BOARD OF TRADE

Invited to Send Delegates to Fernie

THE EXECUTIVE DECLINES

Hasty Action, Realizing the Gravity of the Situation, and its Relation to District.

Last Saturday the Board of Trade received a telegram from the Nelson Board urging the appointment of a delegate to proceed to Fernie to be present at the conference to be held over the coal situation. The secretary hastily summoned the executive council which discussed the matter carefully but felt that owing to not being invited by either party to the question at issue it would not be wise to take hasty action. The Nelson Board was so informed but on Saturday evening renewed its request for action.

Grand Forks and Phoenix took action in the matter, the former town sending Mr. Spier, the latter Mayor Mathison.

The Greenwood Board took steps however to keep informed of the progress of events and so informed the Nelson Board, and assured it that unless the trouble was speedily settled, as it had reason to believe it would be, and it became apparent that the presence of a representative would appear desirable that it would be glad to share in the public representations that might be made by the commercial bodies of the country, as to the injury a prolonged tie-up in the mines would have on the prosperity of the country in general.

The action of the executive was decided by telegrams from the Department of Labor and other sources and was considered in the best interests of all concerned.

THE B. C. COPPER COMPANY

The splendid management of the B. C. Copper Company was made apparent when the strike came on and the Canadian Pacific notified the smelter that owing to fuel shortage it could not undertake to haul ore. The B. C. people immediately made arrangements with the railway to haul their ore on condition that the company would provide the coal. The Copper co'y had reserves of coal enough to supply the railway for three weeks and coke enogh to keep the smelting plant going. And so there is no stoppage at the big plant here, nor will there be for some time.

WAS THE BOY CURED?

An elderly gentleman was riding on a street car the otherday. A boy began to laugh, and laughed so he couldn't stop. The old gentleman told his mother that the boy needed a spanking, and she replied that she didn't believe in spanking on an empty stomach; whereupon the man said: "Neither do I; turn him over."

PRICES OF METALS

The prices of the metals continue very satisfactory, and with slight fluctuations, hover around the following:

Copper	24 cents
Silver	65 cents
Lead	5 cents

OUTPUT OF BOUNDARY ORES

The LOW GRADE mines of the Boundary, which first began shipment in 1900, sending out 100,000 tons that year, have been steadily increasing. The 1906 shipments were 1,161,537 tons, and that of 1907 will be a large gain thereon.

The HIGH GRADES, up to the end of 1906, had in the past four years shipped out over 10,000 tons with a value of over $1,000,000.

Greenwood vs. Phoenix

The baseball season opened Sunday with a match between the above teams. The weather was perfect and a large crowd assembled to witness the old rivals play.

Greenwood team was crippled by the loss of Hallett, pitcher, he being temporarily out of the game on account of a bad arm, and the wise ones predicted an easy win for the miners, but they figured without the home boys infield, for although Phoenix outbatted Greenwood the hits were invariably gobbled up by some infielder and runs cut off.

Allan relieved Clerf in the sixth and stopped the Phoenix rungetting.

Phoenix:	Greenwood:

Greenwood	0 0 3 1 1 3 0 0 1 — 9

NOTES

Sherbino made his usual pretty plays.

Si Perkins, Greenwood's old catcher, looks natural behind the bat, but has lost his throwing arm.

Joe. Stretzel got in his usual kicking.

Thomas Bros. mixed up twice at 1st base.

Married men against single next Sunday at 2 o'clock.

THINGS DOING

Summerland is to have a Baptist college.

Coming to Canada, immigrants by the thousands.

Aylesworth gave Foster a terrible grilling in parliament.

And now they think the Panama Canal may be dug in five years.

And now its Clovah Bay that is talked of for a Grand Trunk Pacific terminus.

A snowslide at the American Boy mine in the Slocan caused the death of John Hilchey.

It now looks as if the stub of a professors cigar was responsible for the McGill fire.

Glacier ice quarried like blocks of stone in the Alps is being sold in the European cities.

Trains two weeks late have at last been shoveled out in the territories and are again moving.

Bad storms in the middle west nips the fruit in Colorado and damages the wheat in Nabraska.

The Provincial government has decided to make no change this year in the government stumpage rate on timber.

Dr. Jones announces that John D. Rockefeller has completed his plans for gift of $50,000,000 for the education of the Chinese.

Mr. William White second vice-president of the C. P. R. says the New Empress hotel at Victoria will be opened July 1st.

If as is stated Canada has a millionaire newspaper publisher he must have been plunging in Cobalt, or advertising stock in Cobalt.

The name of the Colonial Conference was on suggestion of Sir Wilfrid Laurier changed to that of the Imperial Conference.

The prosperity we hear about in Idaho and Washington isn't reflective in the patent insides of lots of the country town papers.

Editor Stead throws away his baggage checks thinking they are no good and has trouble to get his baggage when he reaches Washington.

A San Francisco paper declares that Harriman, the United Railroads, the Pacific Telephone & Telegraph Co., the Home Telephone Co., and the Southern Pacific Co. have united to fight Heney.

Combined they represent the most powerful forces America has ever known. They control capital practically unlimited.

ENTERPRISE

The Bubar Bros. at Ingram bridge, S. T. Larsen of Riverside, B. W. Bubar of Beaverdell, and J. F. Royer have united in equal interest in the purchase of the $4,000 French Coach Horse "Denois", imported for stock purposes.

Col. Watterson predicts that Hughes will be next President of the United States.

A TUNNEL SCHEME

With some Reward for the Promoters

GREENWOOD TO PHOENIX

Is Sure to Come Some Day—Why Not Now? A Concentrating Plant in Connection.

Some day, somebody with foresight and energy, and with ability to enlist the necessary capital will promote what will prove to be a most profitable enterprise, a tunnel between Greenwood and Phoenix.

Such a tunnel run from any one of several points in the valley at Greenwood would tap rich leads of ore, prove drainage for the Phoenix mines and eventually cheapen ore carriage from Phoenix to both Boundary Creek Valley and the Kettle River Valley, where the present smelters are and where the future ones must necessarily be.

For years, at intervals this tunnel project has been discussed, and practical men have declared it not only feasible, but easily so, with large features of profit. Such a tunnel would be the making of mines, and the making of Greenwood.

Last year an eastern capitalist expressed surprise that the opportunity had not been already seized, and offered to contribute a large part of the initial capital and within the present month others have expressed themselves ready to invest in the scheme. Where is the man willing and fit to launch it? Such an one would need be content to indentify himself with Greenwood for years, because it would need close attention and close business methods. To find such an one is the only difficult feature of the matter because men large enough to carry through this undertaking might not want to confine their energies to so small a town and so remote a district. The big men like big places as well as big schemes, choice anchorage for themselves as well as large profits. But the scheme is inevitable and while waiting why may not some smaller man, but of the right quality take up this affair and by its success make a greater man of himself?

The carrying out of such an enterprise would not need enormous capital. A four mile tunnel would reach from Boundary Creek to the heart of the great Phoenix camp and at a depth of say 2000 feet. The east hill is proven to contain many high grade leads and these and others would be tapped enroute. Revenue from ores would flow into the treasury almost from the start. If connected with some of the high grade mines from the beginning so much the better. Between Boundary Creek and Phoenix are the Elkhorn, Providence, Fremont, Strathmore, Defiance, Prince Henry, Crescent, Helen, Dynamo, Mavis, Tip Top, E. P. U., Bay, Skylark and other known high grade properties.

A tunnel started from any one of several points in the valley would pass through several of these at considerable depth. If with the scheme a concentrating plant and possibly a small custom smelter were combined, grist would come to its mill from the beginning. The ores of which there would be many leads, all crosscut, could be extracted on a royalty basis.

The undertaking need not be financed from the beginning. Like a railroad pushed by sections into new country as that already traversed become profitable, so this project could be pushed from lead to lead only so fast as development justified it and as returns made it easy. The high grade properties east of Boundary Creek have all grown richer and larger with depth and this single enterprise would mean the demonstration of the great value of many of them.

And in the end what an admirable outlet for the heavy ore tonnage of Phoenix such a tunnel would be. What railway would haul ore for many miles over a heavy mountaim grade when a water grade of four miles could be substituted. Unless private enterprise takes up this idea it is only a question of time when one of the railways will.

The relation of such an enterprise to Greenwood's future need not be discussed. It would not be exaggeration to say that it would mean as much for the town as all it has at present combined,

POST OFFICE BUSINESS

Although British Columbia is a very large and sparsely settled province the percentage of the Post office expenditures to Postmasters returns is much lower than in some of the Provinces.

The percentage of expenses to revenue in the several Provinces for year ending June 30th, 1906, were as follows:

Manitoba	18	per cent.
Quebec	20	"
Ontario	22	"
British Columbia	24	"
Sask. and Alberta	36	"
Nova Scotia	40	"
P. E. I.	40	"

The expense of the Greenwood office was $1089.78, and the revenue $4012.82.

SETTLEMENT AT MIDWAY

We are gratified to learn that the prospects are good for the planting of a French colony at Midway. Midway is a most beautiful and fertile spot and they who contemplate settling thereabout need have no hesitancy about buying lands there or north or west at present prices. The soil is good, the climate good, crops are reliable and prices good. If Rev. Father Perraux should decide on settling his French colony in the neighborhood, we would look to see French thrift work a great transformation in the entire neighborhood.

PAY ORE COLUMN

E. G. Warren started work on the power line to the Moreen on Tuesday morning.

At a meeting of the Morrison Mines company held in the office of A. M. Whiteside on Monday last the sale of the company's property to the Dominion Copper company was confirmed.

Portman Bros. have been obliged to suspend operations on the Dynamo owing to the presence of water in the shaft. They intend after a little to instal an electric hoist and proceed with development.

Dr. Boucher who recently returned from Camp McKinney reports the water pumped out of the Cariboo to the 400-foot level. The syndicate in charge is much pleased with the appearance of the property now that it is getting it cleaned up.

Local parties have bonded the Johannesburg east of Anaconda. The Johannesburg is a crown granted claim and has had considerable work done on it. A small quartz lead and an enormous body of iron are on the property, which is owned by Messrs. A. S. Black and Gaunce & Wickwire.

Alex. Robinson has completed his 200-foot tunnel on the Crown Silver for the Dominion Copper company. A visit to the property shows the tunnel a fine piece of work cutting three large ore bodies. The record work of the Boundary was made on this tunnel, 65 feet having been made in 19 days with two shifts.

ADVERTISING ART

We are poor at bluster, but rich in bargains.

You get more change back when you trade with us.

To pass us by would be an injustice to your pocketbook.

Not as a favor; not on sentimental grounds - we mean to get your trade by deserving it.

Like the woman chopping wood, we are not doing this for fun. Our object is more business.

Last December C. P. Rhoden registered a letter, containing a draft for $23 issued by the Okanagan State bank to Montgomery Ward, the great Chicago mail order pirates. Montgomery Ward denied ever having received the letter after being jacked up for failing to fill the order. A tracer was sent out by the postoffice department, and, lo and behold, the draft was found in the local bank, marked paid to Montgomery Ward by the Fidelity National bank of Chicago. Montgomery Ward may not like it, but will have to make good. Had the letter contained money the sender would probably been out the $23. This should be a lesson to people to shun the mail order house as they would a pestilence. They get the best of the buyer some way in the end.—Palmer Mountain Prospector.

THE COAL TROUBLE

A Story of Man's Arbitrary Methods.

WHO MOST TO BLAME?

How Closely a Country's Interests are Related Made Evident by the Event.

The dependence of the multiplied interests not only of the interior of British Columbia, but of Alberta and the new prairie provinces on the coal supply of the Crow's Nest makes a cessation of fuel output a matter of grave concern. The coal fields situation never seems to be on a harmonious basis. Somebody is always creating trouble there and unrest appears characteristic of the field.

When the men are not busy trying to force the operators, the operators are doing something to irritate the men.

There was peace and stable conditions for a few years after the former great strike at Fernie but so soon as the period of truce was up, unrest began again.

A few weeks ago representatives of both sides had a prolonged conference at Calgary. But nothing came of it. Nobody concerned, appeared to want to anticipate events sure to come unless an agreement were reached. The managers appeared arbitrary and the men appeared obstinate. The meeting dissolved, the men returned to work, the new conciliation act was appealed to. But into a heap of inflammable material mischievous hands dropped lighted firebrands. Sherman it is alleged kept the men ignorant of advices from headquarters and mine managers posted unhappy notices. And so the men, deceived by their leader and disgruntled by their employer's acts quit work. Lots of them left the country, whether to better their condition or to get beyond the possible effects of the new law's administration it may not be said. And so the output of fuel ceased.

Following that came stoppage of the mining, the smelting, the milling industries. Even railways pinched for fuel had to abandon freight traffic. This again effected other industries and other fields of trade were touched and stagnation general through a wide area took the place of activity.

The government realized that it was up to it to do something and sent the deputy minister of labor west. Boards of trade and towns everywhere through the interior anxious to help remove the trouble sent representatives to Fernie. Perhaps never before in the history of the Canadian West was the mischievous effect of men's blunders more keenly felt, nor greater zeal displayed in the effort to find a solution. The first two days of the present week found conference and colloquy the order of the day. But no good came of it. The works remained silent and the men kept moving away. The country at large was paying the penalty.

If it were necessary to raise the price of fuel in order to meet the raise asked for in the rate of wages, industries would have gladly stood it, rather than shut down. But such a solution would not suit coal mining methods. Paralysis of a country appears preferable to sacrifice of pride.

During Tuesday's conference none of those who had gone from Boards of Trade to use their influence in the crisis were admitted. Even newspaper men were excluded. Lindsley seemed the bugbear of both operators and miners, if reports are to be believed and his son was present to assist him.

During Wednesday and Thursday conferences were continued and at times it looked as if a settlement would be reached before the Board of Conciliation get together.

COAL TROUBLE CURE

The constant recurrence of trouble in the coal fields involving the welfare of the supporting industries of the entire interior should invite the attention of the Dominion government to the opening of its coal reserves on the Crow's Nest Pass. It was hoped that the government reserve of 50,000 acres of coal land in the heart of the coal country would act as a safety valve to the rapacity of the coal barons. But it has not so proved. The operators do not appear to realize their relation to the public upon whom they depend for a market. Instead of trying to anticipate trouble some of them at least appear to invite it, even provoke it.

When the recent meeting in Calgary resulted in no adjustment of the pending trouble, and the men returned to work for thirty days and invoked the government to apply its new canciliation measure it was believed that the friction would be removed and the country's industries saved from paralysis. But it appears that the management of the Crow's Nest did not want any so peacable a situation and forthwith posted notices intimating that wages were to be reduced instead of increased. This of course acted as an irritant to the men who without declaring a strike walked out. The miners elsewhere followed the example and fuel supplies for railways, miners and smelters immediately ceased.

The company managemnet claims it did this because the men had overlooked some preliminaries in asking the department of labor to apply its machinery. And yet capital is constantly talking of the ignorance and brutality of labor. Did labor ever show any greater ignorance and brutality than this?

We think the time has fully come for the government to get action on its coal properties. If they were opened up and coal sold at a small advance above cost the mine operators would be taught a wholesome lesson and the country would be benefited. The great mining industries now depending on the whim of some over-greedy capitalists or under-capable manager would be able to make plans ahead knowing that fuel supply was assured.

Southeastern British Columbia's wealth can never be developed while the fuel supply remains as now. It is too precarious. The present status of the metalliferous mining industry is imperilled and the well-being of thousands of workmen placed in jeopardy by the greed of stockholders in the coal mines and the incapacity of the men sent from their offices in Toronto to manage a concern vital to the country's weal. Will the government take cognizance of the gravity of the case and act as the guardian of the peoples rights?

Without questioning the value of any regulations by the department of labor, we insist that the government owned coal mine would be a reliance for mine owners and a constant pressure on others to do right.

Upon the coal one of the country's natural resources the development of the country's other resources depend and that dovelopment should not be open to arrest by man's greed or incapacity.

EDITORIAL NOTES

A government-owned coal mine would keep the price down and the supply sure.

For how and why men become Socialists read the story of the management of coal mines.

The opinion is general that Boundary Creek is booked for very high water this spring.

Wherever he goes Editor Stead stibs the people who hear him by his blunt independent utterances.

How are you getting on with the spring clean-up? Some day the city will do it for you and you will pay the bill.

Long-headed men buy land in British Cclumbia, and the longest-headed buy it in the Kettle Valley west of Midway.

Why may not the government take over the coal mines and work them in the public interest if it finds their management unjust or incapable.

The poor are not without their compensations. While the palaces of the wealthy suffered in the recent earthquake in Mexico, the adobe homes of the poor were unharmed.

Billions of tons of coal owned by the people of Canada, in the name of its government in the Crow's Nest. Why not let the people dig it out, and sell it to the people, for the people's benefit.

Buster Brown hit the nail on the head when in philosophical vein he says: "Too few people do their own thinking. They let the doctor, the church and the newspaper tell them what to believe.

We regret that the Midway Star sees fit to censure Greenwood for deciding to have a celebration on May 24th and 25th next. Greenwood has been a good patron of Midway celebrations for years and has not entered the field itself and doubting that Midway would care to undertake a celebration this year decided to have one at home. We trust our Midway friends will not heed the Star's intimation to remain at home on the 24th but will return some of the calls Greenwood has been making on her for years past.

President Woodrow Wilson of Princeton is reported to have declared that the tobacco chewing habit made statesman. We have always supposed that the habit made men reflective because obliged to use their mouths so much for other purposes they could not overwork them for talking, But as to making statesmen of them we are in doubt. We know ward politicians that can hit a crack accurately ten feet away, but then we know others that can fresco a floor for several feet around a cuspidore and never hit the hole. No we are not conversant enough with our statesmen's habits to size this new proposition up correctly but all the same we doubt it.

A RATIONAL SUNDAY

From Toronto the centre of Puritanism, if not of Pharisaism, in Canada comes the demand for a more rational Sunday. An organization known as the Canadian Rational Sunday League has been formed whose aims are set forth in the following resolution:

"That it is desirable to organize an association similar to the London National Sunday League for prsmoting healthy and innocent recreation on Sundays, and to oppose tyrannical and restrictive legislation regarding Sunday, and it is felt that recent legislation on this subject has been carried too far, interfering with individual liberty to an extent unknown in any other country under the British flag. That this association be called the Canadian Rational Sunday League, and that its declared objects be: To promote rational Sunday recreation, to secure the opening of picture galleries, museums and reading rooms on Sundays, to provide music on Sunday afternoons in the parks or other convenient places, to obtain legislation allowing a charge to be made for popular Sunday lectures or concerts, and to oppose restrictive legislation regarding Sunday observance."

WEST LOOMS UP

The business magnitude of the west is becoming of greater and greater importance every day in the regard of the east. The fact that the business situation is keeping in advance of the development of transportation facilities is an evidence of the great possibilities of the country. The transportation problem really is the problem of the country, the solution of which probably is of greater importance than any other phase of western life. It is to the material interest of the west that the righting of this question be facilitated with all all possible dispatch so the business may not be impeded by lack of means of transportation."—The Commercial.

A REMNANT COUNTER BARGAIN

Old Skinflint, although he had plenty,
Was, on driving good trades so intent,
he
Wed a saleslady who
Was, in fact, thirty-two,
Just because she was marked down to
twenty!

—Nixon Waterman in Broadway Magazine.

PEEPS INTO WOMEN'S LETTERS

If our readers could spend one morning looking through the letters received from all over Canada by the Zam-Buk Co., it would bring home to them with irrisistable force the healing virtues of this great household balm. Old women, young women, wives, mothers, and even young girls have something to say about how Zam-Buk did this or that good office in their home. Many of these writers give permission to make extracts from their grateful testimony. From these the following were taken at random:

"I was troubled for some weeks with salt rheum in hands and arms and was using a salve which did me little good. On receiving a sudply of Zam-Buk I applied it, and it really seemed to act like magic! The itching and burning ceased, and in a few days the skin was cleared and healthy." So writes Miss A. E. Butchard, of North Keppel.

"Three boxes of Zam-Buk cured me of eczema, from which I had suffered a long time." So says Mrs. Gladden, of Mansonville, Que.

"Zam-Buk cured a case of blood poison in my family, and I wish to thank you for the great blessing it has proved," is the effect of a letter from Mrs. Webb, of Dovercourt.

And so one could go on quoting extract after extract, showing how Zam-Buk cures chronic sores, ulcers, abscesses, bad leg, itch and blood poison; takes the soreness out of cuts and burns, and grows new, healthy skin over injured or diseased places. All stores and druggists sell at fifty cents a box, or the Zam-Buk Co., Toronto, will mail for price.

COPPER

Copper is very firm and in constant request all over the world. Copper properties in Nova Scotia and New Brunswick, as well as in Ontario and British Columbia, are attracting new interest by reason of the increasing consumption of this metal.—The Commercial.

The "Jolts" and "Jars" of Life

are what use people up.
Most people live pretty well up to the limit of their powers, and so long as everything goes smoothly that is apparently all right; but a "jolt" or a "jar" in the shape of business worries, domestic anxieties, or an attack of La Grippe, Pneumonia, Typhoid, or other wasting disease, suddenly reveals the fact that there is a sad lack of reserve force to meet these contingencies and the result is serious, often fatal. A wise man will see to it that his system is fully fortified against sudden attack. To attain this result nothing is so sure and effective as

FERROL

This fact has been fully established by actual experience. If, therefore, you feel you are not in first-class shape physically, do not fail to take a course of FERROL at once. It contains Cod Liver Oil, Iron and Phosphorus—just what you need, it is easy to take, never fails, and you

Has a special "Prospectors' Course" for miners who work in B. C.

Instruction is also given in Art, Music, Physical Culture and Elocution.

Term opens September 17, 1907. For calendar, etc., address COLUMBIANCOLLEGE

McRAE BROS. & SMITH, LIMITED

NOTICE Is hereby given, that three months from the date hereof, the Company heretofore bearing the name McRae Bros. & Smith, Limited, will apply to the Lieutenant-Governor in Council for an order changing its name to McRae Bros., Limited.

Dated at Greenwood, B. C., this 9th day of February, A. D. 1907.

ARTHUR M. WHITESIDE,
24-36 Soliciter for the said Company.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother,

(3 If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to esidence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,00 pounds shall be collected on the gross output.

W. W. CORY,

Deputy of the Minister of the Interior

N.B.—Unauthorized publication of this advertisement will not be paid for. 32-59

People of Note

In Short Meter

Lord Grey spoke at the International Peace Conference in New York.

A statue of the late Lord Salisbury is to be erected within the walls of the Foreign Office, where so many of his triumphs were achieved. Lord Salisbury was the head of the Foreign Office during four Parliaments.

Hon. John Charlton, of Lynedock, Ont., was married last week to Miss Cora Janet Owen. Mr. Charlton was born in 1829, and for many years was one of the most prominent among the Liberal members of the Canadian House.

Mr. William A. Galliher, M. P. for Kootenay in the House of Commons, was married in Detroit on the 17th inst. to Miss Louisa Brown, daughter of the late Charles Brown, who for many years conducted a livery business on Roark street, Toronto.

Thomas Longboat, the Indian runner, of Toronto, Canada, today broke the record for the Boston Athletic association 25-mile Marathon road race from Ashland to Boston, and defeated a field of 114 runners after the most closely contested race since the event was inaugurated, in 1897.

Longboat covered the distance in 2 hours 24 minutes 20 4-5 seconds, this being 5 minutes 2 4 5 seconds faster than the previous record, which was established in 1901 by J. J. Caffrey of Hamilton, Ont.

Robert Fowler of the Cambridgeport Gymnasium association finished second, also within the previous record. His time was 2 hours 27 minutes 54 4-5 seconds.

John J. Hays, St. Bartholomew's club New York, was third, in 2 hours 30 minutes 38 3-5 seconds.

Mr. Aylesworth amply demonstrated in his magnificent reply to Mr. Foster on Wednesday that he is fit to rank with the greatest Parliamentarians who have stood in that Chamber. There was every temptation to make a rancorous party speech, but instead of that the House heard an address marked with the calmness and precision of a judicial utterance. No fair-minded opponent could say that there was an attempt to press the facts too far. Indeed, a presentation of the facts in lucid order was the scope of it. They were placed side by side, one after another, until they stood like a British square—unbreakable. It was a speech which which those who heard it will never forget for its calm force, ease, and completeness. If ever a few occupants of the Opposition benches thougbt they could howl such a man out of parliament they have probably by this time discovered their mistake. —Globe.

SHE'D NOTICED IT

"Look here," said the husband. "You musn't complain that way. Remember, at least, that I have to foot the bills."

"Yes, you foot them." retorted the wife. "You kick at every single one of them."

ASSESSABLE OR NOT

On the subject of the merits of assessable or non-assessable mining stocks, M. E. Davis of Butte, contributes the following to the Mining World:

In even a limited discussion of this subject, we should endeavor to free our minds from prejudice, and get down to the business aspect of the matter, with a view of arriving at correct conclusions.

We know that the term "non-assessable" sounds good to many people accustomed to regard it as a highly desirable feature of mining stock, and its popularity has been abused occasionally by unworthy mining companies, which use it as "bait" for their stock-selling operations. It is also being used by meritorious companies. Statistics show that the non-assessable feature is responsible for the closing down and failure of more mines and companies than all other causes combined; but who ever heard of a genuine "wild-cat" starting out deliberately with assessable stock?

It often happens in case of a worthy "prospect," that stock has been sold too cheap to complete development to the dividend stage. Ore may have been found, but the treasury depleted by the operations necessary to reach that point; a few paltry assessments might have enabled the progress to be made, in a very short while, to where dividends would be easily possible. When a company has been incorporated as non-assessable, and the stock is sold as such, it is impossible, in practice, afterwards to obtain the necessary unanimous consent of stockholders to a reorganization on an assessable basis, even to protect their original investment.

Ordinarily the mine is then closed down, and all investors are compelled to suffer pecuniary loss. On the other hand, where the power to assess is unlimited amount at any and all times is vested in a company, it is not always just to the small stockholder, who is compelled to pay his share without having voice in the expenditure of the money. This may be said to constitute a temptation whereby unlimited power in some cases, might be subject to abuse, to the detriment of minority stockholders.

The unlimited assessment feature, which is for emergency only, is desirable in any company, whether mining or otherwise. As a life-boat on board the steamer may be the means of saving passengers, or the vested power to negotiate a loan of a few thousand dollars may save from failure a manfacturing or commercial enterprise, so should the power to levy a limited assessment save a mining company at some possible point in its career, unforseen by the original promotors. A limited assessment feature provides protection to the interests of all stockholders, with deteriment to none.

In its last analysis the success of any mining company largely depends on the management, in either condition. It would seem to be a more reasonable theory for incorporators to provide some elasticity for the future legitimate operations of a company.

It is no proof either way that because a stock is assessable it is sure eventually to make a paying mine, (though the chances are in its favor), nor because a stock is non-assessable that the mine will fail. There are more successes among mining companies which have levied assessments when needed, than among companies in which this has been impossible. So well is this fact recognized in the older mining districts, that some of the states have passed laws prohibiting the forming of mining companies with the non-assessable feature, hence more dividend payers have been opened up than ever before.

Summing up, it would seem to be an evidence of foresight and good management, for mining companies to provide themselves with the limited assessment feature when incorporating (say for 10 to 30 per cent of par), not with the idea of using it, simply as an emergency clause, just as fire insurance is to the merchant. As such it would be of benefit to all should the occasion ever arise.

BRITISH COLUMBIA

In his recent assay on the subject "Is British Columbia as rich potentially as the other Provinces of the Dominion"

Ex-governor Mackintosh presents an admirable argument. One list of figures given struck us very forcibly, and which we subjoin:

"Many may be inclined to question the correctness of the above statement. If so, the most sceptical would be convinced by a careful examination of the tabulated statements and diagrams, contained in the last census. These figures prove beyond cavil, for notwithstandiug the fact that British Columbia has been unjustly treated, and at times unfairly handicapped, her population, per capita, is richer than those of the other provinces. Here is the proof:

(1)

Value of Land and Houses, per Occupant.

British Columbia	$5 484
Manitoba	4 703
Territories	3 350
Ontario	4 963
Other provinces (average)	2 000

(2)

Production per Farm.

British Columbia	$1 047
Territories	562
Manitoba	735
Ontario	1 040
Quebec	633
Other provinces (average)	400

In the following for the purpose of brevity, only the highest and lowest figures are given:

(3)

Production per Lot.

British Columbia	$ 555
Territories	2 061
Ontario	1 105

(4)

Income from Mines, Forests, Farms and Factories, per Head.

British Columbia	$ 290
Ontario	219
Prince Edward Island	62

(5)

Fisheries, Per Head.

British Columbia	$25 45
Nova Scotia	15 82
Ontario	51

(6)

Production of Mines Per Head.

British Columbia	$82 13
Nova Scotia	19 70
Prince Edward Island	51

(7)

Forests of Canada, Per Head.

British Columbia	$15 90
Ontario	9 90
Prince Edward Island	2 77

(8)

Production of Factories, Per Head

British Columbia	$135 50
Ontario	130 92
Territories	10 95

A CHANGE WANTED

In the recent labor enquiry at Victoria one of the witnesses, a laboring man from Wales, and in the country a year said:

"When he went to the Dominion Government agent at Cardiff, who told him of condition at Fort William, Winnipeg and other places. On inquiring about British Columbia, however, he was told, "We don't want you in British Columbia, we want you in the prairies."

Now we would like to ask what right the government agent has to say what "we" want. "We" is the people of Canada who pay his bills and not the man who merely acts as spokesman for that people. We presume that the statement made is correct and if so the government of Canada better get another agent, or the present one better learn to know his place.

The World Over

Told in Brief

McGill university has had two fires recently, both of unknown origin. The damage is estimated at half a million dollars.

It is reported that the Great Northern Railway is to build an 800 foot wharf on the Fraser River at Westminister and to make that place the home port for a fleet of Alaska steamers.

The first train from Edmonton over the C. N. R. in twelve days pulled into Winnipeg recently. The passengers tell many tales of trying experiences and often privations.

J. Chesholm, mayor of Battleford, who left there on a special train some time ago to undergo an operation for appendicitis at Winnipeg, but whose train was stalled, necessitating the operation in a drug store at Warman village, succumbed to the effects.

The New Brunswick Legislature has placed itself on record as being in favor of having the Canadian ensign float over the school houses of the provinces during the school hours. The Board of Education was recommended to take the matter up with the secretaries of school boards and was empowered to appropriate a reasonable sum to assist in purchasing flags in cases where school boards are not willing to bear the whole cost.

It is understood that an arrangement has been reached between Canada and Britain whereby British newspapers and periodicals will come to Canada under greatly reduced rates. Postmaster-General Lemieux will likely give the details of the agreement to parliament and the country at once. The decision reached at the congress in Rome to carry letters of one ounce instead of half an ounce for two cents from Canada to Britain will take effect at once instead of in October as previously arranged.

The question of establishing uninterrupted communication between Prince Edward Island and the mainland by means of a tunnel under Northumberland Straits has been a fruitful topic of discussion during the present session of Parliament. Some light is thrown on the subject by a report made to the Department of Marine last year by Mr. Eugene D. Lafleur, chief engineer of the Department of Public Works, and Mr. A. St. Laurent, assistant engineer. According to their report, based principally on surveys and soundings made at the request of the Government in 1892 by Sir Douglas Fox and Mr. A. W. Palmer of the Institute of Civil Engineers, the estimated cost of the proposed tunnel is $15,045,000. It is admitted, however, that this is but an approximate estimate. Other estimates of cost have placed the amount required to construct the tunnel at anywhere between nine million and forty millions. The tunnel proposed in the survey of 1892 would be seven and a half miles long and would reach a depth of 150 feet below the water level. If the funds were available Messrs. Lafleur and St. Laurent say the construction of the tunnel is feasible, there being no insurmountable engineering difficulties to overcome.

Though Port Arthur is expecting much from its silver and copper mines, it expects more from the opening of the enormous beds of iron ores adjacent to the town.

MINERAL ACT, 1896.

Certificate of Improvements.

NOTICE.

"Commander" Mineral Claim, situate in the Greenwood Mining Division of Yale District. Where located: In Copper Camp.

TAKE NOTICE That I, Isaac H. Hallett, Free Miner's Certificate No. B 2093, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a Crown Grant of our interest in the above claim.

And further take notice that action under section 37, must be commenced before the issuance of such certificate of improvements.

Dated this 16th day of April, 1907.

33-37 I. H. HALLETT.

Let Me Sell You a Chatham Incubator —On Time—

Do you know there is big money in raising poultry? Do you know there is more money in running a good incubator than in almost anything else you can do for the amount of time and trouble it takes? Do you know my incubator will pay you a bigger profit than any other thing you can have on your place?

Well, all these things are true, and I can prove it. Thousands of people all over Canada have proved it every year for the last five years.

I want to quote you a price on my Chatham Incubator, —sold ON TIME. I want to send you my Chatham book. This incubator book is *free*— I'll send it to you for just a postal card. It tells you a lot you ought to know about the Poultry business—it tells you how to make *money* out of chickens—it tells you how my Chatham Incubator will make you *more* money than you can make with hens—far more, and with less trouble.

This book tells you how my Incubators are made—why they are the best ever invented—and why I sell them ON TIME and on a 5-Year Guarantee.

My Company has been in business in Canada for over 50 years. We are one of the largest wood-working factories in the country. We also operate a large factory at Detroit, Mich. We have the Incubator and Brooder business down to a science.

Chatham Incubators and Brooders will make you money, for a Chatham Incubator will hatch a live, healthy chicken out of every fertile egg put into it, in 21 days.

Will you write for my book today? Do it now while you think of it. Just say on a postal "Please send me your Incubator Book"—that's all. Address me personally.

We cover the entire field of nervous, chronic, deep-seated and complicated diseases.

CONSULTATION FREE.

If you cannot call, write for Symptom Blank. Many cases can be cured at home. All correspondence confidential.

SCOTT MEDICAL COMPANY

109 Marion St., Cor. First Ave.,
SEATTLE, WASH.

THE COPPER HANDBOOK

(New edition issued Nov. 15, 1906)

Is a dozen books in one, covering the history, Geography, Geology, Chemistry, Mineralogy Metallurgy, Terminology, Uses, Statistics and Finances of Copper. It is a practical book, useful to all and necessary to most men engaged in any branch of the Copper Industry.

Its facts will pass muster with the trained scientists, and its language is easily understood by the everyday man.

It gives the plain facts in plain English without fear or favor.

Its lists and describes 4626 Copper Mines and Companies in all parts of the world, descriptions running from two lines to sixteen pages, according to importance of the property.

The Copper Handbook is conceded to be the

WORLD'S STANDARD REFERENCE BOOK ON COPPER

The Mining Man needs the book for the facts it gives him about mines, mining and the metal.

The Investor needs the book for the facts it gives him about mining, mining investments and copper statistics. Hundred of swindling companies are exposed in plain English.

Price is $5 in Buckram with gilt top; $7.50 in full library morocco. Will be sent, fully prepaid, on approval, to any address ordered, and may be returned within a week of receipt if not found fully satisfactory.

21-30 I. H. HALLETT.

Certificate of the Registration of an Extra-Provincial Company.

"COMPANIES ACT, 1897."

I HEREBY CERTIFY that the "Fremont Mining Company, Limited," has this day been registered as an Extra-Provincial Company under the "Companies Act, 1897," to carry out or effect all or any of the objects of the Company to which the legislative authority of the Legislature of British Columbia extends.

The head office of the Company is situate at the City of Spokane, County of Spokane, State of Washington, U. S. A.

The amount of the capital of the Company is three hundred and seventy-five thousand dollars, divided into one million five hundred thousand shares of twenty five cents each.

The head office of the Company in this Province is situate at Grand Forks, and Charles M. Kingston, Physician, whose address is Grand Forks, B. C., is the attorney for the Company.

The time of the existence of the Company is fifty years from the 7th day of November, 1906.

The Company is specially limited under section 50 of the above Act.

Given under my hand and seal of office at Victoria, Province of British Columbia, this 11th day of March, one thousand nine hundred and seven.

(L. S.) S. Y. WOOTTON,
Registrar of Joint Stock Companies

The objects for which said Company has been established and registered are:—

To work, operate, buy, sell, lease, locate, acquire, procure, hold and deal in mines, metals and mineral claims of every kind and description within the Province of British Columbia and elsewhere; to carry on and conduct a general mining, smelting and reduction business; to purchase, acquire, hold, erect and operate electric and power plants for the purpose of mining and treating ores, and for the purpose of creating power and furnishing lights needed in and incident to the Company's business and mining; to bond, buy, sell, lease, locate and hold ditches, flumes and water rights; to conduct, lease, buy, sell, build or operate railroads, ferries, tramways or other ways of transportation for transporting ores, mining and other materials; to own, bond, buy, sell, lease and locate timber and timber claims, and finally to do everything consistent, proper, convenient and requisite for the carrying on of the objects and purposes aforesaid in their fullest and broadest sense, within the territory aforesaid. 29-32

SHERWIN-WILLIAMS

Decotint

A SANITARY COLD WATER PAINT

READY FOR USE WITH THE ADDITION OF COLD WATER

DECOTINT is made in 15 delicate tones and popular shades, also white, and is prepared for use instantly by the addition of cold water and thorough stirring.

DECOTINT is especially clear in tone and thoroughly sanitary. It is readily prepared and easily applied and gives an artistic finish without a prominent gloss to reflect a glaring light.

DECOTINT, unlike kalsomines, does not rub off on the clothing and on account of its moderate cost permits of frequent changes in interior color schemes at very little expense.

SHERWIN-WILLIAMS

Paints

PREPARED

Made to Paint Buildings With Outside and Inside.

It costs less per job and wears longer than any other paint, either ready prepared or mixed by hand.

JOB WORK

PAGE OF PERSONALS

Dr, Mathison, dentist, Naden-Flood block.

May 24th and 25th are the dates of the Big Celebration.

These are "dog days", that is dog tax days.

Dr. Gordon of Phoenix was a Greenwood visitor on Monday last.

Ralph Smailes arrived in town from Seattle on Monday evening's stage.

A new restaurant has been opened in the old Commercial hotel on Copper street.

H. H. Shallenberger is again in town hurrying work at the Deadwood properties.

Spend an enjoyable evening at the B. C. Hotel next Wednesday evening, May 1st.

A. L. White has been making some nice improvements to his house and grounds.

Jess Alexander, cook at the Norden, was taken to the hospital Monday morning.

Mr. and Mrs. J. E. McAllister are giving a dance in Miller's Hall next Friday evening.

Spencer Bennerman has left for Cobalt to prospect that district for some Greenwood people.

Stanley G. Jewett, Inspector for the Mainland Fire Underwriters' Association was a visitor this week.

Sidney Oliver has purchased some very fine lots west of Boundary Creek near the old electric light station.

T. Thomas, merchant tailor, has had some marked improvements made in his place of business on Copper St.

Everything keeps climbing these days—the price of rents, fuel, provisions, everything. And wages too.

George H. Williams has returned to Greenwood and will assist Manager Thomas at the Boundary Falls plant.

Geo. R. Naden, M. P. P. returned from Victoria on Monday for a short stay before going north for the summer.

J. A. Devlin has purchased the Drennan farm west of Midway and is going to prospect it for timothy and spuds.

Capt. Swayne has sold out his interest in the Greenwood bakery which will hereafter be conducted by Messrs. Cowic and Jackson.

Jos. Gagnon who had been ill for some time in the Sisters' Hospital died on Saturday night and was buried by Gulley & Co. on Wednesday.

Mayor Guise of Westbridge who has been doing a rushing hotel and merchandise business during the winter was a Greenwood visitor last Saturday.

Baird Bubar, the ore contractor between Beaverdell and Midway was in Greenwood last Saturday. Mr. Bubar handles the Sally and Duncan ore output.

Hugh McKee has returned to Greenwood looking well after a profitable winter's campaign in the log business on Kettle River, some distance above Westbridge.

Mr. A. W. English who has been one of our prominent citizens for years, has left Greenwood to accept a lucrative position in Cobalt. Mrs. English and family will join him there later.

Next Wednesday evening an entertainment will be given at the B. C. Hotel in the interest of St. Jude's church. Music, singing, dancing and cards will be features of the occasion.

Hugh McKay, Thos. King, Al. Falconer and Benj. Petersen of Beaverdell left on Wednesday's C. P. R. for Vancouver where they take boat up the Skeena River for Bulkley Valley. Some day they'll wander back again.

David Bannerman for years one of our most enterprising citizens, and who some months ago removed to Victoria was a visitor in town this week. Mr. Bannerman's prosperous appearance confirms the report that he is making lots of money in the capital city.

The Oddfellows will celebrate their 88th Anniversary on Sunday next. The local lodge will assemble at the hall at 7 p. m, parade at 7:15 and then proceed to St. Jude's church where Rev. J. Leech Porter will preach the annual sermon.

John Mulligan who left Phoenix on Dec. 29th last for a trip east has returned. He visited New York, Buffalo, Detroit and other eastern cities and reports having had a most enjoyable trip. He had not been east since leaving the old home twenty-nine years ago and of course found many changes. He is glad however to get back to the hills for which he feels a friendship that the civilized east cannot supplant.

Jas. Cunningham who has been wintering in the east has returned to the Boundary.

Don't forget the Social entertainment at the B. C. Hotel, Wednesday evening, May 1st.

Elmor Collyer of Beaverdell has been taking a lay-off and of course came to Greenwood.

Manager Proctor, of the Bank of Montreal, made a business trip to Nelson this week.

Dr. Foster is off to the coast for a short vacation. Dr. Newcombe of Midway will look after his practice while absent.

You and your friends are cordially invited to attend the social entertainment at the B. C. Hotel Wednesday evening, May 1st.

Mr. J. T. Beattie who has been acting manager of the local branch of the Bank of Commerce has been permanently appointed to the position.

Currie White has returned from a very pleasant trip to the coast, looking much better for his well-earned rest. Mrs. White will not return until sometime later.

When the strike is over in the coal fields just watch the Boundary boom as never before. The ore is coming up, the matte is coming out and big prices for the brown stuff are coming in.

Enlargements and improvements are planned for the Foundary at the South end. A machine shop will be added and capital is in sight to make the works an important industry for the town.

Rev. T. J. Robinson, M. A., of Rossland, will exchange pulpits with Rev. M. D. McKee on Sabbath next. Mr. Robinson will also conduct the service at the Mother Lode mine Sabbath afternoon 3 p. m.

Mike Kane of Phoenix, worn out with the stress of the high altitude and the pressure of business is recuperating in the salubrious atmosphere of Greenwood. A few days here has made a new man of Mike, although the old one was a fair specimen.

We are pleased to observe that James W. Grier who has been instrumental in bringing our contemporary, the Ledge, to its present flourishing condition has purchased the entire property. The present owner of the Ledge is a newspaper man and we are sure the paper will maintain its present standard.

The birthday party in the Presbyterian church Thursday evening was a great success both in a numerical, financial and social way. The plot calls for each visitor to put in an envelope an admission price one cent for each year of his age. The scheme works well for benevolent ladies to raise the limit and obscure their real age by putting a dollar in the fund.

Have you seen the Three Sisters? the latest design in wall paper. Watch our windows. Coles & Frith. 33-34

Laurier remains silent at the Imperial Conference on the subject of imperial defence.

The Bank of Montreal will act as agent for the Dominion government in renewing a $10,000,000 loan soon to fall due.

Port Blakely across the Sound from Seattle recently suffered the loss of its supporting industry a large sawmill. The fire loss was $750.000.

It's a great satisfaction to buy where one has only the gratification of his taste to think of, knowing that quality will be right.

If your work is not appreciated you have not failed. Experience counts for something.

THE ORE TRAIN

The Copper World Extension in Okanagan is looking up.

A great ore body has been proven on the Trinity Gold and Silver company's group.

The ore shoot on the 900 foot level of the Rambler-Cariboo has been tapped, which accounts fer the rise in the stock the past few days. There was no information about the extent of the ore, but it was reported to be even richer that the ore on the 800 foot level, which assayed in some instances 200 ounces in silver and 70 per cent lead.

Articles of incorporation were filed yesterday in the office of the county auditor by the Grant Consolidated Copper Mining company. It is organized to operate claims in the United States, Mexico and Canada, and is capitalized at $1,650,000.

The business of the corporation will be governed by a board of three directors, those chosen until the first election being John Brown, J. A. McLean and George A. McLeod, all residents of Spokane.

The Washington & Great Northern Railway company is building a one-mile spur running south from Boyd's station, six miles north of Marcus, to connect with the end of the wire tramway extending across the Kettle river from the Napoleon mine, on the Ferry county side of the river. The cable tram is about one mile in length and is now handling about 100 tons of ore from the Napoleon, which is being shipped to Greenwood. The Napoleon group of claims is being operated by the B. C. Copper company.

A couple of years ago the Dominion parliament voted an appropriation of $15,000 to be used for the purpose of building an electric furnace and ascertaining wheteer such ores as magnetic and ores containing high sulphur could be successfully treated in the electric furnace. These experiments were conducted at Sault Ste. Marie, and simply confirmed the report of the Haanel commission to Europe. N. Thompson of Vancouver, being greatly impressed with the process, went to England a year ago and succeeded in interesting English capital to establish an experimental electric plant at Bow, near London. The success at La Praz and Sault Ste. Marie have been repeated at Bow, and now a company has been organized to treat the waste ores of copper and tin from the mines of Cornwall by this process, which will yield a most profitable return. Mr. Thompson is anxious to establish an electric smelting plant in British Columbia, and R. Turnbull, the Scotch engineer who came out with Dr. Herault to conduct the experiments at the Soo eighteen months ago, and who has had an extensive experience in connection with smelting, is prepared to erect a plant at Welland, Ont., if the government will grant a special bounty covering a term of years.—Inland Sentinal.

In the long fought case, involving water rights of 4th of July Creek, W. H. Covert and the Eastern Townships Bank verus Vaugh and the Granby company, the supreme court gave judgment on Wednesday favorable to the plaintiffs.

Do Not Crowd the Season.

The first warm days of spring bring with them a desire to get out and enjoy the exhilerating air and sunshine. Children that have been housed up all winter are brought out and you wonder where they all came from. The heavy winter clothing is thrown aside and many shed their flannels. Then a cold wave comes and people say that grip is epidemic. Colds at this season are even more dangerous than in midwinter, as there is much more danger of pneumonia. Take Chamberlain's Cough Remedy, however, and you will have nothing to fear. It always cures, and we have never known a cold to result in pneumonia when it was used. It is pleasant and safe to take. Children like it. For sale by all druggists.

"Is this the best hotel in town?" ask the stranger.

"Well," replied the native, "I dunno as I'd put it as strong as that, but I guess its safe to say it ain't as bad as the rest of 'em.'
