A NEW ENTERPRISE

Work to Be Started at Once on the Plant.

FOUNDRY AT ANACONDA

What Must Ultimately Develop Into a Prosperous Industry Is Now In the Initial Stage.

The first steps have been taken in the construction of an iron foundry and machine shop for the town. The affair will be a modest one at beginning, but so planned that it can be readily added to. Hurry up orders for castings and machinery are now on hand and the plant must be gotten into shape for the delivery of the same in the next six weeks. The plat of land, 100 by 231 feet, has been selected in Anaconda.

The site is an ideal one in itself and is well situated for receipt and delivery of supplies, being on the line of the Canadian Pacific, from which a grade spur can be run into the grounds. The site will be bounded by two streets, the railway and an alley.

Messrs. B. A. Isaacs and R. W. Hinton of the Nelson Iron Works, are promoters of the enterprise, and according to the Nelson papers purpose to make the plant ultimately larger than their Nelson works.

Mr. Hinton has recently been in town and contracted with H. Bunting for the first buildings. A substantial building 48x48 feet with leanto 10x26, on stone piers, will be begun so soon as the heavy timbers arrive. This building will furnish room for pattern shop and mouiding room in the main part, and for coke and sand in the addition.

It is designed to extend the accommodations just as soon as the company's present rush will permit. A movable crane for handling heavy material will be erected, and the plant so far as its restricted size will permit, made up to date. This enterprise, which must eventually develop into large proportions, comes at an opportune moment, the demands for such work by both local smelters insuring its success from the beginning.

BOSS OF THE CAMP

The Tacoma Daily Ledger in a recent issue had a write-up on the installation of a new water system to supply that city. The boss of the camp was not overlooked, and our former townsman, George Victor Andrews, figures very prominently in the reporter's story. He does George credit as follows:

"GeorgeVictor Andrews presides over the cook tent and is lord of the camp. He is looked up to and admired by the other men, for his dinners, his suppers and his breakfasts are worthy of an exclusive New York restaurant. Before his coming there had been five different men cooking for the camp at different times. George Victor has them all backed off the map as a maker of flapjacks, pie and other viands dear to the heart and satisfying to the stomach of a man who lives his life out of doors, say the surveyors.

"Andrews is known as the 'only man who ever beat Jim Hill.' This apparently impossible accomplishment came during the course of a lawsuit in British Columbia, when the cook was awarded a verdict over the railroad magnate in a dispute about a wage settlement."

Croup.

A reliable medicine and one that should always be kept in the home for immediate use is Chamberlain's Cough Remedy. It will prevent the attack if given as soon as the child becomes hoarse, or even after the croupy cough appears. For sale by all druggists.

Europe has taken the lead in the development of power by using waste blast furnace gases. There are now 300,000 horse power produced abroad in gas engines supplied with blast furnace gases.

THE NORTH COUNTRY

From a Mineral Standpoint Particularly.

CHARACTER OF THE ORES

Interview With Assayer Sutherland, Who Spent Last Summer in the Bulkley Valley.

Believing that our readers, who have recently heard much of the Bulkley valley from an agricultural standpoint, might be interested in hearing the views of T. J. Sutherland, who formerly ran an assay office here, on the mining outlook of the district, we interviewed that gentleman, who, in dealing with the question, spoke substantially as follows:

"The mineral indications in the district are very encouraging. Few new camps can show better prospects, considering work done.

"Thus far prospectors have confined their attention to three sections of the country, the Babine range, the Hudson Bay mountains and the headwaters of the Telkwa river. Ore has been found elsewhere, but the chief prospecting has been done here Gold, silver, lead and copper are the principal metals, copper predominating with great persistency. The chief ores of copper are chalcopyrite, bornite and tetrahedrite. In one instance only, so far as I know, was native copper found. These copper ores generally carry gold. Instances are known of the gold value reaching 70 ounces, and the silver 400 ounces, but the reliance of the camp must be on the immense deposits of low grade copper.

"In these the metal occurs as a sulphide, carrying gold and silver. The copper is quite evenly distributed and would appear to show an average of say 4 per cent.

"The country rock is basalt, cut by porphyry dykes. These dykes are of three ages, very strong and responsible for the ore bodies, the ore occurring at the contact. In some instances the entire dyke is impregnated. The higher grade ore occurs in true veins as a rule, the geological features of the high and low grade ores being entirely distinct. Very little development has yet been done, but what has been done has been very encouraging. Next year will see much development in the district.

"Coal would seem to be one of the district's valuable assets, the measures being large, and both bituminous and semi-anthracite of good quality being found. The seams are from five to nine feet wide and the coal free from slate and other impurities.

"The preliminary surveys of the G. T. P. R. R. pass through the coal measures and the company has acquired several miles of the same.

"Timber suitable for mining and building abounds, and cheap water power as well. Development will naturally be slow, but in the end a great mineral industry will undoubtedly develop there.

For nice fresh flowers for funerals decorations and weddings, write or telephone Spokane Florist Co., Main 5, Spokane. 5-30

About two-thirds of the entire amount of coal used in coke making is run of mine coal, most of which is charged into the ovens without being washed. It has been found, however, that the coking process is in many cases facilitated and a better quality of coke obtained if the coal is crushed before it is charged into the ovens, and a large amount of the run of mine coal is crushed, or disintegrated, before coking, whether it is washed or not. Little, if any, large sized coal is coked in by-product ovens. During 1905, 14,559,369 short tons, or 29.4 per cent of the total quantity of coal used in coke making was slack, and of this slack coal, 6,363,143 short tons, or 43.7 per cent, was washed before it was coked. Of the run of mine coal used in coke making less than 10 per cent (3,187,994 tons out of a total of 34,971,308 tons in 1005) was washed before it was coked.

COMING WEST

There appears little doubt that British Columbia is on the eve of a great boom. The great timber resources of the province are being exploited in response to the call for lumber. To the east lies millions of acres of treeless country, fast filling up with people, who must have lumber, and who must look to us for it.

The mineral resources are being developed and the results are proving highly satisfactory. These things are becoming known and inquiries for farm lands, timber areas and mining properties are coming in from every direction. The north, the interior, the coast, are all proving attractive to settlers, and they are coming. Railroads, always quick to realize a situation, are building into and through the province, and this means money and people.

Interviews with western men returned from the east reveal the fact that the people back there want to know—want to know about our resources and our climate, and when people set out to learn about British Columbia much has been accomplished, because investigation will prove the desirability of the province for the investor or the homemaker.

And now if our public lands shall be conserved to the public interest, and our private enterprises, particularly in the mining line, conducted along sound lines, the results cannot but be happy. Governments and men must keep their heads.

Capital is coming, people are coming, our fruit lands are proving a wonder, our mining resources stores of wealth, and if the steady, persistent plodding of the last few years is maintained the result will be most gratifying.

LAST CHANCE

In order to accommodate those of our readers who were not able to examine the stock of publications of the Monroe Publishing Co. of San Francisco, bankrupt, and secure a set of books most desired, we will give them a few more days in which to participate in this great book sale. No more fitting present could you give your wife or mother for Christmas than a set of THE WORLD'S BEST POETRY or SETON THOMPSON'S NATURAL HISTORY, or else a set of SCOTT, DICKENS, BULWER, LYTTON, THACKERY, RUSKIN or a SHAKESPEARE. For the children or household no more valuable work is published than **The Encyclopedia Britannica Americanized,** and a set in keeping with same is the New Science Library, so valuable and much sought for by miners generally. Remember, these books are sold at less than one-half price, and in many instances at less than cost of binding. If you have not had a visit from Col. I. B. Quin, who is conducting this sale for us, telephone Hotel Imperial or drop him a postal card, giving address, and he will call. This sale positively closes next week, and this is the last chance you may ever have of placing so rare, valuable and handsome books in your library at so low a price.

The similarity in chemical action between sodium, potassium and ammonium, has led to the belief that if the radical NH. could be isolated it would be found as a metal. The nearest approach to this has been the preparation of ammonium amalgam, but this is very unstable and decomposes immediately when the influence of the electric current, by which it is formed, is removed.

Try This for Your Cough.

To relieve a cough or break up a cold in twenty-four hours, the following simple formula, the ingredients of which can be obtained of any good prescription druggist at small cost, is all that will be required: Virgin Oil of Pine (Pure), one-half ounce; Glycerine, two ounces; good Whisky, a half pint. Shake well and take in teaspoonful doses every four hours. The desired results can not be obtained unless the ingredients are pbre. It is therefore better to purchase the ingredients separately and prepare the mixture yourself. Virgin Oil of Pine (Pure) should be purchased in the original half ounce vials, which druggists buy for dispensing. Each vial is securely sealed in a round wooden case which protects the Oil from exposure to light. Around the wooden case is an engraved wrapper with the name—"Virgin Oil of Pine (Pure)"—plainly printed thereon. There are many imitations and cheap productions of Pine, but these only create nausea, and never effect the desired results. 11-24

MORE HELP

Eastern bank managers, it is said, still report a scarcity of clerks. One member remarked. "The banks have been opening so many branches lately that all the available men are working and we have much difficulty in locating good juniors. I've been looking for a man for several weeks and I've had to work almost every night this month." Over a year ago the Bank of Commerce imported fifty bank clerks from Scotland, and they have proved to be good finds, according to the opinion of one of the managers. "They have showed themselves able to get a good grasp of the banking business in Canadian style, and they haven't been long about it," said he.

Chapped Hands.

Wash your hands with warm water, dry with a towel and apply Chamberlain's Salve just before going to bed, and a speedy cure is certain. This salve is also unequalled for skin diseases. For sale by all druggists.

WORKMAN'S COMPENSATION CASE

On the 9th instant, Judge Clement, the arbitrator appointed to hear the application of the parents of George Veresick, for compensation, took evidence in the case at the court house here. After hearing the case the arbitrator decided that the parents of the deceased were not "dependents" within the meaning of the act, and dismissed the application.

It will be remembered that the deceased met his death last December through the motor carrying a slag pot at the Mother Lode smelter, running over the dump.

Jos. O'Shea, of Taylor & O'Shea, Nelson, appeared for the applicants, and I. H. Hallett for the respondents, the B. C. Copper Co.

GOOD WORDS FOR CANADA

Mr. R. J. Barrett, editor of the London Financier, who has recently been visiting Canada, had many good things to say of this country on his return to London. Among other things he says:

"That Canada is on the eve of a period of commercial development only equalled in the history of the United States of America.

"That there are numberless openings for the profitable investment of British capital.

"That the Americans are keenly alive to the great commercial and agricultural possibilities of the country, and are flocking over the border in their thousands.

"That England's indifference is greatly regretted by many loyal Canadians.

"That the Bank Act of Canada is the finest Banking Act in the world.

"That there are splendid openings for men with a small capital—anything from £250 to £1,000—in the towns springing up in all directions in the northwest.

"That the country is just crying for skilled mechanics and labor for the railroads.

"That clerks and 'remittance men' are not wanted.

"That Cobalt is the richest silver camp in the world, and is alone worth a journey to Canada to see.

"In Canada, undoubtedly, we have a country of illimitable possibilities—one that has, indeed, achieved most wonderful results.

"Financially, commercially, and in respect of her industrial expansion, Canada's position is unquestionably sound. The only drawback is the want of capital, for, with such rapid growth as now has come to pass, domestic finance does not serve for all requirements. Already England has done much, but Yankee keenness seems inclined to do a great deal more. Canadians are much surprised to see how English capital holds off, whilst the Americans are eager to acquire the very pick of chances that occur. Americans already have obtained control of many leading industries, and they are all the while endeavoring to win still greater dominance.

"But here indifference is weakening. Canadians themselves are not aware of the considerable interest now shown in their great country's opportunities. I know for certain that the principals of leading English industries have gone to Canada to see and study for themselves the conditions now existing there. And something, surely, must result from such solicitude.

"In the new Northwest there are millions of acres of the finest wheat-growing lands in the world. I have run my arm eighteen inches deep into the richest, blackest loam it is possible to conceive.

"For business men Canada can give such chances as they will not find elsewhere, and men with from £250 to £1,000 are certain of success if they will but just go west, and, with good judgment, start where the towns are springing up with marvelous rapidity. Established there, where fertile lands ensure a permanent prosperity, they build their fortunes on a rock, and not on shifting sand.

"Some people here are nervous lest the influx of Americans to the far west of Canada should weaken ties that bind the great dominion to the motherland. Of that there need be no fear, I am assured. The ties are indissoluble, and incoming Americans make good Canadians. The laws they find are excellent, and—what especially appeals to them—are well administered."

The Skylark shipped two cars of ore last week, one of first and one of second class.

Work is progressing favorably on the Providence creek water extension.

Go see Jerry from Kerry. It is the greatest laughing treat of your lifetime. Don't miss it.

In Time of Peace.

In the first months of the Russia-Japan war we had a striking example of the necessity for preparation and the early advantage of those who, so to speak, "have shingled their roofs in dry weather." The virtue of preparation has made history and given us our greatest men. The individual as well as the nation should be prepared for any emergency. Are you prepared to successfully combat the first cold you take? A cold can be cured much more quickly when treated as soon as it has been contracted and before it has become settled in the system. Chamberlain's Cough Remedy is famous for its cures of colds and it should be kept at hand ready for instant use. For sale by all druggists.

SUCCESS.

What constitutes success in life? Answers will vary. Is it piling up wealth without taking into account the means of acquisition? That would constitute success to many. Is it occupying exalted public position regardless of methods of attainment? The world will nod affirmatively. To so many the end justifies the means. The frontier millman who robs the public domain and amasses a fortune is called shrewd. The promoter of a fake stock concern who grows rich on the earnings of the guileless poor is called clever. The politician who climbs into position by means declared to be in violation of law is not called a criminal, but a smart fellow. The clergyman who panders to public opinion, however wrong, in order to smooth the way to preferment, climbing thus sometimes into the pulpits of the best churches, is called eminent. The lawyer who advises his client into litigation which he cannot afford, and on false grounds, and who reaps a big fee, is called brilliant. And thus through society and the body politic the doctrine runs. Capture the public eye, acquire wealth, get position, never mind the means or methods, and life is a success.

But will the ethics of the street hold in the quiet home corner? Will the incentive of life's hurry and rush stand the heart's analysis in life's evening.

We fear the world's measurement is wrong. The scales have been tricked, the standard juggled. Rockefeller, grown inordinately rich at the expense of the widow in the garret, who sews by a dim light late into the night to provide for her child and make him a worthy citizen may fail to realize her measure of joy or reach her measure of success. We fear that the world's measurement of success is partly responsible for the discontent and unrest and poverty and anarchy that characterize the times.

EDITORIAL NOTES

THE Last West, a magazine devoted to the interests of Canada's extreme west, and issued at Winnipeg, appears among our exchanges. The publication is a monthly and the first issue in an interesting one. The purpose of the Last West is to tell in attractive form the story of the "Great Wonder West" as it is pleased to call the ocean of prairie and the sea of mountains constituting the last west.

SAN FRANCISCO is being convulsed with another earthquake—one of scandal, corruption and graft. The grand jury may with the help of Heney be able to clean things up a bit. Meantime the world is stunned at the idea that when men and nations everywhere were sending their gifts to relieve the unfortunate, the administrators of that charity were robbing their fellow citizens and growing rich out of their plunder.

WILLIAM JENNINGS BRYAN deplores that Hearst alone of the amalgamated party was defeated in New York, but encourages him with the assurance that, although again defeated, he still may do efficient service for "progressive democracy." It is thought that he is thus drawing Hearst's attention to support of democracy as represented by Bryan.

COUNT BONI appears to be scoring against the Countess, and it would appear probable that to get her decree of divorce, certain names must be divulged, and this society is striving to prevent and the Countess appears unwilling to gratify. Some day American girls will learn the truth of the old song, that it is better to "abide in their ain countrie."

EVICTION of tenants may be all right for unpaid rent, and the preservation of forests wise, but when a great corporation like the Crow's Nest Pass Coal Co. takes advantage of trouble in their works to evict their workmen and neither supplies coal nor lets people have wood, capital makes a more severe commentary on itself than its worst enemies could.

IT IS gratifying to note that men who ought to know, predict higher prices for copper and silver for several years to come. The Boundary is busy getting out both metals, and is willing to use the larger figures in its calculations.

BEFORE President Roosevelt started on his Panama trip he emphasized his previous declaration that under no condition would he again be a presidential candidate.

DOMESTIC economy well taught in the home will lessen divorce suits in the courts. The woman who knows how to cook and care for a home holds domestic infelicity well in check.

LIFE insurance investigation in Canada have not revealed serious abuse of trust like it did in the United States, but it has scorched a few of our public men to a nice brown.

DOES the bunch of Great Northern officials, the engineers and contractors that have been in Greenwood recently mean anything other than usual routine?

PORT SIMPSON boomers appear to have made a success in Seattle and Spokane in exchanging town lots for the shekels of the Americans.

WHAT a shame that bill posters are permitted to plaster the front of buildings indiscriminately with their flaming colors,

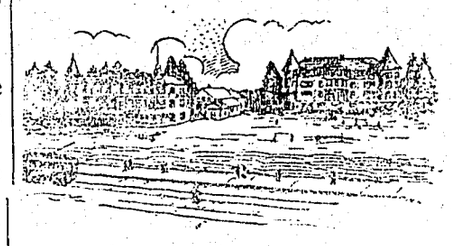
COMMERCIAL men are quick to size up a situation. Greenwood has been getting them in "bunches" lately.

A GOOD play and an orderly gallery are both necessary to get value out of your $1 to $1.50 for a seat.

THE signs of the times are a mild winter and lots of business.

Bilious Attack Quickly Cured.

A few weeks ago I had a bilious attack that was so severe I was not able to go to the office for two days. Failing to get relief from my family physician's treatment, I took three of Chamberlain's Stomach and Liver Tablets and the next day I felt like a new man.—H. C. Bailey, editor of the News, Chapin' S. C. These tablets are for sale by all druggists.



COLUMBIAN COLLEGE
New Westminster, B. C.

Receives both ladies and gentlemen as resident or day students. Has a complete business or commercial course. Prepares students to gain teachers' certificates of all grades. Gives the four years' course for the B. A. degree, and the first year of the of the School of Science course, in affiliation with Toronto University. Has a special "Prospectors' Course" for miners who work in B. C.

Instruction is also given in Art, Music, Physical Culture and Elocution.

Term opens September 17, 1906. For calendar, etc., address COLUMBIAN COLLEGE.

IMPORTANT ANNOUNCEMENT

It affords considerable gratification to announce to Times readers and the public in general, that we have secured from the creditors of the J. E. R. Munro Publishing Co., bankrupt, of San Francisco, a limited number of those handsome, valuable and superbly bound de luxe books—many of which are limited editions. The prices at which we are enabled to offer these works are in most cases less than cost of binding, and consist of the NEW ENCYCLOPEDIA BRITANNICA, Americanized, Seton Thompson's Natural History, the most profusely illustrated and complete work on Nature extant; the New Scenic Library, that invaluable publication; Makers of History, Modern and Ancient Classics, Balzac, Bulwer, Cooper, Carlyle, Dickens, Dumas, Motely, Shakespeare, Ruskin, Thackray, Voltaire, also the World's Best Poetry, Modern Eloquence, and many others

We have secured the services of Col. J. B. Quin to conduct this sale, and those who would like to take advantage of the sale will do well to telephone to the Imperial, and samples and prices will be submitted for inspection.

Gleanings From the Throng of the Metropolis

Dr. Mathison, dentist, Naden-Flood block.

Jacobs' Biscuits, new arrival. Anderson Bros.

Norman Luse has leased his hotel in Eholt and is going to take a "look 'round."

Edgar Dynes, who has been ill with typhoid, is again out to the delight of his many friends.

A coal shortage is reported on the S. F. & N. and freight is moving very slowly these days.

Robert Wood returned to Beaverdell on Wednesday's stage to superintend ore shipments from the Sally.

HORSES WINTERED—Send your horses to S. Stooke, Midway, to have them well cared for. Terms, $10. 11-13

Arthur H. Black, for some time past on the V., V. & E. railway survey west, was calling on old friends in Greenwood the first of the week.

The telephone office in the Miller block, on Center street, is completed and presents a fine appearance. The company is preparing for early removal thereto.

Charles Martin, who for years ran a shoe shop on Government street, is again back to Greenwood and has re-opened here in the Hallett building on Copper street.

Archdeacon Beer, and H. W. Silke, engineer on the V., V, & E., were guests at the Imperial early this week. Mr. Silke has but recently recovered from an attack of typhoid.

We regret to announce the death of Mr. D. Morrison, for a long time superintendent of the Emma. Mr. Morrison went south some months ago for his health, with the above unhappy result.

Another cave-in on the Brooklyn in Phoenix, but nobody hurt and nothing seriously disturbed. Mines right in the heart of town have possible drawbacks for fellows that want to stay on the surface.

Messrs. Duncan C. McRae and King Ross tried their luck at shooting last Sunday, but fate was against them and the birds for safety kept out of way until the gloaming, and then it was too late.

A. B. Campbell, for many years a resident and still a property owner in Greenwood, was in town this week. Mr. Campbell is a member of the firm of McGregor & Campbell, doing a prosperous business in Chesaw.

Mrs. Louis Deno of Kimberley avenue, who has been a terrible sufferer from rheumatism for many years, died suddenly Monday morning last. Dr. Foster was summoned but she expired before he could reach the house.

The latest in sterling silver, tableware. Call at Logan's and see their prices.

An unconfirmed report makes it appear that the owners of the Jewel mine at Long Lake camp, are coming out from England, presumably to look over their property, and possibly order the erection of a mill. The Jewel is one of the best properties in the district, and, properly managed, would make a dividend payer.

Nice spring chickens, fresh cranberries, sweet potatoes, at the Union Meat Co.

Mrs. E. T. Wickwire and daughter, Vivian, left on Sunday morning last for Vancouver, to take up residence there. The presence of three children in Vancouver appeared to make the change desirable. Her many friends in Greenwood will regret her departure.

Try our Chicken Tamales. Pacific Cafe.

The Victoria Times has certainly struck a new gait in its race for the premiership of provincial dailies. In order to swell its subscription list it is offering a $1,000 accident policy issued by the General Accident Assurance Co. of Canada, as bonus for each year's subscription to the Times. We have been reading the Times for years, but never before realized the risks we were apparently running.

Dr. Simmons, dentist, Phone 96 Wallace-Miller Block, open evenings.

R. Roberts, superintendent of the Jewel, was recently in town.

Don't miss seeing the funniest Irishman on the stage, up-to-date, Jerry from Kerry.

Mr. J. E. McAllister, superintendent of the B. C. Copper Co., is still confined to his bed.

A Chinaman from Anaconda was buried on Monday last to the usual accompaniment of confectionery and chickens.

Don't fail to see and hear the uniformed band and orchestra of solo musicians with the Jerry from Kerry company.

WANTED—Situation as housekeeper or cook for small camp. Address Boundary Creek Times, Greenwood.

Five o'clock tea sets from 90c up. Anderson Bros.

Arthur D. Kean of Chesaw, has contracted with F. E. Buckless of the Palace Livery stable, for the delivery of 60 tons of hay.

The late storm was responsible for putting the telegraph wires out of commission. There was nothing doing on the line all day Thursday.

Great floods are reported prevalent on the Pacific coast. The loss of property has been very heavy and railway travel is practically suspended.

Citrons for preserving. Anderson Bros.

Nothing doing on the Midway & Vernon so far as we can see. But it is reported that parties in New York are very industrious with their pencils on it.

Mr. Thomas R. Drummond, manager of the Dominion Copper Co., recently recovered from illness, has been having a much needed rest on the coast.

Harry P. Dickinson was in town this week looking after business and incidentally inquiring into the prospects of the properties in which he is interested.

The Hall Mines smelter people have become interested in Central camp, and are sending Robert Yuill and James Hatch up to do some work on a property there.

LOST—On Wednesday evening, a sable collar. Finder will please leave at this office and receive reward.

Messrs. Pope and Arthur, who were connected with the Miday & Vernon, and who have recently built a fine residence at Carmi, came down from the West Fork yesterday.

We are sorry to know that ill health has compelled our townsman, H. H. Huff, to seek a change of climate. We trust that he may soon return to Greenwood fully restored.

J. Kirkup of Rossland, was in town during the week. On invitation of Justice McMynn he occupied a seat with him during the preliminary investigation of Jas. A. Dale, on Wednesday last.

Frank Mosher, who has been spending the last six months in Alaska, returned to Greenwood on Wednesday evening last. His many friends are pleased to see him again in the best town of the Boundary.

What would happen if the Cascade Power people were bought out or forced out of business? It looks to us as if one big corporation then would dictate both the transportation and the power question of the Boundary.

Wednesday morning's Great Northern train had a narrow escape from derailment west of Midway. A land slide on a curve was responsible for the trouble. This is always incidental to new roads, however, during a wet spell.

The Odd Fellows will give their Christmas tree on Tuesday, December 21st, in the Eagles' hall. The committee requests that the members of the order will send in the names of the children and their ages to Fred B. Holmes by the end of this month.

Woman wants work by the day. Enquire at Arlington hotel, Copper street.

W. Foyle Smith of Midway, is spending a few days in the metropolis of the Boundary.

The Great Northern is preparing to do some work in Phoenix. The track on the south hill will be continued farther west.

The funeral of the late D. Morrison of Eholt, took place from the Presbyterian church at 10 o'clock Friday morning.

Absolutely pure maple syrup and sugar at Anderson Bros.

John McLeod left on Tuesday morning to investigate the Goldfields proposition. Coming and going is the order of the day.

Coles & Frith are opening up their large stock of Xmas goods and fine china, Don't fail to call and see.

The Great Northern is too busy looking after the breaks in its line caused by the recent floods, and after those indictments for rebates, to build the Midway-Greenwood branch.

Swell line of new picture Post Cards, latest finish and style, at White Bros.

A TRIFLE MUDDY

The rain of the past few days has resulted in making the crossings that are removed from the center of the town rather disagreeable. In some instances people "go round" rather than take the long chance.

RATHER DIM

The electric light is something fierce these days. The responsibility is charged to changing over to the new sub-station and must stand good, but please, mister, place a "hurry up" order.

ELECTION COMING

There appears to be little doubt that a provincial election will be held in the near, if not the immediate future. Advices from the coast claim that all indications point that way, and that Premier McBride proposes to bring the elections on before next meeting of the legislature. In discussing elections recently, according to reports, Mr. Hawthornthwaite claimed that the Socialists would have at least five members in the next house, one of whom would be from Greenwood. Of course this might look likely from a distance, but we confess we are "near sighted" and cannot see it that way.

PRELIMINARY INVESTIGATION

James A. Dale of Carmi, who killed two men a month ago, and who subsequently attempted suicide, was sufficiently recovered to admit of his being brought before Justices McMynn and Kirkup on Wednesday, charged with murder. The prisoner was looking pale and weak and showed marks of the great stress of the last few weeks. His elderly and highly respected father sat beside the unhappy son, his face, too, bearing evidence of weeks of great grief. No defense was set up, and after hearing the evidence of a number of witnesses to the tragic event, Dale was remanded to jail to await trial before the Supreme court.

CANADIAN PACIFIC ACCIDENT

For the first time in the history of the Pacific division of the Canadian Pacific, it is claimed, loss of life in the passenger list has occurred. A rear end collision at Tranquille early Wednesday morning is responsible for the same. It seems that the east bound was running in two sections. The first section awaited the arrival of the west bound for crossing, and remained on the main line, the west bound taking the crossing. While thus waiting the second section arrived and crashed into the first. One man was killed and sixteen injured. Six of the injured were removed to the Kamloops hospital. Prompt action by the engineer of the west bound, which arrived just at the time of the accident, prevented additional horrors.

NOTICE OF APPLICATION TO PURCHASE
Nov. 14th, 1906.

NOTICE is hereby given that sixty days after date, I intend to apply to the Hon. Chief Commissioner of Lands and Works for permission to purchase the following described lands:

Beginning at a post marked Mrs. Avis Poole's location post, on the West side of the Main Reitle River about 3½ miles above the Forks at Westbridge; running south 80 chains, along the bank of the River, West 40 chains, North 80 chains, thence East 40 chains to point of commencement.

Dated November 14th, 1909.

(Signed) MRS. A. POOLE,
by her agent Yale Columbia Lumber Co.

EDUCATION OF MINING ENGINEERS

The preparation of students for the work of the mining engineer has been the subject of a great deal of discussion during the past two years. Both students and educators are vitally interested in this subject and will be glad to hear one or two ideas recently advanced by Mr. J. W. Gregory in an address before the Institution of Mining Engineers, London. We quote a few sentences:

"The time spent in practical training should be watched to avoid the deplorable waste of time that often occurs in it. Many a student puts in a period of 'practical work' which consists only of such jobs as trucking. Time thus spent is wasted to a mining engineer, just as it would be to a lawyer if his first year were spent in cleaning the office windows.

"The main drawback of the long academic year is that it is fatal to the 'sandwich system,' by which students can spend six or seven months at a university and the other five or six months in practical work. There are obvious objections to this course. The most serious is that the expensive teaching equipment has long intervals of idleness, except in so far as it may be used for research work. In technical subjects, however, the advantages of the sandwich system seem far to outweigh the drawbacks. Employers complain that the students of some of our best universities and colleges come from them with an academic spirit, which spoils the men for years and sometimes hampers them for life. The knowledge of these men is admittedly sound, but it is said they cannot apply it, owing to lack of common sense and practical insight. The spirit of a university and a college is remarkably different from that of the business world, and success in the complex profession of mining requires commercial instincts as well as technical knowledge.

"It seems most important that students who intend to adopt a technical profession should not be kept for some years continuously in a college atmosphere. The contact for six months in the year with the practical work of the world gives the necessary corrective, and is invaluable educational training."—Mining Reporter.

COPPER IN NEVADA

If present expectations are realized, gold will not always hold the premier position among the metal products of Nevada. Copper is beginning to make insistent claims for recognition as a factor of importance. In fact the reports of the later strikes and excitements are concerned with copper rather than with gold, and although the state has always produced some copper, it gives promise af attaining prominence in that line.

The districts of greatest promise and present interest are those of Ely and Yerington in the northerly part, and the newest discovered camps of Cuprite, Furnace Creek and Greenwater in the south. The latter must, perforce, be shared with California, but there is evidence that this will in no wise detract from Nevada, for if the new discoveries amount to much they will be so extensive as to contribute heavily to both states. Probably no better evidence could be offered in support of the genuineness of the future of copper in Nevada than the fact that the present known copper districts have literally been invaded by large interests which appreciate the future of that metal.—Mining Reporter.

WINTER EXCURSIONS

Maritime Provinces, Ontario, Quebec, the Old Country.

The Canadian Pacific Railway announce a series of low round trip rates first class three (3) months' limit from Kootenays to all points in Ontario, Quebec, Maritime Provinces and the Old Country.

Rate from Greenwood to Toronto, Montreal, Windsor and intermediate points is $83.55, Halifax or St. John in connection with ocean passages, $94.55.

Tickets will be sold daily November 24th to December 31st.

Corresponding rates will be quoted to all eastern Canadian points from all Kootenay stations.

This is an unusual opportunity to visit eastern Canada or the Old Country at Christmas at a low rate.

Detailed information sailing lists, for ocean steamers, first class or tourist sleeper reservations on application to local agents, or write

J. S. CARTER, D. P. A.,
Nelson, B. C.

To free copper matte from iron, a new process has been proposed by Savelsberg, of Germany. The matte is finely divided and mixed with the necessary percentage of slag forming ingredients, such as sand and lime, requisite for the subsequent slagging of the iron. This mixture is then brought onto a bed of glowing material, as coal or coke, in a suitable apparatus, and a blast passed through the mixtore from below. Due to the heat of the reaction the mass gets red hot without completely melting, so that the mass sinters together. During the blowing the sulphur combines with the copper and the iron becomes oxidized by the blast. After cooling, the mass is broken into suitable sizes for use in a blast furnace where an iron free matte can be made, which will still contain substantially all the sulphur in the original matte. The matte may then be treated electrolytically.

Progress and Development

Progress and development are terms closely identified with life in the West. In a new country people are working daily for the upbuilding of town, city and district, and for the improvement of the conditions under which men and women are called upon to live. Every act of daily life that tends to bettering one's surroundings makes directly or indirectly for the improvement of society generally. In all this the local newspaper plays an important part. Among its local readers it stimulates an increasing interest in their home city, keeping them posted on all local happenings, and becomes a welcome weekly messenger, bearing bright and welcome tidings. Among its outside readers it forms a valuable advertising medium making known the merits, advantages and prospects of the city and attracting thither citizens who want employment, business firms looking for locations, and capitalists seeking investments. In the upbuilding of a town, city or district the local paper is an important factor.

BOUNDARY CREEK TIMES

The Boundary Creek Times aims to do its full and complete share in the upbuilding and improvement of Greenwood and the Boundary district. It is not handicapped in its work by any restraining obligations to any party, clique or corporation, but it is free at all times to rise up and promote the best interests of the City of Greenwood and its people. To do this most thoroughly and satisfactorily the Times must have the support and cooperation of the citizens of Greenwood.

Every effort is being put forth to make the Times the class of newspaper the people want. Increasing attention is being continually paid to mining news, especially of that nature that will interest those employed in the work as well as those whose capital is invested in the properties. With this end in view we aim to have

A Subscriber in Every Home

As a result of the efforts that have already been put forth, we believe that an increas- interest is already being taken in its news columns. We have evidences of this from the fact that the subscripiion list is already growing; the street sales are increasing weekly and the news dealers find more demand for each succeeding issue. This is a satisfactory condition of affairs that acts in two ways. It increases the revenue of the circulation department and it makes the paper a first-class advertising medium for local business men.

In handling local advertising every effort if put forth to protect the Greenwood merchant. The local page is reserved for them and foreign advertising has been repeatedly refused because the advertising manager refused to disturb the positions held by local advertisers.

Business men of Greenwood, we are here to protect and advertise you. We are protecting you! Do you advertise? Read The Times, subscription $2.00 per year.

Advertise in the Times. Rates Reasonable

FROM OUR EXCHANGES

BIG MILL

GOLDEN, B. C., Nov. 9.—Golden is to have one of the largest lumber mills in British Columbia. The Columbia River Lumber company, F. W. Jones manager, announce that as soon as they shut down, about the first of December, they intend to start construction on the new plant. The main building will be 65 by 200, with a planer room 75 by 100. The boiler house will contain a battery of six boilers, and power will be supplied by a pair of 20 by 24 engines, with 48 inch driving belt. The planer room will be driven by a 12 by 16 engine. The company intend to install a double cutting band saw and Wicks gang, also a circular saw to slab for the gang.

The mill will contain, when completed, every modern improvement. The buildings will be completely sheeted with iron, and it is intended to make the new mill one of the best in the country. Its capacity will be 150,000 feet every ten hours, and if it is run dry and night it will be able to cut 50,000,000 feet in a season.—Mail-Herald.

DULL TIMES

After all, there is a good deal in talk. Let a man talk dull times and it is infectious, everybody talks dull times. Instead of rustling around to take care of what business there is, tney all go and sit down and mope over dull times. If a customer does happen to drop into one of those "dull times" stores he actually gets frightened out of one-half as much as he expects to buy, because thiugs look so blue. He catches the spirit of the store and resolves to hang on to all his money with a death grip, even if his business goes to pieces on account of running short of goods to fill up the empty shelves. The bug bear of hard times should be sat down upon, it is doing more to kill business than anything else. Tell a man he is sick, keep it up, and you will eventually hound him to death.—Enderby Progress.

RATS AND SUCH

LONDON, Nov. 8.—Dr. Sir Frederick Treves, addressing the National Health society, ridiculed the recent outcry against canned meats, when he said virtually everybody was indifferent to the far greater danger in fresh food and milk laden with death dealing germs.

The public did not seem to mind swallowing anything they could not see. Milk and meat, as now unsanitarily cooked, are warmed with the bacilli of typhoid and other diseases, but as these are invisible, the public did not care.

Canned meats which contained floor sweepings and pieces of rat and man were harmless, because they were cooked and probably were healthy before they were cooked. People were straining at a gnat and swallowing a camel. The present treatment of meat before it was eaten was not in the least more sanitary than it was in the days of the neolithic cave dwellers.

THE YELLOWHEAD

It is announced from Ottawa that the Grand Trunk Pacific has chosen the Yellowhead pass as its route through the Rockies. This choice has been made after careful surveys of all the available passes, and it is said the pass will give a grade over the mountains of about four-tenths of one per cent. The government has yet to approve the selection of the route, but its approval may be expected as a matter of course. The Canadian Northern is understood to be heading for the same pass with its transcontinental line, so there may be some complications over the construction of the rival roads. What the two companies plan to do on the west side of the Rockies seems to be indefinite as yet.—Rossland Miner.

Lo! THE POOR INDIAN

OTTAWA, Nov. 9. In addition to the large number of Hindoos now in British Columbia, there are some eight hundred more on their way. Already strong protests have been received from that province against the arrivals of this class, who are not wanted, who will never assimilate with the Canadian people and who may become a charge on the community. The Dominion government nill make representations to the imperial government to take the matter up with the India government and put a stop to this immigration. Being British subjects, this is about the only way that the matter can be dealt with.

OUR PUBLIC MEN

OTTAWA, Nov. 8.—The insurance commission examined Mr. George W. Fowler, M. P., yesterday respecting the purchase of C. P. R. lands, Okanagan Lumber company and the Kamloops Lumber company.

It came out during the examination by Mr. Shepley that Mr. Fowler got $4,000 out of the Shusway, $22,000 out of the Okanagan Lumber company and about $55,000 from the Kamloops Lumber company deals; $2,500 of which he received from the Shuswap transaction he said he credited against part of the Kamloops deal, $55,000, which was not paid him by Peter Ryan. There were two options obtained by Mr. Fowler on the property of the Kamloops Lumber company. One was $55,000 more than the other. He unloaded on the Union Trust company at a higher figure and paid Ryan at the lower price, so that there was coming to him from Ryan $55,000. In purchasing the Okanagan Lumber company Mr. Fowler was interested as vendor and vendee, but his explanation of this was that it did not in any way effect the sale, as he was only carrying out the bargain as arranged for by the others. He was vendor, he said, in the Kamloops sale. Of the $55,000 he gave $12,000 to Irwin, $1,000 to McCornick and $7,000 to Mr. Foster. Mr. Foster stated in Toronto that this was a loan.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3 If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to es idence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,00 pounds shall be collected on the gross output.

A Word to Women

Every woman may not be handsome, but every woman should keep with care the good points which nature has endowed her with. Sallow skin, dull eyes, a blotchy complexion—these no woman need have who pays proper attention to her health. Where constipation, liver derangement, blood impurities, and other irregularities exist, good complexion, bright eyes, and sprightly movements cannot exist. Internal derangements reveal themselves sooner or later on the surface. Headache, dark rings around the eyes, sallow skin, labored heavy movements, a constant tired feeling—all these mean that the liver and digestive organs are needing help and correction. Bileans give this necessary help. They are purely vegetable and they work in Nature's own way. They do not merely flush the bowels and clear out the liver cells. They tone up liver and stomach to fulfil their proper functions. Not only so, but while more effective than the medicines hitherto obtainable, they are, at the same time, more mild in their operation, and are suitable for the most delicate constitution.

A WOMAN WHO WAS AS YELLOW AS A GUINEA.

MRS. A. TRAVIS, of Gringley, says:—"I got completely 'run down' in health, my strength went. I was constipated, had frequent headaches, and my skin became as yellow as a guinea. Food gave me pain, and hours upon hours have I laid awake at night quite unable to get any sleep, because of indigestion. I lost flesh and become quite wasted. Medicine did not seem to do me any good at all. One day bileans were recommended to me, and I decided to give them a trial. They did what other medicine had failed to do, and soon after I began to take them I felt an improvement. I persevered with them until they cured me, they cleared my skin, rid me of constipation, banished my headache, ended the indigestion, and made me well and hearty again."

BILEANS ARE A CURE FOR:
headache, constipation, piles, liver trouble, indigestion, and all digestive disorders, female ailments, skin eruptions, biliousness, sick headache, bad taste in the mouth, foul breath, dizziness, wind pains, anemia, debility etc.

Obtainable from all druggists at 50 cents per box, or from Bilean Co., Colborne St., Toronto, upon receipt, of price. 6 boxes for $2.50.

To obtain a free sample box, cut out this coupon and mail it, with full name and address and one cent stamp (to pay return postage) to the Bilean Co., Colborne St. Toronto.

THE FERNIE STRIKE

The latest Fernie advices are that the coal miners' strike is over. The memorandum of settlement would indicate that the strike had been an unqualified failure, begotten by misrepresentation of conditions existent both to the men and to union headquarters.

The loss chargable to the strike will probably reach the million dollar mark, and organized labor does not appear to have scored a point. This is to be deplored, because labor must be organized for its own protection, but it must be just for its own preservation, and neither man nor body can afford to present an unjust view to the public and endeavor to maintain it.

Work will be resumed at once, and the fuel famine relieved.

FULL TEXT OF THE FERNIE STRIKE SETTLEMENT.

FERNIE, B. C., Nov. 13.--The coal miners' strike at Fernie was settled last night. Mr. Burke, President Mitchell's representative, conceded everything for which the company held out.

The following is a copy of the agreement signed by Mr. Burke and Mr. Lindsey on behalf of the union mine workers and the Crow's Nest Coal company, respectively:

"I, Thomas Burke, acting for President Mitchell, and sent to Fernie by him to settle the strike, find the Crow's Nest Pass Coal company was promised by the conference committee which framed and signed the agreement of May 23, 1905, that there would be no refusal to work with nonunion men; that the issue of the closed shop would not be raised; that President Mitchell would not permit a strike for any such purposes; that it was relying on the facts of these promises that the discrimination clause in the previous agreement was omitted from the agreement of the 23d of May, 1905.

MITCHELL WAS MISINFORMED.

"I further say that President Mitchell, had he been advised of the aforesaid promises, would not have ordered a strike nor sent his telegram dated September 11, 1906. It is, therefore, agreed between myself and Mr. Lindsey, acting for the Crow's Nest Pass Coal company, also that there shall be no discrimination by union men against nonunion men or refusal to work with them; that all men who joined the United Mine Workers of America since September 11, 1906, and signed to deduct dues under article 5, on or after the said date are released from the said organization and their signatures to such orders shall be and are cancelled and they may rejoin and sign at their option. That the money collected for the union by the company for dues in October from the September payrolls shall be paid over to the union; that inasmuch as the present check off does not last for the life of the agreement, a new check-off order is to be prepared and substituted for it which will last for the life of the agreement, and this, when signed, the company will accept."

All men are to go back to work.

PAY ORE COLUMN

The Tip Top, in Skylark camp, has been bonded to Spokane parties for $15,000. The Tip Top lies just south of the E. P. U. and Margrie, adjoining the Mavis on the west. It has the same lead as the Bay and Mavis and considerable development work has been done on it.

The Wallace Mountain Mining company decided at its late meeting to go ahead with vigorous development on the Duncan and Bounty Fraction. From a point in the tunnel where the winze was sunk 50 feet an upraise will be made 50 feet to the surface. When this is done the winze, which will become the main working shaft, will be deepened. In the bottom of the winze at a depth of 100 feet from the surface the vein is 18 inches wide and returning good values. From this shaft development will proceed as circumstances dictate.

Work is steadily progressing on the Elkhorn. Steady progress is being made on the crosscut for the main ore body south, and good ore is being taken out of the winze. Another car of the Elkhorn's high grade ore will be presently shipped.

Good progress is reported by Alex Robinson on the Golconda tunnel. The contract is for 175 feet and will be eompleted inside two months from date.

ZAM-BUK WINS WORKERS' PRISE

Marvelous Cure of Burns.

Zam-Buk has been called "the worker's friend," because it brings such relief and healing to workers who suffer from cuts, burns, bruises or any skin injury or disease. Mr, Alf. J. Clark, of Cavendish street, London (Ont.), tels how Zam-Buk cured him of severe burns. He says: "I got my hands very severely burned with lime. The burns were so deep that as I plied my shovel the blood actually ran down the handle. The agony I suffered you may well imagine. I tried several different kinds of salves but the burns were too severe for these preparations to heal.

"I obtained a supply of Zam-Buk, and the very first application gave me ease. This pleased me, you may guess, but as I applied the balm each day I was more and more pleased with the effect. The pain was relieved completely.

"I had often heard of Zam-Buk, but thought before I tried it that it was similar to the ordinary salves you see advertised. In a very short time Zam-Buk healed my burns completely, and my hands actually felt better—the muscles more firm and the skin in better condition than before I was burned."

Not only for burns, but for cuts, bruises, sprains, etc., Zam-Buk is the best and surest cure. It also cures eczema, ulcers, abscesses, ringworm, boils, eruptions, poisoned wounds, chapped or cracked hands, cold sores, chilblains, bad leg, piles, etc. All druggists sell at 50c. a box, or post free from the Zam-Buk Co., Toronto, on receipt of price. Six boxes for $2 50.
