Dry Goods. Millinery

"By their works shall ye know them"

On the merit of their performances alone are we willing to have them judged. Simplicity of construction, combined with a skill in manufacture, which is the inheritance of generations, make

REGINA WATCHES

good time keepers and consequently comfortable watches to carry.

Their efficiency is assured by a guarantee which enables the owner to have any constructional defect remedied free of charge by the nearest agent in any part of the world. They are not made in grades which cannot be fully guaranteed.

A. Logan & Co.

THE TUNNEL SCHEME TAKES SHAPE

Scheme Arouses Interest in Mexico--Also in Grand Forks--An Announcement in Circulation--Facts of the Newhouse Tunnel

The fame of the tunnel proposal is spreading to the uttermost parts of the earth. From where the sun blazes its way into the heart of the earth in Medieval Mexico to places in the north of this illimitable Dominion, where the iciness of the atmosphere makes it almost impossible for a sunbeam to penetrate, the mails are bringing inquiries to the Honorable, the Mayor of the city, asking for information. This is not exaggeration. Why, even Grand Forks, which never before saw any good thing come out of Greenwood is devoting most of the news space of its larger paper to the tunnel scheme. Introducing the subject the Gazette says:

"Not since the year 1901, when Jay P. Graves, of Spokane, brought about the amalgamation of many of the low grade copper properties in the Phoenix camp and procured capital sufficient for their successful development, has an enterprise of such great importance to the Boundary district been projected as that of driving a deep tunnel to tap the high grade ore bodies of the Greenwood camp."

Speaking editorially it continues:

"By the formation of the Greenwood tunnel company the Boundary district will receive an impetus which it has not felt since the advent of the Granby and the C.P.R. into the district. Not only will Greenwood be benefited by the company's operations, but all sections of the Boundary, where high grade ore bodies exist, will be affected to a greater or lesser degree. Grand Forks has many high grade properties in its vicinity, both on Hardy mountain and up the North Fork of the Kettle River, and now that a company has been formed to operate by deep tunnel at Greenwood, no doubt the mine owners in this neighborhood will adopt the same method of developing their properties. The Greenwood tunnel, then, is not of local interest only, for it affects the whole Boundary country and to some extent all mining sections in British Columbia."

Some copies of the announcement of the company are in circulation. The company is to be named the Greenwood-Phoenix Tunnel Co., Ltd., and its promotion is in the hands of the Fiduciary Company, Chicago.

The tunnel will be driven from the base of the Strathmore mountain and its outlet will be on the Nelson mineral claim, owned by the Strathmore and Helen Mining Co. In the first three thousand feet, it will cut several known veins, four of which are on the Strathmore and three on the Defiance. Between this and the Crescent mine, a distance of about 3,000 feet further it will cut eleven more known veins. In the first 6,000 feet, a total of eighteen known veins all carrying high values have been found at or near the surface and if the history of practically every such project is to be taken as a basis, the tunnel may be expected to disclose double the number of veins now exposed on the surface.

At present the control of all the properties directly along the proposed route has been obtained. As the scheme develops it is expected that the owners of the claims to the north and south of the route will co-operate and that the company will be able to operate these claims by laterals.

From the high grade belt the statement is very familiarly made that about $900,000 has been taken. When the veins on the properties in this belt are opened up, the million dollar production up to the present, will be as nothing compared to the almost certain results of development. What has been done so far, has in nearly every instance been accomplished with very little machinery. The distribution is made as follows:

Providence	$400,000
Skylark	200,000
Elkhorn	100,000
Last Chance	50,000
E.P.U.	40,000
Strathmore	30,000
Bay	15,000
Defiance	10,000
Helen	10,000
Gold Bug	10,000
Prince Henry	5,000
Miscellaneous	30,000
	$900,000

The first results of the tunnel should be seen on the Strathmore claim. There are on the Strathmore three known veins, only one of which has been opened. In it the stoping work amounts chiefly to an incline making a vertical depth of 110 feet and from the 110 foot level, about 200 feet of drifting has been done on the vein. The ore product so far amounts to 215 tons, in money $30.000. It is estimated that on this vein there are 1,200 feet yet to open and on the same basis as the present work this should produce at least $180,000. The tunnel will open this vein about 330 feet below the 110 foot level and on this proven basis of production will expose ore worth $540,000. To attempt to continue this exposition to compute at any length, the richness of the mountain between Greenwood and Phoenix would lead us into figures which would hardly be comprehensible to many of us now. That the high-grade belt holds great bodies of ore, experts tell us and we believe, but to attempt to say what is the amount, would be foolish, for we do not know.

The Siftings-News of Idaho Springs, Colorado, recently published an interesting description of the Newhouse tunnel, an enterprise of great magnitude and calculated to become of great benefit in the mine development of that part of the state. Following is from the above-mentioned paper:

The Newhouse tunnel was the pioneer crosscut tunnel in this county, and was ridiculed for several years as a foolish undertaking.

It was claimed that values did not extend to the depth at which the veins would be cut by the tunnel, even if the veins were there—a theory which was upheld by some of the leading mining writers at the time, but which has since been most emphatically disproved.

Samuel Newhouse located the tunnel February 13, 1891, and nothing further than surveying was done until the spring of 1893, since which time the tunnel has been driven each year as follows:

	FEET.
1893	80
1894	1405
1895	1992
1896	2061
1897	1080
1898	99
1899	455
1900	2885
1901	2524
1902	761
1904	1890
1905	678
1906	2077
1907	258

Total length Jan 1, 1908, 17,540

It is estimated that the cost of driving the tunnel and installing permanent equipment is equivalent to $30 a foot—a total investment of less than $550,000.

The revenue from haulage of 200 tons a day, at $1 per ton, would yield over $70,000 a year gross, and allowing for the operating expenses and maintenance, this income would pay more than 10 per cent on the investment.

As an illustration, a couple of weeks ago one trainload of 41 cars was pulled out of the tunnel with a single locomotive, Each of the cars contained more than two tons. The one trainload shows the possibilities, and 200 tons a day, with the facilities at hand, could easily be multiplied five times, and make the earning capacity of the Newhouse tunnel not less than 50 per cent. per annum on the money invested.

The Newhouse tunnel is four-fifths completed. There remains yet a little less than 4,000 feet to take the heading to its projected terminal under the Eureka shaft. The tunnel company is independent. The three connections with the surface made it unnecessary to longer maintain artificial ventilation, and the small amount of power required to operate the electric railway, the employment of motormen, dump switchmen, track and car repairers, is practically all the expense attached to the handling of traffic.

There was approximately, on January 1, 1908, over 16,000 feet of laterals driven on the various veins intersected by the Newhouse tunnel, making altogether more than six miles and a quarter of underground workings as the result of the driving of the tunnel. The tunnel company derived a revenue from hauling every car of ore and waste taken out in extending these laterals.

FEBRUARY SHIPMENTS

THE GRANBY

For the month of February, the Granby mines at Phoenix shipped to the smelter at Grand Forks 80,155 dry tons of ore. This output has been exceeded only twice in the past year, the July shipment being 80,216 tons and the October shipment 86,711 tons. It exceeds the output for January by 5,952 tons. The entire shipment for 1907 amounted only to 613,567 tons while in two months this year it has made 154,358 tons or over one fourth of the total shipment of last year.

CARD OF THANKS

The members of the Greenwood Concert Orchestra take this opportunity to thank the people for their generous patronage which made their Leap Year Ball of February 28, so great a success. And, further, they wish to thank those who so kindly and ably acted as Floor Committee; also Messrs. E. G. Warren, H. McKee, and Wm. B. Fleming for donations.

MONDAY'S MEETING

The City Clerk had a sheap of communications to read to the members of the council—Mayor Bunting, Aldermen Wilson, Mortimer, Meyer, Gulley and Fleming who were present.

The Provincial Secretary sent official notification of the appointment of Ald. Jas. Sutherland and Duncan McIntosh, members of the Board of License Commissioners and of Alderman William Boyd Fleming and John Langton Coles as members of the Board of Commissioners of Police for the city.

Dr. S. S. Oppenheimer, M.H.O., reported that he had made special examination of the milk supply, the third he had made since the beginning of the present year and that the milk was up to the standard and free from adulteration.

A. S. Black reported that he had held inquest on the body of Mary Esteade.

Mussens, Limited, Vancouver, were after the contracts for the "Smith" mixture for our new cement sidewalks.

The Premier acknowledged the request of the city for amendments to the Municipal Clauses Act giving it power to aid a tunnel. G. R. Naden, re the same matter had wired, amendments requested favorably reported to house by Municipal Committee.

The Water Committee was given power to purchase, if they so desired a Seagrave cut-off valve, at a cost of $9.00.

The following accounts were ordered paid:

Dr. Spankie	5.00
G. H. Cropley	15 00
White Bros.	2 00
McCrae Bros.	6.45
A. S. Black	10.00

The City Clerk was instructed to forward draft for $540 to meet interest due on by-laws 5 and 6 to the Imperial Bank, Montreal.

The Assessor was instructed to begin and complete the assessment rolls on or before the 16th inst., on motion of Aldermen Gulley and Fleming.

Adjournment took place at 9.5 p.m.

BRINGING IN THE LOGS

It is estimated that the Yale-Columbia Lumber Co. have cut and will bring down the Main Kettle River about three million feet of lumber, log scale. This is only about one-fourth of the amount taken out last year by this company, as it suffered from the hindrances in doing business common to all the mountain companies in not being able to get cars during the winter of last year to ship the stock then on hand. In the fall, it was estimated by the Lumbermen's Association that the mountain mills had about 300,000,000 feet of lumber on hand and as the financial conditions responsible for killing the trade last year have not loosened very much, it is not probable that much of this is yet shipped The lumber coming down the Main Kettle will be handled by the mill at Cascade which will open about May 1st and will employ about 60 men.

CURLING

The final game in the Burn's cup competition will be played this evening between the rinks of skips Birnie and Bunting. This cup is now on exhibition at Logan and Co's store and is a very handsome cup.

If You Wish to Buy

COPPER STOCK

Wire us for Quotations

Our facilities for buying Dominion, B.C., or Granby Stocks on the curb in New York or Boston are unequalled Even our competitors acknowledge that we can buy these stocks cheaper than they. Why? Because our Eastern connections are of the very best.

The stock business is a sideline with us consequently we can afford to handle your business on a very small margin.

Give us your limit and we will fill your order at a lower figure if possible

We will wire you the New York opening quotations daily, if desired.

McDERMID & McHARDY,
NELSON, B. C.

COPPER COSTS & PROFITS

Copper is hanging around 12½ cents. The report of the Tennessee Company for 1907, says that their cost of mining electrolytic copper wos 12.22 and for casting 11.79 cents. The company produced 12,569.019 pounds of fine copper from its own ores, and 205,133 pounds from custom ores. Of its product, 2,230,136 pounds was electrolytically refined, evidently for the purpose of recovering the gold and silver, contributed chiefly by the custom ores. The remainder was sold in the form of pig copper, the unrefined product of the company's furnaces being an excellent grade of casting copper. Their sales averaged a little better than 20 cents, making their net earnings after charging off $70,000 for depreciation, $800,635; a total of $650,000 was distributed in dividends.

TIE TIMBER

It is estimated that the C.P.R. will take four hundred thousand ties from the Boundary this spring. Practically all of these are being taken out from the country about Boundary Creek—Greenwood and Eholt are the centres. Robinson and Warren have the largest contract and are to supply their number of seventy thousand for four years.

Some of the contracts given are as follows:

Robinson and Warren	70,000
C. J. McArthur	20,000
W. C. H. Wilson	20,000
Gillies and Co.	15,000
W. H. Chesser	10,000
A. W. Wheeler	7,000
A. Vandergrift and Co.	6,000
Bailey and Co.	5,000
McLaren and Co.	5,000
M. Christianson	3 000
C. Archibald	3,000

This week's shipment of 23,663 tons of ore from the Granby mines makes still another new high record for that company for seven days, last week's shipment having also been a record.

BOWSER REX.

As a natural result of his pretty generous and wilful handling of issues of international importance Mr. Bowser apparently has come to think that the doctrine of lese majeste applies to his actions in that capacity. In the course of his official duties, the other day, Mr. Justice Clement judged it necessary to protest forcibly against the action entered by the Attorney-general. The reason why this became necessary has been pointed out often in other places but in order that it may be made clearer, we give below the judgment of Mr. Justice Clement. His words are well worth the consideration of every citizen of this province for the time has come when we must, if we are to retain our self-respect, put some curb on men who allow their own personal gratification to imperil the constitutional structure on which the greatness of this Dominion depends. As yet we are not definitely concerned with the logical conclusion of the disruptive tactics of Mr. Bowser and the few unbalanced extremists from the Asiatic exclusion league who do not represent the general spirit of that association. The advantages of Confederation to this province are quite too evident for discussion. But the warning raised by Mr. Justice Clement as to the meaning of the action entered should be carefully read and heeded.

The following is the judgment of Mr. Justice Clement:

In the Supreme Court of British Columbia, in the full court—Re M. Nakane and T. Oksake—Judgment of the Honourable Mr. Justice Clement.

I agree entirely with the learned chief justice and my brothers Irving and Morrison, on the one real point of these appeals. To my mind the case for the appellant attorney-general is hopeless; so hopeless that I feel constrained to express my regret that it should ever have been thought proper to attempt to enforce the British Columbia Immigration Act, 1908, as against these respondents,

We live in a federal system of government. With regard to certain matters the Canadian people speak as a unit, while as to other matters we speak separately, and if we choose, diversely by provinces. The system was brought to birth only after long travail. The minds of our best men were long occupied in fixing upon the proper line of division between matters of general or Canadian concern and matters of more immediately local or provincial concern, and the result of their labors as embodied in the British North America Act should be lovally recognized and respected. No doubt honest differences of opinion may exist in many cases as to where the line is drawn by that act, or as to the question on which side of the line a particular matter should properly fall. But to suggest doubt where no real doubt exists, and particularly as to matters apt to inflame, is not, in my judgment, to be commended. Such a matter we have here. This matter of Japanese immigration has been dealt with properly, that is to say constitutionally, by the the parliament of Canada; and I must say to my mind it smacks strongly of disloyalty to our settled form of government when the authories of one province undertake to over-ride and render abortive the will of the people of Canada—et quorum pars magna sumus—constitutionally expressed in an act of the parliament of Canada; and when they ever made bold to forbid the honorable observance of our solemn engagements with a foreign power;

I should perhaps add that I express no opinion as to the effect, each upon the other, of the Japanese Treaty Act and the Dominion Immigration Act:

I would dismiss the appeal with costs.

The Vancouver Sunset has a few shells, hot and smoking to drop on the doorsteps of the Provincial Government anent the estimates. Victoria has asked for an appropriation to beautify the the Capital city. The Sunset says: "And before the Government appropriates $25,000 a year a year for ten years, or any other sum for any term, for that purpose, it needs to show that it is big enough to build necessary trails and roads in constituencies which send opposition members to the legislatures. Complaints of neglect by the Government of such ridings as Yale, Chilliwack and others represented by Opposition members, are too numerous. While such conditions prevail Victoria's plea should not be considered."

Not only are constituencies sending opposition members to the Legislature being practically deprived altogether of any share in the moneys taken from them so liberally by the B.C. government taxes, but the member for this constituency has shown up the way in which even the appropriations, that are made by the House are stolen from these constituencies. The Kettle River Bridge was to be built in the Greenwood district and appropriations were made last session with that in view. Last Thursday in the House, Mr. Naden charged that it was through the influence of the member for Similkameen that this bridge had been started where it had. The evidence of Mr. Gamble throws some light on the differences between the site in Greenwood district and the other.

Mr. Gamble the engineer, in his evidence stated that after passing upon the available sites for the bridge he had decided upon one in the Greenwood district. The bridge would be 120 feet long with 25 or 30 feet in approaches.

The site used in Similkameen required a bridge 144 feet long with 160 feet of approaches. The cost of the bridge at the site in Greenwood would be about $4,000. That in Similkameen would be about $6,000.

He told of having gone last year to the site and stopped work after $1,800 had been spent, because the bridge was not being carried out according to instructions.

The question will likely come up in the House again later.

EDITORIAL NOTES

Mr. Justice Martin's Mining and Water Cases, Vol. II, Part II, has just been issued by the Carswell Co., Ltd., Toronto, and is a most careful compilation of the judgments in mining and water cases given in the various courts of this province up until January 1st, 1908. These two subjects have been associated in this work by Mr. Justice Martin because of their evident relation. They involve legal questions of similiar character. This volume is dealing with judgments since 1905, many of which are very familiar to the public of this vicinity. The book also contains a citation of all mining and water statutes not included in appendix A in Vol. I and a large number of the statutes re water rights are recited at length in the bock. Careful and appropriate notes and references are made throughout the book, thus making it an invaluable treatise, at least, to every practising lawyer in the province.

Every day some one, an authority in his line speaks of the wonderful wealth of British Columbia. The reputation of this province and particularly of the Boundary is reviving every day, recalling the boom days that every successful mining camp in the world has had to glory in, and the remembrance of which each and every one of them has had in its turn to endure for a time. The fact, though, is that again British Columbia is coming to its own and the towns of the interior need only one thing to make the sunbeams of every day radiate with gold. They demand and require as a condition, individual support and faith in them from every single citizen they have The man who hasn't this faith in his town ought to move somewhere else. Besides this there should be no faction, no dissension. Faith and no faction are good resolves for desirable citizens.

Regarding the strictures of Mr. Justice Clement in respect to the action entered in the Courts by the Attorney-general, the Sunset (Vancouver), has the following to say:

"That the Natal Act was politics, sordid, vote-catching politics, no one with a grain of gumption is blind to. Had the Government shown the slightest interest in Oriental immigration since Dunsmuir's reservation last April, and during the stirring times of last summer's influx, it might at least plead consistent adherence to a principle. It introduced the Natal Act as a rash piece of politics, and now it is getting its fingers properly singed. . . . .

The rebuke which has come from the bench it richly deserved, and it is well for the province that there is at least one fountain of opinion not yet tainted by the vote-catching mania which has marked the course of the Legislature on the Natal Act during the present session."

OBSERVATIONS.

The Amalgamated has resumed operations in Butte and our connection with the great copper industry of Montana is illustrated by the excitement and the good feeling the news caused here. Starting the Amalgamated from straight shut down to full force seems to big a thing to be done on any other basis than fair promises for the future deliveries of copper.

Do we need to remark again that the pessimistic predictions of November last as regards Greenwood have never come true. Every merchant in town has done more business each month than he had expected.

The January number of the B. C. Mining Exchange contains a review of Boundary mining for 1907, illustrated by views of Rossland, Phoenix, Grand Forks and Nelson. Greenwood which by every principle of nature or reason, is the commercial and mining centre of this whole district is not shown Its up to Greenwood to get a Publicity Bureau or something to do the work of looking after advertising this camp. It may be money that makes the mare go and love that makes the world go round, but its advertising, good genuine boosting that makes the town forge ahead

---

No trains have been operating this winter over the North Fork extension of the Kettle Valley railway, owing to the fact that no permission to run same has yet been obtained from the railway commission. This, in turn, is occasioned by the company having built over some pieces of ground to which it has no title, according to report. This matter is now being settled in the courts

Grand Forks is to have a new hotel, the Queen's, costing $10,000. On Sunday last that city became a passenger divisional point for the Great Northern Railway—This resulting from the requirements of the new American Federal law demanding a 9-hour day for all railway employees. It is also rumored again and with some show of truth that the C.P.R. is to take over the Kettle Valley lines, otherwise known as the "Hot Air Line." This all looks pretty good for the city over the hills.

4 YEAR OLD BOY COULDN'T STAND!
Limbs Weakened by La Grippe
Made Strong by Zam-Buk.

Mrs. T. Brixton, of 5 Woodworth Ave., St. Thomas, Ont., says: "I had had some experience as to the efficacy of Zam-Buk in healing sores, cuts, etc., and had heard good reports from friends who also tried this balm, so when a year ago my little lad, four years of age, was left weak in the limbs as the result of a severe attack of influenza, I began rubbing in the Zam-Buk. His legs were so weak he would tremble and shake and was unable to stand for any length of time. Frequent applications of this ointment well rubbed in, seemed to strengthen him daily, and in a very short time the shaking and trembling in his limbs had been banished and he soon got strong and able to run about, thanks to Zam-Buk."

Zam-Buk is a splendid embrocation for rheumatism, sciatica, etc., and is without equal as a healing balm.

WHAT ZAM-BUK CURES.

Zam-Buk cures cuts, burns, scalds, ulcers, ringworm, itch, barber's rash, blood poison, bad leg, salt rheum, abrasions, abscesses and all skin injuries and diseases. Of all stores and druggists 50c. box or from Zam-Buk Co., Toronto, post-paid for price. 3 boxes for $1.25.

MINING

The sheep Creek district near Ymir, is now working the Mother Lode and Kootenai Bell. P. F. Drummond and associates have taken out a couple of cars within the last two weeks from the Mother Lode. The Kootenai Bell started preparations in the middle of January and is milling from ten to fifteen tons daily.

The Le Roi Two Mine at Rossland has declared a dividend of two shillings per share. This is the eighth dividend paid by the mine since October, 1905 and totals in all 14 shillings per share.

By next week the Granby's new ore crusher and terminal facilities at the Curlew outlet, should be ready for operation. The trolley engine which formerly did duty at the smelter, will feed the crusher, hauling heavy wooden cars, three dozen of which were manufactured ot the company's mine shops.

The copper ores of the Lake Superior region are of extremely low grade, the average yield in refined copper of all the ores milled in 1906 having been 25.2 pounds per ton, or 1.26 per cent. A little silver occurs with the copper in some lodes. Averaged on the total tonnage in 1906 the silver yield was 0.025 ounce per ton.

The Consolidated Mining and Smelting Co. are deferring their February dividend. Their recent statement gives the following tonnages mined from their properties between July 1stand Dec. 31st, 1907. They average about 1,380 tons a day.

Snowshoe mine, Phoenix	86,109
	248,664

The St. Eugene produced 12,110 tons of silver-lead concentrates, some of which was shipped to Europe and the Marysville smelter at Kimberley, B.C., but the greater part was smelted and refined at the company's works at Trail.

The Snowshoe only operated 4½ months out of the six months but it is intended to start this property again assoon as copper advances in price. There are large ore reserves ready for shipment.

The average amount ot ore and bullion products smelted at Trail was 1,116 tons per day, the amount of lead-silver bullion produced daily was 42 tons, averaging $165 per ton, copper matte 14 8 10 tons daily averaging $453 per ton. The amount of pig lead produced by the Trail refinery was 38 4-10 trail averaging about $79 per ton.

Upon the above basis of production the gross value of the output for the year will approximate $6,000,000, divided about as follows: Gold 39 1-10 per cent; silver, 27 2-10 per cent; copper, 12 4-10 per cent; lead, 21 3-10 per cent.

The ore reserves in the properties are quite as great as they were on June 30, 1907, and there is nothing to indicate any interruption in the company's various operations.

Shiloh's Cure Cures Coughs and Colds QUICKLY

Use Shiloh's Cure for the worst cold, the sharpest cough—try it on a guarantee of your money back if it doesn't actually CURE quicker than anything you ever tried. Safe to take,—nothing in it to hurt even a baby. 34 years of success commend Shiloh's Cure—25c., 50c., $1. 315

FOR SALE—Furniture for 4 rooms, Diningroom, Parlor, Bedroom and Kitchen. All new. Suitable terms to right party. Apply M., Times' Office.

A Lazy Liver

May be only a tired liver, or a starved liver. It would be a stupid as well as savage thing to beat a weary or starved man because he lagged in his work. So in treating the lagging, torpid liver it is a great mistake to lash it with strong drastic drugs. A torpid liver is but an indication of an ill-nourished, enfeebled body whose organs are weary with over work. Start with the stomach and allied organs of digestion and nutrition. Put them in working order and see how quickly your liver will become active. Dr. Pierce's Golden Medical Discovery has made many marvelous cures of "liver trouble" by its wonderful control of the organs of digestion and nutrition. It restores the normal activity of the stomach, increases the secretions of the blood-making glands, cleanses the system from poisonous accumulations, and so relieves the liver of the burdens imposed upon it by the defection of other organs.

If you have bitter or bad taste in the morning, poor or variable appetite, coated tongue, foul breath, constipated or irregular bowels, feel weak, easily tired, despondent, frequent headaches, pain or distress in "small of back," gnawing or distressed feeling in stomach, perhaps nausea, "heat" or sour "risings" in throat after eating, and kindred symptoms of weak stomach and torpid liver, no medicine will relieve you more promptly or cure you more permanently than Doctor Pierce's Golden Medical Discovery. Perhaps only a part of the above symptoms will be present at one time and yet point to torpid liver or billousness and weak stomach. Avoid all hot bread and biscuits, griddle cakes and other indigestible food and take the "Golden Medical Discovery," regularly and stick to its use until you are vigorous and strong.

The "Discovery" is non-secret, non-alcoholic, is a glyceric extract of native medicinal roots with a full list of its ingredients printed on each bottle-wrapper and attested under oath. Its ingredients are endorsed and extolled by the most eminent medical writers of the age and are recommended to cure the diseases for which it is advised.

Don't accept a substitute of unknown composition for this non-secret medicine OF KNOWN COMPOSITION.

AT THE CHURCHES

ANGLICAN—St. Jude's. Rev. John Leech-Porter, B. D., pastor. Services at 8.30 a.m., 11 a.m. Sunday school, 12 p.m. All seats free.

D. H. RICE,
Gen. Agent for B.C.

PLAIN TALK FROM THE DOCTOR

A prominent physician, famous for his success in the treatment of kidney and bladder troubles, stated that to the following prescription is due a great deal of his success:

One ounce fluid extract dandelion;
One ounce compound salatone;
Four ounces compound syrup sarsaparilla.

Mix and take a teaspoonful after meals and at bedtime, drinking plenty of water.

This mixture will, he says, positively cure any diseases arising from weak, clogged or inactive kidneys, and will assist these organs to cleanse the blood of the poisonous waste matter and acids, which if allowed to remain, cause lumbago, lame back, rheumatism and sciatica, and at the same time will restore the kidneys to healthy normal action. The ingredients, which are purely vegetable and entirely harmless, can be procured from any good druggist and mixed at home at very little cost.

This advice will undoubtedly be much appreciated by many readers.

MEN

We Cure Every Case We Treat

OUR GUARANTEE:
NO PAY UNLESS CURED

When You Need a Specialist, Consult One of Wide Experience.

We are just now completing our twentieth year as specialists in men's diseases. During these years of close application to a single class of ailments we have originated and perfected the only scientific and certain methods by which these diseases are cured. If we accept your case for treatment, a cure is but a matter of a reasonable time.

We guarantee every man a lifelong cure for Varicocele, Hydrocele, Urethral Obstructions, Blood and Skin Diseases, Prostatic Troubles, Piles, Fistula, Loss of Vital Power, Kidney, Bladder and Special Diseases. We especially offer our services to those who are afflicted with weakness as a result of their own follies or excesses.

Our methods are up-to-date, and are endorsed by the highest medical authorities of Europe and America. Hence our success in the treatment of Men's Diseases. Remember, our specialty is limited to the diseases of MEN and MEN only.

We cover the entire field of nervous, chronic, deep-seated and complicated diseases.

CONSULTATION FREE.

If you cannot call, write for Symptom Blank. Many cases can be cured at home. All correspondence confidential.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres more or less.

Entry must be made personally at the local land office for the district in which the land is situate. Entry by proxy may, however, be made on certain conditions by the father, mother, son, daughter, brother or sister of an intending homesteader.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

COAL.—Coal mining rights may be leased for a period of twenty-one years at an annual rental of $1 per acre. Not more than 2,560 acres shall be leased to one individual or company. A royalty at the rate of five cent per ton shall be collected on the merchantable coal mined.

W. W. CORY,
Deputy of the Minister of the Interior.

N. B.—Unauthorized publication of this advertisement will not be paid for.

THE

COPPER HANDBOOK

(New edition issued Nov. 15, 1906)

Is a dozen books in one, covering the history, Geography, Geology, Chemistry, Mineralogy Metallurgy, Terminology, Uses, Statistics and Finances of Copper. It is a practical book, useful to all and necessary to most men engaged in any branch of the Copper Industry.

Its facts will pass muster with the trained scientists, and its language is easily understood by the everyday man.

It gives the plain facts in plain English without fear or favor.

Its lists and describes 4626 Copper Mines and Companies in all parts of the world, descriptions running from two lines to sixteen pages, according to importance of the property.

The Copper Handbook is conceded to be the

WORLD'S STANDARD REFERENCE BOOK ON COPPER

The Mining Man needs the book for the facts it gives him about mines, mining and the metal.

The Investor needs the book for the facts it gives him about mining, mining investments and copper statistics. Hundred of swindling companies are exposed in plain English.

Price is $5 in Buckram with gilt top; $7.50 in full library morocco. Will be sent, fully prepaid, on approval, to any address ordered, and may be returned within a week of receipt if not found fully satisfactory.

TOWN TOPICS

Dr. Mathison, dentist, will be absent from Greenwood for some months.

The Greenwood Steam Laundry is at present out of commission.

A meeting of the Board of Trade will be held in the Court House on Monday evening next, at 8 o'clock—Monday, March 9th

The choicest confection in the land 60c per pound. Halt pound and pound boxes, 35 and 75 cents per box at McCrae Bros.

Monday, March 2nd, was the anniversary of St. David the patron saint of Wales "Mar o Gaw yw Cymru i Gyd y Gwyr yn Erlyn y Byd."

Quite a sleighload of Greenwood people went down to Boundary Falls last night to a party given by Mrs. W. C. Thomas.

The Kettle Valley Fish and Game Association will hold another meeting before the opening of the season, probably about the 18th inst. Remember it.

The Greenwood Liquor Co. this week received a half carload of B.C. Whiskey from the P.C. Distillery Co., Ltd., New Westminster. It is both in cases and in bulk This firm is now agents for B.C. whiskey.

St. Patrick's night will be celebrated as usual by the Miner's Union holding their annual dance on that night. This is the ninth dance held by the Union and the committee are resolved to keep up its reputation in every way. A full and competent floor committee has been appointed and no pains are being spared to make this the best dance they have ever had. The Greenwood Concert Orchestra will provide music.

If you wish to vote at the election which is to come on anywhere from June to a year from June according to our Conservative friends, your application must be handed into the Registrar before the last Monday in March. For six months previous to the date of your application, you must have resided in this province and for one month previous in the electoral district. Unless your foot was planted on the soil of British Columbia on or before the 30th of September last, your name cannot go on the list in this revision.

Rev. W. K. Rochester, a Secretary of the Lord's Day Alliance who is touring the west on behalf of the cause of Sabbath observance, will be in Greenwood on Sunday next. In the morning he will preach in the Methodist church, in the afternoon, he will address a meeting of men of the Miner's Union, at three o'clock and in the evening, a mass meeting will be held in the Presbyterian church, the Methodist church service being withdrawn in the evening. Mr. Rochester is said to be an excellent speaker. His hearers will have good sermons and a thorough presentation of the policy of the Lord's Day Alliance.

The Leap Year Dance of the Concert Orchestra drew the largest crowd of the season, including a great many people from outside points, such as Phoenix, Eholt and Midway. The dance program was a long one, containing 18 numbers, but even at four o'clock in the morning, it took more than one repetition of the "Home, Sweet Home" waltz to send the dancers away. Supper was served at midnight in his usual fine style by Howard Moore. Of the music it is unnecessary to say more than that the Orchestra is putting forward dance music of a kind not heard here before. The Orchestra consists of the following: Solo cornet, A. D. Hallett; 2nd cornet, L. McKenzie; 1st violins; J. Jury and Bert Logan, 2nd violin, E. Foyle-Smith; clarionet, A J. Logan; trombone, R. J. Saunders; bass violin, J. F. S. Gillum; Piano, C A. Thomas; drums and traps, F. X. Moor.

Closing-out Sale New and Second-hand Goods. H. J. Clint, Copper Street.

In New Brunswick, we are told there was a snowstorm this week. First one in 25 years. That's a long time.

Ring up Smith and McEwen's when you need tea. They have Deckajulie, the tea with one brand always good, always the same.

Quite a number of men are leaving Phoenix for Butte. Fifteen men bought tickets for the big copper camp on Wednesday morning.

The Oddfellows will hold a Smoker on Friday, the 13th. Despite the day and date, will make it a huge success.

Coles' Bookstore has an unequalled display of chocolates. If you have'nt seen them, do so at once. They are worth the while

Cameron and McDonald, blacksmiths, have dissolved partnership and henceforth the business will be conducted by D. A. McDonald and Chas. Kinney. Mr. Kinney has had his wagon-making business in the same building but is now entering into partnership with Mr. McDonald.

We have bargains in Wall Paper remnants that we wish to clear. Get busy before that tall chimney starts spouting. McRae Bros.

About midnight, on Monday last an unfortunate slip deprived the wife and two small children of Mike Noylan, a brakemen at the Granby smelter, of a husband and father. While Noylan was attempting to jump on his engine he missed his footing and fell under the locomotive, being killed instantly The engine completely crushed a portion of his head and mangled the body terribly. Deceased was an American, about 30 years of age and was related by marriage to Miles Barrett, foreman of the smelter.

Remember when you want tea that Smith and McEwen's are now the only agents for Deckajulie—the tea that you know so well.

Richard Ratcliffe returned to camp on Tuesday night last. Since leaving here about Christmas, he has visited a number of points in Idaho and Washington. In the States to the south and particularly in Spokane, things are opening up pretty generally. In Spokane, a great deal of rebuilding is in progress.

A large number of the friends of Miss Helen Moffatt met at her home on Saturday night last and sprang the surprise of a lawn shower on her. On Tuesday afternoon Mrs. R. J. Moffatt was the hostess of an exceedingly well attended At-Home, given in honor of her daughter, who left on Thursday morning for Spokane.
