THE BUCKHORN MINE

Main Shaft Is Down 135 Feet and All Timbered.

RECORD OF THREE MONTHS' WORK

Crosscutting Has Commenced on the 100-Foot Level—Mining Concentrates and Personals.

Three months ago today work was first started at the Buckhorn mine, in Deadwood camp, towards laying the foundations for the buildings to house the mining machinery plant, that is now working smoothly as clockwork. Yesterday a Times representative spent a few hours at the mine, and noted the work accomplished in that period. Credit is due W. Thomas, the capable foreman, and his able corps of miners for the splendid results attained. Outside of erecting the buildings and installing the machinery, the actual development of the mine has proceeded at an astonishing pace. Yesterday the main double compartment shaft, four feet four inches by eight feet in size, all timbered, had reached a depth of 136 feet. At the 100-foot level crosscutting was progressing toward the main ore body. The crosscut was in 20 feet from the shaft. Two drills are at present being worked, one in the bottom of the shaft and one in the crosscut. As soon as the present crosscut is in a sufficient distance to allow it, another crosscut will be started in an opposite direction on this level, so that three drills will be employed. It is hoped to have the shaft down to the 200-foot level by the 10th of next month. It is claimed by the management of the mine that not only are the miners establishing a record for sinking a shaft of this size, but the cost of it, per foot, is far less than is usually figured on for this kind of work. There are 19 men at work on the property besides the foreman. Of these 12 are miners.

TWO ORE BODIES.

It will be remembered that the shaft was started away from the main ore body, which lies to the northwest. At the 100-foot level the crosscut is being run in that direction to come under the 65-foot shaft, sunk on the ore body in the early history of the mine's development. It will require fully 150 feet of work from the present shaft to get under the old shaft, at which point an upraise will be made, of some forty feet, to connect with it. This accomplished will not only develop the ore body on this level for a considerable distance, but will give a thorough system of ventilation for some depth to come. The other crosscut shortly to be started from the 100-foot level will run in a southerly direction to another big ore showing, partially exploited on the surface.

SMALL BUT GOOD.

While the machinery plant, consisting of an 80 horse power boiler, half of a 10-drill air compresor and a 20-horse power hoist, is a small one, yet it is safe to say that every pound of pressure it is capable of producing in the running of drills and the hoisting will be exercised to its utmost capacity. The company has adopted a plan that is commendable, the management believes the best results can only be obtained by employing first-class miners at the highest wages. In the end it will be found that the development of the Buckhorn mine will have been quicker and better accomplished and at a less cost by following this policy.

CONCENTRATED MINING NEWS.

Robert M. Nisbet, the proprietor of the Review of Columbia, was in the city yesterday. He came over in connection with a deal on some mining properties he owns in Summit camp. Speaking of mining development going on near Columbia, he said: "On Observation mountain considerable work has been done on the Bonita claim. It is largely owned by Spokane parties. They have just let another contract to extend the tunnel an additional fifty feet. The English & French company have struck a good body of ore on their property on the North Fork of the Kettle river. The ore in the breast of the tunnel is said to average $100 to the ton. The Republic Mining company are putting on 20 four-horse teams to bring the ore from the Republic mine to the Columbia depot, where it will be loaded on the cars and shipped to the Trail smelter. I learned that the development of the O. P. claim in Summit camp, owned by the Summit Gold & Copper company, is progressing satisfactory. The shaft has reached a depth of thirty feet. With regard to the amalgamation of the Columbia and Grand Forks townsites I have no definite information. Committees representing the two towns have been appointed, but it never seems as though they never come together and get down to business. Grand Forks is most anxious to have Columbia come into her municipality, but on our side the great question will naturally be what percentage of the debts of Grand Forks we shall be called upon to bear." Referring to Summit camp, the speaker continued: "I believe the coming summer will see quite a town at Summit City. It is a good location for a townsite and has the mines to back it. I expect to start another paper there within two months."

R. A. Brown, president and general manager of the Sunset Mining company, owning the Sunset claim on Copper mountain, was in the city yesterday on his way to Grand Forks. Mr. Brown was as enthusiastic as ever over the Sunset and other claims on Copper mountain. He is of the opinion that it is only a matter of time when the mountain will be able to surprise the mining world in its production of copper ore. Development of the property is actively progressing with a force of twenty-four men. The main shaft is down 110 feet, and at the 100-foot level a station has been cut out, and crosscutting of the ore body has commenced. He says it is safe to say that half the ore coming from the bottom of the shaft will run 20 per cent copper and the other half 10 per cent. The ore is getting better every foot they go down. They are working three eight-hour shifts in both sinking the shaft and in the crosscuts. From Mr. Brown's remarks it would appear that there is quite a boom on at Princeton, as during the past two months some $15,000 worth of realty has changed hands.

F. H. Oliver, of the reorganized Morrison Mining company, arrived in the city on yesterday's train. He is here to arrange for the resumption of work on the Morrison mine in Deadwood camp. The new company was reorganized with a capital of $150,000, divided into 1,500,000 shares of the par value of ten cents per share. Of this number half a million shares have been reserved for treasury purposes. The company was also incorporated on an assessable plan, so if the treasury shares are not placed on the market for sale. the company may levy assessments, and thus be in a position to continue the development of the mine. The property is without doubt an excellent one, and the ore body has been developed on the crosscut tunnel level for over 200 feet. The completion of the railway spur to Deadwood camp will put this property in a position to make shipments at a merely nominal cost to the smelter.

The last issue of the Provincial Gazette contains notice of the registration of the following Boundary Creek companies: The Republic Gold Mines of Greenwood, B. C., Limited, capital $100,000, in 1,000,000 shares of the par value of 10 cents. To acquire the Republic, Nonesuch, Last Chance and Hidden Treasure claims in Smith's camp. Head office, Greenwood. The McRae Copper Mines, Limited, capital $1,500,000, in 1,500,000 shares of the pa value of $1. To acquire the Ah Therei and Sydney M. Johnson claims in Deadwood camp. Head office, Greenwood. The Grey Eagle Gold Mining Co., Limited, capital $1,500,000, in 1,500,000 shares of the par valne of $1. To acquire the Grey Eagle claim in Greenwood camp. Head office, Grand Forks.

That Greenwood is destined speedily to become a very important centre of the Boundary Creek district was illustrated by the expenditure in that city last year of no less than $320,000 on new buildings—an excellent showing in view of the fact that up to the present nearly all the mining work done in this camp has been that of development, only a few thousand tons of ore having as yet been produced from the mines, says the B. C. Mining Record. The advance of Greenwood last year, however, only anticipates by a few months the beginning of a very considerable output from the country tributary to it.

Superintendent Kean of the Cariboo Consolidated Mining company returned yesterday to Camp McKinney. He brought down a gold brick and four samples of quartz simply plastered with the yellow metal. The samples were for exhibition at the Toronto office, the gold brick for dividends for the shareholders. The samples came from the new drift being opened up in the Okanagan claim. The ore in the new drift is said to be fabulously rich and extra precautions are being taken in saving it.

SATURDAY, FEBRUARY 10, 1900.

IMPROVE THE SERVICE.

The Nelson Tribune has made the following sensible suggestion to the Canadian Press Association which meets in Toronto tomorrow: "It is to be hoped that at this gathering of pressmen some effort will be made to improve the news service which the Canadian Pacific Telegraph Company issues to the press of the dominion as the Associated Press report. There are sufficient daily papers in Canada now to entitle them to some consideration from the news associations. They should at least be furnished with a summary of the news from the principal cities in the dominion. They should also be furnished with a summary of the proceedings in the federal and provincial parliaments. It is said that the Canadian Pacific Telegraph Company, which controls the Associated Press in Canada, refrains from sending out all such for fear the people should accuse it of meddling in politics. This is the explanation which is set up as an excuse for keeping the papers of the Dominion out of the news which is news and which interests the people of the country in which the papers are published. While it might not be advisable for the papers of Canada to discard the Associated Press service altogether, the time has certainly arrived for the press of the Dominion to make some effort to secure in their news service the important happenings in their own country. The Canadian Press Association could not be better employed on Thursday and Friday than in ascertaining how this object could be attained."

DANGER OF POLITICS.

The death of William Goebel, governor of Kentucky, preaches an eloquent lesson on the evils and dangers attached to a political life. Goebel rose from obscurity because he was a stalwart champion of the people's rights. He valiantly fought against class legislation and was an idol of the masses. But when he himself attained power he unconsciously became the victim of those things upon which he so persistently waged war while in opposition. He became the director of a political machine that cut through every right of the people in order to secure power. He and his party were determined that he should be governor against the wishes of a majority of the people. His political machine was used for this purpose. The result was inevitable. Such methods courted violence. William Goebel is dead and Kentucky is on the verge of a civil war.

SCHOOL ACT AMENDMENTS.

The bill introduced in the legislature a few days ago outlines some very sweeping changes in the school system of the province. The changes affect particularly incorporated cities. The clauses relating thereto are as follows:

"The salaries of teachers employed in the public schools in all incorporated cities and towns shall be fixed and paid at the discretion of the school trustees of said cities and towns respectively; and such salaries, and all other expenses for the purchase and lease of school sites, erection, enlargement or rent of school buildings, for furniture and repairs, and all other incidental expenses whatsoever, incurred by the board of trustees in the respective cities and towns, shall be borne and paid by the municipal corporations of said cities and towns respectively."

"City school districts shall be divided into the following classes:

"City school districts of the first class, including all incorporated cities and towns wherein the average actual daily attendance equals or exceeds 3,500 for the year.

"City school districts of the second class, including all incorporated cities and towns wherein the average actual daily attendance equals or exceeds 500 for the year, and comprising at the present time the cities of Victoria, Vancouver, New Westminster and Vancouver.

"City school districts of the third class, including all the incorporated cities and towns wherein the actual average daily attendance falls below 500 for the year, and comprising at the present time the cities of Cumberland, Columbia, Grand Forks, Greenwood, Kamloops, Kaslo, Nelson, Revelstoke, Rossland, Sandon, Vernon and the town of Wellington. All cities and towns that may hereafter be incorporated from time to time shall also be included in one or other of these three classes; provided, however, that no city or town shall be transferred from one class to another except during the month of July, and then only with the consent of the lieutenant-governor-in-council.

"A per capita grant of $10 for cities and towns of the first class, $15 for cities and towns of the second class, and $20 for cities and towns of the towns of the third class, per annum, based on the average actual attendance of public school pupils, shall be paid quarterly by the minister of finance, out of the consolidated revenue fund of the province, to each of the municipal corporations of the city school districts of the first, second and third class, respectively, provided that the schools have been conducted in accordance with the provisions of this act, and with the rules and regulations prescribed by the council of public instruction. The average actual daily attendance shall be calculated upon the attendance for the half-year preceding the payment."

There shall be seven trustees of the school board instead of three, as at present, and lands held by the crown as school reserves are to be conveyed to the cities in which they are located.

POLITICAL CHANGES.

While the special dispatch from Victoria is mostly conjecture it is probable that it outlines contemplated changes to relieve the present political crisis. It may be possible that Hon. Mr. Cotton has the endorsation of the Conservative leaders in his efforts to bring about a coalition government. Liberals will not quarrel very much with the circumstances which foist a Conservative government on the province without the consent of the electors. In the event of such a contingency they will have something definite to oppose. A strong Conservative government is preferable to a weak Liberal one and infinitely better than the present aggregation. Political events at the capital will be closely watched for the next two or three days,

MUNICIPAL ELECTIONS.

Mr. McBride, member for Dewdney, has introduced in the legislature amendments to the Municipal Elections Act. One of these makes it compulsory for the clerk of every municipality to make out a correct alphabetical list of voters after the revision of the list, stating in a separate column under what qualification each voter is entitled to vote. Another amendment introduces an innovation in this province. Instead of the old form of ballotting, municipalities may introduce a voting machine, known as the Imperial automatic voting machine.

SUPREME COURT REGISTRY.

The Times has no misgivings regarding the wisdom of the government in the matter of selecting the city in which the Boundary supreme court registry will be placed. The government is not without personal knowledge of the situation in the district. Both Hon. F. C. Cotton, chief commissioner of lands and works, and Hon. J. Fred Hume, minister of mines, visited the Boundary Creek district recently, and both acknowledged that Greenwood was by far the most important point in the district. The government is anxious to do such things as will accommodate and benefit the greatest number of people. A registry should be so situated that it will be convenient to the majority of those having business with the office. Greenwood is the most central town in the district. Grand Forks lies to the one side of the district, while such points as Midway, Rock Creek and Camp McKinney in the west, and Phoenix and Eholt on the east, are tributary to Greenwood. The business men of the places mentioned do their banking business in Greenwood; they consult Greenwood barristers, and have all their legal business transacted in Greenwood. Greenwood is the most populous town in the district. The municipal voters' list for the city shows nearly 500 registered voters, the Grand Forks' list about 200. There are twelve barristers practicing in the city; there are about half that number in Grand Forks. Then, too, Phoenix, where there are two or three practicing barristers, is only four miles distant from the city, and the legal gentlemen there are anxious that the registry should be established here. It would be a grave error of judgment on the part of the government to locate the office at any other point than Greenwood. For some time county court was held at Midway, although nearly all the business came from this city. The public interest forced a change, and now the sittings of the county court are being held in Greenwood. If the registry were established elsewhere the same difficulty would arise. There would be such a preponderence of business from the city—there would be so much inconvenience created—that eventually the government would be forced to accede to the demands of the public and change the office. It will be much wiser to do right at the start and avoid trouble in the future.

TRUE AMERICAN SENTIMENT.

While the rabble in America are making known their pro-Boer sympathies, the better classes endorse Britain's position. Alderman C. W. Dunbar of Buffalo voiced the true sentiment of the Americans the other day. He was instrumental in killing pro-Boer resolutions introduced in Buffalo's municipal council, and in reply to a congratulatory telegram from the residents of Port Colborne, he made the following graceful reply:

I am pleased to know you appreciate my action in the council yesterday. Your thanks, though gratifying, were unmerited. I should be a churl, indeed, if I did not stand up for a country and people that have always been my friends, or if I forget how England stood by us in the Spanish war when we needed it. It was sprung in the aldermanic house by an Irishman. I should like to know how an Irishman could be an alderman of Buffalo if our laws were the laws the Boers are fighting for. Wherever England goes she governs by laws that are for the good of all, and why any people should fight to oppose them is past my understanding.

GREENWOOD'S LOYALTY.

E. K.'s letter in today's issue is timely. We think, however, that the apparent lack of appreciation on the part of the citizens of Greenwood in reference to the going away of two home volunteers is excusable. The general public were not aware of the departure of Messrs. Shaw and Swinburne. Greenwood is not a recruiting station, and when a volunteer's offer is accepted he is not given time to notify his friends. His departure is generally a hurried one. Greenwood is intensely loyal, and Greenwood will not be slow in giving her brave soldiers a royal send-off when the opportunity presents itself. We quite agree with E. K. that there should be some organization to take charge of such matters, so that when the call comes the citizens will be in a position to give expression to their patriotic feelings. Should any Greenwood boys be accepted in Strathcona's Horse, they will not soon forget the reception tendered them by the citizens.

EDITORIAL NOTES.

THE closing down of the War Eagle and Center Star mines is a hard blow to Rossland. It means a shorter payroll by nearly $50,000 a month.

J. W. STEWART has announced that his firm has secured the contract for the Balfour extension. He is buying his supplies in Nelson. The Nelson Miner ought to be satisfied.

ANOTHER communication has been sent to the Times dealing with the music hall question. The publication of the communication would provoke further argument and the question is one that cannot be settled by newspaper discussion.

AN effort should be made to induce Rev. Mr. Robins to repeat at an early date the brilliant lecture on "The War" which so delighted the comparatively small audience at Mrs Foreman's hall last evening. No doub if requested he would do so allowing the proceeds to be devoted to the patriotic fund.

GRAND FORKS has a daily newspaper. The first issue of the daily Miner appeared yesterday. It contains the full associated press dispatches, abundance of local news and typographically is up to the high standardof the weekly Miner. F. H. McCarter & Sons, the proprietors, should receive generous support from Grand Forks. The paper is a credit to the city.

CANADIAN failures by branches are larger in manufacturing than in either previous year, but smaller in trading and other commercial lines. The iron industry reports the highest aggregate of manufacturing classes, and much higher than in previous years, and the clothing manufacture, which ranks next in amount, also exceeds previous years in defaults, while the leather and shoe manufacturing class reports larger defaults than in 1898, though smaller than in 1897. Among trading classes the failures were naturally largest in general stores, but smaller than in either previous year, and the failures in dry goods were larger than in 1898, but smaller than in 1897. The comparison is fairly satisfactory in most branches, though the increase in several manufacturing lines is relatively rather large.

THE Rossland Miner which supports the Laurier government has now formally repudiated Hon. J. Israel Tarte on the score of disloyalty, If wholesome criticism inside the Liberal will purge it of its evil tendencies, the purging should take place very soon.

THE decision of the government to repeal the Alien Exclusion act will remove the great obstacle to the development of the Atlin district and give a great impetus to that section of the Province during the coming season. As the principal of this act was endorsed by both sides of the house, it is our turn to remark that even the best of us sometimes make mistakes.

ANENT Mr. Joseph Martin's bill to legalize champerty, so called, it may be said that like every other question it has two sides. The argument in its favor is that with respectable practitioners it enables even the poorest client with a just claim to obtain redress against the greatest corporation. But to an unscrupulous lawyer such a statute only offers an opportunity for more crookedness. The legislature in its wisdom has decided that of the two evils the former is to be preferred, the bill having been defeated by 28 to 13.

PEOPLE'S FORUM.

TO THE EDITOR:—In your issue of the Times this morning appears the following: "Mr. Shaw, a nephew of C. Æ. Shaw, and Alfred Swinburn, left this city yesterday for the Transvaal."

Little did the crowd who assembled at the depot yesterday to give the Rossland hockey boys a send-off with cheers three times three, think that among the passengers by the same train were two brave boys as ever lived in this thriving city of Greenwood, who have left all home comforts, relations and bosom friends, went out at their country's call and offered their services, yea, and perhaps their lives that the empire to which we belong may be upheld in freedom, justice and truth.

Yet, Mr. Editor, Greenwood let them go without making any recognition whatever of such an event in her history.

Could the citizens not organize a committee with the mayor at the head, to take action in the matter, as from the report of the Hon. Joseph Chamberlain's speech in the house of commons a few days ago, it is the intention of the government to accept all offers of help from her colonies, so that is evident Greenwood may be called upon to send more men to fight for such a glorious cause, and for such a noble and gracious queen. My object in writing to the press is because it is the medium through which we may voice the feelings and opinions of the people and it is to the press we owe many of the opinions we form of the cause such as the old country and her colonies are called upon to fight at the present time.

Hoping some abler pen than mine will be enlisted in this grand and noble cause and thanking you in anticipation, E. K.

BERGER & BEDARD.

Greenwood, B. C. Dec. 15th, 1899.

IN PASS CREEK CAMP

The Rambler Mine, One Mile North of Eholt.

PLENTY OF FUNDS ON HAND

Main Shaft is Down Forty-Three Feet—Typical Ore Body of the District—Good Values.

One of the oldest mining companies operating in the Boundary district is the Everett & Spokane Mining company. The company was organized in the fall of 1896, to acquire the Rambler and Park fraction claims in the Pass Creek camp, near Eholt. A. G. Davis, the general manager of the company, was in town this week and to a Times man gave the following brief description of the property and the work now being done. The Rambler was located in July, 1896, by Mr. Davis and Charles Frank. In the fall of the same year the company was organized with its head office at Spokane, since then the head office has been transferred to Fairhaven, in the same state, where most of the officers and directors of the company reside.

IS NEAR EHOLT.

The Rambler is located about a mile north of Eholt, in the Pass Creek camp. Shortly after the formation of the company work was first started. It has an ore body typical of the great lodes of the Boundary Creek district, the iron cap measuring some 300 feet in width, and has been traced by surface trenching for fully 1,200 feet in length. This primary development also included a prospecting shaft sunk to a depth of 40 feet. Manager Davis says the ore is a pyrrhotite and sulphide, carrying gold, silver and copper values. Many samples of the ore have been assayed, with returns varying from $4 to $37 in all metals. Some of the rich ore, picked, went as high as $60 to the ton. After the preliminary development had been completed work for a time was suspended, until the first of last December, when the officers of the company made arrangements for the placing of a considerable block of the treasury stock, which was successfully accomplished. From that time dated the permanent development of the Rambler. This will consist of the sinking of a main working shaft on the ore body to an indefinite depth. The construction of substantial bunk and boarding houses has been completed.

PRESENT DEVELOPMENT.

Mr. Davis reports the shaft is now down 43 feet. It is a vertical shaft 4x6 feet in the clear. At the 100-foot level a station will be cut out and the extent of the ore body ascertained at this depth. The company has on its pay roll eight men. The officers of the company are: President, T. W. Gillette, Fairhaven, Wash.; vice-president and general manager, A. G. Davis, Greenwood, and secretary-treasurer, Mr. Strader, Fairhaven. Greenwood capital is largely interested in the undertaking, as there was quite a large block of stock subscribed for in this city. The company has in hand sufficient funds to keep the development going for the next six months. Within this period the property should be exploited and its merit known to warrant the continuation of the development and the installation of the necessary machinery plant which will be required for its permanent working.

CHESAW HAPPENINGS.

A Board of Health Elected—Lots of Building—Personal Mention.

CHESAW, Wash., Feb. 8.—[Special to the Times.]—At a public meeting of the citizens of Chesaw held last night, James P. Blaine, Henry Thompson and H. M. Mitchell were elected a board of health, and Dr. J. M. Beale health officer for Chesaw. There is no smallpox within fifty miles of Chesaw, and it is proposed to take such precautionary measures as may be necessary to keep it out of this district. Besides, a health officer was a necessity in order that the people might be vaccinated and certificates furnished persons who might wish to cross the international boundary line into British Columbia.

Notwithstanding the war in South Africa and the smallpox scare, Chesaw is livelier than ever. There is more building going on today than at any time in the brief history of the town, and the buildings are large frame structures of a very substancial nature.

The Chesaw public school has been reopened with Miss Hilda Blumenauer of Spokane in charge. The term will extend into the summer months.

V. H. Hopson and wife, both lawyers, arrived from Spokane a few days ago, and have established an officer under the firm name of Hopson & Hopson, attorneys at law.

Dell Holbrook, of Holbrook, Kean & Co., moved from Greenwood to Chesaw. He and his family are domiciled in the house formerly occupied by Mr. Kean.

A SCOTTISH SOCIETY

Meeting Held Wednesday Evening For That Purpose.

Wednesday evening there was quite a gathering of the Scotchmen of the city at the B. C. hotel. The meeting was called for the purpose of forming a club. The name given the organization was the Calendonian and St. Andrews Society. The officers elected were: President, T. Miller; vice-president, H. B. Munroe; secretary, J. Kerr, and treasurer, D. A. Cameron. The membership fee will be $5. The society will meet the first and third Wednesday's of each month. F. M. McLeod, T. Miller and J. M. R. Fairbairn were appointed a committee to draft the by-laws. On motion John A. Macdonald was elected piper. The executive committee are: W. H. Howe, D. A. Macdonald, J. D. Douglas, Duncan Ross, F. M. McLeod, J. M. R. Fairbairn, J. McNicol, C. Scott Galloway and C. F. Alton.

Big Companies Act.

During the past week three big Kootenay companies discharged the majority of their employes and practically closed down their mines. As has already been announced the War Eagle and the Hall Mines company took this action, and Rossland dispatches of tonight state that the B. A. C. have followed suit in reference to the Le Roi. There are many rumors current, one of them being to the effect that all big mining companies have decided to close down as a protest against the eight-hour law. While this rumor cannot be authenticated, the closing down of the three largest mines in Rossland district and the Silver King within a week looks as if the companies were taking concerted action. The closing down is a serious blow to Rossland, and Greenwood will be similarly affected if the mining companies here join with those of Kootenay. The Rossland dispatches follow:

ROSSLAND, Feb. 9.—[Associated Press.]—The Le Roi ceased shipping today and paid off about 100 men this morning, retaining about 200 men for development work only. It is not expected that the move will affect the other British American corporations mines. Shipments will not be resumed until the new 40-drill compressor plant ordered last October is installed and in working order. Manager Macdonald declined today to estimate when shipping would be resumed. Coming so soon after the War Eagle and Centre Star announcment, the Le Roi matter causes a great deal of uneasiness here. In many instances the action of all companies is alleged to be on account of the eight hour law but there is no confirmation of this from any reliable source. The Northport smelter now owned entirely by the Le Roi company or the B. A. C.. will of course close down.

ROSSLAND, Feb. 9—[Special to The Times].—Last night at 11 o'clock the hoisting engine in the Le Roi broke down, and the management concluded to stop further shipments until the new machinery, which is now on the way, is installed. This necessitates the laying off of 160 of the men employed in the Le Roi out of a total of 360. This morning the 160 men were laid off. This does not affect the No. 1, Josie, Columbia-Kootenay and other properties being operated by the British American Corporation.

All sorts of rumors were flying about concerning the matter, and Bernard MacDonald, the manager, was seen, and in reply to questions said: "Yes; the stoping and shipment of ore at the Le Roi has been suspended for the present. No; I cannot say how long the suspension will last. The installation of heavy machinery and the development of the mine will be the work of the company exclusively for some time. The development and equipment of the Le Roi mine now going on has become absolutely necessary for its economical operation. It is a fact that up to this time the Le Roi mine has been operated with the same hoist and through the same shaft used by the original owners for a limited output from comparatively shallow depths. This development and equipment no longer serves the purposes of the company, and it will for a time devote its energies exclusively to the development of the mine and its equipment with adequate machinery. This work will be pushed as rapidly as possible. So far as I can tell at the present this matter will not affect the other properties."

A Night Of Terror.

"Awful anxiety was felt for the widow of the brave General Burnham of Machias, Me.; when the doctors said she would die from Pneumonia before morning" writes Mrs. S. H. Lincoln, who attended her that fearful night, but she begged for Dr. King's New Discovery, which had more than once saved her life, and cured her of Consumption. After taking, she slept all night. Further use entirely cured her." This marvellous medicine is guaranteed to cure all Throat; Chest and Lung Diseases. Only 50c and $1.00. Trial bottles free at Miller Bros., drug store.

NOTICE is hereby given that application will be made to the Parliament of Canada at its next session to incorporate a company, with power to construct, maintain and operate a railway in Yale district, in the Province of British Columbia, of either standard or narrow gauge, and utilizing steam, electric and other motive power, from a point on the international boundary line at or near Carson city, where Kettle river intersects the said international boundary line; thence by the best available route in a general northerly direction in the vicinity of Fourth of July creek to a point at or near the junction of the East and West Forks of the said creek; thence in a general westerly course to the Phoenix Mining camp; with power to construct, maintain and operate a branch line from the starting point above mentioned easterly to some point on the Columbia and Western railway between the said starting point and Grand Forks or easterly thereof; with power also to construct maintain and operate branch lines from the, said line of railway to the Central (or White's) mining camp, the Wellington camp, the Skylark mining camp, the Summit mining camp, and the City of Greenwood; with power also to construct, maintain and operate telegraph and telephone lines in connection with the said railway and for other purposes; with power also to construct, erect, maintain, and operate smelters, reduction and other works for raising, crushing, smelting, reducing, refining and amalgamating all kinds of ores, metals and minerals and their products and to render the same merchantable and fit for use; with power also to acquire, construct, own, maintain and operate steamers, barges, ferries and other vessels on Kettle river and its tributaries and elsewhere in connection with the said railway and otherwise; with power also to acquire, construct, maintain, own and use wharves, piers, docks and landing places in connection with the said undertaking; with power also to acquire, construct, own, maintain and use water powers for any of the purposes herein mentioned; with power also to acquire, construct, erect, own, maintain and operate electrical and other works for the purpose of transmitting electricity, heat, light, and power, to be be used in connection with the said undertaking and for the raising, crushing, washing, smelting, reducing, refining and amalgamating ores, metals, minerals and their products and to sell and lease electric power and otherwise; with power also to acquire, take on lease or agreement, or by grant, and to make traffic arrangements with any railway, steamboat and other companies for running powers over any railways, tramways, waterways, and other roads or ways which are now or may hereafter be constructed and operated to carry freight, passengers, and other traffic to and from mining camps and other places situate south of the boundary line; and also to acquire all other necessary rights and privileges and to do all things requisite for the purpose of carrying out the object and intention of the said company. S. C. BIGGS,

Solicitor for Applicants.

Toronto, January 10, 1900. 185-9.

MINERAL ACT, 1896.

CERTIFICATE OF IMPROVEMENTS

NOTIC .

QUEEN OF SHEBA Mineral claim, situated in the Kettle River Mining Division of Yale District. Where located: Deadwood camp.

TAKE NOTICE that I, George Andrews, Free Miner's Certificate No. B 7726, for myself and as agent for Loria A. Smith, Free Miner's Certificate No. 157, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under Section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 3rd day of January, 1900.

GEORGE ANDREWS.

COPPEROPOLIS and MAGNOLIA Mineral Claims, situate in the Kettle River Mining Division of Yale District. Where located: InCopper camp.

TAKE NOTICE that I, George Riter Free Miner'sCertificate No. B6585, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 11th day of January, 1900.

GEORGE RITER.

AS TOLD TO THE INTERVIEWER.

In his regular daily rounds of the hotel offices to look over the register books for information regarding the latest arrivals in the city, a Times man was yesterday staggered at a signature that appeared on the register of the Clarendon hotel. The signature was something new; and for a moment he was at a loss to account for its strangeness. Made with a fine pointed pen the characters were like unto the hieroglyphics of a shorthand scribe. While puzzling over the signature the reporter happened to look up and caught the merry twinkle in the eyes of Cashier Nevins, who soon enlightened him as to the author. It was the handwriting (?) of Hali Adali, the Turk, better known to the sporting world as the "Sultan's Lion." It was not long before the reporter was ushered into his presence, where the giant was indulging in an after-dinner cigar, and withal feeling content with himself and the world generally. Rossland had treated him kindly and had added to his exchequer to no small amount. The Sultan's Lion is a genial fellow, and though he does not speak the Queen's English as fluently as a native-born Canuck, he understands it and replies to any question more with gestures than anything else. Asked the best man he ever encountered on the mat, he replied that it was Yousouf, known as the "Terrible Turk." At one time the two men came together before the Sultan of Turkey and wrestled continuously for four and a half hours, neither being able to put the other on his shoulders. For this the Sultan presented each with $2,000. At two other times he put his fellow countryman to the mat in 60 minutes, and two hours and a half respectively. He has a great respect for Farmer Burns, Jack O'Neil, D. McMillan and Louis Cannon; he considers them all good men, but none have yet been able to stand up against him any length of time. Hali Adali is 33 years old, weighs 260 pounds stripped, is six feet two inches in height, has a chest measurement of 49 inches and a hip measurement of 48. He was born in Constantinople. He has been in America for the past 18 months and likes the country very well. He hopes to be in Paris within the next six months, where he will meet Tom Cannon, the English champion.

Registered at the Hotel Armstrong are F. W. Peters of Nelson, C. P. R. general freight agent for the Kootenays; W. R. MacInnes of the C. P. R. staff at Winnipig and C. S. Drummond of London, Eng. The party are here on a pleasure trip. Mr. Drummond is well known in the Kootenays in connection with the Nelson Electric Tramway company, the company being a subsidiary company of the British Electric Traction company of London, England, of which he is one of the three members of the executive committee. Mr. Peters is the London company's representative in British Columbia. Mr. Drummond is now arranging for the putting in of an electric-tramway system in Rossland. In an interview he stated that the parent company's £10 shares were standing at £16 when he left London some weeks ago. They own plants all over the world. In Rossland, as in Nelson, they would operate as a local company, incorporated under a provincial charter, but the British company would own all the shares. Emile Garcke of London was the managing director, and with John C. Raworth and himself constituted the executive board, the other directors being Sir Charles Wilson (chairman), Lord Strathmore and Sir Charles Freemantle.

FOR REGISTRY OFFICE.

Both Board of Trade and the City Council Act.

At a meeting of the council of the board of trade last evening in the city hall, the question of securing the supreme court registry for Greenwood was fully discussed and a strong resolution passed endorsing the action taken by the city council and the local bar association, and the secretary was instructed to wait on the council and urge the appointment of Mayor Hardy as delegate to go to Victoria and act in conjunction with Mr. Galloway as president of the board of trade in presenting Greenwood's claims.

A resolution was also passed endorsing the resolution of the board of school trustees in memoralizing the government for another school building in a more central part of the city for the convenience of the younger children.

THE CITY COUNCIL.

A meeting of the city council was held immediately afterwards, at which Mayor Hardy and Alderman Sutherland, Sullivan Cropley and Bannerman were present. Mr. Gosnell, secretary of the board of trade, addressed the council, presenting the resolution passed by the board of trade, strongly urging immediate action.

On motion, it was decided to appoint Mayor Hardy as recommended, and to set aside a sum to defray expenses. Alderman Sutherland was appointed acting mayor in the absence of Mr. Hardy.

WAR EAGLE CLOSES DOWN.

Machinery Litigation Forces This Mine and Centre Star to Close.

ROSSLAND, Feb. 5.—The machinery troubles of the War Eagle and the Centre Star Co's have at last brought about the disaster long predicted by many shrewd mining men in this district. They are now compelled to stop production until the new machinery installed and the exhausted development in the War Eagle is caught up. The men in the stopes will be laid off tomorrow night and only a small number retained for construction and development. Mr. Kirby, the general manager, has issued two letters to the management of both mines and these have been embodied in a circular issued to the shareholders today. To the Associated Press correspondent Mr. Kirby expressed the disappointment and deep regret with which the directors and management have taken the step. All shipments and consequent dividends will cease after tomorrow and it will be some months before the new machinery will be installed and shipments resumed. The matter can only be regarded as a disaster to Rossland camp.

ALEX. WALLACE DEAD.

A Pioneer Prospector of the Boundary Creek District.

Alex. Wallace, who was mentioned in the Sunday issue of The Times as being in the Greenwood hospital suffering from pneumonia, died yesterday afternoon at 5:30. The deceased was a well known prospector, being one of the old timers of the Boundary, having been in the district nine years. He was a man nearing 50 years of age, of Scotch descent and possessed of considerable mining property in Central camp and along the west fork of Kettle river, in both these sections he was one of the first locators. He had been in the hospital but a few days and was considered a serious case. Dr. Jakes desires to have it announced that the remains of the late pioneer will be interred in the Midway cemetery Wednesday, the funeral cortege leaving the Greenwood hospital at 1:30 p.m. All friends and pioneers are requested to attend the services.

MANY LEGACIES.

The Dead Pioneer Did Not Forget His Friends in His will.

The late Alex. Wallace, by his will, made in August last, distributed his property to the old timers whom he was intimately acquainted with. He left to George Wells, of Midway, all his interest in the Highland Lass and Duncan claims; to George Andrews, of Anaconda, his interest in the Highlander fractional claim; to Duncan Murray, of Midway, his interest in the Beaver claim; to Hugh Murray, of Midway, his interest in the Logan claim: to Dr. Jakes his interest in the Bell claim, all of Which are on the West Fork of Kettle river. He also leaves $1,000 to Mrs. Hugh Murray, of Midway. The residue of his estate, including the Rob Roy, Old Guard and Prince claims, and his pre-emption near Beaverton, goes to the children of H. Murray. All bequests are subject to payment of his debts, funeral expenses, probate and succession duty. The executors are Ed. Jacobs and J. P. McLeod.
