## Recent DRY GOODS Arrivals

It is not too early to be thinking about spring purchases. We invite you to look over our goods—to talk over the styles and correct fabrics for the coming spring and summer. We have some good things to offer.

**IRISH LINENS**

**By Importing Direct** we can offer prices that will surprise you in cotton and linen Turkish towels; real Huck, glass, crash and other towelings. A complete new range of table linens and napkins to match.

**CRUMS PRINTS**

**Every Piece New** Each and every piece is warranted fast colors, and we have no hesitation in saying they are the best.

**GINGHAMS**

A new line of apron ginghams in extra widths. Also large checks for cushions, and Zephyrs for children's dresses.

**DIMITY**

New Dimities in popular shades at 25c. Excellent for ladies' waists, children's dresses, etc.

**PONGEE SILK**
**55c, 65c and $1.00.**
**Lace to Match.**

**CURTAIN MUSLIN**
**CRETONNES**
**ART SQUARES**

**LACES AND EMBROIDERIES**

Handsome new assortment of Vallenciennes, Torchon and Clunie Laces. Our low prices will surprise you. Also Embroideries from the narrowest edging to "corset cover width."

Extra: GLOVES—Regular $1.25 and $1.50 kid at ..... 95c
CORSETS—Silk and Satin, $4.00 and $4.50 values at ..... $1.00

## The Russell-Law-Caulfield Co.

LIMITED.

**We have just received a nice assortment of**

**TRUNKS**

**FROM $6.00 TO $13.50**

Suit Cases from $3.00 to $13.50. Grips from $2.75 to $5.00, and Telescopes from 60c to $1.50.

Our range of Gent's Furnishings, Hats, Shoes, Clothing, etc. is complete and at reasonable prices.

For fancy and staple Groceries, we make it a practice to order lightly, but often, thereby assuring you that our stock is always kept fresh.

## American Shoes For Women

RICH'S FAMOUS JULIA MARLOWE SHOES

With or Without "Elastic Instep"

THE GENUINE HAVE THE NAME ON EVERY SOLE. ACCEPT NO SUBSTITUTES.

Spring and Summer Shoes

We have just received a large shipment of the famous **JULIA MARLOWE SHOES.** They fit like a glove and feel like a slipper. Any foot that is not a positive deformity can be comfortably and stylishly fitted among the many styles produced by this modern factory. We announce with great pleasure that we are the exclusive agents of this famous make of fine shoes and have in stock a variety of the best styles.

# CABINET CHANGES

### Senator Templeman Can Remain if He Pleases.

# PREMATURE PRESS REPORTS

### They Were Inspired by Ambitious Office Seekers.

OTTAWA, Feb. 5.—British Columbia dailies have been publishing Ottawa specials and commenting thereon, dealing with alleged changes in the government of Sir Wilfrid Laurier. Several B. C. members have been mentioned for preterment and new departments have been created. These dispatches were all interesting but unfortunately were not based on fact: no changes in the cabinet are at present contemplated. When British Columbia is given a portfolio it is not at all probable that the province will be given two cabinet ministers. Senator Templeman remains in the cabinet so long as he cares to do so and when a portfolio is available for B. C. he will be the minister in charge. Ambitious members who are casting longing eyes on cabinet positions and newspapers who publish dispatches to promote their interests are prolonging the time when B. C. will be given a department. Sir Wilfrid is in no hurry to make cabinet changes and make comments of cabinet position, hunters and their friendly newspaper organs show a lack of unanimity in the provinces which gives the premier an excuse to delay action.

The big lumber delegation meets the government on the 7th. A special car loaded with those interested in the industry leaves Toronto on the 6th and will arrive here on the morning of the 7th. The Ontario lumbermen are getting alarmed at the heavy importations of Georgia pine and are joining forces with the B. C. lumber men in the agitation for the duty.

The opposition is not a happy family. Hon. Geo. E. Foster who relinquishes the leadership of the party in a few days hates Andrew George Blair with a hate which has been growing since the early days of New Brunswick politics. He is determined to probe the mystery of Blair's sudden resignation-hoping to further humiliate the nice strong man in the probing. Other conservative leaders are fearful that the searchlight will be turned on because they realize that their party leaders would be connected with the great conspiracy. So the probability is that a plot to overthrow the Laurier government will not be investigated by parliament.

The Canadian Manufacturers Association are putting up a strong lobby against Ralph Smith's union-label bill. As Mr. Smith expressed it in the house, the Manufacturers' Association want protection for themselves and free trade for the rest of the world. According to this Association it is all right to protect the trade marks of the manufacturers but all wrong to protect the trade mark of the union laborer. YALE-CARIBOO.

A photograph is the product of materials, Light and Know How, and the money value may be but a trifle but its memories and associations may be priceless. There are few homes that do not contain pictures of loved ones that money could not buy. If you have not a picture of yourself, wife and family, you should have one; it is a duty you owe to your friend and yourself. The best is none too good and the time to get one is now, while you can get a first class cabinet picture from $3 to $10 per dozen, according to style and finish, at **THE STUDIO**, opposite the Windsor hotel. Crayons and water colors at bedrock prices. Call and see samples.

## MINING ACTIVITY

### Golconda, Buckhorn, Crescent And Lake to Resume Work.

Judge Hallett, as agent for the Golconda Mines, Ltd., received word this week that work on the Golconda group, Smith's camp, is to be resumed shortly. The group comprises seven claims. A quartz vein from six to ten feet wide, has been stripped on the surface for 600 feet. There is a 50-foot shaft and a 300-foot tunnel which when extended 250 feet farther will tap the vein at depth. The values are in gold and run from $12 to $30 per ton. The group can soon be made a shipper. The principal shareholders are Hon. Geo. E. Foster, Toronto, F. P. Buck, Sherbrooke, and Rufus Pope, Cookshire. J. C. Hass, M. E., was one of the original owners.

The shareholders in the Buckhorn Co., owning the Buckhorn group, Deadwood camp, will meet at Cookshire on the 22nd inst., when it is understood arrangements will be made to resume operations. The group is a high grade copper-gold proposition. Its shareholders include Messrs. Pope, and Bucke.

Judge Hallett was also advised that the Crescent and Lake mines in Skylark camp are to resume work immediately The Crescent is on a shipping basis, adjoins the Coro-Canadian, and has $3000 worth of ore on the dump. It is vested in the Chicage-B. C. Mining Co., Harry Shallenberger, of Spokane, being a large shareholder. The Lake group, west of the Crescent group, comprises the Lake, Yellowstone, Idaho, Yellowstone fraction, and Don Pedro. It has numerous workings from which high grade ore can be shipped.

## $15,000 Blaze at Phoenix

The Brooklyn and Phoenix hotels, Dominion avenue, Phoenix, were totally destroyed by fire Tuesday forenoon; loss $15,000, partially insured. At one time it appeared as if the whole block would go and also the postoffice block opposite. But volunteer hose companies kept the fire to the two hotels mentioned. Considerable loss was sustained to the Mint hotel near the Phoenix and to goods moved from the zone of the fire.

The Brooklyn hotel was owned by James Marshall and E. P. Shea, was a three story structure and cost them about $7000. They had $2000 insurance. The Phoenix hotel was owned by mayor Rumberger, now in the east, and was partially insured. It was occupied by W. L. Dunn and Mrs. S. A. McCormack, whose loss on contents, is total. J. H. Gryham has $1000 insurance on the Mint hotel.

The reserve water tanks of the Granby works were drawn on and the firemen had a hard time confining the flames to the corner where the fire started. There were some narrow escapes, as a dozen men were asleep in the burning buildings when the flames broke out at 10 o'clock. The Brooklyn hotel will be rebuilt.

### Startling But True.

People the world over were horrified on learning of the burning of a Chicago theater in which nearly six hundred people lost their lives, yet more than five times this number or over 3,000 people died from pneumonia in Chicago during the same year, with scarcely a passing notice. Every one of these cases of pneumonia resulted from a cold and could have been prevented by the timely use of Chamberlain's Cough Remedy. A great many who had every reason to fear pneumonia have warded it off by the prompt use of this remedy. The following is an instance of this sort: "Too much cannot be said in favor of Chamberlain's Cough Remedy, and especially for colds and influenza. I know that it cured my daughter, Laura, of a severe cold, and I believe saved her life when she was threatened with pneumonia."—W. D. Wilcox, Logan, New York Sold by all druggists.

It will pay you to keep Chamberlain's Colic, Cholera and Diarrhoea Remedy in your home. It only costs a quarter. Sold by all druggists.

**For Rent—Three roomed furnished house. Apply at this office.**

# PLANS FOR BIG PLANT

### B. C. Copper Co. to Increase Capacity to 1800.

# INSTALL FOUR FURNACES

### Official Statement of Frederic Keffer The General Manager.

A paragraph in our last issue stated that J. E. McAllister, superintendent of the British Columbia Copper Co's smelter, was leaving next day for New York for the purpose of conferring with the board of directors respecting the question of the enlargement of the plant.

From the company's standpoint the announcement seems to have been a little premature.

Fredric Keffer, general manager of the company, was interviewed yesterday by the Times in regard to the intentions of the board of directors.

"It is quite true, "said Mr. Keffer," that the board for some time past has been seriously considering the question of enlarging the scope of the company's smelting and mining operations. Accordingly, plans for four new furnaces with an approxmate daily capacity of 1800 tons were prepared recently.

"Representatives of various iron works were likewise invited to submit tenders for constructing and installing this proposed plant. Mr. McAllister is now enroute to New York. If the plans are adopted no doubt an official announcement will shortly be made on behalf of the board of directors. A change in the ore bins in order to facilitate the handling of the ores is also contemplated. The proposed furnaces would be of a much larger type than those now in use and it is likely that the old furnaces, two in number, would, under these circumstances, be discarded.

'In the event of the board approving the programme for enlargement, the new plant should be in operation late next fall."

## To Install Plant

Operations at the Elkhorn will be restricted pending the installation of a steam hoist, boiler and five-drill air compressor.

Ore shipments from the high grade mines this week were as follows: Last Chance, 50 tons; E. P. U, 24 tons; Combination, 6 tons. The Providence has ordered a car for a shipment of second grade ore. The ore from the Combination is said to be the richest ever shipped from this camp.

Last week's shipments were as follows:

Last Chance 59 tons, Skylark, 20 tons.

## Eagle Dance

The first annual ball under the auspices of Greenwood Aerie, Fraternal Order of Eagles at the Masonic Hall Tuesday evening, St. Valentine's proved one of the most successful and enjoyable social affairs ever held in this city. There were about eighty couples in attendance, the guests including many ladies and gentlemen from Midway. Deadwood, Boundary Falls and Phoenix. The ballroom was very artistically decorated for the occasion. To much credit cannot be given the various committees for the completeness of the arrangements. J. Ready acted as prompter, contributing much to the success of the dance. Excellent music was furnished by J. Bush's orchestra. An elegant supper was served at midnight. The Eagles as entertaining hosts, have won new laurels.

UNION LABEL

FRIDAY FEBRUARY 17, 1905

We are on the verge of a marked revival of mining activity. Just what proportions the movement will assume cannot be defined but the indications point to the employment this year of more miners than at any period for the past six years. The absence of the stock jobber and mining promoter, features so conspicuous in the old days, augur well for the future of the camp. By a natural process of evolution the exploitation of the low grade properties is being left to companies with large capital, men with smaller means finding scope for their abilities in developing the high grade quartz veins with which this camp has been especially favored. At this writing seventeen high grade propositions are being operated. This list will soon be increased, It has been known that the owners of the Gold Bug and Gold Finch were getting ready to resume work, while this week brought the pleasing intelligence that the Crescent and Lake Mines in Skylark camp will soon be shipping ore. Nor is the revival in mining confined to the high grade properties. Elsewhere we publish an announcement respecting the sale of the Winnipeg mine, and the decision of eastern boards to resume work on the Golconda group and the Buckhorn, both well known local propositions. Two other mining deals of considerable magnitude involving the investment of large outside capital, are virtually closed, but by request details are with-held until our next issue.

The recent high tribute paid the Boundary country by M. M. Johnson, the eminent mining engineer, cannot fail to arouse fresh interest in our enormous mineral resources. The name of Mr. Johnson is one that carries weight not only throughout the United States but in European investing centres. Mr. Johnson's visit here has already attracted no little attention from the financial press of the Eastern states. The Boston News Bureau, stated that his mission to the Boundary was on behalf of the Guggenheims, the virtual head of the American smelter trust. These millionaire operators, according to the same journal, have virtually acquired control of the Montreal & Boston Co., owning some of the leading copper-gold properties of this district. Hitherto the present management has met its payroll and other obligations with unfailing regularity, and is consequently held in high esteem. It is likely, however, that the transfer of the control to the Guggenheim's would lead to the adoption of a policy calculated to threaten the supremacy of the Granby and British Columbia Copper companies.

There seems to be a growing sentiment in favor of the erection of a concentrator in Greenwood for the purpose of handling the high grade ores of this camp. While none of the smaller mines would be justified in undertaking the enterprise single handed, a plan for collective action could easily be devised. We understand that the cost of erecting a plant designed to handle an output of 100 tons daily, would not exceed $25,000, and the results to be secured by concentrating the ores would soon re-coup the mine owners in the way of the saving to be effected by shipping a concentrated product. This proposed method, it is obvious, would also do away with the method now in vogue of sorting and cobbing the ores. There is an abundance of water in Boundary Creek at all seasons of the year for a plant such as is proposed. The erection of a concentrator would also tend to lead to the development of medium-grade ore bodies which cannot now be mined and shipped at a profit. It is the next natural step in the evolution of this camp, and should be taken without delay.

Financial juggling has given the McBride government a surplus of $28,000. The facts are that the net revenue of the province for the period under review was $2,638,794.68, and the net expenditure $2,862,794.09, making a deficit of over $200,000. The favorable balance claimed by the government is made by deducting from the current expenditures the sum of $470,743.30 spent on the Westminister bridge.

The Socialists have introduced a bill in the provincial legislation providing for an eight hour day for smelter employees. Premier McBride's solicitude for the third party will soon be put to the test. In a measure of such vital importance the government cannot evade the issue, but must declare its attitude. It begins to look as though the Socialistic friends of Mr. McBride have got him treed at last.

Manager McVicar of the Last Chance mine has made good his his promises to maintain a weekly output of fifty tons. Last week he actually exceeded his estimate by nine tons. This enviable record, which will be increased rather than diminished, places the Last Chance at the head of high grade producers.

Greenwood will be advertised by its failure to be represented at the meeting of the Associated Boards of Trade at Nelson next week. It is, however, not a very desirable kind of an advertisement for the leading mining centre of the interior.

"The long succession of deficits has not been broken, although in some instances the rate of taxation has been more than doubled" is the way the Victoria Times sizes up the financial statement of the McBride government.

The Winnipeg mine has never been considered a worldbeater. It will be ere long, now that the ownership has been vested in W. T. Hunter. Mr. Hunter is regarded as "lucky" because every mine he touches proves a winner.

McBride's alleged surplus is not much larger than the premier's majority.

**Chamberlain's Cough Remedy the Mother's Favorite.**

The soothing and healing properties of this remedy, its pleasant taste and prompt and permanent cures have made it a favorite with people everywhere. It is especially prized by mothers of small children, for colds, croup and whooping cough, as it always affords quick relief, and as it contains no opium or other or other harmful drug, it may be given as confidently to a baby as an adult. For sale by all druggists.

**COLUMBIA COLLEGE.**
Founded 1892 Incoporated 1893
NEW WESTMINSTER, B. C.
Provides a Christian home for students of both sexes at Modern rates. Has a preparatory class for junior students, doing grade public school work. Does high school work, confers all high school privileges, and prepares for teachers' examinations. Teaches all branches of a practical business course and gives diplomas. Gives a liberal education in its collegiate course and in the ladies' college course for M.E.L. and M.L.A. in university work. Can take students through the complete arts course and the degree of B.A. can be obtained from Toronto University with which the college is in full affiliation.
For full information and terms write Rev. W. J. Sipperell, B.A., B.D., principal; or Rev. J. P. Bowell, bursar.

## TUNNEL AND STOPE

The Boston News Bureau, a well informed financial journal contains the following: "The failure of Messrs. Munroe & Munroe, the fiscal agents in New York for the syndicate which underwrote 700,000 shares of stock of the Montreal & Boston Consolidated Mining & Smelting Co., at $1 per share has not directly involved that company. The facts are that the Munroes with their Canadian associates, had succeeded in purchasing the Dominion group of properties in Phoenix, B. C., because of a disagreement between the owners, James Breen, of Spokane, and Messrs. Mackenzie and Mann. Cash to the amount of $482,000 was to be paid for the properties, $266,000 down, and the balance, or $216,000, payable in eighteen instalment of $12,000 per month. At the same time they paid $60,000 for the Athelstan property upon which $10,000 is still due, then the underwriting syndicate, in addition to providing cash for the purchase of these properties was to place $150,000 cash in the treasury for working capital. The above would have required the raising of $700,000, which was represented by 700,000 shares of stock underwritten at $1 per share. Operations were only carried on three months last year and with one furnace there was produced 900,000 lbs of copper, 1000 ozs. of silver and 3200 ozs. of gold. Beginning with the new year, however a second furnace was placed in operation so that the company is now producing about 600,000 lbs. of copper per month, which should net it about $25,000. A third furnace is is about set up. It is planned to add a fourth furnace during the year which would permit of a monthly production of 1,200,000 lbs. of copper.

The rumors that the Socialists in the provincial legislature will insist on an eight-hour day for the smelters, are confirmed by a notice Mr. Hawthornthwait is preparing for the introduction of a bill to that effect. This measure may prove the rock upon which the McBride government will sustain defeat.

Hawthornthwaite informed your correspondent that he fully concurred in the opinion that ample time should be given employers to provide for the change contemplated in this measure.

The principal clauses of the bill are af follows:

3.—Any owner, agent, or manager, or anyone acting on their behalf employing any workmen or person in contravention of this act shall be liable to a penalty not exceeding $100, nor less than $20 for each workman or person so employed, and any workman or person working for a longer period than that specified in section 2 of this act shall be liable to a penalty not exceeding $100 nor less than $20.

4.—Twenty-four hours for the purpose of this act shall mean from midnight to midnight.

5.—This act shall come into effect on the first day of March, 1906.

### HOCKEY MATCH

The Phoenix Senior Hockey team will play the Greenwood seniors at the local rink next Monday night.

### SHOOTING RANGE

During the week a great deal of interest has been taken in the In Door Shooting Range located in the Hallett block. Good and poor shots have tried their skill and as the guns are perfectly sighted the good shots, with little practice, have made some very excellent scores, and the poor shots have greatly improved. Jack Carlin had the first high score which was beaten by J. J. Feeney with 22. H. L. Johnson, A. Logan, Austin Logan, R. Pope and Wm. G. McMynn were tie, seconds, with a score of 20, but were wiped out of second place by R. C. Longley making 21. As the paper goes to press, Feeney is still high man and Longly second. The first is a $10 cash prize and the second $2.50. The competition for the week closes at 11 o'clock sharp Saturday night.

### MINERAL ACT.

**Certificate of Improvements.**

NOTICE.

"Wallace Fractional" Mineral claim, situate in the Greenwood Mining Division of Yale District. Where located: In Graham's Camp.

**Do you want to add $320 to your income?**

It will only require a few minutes of your time every day to earn $320 a year. You can earn it with a Chatham Incubator. A No. 2 Chatham Incubator will hold from 100 to 120 eggs—according to size of eggs. Eighty chickens is a low average hatch—users of Chatham Incubators will tell you so. Chickens are always in demand, and the supply is always short, so fifty cents is the average price secured. If you only take off eight hatches in a year, that gives you an income of $320.00. Wouldn't that extra amount be useful to you? ¶ Best of all, you can buy a

**Chatham Incubator without one cent of cash until October, 1905**

The machine pays for itself many times over before that time. There couldn't be a fairer offer than this. We ship a Chatham Incubator to you at once, freight prepaid by us, and your first payment is not due until October, 1905. Write us to-day for full particulars. The Chatham Incubators and Brooders have every new improvement worth while in an incubator or brooder. The incubators are made with two walls, case within case, of dry material that has been seasoned in our lumber yards. They are built solid as a rock and will stand any amount of usage for years. The sooner you accept our offer the sooner will the Chatham Incubator be earning profits for you.

**Startling But True.**

People the world over were horrified on learning of the burning of a Chicago theater in which nearly six hundred people lost their lives, yet more than five times this number or over 3,000 people died from pneumonia in Chicago during the same year, with scarcely a passing notice. Every one of these cases of pneumonia resulted from a cold and could have been prevented by the timely use of Chamberlain's Cough Remedy. A great many who had every reason to fear pneumonia have warded it off by the prompt use of this remedy. The following is an instance of this sort: "Too much cannot be said in favor of Chamberlain's Cough Remedy, and especially for colds and influenza. I know that it cured my daughter, Laura, of a severe cold, and I believe saved her life when she was threatened with pneumonia."—W. D. Wilcox, Logan, New York Sold by all druggists.

H.B.K. BRAND

**BIG SHIRT**

Made big enough for a big man to work in with comfort. Has more material in it than any other brand of shirt in Canada. Made on the H.B.K. scale it requires 39½ to 42 yards per dozen, whereas common shirts have only 32 to 33 yards.

That's the reason why the H.B.K. "Big" Shirt never chafes the armpits, is never tight at the neck or wristbands, is always loose, full and comfortable and wears well.

Each shirt bears a tiny book that tells the whole history of the "Big" Shirt, and also contains a notarial declaration that the H.B.K. "Big" Shirt contains 39½ to 42 yards of material per dozen.

Sold at all dealers but only with this brand:—

## Comfortable Living

WITH A

## Chatham Incubator

Poultry raising with a Chatham Incubator is a very profitable and easily managed occupation. Unless you want to go into it extensively it need take but very little of your time. Government reports show that the demand for chickens in Canada is greatly in excess of the supply and Great Britain is always clamoring for more. That means a steady market and good prices for chickens.

You cannot raise chickens successfully with a setting hen. She is wasting time setting when she should be laying. While she is hatching and brooding a few chickens she could be laying five or six dozen eggs. The percentage of chickens she hatches is much less than that produced by the Chatham Incubator.

It will pay you to own a Chatham Incubator.

Chatham Incubators contain every improvement of importance in Incubator construction that has been produced. They are made of thoroughly seasoned wood, with two walls, case within case. Between these walls mineral wool is packed forming the very best insulation. Each piece of the case is mortised and grooved and screwed, making the whole as solid as a rock. Chatham Incubators are equipped with scientifically perfect regulators which are an infallible means of regulating the temperature.

## No cash to pay until October, 1905.

We will start you raising poultry for profit with a Chatham Incubator without one cent of money from you until next Fall. That means that you can take off seven or eight hatches and make considerable money out of the Incubator before the first payment becomes due.

We couldn't make this offer if we were not certain that if you accept it you will get complete satisfaction, if we were not positive that the Chatham Incubator will pay you a handsome yearly income.

This is a straightforward offer. We make it to show our supreme confidence in the Chatham Incubator. We want you to accept this offer as we are sure of the satisfaction our Incubator will give. Every machine we have put out so far has made other sales in the same neighborhood.

*Our offer is to send you a Chatham Incubator at once, freight prepaid by us without one cent of cash from you. You make your first payment in October, 1905. The balance to be paid in October, 1906, or if a Cash Buyer you get it cheaper. Could any offer be fairer or more generous?*

SMITH FALLS, ONT., November 19th, 1904.
The Incubator and Brooder that I bought from your agent, on time, I wish now to pay the whole amount this fall, if you will give me a discount. I am very much pleased with both Incubator and Brooder, and would not be without them, because I cleared this season, more than the incubator and Brooder cost me.
Yours respectfully,
MRS. W. HYSLOP.

Write us to-day for full particulars of our offer and mention this paper. Don't put it aside for another time as this special proposition may be withdrawn at any time.

**Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.**

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered coal in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.00.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator has been expended or paid, the locator may, upon having a survey made, and upon complying with the other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 ft. square; entry fee, $5 renewable yearly. On the North Saskatchewan river claims for either bar or bench the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental, $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles, within six years from such date. Rental $100 per mile for first year, and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being 1,000 to 2,000. All other placer claims shall be 200 feet square.

Claimes are marked by two legal posts, one at each end bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of mining recorder's office. One additional day allowed for each ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two 1,500 altogether, on the output of which no royalty will be charged, the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and one half per cent on the value of the gold shipped from the Yukon territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each operate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned, and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done a claim each year to the value of at least of $200.

A certificate that work has been done must be obtained each year. If not the claim shall be deemed to be abandoned and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion Lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640acres Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well and such other land as may be determined will be sold to the discoverer at the rate of $1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

# Our Mines

The glory hole at the Mountain Rose, Summit camp, is being enlarged.

The Reco has paid a dividend of $19,582, making the total paid to date $307,000.

H. Mortimer Lamb is in the ballot for the secretaryship of the Canadian Mining Institute.

The E. P. U. will ship two carloads of first class and one carload of second class ore this month.

The Cascade Power Co., is furnishing power for lighting the surface works at the Rawhide mine.

During the month of January the St. Eugene company milled 12,918 tons of crude ore and made 2,520 tons of concentrates.

The two furnaces of the Montreal & Boston smelter are now in blast and arrangements are being made to set up the third furnace.

With the St. Eugene, North Star and Sullivan mines in active operation, the silver-lead output of Southeast Kootenay, this year, will be doubled.

It is understood that the Chicago people who acquired the Nellie Cotton and Mystic group in Phoenix camp, has made arrangements to start development work in April.

During January the Boundary mines shipped 68,074 tons, a falling off as compared with December, owing to a deficiency in the power supply, due to low water in the Kettle river.

The Trail smelter continues to have all its matte converted at the local smelter. F. E. Beasley, representing the former plant, is here whilst the shipments are being converted.

The Trail smelter is finding a market for lead and silver in the Orient. The silver is absorbed by Chinese bankers, the lead being utilized by the Japs in the manufacture of bullets.

Report of Crow's Nest Pass Coal company for the year 1904, submitted to the annual meeting of the share holders yesterday afternoon showed net profits of $406,059 as compared with $310,491 in 1903.

Drifting is now in progress north and south from the 45-foot level of the Bay shaft. A large amount of free gold and tellurides continues to be encountered in the ore. A carload shipment will be made in three weeks as stoping was started Tuesday.

The year 1904 saw a record established for the export of metallic copper from the United States. The amount of copper sent to Europe in 1904 amounted to $247,500 tons, as compared with 121,697 tons for 1903, an increase of over 100 per cent.

Munroe & Munroe, the New York brokers, who underwrote the Montreal & Boston Copper Co.'s flotation, have liquidated their obligations in full, and have resumed. This will prove gratifying news to their numerous friends, who appreciate what they have done for the Boundary.

From public accounts for the period from July 1st, 1903, to June 30th, 1904, it appears the revenue obtained from the mineral tax amounted to $65,844, of which sum West Kootenay contributed $49,233.33. Free miner's certificates produced $59,854.75; mining returns in general, $108,270.50; timber leases, $116,382.50; timber royalty and licences, $289,366.93. Yale's contribution to the revenue was $178,326.

The recent shipment of 24 tons of ore from the Sally mine, West Fork of Kettle river, treated at the Trail smelter ran over 200 oz. silver, besides small gold values. At current prices the ore was worth over $120 per ton. Shipments will be maintained all winter. There are large reserves of second and third class ore on the dump that will have to await cheaper transportation. Ralph Smailes states that the Sally is now looking better than ever before in its history.

The Canadian Pacific Railway on its land at Medicine has a natural gas well which is already called the great gusher. The company's engineer at Calgary has examined the gas well and under his direction it was capped for eight minutes. During that time a rock pressure of 458 pounds was developed. This is taken to show that the new well is even a better proposition than the town's 1000-foot well, which yields one and one-eight million feet of natural gas every 24 hours.

The Bay mine was examined this week on behalf of Phoenix parties; and also for Minnesota people.

The electric engine is now hauling hot slag at the local smelter.

It is understood that W. T. Hunter, who recently purchased the Winnipeg mine, has bonded it to the Granby company.

The tunnel on the Betts and Hesperus, Hardy mountain, is in 75 feet and will shortly tap the big ore body exposed on the surface.

On Tuesday W. T. Hunter, of this city, received from Duncan McIntosh and associates $5000 cash, being the third payment on account of the purchase price of the E. P. U. mine. Two additional payments have yet to be made. It is understood that Mr. Hunter has already received one half of the purchase price, an amount that was principally derived from the ore shipments since last September when Mr. McIntosh assumed charge of the property. Mr. McIntosh secured this property on a working bond and is associated with North Dakota capitalists. The E. P. U. is now regarded as one of the best mines in the camp. It has 21 men on its payroll.

The "Boston News Bureau" makes the following interesting prediction regarding the well known Montreal and Boston Company in a recent issue:

The Guggenheim Exploration Co., will probably get the Montreal & Boston Do.

Samuel Utemeyer, as counsel for various New York Stock Exchange creditors of Munroe & Munroe, arranged a settlement whereby creditors will receive 100 cents on the dollar. The Guggenheim Exploration Co., of which company Mr. Untemeyer is general counsel, has secured an option on a large block of the stock of the Montreal & Boston Co, at $1 per share. A Guggenheim expert is now examining the properties and if he reports favorably, the option will probably be exercised.

The settlement provides for a cash payment on the part of the underwriting syndicate of $1000,000 and the deposit of 225,000 shares of Montreal & Boston stock taken at $1 per share. In addition is the Guggenheim option on the above stock and other stock in hands of the brokers, which option is good for 20 days.

With the Guggenheims in British Columbia, with the vast wealth of the Exploration Company back of them, an effort will probably be made to rival the Granby Company in copper output. The Montreal & Boston Company has good mines well equipped, and a smelter with two furnaces The Montreal & Boston troubles have been on the promotion end, not the property end.

The Combination Mining & Milling company, owning the Combination crown granted claim, at the northeast city limits of Greenwood, B. C., has secured the property back from the George K. Stocker interests, which had a bond on the property for $15,000. The bond was given by the trustees, and the stockholders subsequently declined to ratify it. Meanwhile the bonders had been actively at work and had extracted considerable ore. An arrangement has just been completed between the trustees and the bonders whereby the Stocker interests relinquish their claims for a grant of the ore extracted and certain stoping privileges in a shoot 30 feet long and about 50 feet deep. They also get about 10,000 shares of treasury stock. The bonders are preparing to ship a carload of very high grade ore already extracted.

The Combination company will now start development on its own account, under the direction of C. E. Bartholomen of Spokane, one of the directors. The capitalization of the Combination is $600,000, and there are about 80,000 shares in the treasury. A block will offered at 10 cents a share to pay for development.

The end is in sight at last at the electric power plant of the Similkameen Falls Power and Development company at Nighthawk, Wash. The work of installing this plant has stretched over two years, and while progress has been slow it has been none the less sure. A better location for a water power plant could not be found, for there is no end to the energy running to waste, and the ability of the company to furnish power is only limited to the demand. The capacity of the plant can be readily increased, and when once in operation the demand for power will grow. Like all enterprises started in this remote and hard to get at region the company has met with many set backs and drawbacks, but perseverance and energy on the part of J. M. Hagerty, the promoter, has won out in the long run. At the present time a force is pushing work as rapidly as possible in order to get out of the way of high water always due in the spring months. Mr. Andrus informs us that the excavations in the wheel pit are complete, and the forms for laying the concrete wall are built and the concrete is now going up.

### Afraid of Strong Medicines.

Many people suffer for years from rheumatic pains, and prefer to do so rather than take the strong medicines usually given for rheumatism, not knowing that quick relief from pain may be had simply by applying Chamberlain's Pain Balm and without taking any medicine internally. Rev. Amos Parker of Magnolia, North Carolina, suffered for eight years with a lame hip, due to severe rheumatic pains. He has been permanently cured by the free application of Chamberlain's Pain Balm. For sale by all druggists.

## TOWN TOPICS

Phoenix hospital treated 111 patients last year.

Grand Forks is being rid of the tin horn element.

BIRTH—On the 12th inst., the wife of W. M. Frith, of a son.

J. Stephen has been appointed Great Northern agent at Phoenix.

The Great Northern has erected a two-stall round house at Phoenix.

Mrs. R. B. Boucher has been elected president of the Hospital Ladies Aid, Phoenix.

The Greenwood skating rink will be open Sunday afternoon from 2:30 to 5 o'clock.

Rev. M. D. McKee left Monday for Nelson to attend the meeting of Kootenay Presbytery.

The Rathbone Sisters and Knights of Pythias gave a fan ball at Grand Forks on Tuesday evening.

C. A Stoess, C. E., is making surveys in connection with the extension of the irrigation system on the Covert ranch.

I. Robert Jacobs, formerly of this city but now of Montreal, will return shortly and make this his permanent home.

Frank McFarlane, the discoverer of Franklin camp, was here this week visiting his friend and partner, Dan McLaren.

J. A. Nelson, Grand Forks, was in town this week on mining business. He has large interests in Wellington camp and Hardy mountain.

The seventh annual convention of the Associated Boards of Trade of Eastern British Columbia will be held at Nelson on the 22nd inst.

J. R. Brown, M. L. A., Greenwood, has been appointed a member of the mining, railway, and private bills committees of the local legislature.

The output of East Kootenay saw mills this season is expected to reach several million feet. One firm is arranging to make three million ties.

There has recently been taken up a block of some thousands of acres in Similkameen for division into small fruit farms by Mr. Armstrong of New Westminster, who has associated with him his brother of Carberry, Man.

The officers and members of Boundary Valley Lodge, I. O. O. F., No. 38, are giving a smoker on Monday the 20th inst. All visiting brothers and their friends are extended a cordial invitation to be at the I. O. O. F. Hall at 8 o'clock.

In the legislature Mr. Brown, Greenwood, has given notice of a motion to ascertain the cause of the dismissal of Geo. Findlay, formerly road superintendent for Greenwood riding and has placed on the order paper a series of questions covering the matter.

Capt. Swayne is arranging for the opening of a first class bowling alley early in March. He has secured a two years' lease of the Russell-Hardy building, Copper street, and will go to Spokane in a few days to secure an up-to-date bowling outfit.

A Court of Revision for the purpose of hearing and determining any and all objections to the retention of any name or names on the register of voters for the Greenwood Electoral District, under the provisions of the "Provincial Elections Act," will be held here on May 1st.

P. Burns, the cattle king, is seriously ill at Ottawa.

Harry Schafer, of Grand Forks, is here looking over the camp.

Mr. and Mrs. J. L. White arrived in town Monday and will remain a week

W. H. Covert, has disposed of the remainder of his ranch and fruit farm, near Grand Forks, for $27,000. The deal includes the homestead and old orchard. Mr. Covert recently sold one half of the ranch for $25,000. Old timers will rejoice to learn that he will be able to spend the balance of his days in affluence.

The most popular "Home games" of the day: Pitt, Bunco, Flinch, Stage, Sherlock Holmes, etc., etc. For sale by Smith & McRae.

A pleasant event took place at the home of Mr. and Mrs. Stephen Johnson, Sidley, on Wednesday, Feb. 8th, when Miss Mary C. Johnston was married to Mr. Edward J. Cudworth. The marriage knot was well and securely made by the Rev. Alex. H. Cameron. A dance and supper were enjoyed by many friends of the young couple.

Geo. Findlay secured many signatures this week to a memorial asking the provincial legislature to make these amendments to the game act: define the demeaning of trout; to make the sale of trout unlawful; to prohibit the sale of blue grouse; to restrict the right of free miner's to kill game; to provide for a three year's close season for phesants and quail; to authorize fire wardens and provincial constables to act as game wardens.

Souvenir writing tablets, view of Greenwood, Copper street and both smelters. One view on every leaf. Cost no more than ordinary tablets. The very latest. Smith & McRae.

A merger of the companies owning the Kingston group adjoining the Nickel Plate mine, Camp Hedley, and the Strawberry mine, north fork of Kettle river is being effected. A. B. Clabon of Vancouver is promoting the deal.

The county court sat on Tuesday, Judge Spinks presiding. A number of minor cases were disposed of. The case of Jeffery vs the Providence Mining Co. for professional services, was adjourned to the next court when it will be heard before a jury. Hardy and Russell vs. the Russell-Law-Caulfield Co. was also postponed.

Many enthusiastic and venturesome hockey players met at the Greenwood skating rink Wednesday night. From the attitudes and styles of playing observed it was a fair inference that most of the performers would make a good showing in the ring; some think it would be advisable to have a referee next time they play. The game was getting so deeply interesting that Joe Wilmshurst had to go on the ice and stop the game before time was up. Score 5 to 5.

A scratch team of Nelson curlers played a friendly game with a local rink here on Tuesday evening. The visitors won by a score of 13 to 7. The rinks were as follows: Nelson, Nunn, Starkey, Hodge, Fox (skip); Greenwood, Bishop, Falconer, Dill, Frith (skip). The trophy was a tin cup emblematic of curling. It was resolved to play a return match here next year on the anniversary of Tuesday's match. The cup was shipped to Nelson. At the conclusion of the event the visitors were entertained to supper at the Windsor. The victory is ascribed to the presence of "mascot" Butler, of Stafford ink fame.

Mrs. J. W. Ellis left Wednesday on a visit to relatives at Wenatchee, Wash.

James Bauer, James Haverty, Olof Hearson and C. J. Lundy were admitted to full citenship at the recent sitting of the county court.

Regular section gangs are being put along the line of the Phoenix branch of the Great Northern to put the track in good condition. Last week two of these gangs, about 20 men, arrived in the Boundary to make their headquarters in Phoenix.

The Boundary Falls Sunday School was organized last Sunday by Rev. M. D. McKee The following officers were appointed: Superintendent, R W. Taylor; teachers, Mr. Heron and Mrs. Greer; organist, Miss McCurdy; sec-treas., W. W. Craig. As the attendance at the public school is increasing there should soon be a good attendance at the Sunday School which will be held in the public school at 2:30 p. m. each sabbath.

It is reported that the C. P. R. is now anxious to acquire the land subsidy for section 4 of the Columbia & Western railway This is the section which lies between Christina lake and Midway. The Subsidy Act provided that the fifth section from Midway to Vernon should be completed before the subsidy for section 4 was granted. Blocks 4593 and 4594, in Southeast Kootenay, were intended to have been given the C. P. R. in this connection, but the crown grants were afterwards cancelled. Now the company wants them renewed or some other substituted.

In the legislature, Wednesday, Premier McBride said that whilst past efforts had failed, he wished to assure the house and country that he now had under advisement plans that he believed would mature in the course of a few days which would provide for railway construction in southeast Kootenay, the Boundary district, the northern section of the province and on Vancouver island. He believed he would be able to submit to the legislature a scheme of railroad construction that would meet with the hearty approval of every member.

James Dale is down from the West Fork.

At the Goldfinch work is to be resumed in the lower tunnel. Four men will be employed.

375 feet of drifting and 140 feet of cross-cutting in the new shute of ore in the Mother Lode mine has failed to encounter any walls. The ore is said to be of excellent quality.

During the past fiscal year the monies expended by the government on local roads included the following: Greenwood-Phoenix, $905; Greenwood-Midway, $187; Greenwood-Long Lake, $75; Greenwood-Kimberley, $251; Greenwood-Copper mountain, $632; Greenwood-Eholt, $194.

It appears to be now definitely settled that the first passenger train out of Phoenix on the Great Northern, will leave on Wednesday, March 1st, a new time table having been prepared to go into effect on all Great Northern lines north of Spokane, at midnight on the 28th day of February. The train is expected to leave Phoenix about 9:30 a. m., returning about 5 p. m.

W. H. Jeffery, M. E., expects to have the Greyhound and Marguerite mining deals closed in London, Eng., this month.

The shaft on the Iron Clad, Wellington camp, is down 33 feet. Shipments will be made next spring. The claim is owned by Geo. Rumberger, W. J. Porter and J. J. Farrell.

Five men are developing the Wolfred claim, Wellington camp, owned by Lake Wolfred, of Spokane, and Capt. Rogers, of Grand Forks. A 75 foot tunnel is all in ore in the bottom of the working.

W. T. Hunter of this city, acquired the Winnipeg mine, Wellington camp at sheriff's sale last week. The property has been closed down for nearly two years, is extensively developed and has made extensive shipments of self-fluxing ore to various smelters.

DANDRUFF IS A GERM DISEASE

KILL THE DANDRUFF GERM WITH NEWBRO'S HERPICIDE

"Destroy the Cause, You Remove the Effect"

Prof. Unna, the noted dermatologist of Hamburg, Germany, was the first to discover that the underlying cause of dandruff, itching scalp and falling hair is a germ or microbe that infests the hair follicle.

Drs. Lassor and Bishop denuded a rabbit of its fur by inoculating with dandruff germs taken from a human scalp. Dr. Sabourand, a recognized authority, says, "Baldness is a contagious disease, caused by a microbe." NEWBRO'S HERPICIDE absolutely destroys this scalp microbe, thus permitting the hair to grow luxuriantly and abundantly, as nature intended.

"Destroy the Cause, You Remove the Effect."
