Herb W. Edwards Injured.

Herb W. Edwards of Des Moines, Iowa, got a fall on an icy walk last winter, spraining his wrist and bruising his knees. "The next day," he says, "they were so sore and stiff I was afraid I would have to stay in bed, but I rubbed them well witn Chamberlain's Pain Balm and after a few applications all soreness had disappeared. I feel that this bottle of Pain Balm saved me several days' time, to say nothing of the suffering." This ointment is for sale by all druggists

A circuit of Lake Superior covers a distance of 1,750 miles. The greatest length of this greatest body of fresh water in the world is 420 miles, Its greatest breadth is 197 miles. Its total area is 31,200 square miles. Its height above sea level is 602 feet and its approximate mean depth, 000 feet.

Late of Camp McKinney.

WELCOME TO JUDGE

By the Greenwood Bar Association

ON FIRST OFFICIAL VISIT

Police Magistrate Hallett Offers Congratulations to His Honor Judge Clement.

His Honor Judge Clement presided at the sittiug of the county court held in the court house, Greenwood, on Tuesday morning last. As this was his honor's first appearance at a regular court sitting, the bar association of Greenwood took advantage of the opportunity to welcome the new judge and extend congratulations upon his appointment. The spokesman was I. H. Hallett, who is dean of the Greenwood lawyers. Mr. Hallett expressed his pleasure because he had been chosen by his fellow members of the bar association to tender to his honor their heartiest congratulations upon his appointment and to assure him that his appointment had been looked upon with the greatest trust and confidence. Even among themselves they had congratulated each other because they fully believed the best appointment had been made, and they felt sure that every matter which came before his honor would receive the fairest and fullest consideration. It was also gratifying that a member of the locai bar had been appointed and that those in authority had not sent a stranger among them. He trusted that his honor would long be spared for a career of usefulness and that he would accept their congratulations in the spirit in which they were tendered—one of the heartiest sympathy and esteem.

His honor in reply said he appreciated very much, indeed, the expressions of good will from the Greenwood bar. Coming fresh from the bar he could fully appreciate the difficulties in connection with their labors and he would always endeavor to expedite matters and bring all questions of litigation to a speedy conclusion. It was gratifying to him that the bar and the public generally should have received his appointment with such marks of approval. He would endeavor in all cases to carry out the oath of office and render justice impartially. He again thanked Mr Hallett and the members of the bar for their hearty welcome and congratulations.

The routine work of the court was then proceeded with. Several new British subjects were added to the growing list, a number of cases were laid over to next court, and in the case Entilla against Bompina; the whole matter was referred to J. R. Brown as arbitrator. This is a case where there is a dispute among the Italian colonists below Anaconda, and Entilla is sueing Bompina for wages. A number of witnesses who cannot speak English were in attendance, and J. P. Myers-Gray and J. P. McLeod, the lawyers respectively for plaintiff and defendant, agreed to have the matter referred to Mr. Brown to unravel the difficulty.

DOMINION COPPER CO.

M. M. Johnston, consulting engineer of the Dominion Copper company, reached Greenwood by yesterday's Great Northern train and in company of Mr. Drummond, the company's resident manager, went to Phoenix this morning. Seen by a Times representative, Mr. Johnston stated that they hoped to blow in the smelter at Boundary Falls in about ten days. Ore and coke are being shipped there and he saw no reason why the smelter should not be running in that time. He also stated that his company had not fully decided where the new smelter would be located.

A WEST FORK DEAL

Black Diamond and Standard Bonded.

P. COSTELLO PURCHASER

Development Work to be Started at Once—Payments in Two Years.

Last week a deal was put through by which Peter Costello of Spokane acquired the Standard and Black Diamond on the West Fork of Kettle river. The amount named in the bond is $27,000, payable in one and two years. Three hundred dollars worth of work is to be done on the claims each month until the final payment is made. Net returns on all shipments are to be applied on the purchase price of the property. The deal was put through by John H. Smith of Greenwood, and the owners were, P. J. Kennedy, ⅜ interest; Jos. A. Devlin, ⅜ interest, and G. O. Guise, ¼ interest.

The Standard and Black Diamond were located in August 1899 by P. J. Kennedy. The claims are located near the well known Rambler mine on Dry creek at the eastern end of Wallace mountain. The leads are much larger than those of the other properties of Wallace mountain, running from 8 to 14 feet in width.

On the Standard three shafts have been sunk, one 22 feet and the others 10 feet each. There are also three shafts on the Black Diamond, one 40 and the others 10 feet each. Seven open cuts have been run across the leads from 5 to 8 feet deep and 10 to 12 feet long.

It is the intention of the purchaser to commence work at once. J. H. Smith and P. J. Kennedy left for the West Fork on Wednesday's stage to get everything in shape for the force of men to be put at work December 1.

SEEING THE PROVINCE.

Well Known Newspaper Man Is Visiting British Columbia.

E. W. Thompson, one of the best known newspaper men in Canada, was a visitor to the district this week. Mr. Thompson is a Canadian who was at at one time an editorial writer on the Toronto Globe and who has had a long and successfull journalistic experience on some of the large American dailies. He has done a great deal in directing attention to the Canadian West by a series of well written articles which appeared in the Boston Transcript and other newspapers. His present tour to British Columbia is bound to result advantageously to the province, as his descriptive articles will appear in the Boston Transcript and a syndicafe of influential newspapers. Mr. Thompson believes a large immigration could be directed to B. C. as there are many desirable settlers who would rather live in a mountainous country than on the monotonous plains. He criticized the lack of detailed information available in connection with vacant lands of the province and saw no good reason why there should not be more information in order that settlers might ascertain for themselves where lands could be secured. During recent years he has visited the Northwest many times and came in direct personal contact with the incoming settlers. Many of the most desirable of these would rather come to B. C., but as there was no one to direct them here and no information upon which they could act for themselves, they remain in the Northwest.

Mr Thompson visited Midway and other points of interest and left on Tuesday for the Okanagan valley. He will go to the coast before returning East.

A number of the salts of zinc are employed in medicine and the arts. The sulphate is used in calico printing and in medicine as an astringent, caustic, emetic and a tonic. The axide and carbonate are used as pigments, as preserqatives, etc.

LOCAL NEWS ITEMS.

Owing to a break in the press the Times is a day late.

R. C. Longley, the well known mining man has returned from a trip to Kootenay.

There has been a heavy fog in the valley along Boundary creek for the past week.

The Times is still at the mercy of the butchers. Our staff hunter didn't negotiate even a gopher or a whistler.

Among the Midway visitors to the city Thursday evening were Messrs. Bayley, Griffiths, Pope and Gardom.

Captain Swsyne will run a shooting gallery instead of the bowling alley forthe next month, or until the skating rink is opened.

Mike Callahan and Dan Bresnahan have completed their 50-foot sinking contract on the Preston. It fs said that another contract will be let to crosscut and drift.

Editor Keffer of the Anaconda News has been confined to his room all week with a severe eold. This is the cause of the non-appearance of the News on time this week.

A. Gosnell and P. Malone, of Nelson, who were here last week, went over to Princeton and purchased a site for a large brewery which they and their associates intend erecting there.

A lodge of Knights of Pythias will shortly be started in Midway. Proctor Joiner, manager for the Russell-Law-Caulfield company here, has been named as instituting officer. It is expected that Greenwood, Phoenix and Grand Forks lodges will take part in the instituting proceedings.

The annual statement of the Bank of Montreal, issued this week shows net earnings of $1,638,000, compared with $1,409,000 last year. Of these earnings $1,420,000 was paid in dividends and the remaining $218,000 was added to the profit and loss account. The circulation of the bank increased two million dollars

The appeal cases in Rudolph v. Macey, and Madden v. Diamond, were argued before the full court in Vancouver this week. The appeals are from the decision given by Mr. Justice Irving at Nelson. Joseph Martin, K. C., is counsel for the local appellants and E. P. Davis, K. C., and W. A. Macdonald, K. C., are acting for the Providence company. The full court reserved its decision.

Last week C. Scott Galloway sold the Victoria hotel on Copper street to J. N. Bishop of Calgary. The purchase price was in the neighborhood of $5,000. Mr. Bishop has taken charge of the hotel and is completely renovating it. This is the second sale of Copper street property within a week. It shows that Greenwood is again attracting the attention of the investing public.

ODD FELLOWS' BALL.

The Most Successful Dance Ever Held in Greenwood.

In the Masonic hall last evening the largest and most successful dance ever given in Greenwood, was held under the auspices of Boundary Valley lodge, I. O. O. F. The large hall was well filled and the only drawback, if any, was the large number of couples who were anxious to dance each number on the programme. Bush's orchestra furnished excellent music. Supper was served by the ladies of St. Jude's church. The following committee of Odd Fellows, who had charge of all the details of the successful affair, are being warmly congratulated of the result of their efforts: Messrs. E. H. Mortimer, Jas. D. McCreath, W. B. Fleming, S. Belt, Phillips, McIntominy, Braithwaite, and W M. Law.

Sunstone, or aventurine feldspar, and shows a smooth surface, a beautiful, golden, glistening effect. This effect is due to the reflection of light from the surfaces of vast numbers of minute, tabular crystals of hematite, or goethite, enclosed in the spar in parallel position. With a magnifying glass these minute crystals show most gorgeous iridescence. Sunstone is used to some extent in jewelry, but more so in ornamental objects. It is rather a rare mineral and when in fine specimens it commands a fair value from mineral dealers or collectors.

Anglican, St. Jude's Church

GREENWOOD, B. C.

COUGHLAN-HENDERSON.

Mr. Chris, Coughlan of Greenwood, but lately a resident of this city, and Miss Eva Henderson of Grand Forks were married at the home of Mayor and Mrs. Jeffery Hammar in this city at 10:30 Wednesday morning, Rev. E. Manuel performing the ceremony. Only a few relatives and intimate friends of the contracting parties were present. John Henderson, a brother of the bride, acted as best man.

The groom is a promising young man and has been a resident of British Columbia for about ten years, having been employed by P. Burns & Co. nearly all of that time. At present he holds a responsible position with that firm in Greenwood. In this city, where lived for about three years, his friends are only limited by the number of his acquaintances.

The bride is a daughter of Mr. and Mrs. J. B. Henderson of this city, and is an estimable young lady, being very popular with a large circle of friends.

The young people were the recipients of numerous costly and beautiful presents.

Mr. and Mrs. Coughlan left on the afternoon train for their future home in Greenwood. The popularity of the couple in this city is attested by the fact that the platform of the C. P. R. station was thronged with their friends who had gathered to congratulate them and to wish them a happy and prosperous married life. They boarded the train amidst a shower of rice.—Grand Forks Sun.

The Times joins Mr. Coughlan's many Greenwood friends in extending congratulations.

Observation Buffet Library Compartment Cars.

These cars are the first of their kind to be used on transcontinental railways. They are the embodiment of comfort and convenience and typify the heighth of inventive genius in car building. In the construction of the cars the purpose in view has been to furnish the traveling public with every comfort and luxury which they could secure at a firit-class hotel or at their club. Ease, elegance and excellence is the combination sought in the building of these cars. The observation rooms are finished in vermillion wood and the chairs are upholstered in green leather, the remainder of the furnishings being in harmony with the general color scheme. The casd room is finished in English oak with green leather seat coverings. The four state rooms, which are unusually roomy, are finished in mahogany, coco, vermillion and tonquin, while the furnishings are olive, reddish rose, green aad maroon plush, in the order named. The drawing room is finished in mahogany and all furnishings are golden brown plush.

The rear half of these cars is devoted to the observation room, handsomely furnished with easy chairs, writing desks. etc. Wide plate glass windows afford an unobstructed view of the surrounding country. Those who enjoy being in the open air will find comfortable seats on the protected roar platform.

Current periodicals, a branch of the Booklovers' library and the latest newspapers obtainable at starting point and en route are provided in these cars. This car also contains a spacious card room with a well stocked buffet, nicely furnished and pleasingly arranged for the comfort and convenience ef the passenger.

Luxurious in appointment, well nigh perfect in mechanical construction, complete in every detail from headligth to rear end lantern, there is nothing left to be desired. The operating force will at once appeal to the passenger, for the selection of the attaches from conductor to Porter is made with a view to their adaptability. The placing in service of "The Oriental Limited" has been done with a view not only to retain travel but to create it. That this end is accomplished is aa assured fact to anyone whose pleasure it is to make a journey across the continent on America's most comfortable overland train.

The Straits Settlements are famous the world over for their yield of tin. They are in East India, a British colony comprising several isolated possessions on and adjacent to the Malay peninsula and bounded by the Federated Malay states. These possessions are the island of Singapore, the port and territory of Malacca and the island of Penang, together with Province Wellesley and thd Dindings. The total area of the colony is 1,2s6 square miles and a eopulation of 575,000, the greater portion being Chinese and Malays. The colony is administered by a governor at Singapore under whom are British resident councillors at Malacca and Penang. The ports of the colony are all free. The shipping amounts yearly to 15,000,000 tons.

Stalacites and stalagmites are deposits of lime, the former hanging from the roof, the latter rising from the floor of a cavern. Stalactitic formations occur mainly in long fantastic masses suspended from the roofs of caves in limestone rocks. Stalactites appear to be continually forming, water carrying carbonate of lime held in solution by carbonic acid, trickling through crevicer in the roofs of the caverns, gradually during its exposure to the air loses its carbonic acid and in consequence deposits its carbonate of lime, the water passing over the portion first deposited, gradually adds to it, and finally gives the carbonate of lime its long length and stalactitic appearance. The flatter deposits, called stalagmites. formed on the floor of the caverns by the water there depositing that portion of the carbonate of lime which is not separated during the formation of the stalactite.

Spiegeleisen is a kind of cast iron made from specular iron ore, or hematite, containing a large percentage of carbon and manganese. Being remarkably free from impuritles, as phosphorus, sulphur, silica, it is largely used in the Bessemer process of eteel-making for the purpose of reintroducing carbon.

Properly constructed feed water heaters will save from 10 to 15 per cent. of fuel.

Chamberlain's Colic, Cholera and Diarrhoea Remedy. This is the most successful medicine in the world for bowel complaints, and is the only remedy that will cure chronic diarrhoea. Every bottle is warranted, For sale by all ruggists.

Synopsis of Regulations Governing t s Disposal of Dominion Lands within t e Railway Belt in the Province British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, eight and nine feet long, 1½ and 1¾ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales

A license is issued as soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B. M., for square timber and sawlogs of any wood except oak; from ½ to 1½ cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes sre issued for a term of twenty-one years at a rental of two cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes map be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is reduired to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence on and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) or any person who is eligible to make a homesteod entry under the provisions of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

REAL ANARCHISTS.

In another column we publish the the opinion of the Toronto Globe in reference to recent scenes of disorder on the V., V. & E. grade west of Midway. With the conclusions of the Globe, those who believe in the maintenance of law and order in this province must entirely agree. Unfortunately there is every evidence of an alliance between the Canadian Pacific Railway company and the McBride government, and consequently the C. P. R. can use every effort to establish a state of anarchy in this province without any interference on the part of the McBride government. The attorney-general is away to England to attend to some appeal cases before the privy council. Were he not so desirous of enjoying a holiday trip, his clients' interests would be better served if a good lawyer were sent over to England or one engaged there. In the meantime the Canadian Pacific railway can hire a mob and order them to attack the employees of another company who are engaged in the peaceful occupation of constructing a railway. It is interesting to watch with what vigor the C. P. R. officials wave the "old flag" when there is some monopoly to perpetuate or some new graft to exploit, and then to note how easily they can insult that flag and all it represents when they endeavor by the use of a mob to secure some advantage over a competing railway company that they could not secure by process of law. The president of the Canadian Pacific Railway company is a belted knight, one who by reason of the fact that his sovereign has been pleased to single him out as one of the most distinguished subjects, is not without some warrant when he calls upon the faithful to protect the flag and incidentally Canadian Pacific Railway monopoly in the West. But if Sir Thomas Shaugnessy is responsible for the mob; if these men were hired with his knowledge and consent to attack the laborers of an opposing railway; if he had attempted by violence, by the use of force to secure an advantage that his company could not secure from the courts of the land, then he is as much of an anarchist as the man who throws the bomb. He cannot escape responsibility by reason of the fact that he is a knight and the president of a powerful railway corporation.

With the legal aspects of the case we have nothing to do. The Canadian Pacific Railway company has now done what should have been done before the province was disgraced by actions of its officials in inciting a mob. It has applied to the courts for an injunction restraining the V., V. & E. from continuing in possession of the southwesterly portion of lot 2703, which was granted by the crown on October 16. Mr. Justice Irving granted the injunction for 14 days with liberty to move to set aside on on one day's notice

THE date lines on the Vancouver Province and the Victoria Colonist are almost as erratic as the editorial utterances of those two worthy journals. For some time we patiently read newspapers, each edition of which paraded almost every day of the week, but the limit was reached when a Colonist came with Daily, Thursday, Nov. 9th, on the outside, semi-weekly, Friday, Nov. 10th, on another page, and the balance of the date lines declared that that particular issue was for November, no day or date given. This happy-go-lucky method of dating a newspaper would naturally lead to the conclusion that the news published is equally fresh any day of the month.

THE sweeping victory of the Liberals in Alberta was anticipated. The people of the Northwest are a sensible lot and they did not want to blight the future of their young province by allowing a lot of agitators to get contro of the government. Then, too, Windjammer Bennett was leading the Conservative forces and that was an important factor in making the victory for the Liberals such a decisive one. The result in Saskatchewan is likely to prove equally favorable for the Liberals.

THE Okanagan, of Vernon, B. C., comes this week in enlarged form, J. Kennedy, fomerly of the Columbian, is the editor. The Okanagan is a newsy newspaper. In politics it will be Liberal.

A. H. McNeill. K. C., of Rossland, who is solicitor for the V.; V. & E., arrived on Saturday last and appeared for the company at the court on Monday, when Fred McLaine, land agent of the C. P. R, appeared before G Arthur Rendell, J. P. As the warrant for McLaine's arrest was defective, Mr. McNeill withdrew the charge, The V., V. & E. changed their tactics on Saturday. It was impossible to continue work on the particular section claimed by the C. P. R. without using force to drive the C. P. R. men off the ground, and as the officials of the company wanted to avoid bloodshed, extreme measures were not taken. The 400 or 500 men were transferred to another point and put to work The C. P. R. men, about 300 strong, are still guarding the right of way. Sheriff Wood of Kamloops arrived on the scene of trouble Saturday to discover that piece of land the possession of which the court has decided upon was not the scene of the present trouble, and that in any event the southern portion of Yale county is not within his jurisdiction. In all probability the lawyers will eventually succeed in discovering where they are at and have the matter adjudicated upon by the supreme court.

Sunstone, or aventurine feldspar, and shows a smooth surface, a beautiful, golden, glistening effect. This effect is due to the reflection of light from the surfaces of vast numbers of minute, tabular crystals of hematite, or goethite, enclosed in the spar in parallel position. With a magnifying glass these minute crystals show most gorgeous iridescence. Sunstone is used to some extent in jewelry, but more so in ornamental objects. It is rather a rare mineral and when in fine specimens it commands a fair value from mineral dealers or collectors.

Leckie Boots Defy the Roughest Usage

They are the staunch friend of the logger, prospector and miner and the arch enemy of the customs shoemaker.

LECKIE BOOTS can be relied upon to stand the severest strain that shoe-leather is ever put to. They never go back on a prospector or miner when far from the busy haunts of men.

How much LECKIE BOOTS will save you, we cannot say; we do know, however, that they will wear twice as long as some boots and a great deal longer than most boots.

Ask for Leckie Boots; your dealer has them, or can secure them for you.

Scissors and Paste

Under the leadership of Captain Hackett of Vancouver another expedition is being organized to go to Cocos island in search of the much sought after treasure which Bucaneer Morgan and his pirate gang are said to have hidden away there many years ago, says the Province. Vancouver and Seattle people are primarily interested in the venture, although some Victoria capital is also involved. Captain Hackett has been at the island before, having lead an expedition there some years ago, which narrowly avoided a serious clash with a rival party of treasure seekers led by a titled Englifhman. Captain Hackett claims to have the only original map showing the location of the treasure. He ascribes the failure experienced on previous expeditions as due to the fact that proper allowance was not made for topographical changes in the island caused by numerous excavations and blasts which have been put in by previous treasure-huntins parties. A seagoing schooner has already been purchased in Seattle for the expedition, and is now being fitted up in the Sound city. The date for the start has not yet been fixed, but it is announced that the party will go well equipped in the search for the pirate's gold.

A new day is opening for the Okanagan valley. Handicapped in the past by poor transportation the richness and attractions of the valley are attracting to it branches of the greatest railway systems on the continent. The C. P. R. is building in from the north, west and south, and will shortly have a network of roads in the valley. The Midway and Vernon railway is being pushed from Midway to Vernon, and it is safe to say will not end here, but will extend its feeders from Vernon as a center. The Great Northern railway is building through to the coast and will tap both the Okanagan and Similkameen valleys. Then there is no finer navigable sheet of water in the province than the Okanagan lake, which will ere long be studded with pretty homesteads and orchards on both its eastern and western shores. The subdivision of the large estates with their necessarily limited population, has been a detriment to the district in the past. Now that it pays the owners better to sell these lands than hold them, an opening is afforded for close settlement which will make this valley one of the most densely populated parts of Canada. When it is considered that one acre of land in the Okanagan valley will raise as much as ten acres to a hundred acres on the prairie, the possibilities of this section become manifest.—Vernon Okanagan.

John Hamill returned on Saturday from his trip to the lower end of Okanagan and the Boundary country. In the latter country he is quite extensively interested in real estate and in mining properties, all of which we are glad to note promise to become valuable properties. The construction of the Midway and Vernon railway will add largely to the value of his interests in the Boundary. Ten miles of the road grade is now completed, and some 200 men are engaged in pushing the the work as rapidly as possible. It is expected that all the preliminary surveys will be made and the plans of the road completed before the end of the present year, so that in the spring there will be no delay to the prosecution of the actual work of getting the grade ready for the steel. Mr. Hamill made the trip on horseback, thus securing a good view of the country, and is able to give much interesting information concerning the country to be opened by the new road.—Armstrong Advance.

Hon. A. B. Aylesworth, in one of his addresses to the electors of North York, promises to carry on to the utmost of his ability the plans and policy inaugurated by his predecessor, Sir William Mulock. The declaration by Mr. Aylesworth may be accepted as an undertaking to prosecute the movement looking to the nationalization of telegraphs and telephones. Sir William Mulock encouraged the belief that he favored the government acquisition of commercial telegraph lines and long distance telephones. He was accorded hearty support by the Liberal press all over the country and it would be most unfortunate if his retirement from the cabinet should mean the withdrawal of these important questions from the immediate consideration of parliament. Mr. Aylesworth cannot identify himself with any live political issue of greater moment than the nationalization of the telegraphs.—Nelson News.

Notwithstanding the opposition which there is in certain quarters to the readjustment of financial relations as between the provinces and the Dominion, the forthcoming conference in Ottawa is likely to result in the demands of the various provincial governments being granted. Sir Wilfrid's attitude on the general question is undoubtedly favorable. So much was foreshadowed during the recent session of parliament. It may be taken for granted that some measure of concession will be obtained. If good reason for this did not exist before, it exists now in the terms which have been granted to the new provinces, for which, apparently, if we are to judge by the elections in Alberta, their people are duly thankful.—Colonist.

Hon. A. B. Aylesworth, in his North York campaign, announces as part of his policy the abolition of the pension legislation passed last session, and it is understood this will be part of the government programme next session. We are glad to see this course being adopted. What have the Tuppers and other ex-ministers done to entitle them to pensions? Some of these ministers included in the pension list led a notorious career of graft. The legislation was ill-considered and was contrary to what the Liberal party has demanded of its representatives as the watchdogs of the public treasury. A repeal of the legislation will be heartily endorsed, and will remove a cause of dissatisfaction existing throughout the Liberal party.—Kootenay Mail.

The province of British Columbia will be in lasting disgrace if the dispute between the Canadian Pacific and the Victoria, Vancouver and Eastern railway companies over a crossing results in bloodshed. The provincial authorities have power to enforce the law and keep the peace, even when great railway corporations have each other by the throat, and if they refuse or neglect to exercise the powers with which they are invested they are unfit for their positions. The rights of the companies respectively must be determined finally by the courts or the railway commission, and the sooner they are seized of the issue the better. There is no right of private warfare in Canada.—Toronto Globe.

The first cargo of matte produced in Alaska was shipped to the Tacoma smelter a few weeks ago by J. Cuthbert Welch, at Coppermount, Prince of Wales island, Southeast Alaska. The shipment consisted of about 170 tons. More development work, preparatory to ore production on a commercial basis, has been done this year in the Ketchikan district (which includes Prince of Wales island) than ever before. As the district gives promise of proving productive to a considerable extent, the beginning made as abovementioned is worthy of record and may later be regarded as an interesting historical fact —B. C. Mining Record.

T. W. Fletcher of Armstrong reports that during the month of October he shipped thirty cars of produce and fruit from Vernon.—Armstrong Advance.

Fibrous talc, when ground, is used considerably in the manufacture of paper. When ground the fibres cause the retention of the flour talc in the paper, imparting strength and weight to it.

French chalk, the kind used as crayons by tailors, is a fine granular variety of talc. It is only found in France.

HUNTERS INTERRUPTED.

Pleasure Party from the Other Side Lose Pack Horse at Molson.

Harry Madden of Greenwood, Sherman Haynes of Midway, and "Kid" Henderson of Greenwood, three prominent young men from across the international boundary line, were visitors in Molson Thursday of last week, and thereby hangs a tale. The young men came over on horseback, carrying their baggage, consisting of a camping outfit, on a pack horse. They went home on horseback, but their baggage went by stage. To make a long story short, their pack horse was taken away from them here by J. H. McDonald, our worthy justice of the peace, not in hic official capacity, however, but because the horse belonged to him and he succeeded in convincing the trio that such was the case. The incidents pertaining to and leading up to the episode were as follows:

The young men in question had planned a hunting trip on this side of the line. They secured saddle horses and then went to a Mr. Ellis, a prominent rancher on the British side, for a pack horse. He told them to go into his corral and pick out one, which they did. When they arrived at Molson Mr. McDonald recognized the horse as one that had been gone for some time. It had strayed across the line and associated itself with Mr. Ellis' horses, and the boys, ignorant of what they were doing, had brought the estray home. Mr. McDonald clalmed the animal and put rather an abrupt termination to the hunting trip, but when the reality of the situation dawned upon the trio from across the line, they were happy in the thought that they were going home and not to the Okonogan county seat.—Molson Independent.

SCENIC RAILROAD.

In a recent article I endeavored to picture the Arrow lakes as seen today by the traveler who sails them. Since then I have had a trip over Slocan lake and made the journey from Robson to the southern end of Arrow lakes, across a range or mountains, dividing the Columbia from the Kettle rtver valley. The railway from Robson to Grand Forks is the Columbia and Western, a branch of the C. P. R. It was projected and partly built by F. A. Heinze of Montana, when he entered British Columbia ten years ago to develop the great copper resources of the province. The Columbia and Western easily ranks among the grandest scenic railroads. For 25 miles it runs along the slopes of the mighty forest-clad mountains that rise from the shores of lower Arrow lake, and during the five and twenty miles it keeps gradually rising till at last from midair the the traveler looks down and out upon the wondrous beauty of this enchanted land, One is thrilled and awe-stricken by the glorious prospects that come into one's vision as the train nears the divide upon the mountains, and when the lake disappears and nothing is in sight but forest, clouds and mountains, a feeling akin to sadness pervades the mind.

But we have little time for sadness for we are being whirled down the mountain side into the Kettle River valley and the ever-changing forest prospects with their radient autumn coloring arrest our admiration and delight. And soon Christina lake comes into view and for twenty miles we are rushed along the mountain slopes that rise above its eastern shore.

Christina lake is some 30 or 35 miles in length, and will average two or three miles in width. Its shores are mountainous, not, indeed, so lofty as those of Arrow lakes, or as precipitous and frowning as those of Slocan, but then they have a beauty and loveliness all their own, and as I gazed out upon the mountains on the western shore of Lake Christina, I really thought I had never looked at anything so resplendently beautiful. Every hill and dell and plateau and slope and mountain top was one vast mass of exquisite color. In the distance purple and gold and green and yellow and every color of the rainbow were so perfectly blended that all appeared as if some mighty artist had been at work softening and adorning till there was nothing left for art or beauty to desire. And beneath it all were the dark, dark waters of the lake, reflecting the enchanting loveliness of the woods and forests and hills and mountains above it.

The coloring is warmer here and more varied than on Arrow or Slocan lakes. Indeed, the Kettle river country is as different from the Slocan or or Kootenay country as Connecticut is from Vermont. The Kettle river drains a territory larger than Massachusets and Connecticut combined, and East and West Kootenay are co-extensive with many an empire. But there are new worlds with no great romance or traged or traged in their history. I have often said that to my seeming the Kettle river country has the loveliest sylvan and river scenery in the world. It is not like that of any other no more than is Christina lake like Loch Lomond or Killarney. There are no ivied ruins, nor ancient castles, nor venerable abbeys along the banks of the Kettle river, but in its waters are reflected cedars that were ancient when Tancred filled the world with the renown of his chivalry.

Indeed it is but now that this lovely land is awakening from its sleep of ages. It was sleeping all through the centuries when Moor and Goth were contending with the Celt and Slav for the supremacy of the old world. It was sleeping during all the long centuries that the children of men have struggled and fought and died and bled to end tyranny and wrong and give equal opportunity to all men to be free and happy and to enjoy the fruits of God's beautiful world. There is something mysterious in the beauty and wealth of riches of this country being hidden throughout all these centuries that man has troubled the earth with his presence.

P. A. O'FARRELL.

In the manufacture of barbed wire four coils of wire carried on reels are placed back of the barb machine, The wire from two spools serves to form the strands and the wire from the other two spools is used for the barb. The two strand wires which are heavier than the others are led between a pair of friction wheels and drawn to proper tension. They are then met by the two other strands, which are led in transversely one on eilher side. At stated intervals of a few inches, according to the spacing of the barbs, a pair of revolving finfiers catch the two barb wires and give them a twist around one of the strand wires and at the conclusion of the twist two pairs of shears cut the barbs diagonally, giving them the desired sharp points. The two wires pass next dowewardly around an idler and then horizontally into a combined winding and twisting frame. The frame itself revolves on a horizontal axis parallel with the machine and serves by its revolution to twist the two strands.

No Poison in Chamberlain's Cough Remedy

From Napier New Zealand, Herald two years ago the Pharmacy Board of New South Wales, Australia, had an analysis made of all the cough medicines that were sold in that market. Out of the entire list they found only one that they declared was entirely free from all poisons. This exception was Chamberlain's Cough Remedy, made by the Chamberlain Medicine Company, Des Moines, Iowa, U. S. A. The absence of all narcotics makes his remedy the safest and best that can be had; and it is with a feeling of security that any mother can give it to her little ones. Chamberlain's Cough Remedy is especially recommended by its makers for coughs, colds, croup and whooping cough. When taken in time it prevents pneumonia. This remedy is for sale by all druggists.

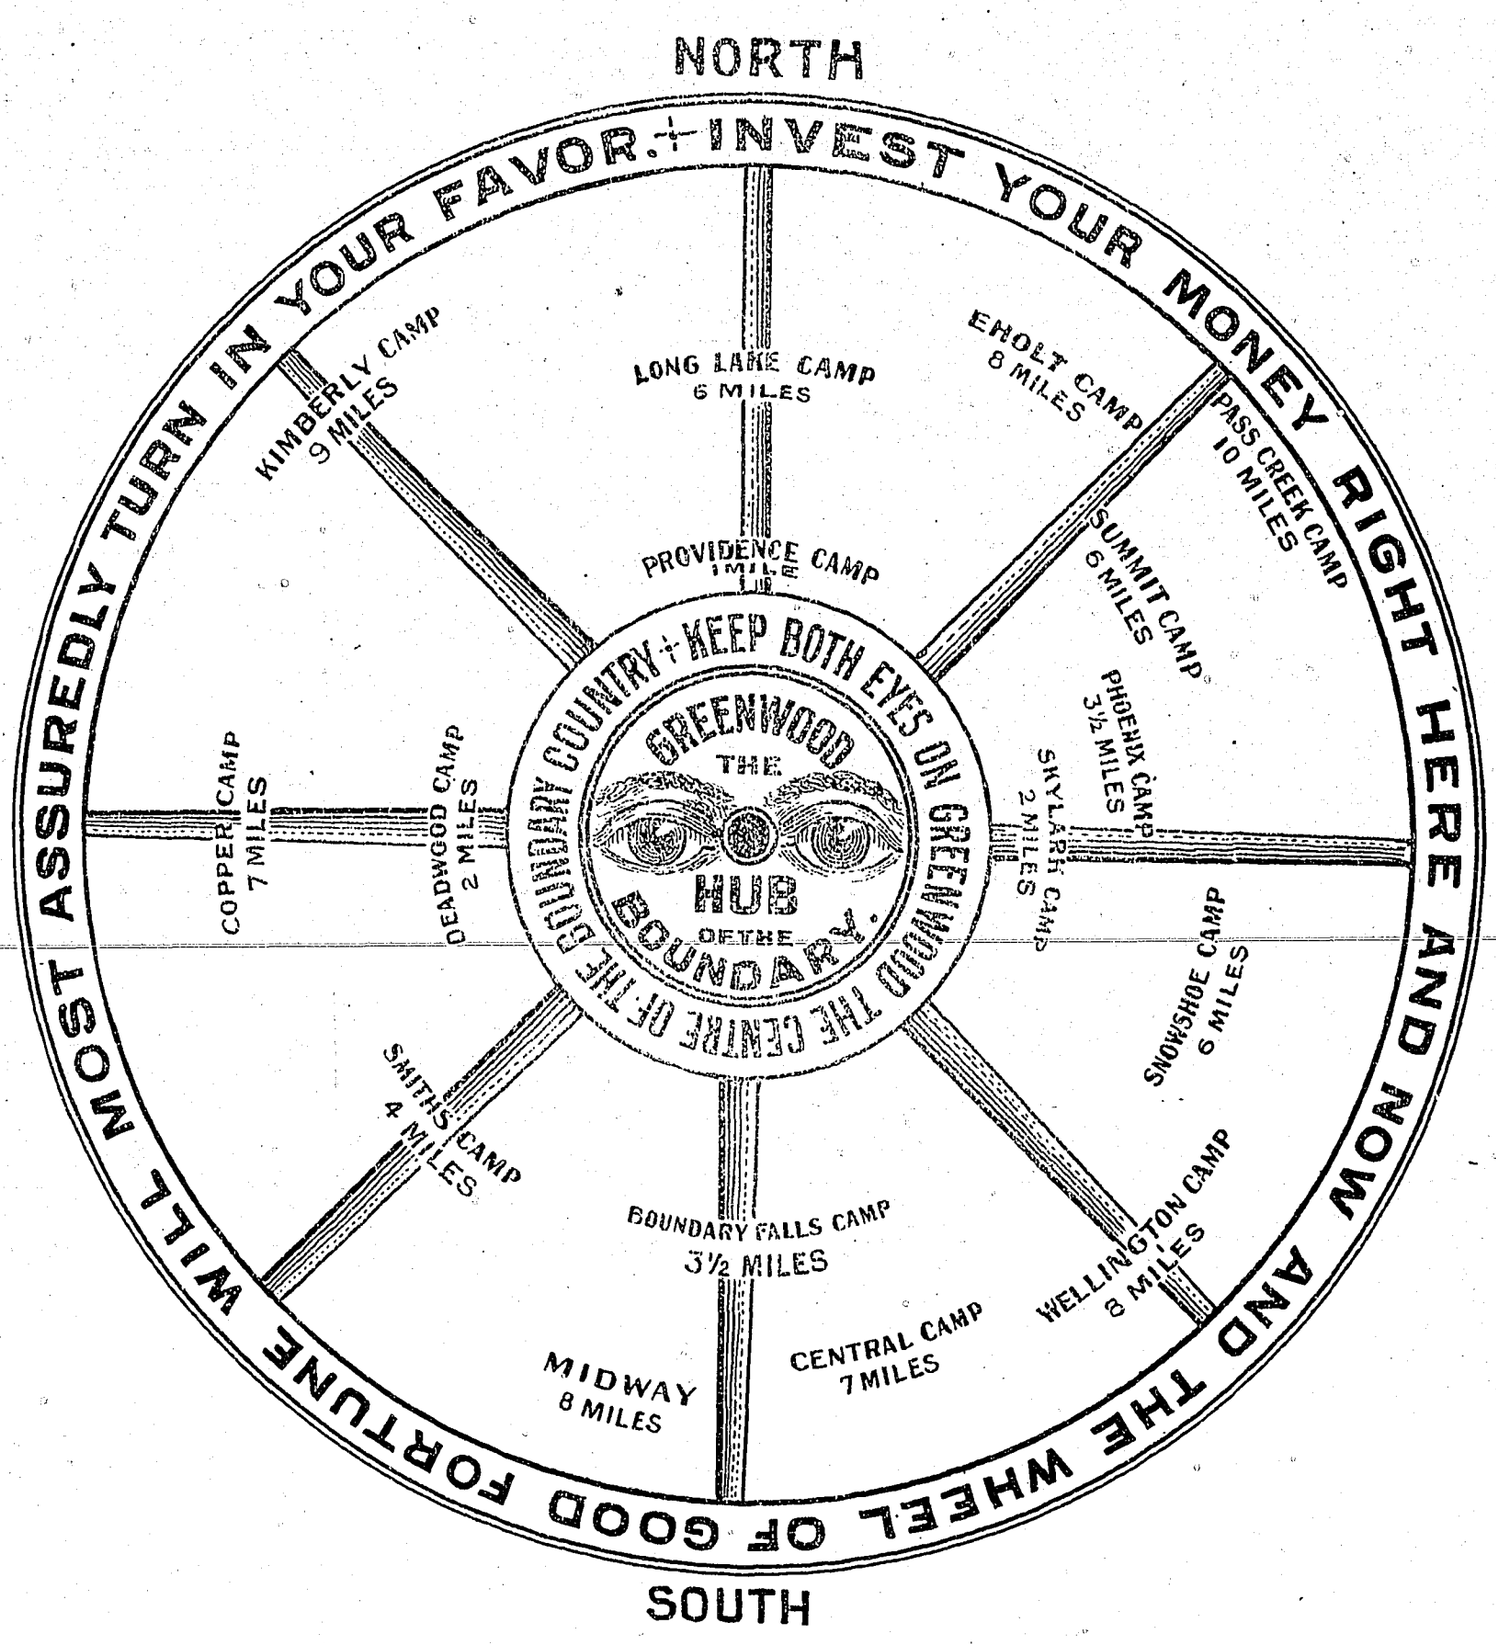
No Time Equal to the Present



Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitabl operation has made the Boundary famous as a mining centre, and every day adds more to the list of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For **NINETY DAYS** we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from $50.00 up, at terms to suit the purchaser. Make your selection and make it early.

ABOUT NEVADAH

J. D. Sword, who is on a visit to Rossland, has the following to say about Nevadah:

"The whole of Nevadah is being actively prospected as never before, by the best qualified and most energetic set of prospectors in the world. New strikes are continually being reported, Since the discovery of Tonopah and Goldfield have produced upwards of $15,000,000 in gold and silver. When it is considered that these camps have been developed without capital and that nearly two-thirds of the total wealth extracted has been taken out by leasers, the results are hopeful.

"Regarding the development in Tonopah, Goldfield and Bullfrog districts, it is not extensive. When the dryness of the mines and the softness of the rock are taken into consideration the consideration the companies and miners have been very dilatory so far as development is concerned. It appears strange to the mining men from the northern districts that a camp like Goldfield, with such phenomenally rich ore, should not have been more extensively developed than it is in the time that has elapsed since its discovery. Tonopah has been operated for four years and Goldfiield for two years, and yet there is less mining machinery in these two camps than can be found in the Le Roi mine alone.

"Those intending to go to the Nevadah gold fields with the intention of prospecting should be well supplied with funds and should not start with less than $600 or $700. One half of the money will be required to purchase a span of mules aud a light broad-tired wagon, and the balance will be required from time to time in the purchase of supplies.

"Nevadah has been particularly hospitable towards the Kootenay men who have gone there, and several of them have made large fortunes. Among these are John McKane, Dr. E. Bowes, L. L. Prtrick and C. D. Taylor. Mr. McKane, with Mr. Schwab, the steel magnate, controls the Tonopah Extension, one of the greatest mines in Tonopah. Dr. Bowes has made a large fortune from his holdings in stock and his success ful leases. L. L. Patrick is the largest individual owner in the Combination mine at Goldfield, which is paying dividends of 10 per cent. a month on $400,000, and which at present has two and a half years' dividends in sight in the mine. He also controls the National Bank mine in Bullfrog, the Roylite waterworks, local telephone and automobile lines and has interests all over the district. C. D. Taylor, formerly of Kootenay district, was fortunate enough to locate the Jumbo, Red Top, and Elorence mines, the two former of which he controls. From the Jumbo John McKane and Dr. Bowes extracted $600,000 in five months under lease."

THE WASTE DUMP.

Doubling the diameter of a pipe increases its capacity four times. Friction of water in pipes increases with the square of its velocity.

Fine silver cast into ingots weighing ordinarily a pound troy is known in China as "Sycee Silver." They are marked always with the seal of some banker or assayer as a guarantee of purity.

For a number of years John Augustus Sutter, upon whose lands gold was first discovered in California, was paid a pension of $250 a month by the State of Califarnia. He died at Washington, D. C., in 1880.

To remove rust from steel, immerse th article to be cleaned in a strong solution of cyanide of potassium, mix to the consistency of thick cream a paste of cyanide potassium, castile soap, whitening and water, and after immersion brush the steel briskly, using the paste.

To find the diameter of a driven pulley, when diameter of driver, speed of driver and speed required are known multiply the diameter of driver by its speed of revolution, divide by required speed; result will be the diameter of the driven pulley. To find the speed of a driven shaft, when the speed of driver, diameter of driver, and diameter of driven pulley are known, multiply the speed of the driver by its diameter and divide by the diameter of the driven pulley; the result will be the speed of the driven pulley. To find the diameter of driver, when the diameter of driven and speed of driver and speed of driven are known, multiply the speed of the driven pulley by it3 dismeter and divide by the speed of the driver; the result will be the diameter.

The mineral strontianite takes its name from Strontain, Scotland. It is a native strontium carbonate and its chief value is its strontium contents from which all of the strontium salts so qaluable in sugar refining and in fireworxs are derived.

Star quartz is quartz containing thin layers of some foreign substande which produce the phenomenon of asterism transverse sections of a crystal when cut en enbochon, that is in the style of a cabochon, or rounded convex on top and flat, concave or convex on the back without facets. Garnets, turquoise, moonstone, catseye and other gems are cut en cabochon. Star sapphire is a variety of the mineral corundum that exhibits a six-rayed star in transverse sections os a crystal when cut en cabochon. The finest star sappires come from Ceylon and are valued as high as gems, The star ruby is the ruby-red asteriated sapphire.

When You Have a Bad Cold

You want a remedy that will not only give quick reief but effect a permanent cure.

You want a remedy that will relieve the lungs and keep expectoration easy.

You want a remedy that will counteract any tendency toward pneumonia.

You want a remedy that is pleasant and safe to take.

Chamberlain's Cough Remedy meets all of these revuirements and for the speedy and permauent cure os bad colds stands without a peer. For sale by all druggists.

French chalk, the kind used as crayons by tailors, is a fine granular variety of talc. It is only found in France.

Boundary's Largest Power Printing Establishment

Mr. CUSTOMER:

It is contrary to the laws of nature to disregard the beautiful works of the Creator. It is also contrary to the laws of building up your own city to send East for your printing wheni t can be procured as quickly, as cheaply, and, in many instances, better, in your own town. Consider this matter carefully, and in placing your next order give the people who spend their money in your city a chance.

MR. SUBSCRIBER:

We trust that you will not overlook the litile circular sent you last week. It is a small matter to you, but a large one to us. If you have not attended to it yet, do so today. This week we have added nearly Five Hundred Dollars worth of material to our office, and to pay for it we must have what is coming to us on our Subscription List.

TOWN TOPICS

W. J. Snodgrass of Okanagan Falls is in the city.

Jas. C. Dale of Carmi is spending a week in the city.

Andy Sater left Thursday morning on a business visit to Spokane.

Oranges, bananas, eating pears, grapes, etc. at Galloway Bros.

New season's raisins, mixed peel figs, nuts, etc., at Galloway Bros.

Spencer Bennerman of Midway spent a few days in the city this week.

S. T. Larson of the Riverside hotel, Rock Creek, was in the city yesterday.

Miss Gaw of Grand Forks is the guest of Mrs. Thos. Williams this week.

Frederic Keffer has returned from a trip to the B. C. Copper companies properties in the Similkameen.

Only routine business was transacted at the regular fortnightly meeting of the city council on Monday evening.

The ladies of the Presbyterian church gave a very successful rainbow tea on Tuesday evening last.

The Rev. W. H. Barraclough, B. A., of New Westminster, will preach in the Methodist church next Sunday at 11 a. m.

W. C, Thomas, snperintendent of the Dominion Copper company's smelter, has returned from a visit to Spokane.

A. E. McNaughton, the well-known commerdial man, was in the city this week accompanied by Mrs. McNaughton.

Applications for city water are pouring in since the Lind creek system was inaugurated. The city waterworks are going to be a big revenue-producer,

Bargains this week at Rendell & Co. Ladies' ready-to wear hats, all new styles, for $3.00, regular price, $4.50. Ladies' golf coats with belt for $3.50. regular price $5.00.

Fred Hazlewood and Bob Halcrow have completed their contract of sinking to the 200-foot level on the Helen. In the last eight or ten feet very rich ore has been taken out.

Albert I. Godell, superintendent of the Northport smelter, A. G. Larson, superintendent of the Velvet mine, and R. Strang, of the Northport smelter, were visitors to the city this week.

Captain Swayne has leased the skating rink and is strengthening and repairing it preparatory to a good season of Canada's most healthful recreation. Contractor Bunting has the work in charge.

H. V. Fuller, Phil. McDonald, Alex. Curry and Fred Munn returned Wednesday night from a hunting trip on the West Fork. Most of the hunters had quit for the season, so not very many deer were offered for slaughter to the local huntsmen.

Work was resumed on the Sunset in Deadwood camp this week with Neil Morrison in charge. The Sunset is owned by the Dominion Copper company and it is probable that the smelter at Boundary Falls will shortly be be blown in, as the Sunset ore is used for flux with the ores of the compauy's mines at Phoenix

Frank I. Clark, who has been appointed literary representative of the Canadian Pacific railway, was in the city this week. Mr. Clark is an old newspaper man who has been connected with the Winnipeg and Victoria papers. He will do the work for the province which heretofore has been done by George Ham.

W. K. Esling, of Tacoma, who for the past ten years has been identified with Newspaper work in Southern British Columbia, has purchased the Rossland Miner, the oldest daily newspaper in the interior. With this change in ownership, the old Rossland Miner Printing and Publishing company ceases to exist and the paper becomes the personal property of Mr. Esling.

Hon. Richard McBride, premier, and Hon. R. F. Green, chief commissioner of lands and works, arrived in the city from Phoenix Saturday afternoon. They were accompanied by Geo. A. Fraser, M. P. P., who dispenses government patronage in the Greenwood riding. Saturday evening they met the faithful who are domiciled in Greenwood and left ond Sunday morning for the Similkameen.

An elaborately decorated colored gentleman caused a slight delay to Royer's stage yesterday morning The stage had nearly reached Government street, when the gentleman ordered the driver to stop as he had forgotten his guns. He went down town and in about ten minutes returned with a gun, several knives, and presumably a number of razors, when the stage proceeded on its journey, safe from any possibility of a holdup.

Changes of advertisements should be in this office not later than 9 o'clock Thursday morning. With an edition of eight pages and the large circulation of the Times it is necessary to print four pages Thursday afternoon in order to catch the mails on Friday. It is hoped that advertisers will bear this in mind. By bringing changes early in the week, more time is given the printer. and consequently better work, and more satisfactory results to the advertiser.

A very successful smoding concert was held in the Eagles' hall under the auspices of the Greenwood firemen on Friday evening last. D. A. Bannerman was presiding judge and he succeeded in fining nearly every one present, Policeman Red Young saw that all fines were paid. Between pipes a number of short speeches were made and songs sung. An exciting three-round boxing contest between Stowe and Paxton, and a still more exciting bout between Paxton and an unknown concluded the evening's entertainment.

One of the historic buildings of Greenwood was gutted by fire at noon Thursday. The Shonquist cabin, one of the first buildings erected on the Greenwood townsite, is now a pile of charred logs. Cap. Chappelle was moving into the cabin for winter and was cleaning up. He filled a heater with paper and other material and started a fire. The heater blew up and soon the whole interior of the building was a mass of flames. "Chap" tried to save his dog, which was tied up, and had his hair badly singed. Before the department arrived on the scene the dried logs burned fiercely and the side of the B C hotel was badly scorched. Two streams from adjoining hydrants soon quenched the flames. The cabin, the last of the first buildings erected in Greenwood, was erected by Fred Shonquist, one of the old-time prospectors in the Boundary. It was the rendezvous of the argonauts of the Boundary. The other log cabins of the pioneer days were torn down to make way for modern business blocks, but the Shonquist cabin remained in tact with its earth roof and rough log until practically destroyed by fire yesterday.

Winter Suits and Overcoats

Perfect Harmony of Style and Good Taste; an Even Balance of the Nicities That Render Our Clothing Superior.

There is harmony of taste and fashion in our garments that instantly commends them to particular men. Following the newest styles of the day, they unite the fashion, the fabric and the color in a perfect blend of good taste.

SUITS the perfect square cuts as shown in illustration and the latest for winter wear, from

$7.50 TO $20

OVERCOATS like the accompanying illustration and are quick selles, they range from

$12 TO $20

UNDERWEAR

For men who wish an extra fine garment we highly recommend the . . . . **"WOLSEY BRAND" Suits at $5.50**

Cheaper Lines and an extra good buy from $1,00 and up.
