloyed with copper, whereby it acquires a greater hardness. It is always associated with gold. It is a silver white metal of a specific gravity of 10.5 It is rather soft and very ductile and it can be drawn out into very fine wire. It fuses at 954 O. C., and is converted into a greenish vapor in the oxy hydrogen flame. At ordinary temperatures silver is not oxidized, although at its fusing point it is slightly volatile. It dissolves very readily in nitric acid but more difficultly in sulphuric acid. It is thrown down from its solutions by hydrochloric acid as a white curdy precipitate of silver chloride, which is very easily soluble in ammonia. Silver exists in a great number of forms. Of its salts the silver iodide, silver bromide, silver iodide and silver nitrate are probably the most important and they are used extensively in photography. In fact, without these salts the modern art of photography, as now practiced, would have been impossible.

Of the ores of silver, the native and its sulphides, are the most important commercially. Silver is generally associated as its compounds with sulphur arsenic. antimony and copper. Of rarer occurrence are its combinations with chlorine (Hornsilver), bromine and iodine. Generally slight quantities of silver are found in every galenite or silver sulphide.

NATIVE SILVER.

Silver is very commonly found in its native state in nuggets and as thin leaves. It very often occurs as thin leaves disseminated through the slate or other wall rock of silver veins as at the silver mine near Port Arthur, Ont. It is ductile and malleable, with a hardness of 2.5-3 and a specific gravity of 10.1—11.1, when pure, 10.5.

Its luster is metallic, color and streak, silver white, often gray to black by tarnish. It has associated with it sometimes gold, copper and sometimes platinum, antimony, mercury and bismuth. On charcoal it fuses to a silver white globule. Soluble in nitric acid and is distinguished by its malleability, color and specific gravity. It is sometimes disseminated but usually invisable in native copper, galena, chalcocite, etc. It occurs in great quantities at Cobalt, Ont., where it is associated with cobalt, nickel and arsenic, and in British Columbia in nearly every silver camp.

ARGENTITE.

This ore is commonly called silver glance, or black sulphide of silver. It occurs massive, embeded, or as a coating. It has a hardness of 2-2.5 and a specific gravity of 7.2-7.36. Its luster is metallic, color and streak blackish lead, and streak is shining. It is composed of silver 87.1 per cent and sulphur 12.9 per cent. It is distingaished from other sulphides by being readily cut with a knife and by yielding a metallic globule of silver on charcoal. This ore is a very common one of silver.

PYRARGYRITE.

This mineral is commonly called ruby silver or dark or red silver ore, by some, antimonial silver. It is brittle with a hardness of 2.5 and specific gravity of 5.7—5.86; 5.85 if pure. Its luster is metallic—adamantine, color black to grayish black, by transmitted light, deep red. The streak is purplish red. It is composed of silver 59.9 per cent, sulphur 17.8 per cent and antimony 22.3 per cent, some varieties containing small amounts of arsenic. It is decomposed by nitric acid with a separation of sulphur and of antimony trioxide. With soda in reducing flame it gives a globule of silver on charcoal.

PROUSTITE.

This mineral is often called ruby silver ore, or light red silver ore. It also is brittle, with a hardness of 2-2.5, and a specific gravity of 5.57—5.64; 5.57 if pure. Its luster is adamantine, color scarlet—vermillion, streak same, also inclined to aurora red. It is composed of silver 65.4 per cent, arsenic 15.2 per cent, sulphur 19.4 per cent. With soda in reducing flame it gives a globule of silver on charcoal. It is also decomposed by nitric acid.

STEPHANITE.

This mineral is often called brittle silver ore. It has a hardness of 2-2.5, and a specific gravity of 6.2—6.3. Its luster is metallic and color and streak iron black, opaqe. It is composed of silver 68 5, antimony 15.2, sulphur 16 3 per cent. It is soluble in dilute, heated nitric acid, sulphur and antimony, trioxide being deposited.

POLYBASITE.

This variety has a hardness of 2-3, and a specific gravity of 6.0—6.2. It has a metallic luster and is iron black in color; in thin splinters it is cherry-red. Its streak is black and nearly opaque. It is composed of silver 75.6 per cent, sulphur 15.0 per cent, antimony 9.4 per cent. It is decomposed by nitric acid.

CERARGYRITE.

This is sometimes called horn silver. It is usually massive and resembles wax in appearance. Sometimes it is columnar and often in crusts. There is no cleavage. Its hardness is 1-1.5, with a specific gravity of 5.5. Its luster is resinous to adamanting, with a color from pearl gray, grayish green, to white, rarely violet blue. It turns violet brown on exposure to the light. It is also transparent to translucent. This mineral is composed of silver 75.3 per cent, chlorine, 24.7 per cent. Some varieties contain mercury. In is insoluble in nitric acid, but soluble in ammonia.

HESSITE.

This is a silver telluride and is usually massive, compact or fine grained. It has a hardness of 2.5—3, and a specific gravity of 8.3—8.4. Its color is between lead gray to steel gray.

Next week this column will be dedevoted to lead.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother,

(3 If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,00 pounds shall be collected on the gross output.

W. W. CORY,

Deputy of the Minister of the Interior.

By virtue of a warrent given in pursuance of the Municipal Clauses Act and the provisions of the By-laws of the Corporation of the City of Greenwood, under the hand of Geo R. Naden, Mayor of the said Corporation, dated the 4th day of June, 1906, and of all other powers me in that behalf enabling, I hereby give notice that I will proceed to sell by public Auction at the City Hall, Greenwood, on the 23 day of July, 1906, at 10 o'clock a.m. the above mentioned lands unless the full amount of taxes, interest, costs and expenses as above are sooner paid.

G. B. TAYLOR.
Collector.

Dated this 4th day of June, 1906.

Progress and Development

Progress and development are terms closely identified with life in the West. In a new country people are working daily for the upbuilding of town, city and district, and for the improvementof the conditions under which men and women are called upon to live. Every act of daily life that tends to bettering one's surroundings makes directly or indirectly for the improvement of society generally. In all this the local newspaper plays an important part. Among its local readers it stimulates an increasing interest in their home city, keeping them posted on all local happenings, and becomes a welcome weekly messenger, bearing bright and welcome tidings. Among its outside readers it forms a valuable advertising medium making known the merits, advantages and prospects of the city and attracting thither citizens who want employment, business firms looking for locations, and capitalists seeking investments. In the upbuilding of a town, city or district the local paper is an important factor.

BOUNDARY CREEK TIMES

The Boundary Creek Times aims to do its full and complete share in the upbuilding and improvement of Greenwood and the Boundary district. It is not handicapped in its work by any restraining obligations to any party, clique or corporation, but it is free at all times to rise up and promote the best interests of the City of Greenwood and its people. To do this most thoroughly and satisfactorily the Times must have the support and cooperation of the citizens of Greenwood.

Every effort is being put forth to make the Times the class of newspaper the people want. Increasing attention is being continually paid to mining news, especially of that nature that will interest those employed in the work as well as those whose capital is invested in the properties. With this end in view we aim to have

A Subscriber in Every Home

As a result of the efforts that have already been put forth, we believe that an increas- interest is already being taken in its news columns. We have evidences of this from the fact that the subscripiion list is already growing; the street sales are increasing weekly and the news dealers find more demand for each succeeding issue. This is a satisfactory condition of affairs that acts in two ways. It increases the revenue of the circulation department and it makes the paper a first-class advertising medium for local business men.

In handling local advertising every effort if put forth to protect the Greenwood merchant. The local page is reserved for them and foreign advertising has been repeatedly refused because the advertising manager refused to disturb the positions held by local advertisers.

Business men of Greenwood, we are here to protect and advertise you. We are protecting you! Do you advertise? Read The Times, subscription $2.00 per year.

HOME FROM THE COAST

City Official Well Pleased With the Seaboard Cities.

R. G. Taylor, city clerk, returned last Saturday from a two weeks' trip to the cities of Vancouver and Victoria, where he attended the annual convention of the I. O. O. F. in the latter city. He was much taken with the business activity of Vancouver and the attractiveness of the city of Victoria. Vancouver is experiencing a remarkable period of prosperity. Business of all kinds is flourishing and the population is rapidly increasing. Mr. Taylor met James Wortman, formerly of Greenwood, who is now prominent in the building trades of Vancouver. From Mr. Wortman it was learned that a vast amount of building is now going on. Large numbers of residences are being erected and numerous business blocks ranging from three, four and five to ten stories in height are under construction. Tradesmen of all descriptions are scarce, even with wages running as high as five dollars per day. Mr. Taylor expects to see Vancouver the greatest city in Western Canada within a comparatively short time, outstripping even Winnipeg.

Victoria appealed to Mr. Taylor as an ideal residential city, a place to build a home and enjoy the fruits of smiling fortune. It is the home of wealth, retirement and culture, a good place for those who have acquired a comfortable competency and wish to spend their days in the full enjoyment of a quiet life.

THE COPPER MARKET

NEW YORK June 28. Copper is quiet in the domestic market, but continues strong. Lake can be had at 18¾ to 18⅞ cents per pound for late August and September delivery. Electrolytic is quoted at 18½ to 18⅝ cents, but there is very little to be had for delivery before September. Casting is 18¼ to 18⅜ cents per pound.

NOTICE

NOTICE Is hereby given that the partnership heretofore existing between the undersigned in their business of painters, has this day been dissolvrd by mutual consent. The said business will hereafter be carried on by George H. Thompson. All persons indebted to the said firm are requested to pay the amount of their indebtedness to the said George H. Thompson, who will assume and pay all liabilities owing by the said firm.

Dated at Greenwood, B. C., this 15th day of June, 1906.

Bananas,	Quaker Puffed Rice	Lettuce
Oranges,		Asparagus
Lemons,		New Potatoes
Pineapples,		New Cabbage
Strawberries		New Onions.

If in a hurry **PHONE 50** we'll do the rest
WE WANT YOUR TRADE.

UNION MEAT MARKET

FRESH VEGETABLES—Potatoes, Cabbage, Turnips, Carrots, Parsnips, etc., etc.
DAIRY PRODUCE—Finest Creamery Butter, Fresh Laid Eggs, just in from the Country.
TURKEYS AND CHICKENS—Tender and Toothsome.

J. P. FLOOD, Prop.

KILLED AT PHOENIX

Fatal Accident Occurs a the Brooklyn Mine.

A fatal accident occurred last Sunday afternoon when William Nears came to his death by falling from the skip, about 170 feet, to the bottom of the Brooklyn mine shaft. When the accident occurred the skip was ascending and the unfortunate man for some unknown reason was clinging to it. As the 250 foot level was being passed Nears lost his hold and was seen by a fellow workman, Charles J. Ditter, to fall headlong to the bottom of the shaft, where he was found dead a few minutes later. An inquest was held and a verdict of accidental death was returned by the jury. Witnesses examined were A Thompson, Charles J. Ditter, James Morgan, the engineer, William Sampson, the foreman. Manager T. R. Drummond and solicitor A. M. Whiteside, for the Dominion Copper company, together with James McGregor, the provincial mining inspector for the district, were also present. The jury was composed of D. Oxley, foreman, and Walter Morrison, M. H. Kane, John Allen, John O. Ellis and John McLeod, and rendered a verdict that deceased came to his death by falling from the skip about 170 feet to the bottom of the Brooklyn mine shaft.

INJURED AT SMELTER

An accident occurred at the B. C. smelter Wednesday morning by which David Jones sustained serious injuries to one of his legs. He was engaged in unloading lumber from some cars and had placed a plank on the rail to stop a moving flat car with the result that it broke, swung round and struck Jones on the leg, cutting the flesh to the bone, badly bruising but not breaking it. He is now under the care of Dr. Oppenheimer in the hospital and is doing as well as can be expected.

SKYLARK ACCIDENT.

Patrick Chine, a miner engaged at the Skylark mine, met with an accident on Tuesday. He was in the stope at the eighty-foot level, and was passing under a part of the ledge that had had been stripped, when the rock fell and struck him on the body, seriously injuring his back. The unfortunate man was taken to Phoenix and then sent to Grand Forks, where he is in the hospital under the doctor's care. His injuries are of a most serious nature, but he is doing as well as can be expected.

OBITUARY.

Mrs. Castleman, relict of the late Alfred A. Castleman of Boundary Falls, died in the hospital at Vancouver this week. The late Mrs. Castleman sustained the loss of her husband only a month ago, and had just gone to Vancouver to live with her daughter, Mrs. Weeks. While en route she had complained of being unwell, and upon arrival in Vancouver she was taken to the hospital, where she passed away. The remains will be brought to Greenwood for burial at Midway, for which the final arrangements will be made today.

THE SNOWSHOE DEAL.

Valuable Property Secured by the C. P. R.—Much Ore in Sight.

It has been reported on what is understood to be excellent authority, that the Snowshoe mine has been acquired by the C. P. R., presumably for the Consolidated Mining and Smelting Co. of Canada. The details of the transaction have not been made public, but it is understood that George Waterlow, of London, England, vice chairman of the Snowshoe Gold and Copper Mines, limited, is to arrive shortly, to complete the transfer to the purchasers. It is believed that several combinations of capital have been negotiating for the mine, but the C. P. R. seems to have been the fortunate purchaser.

The Snowshoe group, including the Snowshoe, Pheasant, Alma and Fairplay fractions, adjoin the Granby and Dominion properties, and under past managements have shipped over 94 000 tons of ore to the Greenwood and Boundary Falls smelters. The main working shaft is down 357 feet, and about 100,000 tons of ore is in sight teady for shipment at any time. By this it will be seen that the mine is a highly valuable property, and can be immediately put in shape for shipping. It is probable that when the deal is finally completed work will be started at once and operations carried on extensively.

Summer Clothing

STETSON HATS
Soft and hard felt
$4.50 and $5

SUMMER SHIRTS
With or without collars.
75c to $2.50
