ODDFELLOWS

SNOWSHOE LODGE NO. 46, INSTITUTED AT

PHOENIX ON THURSDAY LAST

Teams From Greenwood and Grand Forks Initiated Thirteen New Members—The Officers Elect.

Last Thursday night Snowshoe Lodge No 46 was installed at Phoenix by D. D. G. M. W. M. Law assisted by Grand Lodge officers from Greenwood and Grand Forks. Seven old members who had applied for the charter were admitted from other lodges by card and thirteen new ones were instructed in the mysteries of Oddfellowship by teams from Grand Forks and Greenwood lodges. This work occupied nearly the entire night. The officers appointed and installed by Snowshoe lodge were as follows:

N. G., D. Whiteside; V. G., C. A. McClung; Conductor, R. A. Scott; Warden, Syd. T. Coulton; Treas., Dr. G. S. Gordon; R. S., G. R. Mead; F. S., J. K. McCallum; R. S. N. G., A. Fraser; L. S. N. G., Ed Lowe; R. S. V. G., Dr. R. Boucher; L. S. V. G., James Murray; O. G., Marcus Martin; I. G., Ed. Schoby; P. G., Thos. Hardy.

About midnight the visitors were entertained at a supper prepared by Harry Odams of the Knob Hill Cafe. With the visitors present there were nearly 100 Oddfellows present in the lodge room that evening.

Several applications for membership in the Phoenix lodge has been received and the prospects for Snowshoe Lodge are excellent.

IT'S NO PIPE DREAM.

Yesterday afternoon a few mining men and brokers were gathered in a town town insurance office where on occasions the crowd is wont to congregate and swap yarns. It was a dull day, and the drizzling rain had caused the streets to become deserted so that even the irrepressible curb broker could do no business. It was comfortable inside and there was time to talk along the little group mentioned, so when the scribe sauntered in the conversation was going along at a merry rate. Current topics were discussed till exhausted, when one of the story tellers became reminiscent. This is a yarn half prophetic half historical. Times may be a little quite and capital not coming in as freely as we would like to see it, but I want to tell you that the Boundary is yet destined to astonish the world with its great lodes of copper-gold ore. But what is the use of telling you this you all know it. These low grade ore bodies cost money to mine. Sinking four and six compartment shafts is no picnic, its slow and expensive. You don't hear so much about this method now. Take Phoenix camp for instance nothing particular in this line is on the books. There's a nigger in the wood pile and it strikes me that something new is on the tapis. Its no use quarrying into the bowels of old Mother Earth and then hoisting the ore up again to the surface, but what is going to be done is to drive a tunnel clear under Phoenix camp from some point on Boundary creek. It may not be done this year or even next year but I'd like to bet what I have that the enterprise will be started in three years. I know that surveys for this stupendous project have already been made, and engineers claim it is quite a feasible plan. A tunnel two miles in length would tap any of the ore bodies in that camp, and what is more it would be at a depth of 2225 feet. The whole enterprise could be run by electricity the supply for which will come form Cascade Falls. Electric ore cars, electric drills, electric blasting, electric lighting and so on all down the line will be brought into play, and then, and not till then will they be able to talk about their economic mining. Yes, boys, that's going to be the scheme the immense ore deposits of Phoenix and Wellington camps will in time be worked from down here in the valley and it will require not one or two smelting plants but half a dozen big ones to take care of the ore. What do you think Breen is waiting for? A spot to locate his smelter? Not a bit of it, he's framing up plans to get capital to run this mammoth tunnel. It will require lot sof dough and brain work combined, but when you come to think of how they mine in the Couer d'Alenes, on a similar plan, this will only be child's play. In that country a tunnel two and a half miles was laughed up, when its nervy projector first announced his intention, but its an actuality now and a paying proposition. This system is being followed over in the Palmer Mountain district where Johny Boyd is running a mile tunnel. Then there's the Sutro tunnel that made millions for the Californians. History is going to repeat itself in this district and it will not be long before the first tunnel is under way. This is no pipe dream; its a prophecy that you can bank on." The meeting thereupon broke up it wanted time to consider so gigantic an undertaking and the scribe takes this, his earliest opportunity, of announcing to the readers of the Times what is in store for Greenwood in the not too distant future.

AT FAIRVIEW

PROPERTIES OF THE FAIRWIEW CORPORATION LIMITED.

A NEW ORGANIZATION.

Company to be Refloated on an Assessable Basis. The Many and Varied Holdings of Company.

FAIRVIEW, B. C., June 25.—(Special to the Times.)—There is a full face of milky white quartz, in the west drift on the third level of the Stemwinder, now in 90 feet. Since the drift was started no attempt has been made to crosscut the vein to ascertain its width. The drift is entering a point, under the second level, where the vein swelled out to, as shown by the crosscuts, from 18 to 20 feet between the walls, while the average width of the vein is from six to eight feet in other parts of the mine. Then too, and what is more satisfactory to the management is the noticable increase in the values. Foreman Campbell recently made 10 samplings, the average of which gave $7.94 in gold and silver, showing that the value of the ore in this drift has greatly improved. Development for the present will be confined to continuing the west drift and when it is in 100 feet a crosscut will be run from wall to wall. The showing is exceptionally promising and the values are the best averages of ore taken from the mine. It must be remembered by those on the outside that the Stemwinder is a big low grade free milling proposition, capable however, with the most economic mining and low cost of milling, of becoming a profitable producer.

Richard Russell, the manager of the Fairview Corporation, Ltd, owning the Stemwinder mine, is at present in Montreal in conference with the lead-shareholders, and writes to the office here that satisfactory arrangements are progressing with a view to the reorganizing of the concern on an assessible basis. It is proposed to incorporate a new undertaking to be called the New Fairview Corporation, Limited, capitalized in the same amount as the old viz $1,000,000 in 4,000,000 shares of the par value of 25 cents each. These shares will be exchanged for the old company's stock as paid up to 22 cents, leaving three cents a share to be called up as the board of directors deem advisable. So that the scheme will not work a hardship the levy will probably be a few mills per month. As the old corporation still has about 1,000,000 in its treasury unissued the three cent assessment will be confined to only the 3,000,000 shares issued. This will bring in, when paid up a sum equal to $90,000. Out of this amount the mortgage due to Messrs Gooderham & Blackstock will be repaid, and the balance will be used in the purchase of additional stamps for the Tin Horn mill, in the re-modelling of same and the proper equipment of the mine for the extraction of a large daily tonnage.

The Fairview Corporation, Limited, is a unique concern in many respects and its assets are quite varied in character. Beside the Stemwinder mine and Tin Horn mill referred to the corporation owns the townsite of Fairview, containing 320 acres, less the Government reserve. It owns the Hotel Fairview, one of the best hotels in the interior of the province, splendidly furnished and well managed by Sandy McAuley. It was built during the boom here and with its furnishings represents an investment of over $20,000. Opposite the hotel is the office and assay building fully equipped and furnished. Twelve miles north of town the corporation has 400 acres of coal lands, the croppings of which show a good quality of bituminous coal. With proper development this land will one day be worth many thousands of dollars. Water rights to generate electrical power to use in the mine and mill and light the town have not been overlooked, as the corporation has a water right on a stream emptying into the Okanogan river about eight miles from town. The stream carries from 2,000 to 3,000 miner's inches and has a fall of over 300 feet in a distance of half a mile, capable when harnessed of generating several thousand horse power. Its other assets consist of 15 crown granted quartz claims, on which more or less work has been performed, all within a radius of three miles of Fairview.

The Stemwinder mine is situated about three miles north-east of and 1200 feet higher than the town, on the Fairview-Keremeos wagon road. Running through the full length of the claim and traceable for several thousand feet additional through adjoining claims, and three well-defined parallel veins. The ore is a white quartz carrying gold and silver in the form of free gold and sulphurets' the latter consisting of iron pyrites, galena, chalco-pyrite and in the north vein especially, occasional bunches of blende. The principal development has been confined to what is known as the "maid" vein, the others being the north and south veins.

The working shaft is a double compartment 5 x 11 feet in the clear, sunk on an incline of 60 degrees for 300 feet. The first level was opened at a depth of 85 feet. A drift west was run for 185 on the main vein. In this distance a crosscut was made north to the north vein, which was also drifted on for 100 feet. At a depth of 185 feet the second level was opened. At this point the dip of the vein carried at 16 feet north of the shaft. This level has two drifts. The east drift followed the vein for 300 feet and the west drift 480 feet. At a point 150 feet in the west drift an upraise was made to the first level. In the same drift also crosscuts were run north and south to the two other veins. The crosscut north caught the vein which has 100 feet of drifting. The crosscut south has not been driven far enough to encounter the vein and work in this direction has for the time being been suspended. It is on this level, in the west drift, that the notable showing of quartz occurs. Throughout the main vein is exposed without a break and as a rule with only part of the vein exposed, it being wider than the drifts. In the west drift a distance of about 100 feet the veins starts to widen out and for a length of 100 feet where crosscuts in two places from wall to wall measure from 18 to 20 feet in width. Samplings of 165 feet of this drift gave an average of $4.34. The average value of the ore in the north vein is reported to be $4.45, though this vein is smaller than the main one.

On the third level, at a depth of 289 feet, and which has only recently been opened the drift west is in 90 feet, with the vein showing evidence of widening and the values increasing.

The present equipment, consisting of boiler, hoist, four Rand drill air compressor etc is considered sufficient to develop the mine to a depth of 500 feet, which is proposed to be done as rapidly as possible. It is estimated by E. S. Thurston M. E. who examined the mine in January last, the ore can be mined and delivered at the mill for a cost of $1.75 and milled at 75 cents, or a total cost of $2.50 per ton. These figures are given on a daily output of not less than 150 tons with a mill of 60 stamps. These figures however do not include office expenses, which would come out of other revenues derived by the company. On a basis of these rates Mr. Thurston computes that with a 60-stamp mill, ore running $3.00 per ton, will a little more than pay expenses; that $4.00 will give a profit of $5,000 per month and if his conclusions prove correct and a steady $5.00 grade can be maintained, a profit of $10,000 could be derived.

Regarding the coal land, it is understood, that if the funds will permit, some exploration work will be attempted this year. The 400 acres owned by the corporation lies in a belt of sandstone about three miles wide bounded with granite. The only work done on the same consists of a 60-foot circular shaft 4feet 6 inches in diameter, sunk about the centre of the property. This shaft is now full of water. J. H. G. Riley, a mining engineer, who reported on the land states that the shaft passed through a seam of coal and carboniferous schist about 5 feet 3 inches in thickness. On the floor there is a seam of bituminous coal vary from one to two feet in thickness, overlaid with thin

(Continued on Page 2.)

HILL'S ROAD

MARCUS-REPUBLIC ROAD WILL BE BUILT IMMEDIATELY

BY CONTRACTOR SIEM'S

Under Direction of Chief Engineer John F. Stevens—Intention to Continue to the Okanagan.

The Marcus-Republic road will be built at once. Peter Siems a well known railway contractor will do the work under the direction of Jno F. Stevens chief engineer for the Great Northern system. No contract has been let to build the road Mr. Siems doing the work under the approval of the engineer. Already plant and men are being rushed with the object of giving Republic railway communication by November 1st. The rolling stock for the road was purchased last week. The road will leave the S. F. & N. at Marcus, follow the Kettle river to Cascade, join there with the V. V. & E. system, and from Carson will follow the Kettle river to Curlew, continuing there to Republic.

The Great Northern intends to continue its system into the Okanagan. Last week articles of incorporation of the Washington & Great Northern railway were held at Seattle. The incorporators are James J. Hill and other Great Northern officials. The railway will give connection to Myers Creek, Loomis and other mining camps across the International Boundary. The western portion will connect with the eastern section at Midway, continuing to Rock Creek, thence to Bolster Wash. on to Molson and to Osoyoos Lake and will diverge southward to connect with the present Great Northern system at Wenatchee.

The distance to be covered in the above from Marcus to Wenatchee is about 250 miles and the estimated cost is $9,000,000.

The Boundary country will be tapped from Midway, a branch running up Boundary creek through Greenwood and on to Summit camp, continuing around the eastern slope of Boundary creek to Phoenix

The Dominion Copper Company's smelter will be built near Greenwood, where direct railway comminication can be secured to all the Boundary camps, Republic, Curlew, Camp McKinney; Rock Creek and all the mining camps in the west. Connection can here be secured to ship the product of the smelters over either the Great Northern or Canadian Pacific railway system.

The V. V. & E. charter is controlled by the Great Northern and the intention is to build to the coast, connecting at Osoyoos lake with the portion of the system described above.

Fresh strawberries received twice a week at Semerad's, Copper street.

IN THE LONG LAKE CAMP

C. S. Wallis has returned from a trip to the Long Lake section of the Boundary, where he has started work on his property, the Ethiopia. A crew of men is now at work stripping the ledge, and these will be employed all summer. Later underground work will be commenced, but the amount of surface water to be contended with at the present time makes it advisable to confine the immediate work in hand to the surface.

Mr. Wallis visited the Jewel mine, where a force of some 35 men is at work. Development is being carried on extensively under ground, one of the features under way beiny a new two-compartment shaft about 650 feet to the north of the old shaft. Which is down a distance of 330 feet. The new shaft has already reached a depth of 60 feet and good progress is being made. The mine has 20,000 tons of ore blocked out, and the work under way will substantially increase this reserve. It is understood that the company proposes to erect a mill at an early date.—Rossland Miner.

FAIRVIEW MINES

(Continued from Page 1.)

layers of slate and coal alternately to a thickness of 5 feet 3 inches. The body of carboniferous schist outcrops in several places in a dry creek 43 feet to the north of the shaft. The coal is bituminous of good quality and suitable for making steam and coke. The following is the analysis of samples:

	Aver.	Picked
Moisture	.90	.90
Volatile matter	15.65	24.3(
Fixed carbon	44.65	68.63
Ash	38.80	6.17
	100.00	100.00

Coke 83.45. Heating effects, one pound of coal 6.66 lbs steam.

Surrounding the company's land are 3,000 acres owned by Robert Wood, John Douglas and associates of Greenwood. With capital properly applied these coal deposits will doubtless some day become extremely valuable. An effort at least should be made to exploit the land instead of allowing it to remain idle.

A IMPORTANT EXPLORATION.

Provincial Mineralogist will Visit an Important part of the Interior.

At the end of the present week, Mr. W. F. Robertson, provincial mineralogist. starts on an official trip through a portion of the province that of late has come into great prominence though some sections of it have hitherto been little explored. The party will consist of five, Mr. Robertson, a packer, a cook and two McGill students who will join at Vernon and make the trip for the practical experience it will afford them.

Leaving Vernon with a pack train the party will visit the mines in the Fire Valley, thence make a trip to the head waters of Kettle river, a region that is practically unexplored and turning south will next proceed to Rock creek and the Boundary country. Turning west they will pass through the Similkameen, and passing over the Hope Mountains will come to the coast through the Fraser valley. It is expected that three months will be required to make the journey, and as the country is that through which a railway to the coast would traverse, reliable official information on the district will result from the exploration. Of course the reason for the trip is to enable Mr. Robertson to visit the mines already opened out in the district, and to get a general idea of the mineral possibilities where as yet there have been no mining operations. —Colonist.

METAPHYSICAL STUDY.

When Rutledge, the bank robber and murderer, killed himself, he had in his breast pocket a bible which was given to him by his wife last Octobor, and on the fly leaf of which he had written a request that it be given to his pal, Rice. When Rice was told of Rutledge's death he at first received the news with apparent sang froid but when left alone with his guard he burst into tears and told him that Rutledge had a bible in his pocket he would like to get. The jail officials were suspicious and narrowly examined the volume to see if any other than spiritual benefit was concealed in it, but nothing could be found which indicate that any other value attached to it. The incident opens up an interesting train of speculation in connection with this dramatic series of tragedies. Can a man be of a religious turn of mind and at the same time go on commiting bank robberies, contemplating and commiting murder and suicide, asks the Ottawa Citizen? Outside the mediums of religion and creeds do men who habitually transgress the temporal and devine law still secretly maintain a religious attitude on the basis of some unformulated creed of their own? If such men openly professed religious belief they would by scoffed at as hypocrites. The only logical basis for the maintenance of such an attitude in a spiritual sense would be an inward conviction that they are the victims of circumstances, "bound to the wheel" as the llamas of Thibet phrase it, helpless victims of a predestination over which they feel that they have no control. Time and again it has been shown that conventionally bad men have much that is generous and intrinsically good in their natures. Occasionally it finds an opportunity to vent itself and incidents are not uncommon where hardened criminals in penitentiaries have sacrificed their lives to save others, persons they have no particular interest in usually, though it said that "greater love hath no man than this that a man lay down his life for his friends." The spiritual attitude of what may be called the conventionally wicked, for lack of a better term, who secretly maintained an uncreeded faith may be something akin to fatalism, a conviction that they are following out an uncontrollable destiny and that allowance will be made for them by an allwise power. In any case it is rather an interesting problem for metaphysicians.—Nelson Economist.

Inspection of Metalliferous Mines.

INSPECTORS' DISTRICTS.

THE Inspectors of Metalliferous Mines are hereby assigned the following as their respective Inspection Districts with headquarters as noted. Such assignment to take place from June 15th, 1901, until further notice.

ARCHIBALD DICK, Inspector.

Headquarters, Cranbrook, Office of Deputy Mining Recorder.

Inspection District shall comprise all of East Kootenay and also Goat River Mining Division of West Kootenay.

In addition to the duties of Inspector of Metalliferous Mines, Mr. Dick will also act as Inspector of Coal Mines within the same District.

JAMES MCGREGOR, Inspector

Headquarters, Office of Mining Recorder, Nelson.

Inspection District shall comprise all of West Kootenay except Goat River Mining Division, and also the Grand Forks and Kettle River Mining Division of Yale District.

THOMAS MORGAN, Inspector.

Headquarters, Government Buildings, Nanaimo.

Inspection District, Vancouver Island and Coast District.

Mr. Morgan is also Inspector of Coal Mines for this District.

Notice is hereby given of such Inspection Districts and that in accordance with the "Inspection of Metalliferous Mines Act, 1897," and Amending Acts, notice of accidents to employes happening within any of such Districts must be promptly reported both to the Inspector of such District and also to the Minister of Mines, Victoria.

In mines not included in the above Districts managers will report, in duplicate, to the Minister of Mines direct, who, if he considers it necessary, will assign an Inspector to specially report.

Blank forms upon which to make reports of such accidents may be obtained from the Inspector of the District, from the Mining Recorder, or upon application to this office.

RICHARD McBRIDE,
Minister of Mines.

Department of Mines,
5th June, 1901.

LABOR TROUBLES.

The relations between capital and labor on this continent are becoming more strained with each recurring season. Possibly the tendency to violence is somewhat less pronounced; but that is uncertain. No one knows what a day may bring forth when thousands of idle men are gathered together to discuss what they may conceive to be the injustice which is being meted out to them. It has become a trite saying that the workman gains nothing by striking. He has at least vastly improved his position by agitation, and it is extremely doubtful if it would have had much effect against that which is said to have neither soul nor sentiment without the menace of a strike behind it. There is no doubt whatever about these conflicts being a great evil. They bring privation and suffering to the innocent. The strikers are not the chief sufferers. If they were victory would not in so many cases perch upon the banner of the corporations. But the evil effects of the closing down of industries are not by any means confined to the families of the active participants in this form of modern warfare. They extend to practically a whole community. In some cases not only communities but nations are affected. Business is diverted into other channels and stays in them. The tide never again rises to high water mark. Machines which would have been built at home and were required immediately were obtained from the United States. Orders from South Africa, Australia, Burmah and India poured into American manufacturers and caused the tremendous expansion of foreign trade of which we have heard so much. In the case of the locomotives for the Northwestern railway the experiment was not a success, but failure did not follow in every instance. The British are a patriotic people, but they never allow patriotism to interfere with business. If they can get superior articles from abroad at reasonable prices they will buy them. The fact that the Yankee knocks off one-third of the home price to secure the foreign market has nothing to do with the case. No doubt the same feeling prevails in the colonies. Therefore it is clear that strikes are an economic mistake and that it will be well with the nation which first solves the problem of abolishing them. The German workman is not so aggressive as his British or American brother. Whether it arises from the discipline which compulsory service in the army inculcates or from the natural attributes of the individual we shall not undertake to say, but it is the fact. Probably it accounts for the great industrial strides the Fatherland has made in late years. If it be a matter of discipline the German military system may not be such a heavy burden after all, as long as wars dread alarms are not sounded.

The trackmen of the C. P. R. are out on strike in British Columbia. The public have not been informed of their grievances and have no means of arriving at a conclusion in regard to the nature of the complaint they have against the company. But whether the strike be "sympathetic" in its nature or not, it is unfortunate from every point of view, and is likely to prove disastrous to the participants.

There is a probability that the white fishermen on the Fraser river will refuse to cast a net this season be the year a lean or fat one, the run great or small. The canners are worldly wise men and have two strings to their bow. They have the Japanese in reserve and can dictate the terms on which operations shall be carried on. It was a great strategic stroke to stock the banks of the river with such a willing people, but it is not likely to increase the popularity of corporations generally, and it is a very evil thing for British Columbia. Capital surely owes just a trifle more to the countries in which it carries on its operations than the earning of dividends for stockholders. If it hopes to earn dividends with regularity it should take some interest in the welfare of the community in whose midst it is invested.

It is not necessary for us to point out that these strikes must have a serious effect upon business in British Columbia. There should be a less barbarous way of settling disputes of this character than tests of endurance and obstinacy between employer and employee. We cannot expect the C. P. R. to be forced into an increase of its monthly expenditure by $300,000; nor is it reasonable to ask the canners to pay a price for fish which they assert would mean a loss to them upon the season's operations. The country is vitally interested in the dispute and owes something to both capital and labor. No time should be lost in creating a tribunal for the adjustment of such differences.

THE geological survey of Canada will soon be compelled to offer better inducements to members else it will lose all the brains it has so long boasted of. The latest member to desert the ranks is J. C. Gwillim, for several years a valuable member of the survey. Mr. Gwillim has accepted a more lucrative position as consulting engineer to a large mining syndicate operating at Nelson, B. C. Among other members who have resigned from the geological survey during the past year are: A. P. Low, who goes to Labrador for a Philadelphia iron and steel syndicate; J. McEvery, who went to the Crow's Nest coal fields for Toronto capitalists; A. M. Bell, accepted a position as geologist for the Clergue interests of Sault Ste Marie; A. E. Barlow has gone to Sudburg for an English nickel syndicate. With the resignation of such a number of able and prominent members the survey must certainly feel the effects.—Western Mining World.

A MONTREAL dispatch says that Hugh Sutherland, manager of the Dominion Copper company, had arrived there and stated that a contract had been awarded for the erection of a hundred ton smelter in the Boundary district. The location will be decided upon next week. It must be ready for operation in October. The dispatch evidently misquotes Mr. Sutherland since the Dominion Copper company's smelter will have at least 1,000 tons capacity and it would be impossible to have it in operation within the time stated. A meeting of the directors of the Dominion Copper company will be held shortly in Toronto when the plans of the company will be decided upon.

DURING the ten months ending April 30th, Canada exported gold in dust and nuggets to the value of $17,570,925. The bulk of it $17,395,925 went to the United States from the Yukon. In what way was this large value returned to Canada? Was it in American goods sold to the miner's of the Yukon? The value of unrefined copper exported during the same period was $2,046,258, of lead in ore $2,133,766, of nickle matte $859,720 and of silver ore $2,032,839.

THE Rossland Miner thinks the surest way of securing an impartial commission to investigate the mining situation is to vigorously point out the evils that exist. The only difficulty about that is that the public might be slow to accept the Miner's dictum as to what constitutes an evil.

FORBES M. KERBY

LOCAL HAPPENINGS.

A. M. Whiteside has returned from the coast.

E. H. Thurston of the Carmi has returned from England.

F. H. Oliver, managing-director of the Morrison Mines, is in the city.

Archdeacon Pentieath of Vancouver was a visitor in the city this week.

Geo. O. Buchannan, Kaslo, registered at the Armstrong on Friday last.

J. R. Miller, owner of the Miller block, spent several days in the city this week.

Ross Thompson, Rossland, and Frank Watson, Spokane, were in the city this week.

R. T. Daniel of Spokane and formerly of Trail paid Greenwood a business visit this week.

Miss Wilson is now prepared to take pupils in piano playing. Residence, next door to Baptist church.

F. M. Elkins and bride have retuned from their honeymoon trip and have taken up their residence on Government street.

J. W. H. Smythe, manager of the Bank of Commerce has been confined to the house with rheumatism for the past week.

For Dominion Day all C. P. R. agents will sell round trip tickets at a fare and one-fourth good going 29, 30 and 1st. return till 2nd.

R. I. Kirkwood, a brother of W. J. Kirkwood of this city, has returned to his home in Slocan City after spending several weeks in the district.

Several important mining deals are being negotiated and if carried to a successful issue will mean the development of some additional important mines in the district.

A special train will leave Greenwood at 8:30 a. m. o'clock on Dominion Day for Grand Forks, returning will leave Grand Forks at 11 p. m. This is in addition to the regular train. The fare for the round trip is $1.20,

Two Sisters of Peace were in the city this week collecting for the hospital which they intend opening in the city about July 1st. The present school building will in all probability be used temporarily. It is the intention of the Sisters to erect a large hospital as quickly as possible.

At Greenwood on the 17th inst., K. M. Stephen, book keeper for the Hunter-Kendrick company, Grand Forks, and Miss M. L. McQuoid late of Wheatland, N. D., were married at the residence of W. T. Hunter, local manager of the Hunter-Kendrick company. Rev. J. R. Robertson, B. A., of Grand Forks, officiating.

Mayor Jakes and Ralph Smailes returned on Tuesday from the coast where the representations made by them in reference to the public school received favorable consideration from the government. H. C. Shaw another member of the delegation will return early in July, legal business detaining him.

For sale at a special bargain one new upright Gerhard Heintzman Art Piano very latest design, handsome walnut case for $425.00, regular price $600.00. The Gerhard Heintzman is the premier piano of Canada, and is used in all leading conservatories and endorsed by the best professional musicians. Bargains on new slightly used up right pianos from $275.00 up. Terms to suit. Greenwood music store.

The members of the Greenwood club entertained Mr. Clive Pringle at a smoker in the club rooms on Friday evening last. Felicitous speeches were delivered by several members all wishing Mr. Pringle bon voyage on the momentous journey he was about to take. Among the events of the evening were three round sparring contests between Messrs. Mieklejohn and Pringle, and Stowe and Colter. They all showed themselves adepts with the gloves. Some capital songs were well sung by Messrs. Finucane, Inglis, Mieklejohn, Stowe, Hodge and others.

From all indications there will be a large crowd go from here to the Dominion Day celebration at Grand Forks. Mr. Hartline of this city has a string of horses coming up from Lewiston and will be on hand early. In the running events C. A. Wilson and F. J. Mitchell, two sprinters of more than local repute will face the starter in the 100 220 yards. The line up of the hose team has been announced and the boys of the fire department have been deligently training. The team will be captained by C. A. Wilson. The make up is as follows: A. D. Hallett, F. J. Mitchell, Charles Dunn, C. E. Merritt, E. B. Dill, P. G. McLeod, Harry Coutes, Harry Mitchell, W. H. Pierre, N. McLeod and D. A. Mackenzie.

PATRONIZE LOCAL MEN.

The example which the city council has set in making a local man chief of police instead of sending to an outside town for an officer may well be followed in other ways. It may be imitated as regards things inanimate as well as animate. We take the following from the Spokesman-Review as stating in the best way what is meant:

Among the advantages of building up home industry are these: The money will be kept here.

Employment will be given to local workmen, local boys and girls.

The taxable property will be increased and taxes reduced.

Producers of raw products will come here to market their materials and will spend their money with local merchants.

The stranger will not ask, "where are your factories?" They will be so numerous that they will make themselves apparent.

The town will more rapidly increase in population.

All kinds of real estate will advance in value.

Other transcontinental railroads will come in, and those now here will increase their branch system.

It is not expected that all these advantages will come in a month or a year. They will come, though, in time and some of them will come quickly.

But an effort will be required.

Begin today by calling for home products. If you are thinking of sending east for merchandise carried by a home dealer, abandon the purpose.—Vancouver World.

B. C. IN LONDON.

During a recent debate in the B. C. legislature, when the vote of ten thousand dollars for the establishment of the Agent-General's office in London was being discussed, one of the representatives of the mining constituences complained of the lethargy of the government in keeping the potentialities of the province before investors, and the Minister of Mines is reported to have replied: "We are sending out circulars every month." We are somethat astonishe at this statement coming from a member of the Government, as no circulars appear to have reached this country at all, and it would seem that even if circulars are sent out they have no reference whatever to the mineral wealth of British Columbia. No steps have ever been taken by the Government department in Victoria to disseminate useful information concerning the Province's greatest asset. We are glad to hear that an appropriation has been made to supply the deficiency, and we only voice the opinion of all those interested in the developments of this portion of Canada when we express the hope that the suggested reformation will be initiated on comprehensive and businesslike lines.—B. C. Review (London).

Dont forget to go to the South End Grocery for fresh eggs, good spuds, good mocha and java coffee, good tea and fresh groceries.

For lessons on violin, piano, mandolin etc, see Prof. Kauffman, Green wood Music Store.

NOTICE.

Notice is hereby given that at the next meeting of the Board of License Commissioners for the city of Greenwood I will apply for an hotel license for the B. C. Hotel situate on lots 8 and 9 block 16, map 21 on Government street in the city of Greenwood.

JOHN KEOUGH.

Dated June 14th, 1901.

Licence to an Extra-Provincial Company.

"COMPANIES ACT, 1897."

CANADA:
PROVINCE OF BRITISH COLUMBIA

THIS IS TO CERTIFY that the "Montreal and Boston Copper Company, Ltd." is authorized and licensed to carry on business within the Province of British Columbia, and to carry out or effect all or any of the objects of the Company to which the legislative authority of the Legislature of British Columbia extends.

The head office of the Company is situate in Montreal, Province of Quebec, Canada.

The amount of the capital of the Company is $500,000, divided into five thousand shares of $100 each.

The head office of the Company in this Province is situate at Greenwood, and Clive Pringle, Barrister-at-Law, whose address is Greenwood aforesaid, is the attorney for the Company.

Given under my hand and seal of office at Victoria, Province of British Columbia, this 11th day of March, one thousand nine hundred and one.

[L.S.] S. Y. WOOTTON,
Registrar of Joint Stock Companies.

The following are the objects for which the Company has been established:

a. To mine, quarry, work, mill, manufacture and prepare for sale by any process, and to carry, sell and deal in coal, coke, iron, iron ores, stone, copper and copper ores, manganese and any other minerals, clays or mineral substances, and generally to carry on the trades of mine and coal owners, iron masters, founders, smelters of metals, and quarrymen and ore and metal dealers:

b. To purchase or acquire any interest in, and to hold, use or occupy any lands, buildings, coal and other mines, minerals, mining or other rights, easements or privileges, and the Company may sell and convey the same by deed or deeds with the usual full covenants or otherwise:

c. To let or sub-let for building, mining or any other purpose any property, and to give and grant any rights, licenses, easements or privileges:

d. To construct, purchase, alter, operate or maintain, or to contribute to the purchase, construction, alteration, operation or maintenance of any building, railway, tramway, wire rope tramway, canal, bridge, pier, road, ship, steamer, barge or other work calculated to afford any facility in carrying on or extending the business of the Company, and to operate such railway, tramway, wire rope tramway, canal, wharf bridge, pier, road, ship, steamer, barge, and other works by steam, electricity or other motive power:

e. To purchase, hire, charter, construct, maintain, operate or manufacture for use in connection with any business of the Company any ships, steamers, barges, rolling stock, machinery or plant:

f. To acquire any exclusive right in letters patent, franchise or patent rights or privileges or lands in connection with the business of the Company.

g. To farm any land held by the Company, and for that purpose to buy, sell and deal in any farming stock or produce:

h. To construct and maintain telegraphs and telephones, and generally to carry on the business of a telegraph and telephone company, and to transport freight and passengers on land and water, in connections with and confined to the business of the Company:

i. To acquire the good-will of any business within the objects of the Company, and any lands, privileges, rights and contracts appertaining to the same, and in connection with such purchase to undertake the liabilities of any company, association, partnership or person:

j. To sell or otherwise dispose of the whole or any branch or part of the business or property of the Company to any Company carrying on or formed for the purpose of carrying on any objects similar to those of the Company hereby incorporated:

k. To acquire by original subscription or otherwise, and to hold, sell or otherwise dispose of shares, stocks, debentures or debenture stock of any company carrying on, or formed for carrying on, any trade or business within the objects of the Company:

l. To purchase, lease or otherwise acquire, hold and enjoy all property, franchises, rights and privileges, held or enjoyed by any other company or companies carrying on any business similar to that which this Company is authorized to carry on under the provisions of its charter. Said property, rights, franchises and privileges, when purchased, leased or otherwise acquired as above stated shall be owned and enjoyed by this Company as fully and effectually as the same were heretofore held and enjoyed by the Company from which the same were so purchased, leased or otherwise acquired, subject to all existing valid liens and charges.

Notice to Pre-emptors of Crown Lands.

THE attention of Pre-emptors of Crown lands is hereby called to an amendment to the "Land Act," passed at the last session of the Legislature, which provides as follows, viz:—

"9. Pre-emptors of Crown lands, whether in arrears in payment of instalments of purchase money or not, who at the time of coming into force of this Act have obtained Certificates of Improvement, or who shall have obtained Certificates of Improvement within twelve months thereafter, shall on conforming with the provisions of the "Land Act," except as hereby altered, be entitled to obtain Crown grants of their pre-emption claims upon completing payments of purchase money at the rate of seventy-five cents per acre, and Crown grant fees, which payments may be made as follows:—

Twenty-five cents per acre on or before the 31st day of December, 1901.

"Twenty-five cents per acre on or before the 30th day of June, 1902;

"and the remaining—

"Twenty-five cents per acre on or before the 31st day of December, 1902, and without any further payment of interest or arrears of interest."

DECIDED BY CARDS.

How an Aspen Grove Hotel Man won His License.

The Similkameen Star is the authority for the introduction of the old fashioned B. C. way of settling disputed points. At the meeting of the Board of License commissioners in Princeton, applications were received from D. Munroe and Wm. Dodds and the Star says:

The applications of D. Munroe and Wm. Dodds, for a license at Aspen Grove, caused considerable discussion, there being no objections against either applicant, and the board deciding to grant only one license.

The question was finally settled by the applicants playing a game of cards to decide which should withdraw. Dan, understanding the handling of the pasteboards (probably with an ace in his sleeve) won the game, so Mr. Dodds courteously withdrew, and the license was accordingly granted to Mr. Munroe.

A little side issue is connected with Mr. Munro's application. He expects to take to himself a life partner in the business, so the old adage of "Lucky in love, etc.," has again proved true.

The little contest was carried on with the utmost good feeling, and our worthy commissioners heaved a sigh of relief when it was all over.

THE CITY COUNCIL.

Business Transacted at Regular Monday Meeting.

In the absence of Mayor R. W. Jakes, Ald. Sullivan presided at the meeting of the city council held Monday evening and Ald. Caulfield, Naden, Sutherland and Ross were present. A petition signed by 18 business firms was presented asking for the early closing of shops, stores at 7 o'clock and barber shops at 8 o'clock, and on Saturday nights and nights preceding public holidays, 10 and 12 o'clock respectively. The petition was received and Ald Sutherland gave notice of the by-law.

Invitations to mayor and aldermen received from Grand Forks, Nelson and Vancouver to attend Dominion Day celebrations. They were acknowledged.

The city engineer reported on street work being carried on and his report was accepted.

A committee from the fire department waited on the council asking for further sum to defray expenses of team to Grand Forks. The council decided to place $200 at the disposal of the department such sum to cover all incidental expenditure of the department for the entire year.

Robt. Donnigan addressed the council on furnishing water to the city from a corge spring on his property on Skylark hill. He was asked to submit proposition in writing.

Sister Teresa wrote in reference to the Sisters' hospital in Greenwood, but no action was taken pending result of delegation's visit to Victoria.

Several accounts were reported by the finance committee and ordered paid.

The waterworks committee were authorized to repair hydrants and flush tank.

GUESS—YOUNG.

Harry A. Guess brother of Geo. A. Guess and formerly a resident of this city and his bride were visitors to Greenwood this week. Mr. Guess is manager of a mining company at Keewatin Ont. He was married at Fort Steele on Wednesday 19th inst. to Miss Eva Young of that place. The Fort Steele Prospector gives the following particulars of the pleasing ceremony.

A very pretty wedding took place at the residence of Mrs. W. S. Ross on Wednesday the 19th ins when Miss Eva Young was married to Harry A. Guess of Keewatin, Ont. The bride who looked charming in a becoming gown of white silk with renaissance lace and a spray boquet of white flowers, was supported by little Misses Dorothy Edwards and "Dinah" Ross, in blue and pink respectively. Mr. George Guess, brother of the bridegroom and Master "Billy" Ross were groomsmen. After the wedding the bride held a reception which was attended by many friends. The bridal party then departed on their honeymoon. They will visit Greenwood, Banff and other points and will arrive at their home in Keewatin about the first week in July. The bride was the recipient of many costly presents.

Mr. and Mrs. Guess left for their home in Keewatin on Tuesday.

GROCERIES...

BOOTS AND SHOES

MEN'S FURNISHINGS

is a large and varied one, every line is complete in itself, and strictly first-class. Not a shoddy article in any of the lines. They all concede that our stock of Groceries is the nicest and freshest in the city. Prices consistent with the quality of the goods. We would dislike very much to be considered the "cheapest" place in town, there are so many VERY CHEAP OENS, but we do think that we come very near being the best. Try us, and tell us what you think.

THE

Russel - Low - Caulfield

COMPANY, LIMITED.

PHOENIX WATERWORKS.

Why the Greenwood Company Refused to go on.

The Phoenix Pioneer is sore because the Greenwood Electric company has refused to furnish a waterworks system for Phoenix. The company submitted an offer to the city council at Phoenix which was accepted. The town of Phoenix wanted water from Marshall lake and the Electric company offered to put in the necessary plant, but it was found that the city of Greenwood had a prior right to the water in Marshall lake, that J. B. McArthur has also a record on Marshall lake, that in any case Marshall lake had not sufficient water to supply the town of Phoenix, that the town of Phoenix would confiscate the plant when the company were unable to supply sufficient water from a source which was inadequate and which belonged to other parties. The outlet of Marshall lake is Providence creek which empties into Boundary creek near the Elkhorn Brewery. The City of Greenwood has a record for this water. J. B. McArthur who owns the New York mineral claim also has a record so that the erection of a costly plant to supply Phoenix with water from this source would be a risky venture.

It is now said that the Graves syndicate will install a waterworks system.

TRANSFER OF LICENSE.

Notice is hereby given that thirty days after date we intend to apply to Board of License Commissioners in the city of Greenwood for a transfer to W. H. Craig of the license now held by us for the Alberta Hotel, Situate lot 4 block 11. City of Greenwood.
