Von Berg's method of separating and determining zinc in ores, flue dust, etc., is as follows: The ore is dissolved in hynrochloric and nitric acids, evaporated with sulphuric acid, and dilute sulphuric acid added, filtered, and washed with the same acid; to the filtrate ammonia is added almost to a neutral point, then ammonium carbonate until a permanent precipitate is obtained; this precipitate is dissolved in sulphuric acid, ammonium chloracetate and chloracetic acid are now added, the zinc precipitated by hydrogen sulphide and filtered, the washed sulphide is dissolved in hydrochloric acid and bromine, the zinc being precipitated with sodium carbonate, and weighed as the oxide. If iron, manganese or copper should be precipitated, they are determined and subtracted from the weifhed oxide.

The Dannemora iron mines of Sweden have been in continuous operation for over 300 years. They produce the finest iron ore known, the ore consisting of 86 to 90 per cent. magnetic oxide of iron and 7 to 12 per cent. silica with traces of manganese, lime, magnesia and alumina, the earthy matters being in proper proportion to form a fusible slag without further addition. It is practically free of sulphur and phosphorus. The mines extend under a lake and much damage has been caused by the water breaking through. Over 2,000,000 tons of high grade ore have been taken from these mines.

Warning to the Public.

When coming to Greenwood, if you do not wish to get first-class treatment and the best value for your money, don't stop at the National Hotel, where the rooms are well furnished, clean and large, furnace heated, dining room and bar all aline. Now under new management. TAMBLYN & CUSICK, Proprietors.

IS NOW EIGHT HOURS

Difficulty Between Men and Managers Settled

BY MUTUAL CONCESSIONS

The Eight Hour Day Is Now in Force at Both Smelters.

Both the Greenwood and Boundary Falls smelters have been closed since January 1. It was arranged some time ago that the eight hour day should be introduced at both smelters on that date. The wage scales posted by the managers of the companies did not suit the men and they did not go to work. Since then there have been several conferences between Messrs. McAllister and Keffer, representing the B. C. Copper Company, Messrs. Drummond and Thomas, representing the Dominion Copper Company, and a committee representing the Western Federation of Miners. These negotiations were carried on in the most friendly way, but unfortunately no final decision has been arrived at at the time of writing. The difficult points to adjust are those connected the industry where there are differences between the plants at the local smelters and those of smelters where the eight-hour day has been introduced without friction. The greatest difference is in connection with the sampling works. It is understood the men want the old wage scale for eight hours work. The management holds that it is a physical impossibility to do the work required in that time, and that they can not afford to put on an extra shift. They are quite willing to concede to the demands of the men as soon as such improvements are made as will make the change possible without additional heavy expense.

As a prolonged dispute would involve the mines shipping to the smelters and would result in business stagnation, there is the greatest anxiety felt and the strong hope expressed that the difficulties can be satisfactorily adjusted at an early date.

This is practically the first serious labor trouble in the Boundary. The working men are not unreasonable, they are officered by men of sound judgment, and as the companies are extremely anxious not to disturb the cordial relations which heretofore existed, the outlook for an early settlement is therefore very bright.

Yesterday evening, after a prolonged consultation with the men, the managers of the smelters conceded the eight-hour shift. There were of course slight concessions made by the men before this settlement was arrived at. Both smeltees were again started this morning.

This, it is to be hoped, settles for all time the hours of labor in the smelters of the Boundary. It will also do away with the necessity for legislative enactment on thr eight-hour question. Both managers and men are to be congratulated upon the sensible manner in which the difficulty was settled. Particulars of the agreement are not to hand, but as there was a large attendanee of members of the union, and the terms were fully discussed, the agreement will no doubt prove a permanent one.

AN AWFUL ACCIDENT

George Alexiene Gets His Foot Caught in Stirrup---Dragged for 18 Hours

FAIRVIEW, Dec. 28.—An awful accident occurred at Incameep, an Indian settlement near here, on Christmas eve. The particulars are as follows: Alexiene, a middle-aged man, left his home on Sunday at 9 in the morning and started for Incameep, distant about eight miles. He arrived at a friend's house about noon and ate dinner. At 1 o'clock he got on his horse and started down the road, presumably to visit other friends. This was the last seen of the man alive At the investigation it was learned that his saddle turned and his foot became fastened in the stirrup. The horse started for home, dragging the unfortunate man over a rough country. Nobody saw the accident, but from traces of blood in the snow, which scarcely covers the ground, it appears that the horse, after following the road for three miles, took to the mountains and wandered around all night, dragging the victim. A papoose, on Christmas norn, while going to church, about 10 o'clock saw the animal running along a fence, shying and kicking. He followed the horse and on catching up saw the body of a man horribly mutilated. He hurriedly went to a ranch near by and got help. They cornered the horse and cut the cinch loose.

The unfortnnate was so badly broken up that he was scarcely recognizable. His clothes were torn from his body and all that remained on him was a pair of shoes. One-half his head was ground off from being dragged over rocks and frozen greund and all his flesh was torn away from the bones.

The deceased kept a stopping house and stable on the Camp McKinney wagon road in the early freighting days. He was considered one of the best riders in the country and for a long period cared for the large bunch of thoroughbred horses owned by the late Judge Haynes of Osoyoos.

THE YORK LOAN CO.

The Liquidator Issues a Circular to Shareholders.

As a number of local people are interested in the York County Loan and Savings company, the following circular from the liquidator is published for their information:

"In order that shareholders of the York County Loan and Savings company may have an authoritative statement as to the present position of affairs the liquidator begs to make the following report:

"The liquidator finds upon the books of the company a substantial body of assets, which are being listed, enquired into and valued as rapidly as possible, and which consist mainly of cash on hand, colleetions still cue from the company's collectors, mortgages, stocks and bonds and house property; also a very large tract of vacant land in the City of Toronto, which is well situated and will be sold in such a manner as in the opinion of the court will produce the best results.

"The liquidator will not be able for many months to give even an approximate estimate of the return to shareholders, but at the present moment and pending further enquiry the estate promises to realize a very substantial sum.

"The company's liabilities, except to shareholders, are apparently inconsiderable, but will be definitely ascertained by the usual advertisement for creditors in due course.

"It is the liquidator's earnest desire that shareholders should not be put to any expense in the presentation of their claims. Shareholders will, therefore, send their receipt books to the liquidator, 243 Roncesvalles ave., Toronto, and receipts for same will be mailed to them. The books and correspondence affecting the claims will be filed and in due course each claim will be dealt with in the course of the liquidator's enquiry. Where the amount shown due by the receipt book is verified by the books of the company the liquidator will report the claim to the couat for approval, and notify the shareholder. Where there is any difference the liquidator will communicate with the shareholder and adjust the amount due in order that the claim may be reported to the court for approval and a contest avoided.

"Shareholders may rest assured that they will have ample opportunity of making whatever representation they desire, but owing to the great number of these interested the libuidator is at present forced to file unanswered all letters with respect to shareholders' claims. These, however, will be dealt with and answered at the proper time.

"In order that the shareholders may be kept advised of the progress of the liquidation, the liquidator will supply all available particulars to the press from time to time.

"National Trust Company, limited, liquidator, York County Loan and Savings Co."

COST OF LIVING.

The discussions incidental to the settlement of the scale of wages at the local smelter for an eight-hour day developed a line of argument which should have the serious consideration of all business men and others interested in the city. The cost of living has always to be considered in arriving at a fair basis of remuneration for services rendered. Some of the men who have been working hard foreleven or thirteen hours daily stated that notwithstanding the most rigid economy they were not able to do more than provide for their families on wages ranging from $3.50 to $4.00 per day for seven days a week, and that consequently a less rate of wages even for shorter hours would spell deficits for them unless the cost of living was reduced. The statement was made that board could not be secured here for less than $31 per month while at Trail, under similar conditions, $25 per month was the highest price paid by laboring men for board. This in itself is a difference of 20 cents a day which means much when more than a thousand men are interested. The statement was also made that local stores charged more for the necessaries of life, for clothing; in fact that everything that went to make up the aggregate cost of living was higher than at points in British Columbia where mining and smelting is being carried on under more favorable economic conditions.

We do not propose to discuss the truth of these statements, but we do know that while that feeling is abroad among the working men and their employers it is a menace to the best interests of the city.

I is also a self evident fact that if low grade mining in the Boundary is to become the success it ought to be, everything that improperly increases the cost of production and treatment must be removed.

It is the duty of the citizens of Greenwood to seriously consider these matters. The hope of the city lies in the sympathetic interests of the producers of wealth in the welfare of the town. We cannot afford that the men should continue to believe that they are not getting a square deal from the business men of Greenwood. The inevitable result would be co-operative stores and a centralization of all business around the big mining companies, a condition most detrimental to the best interests of the city.

The cost of living in Greenwood should not be higher than at Trail or Rossland or Nelson. If it is higher the sooner the people get together in an earnest effort to remedy the grievance complained of the better for Greenwood and its citizens.

The Boundary Creek Times has stated the fact again and again that if Greenwood is to become a town of importance it cannot be left to grow just as Topsy did, but must have the benefit of the eternal vigilance of her citizens. There are today abundant opportunities to advance its interests. Its Board of Trade should be resuscitated and its citizens banded together in its best intackle terests, should seriously all those problems on whose proper solution depends its future welfare.

OUR irrepressible premier, whom the Toronto Telegram cruelly describes as one who looks like forty and talks like twenty-one, has at last been muzzled. The cautious Cotton, the taciturn Tatlow and the phlegmatic Fulton got together and lassooed the curley headed Dick immediately upon his arrival in Victoria. The next morning the official organ of the government in double-leaded lines stated that the premier hadn't done it and never said it. There was no railway policy and the newspaper reporter who gave Mr. McBride's exact words was mistakea. All of which is very interesting and very gratifying. While the trusty three are to be congratulated on having temporarily tamed the premier, there is always danger that he will not remain lassooed and like his counterpart "Buster Brown," he may break into some new mischief.

Now that the holiday season is over the people will naturally turn their attention to municipal affairs. Nomination takes place the third Monday in January and election, if any, the following Thursday. At least the Municipal Act says so, but the Municipal Act of the present day is a fearful piece of blundering and gives every evidence of having had the most careful attention from Hon. Charles Wilson, attorney-general. Under the act it is mandatory for the new council to hold its first meeting at least one week before it is elected! However since the present attorney-general began advising the government, freak legislation is so common that it is no longer a matter of surprise.

WE have received from the presses of the Colonist Printing and Publishing Company, Victoria, "Mother Earth's Treasure Vaults," by Percy F. Godenrath. It contains a number of interesting articles descriptive of the Boundary, Southern Okanagan, the Similkameen and Nicola. They are written in Godenrath's well known breezy style. The book is interesting from cover to cover. The views are excellent and in many instances are different from any heretofore published. "Mother Earth's Treasure Vaults" reflects the greatest credit on the author and also on the publishers, as typographically it is a thing of beauty.

SO FAR as the City of Greenwood is concerned it is to be congratulated on the excellent work done by Mayor Naden and the council. In every possible way they have conserved its interests, husbanded its finances and carried out improvements of importance. The installation of a new system of waterworks, insuring a supply of pure water, is in itself an inestimable boon to the city. The city could do no better than re-elect Mayor Naden and those members of last year's council who are willing to give their services for another year.

BIGGER and better than ever is the holiday number of the Phoenix Pioneer which has just been issued. Unlike a number of special issues it is full of facts and figures regarding the largest and most important mining district in Canada, as well as a number of views pleasing to look upon. This edition is well worth the purchase price to those interested in the Boundary and even to those who should have a greater knowledge of the mining possibilities of the province.

THE fever situation at Phoenix is improving. There are no new cases and those who are afflicted are slowly recovering. The epidemic has been a most trying one and has been very expensive to the city. Greenwood should come to the assistance of her nearest neighbor. A vote by the city council granting financial aid would doubtless be appreciated. The opportunity to reciprocate unfortunately may come some day.

THE Victoria Colonist is needlessly alarmed over the fact that Mr. Robert Kelly visited Victoria during the meeting of Liberal members there. As Mr. Kelly did not attend the meeting nor did he discuss politics with any one present, the Colonist will surely not deny him the rather doubtful privilege of visiting Victoria

DR. MATHISON has consented to become an aldermanic candidate in the North ward. No better material could be secured. The future of the city is assured if men of Dr. Mathison's stamp can be induced to give some of their time in the city's service.

THE Cranbrook Herald and Fernie Free Press have issued splendid holiday numbers.

K. OF P. INSTALL OFFICERS.

Wednesday evening the officers of Greenwood lodge No. 29) K. of P. were installed by K. C. B. Frith, D. D. G. C., assisted by Past Chancellors P. Joiner, Chas. Dunne and L. B. Hodge. The officers are:

A. F. Thomas, C. C.
M. Anderson, V. C.
Frank Steele, Prelate.
Wm. Hamilton, M. of W.
A. D. Hallett, P. C., K. of R. S.
Chas Dunne, P. C., M. of F.
K. C. B. Frith, P. C., M. of E.
W. Muller, M. at A.
W. Rowe, I. G.
Jas. Bameron, P. C., O. G.

Messrs. Hallett, Dunne and Frith were each re-elected for the fifth term. The lodge made substantial progress during the term just closed, having added 22 names to the roster.

Locking bar water pipe is made of two semi-circular plates of metal joined together longitudinally by a channel bar of soft steel, the flanges of which are pressed into the edges of the plates until a tight joint is effected. This is the character of pipe used in supplying Coolgardie gold fields of Australia with water. The pipe is 30 inches in diameter and is over 300 miles long, water being pumped this great distance, this being necessary because of the great scarcity of water at Coolgardie and vicinity.

Applications for Special Timber Licenses

Take notice that thirty days after date we intend to apply to the Hon. Chief Commissioner of Lands and Works for a special license to cut and carry away timber on the following described lands in Osoyoos distridt:

4. Commencing at a post marked Y.-C. L. Co's north-west corner post, on the north side of the main branch of the Kettle river, east of C. P. R, Block 2704, about two miles south of L. 3637, running east 40 chains, thence south 1 chains, thence west 40 chains, thence north chains to point of commencement.

September 21st, 1905.
YALE-COLUMBIA LUMBER CO., LTD.

5. Commencing at a post marked Y.-C. L.Co's northwest corner post, on the main branch of the Kettle river, about one mile south of Block 3637, and one-half mile east of Block 2704, running east 80 chains, thence south 80 chains thence west 80 chains, thence north 80 chains to point of commencement.

September 21st, 1905.
YALE-COLUMBIA LEMBER CO., LTD.

6. Commencing at a post marked Y.-C. L.Co's northwest corner post, on the main branch of the Kettle river, about one mile east of Block 2704 and south of Block 3637, running east 80 chains, thence south 80 chains, thence west 80 chains, thence north 80 chains to point of commencement.

September 21st, 1905.
YALE-COLUMBIA LUMBER CO., LTD.

Synopsis of Regulations Governing t s Disposal of Dominion Lands within t e Railway Belt in the Province British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—

Sawnlumber, 50 cents per thousand feet B.M.

Railway ties, eight and nine feet long, 1½ and 1¾ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales

A license is issued as soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B. M., for square timber and sawlogs of any wood except oak; from ½ to 1½ cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of twenty-one years at a rental of two cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes map be made personally at the local land office for the district in which the land to be taken is situated or if the homesteader desires, he may on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is reduired to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence on and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock: and 20 head of cattle, to be actually his own prpertyo with buildings for their accommodation will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) or any person who is eligible to make a homesteod entry under the provisions Of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

"The East is East"
The West is West"

You may think you are making money by sending to an eastern firm for your clothing.

We think we can convince you that it is DOWNRIGHT ECONOMY to buy at home.

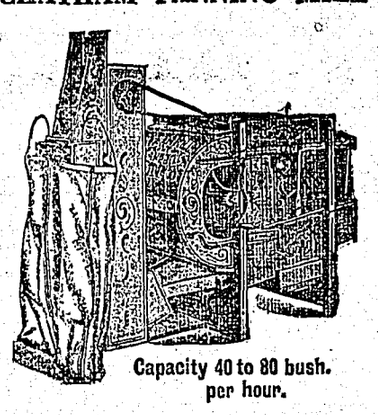
MAKE MORE MONEY

Bigger Crops of Better Grain. Clean, Large Seed Increases the Yield 20%.

It Pays to Know the Exact Weight of Everything you Buy or Sell.

Chicken raising a very easy and simple way of adding to the farm's cash profits.

CHATHAM FANNING MILL



Capacity 40 to 80 bush. per hour.

Cleans Wheat, Rye, Timothy, Clover, Millet, Oats, Barley, Flax, Peas, Beans, Corn and all seeds.
Large Hopper, Screw Feed easily regulated.
Agitator prevents clogging and distributes grain evenly on screen.
Lower Shoe keeps screens clean—no other mill has this.
End shake and adjustable side shake (three width).
Sixteen screens and riddles, grading anything from fine-seed to coarsest grain. Screens scanned—can't rust.
Saves screenings for feed.
Works easily and smoothly, combines simplicity with ingenuity.
The Chatham Fanning Mill will pay for itself over and over in one year. It is the greatest economizer and profit-builder on the farm. It insures bigger crops of better grain.
If it were not the best it would not now be in use on hundreds of thousands of farms in Canada and United States. Furnished with or without Bagging Attachment, as desired.

PRIZE AWARDS—Highest awards at World's Fair, St. Louis; Pan-American, Buffalo: World's Fair, Paris, France; Toronto, Winnipeg, Halifax, Charleston, Savannah and Jacksonville.

GUARANTEE—Every mill guaranteed for five years. Lasts a lifetime.

We send the Chatham Fanning Mill to any farmer on receipt of his order, at once, without any cash down, and the most liberal terms of payment.

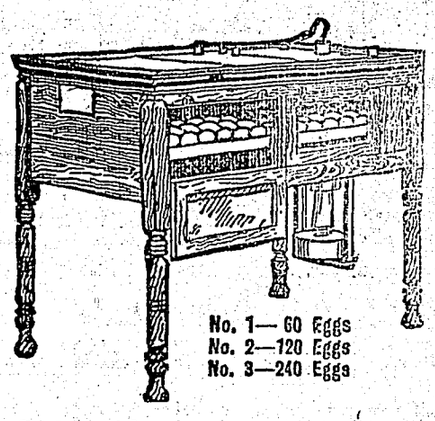
WRITE FOR PARTICULARS and Free Book. "How to Make Dollars out of Wind."

CHATHAM FARM SCALE

Three Styles — Capacity 2,000 lbs.

You need a Scale on your farm.
You need it right now—to-day.
Every day you put it off you lose money.
Suppose you sell some hogs at 5 cents a pound, and trust to your dealer's scales, which are 1/20 out. That means a loss to you of 50 cents on every 200 pound hog.
Then you sell 1000 bushels of grain at 75 cents. This dealer's scales are only 1/40 out, but your loss is $18.75 on the deal.
The loss on a few transactions of this kind would buy a dozen scales.
When crops are poor you need every cent they are worth. When they are good you can't afford to throw money away.
You need a scale on your farm at all times. The less you think you can afford it, the more you need it.
The important point is to get the right scale.
The Chatham Farm Scale is built in three styles, each one strongly and honestly built, ready to stand the roughest kind of usage.
Capacity 2,000 pounds—sufficient for all farm uses. The knife edges are of oil-tempered tool steel—practically indestructible—insuring absolute accuracy no matter how constant the use.
The Chatham Farm Scale is easily convertible into a useful truck. By moving the lever you throw the weight off the knife edges on to the solid frame of the truck. This preserves the knife edges and gives solidity to the truck. When you move the lever to throw the scale into use again it automatically adjusts itself without any trouble to you. It is the only scale made in Canada that will do this.
The Chatham Farm Scale is absolutely accurate. Before we ship a Chatham Farm Scale it is thoroughly gone over by the Government Inspector. If it is absolutely accurate he stamps each poise and balance with his official stamp and gives us a certificate of accuracy which goes with the scale.
We will ship a Chatham Farm Scale anywhere in Canada. Don't send us any money. Just send in your order and we'll send the scale as fast as the railroad can get it to you. Our terms of payment are acknowledged to be the most liberal ever offered. Ask your neighbor.
Send us your name and address on a post card and we'll mail you our booklet about the Chatham Farm Scale.
Time may mean considerable loss of money to you. Why not send the post card to-day, while you think of it?

CHATHAM INCUBATOR



No. 1—60 Eggs
No. 2—120 Eggs
No. 3—240 Eggs

Poultry raising pays.
People who tell you that there is no money in raising chicks may have tried to make money in the business by using setting hens as hatchers, and they might as well have tried to locate a gold mine in the cabbage patch. The business of a hen is—to lay eggs. As a hatcher and brooder she is outclassed. That's the business of the Chatham Incubator and Brooder, and they do it perfectly and successfully.
The poultry business, properly conducted, pays far better than any other business for the amount of time and money invested.
Thousands of poultry-raisers—men and women all over Canada and the United States—have proved to their satisfaction that it is profitable to raise chicks with the Chatham Incubator and Brooder.
The Chatham Incubator and Brooder is honestly constructed. There is no humbug about it. Every inch of material is thoroughly tested, the machine is built on right principles, the insulation is perfect, thermometer reliable, and the workmanship the best.
The Chatham Incubator and Brooder is simple as well as scientific in construction, woman or girl can operate the machine in their leisure moments.
Our proposition is this: We will ship Chatham Incubator and Brooder, freight paid, and

You Pay No Cash Until 1906 Harvest.

Send for our handsomely illustrated catalogue entitled, "How to Make Money Co."

We can supply you quickly from our distributing warehouses at Calgary, Brandon, Regina, Winnipeg, New Westminster, B.C., Halifax, Chatham. Factories at CHATHAM, ONT., and DETROIT, MICH.

The MANSON CAMPBELL Co., Limited, Dept. No. 217, CHATHAM, CANADA

J. W. Nelson, of the Pioneer, has been under the doctor's care for the past week.

E. A. Anderson of the Russell-Law-Caulfield Co. visited Spokane last week.

Mrs. E. A. Anderson returned last week after visiting a month with friends in Spokane.

It is said that work will be resumed this month on the Carmi, on the West Fork. A force of 20 men will be employed.

Owing to rush of job printing during the holidays The Times had to be neglected somewhat this week. Next issue will, we hope, be more readable.

Mrs. Duncan Ross and child left this morning to visit in Spokane and St. Paul. Mr Ross accompanied her as far as Marcus.

The Citizens' band played in the skating rink yesterday evening. The rink is the most popular resort in the city this season, doubtless owing to the excellent management of Captain Swayne.

Tamblyn & Cusick have taken over the National hotel, and will have it re arranged and fitted up to accommodate both transient and local trade.

Harry Simmons is spending the holidays with his parents, Dr. and Mrs. Simmons. He will return to the high school at Vancouver next week.

The first carnival of the season will be held at the Greenwood skating rink Tuesday, January 16. Some very handsome prizes are being offered, and the affair promises to be a huge success, as more interest is being shown this year at the rink than for several years past.

There are no new developments in the Midway & Vernon difficulty. No definite news has been received from New York by those locally interested, as to whether the indebtedness of the company will be paid, or work resumed on the road. No doubt it requires time to arrange all the details of financing the difficulties of the companp, so it is not probable that any very great activity will be apparent at least until spring.

The first carload of ore from the Rambler, on the West Fork, is being havled to Midway for shipment to the smelter. Three carloads have been mined this season. The ore will average in the neighborhood of $200 per ton in silver and lead.

The net earnings of Fraser & Chalmers, Limited, in England, for the year ending June 30, 1905, were $144,610, and $443,010 was brought forward. The directors intimate that competition for trade in South Africa has been keen, and for the first six months of the fiscal year the demand for heavy machinery was small. In the last six months business showed some improvement. A final dividend of 4 per cent. is proposed, making 12 per cent. for the year, and leaving $431,695 to be carried forward.

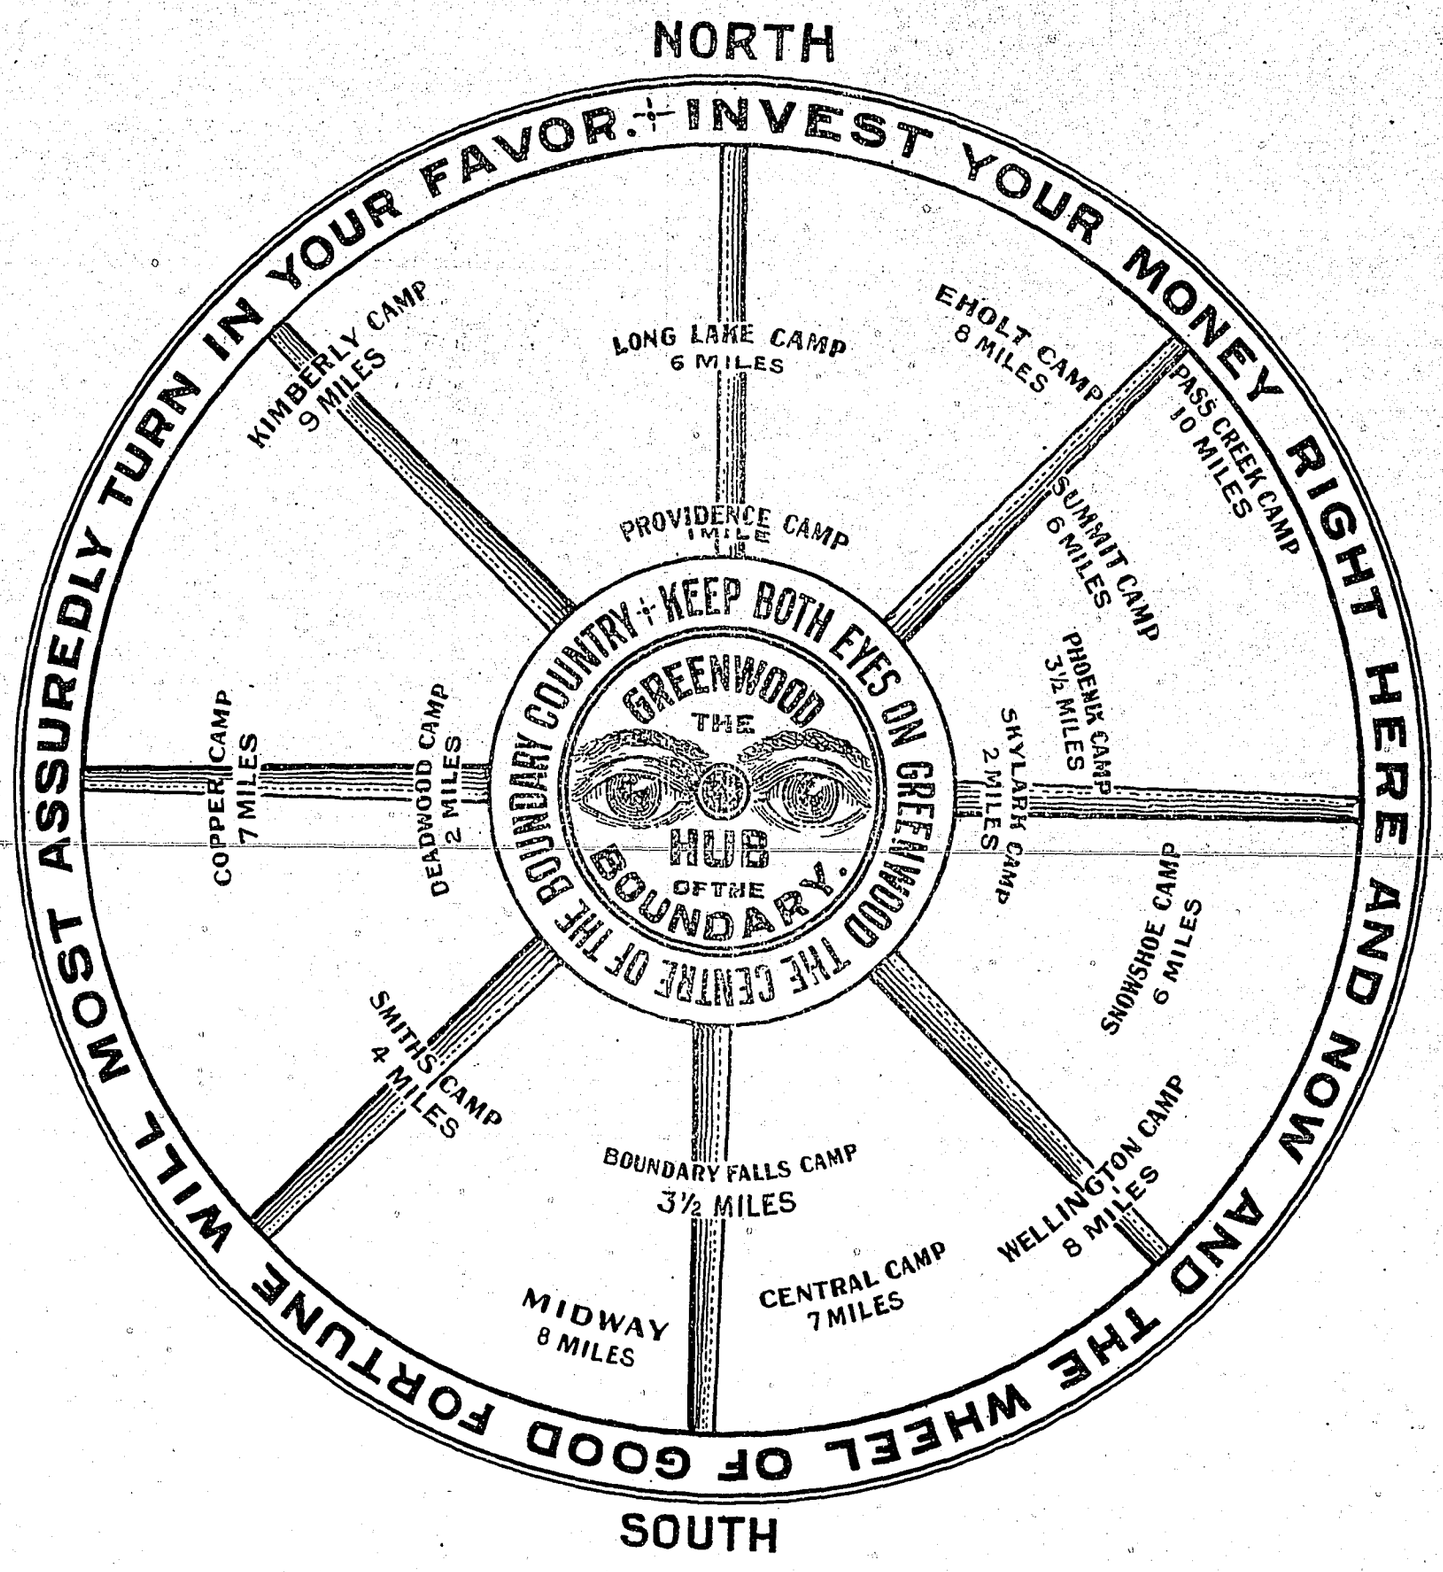
J. LECKIE CO., LTD.

VANCOUVER, B. C.

No Time Equal to the Present



Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitabl operation has made the Boundary famous as a mining centre, and every day adds more to thelist of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For NINETY DAYS we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from $50.00 up, at terms to suit the purchaser. Make your selection and make it early.

RALPM SMAILES,

AGENT FOR THE GREENWOOD TOWNSITE COMPANY.

THE WASTE DUMP.

In 1904 coal cost in Alaska from $8 to $30 per ton, according to point of consumption, the lower figure being obtained in the southeastern territory, and the higher quotation on the north shore of the Seward peninsula. At Nome when mining is active coal costs from $15 to $25 per ton; but during the closed season it often sells at $30 to $40 per ton. Besides the small production of lignite, Alaska imports annually over 123,000 tons of coal.

Steel pens were invented in 1803 by an Englishman. When first marketed they sold at $2.50 each and in sourse of ten years they had fallen to from 10 to 12 cents each. Steel pens today are mostly made by machinery, though the finer grades need considerable of hand labor in finishing. In their manufacture sheets of steel 6x18 incees are cut into narrow strips, in breadth rather more or less than twice the length of the pen. These are annealed and rolled to a required thickness. The strips then are passed where by means of a bed and pnnch corresponding, pieces the shape of the pen, called blanks, ate quickly cut out. The firm's name is then stamped upon the bit of metal. The blanks are then pierced, which is cutting out by punch the central hole in the nib, and here also the lateral slits are cut. The metal having become so hard because of rolling and stamping that it is again annealed. The blanks, merely flat bits of steel, are passed to a raising press where they are made concave by being pressed into a grove by a sinker. The next process is hardening which is accomplished by heating the pens to a red heat in an iron box or muffle and then plunging in oil. After this tempering follows and they are then scoured and cleaned by immirsion in soda water and dilute sulphuric acid successively, and by friction with sand and other solid materials. The outside of the nib is then ground upon emery wheels. Next is the most delicate operation of cutting the central split, upon the accuracy of which the real value of the pen exists. After this the pen is placed lengthwise on a chisel fixed in the bed of a hand press. A decending lever carries another chisel which passes down just clearing the other with the greatest accuracy. The pens are then colored brown or blue by heating in a aevolving metal cylinder over a charcoal stove, and removing them when the desired tint is attained. They are then varnished by lac dissolved in naptha, dried by heat and are then ready for boxing and market. Birmingham, Eng., is the center of pen manufacture and there an output of 20,000,000 pens a week is carried on the year around. Such is the consumption of pens in the United Statates that it is estimated that every inhabitant uses on the average of four pens a year. Considerable of these pens are of American make. A ton of steel will make 300,000 pens. In a year 5.000 tons of steel is manufactuaed into pens in all the world.

There are a number of electrical properties of minerals, like sulphur, the diamond and topaz, become rather strongly electric when rubbed, as with a piece of silk, and show by this their power of attracting light substances, such as bits of straw or paper. Again, the crystals of some minerals, when carefully heated or cooled, become electrified and show opposite kinds of electricity in different parts, as at the two extremities; this is particularly true of tourmaline. When both ends of a tourmaline crystal are developed it is common to find them different in their crystalline faces. This dissimilarity of structure in the opposite directions of the axis is connected with the property of becoming dissimilarly electrified by change of temperature.

Lubricating petroleum of the finest grade is found in native condition generally in the higher strata of the productive series at shallow depths; it is often associated with more or less salt water, and usually ranges from 32 to 34 degrees Baume. It is not affected so far as its fluidity is coneerned at a temperature of zero or below, and it commands the highest price of any variety of natural petroleum.

Corporation of the City of Greenwood.

PUBLIC NOTICE.

Is hereby given to the electors of the Municipality of the City of Greenwood that I require the presence of the said electors at the City Hall, Greenwood, on the 15th day of January, 1906, at 12 o'clock noon, for the purpose of electing persons to represent them in the Municipal Council as Mayor and Aldermen.

Further notice is also given that nomination for two School Trustees will be held at the same time and place and an election, if any, will take place at the same time and be under the same regulations as that for Mayor.

The more of nomination of candidates shall be as follows:

The candidates shall be nominated in writing: the writing shall be subscribed by two voters of the municipality as proposer and seconder, and shall be delivered to the Returning Officer at any time between the date of the notice and 2 p. m. of the dry of the nomination, and in the event of a poll being necessary, such poll will be opened on the 18th day of January, 1906, at the City Hall, Greenwood, of which every person is hereby required to take notice and govern himself accordingly.

After the first municipal election, the persons qualified to be nominated for and elected as the Mayor of such city shall be such persons as are male British subjects of the full age of twenty-one years, and are not disqualified under any law, and have been for the six months next preceding the day of nomination the registered owner, in the Land Registry office, of land or real property in the city of the assessed value, on the last municipal assessment roll, of one thousand dollars or more, and who are otherwise duly qualified as municipal voters:

After the first municipal election, the persons qualified to be nominated for and elected as Aldermen of such city shall be such persons as are male British subjects of the full age of twenty-one years, and are not disqualified under any law, and have been for the six months next preceding the day of nomination the registered owner, in the Land Registry office, of land or real property in the city of the assessed value, on the last municipal assessment roll, of five hundred dollars or more, and who are otherwise qualified as municipal voters.

G. B. TAYLOR,
Returning Officer.

TOWN TOPICS

Dr. Mathison, Dentist.

Mr. and Mrs. Frederic Keffer left for the East on this morning's train.

The earthquake came and went, and the Greenwood Board of Trade still sleeps.

Merchants are all satisfied with the holiday trade. It was the best for some years.

J. P. Myers-Gray has returned after spending the holidays at his old home in New Westminster.

Mrs. A. B. W. Hodges of Grand Forks and a party of friends spent New Year's in the city.

J. R. Brown, M. P. P., leaves next week for Victoria. The legislature opens on the 11th instant.

E. G. Wrrren of the Greenwood Electric company left Tuesday morning on a business trip to the coast.

Hugh Cameron of Camp McKinney was a visitor in the City during the holidays and left for home Tuesday.

Geo. S. Kellaway of Calgary left for home Tuesday last, after spending the holidays with Mr. and Mrs. R. K. Steven.

Shorter hours. Customers please note that our store closes at 8 p. m., excepting Saturdays at 10 p. m. The Thomas Drug Co.

F. D. Elkins of Winnipeg spent a couple of weeks in the city visiting his brother, F. M. Elkins, and left Saturday for the coast.

R. Rollinson of the Greenwood smelter, who held ticket No. 71, was the winner of the symphonium in the Smith & McRae drawing.

Mosher & Moore of have taken over the dining room of the Pacific hotel. This is a guarantee that the cooking and attendance will be the best.

Among the Midway people who came up to the K. of P. ball Monday night were Dr. Newcombe, Mr. and Mrs. C. M. Crouse and Mr. and Mrs. Crowell.

Monday evening next a lodge of Knights of Pythias will be instituted at Midway. Members of the order from Greenwood, Grand Forks and Phoenix will be present.

The Sacrament of the Lord's Supper will be dispensed in the Presbyterian church on Sunday, January 7, at the close of the morning service, 11 a. m. Evening service at 7:30.

Muntz's metal is an alloy of three parts of copper and two parts of zinc. It differs from common brass in being malleable when hot. Muntz's metal is usually known as yellow metal.

But few people availed themselves of the opportunity to register as householders for the municipal elections. The lists were closed at the en of the year. There are 202 voters in the South ward and 172 in the North.

J. E. McAllister, general manager of the B. C. Copper Company, has been ill since his return from New York. While there he contracted a severe cold, which necessitated his going to the hospital. He left for the west before fully recovering. He is now rapidly improving and expects to be in shape in a few days to direct the work of erecting the new smelter.

N. F. Kendall, accountant at the Bank of Montreal, left for New Westminster on Wednesday to join Mrs. Kendsll, who had been spending the holidays with friends there. They will return to Greenwood early next week.

The new year opened with a general shaking up. A distinct earthquake was felt on Tuesday morning about 6 o'clock. It shook buildings, rattled windows, drove women into hysterics and made men feel nervous. No damage was done.

When melted at a high temperature borax has the property of dissolving metallic oxides and of forming transparent colored glasses. By this means the various metallic oxides may be distinguished in the flame of the blowpipe in laboratory work.

Henry Madden has leased the Pacific hotel from his father, H. B. Madden, and will conduct it, as heretofore, in first-class style. Henry is popular aad should do a large business. The hining room has been taken over by Mosher & Moore, the well-known caterers.

Duncan McIntosh, E. G. Warren and G. A. Rendell left for Victoria this week. They are all leaders in the local Conservative party, which gives rise to the suspicion that the object of their mission is to consult with McBride regarding a successor to the late Hon. Raymond Prefontaine.

Plaster of paris is powdered gypsum. One part powdered gypsum is mixed with two and a half parts water, a thin pulp is formed, which after a time sets to a hard compact mass. By adding a small qdantity of lime to the moistened gypsum a very hard marble-like substance is obtained on setting.

The K. of P. ball Monday night was one of the most successful affairs of the kind ever held in the city. Nothing was left undone by the committee in charge to make the dance an enjoyably one. The music was good and all the arrangements perfect. An excellent supper was served by Mr. Thos. Walsh of the Kootenay hotel.

While people naturally do not expect the best service on a new line, still some improvements might be made on the Great Northern between Marcus and Midway. The only coach for passengers is about as diriy as it can be. It has also the unique feature of having only one lavatory. Considering the heavy traffic between these two points, some effort should be made to accommodate the traveling public.

H. B. Munroe, formerly of Greenwood, is now in the new mining field in New Ontario. Writing from Haileyburg, he says: "I am here to look at some property for American people. Of all the holes for whiskey drinking this is the worst I ever saw. I met Lennie, who used to be at Carmi. He is looking after the Earle interests and is doing the only good mining in the camp. He got a piece of silver out the other day which weighed 300 pounds—a nice nugget. They have over five cars of rich silver ore in their storehouse. There is nothing like this mining district in America. The mining laws here suit nobody."

L. D. Kean, a pioneer of the Boundary, was a visitor to the city this year. Mr. Kean was a member of the grm of Holbrook, Kean & Co., operating in Myers Creek. He went to the Canadian Northwest, where he has struck oil. He now makes Winnipeg his headquarters. He represents the Rocky Mountain Development Company. This was the pioneer oil company operating in the Northwest oil fields. Under the direction of John Lineham, it began prospecting four years ago, and today they have a fully equipped plant, with a flow of 300 barrels a day. Mr. Kean is very enthusiastic about the future of the new Canadian oil fields.

The Sisters of the Sacred Heart Hospital desire to express their gratitude for the many kind donations received at Christmas and New Year's from: Rev J. Bedard, James Smith, James Sullivan of Moyie, Mrs. M. Stanton, F. J. Sullivan, T. M. Gulley Co., Russell, Law & Caulfield Co., White Bros., Coles & Frith, Mr. McCreath, P. Burns & Co., Mr. Bambury, Hunter-Kendrick Co., Dr. and Mrs. Spankie, Mr. and Mrs. Portman, Mr. and Mrs. P. Dermody, Mrs. D. Bannerman, Mr. B. Petch, Mr. H. Plummer, Miss V. Schono, Princeton, Jean Coles, Mr. D. Ross, Mrs. M. Rendell, T. Williams, E. Alexander and R. Farrell; to Drs. Oppenheimer, Spankie and Foster for surgical instruments, appliances and furniture for operating room, and to the mayor and city council and other friends who sent flowers and magazines to the patients during the year

Minerals that show phosphorescence most brilliantly are probably the sulphides, such as sulphide of calcium and sulphide of barium, also the alkaline earths and carbon compounds. The diamond shows high phosphorescence when placed in darkness and the ruby and sapphire both impart a brilliant red light. Sulphate of baryta gives a bright green light; acetate of potash a brilliaet green light; rock crystal a red and then white light.

The refining of borax is held more or less as a trade secret. The materials mainly used in the different refineries are borate ore, boric acid, or crude borax, which are mixed with soda ash and sodium bicarbonate in various proportions ann boiled and allowed to crystallize.

We wish you Happy New Year.
