Vol. 11. GREENWOOD, B. C. FRIDAY JANUARY 4, 1907. No. 18

Short Concise History

Of the Columbia and Western Railway and its Relation to British Columbia Politics.

The Columbia & Western Railway company was incorporated by the legislature of British Columbia in the year 1896, with power to build a line of railway from Trail, on the Columbia river, to Okanagan lake, and from Trail to the International boundary in a southeasterly direction.

The promoters then asked the legislature for a land subsidy, amounting, for a broad gauge road, to 20,000 acres per mile.

These promoters represented to the members of the legislature that immense bodies of low grade ores existed in the district to be traversed by this road, and that the construction of this road would afford the requisite transportation facilities necessary to allow these immense ore bodies to be mined and smelted in British Columbia, and that by connecting this road with steam barges upon Okanagan lake, and these barges again with the Shuswap & Okanagan railway and the main line of the C. P. R., a new and more direct route between the coast cities and the mines in the Boundary Creek district and the mines of Rossland would be opened up. It was represented that the opening of this new route and the increased traffic which would undoubtedly result would make the Shuswap & Okanagan railway a paying instead of a losing concern. In addition to this, that it would lead to the settlement and improvement of all the available lands not only contiguous to the railway itself, but also the lands surrounding the Okanagan lake, and would provide the very best possible market for the agricultural products of the Okanagan and Spallumacheen valleys.

To summarize the benefits which were to be derived from the construction of this railway, they are:

The development of our mineral resources.

The smelting of our ores in British Columbia.

The development of our agricultural resources, from the Columbia river through to Sicamous, converting the Shuswap & Okanagan railway from a losing to a paying proposition.

Diverting to the coast cities the trade which was going south to the United States.

Upon these representations, and having in view the attaining of the above results, the legislature in 1896 passed an act to subsidize the Columbia & Western railway to the extent of 10,240 per mile for a narraw gauge road, or 20,000 acres per mile for a standard gauge road, for that portion of its road from Trail to Okanagan, "upon the conditions of their constructing the said Columbia & Western railway within the time and according to the terms of their Act of Incorporation," to use the words of the Act itself,

It will be observed that the granting of the subsidy was conditioned upon two essential points, namely: The COMPLETION OF THE ROAD TO OKANAGAN LAKE, that being what the Act of Incorporation called for, and WITHIN THE TIME MENTIONED, which was five years from the 17th of April, 1896.

To emphasize the condition in respect to the time, the company were required to give security to the extent of $50,000, which was to be forfeited to the Province in case of failure to build within the time mentioned.

The subsidy was made payable from time to time as the work progressed. Thus the lands earned by the construction of Sections one and three were payable when these sections were built; the subsidy for Section four was payable when Section five was built and the subsidy for Sections five and six when the whole road was completed, but no land was to be granted that had not been surveyed according to the land laws of the Province.

The history of the road as to construction may be summarized thus:

First section, Trail to Robson, built. Second section, Spur to International boundary, not built. Third section, Robson to Christina lake, built. Fourth section, Christina Lake to Midway, built. Fifth and sixth sections, Midway to Penticton, not built.

The company claimed and had granted to it the land subsidy for Section one and part of Section three.

This land was not then, and is not yet surveyed.

The subsidy, while it might be earned as construction went on, was based upon the construction of the whole road to Okanagan lake, and NO LAND was to be granted that was not designated and surveyed within seven years from the passing of the Subsidy Act (17th April, 1896). The company not having complied with either of these conditions, lost all claim to the lands.

The company claim that they were delayed on account of certain negotiations which took place in 1898, looking to the substitution of a cash instead of a land subsidy, and that an agreement was entered into in 1898-99 varying the original Subsidy act, which is false, as the proposed agreement was never executed, and as in March, 1899, the Hon. Jos. Martin, then attorney general, by letter directed to the Executive agent of the C. P. R., refused to ratify the proposed agreement, the company had still four years left in which to make surveys.

The company claim that they were further delayed in making their surveys on account of certain negotiations between them and the Dunsmuir government in 1901 and 1902, looking to an exchange of lands in the Boundary Creek district for lands in Southeast Kootenay.

This was the notorious attempt of the C. P. R. to get the two immensely valuable coal and oil blocks is East Kootenay, and which was frustrated by Messrs. Oliver, Curtis and others, in the session of 1903.

The various transactions which led up to the transaction just mentioned, which had for its object the spoliation of the province to an enormous extent, were participated in by Mr. McBride, who was then minister of mines. The order in council giving these coal and oil lands to the company was passed at a meeting of the executive, where it appears to have been decided by Messrs. Eberts, Turner and McBride.

Owing to the refusal of Mr. Wells to deliver the crown grants to the railway company, and the passing of an order in council cancelling same, the railway company were foiled for the time being, but they still persisted in their efforts at spoliation, and the influence exercised through their executive agent, Mr. G. McL. Brown, was such that the government at the 1902 session of the legislature introduced Bill 87, under the terms of which not only would the company have been enabled to obtain the coal and oil lands in Southeast Kootenay, but they would have been able to choose choice lands to the extent of nearly two millions of acres anywhere in Yale and Kootenay districts. This bill was so strongly opposed, chiefly by Curtis, Oliver and Kidd (Liberals), that the Government withdrew the measure.

It was in connection with this bill that the company set up a new and fictitious claim to the effect that in the year 1898, at the request of the government of British Columbia, the Columbia & Western Railway company surrendered their right to build that portion of their railway between Midway and Penticton (Okanagan lake), and consequently that they were entitled to the subsidy for that portion of the road built, although the company had failed to carry out the provisions of the Subsidy Act.

The investigation of 1903 completely proved the falsity of this claim, and it would not have been worth mentioning now were it not for the fact that this false claim has been revived, and it may do duty as the main reason for the passing of the bill of (1906), granting to the railway company over 800,000 acres claimed as balance of subsidy for Section three.

If the company surrendered its rights to build Sections five and six, as claimed by the railway company, and by the McBride government, then it follows that the company would have an equitable claim for the land subsidy for Section four, and there can be no doubt that the passage of the Act of this session strengthens the position of the company if they should come again and claim a land grant on account of Section four.

That it is the intention of the company and of the McBride government that the railway company may come again in respect to Section four, is evident by the fact that the government refused to allow an amendment to the Act of this year to the effect that land granted should be in full of all that the railway company claimed.

The C. P. R. and Premier McBride claimed last session, when the iniquitous bill to grant the railway company 800,000 acres was before the house that the terms of the original Subsidy Act had been varied by agreement between the railway company and the government in 1898-9. This absolutely false.

An agreement was proposed, a copy of which may be seen in the Journals of the house (1903, p. 741), but the government refused to sign the agreement (Journals 1903, p. 749 750).

Yet in the face of these records the premier and his colleagues boldly made the assertion that the railway company was relieved of its obligation to complete the road to Penticton.

Their frenzy for giving away public assets blind them even to the facts contained in the public records.

Again, in December, 1890, the railway company opened up negotiations with Mr Cotton on the same subject, but no agreement was reached.

To show conclusively that the railway company were not release from the completion of the whole road by anything which happened before 1901, the legislature in 1901 extended for three years the time for completion of Sections five and six, the final sections of the road.

In 1903 the exposure of the conspiracy between the government and the railway company took place, and

THE STANDING ARMY.

If all the people of the United States and Canada could ride over the Great Northern railway lines between Midway and Spokane and return, there is no doubt that the chain of custom forts along the international boundary line would be voted out of existence. From Midway to Marcus, a distance of sixty miles say, the traveler is kept so busy going up against the brass buttons that he has no time to read or rest, and when he has reached Marcus he is in doubt whether he rode on the cars or walked through and carried his grip.

At Ferry he is pounced upon by a Yankee, at Danville the Canadian gots even, while at Laurier the Yankee again gets in his work. This is too much for Canadian zeal to stand, for hasn't the American dived twice into that valise which the Canadian has only upset once. And so the traveler is persuaded to take the return trip, perhaps, when the Canadian can officially slug him twice while the American swats him once. The traveler on this bit of road will some day learn to carry his tooth brush in his vest and his pajamas in his hip pocket and defy red tape.

LAND.

Everywhere there is a rush, not only to the land, but for the land. The number of those going on the land is increasing. Another large number of people is buying land to be kept for three, four or five years in the care of the selling firm until brought to a productive point. All over the states of Washington, Oregon and California has the latter plan been in progress for years. But now the plan seems to be coming into favor in British Columbia. Not only are large numbers of people seeking the productive lands of the coast and the Okanagan for immediate settlement, but in the Kootenays, the Okanagan and elsewhere. Fruit trees are being planted by the hundreds of thousands for those who are later to care for them. What does this mean? Is the old land instinct of man asserting itself, or are people coming to see that the competitive strain of modern life is too great for men beyond middle life, and a healthy, pleasant, safe, and withal, a profitable employment is seen in fruit culture for the declining years?

EDITORIAL NOTES

To show that the Chinese are in no sense up-to-date, it may be mentioned that although there are several hundred Chinese classics dealing with the matter of filial regard and respect to elders, there are no words in the language to correspond with our pet phrases of "the old man" and the "governor" and such. The slang of the Chinese vocabulary is confined to phrases borrowed from the English.

RUSSIA'S glory would seem to be in dead men. Although the Japs slew them by the thousands, and although the government is slaying them likewise by thousands in the course of its pretended reform making, the government is decreeing others to death in more deliberate fashion. The latest victim to Russia's benign rule is Admiral Negobatoff, who is sentenced to die because he surrendered to Japan.

THE Great Northern railway is meeting with opposition in Minnesota on its plans to increase its capital stock sixty millions. In many corporations this constant increase of stock is necessary in order to get rid of the accumulated surplus of profits. When the rate of interest is restricted the stockholders must be protected. It seems absurd to the big ones to make betterments out of profits.

THERE is only one step, and a short one, between sanity and insanity, in most men, it is said. A great many people think that the jury who found Sidney Sloane "not guilty" of murder, just simply insane, have taken that step.

IF THE governments of Canada and the United States will insist on any interference with the railways in the interests of the people, why need we wonder at a fuel famine. "Freezing out" is an old game with the "big boys."

THAT we may realize that British Columbia is making some headway these days, it may be mentioned that one-half of Canada's fish catch of twenty millions in 1905 was made in this province.

The Grip.

"Before we can sympathize with others, we must have suffered ourselves." No one can realize the suffering attendant upon an attack of the grip, unless he has had the actual experience. There is probably no disease that causes so much physical and mental agony, or which so successfully defies medical aid. All danger from the grip, however, may be avoided by the prompt use of Chamberlain's Cough Remedy. Among the tens of thousands who have used this remedy, not one case has ever been reported that has resulted in pneumonia or that has not recovered. For sale by all druggists.

Shape Expression

THE beauty of a violin lies in its lines.

Yet a violin is made up of many parts—the lines are the result of each part being carefully made and as carefully put together.

You cannot shorten the length of the Semi-ready Coat without destroying its artistic lines—the length of the coat is carefully designed to look well with the other lines of the coat only when in a certain proportion to these other lines.

In tailoring Semi-ready to physiques we prevent the necessity of making alterations of vital parts.

As the seams are left with outlets and inner parts basted only—minor alterations can readily be made.

Money back for any dissatisfaction.

Your Doctor

Can cure your Cough or Cold, no question about that, but—why go to all the trouble and inconvenience of looking him up, and then of having his prescription filled, when you can step into any drug store in Canada and obtain a bottle of SHILOH'S CURE for a quarter.

Why pay two to five dollars when a twenty-five cent bottle of SHILOH will cure you as quickly?

Why not do as hundreds of thousands of Canadians have done for the past thirty-four years: let SHILOH be your doctor whenever a Cough or Cold appears.

SHILOH will cure you, and all druggists back up this statement with a positive guarantee.

The next time you have a Cough or Cold cure it with

SHILOH

NOMINATIONS

The Liberal nominating convention which met here on Saturday was well attended. Mr. J. R. Brown, who was the member in the legislature just dissolved, was tendered the nomination and was requested to stand again. He declined, however, so several more names were placed before the convention. After a ballot was taken, Mayor Naden was found to be well in the lead and his nomination was accordingly made unanimous. Delegates from all parts of the riding were present and all were enthusiastic both over the choice of candidate and over the general prospects for defeating the government. Although the contest here will be a warm one, Mayor Naden is a strong man and without doubt will win with a large majority.

Sixty Socialist delegates met in convention here December 31. Mr. James Harris of Boundary Falls, was elected chairman. After resolutions were past condemning the importation of Hindus and other Asiatics, in British Columbia, Mr. Ernest Mills and Mr. Edgar W. Dynes were nominated as Socialist candidates to contest the Greenwood constiuency. Mr. Mills, respectfully declining the nomination, Mr. Dynes was unanimously chosen as standard-bearer in the coming contest. The nominee then addressed the convention at some length, dealing with the issues of the campaign and the work of Socialism.

On Friday evening, December 28, the Conservative nominating convention for the riding was held in the Imperial hotel, about 30 delegates being present. J. R. Jackson of Midway, Duncan McIntosh and E. G. Warren, both of Greenwood, were placed in nomination. After the first ballot, Mr. Warren was seen to be in the lead, and on motion of the other two his selection was made unanimous.

Complete stock of pocket and office diaries, all prices, Coles & Frith.

SOCIALIST MEETINGS

Edgar W. Dynes, Socialist candidate, and Benj. F. Wilson will address meetings at the following places the coming week: Auditorium, Wednesday, January 9; Boundary Falls, January 8; Oro Denoro, January 10; Eholt, January 11; Mother Lode, January 12; Midway, January 14.

TIME CHANGES MANY THINGS

Advances Being Made Today Just As Actively As in the Past.

Quarter of a century ago there were many makers of custom-made shoes in he cities. Is there one known today—really known?

Machinery, supplemented by method, made better shoes, finished them better and fashioned them right, so that all men could get the style they wanted, the size they wear, and the width that would fit.

A shoe in B width does not necessarily mean that its wearer must buy a suit of clothes of Semi-ready physique type B. But the physique type system of tailoring, used only by the Semi-ready tailor shops, assures the same variety in sizes of suits or overcoats as do the shoe sizes and widths. With this perfect system it is possible to make up, ready to be fitted on and finished in an hour, a suit of clothes from the best and most expensive cloths. It can never be a dead stock. For every Semi-ready type there is a man.

P. W. George & Co. will be pleased to show you how what "Semi-ready" tailoring profits the wearer.

THE FIRST CARNIVAL

Skating Rink a Place of Gaiety Monday Evening.

The first Carnival of the season and the last event of the old year, was held in the Greenwood skating rink on Monday evening last. The extremely cold weather possibly kept many away, but the attendance was large, nevertheless. Numerous costumes of different nationalities and the notorious Happy Hooligan were well represented. The management deserves credit for the valuable prizes given, and the ice could not have been better. The Concert Band kept things livened up by their music during the evening.

There were six prizes given for the best costumes, the winners being: Ladies'—Mrs. Percy Hallett. Gentlemen's—W. Huff. Girls'—Miss Hagerdorn. Boy's—Fred McDonald. Comic—J. Rosebaum. Most original—H. Huff.

3 IN ONE FAMILY

Cured of Skin Disease by Zam-Buk.

Once more Zam-Buk, the great herbal balm, has been proved vastly superior to ordinary remedies, and has cured where other preparations had signally failed. Three children in one family have been healed by it. This not only shows the power of Zam-Buk, but goes to prove how beneficial its pure herbal ingredients are to the delicate skin of children.

Mrs. J. C. Bates, of Burk's Falls, reports the case referred to. She says: "I take great pleasure in recommending Zam Buk as a cure for skin disease. My three children were all broken out with sores on face, hands and feet Their condition was pitiable, and although I tried various ointments and salves, they did not seem to be able to get at the root of the evil, and the sores continued to spread. One day I saw a report in a local newspaper telling how beneficial Zam-Buk was for skin diseases, ulcers, etc. I got a supply of the balm and applied it to the children's sores. Almost immediately they got relief, and the sores began to heal. Although the skin disease had defied all the salves I had previously tried, in one week Zam-Buk overcame the trouble, and today the children have not a pimple or spot or mark of disease on their skin. For this grand result I have Zam-Buk to thank. It is a splendid healer."

Zam-Buk is thus shown to be altogether different and superior to ordinary remedies. It is a healing balm compounded from saps and essences of the finest known medicinal herbs. It has high antiseptic power, killing disease germs, which settle on sores and eruptions, etc., and which set up festering, blood poison and suppuration. It cures eczema, skin rashes, cuts, burns, bruises, abscesses, ulcers, acne, blackheads, ringworm, blood poison, ect. It heals cracked and chapped hands, cold sores, etc. As an embrocation it is also widely used, and gives speedy relief in cases of muscular rheumatism, sciatica, etc. Rubbed on the chest in cases of colds, it relieves the tightness and aching. All druggists sell at 50 cents a box, or may be obtained post free from the Zam-Buk Co., Toronto, upon receipt of price. Six boxes for $2.50. Send one cent stamp for dainty trial box.

Dangers of a Cold and How to Avoid Them.

More fatalities have their origin in or result from a cold than from any other cause. This fact alone should make people more careful as there is no danger whatever from a cold when it is properly treated in the beginning. For many years Chamberlain's Cough Remedy has been recognized as the most prompt and effectual medicine in use for this disease. It acts on nature's plan, loosens the cough, relieves the lungs, opens the secretions and aids nature in restoring the system to a healthy condition. Sold by all druggists.

A Jamaican Lady Speaks Highly of Chamberlain's Cough Remedy.

Mrs. Michael Hart, wife of the superintendent of Cart Service at Kingston, Jamaica, West Indies Islands, says that she has for some years used Chamberlain's Cough Remedy for coughs, croup and whooping cough and has found it very beneficial. She has implicit confidence in it and would not be without a bottle of it in her home. Sold by all druggists.

PAY ORE COLUMN

Six out of the eight furnaces of Granby smelter at Grand Forks, were closed down the fore part of this week, the management being unable to secure coke.

Granby Consolidated's fifth dividend was paid December 31st, and amounted to $405,000, making a total of $1,753,000 paid to date by this company in dividends.

At the Mountain Rose, Summit camp, ore bunkers are being constructed on the C. P. R. spur, with a long trestle and tramway, which will entirely do away with the wagon haul which has heretofore been necessary.

D. M. McIntosh, for several years shift boss at the Le Roi No. 2, in Rossland, has been selected as superintendent of the British Columbia Copper Co.'s Mother Lode mine, he having arrived at the mine last week, S. C. Holman, who has had charge there for several years, gave up his position on the 31st inst., and will move to Spokane, where his parents live.

With the end of 1906 Boundary mines will have shipped a grand total of approximately 4,645,000 tons of ore in six and a half years, with an estimated value of $25,000,000, and having an estimated copper contents of 100,000,000 pounds as a minimum. In 1906 the Boundary production of copper is estimated at close to 30,000,000 pounds, figuring on an average recovery of 25 pounds to the ton of ore.

SHOWING ON RAWHIDE

Showing Is Great—Will Probably Be Worked as a Glory Hole.

PHOENIX, B. C., Dec. 31.—Development at the Dominion Copper company's Rawhide mine, in this camp, has been showing up some immense bodies of ore in that property, and the predictions of Maurice M. Johnson of Salt Lake City, the consulting engineer of the company, on his first visit of inspection and examination of that mine, now nearly two years ago, are believed to be more than realized. In fact, it seems more and more certain that the company has an immense proposition in the Rawhide—one that will yield many hundreds of thousands of tons of ore that will be the equal of any ore taken from the mines of this camp.

In the No. 3 tunnel of the Rawhide drifting on the ore body is now going on, and has proved the existence of the ore body to a depth of about 400 feet below the outcrops. In No. 4 tunnel about 800 feet of development work has been done, all of which is in ore, and the size of the bodies on this level have not yet been defined. Stopes have been started on this single level, which will yield hundreds of thousands of tons, and will, in all probability, break through the surface, when the ore can be mined by the glory hole system.

In the No. 3 pit, which is the latest outcrop developed by the company, a face of excellent chalcopyrite and magnetite ore is exposed for a length of 150 feet and a depth of some 40 feet. A tunnel is being driven to cut this ore body at depth, and it is confidently believed that this ore body will prove to be as large as the others encountered on the property, and of a grade generally above the average in Phoenix camp.

OLD MYTH WORKED OVERTIME

The mining industry has its fair share of myth and tradition. It has not been difficult to make these romantic stories interesting, because it has always been possible to inject the necessary element of a vast fortune and treasure beyond computation. One of the most venerable of these mythical tales is that of the lost mine. The Indians, the Spaniards or other romantic individuals once owned them, and they are still sought for by those who have nothing more engaging.

If the lost mine did no more harm than to delude a few innocents, we would have no comment to make; but when the tradition is made the basis of a fraudulent flotation, it has been worked to excess. Late dispatches from New Mexico credit the territory with a newly rediscovered "lost mine" in the vicinity of Silver City. It was formerly worked by the Spaniards but it will now be worked after the most approved methods of the modern promoter. And thus is an old limestone cave made to do duty as an antigur from which fabulous wealth was once extracted. We have personal acquaintance with one who has only lately gone through its "miles of underground workings" and listened to the tales regarding its antiquity which did not at all square with the evidences of modern timbering in a crude shaft. The "stopes" failed to reveal any indication of veins in the roof or floor, and the faces of the "drifts" were devoid of mineral. The workings were more like gopher holes and the entire "mine" bore all the evidences of being a cave worn in the limestone formatiod by the incessant action of percolating waters.

It is currently reported that this old cave is to be exploited as an old mine, and that stock is to be sold in a company organized to work it. Unfortunately the promoters have the co-operation of a professional servant in this scheme, which we trust will be short-lived. The case is a good example of a serious defect in promotions, on which we commented in a recent issue. —Mining Reporter.

Try This for Your Cough.

To relieve a cough or break up a cold in twenty-four hours, the following simple formula, the ingredients of which can be obtained of any good prescription druggist at small cost, is all that will be required: Virgin Oil of Pine (Pure), one-half ounce; Glycerine, two ounces; good Whisky, a half pint. Shake well and take in teaspoonful doses every four hours. The desired results can not be obtained unless the ingredients are pbre. It is therefore better to purchase the ingredients separately and prepare the mixture yourself. Virgin Oil of Pine (Pure) should be purchased in the original half ounce vials, which druggists buy for dispensing. Each vial is securely sealed in a round wooden case which protects the Oil from exposure to light. Around the wooden case is an engraved wrapper with the name—"Virgin Oil of Pine (Pure)"—plainly printed thereon. There are many imitations and cheap productions of Pine, but these only create nausea, and never effect the desired results. 11-24

A NEW MESSIAH

OTTAWA, Dec. 28.—The Mounted Police have been advised that a family living at Cheyenne, Wyo., and calling themselves Adam 2nd Eve 2nd, with their son Lee Adam, contemplate immigrating with a party of 31 persons to Western Canada in the spring time. Adam 2nd will proclaim that he is the Messiah. He says he saw a star fall and at once felt he was the Messiah. Subsequently he and his wife walked through the streets naked and were arrested. They intend joining the Doukhobors in the spring.

SUNDAY SERVICES.

CATHOLIC.—Church of the Sacred Heart.—Divine service 1st, third and fourth Sunday in each month. Holy mass at 10 a. m.; vespers and benediction at 7:30 p. m.; Sunday school at 2:30 p.m. REV. J. A. BEDARD, O. M. I., pastor.

ANGLICAN—St. Jude's. Rev. John Leech-Porter, B. D., pastor. Services at 8 a. m., 11 a. m. and 7.30 p. m.; Sunday school, 2:30 p. m. All seats free. Midway, 2nd and 4th Sunday each month at 3:30 p.m. Phoenix, 1st and 3rd Sunday each month at 3:30 p. m.

PRESBYTERIAN—St. Columba, Rev. M. D. Mckee, pastor. Services 11 a. m. and 7:30 p. m.; Sunday school 2:30 p. m.

METHODIST—Rev. H. S. Hastings, pastor Services at 11 a. m. and 7:30 p. m.; Sunday school, 2:30 p. m.

FOOD IRON

You need **Iron.** Everybody does. **The harder you** work, the more you worry, **the more Iron you require.** But Crude Iron won't do. **Iron Pills, Iron Tinctures,** Iron Tonics are useless **in nineteen cases out of** twenty. You must have **pre-digested Iron or your** blood will not assimilate **it.**

FERROL

furnishes the **Iron** you need **in** combination **with Cod Liver Oil,** and so intimately incorporated with the oil that the most delicate digestive organs cannot fail to assimilate it.

The value of the combination cannot be overestimated. It builds up and fortifies the system against Coughs, Colds, Bronchial Affections and kindred troubles. If any of these diseases have already been contracted, or if the lungs are affected or threatened, **FERROL** cures by enabling nature to throw off the disease, not by "killing the germs," which is a physical impossibility.

FERROL is an absolute specific for Croup and Bronchitis, and no household where there are children can afford to be without it.

FERROL is not a patent mystery. The formula is freely published. It is prescribed by the best Physicians. It is endorsed by the most eminent Medical Journals. It is used in prominent Hospitals, Sanitariums, etc.

WHITE BROS., RED CROSS PHARMACY,
Druggists and Optician, Greenwood, B. C.

BILIOUS?

A writer has stated there are only two really bad things on earth—sin and bile. Misdirected action is sin. Misdirected bile is biliousness. When you are bilious every thought of food may be nauseous. Every time the room gets warm you may feel sick! If you think of food—same result. If you hurry or move quickly—same wretched feeling! Headache, turning off with vomiting spells are also marked symptoms. All this arises from misdirected bile, imperfect liver action, and Bileans cure these symptoms as surely as the day follows night!

Mrs. Tong, of Hull, says:—"I suffered from biliousness for years. Sometimes I was so bad I positively could not stand! Scores of remedies proved altogether unequal to a case so bad as mine. Bileans, however, to my delight effected a complete cure, and what is better still, I have never had any bilious attack since!"

A FAMOUS MUSICIAN CURED.

Mr. J. Wright, of Weber Street, Berlin, Ont. a prominent musician, formerly a member of the famous Kilty's Band, gives his testimony to Bileans.

He says:—"I suffered for years with Biliousness and Headache and spent hundreds of dollars on Doctors and so-called remedies. From this expenditure, however, I got no benefit and had about given up in despair when a friend advised me to try Bileans. I did so, and the first box seemed to do me some good; so I persevered with this remedy, and three boxes were sufficient to cure me completely. This testimonial is entirely unsolicited, and you have my permission to use it in any way which would benefit fellow sufferers." If you are one

TRY BILEANS

Bileans are obtainable from all druggists at 50c. a box. They are a certain cure for indigestion, biliousness, headache, blood impurities, face and skin rashes, constipation, piles, debility, female ailments and irregularities, rheumatism, anemia, liver and kidney complaint and all ailments arising from imperfect bile secretion and assimilation. Post free from the Bilean Co., Toronto, upon receipt of price, or 6 boxes for $2.50.

TOWN TOPICS

Dr. Mathison, dentist, Naden-Flood block.

The public school opens Monday, January 7th.

Frederic Keffer, of the B. C. Copper Co., spent the first part of the week in Spokane.

The annual Inter-Rink competition for the "Warren cup" is now in progress at the Curling rink.

Miss Lila E. Rowe, student at the Nelson high school, is spending the holidays at the family fireside,

On Wednesday afternoon Rev. H. S. Hastings left for Toronto, being called thither by the very serious illness of his mother.

Judging from the manner in which the political pot has already begun to boil, by February 2 it will probably reach the boil over point.

On Friday evening, December 28, Mr, and Mrs, Allison entertained a large number of boys and girls, and some grown up, at their home on Gold street.

The explosion of a few firecrackers and the blowing of a solitary steam whistle announced to the inhabitants of Greenwood the passing of the old year and the birth of the new.

The B. C. Telephone Co. are now almost fully established in their new quarters. Their men are now busy removing the wires and dismantling the old poles in preparation for taking them down.

Boundary shipments for the year were 1,155,138 tons, including the Granby, 804,598; Mother Lode, 101,534; Brooklyn-Stemwinder, 142,637; Sunset, 41,128; Rawshide, 26,646; Emma, 12,662. All told there were 27 shippers in the district.

Last week the Phoenix lodge, Knights of Pythias, held a most successful ball. Members and friends of the order were present from all the neighboring towns and enjoyed the unbounded hospitality of the Phoenician Pythians.

On Christmas day, at Phoenix, Samuel Jones, a young miner recently arrived from Wales, died, not surviving the amputation of his right leg. About a week previous to this, he was bruised while working in the Granby mines, but the wound was not considered dangerous. Gangrene set in, however, which necessitated the operation, with the above result.

For Rent—Warm furnished cabin (plastered), $5.50. H. J. Clint. 22-23

On Wednesday morning, December 26, the marriage of Miss Lena Labelle and Mr. Victor M. Sherbino, local manager of the P. Burns Co., and secretary of the Phoenix general hospital, was solemnized at the residence of the bride's parents, Phoenix, Rev. Father Bedard of Greenwood, officiating. The bride was attended by Miss Edith Jewell of Grand Forks, the groom being supported by Mr. Joseph Labelle. After the wedding breakfast the bridal couple left on the Great Northern train for Spokane. In course of a week or so they will return to Phoenix, where they will settle down to housekeeping.

Smith Curtis arrived in the city Wednesday and left on Thursday for the Similkameen district. The Liberals of that riding will hold a convention at Keremeos on the 8th for the selection of a standard-bearer in the approaching Provincial elections and it is quite probable that Mr. Curtis will be nominated. If he is, he will enter upon an active campaign, and in view of the bad record of the present corporation-ridden government, and the failure of Mr. Shatford to work for the interests of his constituents in such important local matters as the Midway & Vernon railway and the Columbia & Western railway land grab, it is quite certain Mr. Curtis will defeat Mr. Shatford, who is to be again the Conservative nominee. Mr. Curtis is arranging to develop his mining interests on Copper and Kennedy mountains and other interests he has in the district and expects to spend most of his time hereafter in the district.

Dr. Simmons, dentist, Phone 96 Wallace-Miller Block, open evenings.

President Mark F. Madden, of the Providence Mining Co., is expected to arrive in Greenwood early in this month.

James Petty, who has been laid up with rheumatism since last June, has returned from Medical Lake much improved.

The date of the Rossland Winter Carnival has been changed from January 29 to February 12th to 16th. This postponement has been necessitated on account of the date of the Provincial elections having been fixed for February 2nd.

Walter A. Segsworth, formerly of Greenwood, Boundary district, has been appointed assistant engineer with the Centennial Mining company at Calumet, Michigan, after having graduated as a mining engineer at the Michigan School of Mines, Houghton, Michigan.

Charles H. Tye of Anaconda, and Miss Sara B. Elson, were married at St. Jude's church on December 24th, Rev. Leech-Porter officiating. Mr. and Mrs. Tye will make their home in Anaconda. The Times joins in extending to the happy couple our hearty congratulations.

Midway lodge No. 26, K. of P., have set aside the date of January 11th on which they will hold their 2nd annual ball. Terry's hall will be beautifully decorated, and, as on its former occasion, the Knights of Midway will leave no stone unturned to give one and all the happiest evening of their lives.

W. M. Russell of the Bank of Montreal here, has been transferred to the New Westminster branch and will leave for there in a few days to take up his duties. Mr. Russell, while helping the local hockey team out in their match with Phoenix a week ago, received a severe injury to his leg and has been confined to his room since, but is now able to hobble around with the aid of a cane. Mr. K. W. Kambie of Victoria, will take Mr. Russell's place in the bank here.

The local lodge K. of P., held their seventh annual ball New Year's night in the Masonic hell. It was largely attended and a great success. Visitors were present from Phoenix, Mother Lode, Midway and Boundary Falls. Excellent music was furnished by James and Biner's orchestra of Phoenix, and dancing was kept up until a late hour the following morning. The Pythians are to be congratulated on the successful outcome of the function.

The Sisters at the hospital desire to thank Rev. J. A. Bedard, Dr, Foster, Dr. Simmons, Dr. and Mrs. Spankie, Dr. and Mrs. Oppenheimer, T. M. Gulley & Co., Hunter-Hendrick Co., Russell-Law-Caulfield Co., Galloway Bros., Coles & Frith, A. Sakris and White Bros., Mr. and Mrs. P. Dermody, Mrs. P. Peterson, Mrs. I. Bernard, H. Plummer, D. M. Millan, J. Darraugh, Benson & Lofstad, C. Bambury and Jean Coles for the kind remembrance of them and patients at Christmas time. Also to I. Hallett, A. Whiteside, J. McCutcheon, St. Jude's Guild, Mrs. C. Shaw, Mrs. J. Coles, Mrs. Malcom, Mrs. J. Angrignon, Mrs. P. Peterson and Miss E. Furlong for kind services rendered us during the year, and to Mr. D. Ross, M. P., for the flag.

The curlers of Phoenix and Greenwood indulged in friendly games on New Year's day, two rinks ascending the hill to do battle with Phoenicians, and two descending to try conclusions with the Greenwoodites. Four games were played at each place. Owing probably to the altitude and the nature of the ice, the ascending party were defeated by 11 points. Dame Fortune, however, smiled more benignly on their comrades who remained at home, these defeating the doughty opponents by 13 points, McCutcheon's star playing being a notable feature of the evening. Thus, in the eight games played, Greenwood led by the small margin of two points. Those who visited Phoenix are loud in their praise of the hospitable treatment received from the Curlers there.

THOSE NEW STRIKES

What They Mean to Our Future.

LOOKS LIKE A BOOM

The Year 1907 Ought to Be a Banner One for Greenwood and Surrounding District.

About four years ago men in and about Greenwood awoke to the fact that they had been overlooking something.

For a few years previous money had been flowing into the district through many channels.

The giant corporations of the district had been working on an experiment. To prove the extent and value of our low grade ores had called for an immense amount of money, not our money, but that of others, non-resident. That money had come, not like a day's wage, but in large sums, and that money had been spent among us.

Loan companies, knowing that people must have homes, lent their funds in liberal amounts to enable men to make habitations for themselves. That money was spent among our people. But the day came when mining capital said, "let us wait awhile and see what will come of what we have got. We will develop what we now own, but buy no more for a time."

In that day the wildcat died, and men who had staked and sold, or who had floated and fleeced, found that the old times, when any 50 acres of mountain side could be construed to mean a mine, were gone forever. Then eame the day of liquidation, and men went to work.

Some, brighter than their fellows, saw their opportunity. Unable to command the large amount of money necessary to develop a low grade mine, they bethought themselves of other local assets. They recalled that all about the town were small veins, out of which the prospectors of an early day had got large assays in gold and silver, and arguing that if they might be able to finance one of the big things they might one of the small, to set to work in little groups and syndicates to work the high grades. For some time only one was tested. But it was a success, and its success encouraged others. Today over a dozen of these are being worked and in no instance has complete failure ensued. Most of them are flattering successes.

But the past few weeks have been bigger with issue than any one previous time.

In that time at least three of the properties have been proven to be mines. But while this was going on men were hunting other ground, proving other veins, and the year 1906 saw in its closing month the demonstration of merit in at least two claims that people had turned down as unworthy the expenditure of more than a few hundred dollars thereon.

And so, while the big low grades have been hammering out their dividends, or the hundreds of thousands out of earnings for betterments and purchase of still more property, the high grades have been installing machinery, hitching an elecric power, paying for purchase and improvement all out of earnings and demonstrating the double-barreled opportunity of the district. The year 1907 will be a record year from all appearancs. The million and a quarter output of 1906 will reach the two million ton point, and the mining world will see that, unattended by fuss and flurry, or any of the accompaniments of a boom, Greenwood has done things, thanks to the courageous spirit of the pioneers among its mining men.

The man landed by Pullman car in Greenwood is within an hour's walk of two smelters, several large low grade, and a dozen high grade working properties, he finds here a good climate, good hotels, comfortable homes, good schools, good churches, flourishing fraternal societies.

No dearth of fuel, no scarcity of good water, no glaciers, no snow slides, no burning sands.

Comfortable conditions of living, good wages, good labor conditions are marked characteristice of the place.

The facts about Greenwood are slowly becoming known, and we mistake the signs if 1907 does not see us jolted out of the old rut.

Years ago, while as yet there was nothing doing on the east hill, a mining man from Colorado told the writer that that range would yet eclipse Cripple Creek. It sounded foolish then, but in the light of what the Strathmore, Crescent, Skylark, Bay, Mavis and Tip Top are doing it now has signs of coming true.

BOUNDARY VALLEY LODGE
No. 38, I. O. O. F.

CONCISE HISTORY

Continued from First Page

government met defeat as a result, and was afterwards dismissed from office.

In 1903 an Act was passed cancelling the Crown Grants of coal and oil lands which had been issued as a result of this conspiracy.

Mr. McBride, ONE OF THE GUILTY MINISTERS (see his own sworn evidence), who had previously left the Dunsmuir government, and gone into opposition, was called upon to form a government.

In the general elections which followed, Mr. McBride received the support of the C P. R. Mr. McBride now secures the passage of a bill to convey to the C. P. R. 800,000 acres of land, which they were not entitled to under their contract (if they were entitled there would be no necessity for the bill). His followers, including the Socialist members, votes down an amendment to secure to the Province the penalty provided for by the original Subsidy Act. His followers, including the two Socialists, votes down an amendment to secure control of rates as provided for in the original Act. His followers, including, of course, the Socialists, votes down amendment to make the Act a final settlement.

McBride, the minister of mines, grossly sacrificed the interests or the Province in 1901.

He admitted it under oath in 1903.

In 1906 he (falsely) states to the legislature that by LEGALLY EXECUTED AGREEMENT THE RAILWAY COMPANY SURRENDERED ITS RIGHT TO BUILD SECTIONS FIVE AND SIX. This is the agreement the government refused to execute. He and his nondescript followers in 1906 vote the railway company 800,000 acres of land they were not entitled to. He refuses to exact the $50,000 which the company had forfeited to the Province of British Columbia. He refuses settlers their rights guaranteed by the law and refers them to the railway company.

The Province has paid deficits on the Snuswap & Okanagan railway caused by the failure of the C. & W. to carry out its contract the sum of $158,000 during the last six years, and this loss is a continuing one.

The Province has not got the anticipated benefits in any respect owing to the failure of the railway company to carry out its agreement.

The McBride government has had the support of the C. P. R. in the past. They will have it in the election now on. If the McBride government is sustained, the C. P. R. will have (amongst other things), another claim for another 900,000 acres of land in respect to Section four

PRESENTATION

Miners at Mother Lode Make Presentation to Mr. Holman

To show the spirit and good fellowship that has existed between foreman and men, the miners at the Mother Lode presented to Mr. Holman, who has severed his connection with the B. C. Copper Co. as foreman of their Mother Lode mine, with a magnificent Regina gold watch, chain and fob, the cost of which, $275, was made up by contribution from the miners now employed at the mine. After the prescntation had been made, the large dining room was cleared and everyone enjoyed themselves well into the wee small hours of the morning at a social dance gotten up for the occasion. The watch was purchased from our local jewelers, A. Logan & Co.

LOST

About July 31st, one medium-sized white cow, blue neck, branded Æ on upper part of right hip. Also small red cow branded same brand as above. Information regarding same will be suitably rewarded by applying to the
