--COMPANY, LTD.--

Recent DRY GOODS Arrivals

It is not too early to be thinking about spring purchases. We invite you to look over our goods—to talk over the styles and correct fabrics for the coming spring and summer. We have some good things to offer.

IRISH LINENS

By Importing Direct we can offer prices that will surprise you in cotton and linen Turkish towels; real Huck, glass, crash and other towelings. A complete new range of table linens and napkins to match.

CRUMS PRINTS

Every Piece New Each and every piece is warranted fast colors, and we have no hesitation in saying they are the best.

GINGHAMS

A new line of apron ginghams in extra widths. Also large checks for cushions, and Zephyrs for children's dresses.

DIMITY

New Dimities in popular shades at 25c. Excellent for ladies' waists, children's dresses, etc.

PONGEE SILK
55c, 65c and $1.00.
Lace to Match.

CURTAIN MUSLIN
CRETONNES
ART SATEENS

LACES AND EMBROIDERIES

Handsome new assortment of Vallenciennes, Torchon and Clunie Laces. Our low prices will surprise you. Also Embroideries from the narrowest edging to "corset cover width."

Extra: GLOVES—Regular $1.25 and $1.50 kid at 95c
CORSETS—Silk and Satin, $4.00 and $4.50 values at $1.00

The Russell-Law-Caulfield Co.

LIMITED.

We have just received a nice assortment of

TRUNKS

FROM $6.00 TO $13.50

Suit Cases from $3.00 to $13.50. Grips from $2.75 to $5.00, and Telescopes from 60c to $1.50.

of Gent's Furnishings, Hats, Shoes, Clothing, etc. is complete and at reasonable prices.

For fancy and staple Groceries, we make it a practice to order lightly, but often, thereby assuring you that our stock is always kept fresh.

American Shoes For Women

Spring and Summer Shoes

RICH'S FAMOUS JULIA MARLOWE SHOES

With or Without "Elastic Instep"

THE GENUINE HAVE THE NAME ON EVERY SOLE. ACCEPT NO SUBSTITUTES.

We have just received a large shipment of the famous **JULIA MARLOWE SHOES.** They fit like a glove and feel like a slipper. Any foot that is not a positive deformity can be comfortably and stylishly fitted among the many styles produced by this modern factory. We announce with great pleasure that we are the exclusive agents of this famous make of fine shoes and have in stock a variety of the best styles.

Children's Felt Slippers 35c pr
Children's Felt Slippers with leather soles 50c pr
Women's Felt Slippers - 60c pr

RENDELL & CO.

DEFEATED 8-HOUR BILL

Fate of Measue For Relief of Smeltermen.

A LOBBY AT VICTORIA

Mr. Brown, M. P. P., on Peril of Chinese Labor.

The British Columbia smelting industry is up in arms against Mr. Hawthornthwaite's bill providing an eight-hour day for smelter men. Dispatches from the coast state that there is little liklihood of the measure being enacted into law. Representatives of the various smelters are now in Victoria lobbying against the bill. They include Frederic Keffer, general manager of the British Columbia Copper Co., J. J. Campbell, of the Hall Mines smelter, Moore and Labarth, of the Trail smelter, and E. J. Roberts of the Sullivan Mine smelter. John Houston, M.P.P. who was an ardent champion of the 8-honr bill in favor of miners, is as strongly opposed to the bill now before the house. He takes the view that its provisions are too sweeping at a juncture when the smelting ing industry has not been established on a paying basis. He, however, says good will result from the agitation and predicts that a compromise will be effected whereby the working hours of men working around furnaces, roasters and other un-healthy work will be reduced. It is significant of the attitude of the Granby company that its general superintendent, A. B. W. Hodges wired to Victoria stating that the passage of the eight-hour bill would result in closing down the plant and in a suspension of operations until the law were repealed According to the coast papers the government and the liberal opposition will oppose the proposed eight-hour law. Strongly worded resolutions condemnatory of the measure have also been adopted by the Provincial Mining Association. On the other hand organized labor has declared as emphatically that the measure is a just and salutary one in the interests of over-worked smeltermen.

The probable attitude of the latter in the event off the bill being defeated is being warmly discussed. Certain people claim that a strike on the part of smeltermen will surely follow. There is a significant passage in a letter recently written in support of the proposed 8-hour law by Ernest Mills, of Greenwood, president of district Association No. 6, Western Federation of Labor. Mr. Mills makes the following declaration:

"Must we stop the wheels of progress and industry by reverting to the strike? The smeltermen will have eight hours and get it, peacefully if possibly through legislation, but the time is not far distant when the overworked men will demand it. nor will we starve while doing it, as the whole world is today ready to cheer and support us in the battle."

The Granby Co., made the following statement:

"We have men on 10.hour shift, and men on 12-hour shift. The former are out door men. When they are through with one job we find them another. Their work is continuous. The 12-hour men, however, are inside men. They do not work continuously and do not average eight hours apiece. Take the feeders for example, these men have a feeding device which simply means the turning of a couple of levers once in every ten minutes, and then they do as they like. The inside men have a system of relief, which further cuts down their actual hours of work. As to the fumes, there are no lead fumes and the worst thing the men have to contend with is the sulphur which I do not think is considered very deleterious to general health.

"We have a couple of smeltermen's unions at the works, but we have no trouble with the men, and the pay and the hours of work have so far been unobjected to."

LATER.—The bill was defeated on the second reading in the house Wednesday by a vote of 12 to 26. Its supporters included Fraser, Grand Forks, and Houston, Nelson. The cabinet ministers and Brown, Greenwood, voted against the bill. Macdonald, leader of the opposition, spoke but did not vote. Attorney General Wilson also abstained from voting. Mr. Brown feared a shut down of the smelters would mean the employment of Mongolians later on.

ELKHORN MINE.

It Will be Acquired by an Incorporated Company.

Yielding to the persuasion of their numerous friends and prospective investors, James Sutherland and Phil McDonald, the owners, have decided to vest the ownership of the Elkhorn mine in an incorporated limited liability company. The capital stock will be placed at $200,000 in shares of the par value of $1 each. The papers in connection with the incorporation were sent to Victoria this week by J. P. Myers-Gray, barrister of this city. The proposed company will be known as the Boundary-Elkhorn Mining Co., Ltd. The Elkhorn and E. H. fraction, adjoining the Elkhorn and owned by Messrs. Sutherland and McDonald, will also be included in the transfer.

The Elkhorn is one of the pioneer and best known high grade mines in this camp. A little more than two years ago it was acquired on a working bond. Messrs. McDonald and Sutherland paid $4,000 for the prospect long before the bond expired, deriving the money from the proceeds of ore shipments. Although a depth of only 150 feet has been reached the mine has shipped over 1000 tons of ore, has large ore reserves in sight, besides several hundred tons of second grade ore on the dump

The public will be given an opportunity of subscribing for stock as 20,000 shares of treasury stock will be offered at 50 cents per share. The proceeds will be devoted to installing an up-to-date plant including a 5-drill air compressor which will enable the company to inaugurate a more vigorous policy of development. The investment is regarded as gilt-edge.

COAST-KOOTENAY RY.

Vancouver Wholesaler Endorses The Project.

Robert Kelly, senior partner of Kelly, Douglas & Co., wholesale grocers, Vancouver, was a guest at the Imperial several days this week. He is paying his first visit to the interior and accompanying him were Mrs. Kelly and his veteran and popular representative in the Kootenays, H. A. Small.. Mr. Kelly stated that he had been simply amazed at the growth and prosperity so apparent in all the towns of the interior. From the large business done by his firm in the upper country he had long ago appreciated its resources, but his visit had proved somewhat in the way of a revelation. What impressed him most of all was the magnitude of the Boundary district and its un-limited possibilities. He had always favored the establishment of direct railway communication between the interior and the coast via the Similkameen, but now that that he had studied the situation at close range would return home more enthusiastic than ever in favor of a Coast-Kootenay railway. He added that business men at the coast could repeat his experience at great personal advantage to themselves; in fact he felt confident they would then realize the enormously increased business that the coast merchants could secure by the establishment of direct rail communication. There was no reason why Victoria and Vancouver wholesale houses in all lines should not enjoy a larger share of the trade of the interior if the plans contemplated by various railway enterprises were carried out. At present the means of communication was anything but satisfactory, involving as it did a roundabout haul via Revelstoke.

MONTREAL & BOSTON

Guggenheim Exploration Co. Now in Control.

PASSING OF MUNROE BROS.

New Owners Command Enormous Capital.

The Guggenheim Exploration Co. has acquired the controlling interest in the Montreal & Boston Copper Co. The transfer took place in New York this week. The deal was made possible by the co-operation of Munroe & Munroe, the New York brokers, who sold their entire holdings of stock and liquidated every cent of their indebtedness. Munroe & Munroe have no longer any interest in the company. It is reported that they will now turn their attention to the exploitation of their extensive Mexican mining properties. H. T. Pemberton, general manager of the Montreal & Boston, and who has been closely associated with the Munroes, leaves for the east on business about March 1st.

The recent deal financed by the Guggenheims provided for a cash payment of $100,000 and the purchase of 225,000 shares of Montreal & Boston stock taken at $1 per share. Options have also been secured on the stock in the hands of brokers. The company's properties were recently examined by M. M. Johnson, M.E., of Salt Lake, on behalf of the Guggenheims.

H. T. Pemberton, the general manager, has performed his duties with great satisfaction. Two months after beginning operations he had the Rawhide developed from a prospect to a stage enabling it to produce 450 tons of ore daily. In less than six weeks after acquiring the Brooklyn and Stemwinder group Mr. Pemberton had these mines unwatered and shipping a large tonnage.

The Guggenheims own mines and smelters in the United States, Mexico and South America. They dominate the affairs of the American Smelting & Refining Co.

CITY COUNCIL.

There was a full attendance at Monday night's meeting of the city council, Mayor Naden presiding. On motion of Ald. Parker the supt. of waterworks was instructed to take measurements of the water in Providence creek.

These bills reported from the finance committee were ordered paid on motion of Ald. Parker: Jas. Peterson, $5; W. McDonald, $5; Smith & McRae, $5.60; C. J. McArthur, $15.50; G. H. Cropley, $27; Boundary Creek Times, $20.75.

The road committee reported that a man had been engaged to clean out the gutters.

A letter from Dr. Fagan, secretary of the provincial board of health asking co-operation in securing a sanitarium for consumptives was referred to the health committee.

Moved by Ald. McIntosh, seconded by Ald. Smailes. "That the city clerk, city solicitor and the mayor be instructed to forward a resolution to the lieutenant governor and the local member to the effect that the school trustees be compelled to levy their own rate as they do the spending."—Carried

ORE SHIPMENTS.

The Providence this week shipped 30 tons of first class and 30 tons of second class ore. The Elkhorn is also credited with a 30 ton shipment of first class ore and two carloads of second grade ore. The amount of ore of the latter description now accumulated on the dump comprises several hundred tons. It is intended to ship it to the Trail smelter at the rate of 2 carloads weekly. The Last Chance mine does not figure in this week's shipping list owing to the impassable condition of the Phoenix wagon road,

FRIDAY FEBRUARY 24, 1905

The question of railway land grants will be discussed at this week's meeting of the Associated Boards of Trade. It is one that deserves thorough consideration, and is especially timely now that the Grand Trunk Pacific is seeking to secure a land bonus from the provincial government. People can scarcely credit the statement that former legislature have awarded the C. P. R. nearly six million acres of land in East Kootenay, and of which seventy-five per cent is still in reserve. It is being urged, and quite properly too, that the reserve retards development of the areas, lessens the revenue of the government and hampers mineral locators by a tax of $5 per acre for useful rights within them. Conditions of the grant were that these lands were exempted from taxation while not used for other purposes than for railways and were to be sold at the same rates as that asked for by the government for similar lands. These conditions, however, have been recklessly disregarded. Thousands of acres are yielding the C. P. R. from $10 to $30 per acre for timber-cutting privileges. The government has a strong case against the C.P.R. A measure should be enacted compelling that railway corporation to pay taxes on these lands, especially since the statutory agreement has been so ruthlefsly violated. The railways in any event are better able to contribute to the revenues than the average citizen whose heritage has been frittered away. The lands in the first instance belonged to the people. They have been literally given away, enabling the C. P. R. to derive millions in revenue therefrom whilst the government is now resorting to every expedient to devise new methods for wringing additional taxation from the people. The burden should be borne by the railways, not by the ordinary tax payer. If our public domain had been conserved and properly administered, this province would be not only out of debt but would possess a handsome cash surplus. Instead, however, we have the spectacle of an over-taxed population meekly submitting to fresh burdens while the C. P. R. pursues its policy of rapacity and plunder.

The educational problems of the province were fully discussed at a recent convention of school trustees held in Vancouver. The public school curriculum came in for sweeping condemnation, but the extension of the kindergarten system was warmly endorsed. Complaints were made by several of the delegates that high school pupils were compelled to take-up too many subjects, and the qualifying examinations also received scathing criticism. The establishment of three optional courses, commercial, science and the arts, was also seriously advocated as affording a variety of choice for pupils with different aspirations. Its champion, however, failed to secure the endorsation of the convention, which considered it unwise on short notice to urge the government to make sweeping amendments to the school act. There is undoubtedly some truth in the criticism that the present high school curriculum is designed more particularily for professional life as distinguished from a commercial or mechanical training, despite the fact that the evolution of education has made it imperative that the public school system should have for its ultimate object the preparation of the pupils for callings or occupations in which the great majority will ultimately engage. Before adjourning the convention adopted a resolution establishing the limits of compulsory attendance at seven and fourteen years.

Every coast visitor who comes to the Boundary becomes an enthusiastic supporter of the Coast-Kootenay railway project. This is the invariable experience. Robert Kelly. of Kelly, Douglas & Co., wholesale merchants, Vancouver, paid his first visit here this week although his firm has been doing business in the Boundary for the past seven years. Mr. Kelly had always evinced more or less interest in the movement for providing direct railway communication between the Boundary and the coast. He has been simply amazed at the growth of the mining industry and now realizes with a new and deeper meaning the possibilities of trade that would be created in the event of the construction of a railway from Midway to Vancouver, via the Similkameen district. As a business man Mr. Kelly is nothing if not practical and when he returns to the coast his advocacy of the enterprise should awaken a more general interest.

Now that the control of the Montreal & Boston Copper Co., has passed to a wealthy New York mining syndicate, a vigorous policy of expansion will likely be inaugurated. The mines owned by the company embrace some of the biggest propositions in the Boundary, and the output can easily keep pace with the enlargement of the smelting plant for years to come. Two months after starting operations the Rawhide was enabled to maintain a daily tonnage of 450 tons. The promptness with which the deal was closed would indicate a very favorable report submitted by M. M. Johnson, the Utah expert, who recently examined the Montreal & Boston group. The high price of copper now prevailing will prove an additional incentive for the new owners to inaugurate a policy of expansion. There seems to be a well foundered impression for the belief that the Guggenheims will dominate the affairs of the company, although possibly other interests may be associated in the direction of the enterprise. Now that Munroe & Munroe have stepped down and out the people of this district will not be slow to re-acknowledge the invaluable service rendered this district by the young promoters during the past four years.

R. A. Brown. of Grand Forks, a pioneer of the Boundary district has for years been a persistent champion of a project having for its object the driving of a tunnel from the north fork of Kettle river to tap at great depth the ore deposits of Summit Phoenix, Deadwood, and Copper camps. Mr. Brown hopes to overcome the difficulties of ventilation by making frequent upraises to the surface. His project although heartily laughed at by the knowing ones, may yet be carried out in the light of the results accomplished by development tunnels run in Utah and Colorado as recently related in these columns by M. M. Johnson, a Salt Lake city mining engineer. Three miles of a 10-mile tunnel with which Mr. Johnson is indentified, have already been driven, and according to Mr. Johnson the costs have already been repaid by the royalties derived from the ore tonnage of the various mines whose ore shutes have been tapped at depth. In the light of this experience Mr. Brown's tunnel project does not look so chimerical after all. Any method of mining which permits the handling of the ores by gravity will greatly reduce mining costs. This fact has already been established at the Granby mines and an application of the same principle on a larger scale as urged by Mr. Brown should be endorsed rather than thoughtlessly condemned.

Manitoba and the Northwest are making a strong protest against any increase in the duty on rough lumber. Petitions are being received in large numbers by the government opposing any change in the existing duties and particularly against a tax on rough lumber.

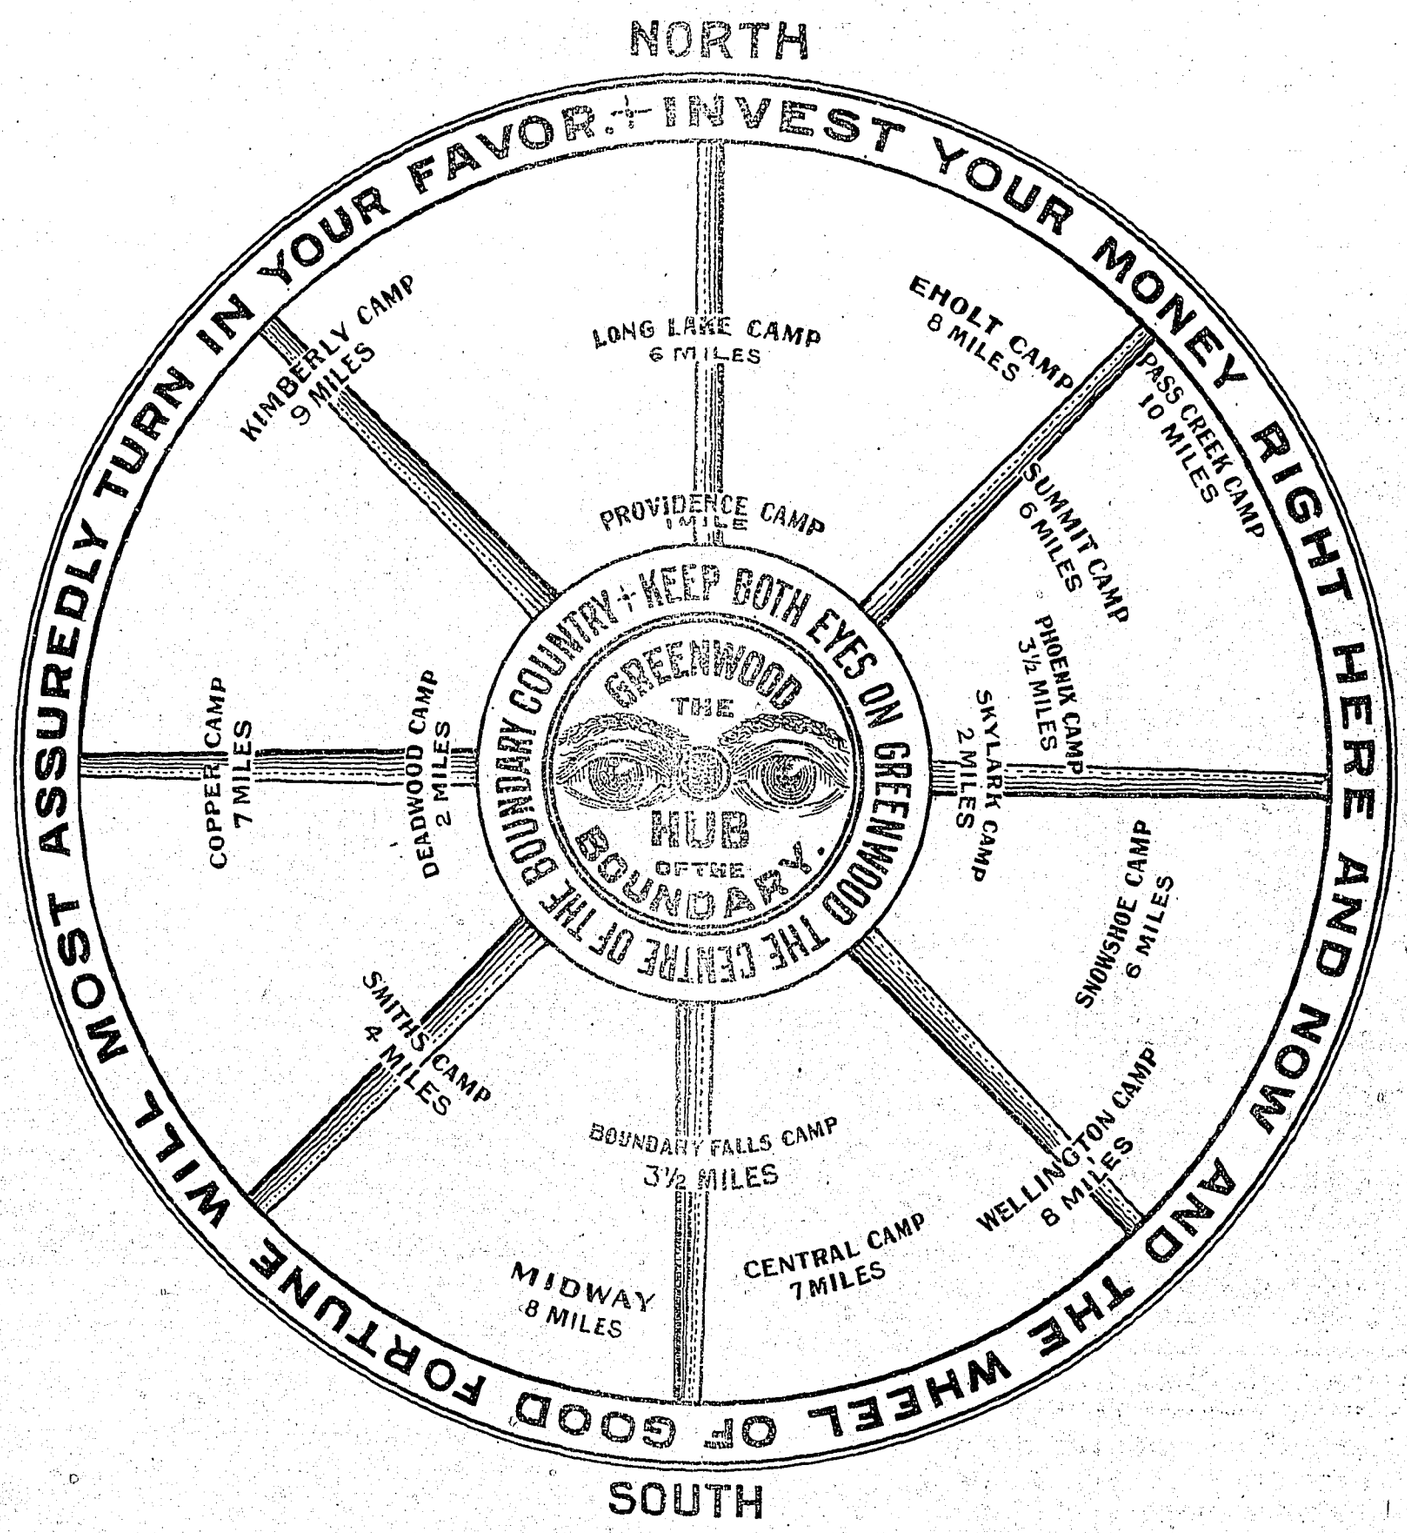
Job Printing
IS A WORK OF ART
Let us show you what we can do in that line for you.

No Time Equal to the Present



Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitable operation has made the Boundary famous as a mining centre, and every day adds more to the list of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For **NINTY DAYS** we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from $50.00 up, at terms to suit the purchaser. Make your selection and make it early.

RALPM SMAILES,

AGENT FOR THE GREENWOOD TOWNSITE COMPANY.

TUNNEL AND STOPE

The dumps of the Brooklyn and Stemwinder mines, which were not sold with the mines to the Montreal & Boston Consolidated, have been bringing cash to the coffers of the Dominion Copper Co. Since last fall about 6,600 tons have been shipped, mostly to the Trail smelter, and some cars have given particularly good returns in both gold and copper. The dumps were estimated to have been 10,000 and 20,000 tons of ore.

The stock brokerage firm of Munroe and Munroe issued a statement giving the terms of settlement with its creditors. The firm recently resumed business, after a hearing in the bankruptcy court and a subsequent adjustment of its claims. The statement says:

"In the settlement just made with our creditors we voluntarily surrender our interests in and to the Montreal and Boston Con. Mining and Smelting company, to secure the payment of creditors' claims, and the balance due to the vendors of the property combined in the consolidation. Such sums of cash as have been included in this settlement have been advanced by persons friendly to us and by ourselves, and not by new inteersts."

Tho following amusing word picture of the prospector is worth preserving:

Here he comes, with his overalls or corduroys well marked with gouge or grease, usually both. His whiskers are ragged and he has a hungry physiognomy. Listen to his tale of riches to be acquired if only the hole could be sunk deeper. Who is the cuss? Sometimes he is an individual who could resurrect a sheepskin issued by Mr. Eliot of Harvard. Oftener he is a plain American citizen with little schooling, but versed in the lore of individual contract and being up against it.

Nutty? Not much—only born with the pioneer instinct—the wandering foot—the ear which hears only the call of the wild. Many of them? Si, Senor; many. Every boy who hacks his name on a fence with his jack-knife is a relative of Daniel Boone, the same who in his Kentuck cave cut "D. B." on the rock wall of his refuge from savages, there to be read with wistful feelings by those who now dwell in fair Kentucky.

The prospectoris always a liar. He can not help it. The bright sunshine reflected from the snow masses which cover his beloved rocks, the vast stretches of mountain ranges, looking like a frozen ocean spread before him as he gazes from a sta -striking peak, the vivid sunsets which he admires almost daily, the exaggerations of the atmosphere, his natural exuberancy and abnormal bump of hope - all these make him a liar even with himself.

Blessed be the prospector, and may he, when his days are numbered, depart to a realm where every rift in the clouds discloses to his fascinated eye a pay streak of gold, and may he at least depart to a place where there are plenty of canned Boston baked beans, and a sufficiency of baking powder, sow bosom and flour, for the prospector is the man who finds the mines that furnish the gold for the world to do business on. Curse him not, ye infidels.

Afraid of Strong Medicines.

Many people suffer for years from rheumatic pains, and prefer to do so rather than take the strong medicines usually given for rheumatism, not knowing that quick relief from pain may be had simply by applying Chamberlain's Pain Balm and without taking any medicine internally. Rev. Amos Parker of Magnolia, North Carolina, suffered for eight years with a lame hip, due to severe rheumatic pains. He has been permanently cured by the free application of Chamberlain's Pain Balm. For sale by all druggists.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered coal in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5 00.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, th has been expended or paid, the locator may, upon having a survey made, and upon complying with the other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 ft. square; entry fee, $5 renewable yearly. On the North Saskatchewan river claims for either bar or bench the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental, $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles, within six years from such date Rental $100 per mile for first year, and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being 1,000 to 2,000. All other placer claims shall be 200 feet square.

Claimes are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of mining recorder's office. One additional day allowed for each ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two 1,500 altogether, on the output of which no royalty will be charged, the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and one half per cent. on the value of the gold shipped from the Yukon territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each operate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned, and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done a claim each year to the value of at least of $200.

A certificate that work has been done must be obtained each year. If not the claim shall be deemed to be abandoned and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion Lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640acres Should the prospector discover oil in paying quantities, auc satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well and such other land as may be determined will be sold to the discoverer at the rate of $1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

JAMES A. SMART,
Deputy of the Minister of the Interior.
Department of the Interior, Ottawa

I.O.O.F. SMOKER.

On Monday evening, the 20th inst., the Oddfellows of Boundary Valley lodge entertained their friends to a smoker, at which a very enjoyable time was spent. Amongst those contributing to the evening's enjoyment was Past Grand Master Elsperman, of the Washington jurisdiction, who gave a very able outline of the work of the order, also Mr. Gaunce who, in his usual good manner, eulogized the good points of Oddfellowship especially in the way they look after their old members (Bros. Law, Fleming and White). The musical part of the programme was under the able direction of Bro. Leary, the instrument being very kindly lent by Mr. Arthur Thomas. During the evening refreshments were served, and a good time brought to a close about 12:30.

Startling But True.

People the world over were horrified on learning of the burning of a Chicago theater in which nearly six hundred people lost their lives, yet more than five times this number or over 3,000 people died from pneumonia in Chicago during the same year, with scarcely a passing notice. Every one of these cases of pneumonia resulted from a cold and could have been prevented by the timely use of Chamberlain's Cough Remedy. A great many who had every reason to fear pneumonia have warded it off by the prompt use of this remedy. The following is an instance of this sort: "Too much cannot be said in favor of Chamberlain's Cough Remedy, and especially for colds and influenza. I know that it cured my daughter, Laura, of a severe cold, and I believe saved her life when she was threatened with pneumonia."—W. D. Wilcox, Logan, New York Sold by all druggists.

RANBLER'S RICH ORE.

J. W. Nelson, the owner, received the smelter returns this week of a 22-ton ore shipment form the Rambler mine, west fork of Kettle river. The shipment netted $73.24 per ton. The values are in silver. Returns from another shipment of 10 tons are expected shortly. The showing made by the Rambler is excellent considering that the ore had to be hauled in sleighs to Midway, a distance of over forty miles and thence by rail to Trail. The Rambler is located near the Sally mine, in which Robert Wood and Ralph Smailes are heavily interested.

Supt. Hodges, of the Granby, examined the Bay mine yesterday.

Work on the Gold Bug tunnel was started yesterday.

Greenwood Souvenir Burnt Leather Post Cards—the latest, at Smith & McRae's.

Greenwood defeated Phoenix in a senior hockey match at the local rink Monday night. Score 4 to 3.

Dr. Foster, district coroner, is holding an inquest at Phoenix this afternoon on the body of John Hill, a miner, aged 19, who was killed in No. 3 tunnel, Granby mines, Thursday night. Hill was a brakeman on the company's ore train which hauls ore through the tunnel. When the train was re-entering the working Hill, contrary to orders, stood on the step of the car and his head came into contact with the roof of the tunnel. He did not long survive his injuries.

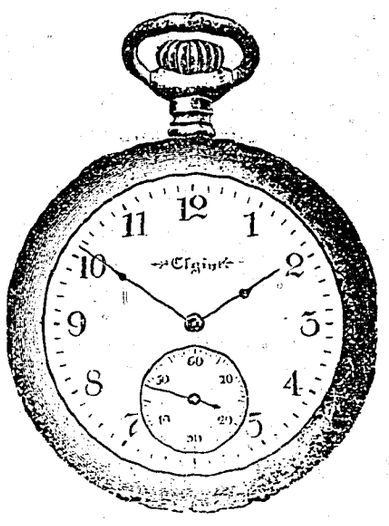
S. BARRY YUILL



PRACTICAL WATCHMAKER AND JEWELLER.

All work guaranteed GREENWOOD,

Our Mines

Operations at the Coronation have been suspended for a few weeks.

The employes of the Nickel Plate mine, Camp Hedley, are talking of raising funds to establish a hospital.

The output of the International Coal & Coke Co., last year was 50,000 tons. The mine is still closed down owing to labor troubles.

The strike of the Miners of the International Coal & Coke Co., at Coleman, Alta, has been settled to the satisfaction of both parties.

The furnaces at the local smelter were banked last Sunday whilst the flood gates of the power company at Cascade were being cleaned out.

High grade ore containing much free gold is being extracted from both drifts in the Bay mine. A carload shipment will be made early month.

Anthony J. McMillan, managing director of the Le Roi, sailed for New York on the 15th, and will arrive in Rossland in the course of the next ten days.

Martin McHale, who has the contract for driving a 300-foot tunnel on the Gold Bug has moved his plant to the ground and expects to begin operations next week.

The new crusher at the Mother Lode mine began operations on Wednesday: It has a daily capacity of 800 tons. The old crusher will be retained for auxiliary purposes.

The Hope No. 2 promises to prove a bonanza at an early date. The extension of the Silver King vein into the former claim seems now to be definately established.

The talk of the camp is the greatly improvement in the bottom of the incline shaft on the the Silver Cloud claim. The vein is widening and the ore abounds in native silver.

A local syndicate consisting of Messrs. Ehrlich, Graham, Hall and Munroe, have acquired a group of claims consisting of the Anaconda, Little Jim and Sudbury, just north of town, and are preparing to do extensive development work thereon.

In order to expediate development work, Duncan McIntosh is installing an 8x10 hoist in the E.P.U. mine which has also just been equipped with a 25 h.p. boiler and a No. 6 Cameron pump. The plant is being housed in a substantial building which is under construction.

The amalgamation of the Le Roi, Centre Star, War Eagle, Snowshoe and Centre Star mines is virtually completed. The capital of the new company will be $7,500,000 with a working capital of $1,500,000. The deal will also include the Trail smelter.

The shareholders of the Sunset mine, Copper mountain, Similkameen district, recently decided to give an option on 51 per cent of the stock to a syndicate organized by O. N. Scott, M. E., of Rossland. R. A. Brown of Grand Forks, was re-elected president, and Alex Miller, of Greenwood, one the directors.

W. A. Aldridge, manager of the Canadian Pacific's mining department, who is to be manager of the Le Roi-Centre Star combination if it goes through, is credited with being the highest salaried man in British Columbia, with a retainer of from $20,000 to $30,000 a year from the Canadian Pacific railroad.

Last week the Montreal & Boston mines broke all previous records for shipments from this camp, sending out over 4000 tons, and one day 900 tons were shipped from the two properties, the Brooklyn and Rawhide. The company's smelter, with its two furnaces, also broke previous records for one week by treating 4672 tons of ore.

With the arrival of a telegram from Mr. Hodges, manager of the Granby mines and smelter, informing the government that if the 8-hour law, introduced by the government's Socialist supporter, is passed, the entire works under his control will close down and remain closed until the act is repealed, the McBride ministry has been placed in a very awkward position. The government's supporters have been caucused, and it is reported that it has decided to give the measure a six months' hoist, McBride and Wilson voting for the bill in order to preserve the Socialist alliance.

More ore is today going out of Phoenix steadily than ever before in its history, there being approximately 2700 tons shipped every 24 hours. The shipments are at present divided between the two railways as follows: Fifty cars from Granby mines over the Canadian Pacific railroad to Granby smelter, or about 1500 tons; 10 steel cars from Granby mines over the Great Northern, or about 500 tons; 25 cars from the Brooklyn and Rawhide over the Canadian Pacific to the Montreal & Boston's Boundary Falls smelter, or about 700 tons.

The dumps of the Brooklyn and Stemwinder mines in Phoenix which the Dominion Copper company retained when the properties were sold to the Montreal & Boston Consolidated have proved to be quite a source of income to the owners. Thus far about 6600 tons of ore have been shipped, most of which came from the Brooklyn dump, and some of the cars sent out have run well in gold and copper values, for low grade mines.

R. R. Penny and G. H. M. Baker, M. E., have bonded the Silver Cloud fraction which adjoins the Bay on the north. This claim should contain the Bay reef whose strike is roughly NNE x SSW and dips to the east. The Bay shaft is only 200 yards from the Silver Cloud southern boundary. Work will be started in a few days. The claim is owned by J. W. Nelson, of this city.

The Highland Queen, owned by the Highland Queen Mining & Milling Co. was bonded this week for $10,000 by F. W. McLaine, of this city, on behalf of local parties. Development work will be started at once. The Highland Queen is located on the west side of Boundary creek and adjoins the grounds of the local smelter to the southwest. It is traversed by a quartz vein varying from 10 inches to 2 feet in width. The development consists of 200 feet of stripping along the vein and a 40-foot shaft. The values are principally in silver, a recent assay of surface rock running $200 per ton.

The Winnipeg mine was acquired by W. T. Hunter, of this city, for $2,500. The labor leins against the Winnipeg amounted to $3,400, besides other leins and judgments. The court costs were about $160, so that the 27 labor lein claimants will have the sum of $2,340 to divide between them. It is understood says the Phoenix Pioneer that Mr. Hunter represents a syndicate composed of himself, his brother, C. D. Hunter and James Hunter, W. S. Macy, and A. B. W. Hodges, and it is the intention to work the property in the spring. The mine has shipped 5,000 tons of ore. It has some 5,000 lineal feet of development work done, including a 350 foot shaft and much drifting. It has new buildings and a serviceable complement of machinery, including air compressor, hoist, pumps etc.

Mark F. Madden, of Chicago, president of the Providence Mining Co., returned home last week. Speaking to the Times Mr. Madden said, "My Chicago associates are well satisfied with their investment. The mine is looking well, especially on the 300-foot level where rich ore containing free gold and native silver was recently encountered. The crosscut now being driven on the 400-foot level should strike the ore at an early date. Once the ore is secured the value of the mine will be enormously enhanced as the area of stoping ground will be greatly increased. The incline shaft from the 300-foot level was not sunk on the vein, hence the cross-cut run to catch the ore at the lowest level. I am perfectly satisfied with the outlook. Once the ore is encountered, and this is as certain as the fact that the sun will rise tomorrow, we will consider the advisability of installing an up-to-date plant in order to increase our operations. I hope to return here early next summer with a number of Chicago capitalists who contemplate making extensive investments if they can secure properties that will suit them. Personally, I have a higher opinion of the camp than ever and am willing to back my opinion with my own money."

It is understood that the increasing demand for electric power in the Boundary has impelled the Cascade Water, Power & Light Co., to look into the matter of adding another unit to the generating plant at Cascade, which will then be 4,000 horse power. There is no doubt that this would be entirely taken up as soon as available.

The Granby smelter has been receiving some fine copper ore from the Iron Mask at Kamloops. About nine cars were brought in during the past two weeks and Supt. Hodges states that for shipments that size it is the highest grade of copper ore ever shipped in here. It runs from seven to eight per cent copper, with some gold and silver values. The ore has no lime and fluxes well with the Granby ores which contain lime in excess.

On Wednesday of last week, for the first time, the Great Northern railway began hauling ore from the mines of Phoenix, the shipments going from the Granby mines to the Granby smelter. The cars used for the traffic are made of steel, and are of somewhat different construction from those in use so long in the Boundary by the Canadian Pacific. It is the expectation for the present, that the Great Northern will take out about ten cars of Granby ore daily, or about 500 tons, which amount will later be increased. The ore shipped all comes from the No. 3 tunnel level of the Granby mines, being hauled to the new ore bunkers by an electric locomotive, recently installed at that level, and which operates with the greatest satisfaction to the management.

Harold Nelson and his company of players will present Paul Kauvar, a romantic drama at the opera house early next month.

Manager Walker has given Mr. Harold Nelson the best production yet for his new play, "Paul Kauvar," which will be seen at the opera house on March 7th.

The Phoenix branch of the Great Northern was re-examined this week by W. McCarthy, the government inspector. It is not likely that passenger trains will be run until next month.

A special general meeting of the shareholders of the Boundary-Helen Mining Co., will be held here on March 29th, to consider a resolution to authorize the sale of the Helen mineral claim, for cash.

Greenwood defeated three Phoenix teams in a curling contest at the local rink Saturday night. The scores were as follows: Boucher vs Falconer, 11-12; McNicol vs McMynn, 8-14; O. B. Smith vs Hallett' 11 to 16.

The Great Northern railway has announced the names of the stations on its branch line from Grand Forks to Phoenix as follows: Weston, Granby Spencer, Hale, Deborah, Glenside Jordan and Knob Hill Junction,

Seats are now selling for the engagement of Harold Nelson and his company in his splendid new production of the powerful play "Paul Kauvar," in which the eminent Canadian actor will be seen at the opera house Mar. 7.

In the provincial legislature this week, Mr. Brown, Greenwood, presented a petition from the Provincial Mining Association asking that the Placer Mining Act be amended to make it clear that placer claims cannot be located on mineral claims.

Robert Donagin started work this week on behalf of the city corporation in building a dam on Providence creek for the purpose of determining the flow of water and the availibility of the creek for supplying this city with water. A series of careful measurements will be made.

Thomas Graham, of Greenwood, was in a runaway accident while returning from Midway Sunday. Mr. Graham and the other occupants were upset. The team was not stopped until Boundary Falls had been reached. The rig escaped injury, although the horses were slightly bruised.

The infant boy of Mr. and Mrs. Duncan Ross died last Sunday morning after a brief illness. The funeral took place Monday 10 at o'clock. Service at the family residence was conducted by Rev. Mr. McKee, pastor of the Presbyterian church. It was attended by relatives and intimate friends.

Frederic W. McLaine, of this city, has beed appointed land agent of the C. P. R. for the district extending between here and Okanagan lake. The land department of the company recently issued a very handsome illustrated pamphlet describing the agricultural resources of the Kootenay, Boundary and Okanagan districts.

Arthur E. Mallett, representing the R. G. Dun commercial agency, was a visitor here this week. Mr. Mallett has been investigating trade and mining conditions in the Boundary and reports that they are excellent. He says the outside world is beginning at last to realize the enormous value of the mineral resources of this district.

In connection with the government's railway policy, while the premier announced that nothing will be brought down this week, it is generally understood that the government has completed arrangements with the Great Northern people whereby the V. V. & E. will receive assistance to continue its line from the Boundary to the coast. It is said the contract involves a grant of land but no particulars can be obtained. If the deal has been made with the Great Northern people it means an end to the hopes of McLean brothers.

C. E. Farguharson, butcher of Anaconda, had an unpleasant experience with the custom house people last week. He bought 1600 lbs. of beef at Chesaw, Wash., and drove across the line at 3 a.m. last Friday. Mr. Gardom, the collector at Midway, having been advised, started in pursuit and overhauled the smuggler an hour later on the road near Boundary Falls. He seized the beef and sleigh and team of horses Farquharson admitted having bought the meat for 6½ cents a pound in Chesaw. Mr. Gardom sold the beef, team and sleigh on Monday for $227 cash to P. Burns & Co. The facts have been reported to Ottawa.

R. A. Robertson, one of Greenwood's old timers left Thursday for Seattle to join his brother, from which place they will start for Dawson where they will engage in business. Some of 'Bobbies' friends say he will open up a "solo" game but the information is not confirmed.

At the meeting of the railway committee at Ottawa Tuesday a bill authorizing the construction of a railway from Osoyoos lake to a point near Grand Forks was referred to a subcommittee. This is the Nicola, Kamloops and Similkameen Coal & Railway company bill which overrides certain provisions of an act of the British Columbia legislature which is to the effect that notwithstanding anything in federal legislation the lieutenant governor in council of British Columbia shall have control of the rates to be charged on the road.

There was a large attendance at the special meeting of the Greenwood Curling club held at the rink Wednesday night, J. S. Birnie, president, in the chair. The proposition to erect a combined skating and curling was fully discussed. Finally the question was referred to a special committee with instructions to report at the next monthly meeting The committee is composed as follows: Geo. Richardson, K. C. B. Frith, Dr. Mathison, A. D. Hallett, W. Sherratt, S. M. Johnson and H. Bunting. It was decided to hold the annual dance early next month. The date will be selected by a special committee consisting of Messrs. Birnie, Warren, Falconer, Frith, Sherratt, Allison, Bishop and McCreath. The managing committee was instructed to draw new rinks and arrange matches for the balance of the season.
