POWER PLANT

OF THE CASCADE WATER POWER AND LIGHT COMPANY

NOW BEING INSTALLED

On the Main Kettle River Near Cascade City—A Brief Description of the Work and Machinery.

As the Cascade Power and Light company, limited, will doubtless supply power and light to different cities and mines in the Boundary, a descrption of the plant should prove interesting.

The plant is situated on the main Kettle river at Cascade City. The river at this point rushes through a rocky gorge in a series of rapids and falls, for a distance of about half a mile, and has a natural fall in that distance of 121 feet.

For the development of the power a dam has been constructed at the head of the gorge which raises the water to a height of 36 feet above the natural level, thus giving a working head of 156 feet at low water. The dam is constructed of timber cribwork filled with rock, and is 40 feet thick at the base and slopes back to a width of 24 feet at the top. The total length of the dam is 400 feet, the total height from the base to the top is 50 feet in the deepest part of the channel, tapering off to a height of 25 feet at the sides. About 10,000 cubic yards of rock were required to fill the cribwork.

The site is a solid rock bed throughout, and the foundation timbers are firmly bolted to the rock. The permanent water level will be 10 feet below the top of the dam, and provision has been made to control the water level during periods of high water by a series of sluice ways, twelve in number, which can be opened up to a depth of 12 feet below the normal level. This will give an area of about 2,000 square feet of waterway through which to pass the flood water. The sluice ways are closed by means of stop logs, 12 inches square, dropped one on top of the other in a groove provided for their reception.

A steel rail track will be placed on top of the dam on which a travelling winch can be run over the sluice ways for the purpose of drawing up the stop logs as the water rises during floods. This winch will be operated by hand or electrical motor.

The site of the present dam was chosen with a view that at some future time a concrete masonry dam, which can be built without any stoppage of the plant whatever, can be constructed below the present structure.

During the high water in June a large boom of logs, held by a sawmill company a few hundred yards above the dam, gave way and about one mil- feet of logs were thrown against the dam in a solid mass, and this at a time when the water was at extreme flood, without inflicting the slightest damage on the structure. This unexpected test of the dam fully demonstrated its stability.

The water will be conveyed from the dam to the power house, first by an open rock cut 225 feet long, already made. From this point a tunnel, 12x14 feet, has been driven for a distance of 410 feet through solid rock; thence here is another open channel for a distance of 500 feet. At this point a concrete bulkhead will be placed and the water conveyed in a circular flume of 12 feet feet diameter to the power house. About 35,000 yards of rock have been excavated in making the open-cuts alone. The areas of the open-cuts and tunnel are so large that no appreciable loss of head will occur, and the water will enter the flume with a head equal to the level of the water in the dam. The power house will be placed on a natural bay at the foot of the falls, where an extensive site has been excavated out of solid rock. About 7,000 yards of rock have been removed fo this purpose.

The turbines will be of the horizontal type, two wheels in each case, and the generators of the three phase alternating type, and step-up transformers will be used to raise the current for transmission. The electrical machinery is to be of the latest and most up-to-date construction of the Westinghouse company, and the power house a substantial fireproof structure of brick and stone, of dimensions, according to the engineer's plans, 200 feet long by 45 feet wide. The main distributing station will also be a fireproof structure of brick and stone.

A right-of-way has been cleared from Cascade to Phoenix, in Greenwood camp, a distance of 21 miles. The clearing is 132 feet wide and all brush and timber have been removed. Two separate duplicate lines are to be constructed, of the most substantial and modern description, and every possible means will be used to insure a continuous current being maintained. The heaviese wire will be used to secure this end. Poles are now being distributed along the right-of-way between Phoenix and Cascade, and all the outside works, buildings, etc., are being completed for early installation of the machinery at the power house at Cascade.

The Columbia & Western Railway company are putting in at Cascade a side track for the unloading of the machinery and other material, of which probably more than fifty car loads will arrive before the end of this year.

Rooms at the Clarendon 50 cents per night.

GEOLOGICAL SURVEY.

R. W. Brock, of the Dominion Geological Survey, was a recent visitor to Greenwood. A press despatch states that he has come for the purpose of making a geological and topographical survey of the Boundary district. Last season he covered the region bounded on the south by the international boundary, on the east by the Columbia river, on the north by Fire Valley and and on the west by the North Fork of Kettle river. The results will be published in a series of colored maps showing the configuration of the country, the water courses, streams, trails, and mineral belts, etc. The maps giving the results of last season's operations are not yet available, a delay in publication having occurred owing to the death of the late Dr. Dawson, director of the survey

With the boundary line as a base, the area to be surveyed this season will embrace the territory lying between the North Fork of Kettle river on the east and the Okanagan on the west, and northward 100 miles. There will be good deal of triangulation work and the height of all the principal peaks and ranges will be determined.

For Rent—A new store building on Copper street. Apply at Times office.

THE WINNIPEG

IMPORTANT STRIKES ON THE 300-FOOT LEVEL.

PROSPECTS OF THE MINE

Are Greatly Improved—Considerable Work Done—Description of the Property.

About the end of July Simon Jacobs, foreman in charge of the Winnipeg mine, in Wellington camp, Boundary district, advised the managing director that he was then drilling in ore in the cross-cut from the 300-foot level of the mine. Later developments were so satisfactory that he was able to report that this cross-cut had proved the existence of a vein 8 feet wide and running about parallel with the main level about 110 feet to the southward. This encouraging discovery was, before the middle of August, supplemented by a still more important development, in the shape of a vein since proved to be 25 feet in right-angle width, carrying ore of good general value, so far as tested, and occuring in such close proximity to the main shaft as to make its extraction both comparatively easy and not costly.

The finding of these two ore bodies at the 300-foot level has considerably improved the prospects of the mine. The plan of work adopted by the management last December and since persistently followed out, anticipated the eventfual cutting of the vein met with in the south cross-cut, but the more important discovery above-mentioned is the outcome of zeal on the part of the foreman whose observant habit led him to notice indications of the presence of ore near the shaft, and which upon being followed up disclosed the existence there of a vein of considerable size and excellent promise.

For the information of those not familiar with the main underground workings in the Winnipeg mine it may be stated that a shaft was first sunk vertically for 100 feet and then, for 200 feet on an incline in a dyke. This dyke is now known as the east dyke, in distinction from another to the westward, known as the west dyke. The east dyke is about 60 feet in width. The 300-foot level is a long tunnel, driven both east and west of this dyke. Between these two dykes much prospecting work has been done at various depths down to 400 feet. A crosscut north, in the neighborhood of the west dyke, at the 300 level, cut three veins of ore, the most northerly being about 50 feet in width but unfortunately carrying values when opened insufficient to pay cost of mining, freight and treatment. A winze sunk on the second vein gave encouraging results. From the bottom of this winze a drift was run east for 65 feet and then a crosscut was driven south about 70 feet, passing through an 18 inch vein and further on meeting with an increasing quantity of mineral in the country rock. Water coming in at this 400 level and a similar experience being met with at both newly-opened veins on the 300 level, work on the 400 level was suspended for the time being, but it is intended to resume development at this depth as soon as practicable. Meanwhile the more important discoveries at the 300 level are being exploited and ore from both veins is being sent to the smelter so as to get returns from bulk shipments and thus ascertain what may be expected in the direction of making the output pay working expenses.

The vein cut by the south crosscut has since been drifted on both east and west. Westward, or towards the dyke, it is badly split up. The dyke has been reached by this drift and now the working is being continued across the dyke with the object of ascertaining whether or not the vein continues west of the dyke. It is quite probable it will be picked up again, as a vein corresponding to it has been opened near the surface between the dykes. Eastward the drift is in more solid ground and the vein is generally more satisfactory. The further extension of the eastern drift will probably result in the vein being found workable at a profit. Values are almost altogether in gold and a dozen recent assays gave returns ranging from 60 cents up to $37.60, the average of these twelve assays having been $8.23.

The large ore body recently opened up comes into the shaft from a northwesterly direction and lies west of the east dyke, and is about 110 feet north of the other vein just now referred to. It is now a matter of surprise that its existence was not discovered when, under a former management, the station was cut at the 300 level, for a little ore must have been showing where the timbers were put in. As stated above, its width has been proved to be 25 feet, both walls having been met with. Here too, values are almost altogether in gold, the silver and copper contents of the ore not being sufficiently large to take into consideration. Of course the ore varies in value across the ledge, there being two or three paystreaks much above the average of the whole width. Seventeen assays, some from bucket samples and others from drillings, ranged from $1.60 to $92.40, and the average of these was $12.12. A bucket sample of 20 tons returned $10.80, but a most remarkable return was one from the drillings from eight 8-foot drill holes. Referring to this the managing director, in a circular to shareholders, remarks: "One sample quartered down from the total dust of one round of machine drill holes eight feet deep in a drift 8 feet wide gave the extraordinary value in gold of $92.40 per ton. Considering the large block of ground represented this is the best assay ever obtained from the Winnipeg mine." Forty tons of ore from this vein, which is known as the "station ledge," lately sent to the Granby smelter gave a return of $9.20 per ton. Two more cars were being loaded early in the current week, and a carload is shortly to be shipped from the 8-foot vein cut in the south crosscut at the same level. These shipments should further demonstrate what are the values of the ore in these new workings.

At no time in the history of the Winnipeg mine, since the present management took hold and entered upon the difficult task of endeavoring to retrieve the clouded fortunes of this once popular company, has the outlook been so promising for success as at present. And this is the result of the adoption of a carefully considered plan of development and a persistence in carrying it out. It speaks well for the enterprise and pluck of the general body of shareholders that, notwithstanding earlier discouragements, they have persevered in their efforts to give the mine a fair trial. And though it cannot be yet said to be an assured fact that the mine will pay its way, it certainly was never before so favorably circumstanced in the direction of having ore bodies available that gave such reasonable promise of continuously bringing in returns above the cost of extraction and treatment. The results of the work of the next month or two in this mine will be aawited with especial interest, for if they realize present prospects they will not only encourage Winnipeg shareholders to push on until they achieve the success that appears to now be within their reach but they will as well be an incentive to shareholders in the company owning the adjoining Golden Crown mine to adopt a similar practical and persistent course, so that their property may likewise redeem the past and remove the reproach that mismanagement and misrepresentation have attached to it.

THE CITY COUNCIL.

The Bank of Montreal Secures the City's Account.

Mayor Jakes presided at the regular meeting of the city council on Monday evening last. Aldermen Caulfield, Sullivan, Naden, Kirkwood and Ross were present.

The council by resolution decided to transfer the city account to the Bank of Montreal.

An offer having been received from the Electric Light company to substitute five 32-candle power incandescent lights for each of the present arc lights, the council decided to make the substitution for all the arcs except those on Copper street in order to secure a greater distribution of light.

LABOR DAY

ARRANGEMENTS ARE COMPLETED FOR THE BIG CELEBRATION.

IS A GOOD PROGRAMME

Of Sports—Horse Races will be at the Track—Numerous Entries for the Drilling Contest.

There is now nothing left to do but to welcome the big number of visitors and furnish them with a day's sport. The celebration committee have perfected all their arrangements for the big Labor Day celebration. From all reports and the communications received by the secretary, there are going to be numerous entries for the different events. This is particularly true of drilling. This year the contests are divided for heavy and middle weights and this gives the lighter men an opportunity which they appreciate. Then the drillers will be asked to drill a down and an up hole which gives them a chance to display greater skill.

Several of the Grand Forks fliers are coming over for the horse races. The race track is being repaired and will be in good condition on Labor Day.

Nelson and Grand Forks fire teams are coming and possibly Rossland.

Private enterprise is assisting the committee in providing entertainment. The Auditorium has been secured for Monday and Tuesday by private parties who are giving handsome prizes for Cornish wrestling. As there are many doughty "Cousin Jacks" in the district a splendid wrestling tournament is looked for. Tuesday night there will be a 20-round sparring contest.

Monday night the Miners' Union give a ball in the Auditorium. Good music has been secured and refreshments will be served by the ladies of R. C. church.

The parade is expected to be an elaborate affair. Many of the business men, the different labor organizations, the firemen and others are busy preparing floats.

Business houses are urged to decorate their premises so that the city will have a greater holiday appearance,

ST. JOHN'S CHURCH, PHOENIX.

Rev. E. P. Flewelling has intimated to the Bishop, who offered him this work, his readiness to take charge of St. John's Church of England, at Phoenix. Mr. Flewelling is well known in the province and the church people of Phoenix are to be congratulated upon so eminently suitable a clergyman and one well accustomed to provincial life in British Columbia having been secured for work in their important though young local church organization. Mr. Flewelling was some years ago rector of St. Paul's church, in the west end of Vancouver city. Thence he went to Kamloops, where since early in the 90's he has zealously and acceptably labored for the church. A few months since his wife died, and other family events contributing to the breaking up of his home, he resigned the rectorship of the church at Kamloops, and afterwards sought change of scene and surroundings at Nelson, where for a time he acted as locum tenens during the absence of Rev. H. S. Akehurst, who has now resumed his clerical duties in the see town of the diocese of Kootenay. Mr. Flewelling has gone to the coast for a week or so and will come to the Boundary in September—probably about the 11th.

It has been announced that the building committee of St. John's church have let a contract for the erection in Phoenix of a church building, Thos. Corner being the successful tenderer at the sum of $1,360.

Go to Anderson's pharmacy for drugs, toilet, articles, sponges, soaps, perfumes, etc., Greenwood.

GRANBY SMELTER.

General Meeting in Montreal and Election of Officers.

Montreal, Aug. 26.—The first general meeting of the Granby Consolidated Mining, Smelting & Power company, took place today at the head office of the company, Canada Life Building. Mr. Miner occupied the chair. The company's by-laws were adopted, and the annual meeting was fixed for October 2, 1902. The following directors and officers of the company were elected: S. H. C. Miner, president; J. P. Graves, vice-president and general manager; J. H. McKechnie, Favette Brown, A. C. Flumerfelt, (assistant general manager), W. H. Robinsion, A. L. White, (secretary), A. H. Galer, (assistant to the manager), R. R. Macauley, (assistant secretary), G. W. Wooster, (treasurer), W. A. Mattley and Gardner Stevens, (auditors).

TENNIS.

Last Saturday afternoon four star tennis players from Phoenix met a like number of members of the Greenwood tennis club on the grounds of the latter, and, as had been anticipated, came off decidedly on the winning side. The visitors were Dr. Boucher and Messrs. P. C. McArthur, Alan Simpson and O. B. Smith, and the home players were: C. W. Chesterton, E. A. Duff, J. P. Myers-Gray and A. W. Strickland. The results of the several games played were as under:

SINGLES.

Boucher beat Chesterton, 6-4, 6-3. Smith beat Duff, 6-3, 6-2. McArthur beat Strickland, 6-3, 7-5 Gray vs. Simpson was commenced, but not completed, Simpson having had to leave for Phoenix. When play was stopped the score stood at 4-love, in favor of Gray.

DOUBLES.

Boucher and Smith beat Strickland and Chesterton, 7-5, 6-3. Gray and Duff beat McArthur and Simpson, 6-2, 6-3.

Afternoon tea was kindly served at the courts by lady members of the local club. Later the visitors were entertained at dinner at the "Saints' Rest" where, too, an impromptu smoking concert was held after dinner.

Jas. Stables, M. P. P. for Cassiar; who lately returned to British Columbia from a visit to Scotland speaking to a representative of the Vancouver News-Advertiser about Canada's display at the Glasgow Exhibition, expressed the opinion that it is second to none. British Columbia, he said, has a very fine exhibit of minerals, and much credit is due to Mr. A. K. Stuart, of Greenwood, who is in charge of this province's department of Canada's exhibit.

Messrs. F. H. Taylor and E. Pitt, of the staff of the Bank of Montreal, were in Greenwood at the beginning of the week. They were on a trip of inspection and come to Greenwood from Vernon. On Tuesday they left for Rossland.

J. H. Frevorrow, superintendent of the Snowshoe mine, Greenwood camp, has entrusted to the care of the Sisters, at their hospital Greenwood, his six year old boy, who is suffering from a mild attack of typhoid fever.

THEIR SERET IS OUT.

All Sadieville, Ky., was curious to learn the cause of the vast improvement in the health of Mrs. S. P. Whittaker, who had for a long time, endured untold suffering from a chronic bronchial trouble. "It's all due to Dr. King's New Discovery," writes her husband. "It completely cured her and also cured our little grand-daughter of a severe attack of Whooping Cough." It positively cures Coughs, Colds, La Grippe, Bronchitis, all Throat and Lung troubles. Guaranteed bottles 50c and $1.00. Trial bottles free at J. L. White's, Miller Bros., and W. E. Anderson's, drug stores.

News came from Montreal today to the effect that the committee representing the C. P. R. trackmen had reached an agreement with the general manager and that at nine o'clock this morning the strike was declared off.

LOCAL AND PERSONAL

New Goods at Allmacher & Wilson's.

Mail orders promptly filled—Anderson's drug store.

Word comes from the West Fork that forest fires have destroyed the buildings on the Washington and Idaho claims.

If you want the best candies in the city go to Munroe's.

Goverment agent W. G. McMynn has been for trip up the North Fork of Kettle rive., to look into road and other matters connected with his office. He left last Saturday and returned to town on Tuesday.

Nitrous oxide and oxygen for pain less extraction of teeth at Dr. Mathison's.

Anthony J. McMillan is again over from Rossland visiting the Snowshoe mine.

For Rent—Four room house furnished, all conveniences. $12. Apply at Times office.

D. C. Corbin visited the King Solomon mine this week. Shipments to the Greenwood smelter will begin next week. Mr. Corbin returned to Spokane to-day.

We receive consignments weekly of the famous Okanagan fruit. Prices to suit those who want to put up fruit. C. V. Semerad.

The electors of Grand Forks and Columbia on Wednesday last decided upon almagamation under the name of Miner. Both towns will keep their old names until the amalagamation is legalized by parliament.

Grapes, nectarines, water melons, canteloupes; fresh fruit of all kinds at Semerad's.

The furnace at the Greenwood smelter will be blown in again tomorrow. It is intended to shortly add considerably to the ore storage accommodation at the works by erecting more ore bins.

Take your prescriptions to the Windsor Drug Store, W. E. Anderson, Greenwood.

J. C. Douglas and R. D. McKenzie have taken over the B. C. Hotel on Government street. The hotel is one of the most comfortable and best furnished in the city and under its new management should do a large business. Both proprietors are well known in the city,

"Bromogrip cures colds—25 cents—Anderson's Pharmacy.

R. L. Cawston this week brought in from the Okanagan a band of cattle for P. Burns & Co. He will likely remain to attend the Pioneers' Association gathering, to be held next Monday.

If you want nice soft drinks call at South End grocery.

School Inspector D. Wilson arrived from Nelson on Wednesday night and this morning was a passenger by the the stage to Beaverdell, West Fork. Upon his return he will visit the several public schools in the district.

Ice cream and fresh candies at the Greenwood Candy Factory, C. V. Semerad, proprietor.

The Montreal and Boston Copper company yesterday placed an order with Lequine & Powers, of Midway, for about 50,000 feet of lumber and a lot of mouldings and turned stuff, for use in the new boarding house that is to be erected forthwith at the Sunset mine.

The arc lamps recently put up at the Mother Lode mine are in use and the surface works of the mine are now well lighted. The underground workings, too, are now much better lighted than before, the number of incandescent lights have been largely increased. The smaller dynamo will be run during the daytime, to keep the lights going below ground, but at night, when lights are required in the mine buildings and around the works above ground, the newly-installed 250-light machine will be utilized for generating purposes.

Homer Wells, after more than two years in the employ of the B. C. Copper company at its Mother Lode mine, latterly as one of hoist engineers, left last Monday for Spokane. He will secure employment at one of the Coeur d' Alene mines.

Geo. D. Brice will next week be back in his old position of master mechanic at the Mother Lode mine. Jno. A Crawford who filled Mr. Brice's place whilst the latter was away on a vacation will have charge of the mine machine shop as soon as the tools and other plant ordered several weeks ago come to hand.

Latest patterns in all shades at Allmacher & Wilson's.

FRIDAY AUGUST 30, 1901.

LABOR DAY.

The idea of making Labor Day a general holiday was a happy one. Often the troubles between capital and labor could be avoided if employers and their men were better acquainted with each other and understood each other better. Labor Day gives all an opportunity to forget the grind of daily life and contribute towards each other pleasure. There is an old saying that more flies can be caught with molasses than vinegar and it is equally true that more good can be affected by conciliation than by compulsion. In these days when strikes are epidemic it is a matter of congratulation that Boundary has escaped any labor troubles. This has been due to the common sense of the mine managers and the splendid class of men employed in this district.

The Times wishes the members of all trades and callings a pleasant holiday and prosperous year. It joins with the citizens in extending a glad welcome to the visitors from surrounding camps and ventures the hope that the mingling of capital and labor at Greenwood on Monday next will do something towards strengthening the good feeling that at present exists among all classes.

CITY SCHOOLS.

If the efforts that are being made to make Greenwood an educational centre are to be crowned with success, it will be necessary for parents to take a greater interest in the public schools. Greenwood is entitled to and has been promised substantial assistance from the government in securing good school buildings. To make this aid a certainty the attendance should be brought up to the highest limit. The attendance this term is better than last year, but there are still many children of school age who are not being educated at all. These are urged to attend school and should be forced to do so if their parents fail to do their duty. With a large attendance and good school buildings the teaching staff will be increased. It should be the ambition of every citizen to have Greenwood known as an educational centre and he should work with this object in view.

THE BREEN SMELTER.

The record of rumors connected with the location of the Breen smelter up to and including August 26, as far as has been heard, is as follows:

Aug. 1—The Dominion Copper company are going to buy the Pirate smelter at Boundary Falls.

Aug. 2—Juo A. Manly announces that the Breen smelter will be erected at Grand Forks.

Aug. 3—The Breen smelter has been definitely located at Midway.

Aug. 4—Duncan McIntosh has inside information that the Breen smelter will be located at Niagara Falls if Mr. Breen can get control of the power at that point.

Aug. 5—James Breen has told a friend in absolute confidence who told his mother-in-law that the smelter would be located at Greenwood.

Aug 6—Smelter is bound to be located at Greenwood. Phoenix ores to be brought to Greenwood through a tunnel

Augr 7—McIntosh report an error. Smelter to be located not at Niagara Falls but at Niagara on the North Fork.

Aug 8—Breen has transferred his smelting interests and knowledge to Tracy W. Holland, manager of the Grand Forks townsite, who is going to build it on his hot air line.

Aug. 9.—City of Greenwood has bonused the Breen smelter and it has been finally and absolutely decided that it will be built here.

Aug. 10—Breen smelter to be built at Curlew, Wash.

Aug. 11—James Breen has purchased a smelter site near Marcus, Wash., where he will erect a 2,000 ton smelter.

Aug. 12—The Dominion Copper company has not purchased the Pirate smelter.

Aug. 13—All existing rumors have been called in to make way for others in course of preparation.

Aug. 14—It is said on reliable authority that F. J. Finucane knows.

Aug. 15—It is said on equally good authority that James Breen doesn't know.

Aug. 16—Paul Johnson and James Breen have formed a smelter trust.

Aug. 17—Private speculators buying land near mouth of Eholt creek, where smelter will be located.

Aug. 18—Great Northern have purchased the C. P. R.; the V., V. & E. is not going to build and the Breen smelter is going to Midway.

Aug. 19—Ore is so low grade that smelter must be built at the mine to save transportation charges. Necessary water to be pumped from the North Fork.

Aug. 20—John Manly proudly points to the Breen smelter site overlooking the town of Grand Forks.

Aug. 20—C. D. Rand is the only man who knows.

Aug. 21—Tracy Holland has decided not to build his smelter.

Aug. 22—W. G. Gaunce has definite information, direct from headquarters, Toronto, that the matter of selecting a smelter site has not yet been considered

Aug. 23—The location of Breen cannot be made.

Aug. 24—Duncan McIntosh knows something but its on the dead q. t.

Aug. 25—Prayers in all the churches for the Breen smelter.

Aug. 26—Greenwood prayers answered; also Grand Forks.

Still leter—Breen smelter is to be erected at the Little Dalles on the Columbia River.

EDITORIAL NOTES.

It is really laughable to read the numerous instructions that officialdom is sending out from Ottawa to the unsophisticated Canadians who must receive royalty. The Duke of York would probably be less bored if his welcome at different points was the natural exuberance of a loyal people rather than stilted formalties dictated by social satraps at Ottawa.

THE MORRISON.

The 80-h. p. horizontal return tubular boiler that was taken up to the Morrison mine last month is now being bricked in and will ere long be ready for use. Practically all the work now being done underground in the mine is at the 300-foot level, upon which between 400 and 500 feet of drifting and crosscutting have been done. It is intended to shortly use the diamond drill in further prospecting the mine, so as to more quickly obtain information as to the direction and extent of the ore bodies at the lowest level of the mine. Much ore has been made accessible on the 200 level and now efforts are being made to locate and open up similar big oreshoots at the lower level. Fred. H. Oliver, managing director, is now at the mine.

LAND REGISTRY ACT.

In the Matter of the Title of Lot 8, Block 11, According to the Sub-division of the "DARK HORSE" Mineral Claim, Map 21, City of Greenwood, Group One, Osoyoos Division of Yale District;

WHEREAS the Certificate of Title of William A. Corbett to the above hereditaments has been lost or destroyed, and application has been made to me for a duplicate thereof;

NOTICE IS HEREBY GIVEN that a Duplicate Certificate of Title will be issued at the expiration of one month from the date hereof unless in the meantime valid objection to the contrary is made to me in writing.

W. H. EDWARDS,
District Registrar, Land Registry Office, Kamloops, B. C.
August 30th, 1901.

MINERAL ACT.

Te Charles, W. Edwards, and others concerned.

TAKE NOTICE that I have caused to be done on the Uncle Same Mineral Claim situate in Skylark Camp in the Kettle River mining division of Yale District, the work required by Section 24 of the Mineral Act, for the year which has expired, and have expended for such work and for recording the certificate thereof the sum of one hundred and two dollars and fifty cents ($102.50); and if at the expiration of ninety days from the date of the first publication of this notice, you fail to contribute your proportion of such expenditure, viz. Thirty-four dollars and seventeen cents ($34.17 for one-third interest in said mineral claim, together with all costs of advertising your interest in said mineral claim shall be liable to forfeiture, as provided by the "Mineral Act Amendment Act, 1900.

Dated this 29th day of August, 1901.

EMANUEL PASTRONE.

SAW LOGS FOR SALE.

The undersigned will receive tenders up to noon of Wednesday, Sept. 18th, 1901, for a quantity of Sawlogs (estimated to cut into about 500,000 feet of lumber) lying in and on the shore of the Granby Smelter Lake, south-west arm, near the site of Spraggett's saw mill, recently destroyed by fire, about two miles from Grand Forks.

There is a first-class opening here for a good sawmill man. It is understood that the Granby Smelter Co., desire to lease the premises and may assist to rebuild if a good tenant is secured.

Terms for saw logs, cash, no tender necessarily accepted.

For further particulars enquire of the Eastern Townships Bank, Grand Forks, or of

LOCAL HAPPENINGS.

For fine tailoring go to Allmacher & Wilson's.

The Oroville Mines, limited, has been incorporated to acquire the assets. etc., of the Okanogon Gold Mines, limited.

Miss Keffer left on her return to Cleveland, Ohio, last Monday, going over the Crow's Nest Pass route of the C. P. R. system.

It is reported from Grand Forks that W. H. Covert expects to gather this season a deal of fruit from his orchard near Carson, including about 20,000 pounds of prunes and a lot of apples.

Mrs. W. T. Thompson has closed her private residence at Midway and gone to Nicola on a visit to her sister. Miss Heathorn, who has been Mrs. Thompson's companion for nearly two years, has accompanied her.

Friends of Miss Iva Jakes and Fred W. McLaine are offering hearty congratulations and expressing many good wishes on the approaching marriage of these well known and popular residents of Midway. The marriage is to take place during September.

The public schools of the district have been re-opened. At Greenwood, Phoenix, Midway, Eholt, Anaconda and Deadwood, teachers are back at their posts and their juvenile charges are attending in fairly good numbers.

The register of joint stock companies has gazetted notice that the amount of capital of the Montreal and Boston Copper company, limited, is $3,000,000, divided into 60,000 shares of $5 each, and not $500,000, and the licence granted to the company on the 11th of March 1901, has been amended accordingly.

The Camp McKinney Miners' Union have announced their intention to celebrate Labor Day by holding a dance in the Sailor hall, in their town. It is too far for them to come to Greenwood to join in the biggest celebration ever held in the Boundary district, so they will amuse themselves as best they can in their own town.

W. T. Hunter, manager in Greenwood for the Hunter-Kendrick company, limited, went out on last Monday's train for Rossland, whence he went viz. Spokane to North Dakota for a couple of months on the prairies. He is now convalescent after a long and trying illness and hopes to return in better health than he has had during the earlier part of this year.

Mr. and Mrs. Redpath and family have gone east on their holiday trip after having been compelled to delay leaving until the return of Mr. Dey, C. P. R. agent at Phoenix, from his holiday ramblings. J. F. Robillard, after having acted as locum tenens for Mr. Dey, returned to Greenwood and is now carrying out Mr. Redpath's duties as C. P. R. agent in this city.

Tomorrow the Greenwood Liquor company will move from their present quarters in the Wood block to new premises adjoining bonded warehouse, on Government street, where a new office has been built. The new premises are centrally located and have the additional advantage of being convenient to the bonded warehouse. Mr. Greiger the manager, reports business very satisfactory. This week a car of Pabst and also a car of Calgary beer were received.

The Hartford Gold Mining company limited, non-personal liability, has been incorporated under the companies act, 1897, as a limited company, with a capital of nine hundred thousand dollars, divided into three million six hundred thousand shares of twenty-five cents each. One of the objects of the company is to purchase the Hartford, Hartford Fraction, Ranger, Nabob Fraction, Golden Crown Fraction and the Double Eagle Fraction mineral claims, all situate in the Grand Forks mining division.

A despatch sent out from Columbia states that G. W. Floyd, for some time past engaged in the milk business near Rossland, has leased Jas. Newby's ranch, near Columbia, and taken over his milk business together with 60 head of cattle, 12 horses and a lot of farming implements. Mr. Floyd has moved his 100 head of cattle from the Trail creek district to the Boundary and will ship milk from the Newby ranch to Boundary towns and to Rossland and other outside points.

Jeffrey Robertson, the 15 year old son of the C. P. R. section foreman at Greenwood, was knocked down by a team belonging to Cameron Bros., which bolted from the railway depot last Saturday morning. The lad tried to stop the horses but failed to do so and as a result was much bruised and shaken. He received a nasty knock on the head which rendered him unconscious for a while but he came round after a time and now is little the worse for his misadventure.

Prescriptions filled correctly—Anderson's pharmacy.

Bernard Lequime went over to Grand Forks on Monday in connection with the contract Lequime & Powers have entered into to cut and supply about 2,000,000 feet of sawn lumber to the Grand Forks and Republic Railway company. This will include lumber for culverts, bridges and some ties. The firm have arranged to buy the mill near Curlew, put in some time since by the notorious Tuttle combination whose fake mining, smelting and sawmilling venture came to grief a short time since. This mill will be utilised for cutting lumber for that portion of the railway that will be in the State of Washington. The firm have also arranged to put in a mill on the smelter lake, where E. Spraggett had a mill that was lately destroyed by fire. Each of these two mills will have a capacity of about 30,000 feet of lumber daily. It is expected that arrangements will be concluded with the assignee in Spraggett's assigned estate to turn over to Lequime & Powers certain timber limits heretofore held by Mr. Spraggett,

THEIR SERET IS OUT.

All Sadieville, Ky., was curious to learn the cause of the vast improvement in the health of Mrs. S. P. Whittaker, who had for a long time, endured untold suffering from a chronic bronchial trouble. "It's all due to Dr. King's New Discovery," writes her husband. "It completely cured her and also cured our little grand-daughter of a severe attack of Whooping Cough." It positively cures Coughs, Colds, La Grippe, Bronchitis, all Throat and Lung troubles. Guaranteed bottles 50c and $1.00. Trial bottles free at J. L. White's, Miller Bros., and W. E. Anderson's; drug stores.

"C. C. C. C. the great nerve builder $1.00 at Anderson's Pharmacy.

Rough and Dressed Lumber.

FROM CHICAGO

CHICAGO CAPITALISTS VISITED GREENWOOD AND BOUNDARY.

INTERESTED IN LAKE

Are Well Pleased With Their Property and Mining Outlook—Will Invest Further Capital.

Chicago capital is coming to Boundary. The financial men of the big city are interesting themselves in Boundary mining properties. Chicago men don't do things by halves. They take their chances, make money generally but when they loose, they lose with good grace and never croak. This week a party of Chicago capitalists visited Greenwood and spent several days in examining Boundary properties. The party consisted of W. L. Springer, president of the Chicago Roofing company and his son; Geo. R. Thamer, president of the Empire Lumber company; P. L. Liddell, another big lumber manufacturer and Theo. Speaber manufacturer of caskets. They are all shareholders in the Chicago & British Columbia Mining company, owning the Lake mine in Providence camp. Mr. Springer is president of the company. After thoroughly examining the Lake, they were so well pleased with the outlook that they decided to not only put up the necessary capital to place the mine on a shipping basis but they are ready to invest in other enterprises as well. The Lake never looked better than it does at present. The ore in the shaft is of excellent quality and the vein is rapidly widening.

Mr. Springer and son will visit California while the others of the party will return to Chicago after a brief visit to the Sound city. All spoke in the highest terms regarding the solidity of Grenwood. They enjoyed their visit immensely and all hope to return here later in the fall.

The party is also interested in the coal measures recently acquired by Andrew Laidlaw in the Similkameen district.

METHODIST CHURCH.

The plans for open air services that have been under consideration for several weeks have been matured, and on Sunday next at the close of the evening service, the out door work will be begun by the pastor and some of the members and adherents of the Methodist church. A few familiar hymns will be sung and Rev. J. D. P. Knox will deliver a short address. The service will be held on the corner of Copper and Greenwood streets. The purpose of pastor and people is to develop this work until it will consist not only of religious services but also of week evening entertainments consisting of music and addresses on topics of general interest.

On Sunday, Sept. 8, the anniversary services to commemorate the opening of the local church, will be held. It is expected that Rev. J. H. White, of Nelson, chairman of the Methodist conference will preach the sermons.

GREENWOOD, B. C.

NOTICE OF FORFEITURE.

To J. A. Drain and C. Hoffman, both of the City of Spokane in the State of Washington.

Sirs:

You are hereby notified that I have expended $100.00 in labor and improvements on the "Alice Maud" Mineral Claim situate in Smith's camp in the Kettle River Mining Division of Yale District in British Columbia, to count as an assessment on said claim, as will appear by a Certificate of Work recorded 23rd March, 1901, in the office of the Mining Recorder for the said Kettle River Mining Division of Yale District, in order to hold said claim under the provisions of Section 24 of the Mineral Act; such being the amount required to hold the said claim for the year ending 23rd March, 1901.

And if at the expiration of 90 days of publication of this notice you fail or refuse to contribute your proportions of the expenditure required under Section 24, together with all costs of advertising, your interests in said claim shall become vested in the subscriber [one of your co-owners] under Section 4 of the Mineral Act Amendment Act, 1900.

Dated at Greenwood, B. C., this 26th day of July, 1900.

W. T. SMITH.

MINERAL ACT.

To Sam Breslauer and others inetrested in the Henrietta Mineral Claim, situated near Beaverton in the Kettle River Mining Division of Yale District:

TAKE NOTICE that I have caused to be done on the Henrietta mineral claim, situated near Beaverton, in the Kettle River Mining Division of Yale District, the work required by Section 24 of the Mineral Act, for the year which has expired, and have expended for such work and for recordidg the certificates thereof the sum of One Hundred and Two Dollars and Fifty cents, ($102.50), and if at the expiration of ninety days from the date of the first publication of this notice you fail to contribute your proportion of such expenditure, namely, the sum of Fifty-One Dollars and Twenty-Five Cents ($51.25), together with all costs of advertising, your interest in said mineral claim shall be liable to forfeiture, as provided by the "Mineral Act Amendment Act, 1900."

Dated this 5th day of July, 1901.

CHARLES PHIPPS.

NOTICE OF FORFEITURE.

To:

D. R. Campbell and A. C. McKenzie, late of Greenwood in the Kettle River Mining Division of the Province of British Columbia, and to any other person or persons interested or claiming any title to the "Queen Bess" mineral claim, situate in Long Lake Camp (formerly called Gold Drop Camp,) in the said Kettle River Mining Division.

You are hereby notified that Frank B. Goetter of Colville, Wash., U. S. A., and W. G. McMynn, of Greenwood aforesaid, have expended in labour and improvements the sum of one hundred dollars upon the said "Queen Bess" mineral claim, and $2.50 for recording the same as will appear by a Certificate of Work recorded on the 13th June, 1901, in the office of the mining recorder of said Mining Division at Greenwood aforesaid, in order to hold the said cloim under the provisions of section 24 of the "Mineral Act", such being the amount required and necessary to hold the said claim for the year ending the 1st day of July, 1901; and if at the expiration of ninty days of publication of this notice you fail or refuse to contribute your proportion of the expenditure required under the said section 24 of the "Mineral Act", together with all costs of advertising, your interest in said claim shall become vested in the said Frank B. Goetter and W. G. McMynn [your co-owners] under section 4 of the "Mineral Act Amendment Act 1900".

Dated ot Greenwood, aforesaid, this 8th day of August, A. D., 1901.

FRANK B. GOETTER,
W. G. McMYNN.

LOST—A cheque for fifty dollars drawn on the Royal Bank of Canada, Grand Forks, by the V. V. & E. railway company in favor of James Leckie and numbered 219. Finder will please return to H. B. Munroe, Greenwood. Parties are cautioned against using same as payment has been stopped.

SMITH & M'LEOD'S MILL BURNT.

The Vernon News pnblishes the following account of the destruction by fire of Smith & McLeod's sawmill at Enderby. As will be seen, the firm's sash and door factory, which fortunately is situate at Vernon, is still in operation, so that the Greenwood country will continue to be supplied as usual with such manufactured building materials as it has been for two or three years past the firm's custom to send here for sale. The News says:

Another most unfortunate fire occurred last Saturday evening at Enderby, resulting in the destruction of Smith & McLeod's fine sawmill at that place, with over half a million feet of clear seasoned lumber which was piled in the yard close to the mill.

The fire originated in the slip, up which the logs are hauled to the mill, and, as the prolonged period of hot weather had made everything as dry as tinder, the flames licked up the building in an incredibly short time. It was about 6:30 p. m. when the fire was seen, and at once it became apparent that nothing could be done to save the mill.

A band of workers, numbering over a hundred strong, speedily organized themselves into a bucket brigade, and to their untiring efforts is due the fact that the town of Enderby was saved. They erected a temporary barricade against the flames with boards, which were kept drenched with water, and thus prevented the flames from spreading to the adjoining buildings of the town.

Nothing was saved of the mill machinery except the boiler, which may possibly be utilized again. About 500,000 feet of lumber was left uninjured, most of which was composed of material such as can be used in the firm's sash and door factory, which is located at Vernon. There was insurance to the amount of $8,000 on the lumber, this amount having fortunately been recently placed on it, and about $4,000 on the mill. The loss, however, will be heavy, and much sympathy is expressed for the firm, especially as the disaster came at a time when the demand for lumber was brisk, many orders having recently been received.

Smith & McLeod intend to at once start up again, and may make arrangements to go ahead with a portable mill until such time as the plant can be replaced.

ASTOUNDED THE EDITOR.

Editor S. A. Brown, of Bennettsville, S. C., was once immensely surprised. Through long suffering from Dyspepsia," he writes, "my wife was really run down. She had no strength or vigor and suffered great distress from her stomach, but she tried Electric Bitters which helped her at once, and, after using four bottles, she is entirely well, can eat anything. It's a grand tonic, and its gentle laxative qualites are splendid for torpid liver." For Indigestion, Loss of Appetite, Stomah and Liver troubles it's a positive guaranteed cure. Only 50c at J. L. White's, Miller Bros., or W. E. Anderson's.

Thomas McCormick who was connected with Butler's saddlery in this city for some time has purchased the business of R. E. Doran at Moose Jaw, N.W.T., and is prepared to quote prices for all kinds of harness, saddles, carriages and farm implements. *

We carry the only Flannel Suitings in town. Allmacher & Wilson.

WHERE IS CARMI?

On the West Fork of Kettle River.

THE PAYROLL CITY OF THE WEST FORK

Surveys are now being made and lots will shortly be on the market. Carmi City adjoines the group of claims of which the Carmi mine is the center.

THE SHIPPING GROUP OF THE DISTRICT.

Carmi is the mining center of the Upper West Fork Country. The townsite adjoins the Carmi mine, which shipped 2,000 tons of ore to the smelter during the past winter, and upon which development is being pushed in order to be ready for continuous shipments when railroad is completed to Carmi.

LOCAL HAPPENINGS.

The Sunset mine was this week added to the list of Boundary shipping mines. A more active and progressive policy is being entered upon by the Montreal and Boston Copper company, involving addions to mine buildings and equipment and more extensive development of its mines.

The Clarendon Cafe has been reopened under the management of E. Escalet, whose as a caterer is so favorably known in Greenwood and Rossland. He will welcome all his old patrons and as many knew ones as are anxious to secure all the delicacies of the season served only as Escalet can serve them.

A cablegram received in Rossland yesterday from London announces that the new board of directors of the Le Roi mining company have endorsed the policy of Bernard McDonald, the resident manager. This will prevent the speedy settlement of the strike as was hoped for, The management will endeavor to operate the mines under the contract awarded to Al. Greaser who announces the old schedule of wages.

THE KING SOLOMON.

Eight men are at work on the King Solomon, in Copper camp, and it is expected that a commencement will soon be made to ship ore to the smelter at Greenwood. The wagon road from a short distance above the Morrison up to the King Solomon has been improven from a very rough bush road to one of the best mining camp roads in the district, excepting of course the main stage roads. The owners of the mine concluded that there was little use expecting the provincial government to do this very necessary work, so they did it themselves, and now they have a road over which there will not be any difficulty in hauling the ore they have arranged to ship to the smelter. It is stated that J. W. Hartline has contracted to haul about a thousand tons of ore to the railway siding at the Deadwood sawmill and that next month teams will be put on to commence hauling. The ore will be taken thence to the smelter by rail. Thos. Burton, formerly of the Dundee mine, Ymir, is superintending the work at the mine and since he took charge a month ago a lot of work has been done and now things are looking shipshape. A strong platform, big enough to load the ore into wagons without difficulty, has been built on a heavy cribbing, and a trestle has been run out to provide a good dump for the waste rock. Already about 150 tons of high grade copper ore have been piled on the platform and a second dump has been started as well. An open drift is being run on the vein, which so far has yielded mostly green and blue carbonate ore with which occurs a deal of native copper. The King Solomon ore is well known as the prettiest copper ore yet found in the district in quantity and it is generally believed to be the richest in copper. It is claimed that much of it will run as high as 30 per cent. copper, but an estimate places the average value of what is not being mined at about half that percentage, but this latter is regarded as a very conservative estimate indeed. In following the vein the width has been found to vary considerably, it having pinched to about a foot in one place, but where it was being broken down when visited last Tuesday it showed a width of from 8 to 10 feet of good ore. As the ground is rising the probabilities are that a deeper face will soon be opened. This resumption of work on the King Solomon is encouraging owners of other claims in Copper camp to hope that attention will now be directed anew to the camp, which has some very big showings and which has not yet had anything like the quantity of development work done in it that, with such promising indications, it appears to merit. Should smelter returns from the King Solomon ore be as high as it is confidently expected they will be, there should be no difficulty in inducing moneyed men to take hold of some of the other claims in the camp and develop them thoroughly.

TENDERS WANTED.

Tenders will be Received for Sinking Shaft at Mother Lode Mine. For particulars apply at General Office of

B. C. COPPER COMPANY,

Anaconda.

MINERAL ACT.

To Randolph Stuart, J. C. Haas, I. H. Ballett, Walter D'Eath and others concerned:

TAKE NOTICE that I have caused to be done on the Diamond Joe, Doubtful, May Day and Deer Trail mineral claims, situated in Greenwood camp, in the Kettle River mining division of Yale district, the work required by Section 24 of the Mineral Act, for the year which has expired, and have expended for such work and for recording the certificates thereof the sum of four hundred and fifteen dollars ($415.00); and if at the expiration of ninty days from the date of the first publication of this notice, you fail to contribute your proportion of such expenditure, namely, Randolph Stuart, J. C. Haas, I. H. Hallett and other parties interested, the sum of $83.00 for one-fifth interest in said mineral claims, and Walter D'Eath, the sum of $83.00 for a one-fifth interest in said mineral claims, together with all costs of advertising your interest in said mineral claims shall be liable to forfeiture, as provided by the "Mineral Act Amendment Act, 1900"

Dated this 12th day of June, 1901.

JOHN W POWELL.

MINERAL ACT, 1896.

Certificate of Improvements.

NOTICE.

"QUEEN OF SHEBA" mineral claim, situate in the Kettle River Mining Division of Yale District. Where located: In Copper camp, adjoining the "Jumbo" and "Harqua Hala" mineral claims.

TAKE NOTICE that we, Thomas McDonnell, of Greenwood in the said district Free Miner's Certificate No. B. 40,302 and William Graham McMynn, of the same place, Free Miner's Certificate No. B 40,601, intend sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 10th day of August, 1901.

THOMAS McDONNELL.
W. G. McMYNN.

Erect Form Corset.

THE "W. B. ERECT FORM"

embodies those cardinal truths of Corset making which the designer has striven to reach since the days of Elizabeth. It is the logical perfection of the Corset idea, hygienic, graceful, exquisite it its lines.

It is positively the only proper model for straight form and princess gowns.

For grace and style of figure
For perfect ease and comfort
No Corset equals the

"W B" and "La Vida"
