Whooping Cough in Jamaica.

Mr. J. Riley Bennett, a chemist of Brown's Town, Jamaica, West India Islands, writes: "I cannot speak too highly of Chamberlain's Cough Remedy. It has proved itself to be the best remedy for whooping cough, which is prevalent on this end of the globe. It has never failed to relieve in any case where I have recommended it, and grateful mothers, after using it, are daily thanking me for advising them." This remedy is for sale by all druggists.

Elkhorn Beer

Has been a favorite from it birth, as is evidenced by is popularity in all the towns of the Boundary.

For Sale at all Leading Hotels either draught or bottled.

Insist or having "ELKHORN"

MADE BY THE

Elkhorn Brewery COMPANY.

MEWS OF THE MINES.

James Donnahue and Richard Armstrong of Chicago visited Greenwood last week. Mr. Donnahue is one of the owners of the Helen and came west for the purpose of seeing the property in which he is interested. Mr. Armstrong is well known in the Boundary country, having formerly been president of the Grand Forks Townsite company, now the British American Trust company. The two gentlemen while here visited the leading mines of the district and also Phoenix camp, and left for the Portland fair on Monday morning. Mr. Armstrong is returning to Greenwood for a lengthier stay some time during the week. Mr. Donnahue is one of Chicago's leading real estate and financial agents. He loans immense sums of money on real estate security and is a wealthy and highly respected citizen of Chicago. While in B. C. both gentlemen visited the LaFrance mine in East Kootenay, situate on the east side of Kootenay lake. A visit to this mine entails a climb of 6,000 feet from the lake. It is a silver-lead proposition, in which Alexander Miller is heavily interested.

Dr. Spankie reports that in the new shaft on the Prince Henry, which is now down 50 feet a very fine vein six inches wide and carrying values of over $100 per ton has been struck. A syndicate of local capitalists has been formed, called the Prince Henry-Abercraig Development syndicate, on the assessment plan, for the purpose of purchasing and developing the two claims under bond, the Prince Henry and the Abercraig. The outlook is most encouraging.

The Phoenix syndicate which has the Mavis under bond has sunk a shaft 25 feet deep on the main lead, which, judging from the character of the ore, is the Bay lead. At the bottom of the shaft 14 to 18 inches of rich free-gold ore is exposed. The bonding syndicate now purpose pushing the work with all dispatch and developing the property as rapidly as possible.

Though there is every evidence of the proximity of the veins in both the Freemont and the Strathmore up to the time of going to press, neither vein has been reached. On the Fremont two men ran a 25-foot open cut and a 60-foot tunnel through dirt, timbered and complete, in 27 days.

The latest ore struck in the Helen mine is the finest so far found in this most promising property. The vein is solidly mineralized and the ore assays well above the profitable mark. Two carloads are now ready for shipment.

D. M. Curry, one of the original bonders of the Duncan mine on Wallace mountain, West Fork district, arrived in Greenwood Tuesday evening last, suffering from a badly sprained side. He is at present under a p ysician's care and progressing favorably. It is the intention of some of those interested with Messrs. Currie and Henderson in the bond to go up the West Fork tomorrow and return on Monday or Tuesday next.

On the Goldfinch, Wm. Madden, who is superintending the development work on behalf of his uncle, Mark F. Madden of Chicago, has been steadily prospecting the main lead and has now started a tunnel about half way up between the creek and the old workings. Good values have been obtained from the surface at this spot.

E. Levy, manager of the Le Roi No. 2, limited, Rossland, came to Greenwood Wednesday. As his company admit having an option on the Jewel mine at Long lake, and as Mr. Wright, the cashier of the Jewel company, is also in Greenwood from London, Eng., it seems fairly safe to surmise that Josie people have decided to purchase the property. It is a well known fact that they have had the mine unwatered and thoroughly sampled and that the pumps have been kept going to keep the mine clear of water unti such time as Mr. Levy's company decided whether to purchase or not. About two months ago an option was taken on a half interest on the Denero Grande As the papers for this deal were drawn up at Rossland it was thought at that time that something would soon be doing at the Jewel property. Should this deal go through it will mean a great deal to Greenwood. The Le Roi No. 2 is an English company, well financed and managed, and and is one of the very few companies doing business in Rossland camp which has paid profits. Until quite recently the ore from the Josie has been treated at the B. C. Copper company's smelter here.

During the first three months of this year the management of the E P U shipped ore which netted $7,500. Since the beginning of April practically no shipping has been done, but the whole of the large staff employed has been engaged in development work on the 160-foot level. Drifts have been run north and south on the vein for about eighty feet in each direction and the property never looked better than today. Considerable improvements are contemplated in the tramway, which will reduce the cost of handling the ore. The mine is equipped with a boiler and a Jenckes hoist, and early this year electric light was installed both on the surface and below. Two electric blowers have also been added, one for the blacksmith shop and the other for ventilating the mine. It is expected that as soon as the tramway improvements have been completed active shipping will be resumed.

ITEMS FROM EHOLT.

School closed on Friday last for the term: A number of parents visited the school in the afternoon to see the closing exercises.

On Monday evening the children's concert was held in the opera house, followed by a dance. The concert was a success, as the children all performed their parts exceptionally well. Miss Wells of Grand Forks assisted and gave a solo, as also did Miss Vina Luce.

Miss Dorman left for her home on Tuesday and will shortly go to the Territories with her sister, Miss Ida, to spend the greater part of the holidays.

Julius Black, our genial townsman and proprietor of the Columbia, is leaving Eholt to take up his residence in Midway. Success, Bro. Black!

The picnic on Wednesday was well attended and with the exception of a few stiff joints the next day passed off very well.

Howard Guest left for the coast on Wednesday to try his fortunes and see what the gods send him there.

BOUNDARY FALLS SCHOOL.

Last Friday a very pleasant and profitable event took place in the closing exercises of of the Boundary Falls public school, which reflected great credit on the teacher, Mr. Pope; the trustees, all of whom were present; the parents, and the children in the community. After the examinations were over a good programme of music and recitations, under the supervision of Mrs. Phillips as instructor and Miss McCurdy as organist, was rendered by the scholars who acquitted themselves admirably.

The programme was concluded by serving all present with delicious icecream, cake and lemonade, furnished by the ladies.

Mr. Pope has gone to the coast for his holidays.

A Safe Cough Remedy for Children

In buying a cough medicine for children never be afraid to buy Chamberlain's Cough Remedy. There is no danger from it and relief is always sure to follow. It is especially valuable for colds, croup and whooping cough. For sale by all druggists.

In the upper cretaceous deposits at White Cliffs, New South Wales, two skeletons of plesiosaurian reptiles have been found, both of which were completely opalized, like the tree trunks round in Arizona and other western localities. In the first example of these jeweled monsters that was unearthed the color was very rich and striking; the second was less brilliant of hue, and precious opal occurred only here and there in the specimen, especially in the transverse processes of the neck. The plesiosaurs are an extinct race of very long-necked creatures which swam in ancient seas,

FRIDAY JUNE 30, 1905

AT the rate justices of the peace are being manufactured by the government the best people of the province will soon all be bonded, and there will be difficulty in filling the possitions of provincial constables, pound-keepers, and sewage experts. It would be advisable to save a few of the "best" for any odd jobs that might turn up requiring neither experience nor intelligence.

THE Providence Mining company is being well advertised these days, both locally and outside. The trouble is one that will right itself in time. Outside of local sympathy with local stockholders and the very natural desire to see one's friends come out on top, there is no feeling here. The mine is being worked and has more ore blocked out than at any previous period in its history. The difficulties of the directors will be settled next week in court, and no matter which side wins the mine is too rich and has too much ore in sight for a close-down.

AT last the V., V. & E. bill has passed the most important stage in its progress. Judging from the opposition the bill received in committee it is doubtful if it can be carried through both houses. The Western members are putting up a strong fight, and as it is their constituents who are alone interested in its passage, this may have weight with members and senators who are not interested in either road. It is not probable that the bill will become a party measure, for where large railway corporations are interested party lines are easily obliterated. At least this has been the rule heretofore, but the present parliament and senate may be the exception. The passage of the bill means so much to the Boundary and the territory west of here that party bias has become a secondary consideration. The railroad is needed in the development of the country. Its construction means increased business and larger mining operations—more money in circulation. The party that puts money in the pockets of the electors stands a good show of getting their votes.

THE WASTE DUMP.

In the southeast Missouri lead district a concentrating plant capable of handling ten tons an hour costs from $25,000 to $35,000.

The placer mines of British Columbia produced last year $1,115,300 in gold, an increase of about 5 per cent over the preceding year.

There are certain mining processes to which electricity can be applied directly, such as hoisting, tramming and pumping; but breaking ore by electricity is still an experiment.

In New Zealand last year the average weekly earnings of some 100 gold dredges was about $450, a satisfactory figure, when one considers the small initial capital required and the low working cost.

The consensus of opinion among geologists is that the Yukon placers are concentrated from older, possibly Paleozoic, veins, while a smaller part is derived from veins of the same age as those of the principal California belt.

It costs about 7½ cents for each 1,000 gallons of water raised 1,000 feet by the more modern large station pumps in the Leadville district, Colorada. Some time ago it was shown that for every ton of ore mined about thirty tons of water were pumped from an average depth of 800 feet.

[illegible] it the loss at the [illegible] lead bullion containing [illegible] is far greater than that of any possible loss in roasting furnaces. It is also claimed by the roasting process 98 per cent of the gold is recovered in Western Australia at a cost of not more than $5 a ton, whereas the cost of smelting is not less than $22.50 a ton for the recovery of not under 94.2 per cent.

WEST FORK DISTRICT

The following write-up of the West Fork country is by Geo. E. Winkler, formerly of Greenwood, and apeared in the June number of the Mining Record:

Since the palmy days of the Slocan, when rich veins of silver ores made many of their owners wealthy without the aid or interventiou of the capitalist, there has probably been no camp discovered in British Columbia offering inducements for profitable mining to men of moderate means or companies with limited capital, comparable to those presented by several camps on the West Fork of Kettle river.

Unfortunately, five or six years ago, at the time this part of the Boundary district was attracting most attention, it was seriously hampered by lack of roads, so that to visit it a journey of more than fifty miles by road and trail from Midway, the western terminus of the Columbia and Western railway, or thirty miles by trail from Penticton, on Okanagan lake, was necessary. It can readily be imagined, under such circumstances, with what difficulties the shipping of ore and the bringing in of necessary supplies and machinery were attended.

An agitation for the construction of a wagon road, to give access from the district to the Boundary smelters, was started in 1900 and resulted in the securing of a government appropriation of $8,000 for the purpose, this sum having been estimated as sufficient for the work. Owing partially to bad management, however, this amount was found to be totally inadequate, for most of the appropriation was spent in the construction of two or three bridges. A long, disheartening struggle for further aid resulted finally in the provision of sufficient money for the completion, about a year and a half ago of the road, at a total cost of about $31,000

The first known discovery of mineral in the West Fork district was made by two prospectors from Kelowna, named Morgan and White, who in the late eighties or early nineties found and located what is now the Arlington claim. After having done three assessments they allowed it to lapse and it was relocated in 1895 by P. Helstab and Jas. Lynch, who later sold it to A. E. Bielenberg for $2,000. The Arlington vein is between 3 and 3½ feet wide, of white quartz, and carries iron and copper pyrites with a little galena. About thirty tons of ore have been taken out in prospecting the vein, which is said to assay well in gold, copper and silver.

The second location in the district was the Highland Chief, made in 1895 by three trappers, Farrell, Jordan and Dore, on a quartz vein 12 to 15 feet wide, averaging $11 in gold. This property is situated on the east side of Beaver creek, a few miles from where it flows into the West Fork of Kettle river. A crosscut tunnel has been driven 130 feet to cut the vein at depth but has not yet reached the ore.

The first location attracted very little attention. The real awakening of the district may be said to date from the discovery by Jas. C. Dale, in 1896, of the Carmi, on the west side of the river, about six miles north of the mouth of Beaver creek. The Carmi lead is of white quartz, with an average width of about four feet and is strongly mineralized with iron pyrites, the other minerals visible in small quantities being galena, blende and copper pyrites. The highest assay was obtained from a sample of oxydized surface ore which ran $350.50 in gold and 66 ounces in silver. The massive iron pyrites as a rule gives assay values of from $45 to $65 a ton. A shipment of 885 tons of ore to the Greeenwood smelter during the winter of 1900-1 gave gross returns of about $23,000, or $26 per ton. The cost of shipping and treating the ore, which had to be hauled about fifty miles to the railway at Midway, is roughly estimated at $16 per ton.

Adjoining the Carmi on the west is the Butcher Boy, owned by Stanhope and Kerr, on which a continuation of the Carmi lead is found.

Two miles west of the Carmi are situated the Rossland and Trail claims, owned by English, Scully and Gannon. A 60-foot crosscut tunnel strikes a 20-inch quartz lead at a depth of 40 feet. Values are copper, silver and gold.

Across the river from the Carmi, on the Observatory, owned by Jas. C. Dale, an 80-foot tunnel has been driven in an endeavor to trace a small vein carrying iron, galena and chlorides of silver and assaying as high as 300 ounces in silver to the ton.

Southwest of the Carmi, at the head of Cranberry creek, in a contact between schist and granite, the Aberdeen claim has been located on a small veiu which carries iron, galena, zinc and bromide of silver, assays running $60 to $600 in silver,

While in course of time and with further development, some of the less known camps on the West Fork may come into prominent notice, it must be generally admitted that at present Wallace mountain is the banner camp of the district, both in regard to the number and grade of gold and silver bearing leads. The mountain is near the junction of Beaver creek with the West Fork, on the east side of the river, and until recently was reached by a three-mile trail from Beaverdell. Within the last few weeks the owners of the Sally mine have built a wagon road from their property to the main road at Beaverdell. Like many others of the high-grade mines showing up so well in the Boundary district, the Sally belongs to a local company. This one is known as the Vancouver and Boundary Creek Mining and Development company, and was organized some years ago by Robert Wood. The development of the Sally to its present satisfactory condition is generally credited to Clement Vacher, the superintendent, who, owing to the disturbances that have occurred since the forming of the veins, has had much trouble in following the ore. The faults vary from a foot or two to 40 and 50 feet, but as depth is attained they become less frequent. If the ore faulted but the one way the problem of tracing it would be simplified, but with slips both to north and south it can be understood that the initial stages of development have been attended with great difficulties. By studying the ground carefully, however, and noting the grooves along the slip and the "drag" left by the ore when moving, Mr. Vacher seems able to tell almost the exact location of the vein and to follow it with the slightest possible loss of time and labor.

The Sally group was located in 1897 by Feltoe and Stewart, who sold to the present owners. No less than nine or ten distinct leads are found on the group, varying in width from 10 or 12 inches to 4 and 5 feet, and carrying high silver values wherever prospected at depth. The silver occurs in a variety of forms and is associated in the quartz with iron pyrites and blende. Some beautiful specimens of native silver are found, and handsome samples of galena are often met with. Specimens of the ore taken out show tetrahedrite, argentite, ruby and brittle silver, black sulphides of silver and silver chlorides. As the veins run up and down hill they have been developed mainly by tunnels. No. 1 vein has 382 feet of work done on it. A parallel vein as short distance to the south, known as No. 2, shows larger and richer on the surface than No. 1, and assays from 400 to 940 ounces in silver at various places along the outcrop. When developed this vein should make the Sally rank with the richest silver mines discovered in British Columbia. The greatest depth reached has been on the No. 1 vein, the distance between the surface and the floor of the tunnel, which has been driven 234 feet, being 148 feet. The vein shows a steady improvement both in size and quality, a large increase in the native silver being noted in the ore now being mined as compared with that taken from near the surface.

The Sally is at an elevation of 4,350 feet above sea level and is nearly 2,000 feet above the valley of the West Fork. Substantial log bunk houses, a blacksmith shop, office, and ore sheds have been constructed near the entrance to the workings on No. 1 vein.

Northeast of the Sally is the Bell, owned by Ralph Smailes et al. The Bell has the distinction of being the first claim located on Wallace mountain. Three veins of quartz, showing iron pyrites, blende and galena, have been prospected by two tunnels, a 70-foot shaft and several open cuts.

East of the Bell are the Washington and Idaho claims, belonging to a stock company. These were located on two parallel leads occurring in contact with an eruptive dyke, the strike of which is north and south. Several shafts have been sunk, and considerable open-cutting done on these properties.

On the Black Diamond, belonging to E. P. Kennedy and Jos. Devlin, a 49-foot shaft has been sunk, following the vein for 23 feet. Four leads have been exposed and some good assays obtained. In the same neighborhood the Gold Rock, owned by T. Murry, has a 2-foot vein, showing gray copper and galena, which assays as high as $287 to the ton. Down the hill from the Black Diamond is the Standard Fraction. The lead on this claim has been prospected with a 94-foot tunnel and a number of open cuts.

On the Rambler, adjoining on the West, and belonging to Rambo, Nelson and Finucane, a shaft has been sunk 85 feet, from which a drift has been run 106 feet to the south to catch the vein where it had faulted.

On the Bounty, owned by the Stratford Mining company, a 90-foot shaft has been sunk and 100 feet of tunneling done.

Adjoining the Sally group is the Duncan, owned by Robert Wood and others, and now under bond.

AUSTRALIANS INTERESTED.

According to information received by Manager Keary preparations are now going on in various parts of the Australia for a big exhibit of that country's resources to be made at the Dominion fair which opens in Westminster on September 27, D. H. Ross, who is Canadian commercial agent for Victoria, Tasmania and South and Western Australia, took the matter up some time ago with the various chambers of commerce and has worked the proposition into an undertaking which has been entered into with general enthusiasm. The people of Australia realize, Mr. Ross says, that the holding of the Dominion fair in New Westminster opens to them a great opportunity to develop trade with British Columbia and they will improve it by making an elaborate display of such of their products as are marketable in this part of the empire.

The production of platinum last year in British Columbia amounted to 35 ounces, valued at $12 an ounce. This was recovered from the sluice boxes in washing for placer gold. There has been no platinum found "in place" in British Columbia, although its occurrence is widespread in the gravel of the placer gold deposits throughout the province.

Sprained Ankle, Stiff Neck, Lame Shoulder.

These are three common ailments for which Chamberlain's Pain Balm is especially valuable. If promptly applied it will save you time, money and suffering when troubled with any one of these ailments. For sale by all druggists.

MUNICIPAL OWNERSHIP

That so far from being a blessing wherever introduced, public ownership would be a gigantic curse in the United States is the revised opinion which Mr. James Dalrymple is taking back with him to Glasgow. The Scottish engineer who came out to Chicago to give the corporation of that city advice on the organization of its street railways as a municipal undertaking brought with him a profound conviction that the Glasgow way of doing these things was the best way possible. He probably still thinks it is—for Glasgow, but he is absolutely convinced that it is not for Chicago and still less for Philadelphia. With north country bluntness, he gives his reasons very directly:

"To put street railroads, gas works, telephone companies, etc., under municipal ownership," he says, "would be to create a political machine in every large city that would be simply impregnable. These political machines are already strong enough, with their control of policemen, firemen and other office holders. If in addition to this they control the thousands of men employed in the great public utility corporations, the political machines would have a power that could not be overthrown. I came to this country a believer in public ownership. What I have seen here, and I have studied the situation carefully, makes me realize that private ownership under proper conditions is far better for the citizens of American cities."

Mr. Dalrymple will find that a great many people in the United States agree with him. Indeed we are not sure that he has not, without possibly in the least intending it, said a very popular thing. Nevertheless, the statements quoted above form an in-indictment of the people of the United States, which if recognized as true, should be received by them with shame and sorrow. They constitute a charge that the citizens of the republic have not yet learned to govern themselves, that, in point of fact, they have failed under tests which are but the alphabet of municipal ownership to the Glaswegians and to the inhabitants of many another old-world city.

Mr. Dalrymple must have felt some diffidence in telling his hosts that they had been weighed in the balance and found wanting. He has not, however, plumbed the depths of American complacency if he imagines that what he has said will give the least offence. The United States are still expiating a fault pointed out by one of the most distinguished of French scholars in the last century by their "intellectual mediocrity and their superficial spirit," and it is to be feared that the principal use which the criticism of their visitor will serve will be that of giving the newspaper paragraphist a new subject on which to exercise his wit. That this people will heed, that they will understand or attempt to understand the deep things which concern their peace and which are to be found in the message of the Scotchman is not in the least likely.—Vancouver World.

MASONIC GRAND LODGE

At the meeting of the Masonic grand lodge held in New Westminster last week the following officers were elected:

Grand master, T. J. Armstrong, New Westminster.

Deputy grand master, Jas. H. Schofield, Trail.

Senior grand warden, F. J. Bowser, Vancouver.

Junior grand warden, W. J. Houston, Victoria.

Grand chaplain, Rev. H. G. Fiennes Clinton, Vancouver.

Grand treasurer, H. H. Watson, Vancouver.

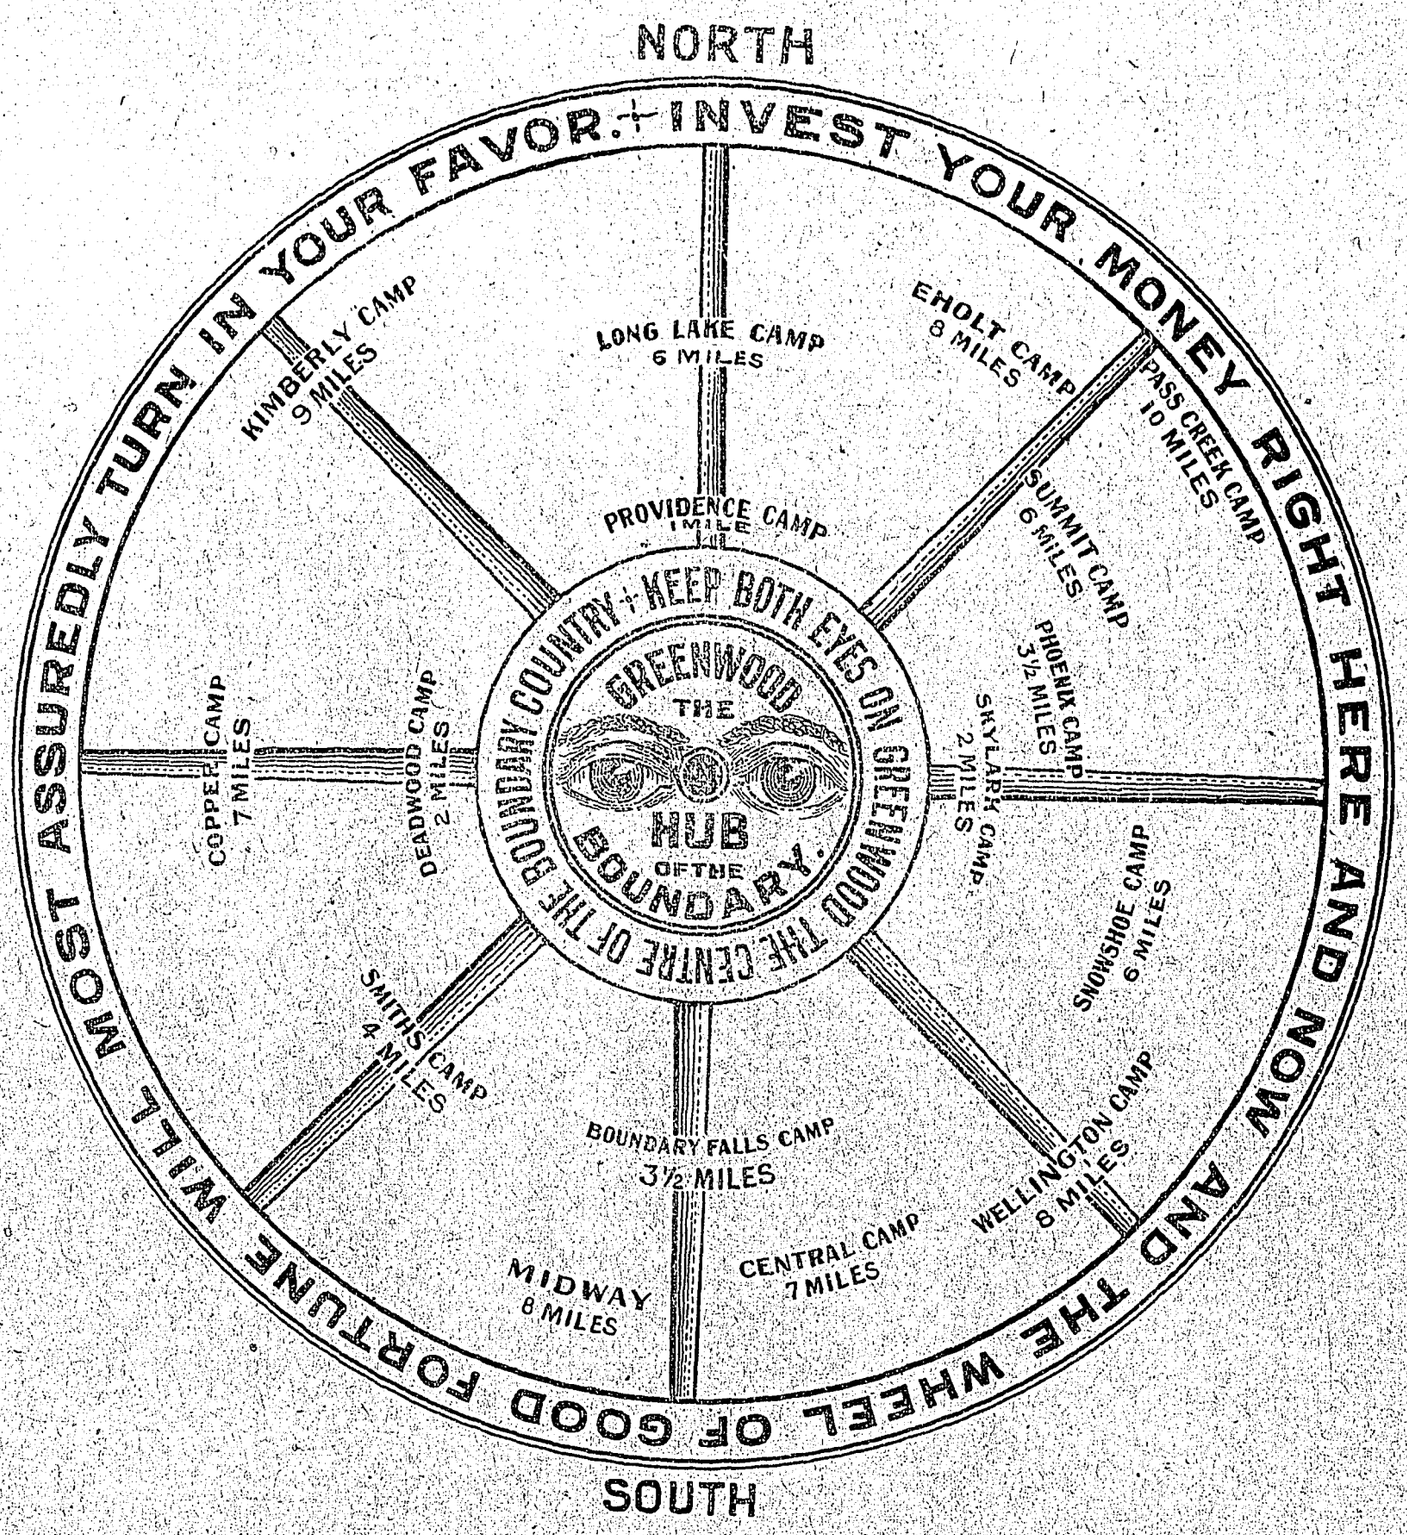
Grand secretary, Robert E. Brett, Victoria.

Grand tyler, A. Gothard, Vancouver.

The following officers were appointed: District deputy grand master, No. 1 district, W. T. Phillips; No. 2, A. C. Stewart; No. 3, C. J. Becker; No. 4, Jas. Stone; No. 5, Geo. W. Clinton; No. 6, Henry Gibrick; No. 7, W. J. Cook; No. 8, J. F. Armstrong; F. J. Burd, S. D.; J. S. Birnie, J. D.; C. C. Fisher, D. C.; John Shaw, S. W; M.; A. W. Currie; G. L. Estebrook, and B. E. Bond, S. B.; S. Bonnell, G. O.; T. W. Bain, P; stewards, D. E. Perry, T. A. Muir, J. M. Rudd, D. E. Kerr, S. C. Sykes and T. Spratt.

Dredging for gold in British Columbia has not yet become a commercial success, owing to a lack of freedom from boulders and hard-clay cement. There is much ground that is sufficiently rich to pay very handsomely, but the condilions, as noted, are not right.

No Time Equal to the Present



Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitabl operation has made the Boundary famous as a mining centre, and every day adds more to the list of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For NINETY DAYS we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from $50.00 up, at terms to suit the purchaser. Make your selection and make it early.

RALPM SMAILES,

AGENT FOR THE GREENWOOD TOWNSITE COMPANY.

Just What Everyone Should Do.

Mr. J. T. Barber of Irwinville, Ga., always keeps a bottle of Chamberlain's Colic, Cholera and Diarrhœa Remedy at hand ready for instant use. Attacks of cholic, cholera morbus and diarrhœa come on so suddenly that there is no time to hunt a doctor or go to to the store for medicine. Mr. Barber says: "I have tried Chamberlain's Colic, Cholera and Diarrhœa Remedy which is one of the best medicines I ever saw. I keep a bottle of it in my room as I have had several attacks of colic and it has proved to be the best medicine I ever used." Sold by al druggists.

THE CITY COUNCIL.

At the meeting of the city council Monday evening Mayor Naden and Aldermen Bunting, Caulfield and McIntosh were present. Minutes of previous meeting were read and adopted.

Communications were read from two firms of Toronto brokers re waterworks debentures, Tabled.

From F. Gamble, provindial works engineer, in reply to a letter from the city engineer, stating that government had no objection to city establishing street grades in Anaconda, as it affected the owners of property more than the government. Referred to city engineer and city solicitor.

From management of Lewis and Clark fair, stating that July 3 had been named Greenwood Day and asking the council to be present. The services of a brass band were also offered the council while in Portland. Received and filed.

Finance committee reported the following accounts correct, which were ordered paid:

Hunter-Kendrick Co.	$78 71
Russell-Law-Caulfield Co.	40 36
Toronto Globe	16 41

The account of Dr. Foster was referred to the city solicitor, and that of the Canadian Rubber Co. to the fire chie .

Ci y engineer reported work on Barbara street progressing favorably. Also that he had ordered cement for the reservoir.

George B. Paul addressed the councouncil in reference to a pump for the cemetery. Referred to Alderman McIntosh.

Alderman Bunting recommended the appointment of G. Peterson as foreman of mason work on reservoir. Recommendation agreed to.

City clerk reported that no nominations had been received June 5th for the position of aldermen, caused by the resignation of Alderman McNeill. W. McBride was appointed.

Bylaws 106 and 108 were reconsidered and finally passed.

Council adjourned.

GRANBY COKE CONTRACT

Fernie Free Press: "The C. P. N. Co. last week concluded an agreement with the Granby company by which the latter agree to purchase all their coke from the former company. The Granby smelter now consumes an average of 300 tons per day and this amount will be increased. The agreement is signed for one year.

"Hitherto the big smelter company has been purchasing about half its coke from Coleman and the other half from Fernie. What the effect of this contract will have on the Coleman mines is not definitely known. Reports that it will close the mines have been emphatically denied, but as the Granby took nearly all the coke they manufactured, the difficulty of disposing of the slack is reasonably feared, and without means of converting this refuse into revenue it is not not clear how the mines can be operated at a profit."

INSTRUCTIVE AND ENTERTAINING.

There is a great treat in store for those who attend the spectacular entertainment to be given by the world-famed Professor Buell, in the Auditorium, Greenwood, on Friday, July 7.

Tickets are now selling and the demand for them indicates that there are hundreds who are aware of Professor Buell's fame as the original exponent of spectacular entertainment. His line of sacred pictures and scenes in the Holy Land, which will be shown here, is the greatest in the world, and they should be seen by everybody,

Professor Buell is a great favorite in leading cities The Detroit Free Press says: "It is impossible to speak too highly of Professor Buell's entertainment. It is a privilege to be present. Nothing could be more instructive."

The Toronto Globe says of him: "It was a brilliant success—one of the grandest entertainments ever given in the city. The degree of applause showed the appreciatisn of the audience,"

Under the auspices of the Ladies' aid of the Roman Catholic church.

J. S. McLean

PROPRIETOR.

Cuban Diarrhoea.

U. S. soldiers who served in Cuba during the Spanish war know what this disease is, and that ordinary remedies have little more effect than so much water. Cuban diarrhœa is almost as severe and dangerous as a mild attack of cholera. There is one remedy, however, that can always be depended upon, as will be seen from the following certificate from Mrs. Minnie Jacobs of Houstan, Texas: "I hereby certify that Chamberlain's Colic, Cholera and Diarrhœa remedy cured my husband of a severe attack of Cuban diarrhoea, which he brought home from Cuba. We had several doctors but they did him no good. One bottle of this remedy cured him, as our neighbors will testify. I thank God for so valuable a medicine." For sale by all druggists.

WE SUBMIT IT.

May we respectfully submit to our many friends in the Boundary the desirability of their representing in the proper direction that it is not quantity of news matter sent out for publication that is likely to benefit their district so much as reliability. In our humble opinion the wide dissemination of allegations made by Brown, Jones or Robinson, estimable men though they may be, regarding such subjects, for instance, as the loss of copper in slags made by local smelters, is not in the best interest of local industries. It will be remembered that such allegations, made against the manager of the Montreal and Boston Co., operating the Boundary Falls smelter, by one utterly incompetent to give a qualified opinion on the subject, were last month published far and wide. That they were promptly denied does not, in our opinion, make their publication less reprehensible. They can do no good; they may, and possibly do, have an opposite effect. The enthusiasm of the correspondent, who a few months since "discovered" the Boundary and its enormous mineral resources is commendable. His occasional blunders are comparatively harmless, except in such a case as that under notice. Discrimination may well be practised, else will usefulness be much impaired by the eventual recognition by the public that grievances of individuals, real or imaginary, are sometimes unwisely permitted to take the place of facts. The outside stockholder usually has but few sources of information; the exercise of much care should, we think, therefore be regarded as an imperative duty by those who supply practically all the district news ordinarily available to him.—Mining Record, Victoria.

A Good Family Liniment.

Every family should be supplied with a bottle of Chamberlain's Pain Balm. For cuts, bruises, burns, scalds and similar injuries, which are of frequent occurrence, there is nothing so good. It soothes the wound and not only gives instant relief from pain but causes the parts to heal in about one-third the time required by the usual treatment. As it is an antiseptic all danger from blood-poisoning is avoided. Sold by all druggists.

TOWN TOPICS

Bruce Craddock left for the Similkameen Thursday.

This is glorious weather for ranchers and ducks.

Ralph Smailes is on a business visit to the coast cities.

Mrs. A. Sater left yesterday for Toronto for a month's visit.

The Citizens' band will play at the lawn fete tomorrow evening.

Mrs. Smith of Beaverdell and daughter were visiting friends in the city the past week.

A. E. Dechesnay is the latest addition to the staff of the Canadian Bank of Commerce here.

W. F. Wood of Kamloops has been appointed sheriff of Yale, duties to commence July 1st.

T. J. Hardy returned last week from a trip through Alberta. He reports business flourishing.

Louis Bosshart came down from Canyon creek last week, where he was doing assessment work.

Thos. Hemmerlee left Wednesday on a fishing trip up the West Fork and will be gone a couple of weeks.

Remember the lawn fete tomorrow evening near the C. P. R. station by the ladies of the English church.

Fred. C. Lane of Spokane has sold his livery business in that city to W, J. Harvey, formerly of Greenwood.

I. P. Roberts arrived in the city this week to take the management of the local branch of the Bank of B. N. A.

J. N. Paton left on Sunday's stage for Hedley in the Similkameen, where he has a number of mining interests.

A number of men quit the C. P. R. survey at Canyon creek. When they left Mike Tebo was doing the cooking.

P. Burns & Co. have put in a power bone cutter, and are now prepared to furnish poultry fanciers with the regulation article.

The Sacrament of the Lord's Supper will be dispensed on Sabbath morning at 11 o'clock in the Presbyterian church.

W. Elson returned from the coast Monday, after visiting Vancouver, New Westminster, Nanaimo, Ladysmith and Victoria.

Alex. Sharp, M. E., mining expert for P. Burns & Co., and Blake Wilson, passed through the city on their way to the Similkameen.

Mrs. W. F. Smith returned from North Dakota Tuesday last, after an absence of nearly a year visiting friends in that state.

S. Stingley lef this week for Montreal to attend a convention of the Locomotive Engineers as delegate from the local union.

Geo. Spice, lately C. P. R. agent at New Denver, has been transferred to Greenwood, and is now in charge of of the ticker at the station.

G. H. and Mrs. Kendell arrived in the city from Vancouver last week. Mr. Kendell has been appointed to the staff of the Bank of Montreal here.

Some of the most choice strawberries brought into town this season were from the Fernwood ranch owned by Chas. Webster about a mile east of Midway.

The Riverside Livery has added stock and a number of new rigs to its outfit, and can now furnish the best saddle and driving horses and rigs in the Boundary.

An effort is being made to have a lacrosse match here tomorrow between the local and Grand Forks teams but it is not certain that the latter will make connections.

Mayor Naden has been appointed right-of-way purchasing agent for the V., V. & E. He left Tuesday morning for the west to enter into the discharge of his duties.

Bob Denzler came in from Spokane last week, and was seen associating with old-timers on several occasions. Perhaps Mr. Denzler knows his own businees, but he's taking desperate risks.

There are now 27 men on the waterworks payroll. This number will be increased to 40 next week. Two carloads of pipe have arrived, and the water should be turned on by the first of August.

C. E. Shaw, C. E., who was severely injured near Princeton some time ago by a runaway horse, is now almost well and will be able to resume his professional duties in the course of a couple of weeks.

Next Wednesday evening Phoenix and Greenwood lodges, K. of P., will hold a joint installation of officers here, and on the 19th July the Grand Chancellor will pay an official visit to Greenwood lodge.

At Monday night's meeting of the city council W. McBride was appointed alderman to succeed J. H. McNeill, resigned. The appointment is a good one. A number of names were mentioned, but Mr. McBride was the nearly unanimous choice of the board.

S. A. Scott came in from Rock Creek this week. He has been prospecting the creek for the past month, and will reach for the rim rock when the water becomes lower this fall. It is expected there will be a large number of placer claims worked on Rock creek this season.

D. C. McRae, of the firm of Smith & McRae, Greenwood, spent a few days in town this week. Mr. McRae's firm are enterprising stationers and news dealers in Greenwood, and he is making arrangements to supply the latest papers in Hedley by Royer's stage.—Hedley Gazette.

G. B. Taylor, city clerk, returned Friday from Ladysmith, where he had been attending the grand lodge of Odd Fellows as representative from Boundary Valley lodge, No. 38. Isaac A. Dinsmore of Grand Forks was appointed D. D. G. M. for this district. Mr. Taylor visited Victoria and Vancouver on his trip.

We also carry the best floor paint made

FLOOR-A-LAC

The Russell-Law-Caulfield Co. Ltd.

Good form applies to eyeglasses. Our optician correctly adapts for both face and eyes.

WHITE BROS.

E. G. Warren returned Monday from attending the Masonic grand lodge at Vancouver. W. J. Cook of Grand Forks was appointed district deputy grand master for this district, and Jas. S. Birnie of Greenwood, grand junior deacon. The meeting at Westminster was the largest in the history of the grand lodge.

The woman was tired and discouraged,
She had been cleaning house all day;
And she found that some of the furniture
Looked ready to throw away.
"Use JAP-A-LAC," a neighbor said;
"It will work wonders for you."
She did, and now that furniture
Looks just as good as new.
For sale by The Hunter-Kendrick Co.

An excursion train will be run over the C. P. R. and Hot Air line to Republic, Wash., on Fourth July, leaving Greenwood at 7 a. m., round trip fare $2. The Greenwood hose and baseball teams will take part in the celebration, and will be accompanied by the Citizens' band. The run will take about three hours, if everything is working smoothly on the warm atmosphere line. The return trip will be made on schedule time if the gods are propitious. Insurance can be had at the Grand Forks office of the Hot Air system.

In California the placers are generally derived from quartz veins of Jurassic age, and the same is probably true of most placers in Idaho and Oregon. In Montana, and especially in Colorado, a part of the placers are probably derived from veins of early Tertiary age, but at any rate these contribute a very small part of the total production.

The greater part of the gold obtained from lode mining in British Columbia is found in connection with other metals, and only separated or collected by smelting, probably not 5 per cent. of the product being obtained from stamp mills. The lode gold product for 1904 was $4,589,608, and was $233,008 less than in 1903.

A gold mine in Bohemia—the Roudny has been worked for five or six centuries, and lately has been remodeled and started again. Singularly it is the first plant in Austria to employ the cyanide process. The gold content of the ore varies between 3 and 30 gm. per ton. Electric power is used to operate the Blake crushers. In the amalgamation process about 50 to 60 per cent. of gold is recovered. Amalgam catchers are provided at the foot of each of the six tables. The Ferraris tables yield concentrates with a gold content up to about 27 per cent., tailings with about 13 per cent., and slimes with about 6 per cent. of gold.

DOMINION DAY

IS HERE.

Are you going to decorate or celebrate? If you are don't forget that we have all kinds of

FLAGS

and fire works consisting of
