MINES DEPARTMENT

Thoroughly Organized and Working.

MINISTER IS IN CHARGE

Quite Naturally Comes from the Banner Mineral Province of the Dominion.

The Liberal administration is the intimate friend of progress. If there is one characteristic more than another, of its signal career, that has served to establish that fact, it is the activity continuing ceasely throughout the las ten years, with which the nation's industries have been promoted. Famed for her resources of infinite variety and magnitude, Canada has been blessed with a controlling authority whose records, open to every one of her citizens for perusal and investigation, show a policy of progress which has made her great among nations.

This fact must have been made plainly apparent during the session of 1906-1907 by the organization of a federal department of mines. The magnificent mineral resources of the country have long riveted the attention of the world, and no stronger evidence of the government's appreciation of this happy circumstance is needed than the alacrity with which the first minister of the department, Hon Wm. Templeman, and his officials, have proceeded with the details of organization. From all sections of Canada have come expressions of satisfaction at the creation of the new department, and the mining men of every metaliferous region within her boundaries realize that no stone will be left unturned to assist in the development of an industry already great.

The estimated value of the mineral production of Canada for the year 1906 was $80,000,000, an increase of nearly $60,000,000 over the production of 1896. The following will show the total output of the different years since the return of the Liberal party:

1906	$80,000,048
1905	69,525,170
1904	60,073,897
1903	61,740,513
1902	63,211,634
1901	65,804,611
1900	64,420,983
1899	49,234,005
1898	38,412,431
1897	28,485,023
1896	22,474,256

Of this splendid total of $80,000,000 for 1906, the metallic production was $42,970,269, divided as follows:

Copper pounds	57,029,231	$10,994,095
Gold, Yukon		5,600,000
Gold, other sources		6,433,932
Pig iron, Canadian ore, tons	104,660	1,724,400
Iron ore, exports, tons	74,778	149,177
Lead, pounds	54,200,000	3,066,594
Nickel, pounds	21,490,955	8,948,834
Silver, ounces	8,568,665	5 823,097
Cobalt, zinc, etc.		250,000

Of the non-metallic metals, coal, of course, was the chief factor, its total being 9,916,177 tons, representing $19,945,032.

The foregoing admits of but one logical conclusion, namely, that if the mineral production of Canada has increased by 300 per cent in ten years, there is every reason to expect that at the end of the next decade a production almost startling in its magnitude will be shown. For be it remembered that Canada as a mineral domain is but a growing child. New treasure troves are being opened up every year and the far famed Cobalt as a mineral camp is only about three years old. The wisdom of the federal government in organizing a department of mines to father this great industry must, therefore, be now plainly patent.

Mining men, of course, are anxious to know as much about the new department as possible. The act which created it states that it "shall administer all laws enacted by parliament of Canada relating to mines and mining and shall also have the management and direction of all subjects assigned to it by the governor in council." It consists of two branches, the mines branch and the geological survey, each with its specific duties and functions.

The importance of the department which has just been provided for cannot be overestimated. Every farmer in the Dominion of Canada has nothing but eulogies to pronounce upon the splendid department of agriculture which, under the able administration of Hon. Mr. Fisher, has been of incalculable benefit to the country. It is the intention of the first minister of mines, Hon. Mr. Templeman, to make his new department equally serviceable. It is a task greatly to his liking, for he comes from a province whos magnificent mineral resources are a matter of world wide knowledge. His advocacy of a department of mines has been supported by the mining industry from the Atlantic to the Pacific, who have been unstinted in their expressions of appreciation at the strong evidence of the interest taken in Canada's mineral wealth by the Liberal administration.

THINGS DOING

Cranbrook is busy—busy in fixing up, painting up, building up.

A Montreal man tried to make good pancakes with "Rough on Rats," as a substitute for baking powder. The result was a dead failure.

Russia and San Francisco have entered into deadly rivalry, it would seem, in the great "graft race."

The grafters are getting hit hard in 'Frisco. Among those recently indicted by the grand jury are millionaires and multi-millionaires. The twenty-six indictments contained 160 counts and the bail in each count was from $1,000 to $10,000. Mayor Schmitz alone had to put up over $400,000 in bail money.

Hon. Jas. Dunsmuir, lieutenant governor of the province, has offered a prize of $1,000 for a golf competition in Seattle during the Alaska-Yukon fair in 1909.

The Imperial Bank of Canada has decided to increase its capital from $5,000,000 to $10,000,000.

The government of Alberta has appointed a commission to investigate the workings of the coal industry in the province. The commissioners are Hon. A. L. Sifton, chief justice of the supreme court of Alberta; Mr. Lewis Stockett, manager of the Bankhead mines; and Mr. William Hason, president of the Miners' union of Coleman.

The Nationalists are looking for a real, live, genuine, home rule bill, as an issue in the next election.

An unfortunate railway conductor who, because of overwork, slept at his post of duty, and so became responsible for a fatal train wreck, was sentenced a short time ago at Guelph to three years' imprisonment. The case has aroused widespread actention, because Judge Riddell pointedly said that Thompson was not alone to blame, and that the papers in the case would be sent to the attorney general. "To my mind," he added in passing sentence, "the persons who ever permitted you to work nineteen and twenty hours a day—day after day—for five days in the week, were guilty of a gross wrong and I shall recommend to the crown authorities that the persons responsible, no matter what their position may be, be proceeded against so far as criminal law permits."

THE BOYS' BRIGADE

Recently we called attention to the formation of a Boys' Brigade in Greenwood. The work is a most praiseworthy one, and reflects great credit on the disinterestedness and public spirit of the promoter, Mr. Robert G. Hargreaves.

The object of the brigade is to bring the boys of the community together for physical and mental improvement.

Youth is restless and will be busy, if not in things helpful, then in things harmful.

Boys' Brigades are found in every civilized land, and have been successful in doing what they aim to do. The boys have taken the matter up with enthusiasm and in helping them t equip themselves with uniform and gymnastic apparatus the public will be doing itself a benefit as well as the boys. The director is enthusiastic, the boys are enthusiastic, the parents are pleased, and the public ought to find pleasure in being helpful.

CELEBRATION NOTES

The Event Was a Great Success.

EVERYBODY WAS DELIGHTED

And the Visitors Returned Home With Good Words for Greenwood and Will Be Glad to Come Again.

The Victoria Day celebration in Greenwood was a great success. It demonstrated that the people like to come to Greenwood.

The condition of things in the Boundary was feared to be far from auspicious for the event, but it proved otherwise, and showed that Greenwood can rely on sufficient patronage under any condition to make one holiday a year here a booming success.

The weather throughout was good, not too warm and not too cold, with one short shower to keep down the dust.

The crowd was large. The people came early Friday morning and the larger part remained until the close.

Phoenix turned out en masse, neighborly and good-natured; Midway must have closed house for both days, judging from the citizens present from the valley beautiful; Eholt sent a crowd bent on pleasure; Deadwood was deserted for the day, for both days in fact, while her people enjoyed themselves; Boundary Falls walked up, drove up, rode up, got up in a body. The country west, Rock Creek, Sidley, Oroville, Anarchist Mountain, Beaverdell had evidently made a note of the day and didn't overlook it. Grand Forks wasn't very neighborly, sending over two score of her people, while the rest remained at home and watched the freshet.

The sports were good, the program carried out, faith kept with the public, and lots of big prizes were pulled in by the visitors.

The order was all that could be expected. There were no accidents and no disturbances, and doctors and policemen were not needed for the occasion.

Unprovided with any passes or courtesies of the kind, a representative of the Times, by the aid of a few good coins, was able to see most of the sports, and he finds the greatest pleasure in saying that most of the money prizes were carried out of town. Everybody got a fair deal, to all appearances, and the best men and the best horses won.

There was no juggling carried on to save money to the home crowd. Greenwood did better, however, than get many of the prizes, it got the honor that comes from keeping faith with the public and letting merit decide where the glory shall go.

VICTORIA DAY

List of Sports and Those Winning the Prizes.

75 Yards dash, boys under 14 years—Theo. Hunter, first; Red McMillan, second.

50 Yards dash, girls under 14 years—Bertha Mason, first; Nellie Henwood, second.

BASEBALL.

Phoenix vs. Greenwood—Phoenix.

Phoenix vs. Oroville—A draw.

Oroville vs. Greenwood—Oroville.

THE CITY COUNCIL

Little of moment was transacted by the council at its Monday evening meeting.

Alderman Gulley asked for and obtained a six months' leave of absence, during which he will roam around the lake country of the 55th parallel.

S. M. Johnson, city engineer, who has taken contracts that call for his absence from the city most of the summer, tendered his resignation, which was accepted conditioned on the completion of his work in connection with the waterworks extension.

THE GRAND JURY

In complimentary terms, to the effect that the grand jury had taken its duty seriously and discharged it well, Justice Clement received the presentment of the grand jury with the assurance that the recommendations and suggestions made touching public matters should be forwarded to the proper authorities.

That part of the presentment dealing with matters public, read as follows:

MAY IT PLEASE YOUR LORDSHIP:

The grand jury desire to extend to you a cordial welcome on this your first visit to the Boundary district as a judge of the supreme court.

Whilst the business of the present assize is somewhat large it is due to unusual circumstances, which, we trust, will not repeat themselves in years to come.

We have visited the public school and find it in efficient order and under good guidance. The average attendance has been good

The hospital of the Sisters of St. Joseph of Peace has also been visited and the accommodation provided has been found excellent, saving that we consider the provision for fire protection to be inadequate, and suggest that the city authorities be requested to bring a fire hydrant nearer the premises.

The jail has also been visited and everything appears to be in excellent condition.

We submit that some increased seating accommodation in the court room be provided for those who are called upon to serve as jurors; and also that steps be taken, if possible, to improve the acoustic condition of the court room.

Whilst acknowledging that many of the recommendations of previous grand juries have been carried out to the satisfaction of the inhabitants of the district, we beg to bring forward a matter which has appeared more than once in former reports. We consider it advisable in the interests of justice that the salaries of provincial constables should be increased, so as to obtain the services of the best men and to enable them to carry out their duties promptly.

As we consider that the railroad crossing at the Boundary Falls smelter is decidedly dangerous for passengers and traffic along the road, we suggest that a diversion of the road be made without loss of time, especially as this matter has already been brought to the notice of the authorities concerned without any apparent effect.

We also believe that so far as it works within this district, the Victoria, Vancouver and Eastern railway does not comply with the spirit of the charter granted to it, inasmuch as in the construction of the main line and the spurs thereto discrimination is made to the disadvantage of inhabitants on the Canadian side of the international boundary line.

We consider that the logging companies now working on the Kettle river should have their attention drawn to the danger caused to the bridges by their logs when floated down the river and that they should be called upon to take steps to prevent such danger by the construction of shear booms or by other means.

We trust that your lordship's stay in the Boundary district may be a pleasant one and that you may be long spared to perform the duties of your office.

W. L. C. GORDON, Foreman

ON TO PRINCETON

Our latest advices, and deemed reliable, are to the effect that the V., V. & E. will be rushed through from Keremeos to Princeton this summer. Should this prove authentic we congratulate the people of the Similkameen on their prospective future.

SEVEN FAT YEARS

In Boundary Mining Enterprise.

A BRIEF COMPARISON MADE

With the Coeur d'Alenes Is Full of Inspiration and Encouragement.

The Coeur d'Alenes is a very rich camp, so admitted by the mining public. To compare the Coeur d'Alenes with the Boundary is rather unfair to the latter, the one an old, the other a new camp. The former has been raising cre since 1884, while the latter began to ship in 1900. Thus the one has been a producer for 23 years, and the other only 7 years. But phenomenal as has been the growth of the Coeur d'Alene output, it is being exceeded in the Boundary. In its seventh year the Coeur d'Alene output was four millions, while in its seventh year the Boundary output was seven millions. The growth during the first seven years was thus very much in favor of the Boundary.

In its first seven years the Coeur d'Alene output was ten millions, while in its first seven years the Boundary has realized twenty-five millions.

In its twenty-third year, however, the Coeur d'Alene output had increased to over twenty millions, or five times as much as it was in its seventh year. If the Boundary should keep up the same ratio its output 16 years hence would be thirty-five millions, while if it should keep up its own ratio it would be very much more.

It is well to keep in mind the age of an industry in any camp when discussing its merits, for in mining, as in nothing else, period of development counts.

This holds even more in low grade mines than in high, as evidenced by the history of the industry in Butte, where each decade adds materially to the camp's output.

It is no falsely based optimism, we believe, that leads us to place the annual output of the Boundary, fifteen years hence, at fifty millions or more.

FOUND GUILTY

Jas. A. Dale of Carmi, Sentenced to be Hanged.

Guilty of murder was the verdict of the jury who heard the evidence against Jas. A. Dale, and he was immediately sentenced to be hanged by Mr. Justice Clement, the presiding judge. All the evidence for the prosecution was in Thursday afternoon, but at the request of Mr. McLeod, counsel for the prisoner, an adjournment was taken until Friday morning. The defense having no witnesses, and the addresses of judge and counsel being brief, the case soon went to the jury, who, after fifteen minutes deliberation, returned a verdict as stated above.

Dale was immediately taken to Kamloops where the death sentence will be carried out on July 18th, unless the minister of justice commutes. A petition is being circulated asking that this course be taken in view of the fact that Dale was struck over the head with a gun by Celle previous to the shooting.

AT THE AUDITORIUM

The athletic and gymnastic entertainment in the Auditorium last Saturday evening was an exhibition of good, clean, wholesome sport, reflecting credit on the local Athletic club and its promoter, Everett Baker.

The wrestling and boxing matches were hotly contested and apparently on the square. The next time the boys give a public exhibition we look to see a big crowd present.

TAINTED MONEY

The big touring car had just whizzed by with a roar like a gigantic rocket, and Pat and Mike turned to watch it disappear in a cloud of dust.

"Thim chug wagons must cost ah heap av cash," said Mike. "The rich is fairly burnin' money."

"An' be the smell of it," sniffed Pat, "it must be thot tainted money we do be hearin' so much aboot."—Success.

GRAND JURY PRESENTMENT.

The Grand jury, in its presentment, succinctly deals with several matters affecting the interests of the district. Its recommendation that better fire protection be furnished for public buildings in the city is timely, particularly in view of fearful loss of life in a Montreal public school and elsewhere because proper precautions had not been taken.

Lumber companies, who are using the streams for driving logs, should also be held responsible for damages to bridges. Already bridges over the Kettle river have been either carried away or damaged by logs jamming against the piers.

Those who have occasion to use the wagon road from Greenwood to Midway must necessarily thank Providence for His all-wise intervention in preventing loss of life at the numerous Canadian Pacific railway crossings in the vicinity of Boundary Falls. Human ingenuity could not suggest more dangerous death traps. That there has been no serious loss of life can be accounted for only by the intervention of some Supreme power.

The Grand jury's suggestion of discrimination against Canadian settlers by the V., V. & E. railway is a matter requiring careful consideration. The V., V. & E. is a Canadian road, incorporated by a Canadian parliament in the interests of the Canadian people, The construction of the road has been seriously retarded by a combination of circumstances which has similarly retarded the construction of other railways in the west. In view of these circumstances, the company should be given reasonable time to carry out the promises under which it was granted permission to cross the international boundary line in order that difficulties of construction might be avoided. It is sometimes a dangerous thing to pay too much attention to the whining of a disappointed person who may be honestly mistaken in the belief that his own interests are those of the general public. Nevertheless, it is the duty of the Dominion government and the Dominion parliament to see that in reasonable time this railway company carries out its obligations to the Canadian people. So far as we can see, it has heretofore shown no disposition to discriminate against Canadian people, and it is to be hoped that with improved conditions in the money and labor markets, construction will be vigorously pushed through the Similkameen and that the portion from Denoro to Midway through Greenwood and the Boundary creek valley will also be constructed.

Since the above was written the Times is in a position to announce that the contract for the construction of the V., V. & E., from Keremeos to Princeton, has been relet to J. W. Stewart & Co. and instructions have been issued to rush the work with the least possible delay.

THE GENEROUS EAST.

The Longboat education fund, inaugurated by the Toronto Globe, has been closed at the magnificent total of $180.25. It seems a pity that say five others of Toronto's citizens had not kept a cent each out of the Cobalt pot and rounded the thing up to $180.30. That would have been a thirty-cent ending at least. And Toronto aspires to be the educational center of Canada! It doesn't look as if Longboat was going to get much of an education. If the list were not absolutely closed we would suggest taking up a collection for the fund in some little Jim Crow mining camp out west, and raising the amount a few hundreds.

EDITORIAL NOTES

A KANSAS CITY usurer got part of what was coming to him, when fined $100 for loaning a man money at 7½ per cent a month. The old tradition that money is worth what it will bring is dying out, and none too soon.

IT is a rainbow of promise in the official sky, the way the courts are getting after the grafters in the republic south of us. It is up to us to revise our oft repeated statement that over there money, if one has enough of it, will mask villany and make it appear innocence.

FOLLOWING the example recently set by the ladies of Myers Falls, a woman's club has been organized at Sunnyside. The object of the club is reported to be "the cultivation of public sentiment in favor of improving and beautifying the homes and streets of the city and surrounding country; to promote the growth of shade and ornamental trees, shrubs and flowering plants; the keeping of buildings and fences in good repair and free from debris and obnoxious weeds, and the keeping of streets and roadways free from objectionable signs and advertisements; to labor for symmetry and appropriateness for home, thoroughfare, public school grounds and parks." That certainly discounts pink teas and bridge, if the club makes good.

COURT ECHOES.

The sympathies of everybody were with the aged father in his interest in and solicitude for his doomed son. Parental love outlives every other consideration.

It was a trying moment for jury and audience as each juror was compelled to rise in his place and pronounce the terrible word that meant so much to one man.

The justice's remarks about his regard for the Boundary, and his regret at the possibilities of being compelled to remove to the coast, endeared him more than ever to the people in these hills.

The honors and emoluments of a judge can hardly compensate for the pain the justice suffered in passing sentence on the condemned, It illumines human nature to see the agony of a strong man in a heart-trying place.

Canada can certainly give the United States a lesson in the matter of selecting juries. While each attorney in a cause endeavors to secure an impartial jury, there are no vexatious delays in carrying out serious business for which courts exist.

In the Carmi case the Crown prosecutor while intent, in compliance with his obligation, in securing a just verdict, manifested a disposition throughout to be eminently fair to the chief party in the terrible tragedy, and when a verdict of "guilty as charged" was returned we are sure that he regretted that such had to be.

SHARPS AND FLATS

BY J. MARVIN NICHOLS.

Uncertainty is always an element of weakness.

Nobody but a coward fails to make the venture.

The backbone of character is made in the home.

To bolster a libel one must resort to falsehood.

A man with a real purpose in life can never be satisfied.

People generally sneer at a thing they can never acquire.

Nothing can be nobler than a frank admission of a wrong.

Did the notion ever strike you to turn out of the common road?

Don't be afraid to undertake a new thing. All such are world builders and history makers.

Get into a good steady stride that will stand a lot of going, and that will "get you there."

The best reformation in the world is the sort that begins by reforming ourselves one by one.

In that age when wealth becomes the standard measure of greatness, then money will be the world power.

The last one of us would be in a mighty bad way were we called upon to prove everything we deliberately tell.

Do your part to lift the whole race a notch in the scale of humanity—then your heaven will take care of itself.

Some of us are pining for the classic shades of old Kentucky. We long for that land where the dark-eyed Southern girl flits like a fairy among fresh-blown flowers. We are dreaming of the far-off hills and the blue grass meadows, where the corn is full of kernels and the colonels full of corn.

An exchange says that in New Mexico Johnny Ghosh and Jennie Dern were recently married. The local editor could not resist the temptation to head it "Gosh-Dern." He has been living in the desert ever since, feeding on cactus and sand. He prefers that to facing the blushing bride and furious husband.

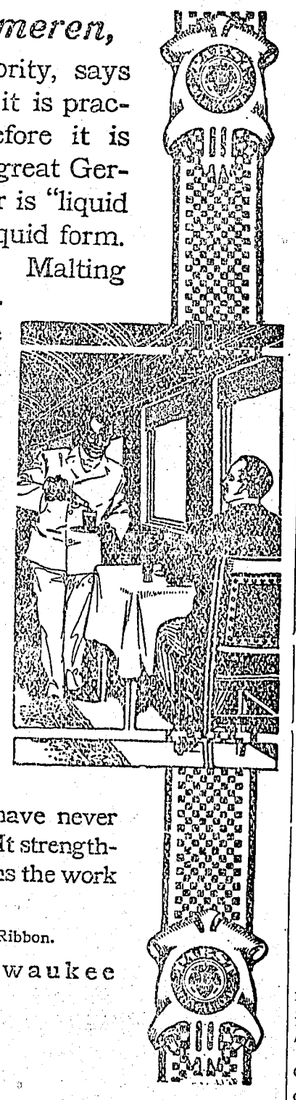
FIRST-CLASS CAFE, OPEN DAY AND NIGHT

Dr. Ernest Van Someren, the celebrated Italian authority, says food should be chewed until it is practically in *liquid form* before it is swallowed. Dr. Liebig, the great German chemist, says that beer is "liquid bread"—a genuine food in liquid form.

The Pabst Eight-Day Malting Process does the extraordinary work of changing the nutriment in the barley-grain into palatable and easily digestible *liquid food.*



Pabst Blue Ribbon

The Beer of Quality

made from Pabst Perfect *Eight-Day Malt,* is a pure, wholesome food, rich in nutritious, strengthening properties that build muscle and make good blood.

The flavor is delicious—you have never tasted a richer, more mellow beer. It strengthens you and at the same time lessens the work of digestion.

When ordering beer, ask for Pabst Blue Ribbon.

Made by Pabst at Milwaukee

And bottled only at the Brewery.

Greenwood Liquor Co.,
Greenwood, B. C.

NOW IS THE TIME TO ORDER

JOB WORK

SINGER MACHINES, OLD AND NEW

We have them from $10 up. 1906 leaves us with three good drop head machines that we had to take back and which we are offering at reduced prices. Call and see them at once, as we have only three left; $3 a month takes a new drop head Singer or Wheeler & Wilson, the two best machines on the market today.

N. H. LAMONT, Agent

Copper Street. Greenwood, B. C.

People of Note

In Short Meter

Mrs. Wm. McKinley, widow of the late President McKinley, died at Canton, Ohio, on May 26th.

The Spokane papers are telling, in what seems an apologetic way, of the marriage of millionaire Corbin of Spokane, to his housekeeper. What will "sassiety" do about it, and what do the chief parties care, any way?

W. A. Carlyle, formerly provincial minerologist, and at one time manager for the Le Roi and other properties of the British American corporation, and for the past seven years general manager for the Rio Tinto copper mines in Spain, has resigned that position to take up consulting work in London, where his temporary address is Bank of Montreal.

The premier of Victoria says that wherever he went in England he heard nothing but the cry "Canada," while the newspapers scarcely spoke of Australia. This is a complete reversal of the condition of things which existed prior to the advent of the Laurier government to power in Canada and shows what a progressive, business like administration, and a vigorous immigration propaganda, can accomplish.—Rossland Miner.

THE ORE TRAIN

W. J. Porter is doing development work on some of his mines in South Wellington camp, and Thos. Roderick is doing likewise on properties he is interested in over in Summit camp.

The Dominion government, under the direction of the minister of mines, is taking steps to inquire into the value of peat lands, of which there are vast areas in Ontario and Quebec.

The Crow's Nest Pass Coal company are putting on all the men that they can secure in their efforts to increase the tonnage of the mines. Development work is sufficiently advanced at present to permit of 5,000 tons a day being mined, but good miners are very scarce. There are about 1,700 men at work at present and their number is being added to daily.—Fernie Free Press.

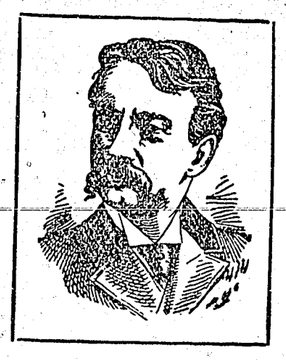
The wonderful strikes of Nevada show a distinct line of rich mineral deposition, beginning at Manhattan on the north, then Tonopah, Goldfield, Bullfrog and Searchlight, and which is more or less broken to and beyond the Sonora line. The intervening gaps are, it is worthy to remark, gradually being filled by new discoveries, until it seems as if the line laid down would be the center of the greatest mining activity of the present generation, so wide is the area of productiveness.

Robert R. Hedley, late manager of the Hall Mining & Smelting company's smelter at Nelson, B. C., who has been appointed to collect in British Columbia, Alberta, Saskatchewan and Manitoba, data relating to mines, smelters, quartz and concentrating mills, etc., for the full report on the mining industry of Canada, which it has been announced the newly created Dominion department of mines intends to publish, is expected to arrive in Victoria from Ottawa soon. It is understood he will confer with Mr. W. F. Robertson, provincial mineralogist, concerning the most effective means to adopt in order to obtain as complete and reliable information as shall be found practicable relative to the mining and allied industries of British Columbia.

Work has gone on very smoothly and effectively at the Daly Reduction Co.'s works during the past month, there being abundance of power and the work better systemized than during the preceding year. While various changes have been made by Mr. Ross, they have been to ensure higher efficiency and more economical working, and were not changed for the sake of changing, as done so often by his predecessor. It was in many respects a tough looking legacy that Mr. Ross had to take hold of last October, a costly plant being run uncared for until it was ready to drop to pieces, and the flume not only on the point of dissolution, but dissolving. With the overhauling it has received, it is working better now than ever before, and parties who have gone up the flume report that where the water used formerly to stream from it, the flume is now as tight as a drum.—Hedley Gazette.

MEN

We Cure Every Case We Treat



OUR GUARANTEE:
NO PAY UNLESS CURED

When You Need a Specialist, Consult One of Wide Experience.

We are just now completing our twentieth year as specialists in men's diseases. During these years of close application to a single class of ailments we have originated and perfected the only scientific and certain methods by which these diseases are cured. If we accept your case for treatment, a cure is but a matter of a reasonable time.

We guarantee every man a lifelong cure for Varicocele, Hydrocele, Urethral Obstructions, Blood and Skin Diseases, Prostatic Troubles, Piles, Fistula, Loss of Vital Power, Kidney, Bladder and Special Diseases. We especially offer our services to those who are afflicted with weakness as a result of their own follies or excesses.

Our methods are up-to-date, and are endorsed by the highest medical authorities of Europe and America. Hence our success in the treatment of Men's Diseases. Remember, our specialty is limited to the diseases of MEN and MEN only.

We cover the entire field of nervous, chronic, deep-seated and complicated diseases.

CONSULTATION FREE.

If you cannot call, write for Symptom Blank. Many cases can be cured at home. All correspondence confidential.

The World Over

Told in Brief

The assessment of Strathcona for the present year will be $7,500,000, as against $2,161,594 last year.

A Liberal convention held at Moncton on the 22nd inst., gave Mr. H. R. Emmerson a great reception. Mr. Emmerson stated his reasons for resigning, saying he wanted to be free to fight his slanderers to a finish and to leave Sir Wilfrid Laurier unembarrassed. A resolution was passed condemning the Conservative campaign of personal slander and abuse, referred to the allegations against Mr. Emmerson, and the convention accepting in the most unqualified sense Mr. Emmerson's denial in parliament of the charges, approved of his resigning his portfolio and appealing to the courts for justice, and further hoped that on obtaining that vindication which it is believed justice will accord, he will resume the administration of the department of railways and canals, continuing to its fullest fruitation that policy of successful reform respecting the Intercolonial railway which he had inaugurated.

A strenuous summer's work has been mapped out for several detachments of the Northwest Mounted police, and they are now being sent out to arduous and oftentimes perilous duties on the extreme frontiers of Northwest Canada. One detachment is bound for exploration and police duty at the mouth of the Mackenzie river, where it empties into the Arctic ocean. Another detachment will be employed in cutting trails in Northern British Columbia, a third will resume exploration work along the shores of Hudson bay and through the hinterland of the north. On the 10th of this month Inspector Jarvis left Regina with seven or eight men to make a 2,000 mile trip to the north by way of the Athabasca and Mackenzie rivers to Herschall island, to relieve Inspector Howard, who has been there for several years with a small party of police.

SORE ACHING FEET

Soothed by Zam-Buk.

Men, women and girls engaged in stores, who have to be on their feet all day, often suffer agonies from chafing sores, soft corns, horny patches, etc. In other cases long standing and walking leads to bad leg, varicose veins and ulcers. Zam-Buk takes the pain out of chafed sores, prevents suppuration and poison from stocking dye, and generally heals.

Mrs. K. Watkins, of 26 Forgue Ave., Montreal, says: "My boy had a sore on his heel which was rubbed by his stocking until it became a very bad wound. Zam-Buk took the soreness out almost instantly, and healed the wound up wonderfully."

Zam-Buk is equally good for cuts bruises, eczema, scalp sores, itch barber's rash, blood poison and all skin injuries and diseases. All stores and druggists sell at 50c. a box.

FOR SALE

5 Milch cows.
2 2 year old steers.
1 Mare 5 years old.
1 Buggy and harness.
1 Organ and numerous household effects.
1 Ranch with large house and land irrigated.

WILLIAM L. C. GORDON

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother,

(3 If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,00 pounds shall be collected on the gross output.

W. W. CORY,
Deputy of the Minister of the Interior

THE

COPPER HANDBOOK

(New edition issued Nov. 15, 1906)

Is a dozen books in one, covering the history, Geography, Geology, Chemistry, Mineralogy Metallurgy, Terminology, Uses, Statistics and Finances of Copper. It is a practical book, useful to all and necessary to most men engaged in any branch of the Copper Industry.

Its facts will pass muster with the trained scientists, and its language is easily understood by the everyday man.

It gives the plain facts in plain English without fear or favor.

Its lists and describes 4626 Copper Mines and Companies in all parts of the world, descriptions running from two lines to sixteen pages, according to importance of the property.

The Copper Handbook is conceded to be the

WORLD'S STANDARD REFERENCE BOOK ON COPPER

The Mining Man needs the book for the facts it gives him about mines, mining and the metal.

The Investor needs the book for the facts it gives him about mining, mining investments and copper statistics. Hundred of swindling companies are exposed in plain English.

Price is $5 in Buckram with gilt top; $7.50 in full library morocco. Will be sent, fully prepaid, on approval, to any address ordered, and may be returned within a week of receipt if not found fully satisfactory.

Let Me Sell You a Chatham Incubator —On Time—

Do you know there is big money in raising poultry? Do you know there is more money in running a good incubator than in almost anything else you can do for the amount of time and trouble it takes? Do you know my incubator will pay you a bigger profit than any other thing you can have on your place?

Well, all these things are true, and I can prove it. Thousands of people all over Canada have proved it every year for the last five years.

I want to quote you a price on my Chatham Incubator,—sold ON TIME. I want to send you my Chatham book. This incubator book is *free*— I'll send it to you for just a postal card. It tells you a lot you ought to know about the Poultry business—it tells you how to make *money* out of chickens—it tells you how my Chatham Incubator will make you *more* money than you can make with hens—far more, and with less trouble.

This book tells you how my Incubators are made—why they are the best ever invented—and why I sell them ON TIME and on a 5-Year Guarantee.

My Company has been in business in Canada for over 50 years. We are one of the largest wood-working factories in the country. We also operate a large factory at Detroit, Mich. We have the incubator and Brooder business down to a science.

Chatham Incubators and Brooders will make you money, for a Chatham Incubator will hatch a live, healthy chicken out of every fertile egg put into it, in 21 days.

Will you write for my book today? Do it now while you think of it. Just say on a postal "Please send me your Incubator Book"—that's all. Address me personally.

IMPORTERS GREENWOOD

PAGE OF PERSONALS

Dr. Mathison, dentist, Naden-Flood block.

Thos. McAuley was in from the West Fork metropolis this week.

Don't forget this is May 31st. Look after your mining license.

John Moran came in from Spokane on Thursday evening's stage.

Mr. and Mrs. Duncan Ross have taken the Fair home for the summer.

Jos. Chenier has returned from a three weeks' outing on the West Fork.

The west bound C. P. R. has been getting in some distance behind schedule lately.

Messrs. O. B. Smith and O. N. Galer of Phoenix, were visitors in town early in the week,

Mr. C. S. Baker arrived a few days ago to take over the assaying business of A. Harry Hook.

Dr. Gordon, who has sold out his business in Phoenix, contemplates taking a trip abroad.

Mrs. Charles H. Fair and son left on Thursday for Collingwood, where she will spend the summer.

Rev. Forbes J. Rutherford, B. A., is to succeed Rev. H. S. Hastings in the Methodist pastorate here.

Mr. and Mrs. F. P. Buck of Sherbrooke, Quebec, have been guests at the Imperial during this week.

The Bachelor's ball on Monday evening last is pronounced one of the best ever by those who were there.

The baseball team meets this evening to take steps to further perfect their organization and methods.

The benefit ball for Charles Shaw in Reliance hall Friday evening last, was a great success for a good cause.

George Rumberger, who has been down in the prairie provinces for some weeks, is again in the Boundary.

The Court of Revision has been in session this week, dealing with the usual question of valuation and assessment.

Editor Wilcox came down into the valley for inspiration this week. We look to see his lively journal excel itself this week.

On Sunday, June 9th, on the Midway diamond, the Oroville and Phoenix nines will try conclusions. That will be a ball game.

Among the West Fork colony luxuriating in Greenwood this week we observed Thomas Murray, Gus Wheatley and Duncan Currie.

Mrs. E. G. Warren left on Wednesday for Nicola, having been summoned thither by a telegram announcing the illness of her sister, Mrs. Strickland.

Mr. F. W. Hart, a former resident of Greenwood, now in Business at Medical Lake, has been in town for several days looking after his property interests here.

J. C. Haas, one of the former owners of the Tip Top, recently sold to a local syndicate, was in town this week looking after development work on the Golconda.

Phi. McDonald left last Friday for an outing in the Sturgeon Lake country, and incidentally to pick up anything lying unclaimed that bore the earmarks of a mine.

Jas. C. Dale is a visitor in town, having come in from Carmi on Tuesday. He is busy negotiating a deal for some West Fork lands, which he recently acquired.

S. P. Dixon is putting a fine stone wall and stone steps in front of his new residence on Government street. When completed the home will be one of the best in Greenwood.

Mr. A. B. W. Hodges of the Granby, was a Greenwood visitor Monday last. He reported that work had begun at the mines and that the smelter would resume probably on Tuesday.

Mr. J. H. Kennedy, in charge of the V., V. & E., was in town Thursday. He reports progress in steel laying into Keremeos, delayed by the going out of the bridge across the Similkameen.

Mr. and Mrs. James Ray of Medicine Hat, are in the city the guests of their old friend, Mayor Bunting. Mr. Ray is prominent in the commercial and municipal life of his home town.

Kenneth McKenzie and C. H. Tye have gone north in the wake of Angus Nicholson. If all the contracts of the government secure the class of men for the work that the Stewart Lake fish hatchery has, the country will get good value for its money.

Dr. Simmons, dentist, Phone 96 Wallace-Miller Block, open evenings.

Call at the Greenwood Bakery for New England bread.

The record that the Portmann Bros. made in the Elkhorn brewery is being maintained by the new owners. The quality of the product ranks with the best, the wise ones say. Strangers visiting the city have caught on to its merits and call for Elkhorn every time.

PAY ORE COLUMN

A new electric hoist has arrived for the Sunset.

The Jewel is making ready for an increase in its force of men. The property is looking well.

Good progress is being made on the Elkhorn with the diamond drill. Developments of a gratifying nature are looked for now most any day.

New life appears to have been instilled into McKinney by the work on the Cariboo and the bonding of the Leroi. Several mining men have recently been in camp.

An accident at the Mother Lode suspended operations there for a few days the first of the week. The company took advantage of the occasion to make some repairs at their smelter plant here.

P. V. Perkins, of the Perkins Brokerage company, New York, has been making an inspection of Wallace mountain. He was much pleased with the Gold Drop, Sally, Duncan and Rambler. He returned to New York on Tuesday and will be back again in a few weeks.

Work on the extension of the Golconda tunnel is going forward. Although the vein has not been reached, good values are found in the country rock at the face, and the lead is apparently near at hand. Arrangements have been completed to begin to ship ore as soon as the vein proper is encountered.

TORE DOWN THE FLAG

Two zealous, but doubtless irresponsible fellows, tore down the flag that was floating over the American vice-consulate in Winnipeg on May 24th. Dr. Jones, the newly-arrived vice-consul, will probably have the good sense to charge it to what it actually was, not the reflection of the sentiment of the people he had just come to live among, but to the fool patriotism of two hoodlums.

BASEBALL

The Oroville boys and the Greenwood nine played a game of baseball last Sunday. Until the last inning, when the home team got a run, the tally sheet for the Greenwood side looked like a diagram of Kitchener's chain of forts across the Transvaal.

Those new suits of green are quite the prettiest thing yet seen on the diamond, but like the scarlet tunic of the British Soldier, better be substituted for khaki, as they appear to be an easy mark.

C. S. BAKER

PROVINCIAL ASSAYER AND Ore Shippers Agent.
