GREENWOOD.

IN THE FRUIT BELT

The Similkameen and Okanagan Districts.

BUSINESS IS VERY GOOD

Towns Growing and Trade Is Brisk—Three-Fourths of the Grading to Keremoes Completed.

F. M. Elkins, general agent for the Sun Life Assurance company, returned Monday night from an extended trip through the Similkameen and Okanagan districts, visiting Keremoes, Hedley, Penticton and Peachland. Generally speaking he found these towns in a prosperous condition steadily growing and in several places a remarkable improvement has taken place during the past year. This was most noticable in Penticton where some forty new buildings have been erected during the past few months including a new Bank of Commerce branch of which J. M. Christie is manager. Almost all lines of business is represented and trade is brisk. Fruit growing is becoming an important industry and the whole beachline along the lake front has been ploughed up and planted in orchards. Irrigation projects have been pushed forward and the fruit crop will soon be a large one.

AT KEREMOES.

The same may be said of Keremoes. W. H. Armstrong of Vancouver, who owns a large tract of fruit land, has been making extensive improvements, and lands that a few months ago were covered with sage brush and scrub have been all cleaned and planted with fruit trees. Mr. Armstrong has also located a new townsite on the V., V. & E. about one mile from the old Keremoes townsite, which he expects will develop into an important point. At present a large hotel is in course of construction there. Mr. Elkins states that about 75 per cent. of the grading between Midway and Keremoes on the V., V, & E. has been completed, but as yet no steel has been laid.

NICKEL PLATE DEAL.

At Hedley the saw mill is working steady and a few men are at work at the Nickel Plate mine. It was rumored in Hedley that M. K. Rogers, one of those interested in the Nickel Plate, had offered a large sum to buy out the other shareholders, but they had refused. It is stated that Mr. Rogers then offered his share for sale, but it is understood no deal has been completed.

The fruit industry is also a growing one at Hedley, and the district promises to become an important one in this line. A Mr. Bradshaw, formerly of Greenwood, is located on a fruit farm five miles from Hedley, which he has planted in orchards. Business firms are also improving their premises and preparing for a general increase in trade. The firm of Shatford's, Limited, has erected a fine store and are carrying on a good line of business.

Princeton is also looked upon as a town with a good future and many in the Similkameen look forward to it becoming a place of importance. Finley Fraser, well known in Greenwood, is putting up a brewery at this point. At Penticton there are many people from Winnipeg and Manitoba who have grown tired of the cold prairies and have located in the "California of Canada," and are making new fortunes growing fruit. C. A. C Sewart is proprietor of the leading hotel, and is finding business brisk in his line.

NEW C. P. R. STEAMER.

At Okanagan Landing the timbers for the new C. P. R. steamer is arriving and other supplies are on hand and construction is expected to start shortly. When completed the new boat is expected to surpass anything now plying between interior ports. There is also talk of the C. P. R. building a wharf at the landing to accommodate the steadily increasing trade It is also expected that the Bank of Montreal will erect a branch to take care of the financial business. As both the C. P. R. and the Bank of Montreal people are largely interested in the development of the Okanagan country improvements of this kind are expected to follow as a matter of natural business enterprise.

During his brief trip Mr. Elkins also visited Oroville, where he met G. Grieger, formerly of Greenwood, who is now conducting a wholesale liquor business and is prospering well. Revelstoke and Arrowhead were also visited, and business was brisk in both places.

AT THE B. C. SMELTER

Foundations Being Laid and New Ore Bins Started.

Work at the smelter is rapidly proceeding on the foundations for the new buildings. The stone work for the support of the superstructure of the converter room is almost completed and the excavations for the furnace rooms are well advanced. The foundations for this structure have also been started and no time will be lost in rushing the work to completion. When completed the south end walls of the furnace room and converter plant will be flush, and while no additional converter machinery will be installed, yet the increase in space will greatly facilitate the work. When the three new furnaces have been installed the capacity of the smelter will be three times as great as at present. Construction work on the new ore bins is well under way though progress is somewhat handicapped from lack of material, some shipments of timber having been delayed. The water tank has been removed to its new position and will be raised some eight feet higher. This has been a tedious piece of work and rather heavy, the tank weighing some eighty or ninety tons.

While the smelter will eventually have to close down for a short time to install the new furnaces, it is not expected that it will be for some time yet. Work at the company's mines is being vigorously pushed, and the heavy shipments of ore continued.

G. T. P. WORK.

The first definite construction work for the Grand Trunk Pacific Railway company on the Pacific coast has commenced at Kaien island, where the British Columbia Pine Timber company is erecting a saw mill to cut 50,000,000 railroad ties, being the first order for the British Columbia section of the transcontinental line The machinery for the mill is now on the site and is being placed in position. The contract secured is sufficient for 200 miles of railroad and the ties are to be delivered at Port Rupert.

Job printing at the Times office.

Flowers at Mrs. Bernard's, phone A51

The Providence mine shipped seventy tons of ore this week.

John S. Chite, inspector of customs for British Columbia visited the local customs office this week.

VICTORIA DAY SPORTS

Midway Prepares for Big Celebration.

$1,500 IN PRIZES GIVEN

A Long List of Events—Special Trains Arranged from Southern and Eastern Points.

MIDWAY, B. C., April 26.—Victoria Day has come to be regarded by all the towns of the Boundary as Midway's for celebration purposes. Dominion Day and Labor Day and other holidays has tacitly come to be understood as sure to be celebrated by other towns, but to Midway the citizens of the citizens of the Boundary look for a good time on May 24th, and for years past, and often not under the happiest of auspices, Midway has made good. Midway has, in these events, demonstrated that a small number of enthusiastic people are better for a cause than a larger number of apathetic ones. And so a good list of sports has always been provided for the day, and good prizes have been provided by the generosity of a few people.

But Midway has grown since the last celebration, grown more than any town in the Boundary, and proposes to celebrate Victoria Day, 1906, accordingly. Larger prizes, a larger list of sports, and a better time is promised than ever before, The reliables of former times, reinforced by new blood, are going to do things as never before. Special trains will be run over the Canadian Pacific and the Great Northern, and Grand Forks, Phoenix, Greenwood, Eholt, Curlew, Repnblic and other towns will have facilities to spend the day at Midway on convenient terms. About $1,500 has already been subscribed for the events of the day, and the prizes that will be hung up ought to bring out lively competition whether in horse race, baseball or other sports.

Midway is without competition. The spring-time town of the Boundary. Already her beautiful hills and mountains are rejoioing in the richest of green, illuminated with every color of brilliant flowers. To those who love to ramble over the hills, or a quiet hour along the trout stream, Midway appeals forcibly. The good hotels of other years have been enlarged and increased this year and good accommodations and good sport are offered to the Victoria Day visitors. The committee in charge, and the people generally, tender the public an invitatioa to spend the day in this lovely spot. Mark your calendar now, and make your arrangements accordingly, and swell the throng to Midway on that day held by the nation as a memorial occasion to Victoria, the best queen of all peoples and of all times.

DANCING CLASS.

Professor Perry has decided to start a dancing class and will open his school in Eagles' hall next Tuesday evening, May 1st. Lessons will be given four nights each week on Tuesday, Thursday and Friday. On Friday nights, after the class exercises, at 9 o'clock, a social dance will be given, to which the public will be invited. Professor Perry is organizing separate classes for ladies and gentlemen, including from eight to ten lessons, and will cheerfully furnish all rates and particulars to any who may contemplate learning to trip the light fantastic toe.

M'RAE RECOVERING

Finley McRae who was injured in the Sunset Mine last Friday is under medical care at the hospital. Mr. McRae was in a serious condition when taken to the hospital but under the carefnl treatment he is receiving, is recovering as rapidly as can be expected and unless some unforseen complications set in he will be out within a reasonable time.

MINE FATALITY.

John Cascadden Meets Death in the Brooklyn.

Last Monday, about 1:30 a. m., an accident occurred in the Brooklyn mine, Phoenix, causing the death of John Cascadden, aged 30 years. The unfortunate man was engaged as a mucker and was working at the head of a chute in the north stope at the 150 foot level. No one was present when the accident occurred, but circumstances indicate that a rock slipped or fell from the foot wall, striking deceased on the head and instantly killing him, as life was extinct when found a few minutes later. An inquest was held Monday under the direction of Coroner A. S. Black of Greenwood, and the jury, after reviewing the workings and hearing the evidence, returned a verdict in accordance with the above facts.

The late Mr Cascadden was well and popularly known in Greenwood, having been a resident here for some years, at one time being proprietor of the National hotel. He had visited the city on Saturday last and had met many of his friends here. He was formerly employed at the Mother lode mine. He was a single man but is known to have relatives in the east, having received a letter from a sister in the east last Saturday.

MUSIC AND DRAMA.

Talented Company Delights Audience on Tuesday Night.

The entertainment given Tuesday night by the MacKenzie-Glover company was of a character that pleased all classes represented in the audience, from the small boy, who delights in the ridiculous, to the most serious lover of the dramatic. The entertainment was made especially pleasing by its wide variety of talent representing Scotch, Irish, English and German humor. The farce comedy acts of Mr. MacKenzie and Miss Glover were especially amusing, especially "The Happy Couple" scene, in which the many amusing situations were well brought out by the fine acting of the performers. Notwithstanding the fact that both Mr. MacKenzie and Miss Glover were suffering from severe colds, they charmed their audience with solos and duets.

The program opened with "Queen of the Earth," by Mr. MacKenzie, in which his powerful baritone voice produced a splendid effect. "The Laird o' Cockpen" took the house by storm, and "The Cameron Men" aroused the martial ardor of all present. In a duet, "The Lesson," he and Miss Glover were both heard to good advantage, the latter's clear, sweet voice being especially pleasing. "The Crookit Bawbee" was also well acted and sung.

The second part opened with several comic songs and sketches, mostly Scottish, and they all emphasized the artists' wide range of talents. By request, Miss Glover rendered the "Potion Scene" from "Romeo and Juliet," and in this her powers for dramatic production were exhibited with splendid effect. At all times her clear voice could be distinctly heard, and every word and syllable was enunciated perfectly. Her rendition showed a perfect understanding of the meaning of the lines and the movements and gestures portrayed and emphasized the tragedy of the scene.

The program closed with a Scottish scene, in which Miss Glover appeared as a "Bonny Fish Wife," and Mr. MacKenzie in kilts. The parts were well played and the interest of the audience was sustained to the last. A pleasing feature was the singing of "Caller Herrin," by Miss Glover, and the evening's entertainment was closed by both dancing the highland fling.

A most important part of the whole entertainment was the piano solos and accompaniments of Madam Rosseau, the talented pianist. She was much handicapped by the inferiority of the Auditorium instrument, but abilities were none the less evident, and her excellent playing went far to make the evening one of unqualified success.

CLAIMS BONDED.

The Mayfield, Starveout and Bounty to Be Worked

An important mining deal was put through this week when the Mayfield Fractional mineral claim, adjoining the Providence and the Freemont, was purchased by James M. Patton aud associates It is the intention of the new owners to call for tenders for the sinking of the 300 foot shaft to strike the Providence lead. The Mayfield is one of a group including the Texas, Sunset and others adjoining the Providence. The local syndicate are in negotiations with Chicago men for the formation of a company to work the properties.

The Starveout claim, owned by Messrs. Donagin, Nelson and Sidney Johnson, has been bonded by J. Mac Mullan of Ymir. Work has been proceeding for the past ten days and a ledge showing 22 inches at one end and 32 inches at the other has been opened. The Bounty fractional claim, owned by Messrs. Donagin and Johnson, has also been bonded, and work on this claim will soon start. These claims adjoin the Helen, and the bright prospects of this mine has encouraged the starting of work on the Starveout and Bounty.

SMELTER SMOKE.

In connection with the smelter smoke cases which have developed at several points in the west, the defendant smelter companies have, in one instance at least, particularly engaged in the most elaborate and delicate scientific investigations to determine the exact effect of smelter gasses upon animal and vegetable life. The results of these investigations while primarily for the purposes of the pending suits, will undoubtedly be of general benefit in connection with the very common disputes which grow out of the proximity of the smelters and manufacturing institutions to resident and farming districts. The general field of economic science will profit considerably by the investigations which have been made perforce for these cases. The fact that the defendant companies are large corporations with extensive interests alone justifies a large expenditure which is involved in the investigations, and there is also a possibility that allied corporations with similar problems impending are meeting some part of the expense of the investigations, the full results of which can only be known in the trial forthcoming, but an intimation as to the result has it that the investigations are generally favorable to the defendants in the smelter smoke damage cases,

H.B.K. BRAND

BIG SHIRT

Made big enough for a big man to work in with comfort. Has more material in it than any other brand of shirt in Canada. Made on the H.B.K. scale it requires 39½ to 42 yards per dozen, whereas common shirts have only 32 to 33 yards.

That's the reason why the H.B.K. "Big" Shirt never chafes the armpits, is never tight at the neck or wristbands, is always loose, full and comfortable and wears well.

Each shirt bears a tiny book that tells the whole history of the "Big" Shirt, and also contains a notarial declaration that the H.B.K. "Big" Shirt contains 39½ to 42 yards of material per dozen.

Sold at all dealers but only with this brand:—

WILL GO TO CHURCH

Oddfellows to Attend Divine Service Next Sunday.

The local lodge of Oddfellowship will attend divine service in the Presbyterian church next Sunday at 7:30 p. m. The members of the lodge will muster at the hall at 6:45 p. m., and after all arrangements have been completed, ahd with the band at their head they will proceed by way of Government street to McCreath's corner, then turning a right wheel, they will march along Copper street to Hunter-Kendrick's corner and then to the church. The center chairs of the church have been reserved for the members of the order and the choir is preparing special music for the benefit of the visitors. A large turnout is expected.

IMMIGRATION RETURNS

Last Year Make Another Record—Increase Almost 16,000.

The fiscal year that closed on June 30, 1905, the reports of which have recently been issued by the Dominion government, is in all respects far and away the most successful year that Canada has yet experienced, in so far as immigration is concerned.

The total number of arrivals in Canada was 146,266, the largest on record. The most satisfactory feature of this vast influx is the fact that 98,902 of these new settlers, or more than two-thirds of the total arrivals, came either from Great Britain or the United States.

This is an achievement on the part of those responsible for the Dominion's immigration policy for which every Canadian should feel grateful. In a young country like Canada, with its small population, its vast territory and its unlimited and undeveloped natural resources, it is of paramount importance, from a national standpoint, that the assimilation of the foreign elements should be as rapid as possible. But while almost 100,000 settlers, speaking the same language and having the same national ideals and aspirations that prevail throughout the Dominion, are added to Canada's population within the space of twelve months, there is not now—if indeed there ever was—the slightest danger that the national character will be impaired.

The arrivals from Britain during the past year amounted to 53,359—an increase of 14.985 over the preceding 12 months.

The American movement to Canada showed a slight falling off last year, though it is still very large, and the result of the immigration policy highly satisfactory.

The following statement shows the growth of the movement Canadawards since the fiscal years 1895-6:

	G.B. and Ireland.	Con. and Iceland.	United States.	Total.
1895-96	12,384	4,451	.....	16,835
1896-97	11,383	7,921	2,412	21,716
1897-98	11,173	11,608	9,119	31,900
1898-99	10,660	21,938	11,945	44,543
1899-00	5,141	10,211	8,543	23,895
1900-01	11,810	19,352	17,987	49,149
1901-02	17,259	23,732	26,388	67,379
1902-03	41,792	37,099	49,473	128,364
1903-04	50,374	34,785	45,171	130,330
1904-05	65,359	37,255	43,652	146,266
	247,335	208,325	212,590	668,277

Of the 1904-5 immigration, the following summary gives details as to port of entry:

Per ocean ports—Halifax, 20,023; St. John, 13,596; Quebec, 60,843; Montreal, 7,556; Vancouver, 661; Victoria, 14. Total, 102,723.

From United States (not including 109 United States citizens by ocean ports)—Montreal, 1,822; Winnipeg and outposts, 32,056; Lake St. John, 1,076; Rainy River, 381; Montreal Colonization society, 275; Temiskaming district, 152; customs entries, 7,781; total, 43,543, or a grand total of 146,266

The following statement gives the increase or decrease for the immigration of the fiscal year for the principal countries from which settlement originates:

Country.	1903-4	1904-5	Inc.	Dec.
English and Welsh	36,694	49,617	12,923	.....
Scotch	10,552	11,744	1,192	.....
Irish	3,128	3,998	870	.....
Total British	50,374	65,359	14,985	.....
United States	45,229	43,652	.....	1,577
Total Anglo-Saxon	95,603	109,011	14,985	1,577
Continental—				
Hebrew	3,727	7,715	3,988	.....
Galician	7,729	6,926	.....	803
German	2,966	2,704	.....	262
Italian	4,444	3,473	.....	972
Russian	1,955	1,916	.....	39
Swedish	2,151	1,847	.....	304
Finns	845	1,323	478	.....

MOUNTAIN WONDERS.

The Caves of Cougar and Cheops Are Wonders.

There are more crevices and caverns in the mountain ranges than we are aware of. Some, of course, have been brought to light, and a few interesting invasions have been undertaken. There is a Grotto cave, near the Crow's Nest lake visible from the railway, out of which gushes the streams which the C. P. R. has chronicled on a sign board, "The Main Source of the Old Man's River." This cave has been penetrated through a rock channel to the extent of 70 feet or more, and probably the fountain has its source in a lake half a mile up the heights. Many of the mountain lakes—several of those, for instance, around Mount Assiniboine—have no visible outlet, which must involve, in some cases at least, deep drippings through underground channels. One little lake in the Kootenay district drained itself suddenly away some summers ago. Nature is full of varieties and enigmas—there are some long drawn-out crevices around the limestone summit of the west peak of Turtle mountain (overhanging Frank), and on the northern shoulder of Macoun is a great vertical crack running sheer down to the glistening snowfield at its base, passable only by a jump on outstanding ledges. Then there are many yawning crevasses in the glaciers and neves (snowfields), into one of which fell a Mr. Thompson years ago on the slopes of Mount Gordon, resued bravely by Prof. Collie. The Illecillewaet glacier shows many grottos, fantastic ridges, roofs, splintered seraces and deep moulins (wells) and in the center of the Hermit neve is a vast sunken cavern. At the "snout" or foot of the glaciers, the ice is usually honeycombed with caves, the birthplace of the glacial streams which form the river systems of the continent. Dangerous enough are some of these ice caves to visit, unless you are in touch with nature and exercise caution. Apart from the glaciers, most interesting to me was a small cave on a rocky ledge on the south side of Mount Macdonald, which wild goats used for a shelter and stable in days of storm. Near Bear creek, in Roger's Pass, are some holes in the ground not far from the railway line. Mouths of round tunnels, driven into steep rock faces by miners, are visible near Field. Nature has also made similar shaped apertures—as in the mountain called Hole-in-the-Wall. The famous Crystal cave, near Field, gave up many firm-formed six-sided crystals to the early visitors. The warm water cave at Banff, before the tunnel was cut into it, used to send up steam and superstitious fear from its small geyser-like upraturе. Two railway climbers of 1886 have assured me of a large, deep cave not far from the ridge of Cathedral mountain, in which an hour or more was spent. But let us come now to the caves which surpass all others in the mountains, those on the line of Cougar creek. The wild stream has cut out for itself subterranean channels among the limestone strata in its swift descent along the narrow valley which forms the dividing line between Mount Cougar and Mount Cheops. The caves so far discovered and explored number nearly a dozen, making a splendid series. Some of them afford but a narrow entrance and a restricted passage way, ending in gravel or armholes, but many of them display large underground tunnels and chambers. Some photographs are appended to this account, for which I am endebted to Mr. Wheeler, with whom I made a visit to this region last June These caves were discovered by Charles Deutschmann, of German descent. This discoverer came from Minnesota; he is 30 years of age, is over six feet tall, and can carry on his back over 100 pounds weight up the steep slopes as easily as most men carry boots on their feet. In October, 1904, prospecting through the mountains, and with an eye to bear and wild game, he noted several crevices among the rocks in the ravines between Mts. Cheops and Cougar. Fancy a man going down these narrow dangerous apertures all by himself without a light, using ropes and long balsam poles, not knowing whether dangerous gasses might be coming up from the bowels of the earth, nor what sudden falls from the roof, or broken, overhanging ledges or bottomless abysses might present themselves. Honor this man for his bravery and enterprise!

What are these caves, and how are they formed? Cougar creek receives its birth from upper slopes of snow and ice areas, the cascades that join it rush down the sides of Mount Cheops and are named Whistler falls, Bear falls and Upper Goat falls. The creek and its tributary waters stream and sparkle down the slopes and rush through a narrow gorge and finally merge into the Illecillewaet river, but on the way, they encounter limestone rocks, and cut their way through and under them, disappearing suddenly and with much clamor, then stealing out quietly hundreds of feet distant; often from scattered separate passageways. According to the latest explorations made last fall by Mr. Wheeler, F. R. G. J., and by Mr. W. S. Ayres, M E., and by Deutschmann, the discoverer, the old worn underground channels are frequently in connection with one another. Some passages and corridors run off at angles, and others take a dive and go down some hundreds of feet above or below a series of tunnels which start from quite a different entrance way. But there are no fish, as in the Mammoth caves of Kentucky, in these glacial cascades, and some papers drew upon imagination when they reported evidence of Indian relics and bones. It would take gymnastic natives to get down to these chambers, swathed in dense darkness, and Indians are very superstitious about caves (as I learned when passing the Crow's Nest grotto with the son of Chief of the Kootenays in 1887.) But yet we saw something one day in one of these caves. On a bed of ice, near the opening, was stretched an interesting anatomy. (It was a grizzly bear, stored away for soup, billed by Deutschman the night before!) We went into the caves, the prospect of this banquet being freely promised us, traversing narrow, infirm ladders, leaping over pot holes filled with water, sailing over a little lake on a couple of small logs. We came in contact with columns of ice and gushing fountains, as well as crystallized lime lines and incipient stages of marble along with wide open chambers and reverbrating halls. Swift were the rushing of the waters in subterranean channels, and noble was the spectacle presented by dark green and blue strata of rock diversified often by flashes of white specks. These specks had been swept into crevices and cracks in the rock faces, and seem to have been crystalized through the action of ages from crude lime into hardened calcium carbonate and wonderful marble. We lighted magnesium wire and flashlight powders, and beheld in consequence radiant views of perspective, of light and shade, of colors and visions—but we overworked our opportunity, and were nearly choked with the stifling fumes. One could walk a long way under these natural bridges where pot holes and erosion markings are well worthy of study. Cave 1 is the Auditorium cave, consisting of narrow passages, ladders and floating bridges constructed far underground by the discoverer. Grottos, pot holes, a splended corridor, a study of the swish of the waters, then the large Auditorium chamber 100 feet by 60, 10 to 25 feet in height. A pillar of ice was there, which meant that a secret opening from the outside was not far distant, and one dark, rolling river we called the Styx. Caves 2 and 3 join one another and are called "The Main Cave," the entrance being from the gorge. The chambers and most striking features are named "The Ball Room," the "I it," or "Deep Cavern." In another cave we tied a rope around our waists and went down a deep circular abyss 60 or 70 feet—one of the most weird passageways imaginable.

Now for a brief summary of the caves of Cheops. Climbing up from Ross Creek Tank, after a mile and a half, you pass under a high bluff called Lookout Point; then a ravine, then an old channel way, then a deep gorge or canyon, which has to be negotiated by means of a rope fastened from a ledge. Then the Mill bridge, and the Flume and the Gopher bridge. These are names so selected because of the features of the remarkable run of waters, which at these upper districts swirl under long-extended slabs of limestone rock. Other caves are named "The Old Mill," "The Terror," "The Turbine," "The Dome," "The Art Gallery," "The Bridal Chamber," "The Ruined Aqueduct," "The White Grotto." Another cave has the name of "Avernus," another "The Well," or "Bottomless Abyss," but below it another passageway has been found, leading to a high vaulted chamber called "The Judgment Hall," with a pedestal set up, and on another pillar markings that suggest a cross. Some specimens of blue and grey marble and of stalcite and crystalized carbonate have been brought up out of these caverns. Most of the other caves are very limited, so far as exploration has yet penetrated. The walk through the caves is nearly two miles. Some of the sudden descents are 250 feet deep. Old channels, both of Cougar creek and the Cheops streams, can be traced for distances. Mr. Ayres estimates that it took 40,000 years to cut out these channels (by means of slow erosions in the rock beds and faces often following "faults" in the strata.) The district which includes these caves and streams should be made a park. Trails should be cut, accommodation provided, electric light furnished from the rushing cascades for the underground passages; woodwork put in to make travelling more easy, and Deutschmann made the caretaker or superintendent. —Rev. Dr. Herdman in Winnipeg Free Press.

THE "AUDITORIUM."

The character of a city's play-houses and the manner in which they are conducted always reflects something of the character and tastes of the citizens. An auditorium that is well kept, well furnished and comfortable will go far to attract the best patronage and encourage the best artists to visit the town and entertain its best people. On the other hand, an auditorium that is cold, poorly furnished with sickly footlights, a torn curtain, that squeeks, rattles, shakes and threatens to tumble down when being raised or lowered, disgusts the best part on an audience and takes the spirit out of the most optimistic players. Add to this an old, tuneless apology for a piano and you have a fair picture of Greenwood's "Auditorium." But this is not all.

There is little encouragement for any company of reputable artists to visit Greenwood and perform in the "Auditorium," when juveniles and hoodlums are allowed to take possession of the gallery and make "night hideous" with their peanuts, smoking, stamping of feet, shrill whistling and coarse remarks. Neither is there much enjoyment for the remainder of the audience whose pleasure is largely spoiled by the interruptions, noises and [illegible] ness of street arabs whose parents should know better than allow them to be out alone. During the time prior to the opening of the entertainment last Tuesday night the "Auditorium" was continually rent by the noises of the boisterous, impudent youngsters who occupied the rear gallery. If Greenwood is going to attract to its concert hall talent of recognized merit and insure an appreciative audience when they do come, steps will have to be taken to keep order both prior to and during the entertainment.

SUNDAY OBSERVANCE.

The Week, published in Victoria, is a paper which is known to usually take a moderate view of most public questions, and is also noted for its fearlessness in dealing with questions sometimes unpopular. It cannot be said to be a crank on moral questions, and neither is it an avowed enemy of things that are good. Its views, therefore, on the Sunday Observance bill, will be read with interest. It says:

"The opposition to the Sunday Observance bill in the Federal parliament is weakening, now that its provisions are becoming clearer, and misconceptions are being removed. The case for the advocates of the Sunday paper has been exploded on its being shown that in Canada there is no demand for it except among Americans, and that the general public would really prefer a Monday paper, of which they are now deprived, which could be prepared up to midnight on Saturday. As to the smelter objection, one of the most competent and successful managers in Kootenay has declared that he would welcome the proposed law, and could easily adapt his work to comply with its requirements. The whole question has settled down to one of Gold vs. Golden Rule."

A WISE STEP.

The decision of the Dominion government to prohibit the importation of that publication, "Appeal to Reason," published in Kansas City, went into effect this week. The government has denied it the privileges of the Canadian mails and a bundle sent by express to a party in Greenwood was held by the local customs authorities and they will probably be destroyed. It is understood that the government was finally led to this step by the publication of a questionable article written by Eugene V. Debs, the Chicago agitator. It is not likely, however, that the Canadian government would have been led to take this step through the publication of a single objectionable article, but it may be considered as having resulted from a desire to protect Canadian readers from that class of literature to which "Appeal to Reason" belongs. For years "Appeal to Reason" has been persistently sowing the seeds of dissention and discord among its readers and encouraging strife between labor and capital, and when it published the raving utterances of Eugene V. Debs it came perilously near fostering treason against the government under whose protection it is privileged to continue in business The Federal government is to be commended for the step it has taken in prohibiting its circulation in Canada.

K. OF P. SMOKER

Local Lodge Held Successful Entertainment.

The Knights of Pythias entertained their friends to a smoker on Wednesday night and a good crowd was present to enjoy the hospitality of the order. In addition to supplying a liberal quantity of the weed, a good program was put on and those who took part were seen through the blue vapor dimly.

Mr. Thomas, the genial druggist, was master of ceremonies, and his principal contribution to the events of the evening was a smiling countenance and a pleasing speech. Alex Robinson rendered a tenor solo as he alone can do, and T. Hopkins of Midway, sang a song with banjo accompaniment that was the success of the evening. W. M. Law, also of Midway, contributed a solo which was much appreciated. Others who contributed vocal selections were F. Steele, Al. Morrisoa, J. Whilmhurst and Al. Inglis. A recitation was rendered by H. Sherwood of Midway, and another true knight, James Kerr, also favored the audience with a reading. Refreshments were served by Caterer Howard Moore, and his abilities in this line were well proven and much appreciated. The smoker was given as an entertainment for strangers in the city without homes, and it was highly successful.

TOWN TOPICS

Dr. Mathison, Dentist.

R. McGibbon of Rossland was a visitor to the city this week.

Dr. G. A. B. Hall of Nelson spent a few days in the city this week.

A. S. Sutherland provincial boiler inspector spent a week here on professional business.

H. E. MacDonald of Nelson C. P. R. district traffic manager was a visitor in the city this week.

Judge W. H. P. Clement of Grand Forks is in Greenwood holding the sessions of the county court.

W. B. Ferrie representing the Canada Life Insurance company spent a few days in the city this week.

C. E. Johnson of St George, N. B. has arrived in town and will take charge of the business of P. W. George & Co.

Trueman the photographer will remain until Monday April 30th. Have your sitting now while you have the chance. 34

W. J. Twiss of the Mutual Life arrived in the city Thursday and is spending a few days here in the interests of his company.

The ladies of the Methodist church will hold a social at the home of Mrs. P. McDonald, Long Lake street, on Friday evening, May 4th.

On Sunday evening Mr. Hastings will take for his subject in the Methodist church, "The Sabbath Was Made for Man, and So Was Strychnine."

J. Leggatt, C. C. Melville, C. Haine and T. E. Garrett of Midway are visitors in the city. Mr. Leggatt is attending the sessions of the county court.

The Thomas Drug Co., Limited, the enterprising druggists, have gotten out a neat card giving the time of arrival and departure of Greenwood's numerous stage lines.

A change has been made in the new homestead regulations which makes it necessary for applicants to appear personally at the local land office where the land is situated.

W. D. Lawson of Phoenix, has received word that his sister, Mrs. Manning, and her four-year-old child, was killed in the earthquake at Santa Rosa last week. Mr. Lawson left early in the week for California to look after his relatives remains.

City Solicitor J. P. Myers Gray, has removed to Fernie, B. C., where he has entered into partnership with L. P. Eckstein, one of the leading barristers of that town. Mr Gray will be much missed, especially in municipal circles, having been legal advisor to the city council for the past six years

The annual election of officers for the Epworth League of the Methodist church was held Tuesday evening. Officers elected are: President, Edgar Dynes; First Vice President, Christian Endeavor, Mrs. H. Hastings; Second Vice President, Missionary, Miss Stephenson; Third Vice President, Literary, Miss M. Green; Fourth Vice President, Social, Miss B. Dynes; Secretary, T. Webb; Treasurer, Mr. Hickson. The League meets every Tuesday evening at 8 o'clock, and a cordial welcome is extended to visitors.

Dr. Simmons, Dentist; Open evenings.

Blaine Bros. gives you a new suit for $3 by cleaning your old one. 34

J. A. MacDonald, K. C., leader of the British Columbia Liberals, is in Greenwood attending court.

Nice Variety of ladie's and misse's summer shoes at Galloway Bros. 34

Harold Verge, an employe at the smelter, met with a painful accident Wednesday by a heavy stone rolling onto his foot, badly crushing one of his toes.

W. A. MacDonald, K. C., of Nelson, is in Greenwood attending the sessions of the county court. He is accompanied with Mr. MacDonald who has just returned from a pleasant trip to Toronto and other points east.

TENNIS DANCE.

The Tennis club held their dance in Miller's Hall Wednesday night and a most pleasant time was enjoyed by all present. The program of dances was long enough to satisfy the demands of the most enthusiastic pleasure seeker and varied enough to suit all tastes. The music was provided by Mrs. Sidney Oliver and Mr. Jellum of Jellum's orchestra. About midnight refreshments were served, and at a seasonable hour the merry makers left the hall well satisfied with the night's enjoyment.

PHOENIX NOTES

Preparations Under Way for Dominion Day Celebration.

PHOENIX, B. C., April 26.—An enthusiastic mass meeting of citizens and business men was held last night to consider the holding of a Dominion Day celebration in Phoenix this year. There was a representative attendance, and the matter was thoroughly discussed, an organization for the purpose effected, and the decision arrived at to proceed with the necessary preliminary steps for holding the greatest celebration ever given in the Boundary. Following are the officers chosen to have charge of the celebration: Chairman, E. P. Shea; vice-chairman, David Oxley; secretary, Gilbert McEachran; treasurer, A. B. Hood. Besides these an executive committee was elected including His Worship, Mayor G. W. Rumberger, Charles D. Hunter, John A. Morrin, W. S. Macy, M. H. Kane, John A. McMaster, R. V. Chisholm and Chas. A. McClung.

It is the intention of the committee to raise a fund of at least $2,000 for the long list of prizes for sports, races, etc., which will be held at that time.

A GOOD ENTERTAINMENT

Scotch Artists in Concert, Comedy and Drama.

It must be trying indeed for a company of high class artists, who have played before splendid audiences in large cities, and who have received ovations worthy of their abilities, times without number, to appear before so small a crowd as were present at the Auditorium Thursday night. Anyone who has ever stood on a platform and entertained, knows how eminently desirable it is to have a large and appreciative audience. It is only when the crowd is large and the feeling responsive that any artist can do his best, and the success with which the MacKenzie-Glover Co. played last night to empty benches and a few appreciative people is a strong testimony of their abilities as entertainers. It was at the request of representative Scotchmen that the company remained to play the second night, but though the entertainment was arranged to please lovers of Scottish song, those who would have appreciated it most were conspicuous by their absence.

Mr. MacKenzie's songs, "Cam Ye by Athol," "Hame Cam' Our Guid Man at E'en" and "Robin Tamson's Smiddy," would have aroused enthusiasm and provoked laughter in a Chinaman, and what the audience lacked in numbers it made up in warmth of appreciation. In that respect it was much better than the audience of Tuesday night.

Miss Glover delighted the audience with her recitation describing a horse race. So vividly was the scene depicted that the event seemed almost real. "The Smack in School" was a humorous selection that caught the fancy of both young and old. The one act play "The Snow Storm," was a pathetic thing describing the reunion of father and daughter after twenty years of separation. The father's part was played by Richard Ravensburg, and while he played it in an acceptable manner, his acting lacked the more delicate touches of feeling necessary to emphasize the most pathetic parts. The evening's entertainment closed with the "Bonny Fish wife" and double highland fling, and so enthusiastic grew the audience that Mr. MacKenzie and Miss Glover were allowed to retire only after they had repeatedly acknowledged the compliments showered upon them.

Madame Rosseau, in her piano solos and accompaniments, contributed largely to the success of the evening's entertainment and she will be long remembered by the music lovers who heard her.

From a financial standpoint the visit of the MacKenzie-Glover company was a failure, but they have made friends who will long remember them and look forward to hearing them again, some place.

MR. WILSON'S TRAVELS

Blake Wilson, of P. Burns & Co., arrived here from Nelson last evening, and leaves for Spokane and other points in Washington this forenoon. The firm is furnishing meat to the construction forces on three railroads, the Corbin road from East Kootenay to Spokane, a road from Culdesac to Grangeville, and the third from Kennewick to Vancouver. Mr. Wilson intends to make an inspection along all of the lines to ascertain how the several agencies of the firm of P. Burns & Co., are pospering.—Rossland Miner.

COUNTY COURT.

Lengthy Docket of Cases Comes Up for Decision.

County court opened in Greenwood Thursday morning, with Judge Clements presiding. One of the first cases on the docket was the Naden-Fisher case, involving money advanced by the Bealey Investment company on a mineral claim. The evidence was all taken but the judge reserved his decision. The Providence mine cases were taken up and are still proceeding.

The docket is a lengthy one, and includes both criminal and civil cases. The following is the list made up to Friday morning: Criminal—King vs. George Andrews, obtaining money under false pretenses; King vs. Olaf Lofstad, shooting. Civil—Worden vs. Worden, claimed to be declared as a trustee and for an injunction; Diamon vs. Chappelle, for a declaration that Contention Fractional mineral claim, as far as it interferes with the Diamond Fractional mineral claim, is invalid, and for damages; Eastern Townships bank and W. H. Covert vs. Vaughan, McInnis and the British Columbia Trust Co., for a declaration as to water record. The sittings of the Court will probably last several days.

Corporation of The City of Greenwood

BY-LAW NO. 113.

A BY-LAW to authorize and ratify the execution by the Mayor and the City Clerk of a certain agreement made between the Corporation of the City of Greenwood and the Greenwood Electric Company, Limited.

The Municipal Council of the City of Greenwood enacts as follows:

1. That the Mayor and Clerk of the City of Greenwood be and they are hereby authorized on behalf of the Corporation of the City of Greenwood, to execute a certain agreement between the Corporation of the City of Greenwood, as party of the First Part, and the Greenwood Electric Company, Limited, as party of the Second Part, to be dated the day of the final passage of this By-law, which said agreement is marked "A" on the first page thereof, a true copy of the said agreement being published herewith, and to attach the Seal of the said Corporation to the said agreement.

2. This By-law shall before coming into effect, receive the assent of the Electors as provided by the Municipal Clauses Act.

Read first and second times April 9th, 1906.
Read third time April 17th, 1906.
Received the assent of the electors.
Reconsidered and finally passed.

..... Mayor.

..... City Clerk.

AGREEMENT "A."

THIS INDENTURE, Made the.. . . ..day of ....in the year of our Lord. one thousand nine hundred and six.

BETWEEN

The CORPORATION OF THE CITY OF GREENWOOD (hereinafter called for itself, its successors and assigns, called the City),
Of the First Part

AND

THE GREENWOOD ELECTRIC COMPANY, LIMITED, a body corporate under the laws of the Province of British Columbia, having its head office at the City of Greenwood, (hereinafter for itself, its successors and assigns, called the Company)
Of the Second Part.

WHEREAS, The Company propose to expend a large sum of money in developing and utilizing the power obtainable from Boundary Falls, in the District of Yale, for the purpose of supplying electric current to the inhabitants of the City of Greenwood.

AND, WHEREAS, The city has agreed to grant to the said Company the rights, privileges and franchises hereinafter set forth:

NOW THIS INDENTURE WITNESSETH, That for and in consideration of the premises, and for the sum of one dollar now paid by the Company to the city (the receipt whereof is hereby acknowledged), and in further consideration of the Covenants hereinafter contained, the parties hereto agree as follows, that is to say:

1. THE COMPANY will, within eight (8) months from and after the passing and authentication of a by-law confirming the execution of this agreement by the proper officers of the City, instal, equip and put in operation a power plant for the production and development of electricity from the water power to be obtained from Boundary Falls, in the District of Yale, and will, within the period aforesaid, connect the power plant with the Company's system now operated within the bounds of the municipality of Greenwood, and will supply electric light to any person or persons requiring the same at the following maximum rates:

For incandescent lamps of sixteen candle power, One Dollar and thirty-five cents ($1.35) per light per month for all night lights.

One dollar and ten cents ($1.10) per light per month for shops, business houses and offices, where light is used not later than eleven o'clock p. m.

Ninety cents per light per month ($0.90) for public dining rooms, when light is used not later than nine o'clock p.m.

Fifty cents (.50) per light per month for private houses and bedrooms.

For street arc lights of nominal two thousand candle power, ten dollars per light per month; said street arc lights to be kept lighted from dusk to dawn, and all arc lamps required by the City to be supplied and owned by the Company.

For thirty-two candle power incandescent street lights, one dollar and ninety cents ($1.90) per light per month, the light fixtures and renewal lamps to be supplied by the Company at its expense.

2. And for the consideration aforesaid and mentioned in the last preceding clause the city DOTH GRANT to the said Company for the period of twenty years from the date hereof the right, privileges, and franchise under the supervision of the City Engineer, for time being, erect poles and lay overhead or underground wires on, along, or under any of the streets roadways, lanes, passages and other highways and places of the said City of Greenwood, for the generation, supply, transmission, use or sale of electricity for light, power, or other kindred purposes, and for the purposes or erection, laying, construction, alteration or repair of such poles and wires, to enter upon any such streets, roadways, lanes, passages, and other highways and places, and to make such excavations and do such other acts and things as may be necessary.

3. And the Company further covenants and agrees that in exercising the foregoing privileges it will, so far as may be practicable, confine the erection of poles on one side of the street only.

The poles shall not be less than twenty-five feet (25) in length and six inches in diameter at the top, and shall be set firmly in the ground, and the said company will at all times during the erection of any poles, the stringing of any wires, and the construction of any buildings or works, and during repairs and alterations of the same, take proper care and precaution for the safety of foot and other passengers, and horses and carriages, passing along the streets or any of them on which erection, laying, construction, alteration or repairs is being performed, and will not interfere with or impede the public right of traveling on or using the same or in any way obstruct the entrance to any door or gateway, or the free access to any building. That after the erection, laying, construction, alteration or repair the Company shall and will repair and mend the said streets and leave them in their former condition in so far as the same is compatible with such erection, laying, construction, alteration or repair subject to the approval of the City Engineer for the time being.

4. The Company agrees to indemnify and save harmless the City from all actions, claims, demands and costs which may at any time during the continuance of the franchise hereby granted be made against the said City by reason of the Company erecting poles or laying underground or stringing wires along, under or over any of the streets, lanes, passages or highways of the City, or by reason of the operation of the Company's plant, and from and against all actions, proceedings or suits at law and costs thereof that may be brought against the said city by any person or persons by reason of the said Company so breaking up any streets, lanes, passages or highways and erecting poles and laying wires.

5. Whenever in case of fire it becomes necessary for its extinction or the preservation of property that the poles or wires should be cut, the cutting under such circumstances of the poles or any wires of the Company under the direction of the chief officer in charge of the Fire Brigade shall not entitle the Company to claim or demand any compensation for any damages thereby incurred.

6. At any time after the expiration of five years (5) from the date hereof the City may, after giving six months notice in writing to the company, purchase the whole of the water power, electric plant, apparatus, machinery, business undertaking, assets, effects and things belonging to the said Company and all real and personal property belonging to or used in connection with the business of the Company, and in such case shall pay therefor the value thereof to be determined by arbitration under the provisions of the "Arbitration Act," and amending Acts.

7. If the Company shall fail to carry out the covenant contained in paragraph 1 of these presents to supply electricity developed from Boundary Falls within eight months from the date of the final passage and authentication of the by-law authorizing the execution of these presents by the City, then the rights, benefits, privileges, and franchise conferred upon the Company by these presents, and all the covenants hereinbefore contained, shall, at the option of the Municipal Council of the City lapse and become void and of no further effect.

PROVIDED, HOWEVER, That failure to carry out the said covenant where caused by the Act of God, strikes, flood, fire, delay in supply of machinery or other causes not attributable to the default or neglect of the Company shall not cause a forfeiture of the said rights, privileges and franchise conferred hereby.

PROVIDED FURTHER, That if at the expiration of the said period the said works shall be in process of construction, and the sum of Fifteen thousand dollars shall have been expended thereof, the City shall grant such further time for the completion of the said works as to the Municipal Council shall deem just.

8. IT IS further agreed that if the Company shall, during the continuance of the franchise created hereby, dispose of its undertakings and assets by amalgamation with or sale to another Company, such amalgamation or sale shall be subject to the right of the City to purchase as contained and set forth in paragraph 6 hereof.

9. IT IS FURTHER AGREED, That upon the Company being entitled to the enjoyment of the rights, privileges and franchise hereby created by reason of the construction and operation of the said plant and supply of electricity to the inhabitants of Greenwood, then the agreement heretofore made under the authority of By-Law numbered 35, of the City of Greenwood shall be rescinded.

PROVIDED, HOWEVER, And it is hereby declared that in the event of a forfeiture of the rights, privileges and franchises conferred by this agreement by reason of the non-performance by the Company of any of the covenants therein contained to be performed by the Company, then and in such event any rights, privileges, and franchise contained in the said agreement executed under the authority of said By-Law Numbered thirty-five, shall exist unimpaired and remain in full force and effect, until the completion of the term limited in the said agreement vested in the Company, but it is further understood that no rates shall be charged or imposed by the Company in excess of the rates limited by this agreement.

IN WITNESS WHEREOF, The said City has caused the Corporate seal thereof to be hereto affixed and the signatures of the Mayor and the City Clerk thereof to be hereunder written and the Company has caused the Corporate Seal thereof to be hereto affixed.

SIGNED, SEALED AND DELIVERED)

TAKE NOTICE that the above is a true copy of the proposed by-law upon which the vote of the Municipality will be taken at the City Hall on Wednesday, the second day of May, 1906, between the hours of 8 a. m. and 4 p. m.

G. B. TAYLOR,
Clerk of the Municipal Council.

Dated May 17, 1906.

Corporation of The City of Greenwood

BY-LAW NO. 114.

A By-Law to Raise by way of Debentures the sum of $10,000.00 for the purpose of extending the Waterworks System of the City of Greenwood.

WHEREAS it is necessary and expedient to extend the Waterworks system of the City of Greenwood and for that purpose to borrow by way of debentures the sum of $10,000.00.

AND WHEREAS a petition signed by the owners of at least one tenth of the value of real property in the City of Greenwood, as shown by the last revised assessment roll, has been presented to the Municipal Council requesting them to introduce said by-law;

AND WHEREAS for the payment of said debentures, sinking fund and interest it will be necessary to raise the sum of $975.00, by special rate in each and every year;

AND WHEREAS the whole rateable lands and improvements or real property of the said Municipality according to the last revised assessment roll is $1,054,540.00;

AND WHEREAS the existing debenture debt of the Municipality amounts to $00,000.00 and no principal or interest is in araears.

THEREFORE the Municipal Council of the City of Greenwood enacts as follows:

1. It shall be lawful for the Corporation of the City of Greenwood to raise by way of loan from any person or persons, body or bodies, Corporation or Corporations, who may be willing to advance the same on the credit of the debentures hereinafter mentioned the sum of $10,000.00 and cause the same to be paid in o the hands of the City Treasurer of the said City of Greenwood, for the purposes aforesaid, and with the object hereinbefore recited.

2. It shall be lawful for the Mayor to cause any number of debentures be made, not exceeding in the whole the sum of $10,000.00, in sums of not less than $100.00 each as may be required and all such debentures shall be sealed with the seal of the Corporation of the City of Greenwood, signed by the Mayor, and countersigned by the Treasurer of the said City.

3. The said debentures shall be payable in twenty years from the day herein mentioned for this by-law to take effect at such bank in the City of Greenwood as the Council may by resolution direct.

4. The said debentures shall have coupons attached for the payment of interest at the rate of six (6) per centum per annum on the amount of said debentures and shall be made payable yearly on the 3rd day of May in each and every year.

5. A special rate on the dollar shall be levied and raised in each and every year, in addition to all other rates, on all the rateable property of the City, sufficient to pay interest, and create a sinking fund for the payment of the debt hereby created at and when the same shall become due.

6. The sum of $600.00 shall be raised annually for the payment of interest on the amount of the debt incurred during the currency of the debentures hereby authorized ta be issued.

7. The sum of $375.00 shall be raised annually for the payment of the debt hereby incurred, by way of sinking fund.

8. It shall be lawful for the Corporation from time to time to purchase any of the said debentures at such prices as may be mutually agreed upon, and all debentures so purchased shall be cancelled, and no reissue of any debentures or debenture shall be made in consequence of any such purchase.

9. This By-law shall before the final passing thereof receive the assent of the electors of the Corporation in manner prescribed by the Municipal Clauses Act and Amending Acts.

10. This By-law may be cited as the "Waterworks Loan By-law, 1906.

11. This By-law shall take effect and come into force on the 3rd day of May, A. D., 1906.

TAKE NOTICE that the above is a true copy of the proposed By-law upon which the vote of the Municipality will be taken at the City Hall on Wednesday the 2nd day of May, 1906, between the hours of 8 a. m. and 4 p. m.

G. B. TAYLOR,
Clerk of the Municipal Council.

Dated May 17th, 1906. 32—33

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3 If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

W. W CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for. 32-59

WARNING. GLANDERS.

IN districts where the existence of Glanders is suspected and especially in neighbourhoods where actual outbreaks have occurred the adoption of the following precautions by owners of horses and others interested will do much to prevent the spread of the disease and the establishment of fresh centres of infection.

1. Horses or mules having a nasal discharge or other suspicions symptoms should not be admitted to livery or feed stables or yards, blacksmith shops, church or school sheds, railway stock yards, private stables or other places where they are likely to come into direct or INDIRECT contact with animals of the equine species.

2. All stables, yards or sheds used for the accommodation of horses or mules should be regularly and frequently cleansed and disinfected in the manner described below.

3. After cleansing the premises thoroughly, and burning all debris, the interior should be well gone over with hot steam, or boiling water, adding to the latter at least one quart of crude carbolic acid to each five gallons after which the entire surface should be thickly coated with a thick solution of fresh lime wash, to which crude carbolic acid has been added in the above mentioned proportion.

Outbuildings, fences and tying posts with which infected animals have been in contact should also, when possible, be thoroughly treated in a similar manner.

All ordinary harness and stable utensils, which have been in contact with infected animals or infected premises, should be thoroughly soaked in a hot solution of crude carbolic acid of a strength of one part to twenty.

Materials which might be injured by the above treatment such as valuable harness, robes, cushions, etc., which have been in contact with infection should be placed in an air tight room and fumigated with Formaldehyde, after which they should be thoroughly cleaned.

4. In stables where outbreaks have occurred or where diseased animals have, inadvertently or otherwise, been stabled, even temporarily, the cleansing and disinfection should be especially thorough and in such cases it is safest to remove and burn feed boxes and mangers when of wood; iron articles can be rendered harmless by passing them through fire or by immersing them for some time in boiling water. All litter from suspected animals should be burned or carefully fenced until used.

5. Farmers and others should, whenever possible, avoid admitting strange horses or mules to the premises occupied by their own animals especially of the same species. It is a good plan to reserve an isolated building for outside horses or mules, but where this is impossible they may be accommodated in cow stables, cattle not being subject to glanders infection. Such horses and mules should be watered from special pails, which, together with all other stable utensils used on or about them, should be carefully cleansed and disinfected before being used for other animals. Stalls occupied by strange horses or mules should be well cleansed and disinfected and, if at all possible, left unoccupied for some time.

6. When new horses or mules are purchased in or from districts where glanders exists, they should, unless carefully tested with Mallein prior to purchase, be stabled apart and closely watched for some time before being brought in contact with other animals of the equine species.

7. It must be borne in mind that while nasal discharge, or ulceration, enlarged glands, the presence of farcy buds, unaccountable swelling of the limbs and general unthriftiness often characterize cases of Glanders, the disease exists in many animals without, for the time being, any external manifestation whatever, the only means of detection in such cases being the Mallein test, and that these occult or latent cases are in some respects the most dangerous because unsuspected. Our experience shows that it is possible for animals of this class to convey infection to others without themselves developing acute symptoms. It is therefore plain that great caution should be exercised in the purchase or banding of strange horses or mules especially in those districts where the disease has become established.

8. The carcases of animals dying from or slaughtered as being affected with Glanders should, when possible, be burned or, failing this, buried at least six feet beneath the surface.

9. Owners of premises where outbreaks have been dealt with should bear in mind that Inspectors cannot recommend release from quarantine unless disinfection has been carried out in a satisfactory manner and that compensation for animals slaughtered cannot be paid until a certificate of cleansing and disinfection has been received by the Minister of Agriculture.

10. Horse owners should have no hesitation in reporting to this Department or to its Inspectors the existence of actual or suspected cases of Glanders. The disease has been spreading rapidly of late years and it is a matter of public interest that every fresh centre of infection should be discovered and dealt with as promptly as possible.

J. G. RUTHERFORD,
Veterinary Director General.

Department of Agriculture,
Ottawa, March' 1905. —32

Everyone is interestedly watching developments in the tomato situation.

The spot stock of canned salmon is smaller than perhaps a dozen years.

Cables reported that the almond crops of France and Spain were damaged by frost.

Make use of some of your soaps, polishes and cleaning preparations about your own store.

A clerk that is caught shirking work should be discharged on the spot, Let someone else reform him.

Do not set your vegetables out on the sidewalk where they will tempt every dog that comes along.

Learn to take an interest in the people who buy their groceries from you. Study their likes and dislikes and try to give them just what they want every time. It will be appreciated and will bring direct money returns.

A successful clerk is one who waits on a customer as though it is a pleasure and not an unpleasant duty. He shows customers all the brands of articles called for, thereby impressing on them the large stock carried in the store, affording opportunity to suit all tastes.

Chamberlain's Salve

This salve is intended especially for sore nipples, burns, frost bits, chapped hands, itching piles, chronic sore eyes, granulated eye lids, old chronic sores and for diseases of the skin, such as tetter, salt rheum, ring worms, scald head, herpess, barbers' itch, scabies or itch and eczema. It has met with unparallelled success in the treatment of these diseases. Price 25 cents per box. Try it. For sale by All Druggists.

"Some weeks ago during the severe winter weather both my wife and my self contracted severe colds which speedily developed into the worst kind of la grippe with all its miserable symptions," says Mr. J. S. Egleston of Maple Landing, Iowa. "Knees and joints iching, muscles sore, head stoped up, eyes and nose running, with alternate spells of chills and fever. We began using Chamberlain's Cough Remedy, aiding the same with a double dose of Camberlain's Stomach and Liver Tablets, and by its liberal use soon completely knocked out the grip." Sold by All Druggists.

THE DIAMOND DILL.

The diamond drill consists of a crown or cylinder of steel around one edge of which are fixed a series of carbons or black diamonds. These carbons are set so that they project alternately a little beyond the outside and inside edge of the cylinder. This crown is screwed to lengths of iron tubing as it cuts its way by rotation into the rock and it makes, as it descends, an annular cutting somewhat larger than the thickness of the continuous tube, which the crown and its shaft form. Thus a core of rock is cut and held within the tube and the pieces may be lifted out as work proceeds. The powdered rock resulting from the abrasion of the carbons is continuously washed away by a current of water forced down within the tubing. Diamond drills are made in sizes from 1¼ up to 18 inches in diameter. In boring very deep holes thousands of dollars worth of carbons will be consumed. The market prices of carbons is now $75 per carat.

EARN CASH

In Your Leisure Time

If you could start at once in a business which would add a good round sum to your present earnings—WITHOUT INVESTING A DOLLAR—wouldn't you do it?

Well, we are willing to start you in a profitable business and we don't ask you to put up any kind of a dollar.

Our proposition is this: We will ship you the Chatham Incubator and Brooder, freight prepaid, and

You Pay No Cash Until After 1906 Harvest.

Poultry raising pays.

People who tell you that there is no money in raising chicks may have tried to make money in the business by using setting hens as hatchers, and they might as well have tried to locate a gold mine in the cabbage patch. The business of a hen is—to lay eggs. As a hatcher and brooder she is outclassed. That's the business of the Chatham Incubator and Brooder, and they do it perfectly and successfully.

The poultry business, properly conducted, pays far better than any other business for the amount of time and money invested.

Thousands of poultry-raisers—men and women all over Canada and the United States—have proved to their satisfaction that it is profitable to raise chicks with the

No. 1— 60 Eggs
No. 2—120 Eggs
No. 3—240 Eggs

CHATHAM INCUBATOR AND BROODER.

"Yours is the first incubator I have used, and I wish to state I had 52 chicks out of 52 eggs. This was my first lot; truly a 100 per cent. hatch. I am well pleased with my incubator and brooder. THOS. MCNAUGHTON, Chilliwack, B.C."

"My first hatch came off. I got 170 fine chicks from 190 eggs. Who can beat that for the first trial, and so early in the spring. I am well pleased with incubator, and if I could not get another money could not buy it from me. Every farmer should have a No. 3 Chatham Incubator.—F. W. RAMSAY, Dunnville, Ont."

"The incubator you furnished me works exceedingly well. It is easily operated, and only needs about 10 minutes attention every day. R. MCGUFFIE, MOOSE JAW, Assa."

The Chatham Incubator and Brooder is honestly constructed. There is no humbug about it. Every inch of material is thoroughly tested, the machine is built on right principles, the insulation is perfect, thermometer reliable, and the workmanship the best.

The Chatham Incubator and Brooder is simple as well as scientific in construction—a woman or girl can operate the machine in their leisure moments.

You pay us no cash until after 1906 harvest.

Send us your name and address on a post card to-day.

We can supply you quickly from our distributing warehouses at Calgary, Brandon, Regina, Winnipeg, New Westminster, St. Montreal, Halifax, Chatham. Address all correspondence to Chatham 314

Business successful; position permanent. No investment required. Previous experience not essential to engaging. Address General manager, 134 Lake Street, Chicago, Ill., U. S. A. 29-38

Progress and Development

Progress and development are terms closely identified with life in the West. In a new country people are working daily for the upbuilding of town, city and district, and for the improvement of the conditions under which men and women are called upon to live. Every act of daily life that tends to bettering one's surroundings makes directly or indirectly for the improvement of society generally. In all this the local newspaper plays an important part. Among its local readers it stimulates an increasing interest in their home city, keeping them posted on all local happenings, and becomes a welcome weekly messenger, bearing bright and welcome tidings. Among its outside readers it forms a valuable advertising medium making known the merits, advantages and prospects of the city and attracting thither citizens who want employment, business firms looking for locations, and capitalists seeking investments. In the upbuilding of a town, city or district the local paper is an important factor.

BOUNDARY CREEK TIMES

The Boundary Creek Times aims to do its full and complete share in the upbuilding and improvement of Greenwood and the Boundary district. It is not handicapped in its work by any restraining obligations to any party, clique or corporation, but it is free at all times to rise up and promote the best interests of the City of Greenwood and its people. To do this most thoroughly and satisfactorily the Times must have the support and cooperation of the citizens of Greenwood.

Every effort is being put forth to make the Times the class of newspaper the people want. Increasing attention is being continually paid to mining news, especially of that nature that will interest those employed in the work as well as those whose capital is invested in the properties. With this end in view we aim to have

A Subscriber in Every Home

As a result of the efforts that have already been put forth, we believe that an increas- interest is already being taken in its news columns. We have evidences of this from the fact that the subscripiion list is already growing; the street sales are increasing weekly and the news dealers find more demand for each succeeding issue. This is a satisfactory condition of affairs that acts in two ways. It increases the revenue of the circulation department and it makes the paper a first-class advertising medium for local business men.

In handling local advertising every effort if put forth to protect the Greenwood merchant. The local page is reserved for them and foreign advertising has been repeatedly refused because the advertising manager refused to disturb the positions held by local advertisers.

Business men of Greenwood, we are here to protect and advertise you. We are protecting you! Do you advertise? Read The Times, subscription $2.00 per year.
