# THE CARIBOO SENTINEL.

Vol. 1. Barkerville, Williams Creek, British Columbia, Saturday, August 5, 1865. No. 10.

THE CARIBOO SENTINEL

BARKERVILLE, SATURDAY, AUG. 5, '65

## LETTER FROM VICTORIA.

Victoria, July 25th, 1865.

In former communications I informed you of the existing dullness, and that that condition had been caused by the absence of immigration, the departure of Victoria (without the Navvies) to Cariboo, and the imposition of the Gold Tax and the unfair Tariff which had frightened the miners and induced them to shun Cariboo and seek other grounds, where they would not be called upon to bear the whole burdens of the Government of the country, but to bleed, bleed, bleed, not for their own salvation but for the benefit of those who live upon them, viz: the mus-quitoe autocracy. If the mining population were to leave British Columbia it would relapse into its former condition of a reserve for trappers; so that it would appear that every one, the merchants, the farmers, the mechanics, and not least the Governor and officials, are entirely dependant upon them for support! Such being the case, surely the burdens ought to be more equally divided. Why is it that a man living in Cariboo should be called upon to bear the burden of making roads more than the man who lives upon the banks of the Fraser? Why is it that the farmer should be exempt from those burdens?—The people whether above or below form equally the population. All are equally, either directly or indirectly, benefitted by the roads, and therefore the burden ought to be paid out of a common fund. Road Tolls ought to be abolished! If they are not to be then let tolls be put upon those roads which have been made about New Westminster out of moneys supplied by the miners. By the by, how much better for the country it would have been had the money unfairly spent upon that city been expended upon a road to Kootenay! I should like to know how the towns on the Fraser are to compete with the Americans if there be road tolls to Kootenay? Perhaps there will not be to Kootenay, as that would please New Westminster—perhaps there will be no road at all, as that is of no consequence to Government provided they collect the duties and the gold tax.

VICTORIA.

But to return to Victoria—business remains dull, and will contiune so for a month or two longer; still the people have recovered in some measure their wonted alacrity, and even the subordinate Government officials look cheerful and have thrown off that saturnine demeanor supposed to be the result of the petty tyranny exercised upon them; they hold their heads erect once again, and this is consequent upon—the weather! Don't laugh my dear fellow! Did you ever observe how much men are influenced by the season? How they are crabbed, cross-grained and depressed when the barometer is low, the atmosphere murky, and the sun obscured by clouds and rain? How they are cheerful, benevolent, energetic and forgiving when the barometer is high and the sky serene? In the former case everything looks blue, and evils are not only magnified but actually sought after; in the latter, throw cares to the—— and while we live let us live, is the predominant feeling. Why half the evils of this world are caused by the weather (not the liver), and whoever presides over that has many sins to answer for; man's nervous system (I believe that is the learned term) cannot withstand its influence and it affects his many actions. So if you wish a good action to be performed by another choose a cheerier day in order to gain your point, but if the contrary choose the most dismal one! never mind the before or after dinner, but by all means avoid the early morn. Rely upon it the character of a nation is very much dependant upon the climate; and so is that not only of their body, but of animals also, whether they be lean or fat—a wet country conduces to pingnescence, an arid one to thinness. Well, perhaps what I write or have written is influenced by the barometer, at least the causes that disturb the one may agitate the other. But, let me see, Victoria—the weather—Victoria is cheerful. It may be owing to the non-existence of the Legislature, the return of Sir James Douglas, the installation of Colonial Secretary Young and deposition of t'other, or that things are mending, but say it is the weather, sir. It is just now delightful. Call to mind all the azure skies you have ever seen, the cloudless nights, the bright and twinkling stars, the verdant meads (we) now!) and multiply them by a hundred and you have some idea of Vancouver Island just now! Besides clams and salmon are plentiful, so no fear of starvation! Well, business is out, pic-nics are in, and so are shooting and cricket matches.

SHOOTING MATCHES.

We have been blessed with a couple of the latter, being what are termed "retura intercolonial matches"—that is to say, between Victoria and New Westminster. New Westminster is the whole colony of British Columbia, because all the legislation is done there, and that, and whatever else is done, is done as it ought to be—for the benefit of that capital city! that is why they are called intercolonial matches. Well, every one went to see the sport. The Governor and the flunkies—courtiers; the ladies and the swells; the merchants and the beggars; the industrious and the idle; in fact they (the sports) were a capital excuse for a holiday, for flirting, courting, gossiping, drinking, &c.; horses and asses, ginger pop and stronger beverages, cakes and more substantial esculents were there; short volunteers and long volunteers, fat ones and thin ones, some with spectacles and some with eye-glasses—indeed just imagine the opening of a shooting match as it takes place in older countries and you have the reality of this one. The New Westminster, beg pardon, British Columbian volunteers were splendid—brighter even than the sun—resplendent with a terrific amount of gold lace, which it is supposed must have been derived from the clippings of the assay office, or the gold tax, or voted to them by the Council, because the salaries of the officials there are too small to allow of such an extravagant expenditure; but it did look so nice—the ladies said so, and their judgment ought to be sufficient. The Victorian officers had no lace—poor fellows—although the officers do belong to the banks and to the Government, but the Government of Vancouver Island is poor and mean, from the head downwards, and cannot afford to buy lace, and so they did not look so nice—this made them nervous and they lost the day. Vulgar people say they never practised because the Governor would not give them any, or rather sufficient, cartridges. They lost the day, however, fairly enough, but the shooting was bad on both sides—so perhaps all the soldiers were nervous. The New Westminster boys made 210; the Victorians 193. Well, after that they toddled home with mortifying music, and in the evening the Victorians stood treat, and gave the New Westminters a good dinner, at which they became oblivious of victory or defeat and fraternized amazingly. Moral, if you want to fill up the ranks of the volunteers make being a member very expensive.

AMATEUR PERFORMANCE.

By the by the evening before the match the Amateurs gave a performance at the theatre, which was well attended; the piece "Bombastes," revised, corrected and improved to suit circumstances, and the actors made several severe hits and thrusts at the Governor, Government in general, and the follies of the day. How is it that when a man is down every one is ready to give him a kick? It is the fashion!

CRICKET MATCH.

A few days after came the Cricket Match—another holiday—at which the same persons attended as at the shooting, but the cricketers were another set. They played from morn to eve clad in the best flannel, three-quarters of a dollar a yard at least, so that the lion (British) and the lamb went side by side and stuck to each other (with perspiration) amazingly. The New Westminsterians came off worst, they made 90 in two innings and the Victorians 124. Another dinner in the evening, and so on, and the next morning they went home.

THE MARSH TROUPE.

After this the Marsh troupe returned from China. You know Marsh; he gave the whole proceeds of a benefit to the hospital, more than $500. They have performed one or two nights to very good houses. It is said they will remain here this summer and winter, and will take charge of the theatre—themselves and additions to the company.

ENTERTAINMENT TO THE AMERICAN SPEAKER.

There will be a grand dinner next Wednesday, given by the Americans to the Honorable Schuyler Colfax, Speaker of the House of Representatives of the U. S. He is hourly expected. What if he should not come in time! So you see things are pretty jolly.

THE ASSIZES.

The Assizes are still going on. Cruickshank has been acquitted, on the ground that he was insane at the time he made a confession of having robbed the bank. All the doctors agreed in court as to the insanity!

LEECH RIVER.

The waters of Leech river have fallen and one or two companies have commenced working, making (with flumes) about twenty dollars per diem. A few weeks will decide the value of the river diggings; most people have confidence in them.

THE NOOTKA EXPEDITION.

Smith and his party have returned from Nootka, but did not make any valuable discoveries on account of the swollen condition of the streams. They have, however, found gold in paying quantities somewhere between the river Jordan and Port San Juan.

MUNICIPAL COUNCIL.

Munro, a contractor, of British Columbia and a member of what is said to be Victoria's Municipal Council, has resigned, and it is said there will be another—election! I may tell you something about that collection of—— next time.

---

HAUNTED HOUSE—The writer of the following curious communication is a respectable widow lady, residing not far from the Irish metropolis, at a fashionable watering place:—The first day I came here some of the furniture was put into the yard. At night I was awoke by a noise like moving furniture. I opened the window and looked out, but could not see anything. Every night I was disturbed with nosies like a noisy servant going through the house. In the evening knocks and creaking of the furniture went on so that the servants were quite terrified. I was in hope I could account in some way, and did not feel the alarm that they did. Soon after I came they both took scarlatania, and I frequently had to get up in the night and go to them and give them medicine. The nosies were most distressing to me, but after sometime I had other trials with my unseen annoyance. There were many nosies like the stroke of a whip on the furniture and one night I was actually raised up in the bed. I often feel as if some one lay beside me, and tried to crush me out of bed. The servants often tell me of similar things happening to them. I have been trying to bear with all this, and much more, because I have the house on a lease, and cannot give it up to the landlady. Servants have left on account of the frights, but this winter it is worse than ever. I lately got a dog, and few a few nights after he came he awoke us with barking, and we thought some one was trying to break into the house, but there was no appearence of it in the morning. A day or two after the servants were sitting in the kitchen when nosies were heard in different parts and the dog yelled frightfully. When we were going to bed I said to the servant if she heard the dog frightened in the night to go and bring him in to her bedroom. He yelled most frightfully an hour or two after we were in bed, so much so that I went myself to the kitchen and the poor brute was nearly dead with fright I took him to my own room, and in the morning I asked why she did not go for him; the girl said she was really afraid to go on the stairs as she heard the footsteps so plainly, and afterwards, (and whatever it was) went into the room next to them. Last night there was a knock at the hall door (there often is), and the dog whined; he sleps in my room. I thought there must be some one really at the door, but, while I was thinking this, the dreadful thing, (whatever it is), lay down beside me and crushed me. All I could do was shout; it then left me. Now, you may make what use you please of this account, without mentioning my name or residence. I can assure you I have not written one word but truth, and, of course, have only given a sketch of what occurs frequently; but I think the dog being so terrified has added to my own distress. The servants say they see a little fat woman, but I never saw anything.—Londonderry Sentinel.

WINNING A WAGER—A curious event that occurred recently on the frontiers of Austrian Gallicia illustrates the value of life in these parts. A Cossack, who was sitting in a pot-house among the peasents, began boasting about his skill in shooting, and declared that he could shoot the hat off any man's head at 50 yards distance. A peasant thinking himself clever, offered a wager that he could not do it to him. The Cossack accepted, and the peasant pulled his hat as tighly as he could down over his eyes, chuckling at the thought that it would be impossible for the Cossack to shoot it off. And so it was, the the peasant won the wager but unfortunately the bullet passed through the middle of his forehead. The Cossack on being brought before the Judge, declared that he had done the trick fifty times, and if the Judge doubted him he had only to come out in front of the court and he would prove it upon his hat. The judge declined the flattering proposition, and the Cossack escaped with two months' imprisonment.

AWKARD MISTAKE.—A distinguished lady of a very charitable turn is in the habit of distributing orders for bread and soup to poor pensioners. On a recent occasion, seeing on her writting-table a packet of these tickets and a packet of photographs, which were to be enclosed to her friends with best regards, &c., she told the servant—a newly imported country girl—as she was going out, to put the 'cartes de visite' into the envelopes, and send them by post; and was not a little astonished to discover on her return that the envelopes had each received a ticket for soup and bread and been sent off, while the 'cartes de visite' lay undisturbed.—Glasgow Herald.

The Exchange Hotel, Richmond, has been leased at auction for three years, for the sum of $8,250 per annum.

# THE CARIBOO SENTINEL

BARKERVILLE, SATURDAY, AUG. 5, '65

☞ A SUPPLEMENT containing eight columns is issued with this number of the "Sentinel."

An opportunity will be afforded by the Governer's visit to this district for the miners and traders of Cariboo to lay their grievances before him, and to claim from his Excellency redress of those wrongs which oppress and weigh down upon them so heavily. Governor Seymour will witness with his own eyes the contrast in the appearance of every interest in the country from that of last year which his sectional policy has produced. It is comparatively a short time since his Excellency assumed the Government of this country, and although he might have easily steered a course that would have conduced to its highest prosperity, he preferred uniting and binding himself to a knot of unscrupulous politicians, who have been working for years to enhance the value of their own town lots in New Westminster at the expense, and even if it should be the ruin, of the remainder of the colony. All their attempts proving futile under the distinguished man who formerly exercised supreme control over the destinies of the colony, the machinations of years of those tricksters were consummated the moment Governor Seymour's weakness was discovered, and the result has been as predicted, the prostration of every interest in the country. When Governor Seymour broke through all restraint, and leagued himself with the Homerian school he did not stop with half measures. It was not enough to accept the Gold Export Tax Bill, but he must also impose a Tariff hostile to the best interests of the interior, in order if possible to prop up the value of property in his so-called capital. This his Excellency did, although it could only be done—we speak advisedly—by ignoring the plain letter and spirit of Her Majesty's instructions. Moreover Governor Seymour was sent out here to promote Union of the colonies, and how has he done it? By stifling in every possible way the expression of public sentiment on the subject. He not only got his minions to vote it down in the Council, but at last, through his Colonial Secretary, he burked the discussion of the question altogether. Has his Excellency's conduct then been that of a high-minded and far-seeing statesman? or has he attempted to fulfill the instructions which he received from the noble Duke who invested him with power to rule this colony? It is with pain we publish the fact that his Exellency's conduct has been the very reverse of what the people of this country had a right to expect from an English statesman selected to rule this important country by so experienced a judge as the late Duke of Newcastle. From a state of comparative prosperity and contentment Governor Seymour's policy, or rather the adoption of the New Westminister code, has reduced the country to an ebb that it may never recover from and produced dissatisfaction which has led to the determination on the part of all to leave the country the moment their circumstances will permit them. If Governor Seymour felt that he was only sent to this country to waste its revenue on esplanades and fancy roads through forests of stumps at New Westminister, from which no material advantage would ever accrue to the colony, and to impose crushing burdens on a portion of the people, he should have stated so at the outset, and he would have been understood, but first to leaven the public mind with the idea that he was here to act for the benefit of the whole country and then govern differently is a piece of double dealing discreditable to his high position, and which must compromise his own future prospects in his official career through life. There is one step only which he has taken that we do admire, and it may go far to atone for his Excellency's past shortcomings, and that is his boldness in coming to Cariboo at present to meet his subjects face to face. It may be that his Excellency has discovered his many errors and is coming here to offer some assurance of his desire to meet the wishes of the people of the country, and carry out a new policy that will promote the interests of all. If this be his object then indeed he deserves a cordial welcome, and it should be the aim of all to forget the past. To err is human and to forgive divine, and although Governor Seymour has grievously erred, yet we should be willing to forgive if there be a true sign of his having discovered his errors and a desire manifested to turn from his false guides in future. It is a matter for sincere gratulation that during his stay here Governor Seymour will have the great advantage of the counsel of one of the most experienced and upright men in the service of the colony. No man, whether he is an official or not, can compare with Mr. Cox for a true knowledge of this colony and its real wants, as well as an intimate acquaintance with the wishes of its inhabitants, and the information which his Excellency will derive from him should produce an effect that will be of lasting benefit, not only to the country but to his Excellency himself.

## NOT COMING TO CARIBOO.

It is with deep regret we announce that a private letter has been received which states that Governor Seymour has received a six months' leave of absence, and has abandoned his intention of coming to Cariboo in order to proceed at once to England. Our only object in desiring to see Governor Seymour here was that he might witness himself the disastrous results of his insane policy. We would advise his Excellency to remain in England when he gets there, as in the event of his returning here next year he will find the colony inhabited by Siwashes and Celestials alone. Governor Seymour may take home with him the pleasing reflection that by his policy he has ruined the country by driving its only support, the mining population, out of it. It must certainly be highly satisfactory to Governor Seymour to reflect upon his voyage home that in one short year he has destroyed the prospects of one of the most promising colonies under the Crown.

## THE GOLD TAX ADMITTED BY GOVERNMENT TO BE A MISTAKE.

To the Editor of the "Cariboo Sentinel."

Sir,—I am pleased to have to inform you that some of the most prominent members of the Government here, including Mr. Colonial Secretary Birch, have admitted that the Gold Tax is a mistake and has nearly ruined the country. The Governor has left for the mines, his running away in a hurry being attributed to the strong expression of dissatisfaction with his policy which the "Sentinel" has promulgated on the part of the miners of Cariboo. I am assured that it only requires vigorous and united action on the part of the mining and trading community to get an assurance from his Excellency that the undoubted grievances of the "bone and sinew" of the country will be redressed.

Alpha.

New Westminster, July 24th, 1865.

## A PUBLIC MEETING.

To the Editor of the "Cariboo Sentinel."

Sir,—Why have the miners of Cariboo not held a meeting to adopt resolutions condemnatory of the Government policy, in order to prove to Governor Seymour the existing discontent. I know many are favorable to such a course, and I feel certain if any steps were taken in the matter they would be warmly seconded. The proper place to hold such a meeting would be Barkerville, and there are several large rooms that could be had for that purpose. I am sure the proprietor of the Parlor Saloon would lend his commodious room for such a purpose. There should be a meeting held on Monday or Tuesday evening at farthest. There is no time to be lost, the action must be immediate.

Yours,
One of the Discontented.

To the Editor of the "Cariboo Sentinel."

Sir,—As I presume there will be some public demonstration during the ensuing week to represent to Gov. Seymour the grievances which miners labor under, would it not be well to discuss the question of the representation by official members in the next Legislative Council. It is generally understood that there will be many changes in the constitution of that body, and would it not be to the advantage of the country to have a man like our present Gold Commissioner in the House, whose long and intimate acquaintance with almost every part of the colony would be most valuable in guiding the Administration in the right path. Had there been such a man as Mr. Cox in the House last winter he would have pointed out the very dangers which have led to the depopulation of the country by the passage of measures obnoxious and injurious to all outside of the capital. As this highly important section of the colony—in fact the true capital of the country—must be represented in the next Session of the Legislature, I hope that the miners of Cariboo will press on his Excellency the pre-eminent claims which Mr. Cox has by long and meritorious services in the country to a seat in the Council.

Vox Populi

Cariboo Markets.—Prices of every discription of goods remain at the figures quoted in our last.

# THE CARIBOO SENTINEL

BARKERVILLE, SATURDAY, AUG. 5, '65

## GOLD COMMISSIONER'S COURT.

(Before W. G. Cox, Esq.)

Barker co'y vs. Diller co'y.—This was an action to make the defendants show cause for breaking in plaintiff's dam, in Stouts gulch, and diverting the water of said gulch from plaintiffs' ditch. The Barker co'y claimed $250 damages, and asked for an injunction to restrain the defendants from diverting the said water from the plaintiffs.

Mr. Walker appeared for the Barker co'y and stated the case. He said that the Court should put a stop to parties taking the law into their own hands as seemed to be the practice of late and give substantial damages for the injury inflicted on his clients. The learned gentleman called the following witnesses, Messrs. C. Hankin, Goldsworthy, Smith, and McFarland, all of whom proved that the water from the Barker ditch had been diverted by the defendants. He also put in the records of the water privilege.

The case being rather an intricate one with regard to the relative position of flumes, the Commissioner decided that he would inspect the ditch before coming to a conclusion. With reference to a remark which had fallen from Mr. Walker in regard to persons "taking the law into their own hands," the Commissioner said he could not pass it over without observing that he took it as directed against himself personally. He thought it entirely uncalled for, and it was a reflection on the law abiding people of this creek which he believed was unwarranted. With respect to Mr. Loring's conduct, to which Mr. Walker no doubt referred, he (Mr. Cox) belived that he had only done what any other man in that court would have done under the circumstances. An obstinate rogue had got into his (Mr. Loring's) house and would not leave it. It was well known to every one it was Mr. Loring's own saloon, and he had only taken off the windows and doors, whilst he might perhaps have taken away the house. It was Loring's only alternative to do as he had done, or wait a year until the Chief Justice returned to the creek. Mr. Loring had given the Court his word that he would not commit a breach of the peace, and he had faithfully kept it.

Mr. Walker repudiated any intention of showing disrespect to the bench, and said he had merely used the words quoted by the Commissioner to enforce his arguments in the particular case before the Court. The learned gentleman disclaimed any desire to be personal, or to cast any reflection whatever on the Commissioner.

The Court accepted the disclaimer, and the proceedings were brought to a close.

Saturday, 5th Aug.

J. Christie vs. S. G. Rees and J. H. Todd—Plaintiff sought to recover from defendants, as members of the late Union co'y, the sum of $165 on contract for building wheel, &c., for the company in July, 1864. Todd defended not liable, on the ground of being agent for J. H. Turner, in whose name the claim was recorded at date of contract. The Court sustained Todd's objection, giving judgment against Rees.

HIGHLY CREDITABLE—It is a pleasing fact to record that on his Excellency's visit to Cariboo he will find the peace of the country so well observed that there is not a single prisoner in the jail of the district. This is as creditable to the excellent Magistrate, Mr. Cox, as to the pepole among whom he administers the laws with such impartiality. Since the opening of the mining season there has been a great diminution in litigation compared with former years, a state of things which is attributable in a great measure to the discouragement which Mr. Cox offers to parties going to law on the most frivolous pretences.

NO SHERIFF.—We have been informed that there is no acting Sheriff in this district since Mr. Chisholm resigned, and already the most serious inconvenience and it may be loss has resulted to individuals. We hope his Excellency the Governer will make an appointment to the office before his departure. The time has arrived we think when Sheriffs directly responsible to the Executive should be appointed in the several districts of the country. The system of having only one Sheriff for the colony is most injurious and has already led to untold injury to many persons in this country.

NO MEETING.—We are requested to state that the public meeting advertised to take place on Tuesday evening next, has been postponed in consequence of the Governor having abandoned his intention of coming here at present.

VICTORIA LETTER.—We would draw attention to the admirable letter of our Victoria correspondent which appears in this day's issue.

NO EASTERN NEWS—In consequence of the wires being down on a plains, there was no Eastern news received to-day.

☞ All who desire GOOD COFFEE and Fine Spices can have both by always asking for FELL & CO'S which can be had from all respectable Store keepers. Be sure you get it with our trade label on each package.

## MINING INTELLIGENCE.

### A NEW CREEK DISCOVERED.

A new creek has been discovered about sixty miles from Williams creek that prospects well. A company of miners have been working on it for two weeks, and have made an ounce a day to the hand in surface diggings. They sent word to some friends here on Sunday last, and a second company started with mining tools and provisions. The new creek is situated north-east of Bear river.

### WILLIAMS CREEK.

There is no mining news of great importance to record in connection with this creek to-day. The California Tunnel company have struck most encouraging prospects. — The Beauregard and Confederate claim has been paying largely all season.—The Davis co'y has been taking out about 20 ozs. per day during the week, and expect to do a great deal better when they get in proper working order; Mr. Robert Dexter has been appointed foreman.—The Aurora co'y is paying steadly from 250 to 300 oz. per week. It is understood that during the week the Davis co'y channel has been found running into the Aurora claim which will give the latter three or four hundred feet of the lead.—The Hibernia co'y are earnestly at work and hope soon to strike the lead.—The Morning Star company is paying 25 ozs. per day, and giving large dividends to the shareholders—3.—Several companies are prospecting in the hill on either side of the Morning Star.—The Cameronton claims are paying about the same as last week.

### M'COLLUMS GULCH.

The claims on this gulch are generally doing pretty well. The Parkerson company are averaging $15 per day to the hand; they took out two nuggets lately, the largest weighing 4 ozs. and the smallest 3 ozs.

### STOUTS GULCH.

The claims generally on this gulch are doing well. The Golden Hope or High-Low-Jack co'y are making more than expenses.—The Pioneer co'y are averaging more than wages.—The Floyd Tunnel co'y are taking out gold, above expenses.—The Alturas co'y wash up about 20 ozs. a day; they got a nugget on Thusday worth $43.—The remaining companies on the gulch are prospecting.

### CONKLINS GULCH.

The Saw Mill co'y are down 114 feet in their new shaft.—The Ericson co'y took out between 800 and 900 ozs. of gold this week; they have suspended work for the present.—The Reid co'y's prospects are getting better, last week they took out more than expenses.—The Philadelphia co'y are still drifting.—The Challenge co'y are sinking a new shaft in the hill.—The New Zealand company are sinking a new shaft; they got a prospect of 2 ozs. on high bed rock in the bottom of the shaft a few days since.—The Good as Any co'y are sinking a shaft. All the claims above the New Zealand are laid over.

### M'ARTHURS GULCH.

The Artesian co'y are prospering; they expect to have 100 ozs. this week.—The Discovery and other companies on the gulch are getting good pay.

### LOWHEE CREEK.

The claims on this creek generally are not doing so well as formerly. The Washburn, Chittenden, Moorehead, Plumbago, Vaughan and Sweeney are at work.

## CUNNINGHAM CREEK.

### LEWISTOWN.

On Friday evening, the 22nd ult., a meeting was held on Cunningham creek for the purpose of giving a name to the township. Mr. A. Lewis was called to the chair, which he very reluctantly consented to occupy, and Mr. D. McKay was chosen secretary. The first motion was made by Mr. O'Neil, namely: "That the town be henceforth called and known as Lewistown," which being duly seconded was unanimously carried by the meeting. Mr. O'Neil said he was sure all would feel satisfied with the choice they had made of the name; they all knew the perseverance exhibited by their worthy chairman in materially assisting and aiding in the development of the golden resources of the creek, and also the impetus that had been given to building through his example and confidence in the permanency of the mines. He therefore took great pleasure in proposing, that the nucleus of a future city should bear his name.

Mr. Lewis thanked the meeting for the very flattering compliment they had paid him in associating his name with the town, but felt that it was unmerited on his part, he could have wished to have seen it bestowed on some other more worthy member of the community.

Mr. Davison here rose and said that now we had named the town it became necessary for them to appoint a proper officer to look after our Municipal affairs. He would therefore move that a Mayor be appointed, and he took great pleasure in nominating his friend, Mr. Wm. Greaves, than whom he thought no fitter person could be chosen for that position; but as the nomination did not meet with the entire approbation of the meeting it fell through.

Mr. O'Neil then rose and nominated Mr. A. Lewis as a fit and proper person to fill the office of Mayor, and was proceeding to discant on the qualities and merits of the nominee, when he was interrupted by the chairman, who rose and with a great degree of emotion said, "Gentlemen, you have doubly honored me already in choosing me to preside at the meeting, and in making me godfather to the town, that I feel myself greatly embarrassed in addressing you. I had far rather that you appointed some person to fill such a responsible position who was better qualified than myself to perform its duties; I feel that I could not with justice to my duty carry out many necessary measures without being too severe on some parties, but if you are determined to load me with the honor of becoming your Chief Magistrate, I can assure you sincerely that it will be my earnest endeavor to secure to your town good order, and will direct my attention particularly to the sanitary condition of the place generally." [Great applause.] Mr. Lewis' nomination was unanimously confirmed by the meeting.

Some wag here proposed that the Mayor be forthwith requested to apply to Government to get a trail cut to the head of the creek. The chair called the delinquent to order, and would ask if any one had come here to throw ridicule on the proceedings. He could say for his own part he felt glad that his lot had been cast amongst the number who were developing these rich and highly remunerative gold fields, on which he need hardly tell them they had but to put the spade in the ground and the glittering ore would stare them in the face. He would remind them that his Honor Judge Begbie was about to leave Cariboo in a few days and it would be requisite that a report of these proceedings should be transmitted to him for the purpose of having his appointment confirmed.

The meeting, after passing a vote of thanks to the chairman for his able conduct, and to the secretary for his onerous services, adjourned to a neighboring saloon, at the special invitation of the Mayor elect, and imbibed freely in the ardent until the small hours of the morning.

### MINING.

For the past two or three weeks a good deal of anxiety has been felt among miners and others on the creek as to the extent and richness of these diggings. The results however of the prospecting which has already been done has had the effect of giving renewed energy to the miners, and increased confidence in the ultimate prosperity of the creek. With a few exceptions most of the claims are all but opened up, and are beginning to yield good pay and good prospects. Mining operations have been impeded at least a month longer than they will during any subsequent season by reason of having ditches to cut, lumber to saw, and a thousand other drawbacks attendant on a new camp, after the season set in, and last, though not least, the packing on men's backs of provisions, tools, &c., over a trail which can only be equalled by that which existed between Quesnelmouth and Van Winkle in 1862.

### WANT OF A TRAIL.

It is a wonder that Government exhibits such an apathy to the wants of the mining community on outlying creeks; they have to get along as best they may, while waggon roads are being laid off on old worked out creeks. Surely something ought to be done to clear a mule trail between here and Williams creek; the cost would be trifling compared to the expense of the road from Richfield to Cameronton, and the benefit would be great in opening up a new and promising district.

### THE CLAIMS.

The Campbell co'y, above town, are hard at work ground sluicing, and intend to hire Chinamen soon; diggings will pay about wages.—John Gray co'y are hydraulicing and making very fair pay; they cleaned up for the last week 102 ozs.—Willoughby co'y are just starting to drift in the inside channel of the flat and are getting flattering prospects.—Montgomery co'y are steadily engaged in running off a deep bank and are now on the edge of the channel, where they expect good pay. Kentuck co'y, washing off top dirt, have not washed any of the bottom of the channel yet; last week the yield was 70 ozs.—Sing co'y, in the creek, are making wages and have not got to the bottom of the channel.—Lewis co'y are doing well.—Sargent co'y are beginning to find fair prospects; they are steadily piping off top dirt.—Wade co'y are running a long ground sluice, have not cleaned up.—Smith co'y, sinking a shaft in the creek.—Great Eastern co'y put down a shaft in the creek, 34 feet deep, and struck a good prospect; they are now sawing lumber for sluices, and will start drifting in a few days.—McKay-Fulton co'y have just got the creek turned; washed two days last week, result, 10 ozs.—Standish co'y have got their ditch finished and started to wash on Thursday.—Guerran & co'y have been sinking a shaft on Jaw Bone Flat, about half a mile below town; they have got down 30 feet and found a prospect of 25 cents to the pan, and no bed rock.—Alpha co'y have got down their shaft 50 feet and struck water; they have been busy constructing a wheel, elevator pump and ditch which will be finished to-day, when they will at once resume sinking.

☞ An excellent letter from Mr. Ramage appears in the 'Columbian,' denouncing Howard's false statements.

## SERIOUS CHARGE AGAINST THE ERICSON COMPANY.

An intense excitement was produced here yesterday on a report becoming current that the Ericson company had worked about 480 square feet of ground belonging to the Saw Mill company during the last two or three weeks, and from which the immensely rich yield that we have lately chronicled had been obtained by the former company. At first the report was received with some degree of incredulity, but as the day wore on doubts began to give place to certainty, and what was only a vague rumor in the morning became a settled fact before night. It appears from what we have heard that between the two companies in question the most cordial, even confidential, intercourse has existed for a length of time. The Saw Mill company claim that owing to the unbounded faith and implicit confidence which they have always placed in the Ericson company they were entirely thrown off their guard, and, acting on those feelings to which we have referred, they did not exercise that scrupulous supervision over the work of their neighbor which they otherwise would have done. The result as they state has been that their confidence has been abused, their rights invaded, and their ground filched from them. As we understand the matter, a line was surveyed between the two companies and plumb-bobs placed so that no mistake could be made in working the ground. Various surmises are afloat as to the amount taken out of the Saw Mill claim, some estimating it as high as $90,000. It is not for us to pass an opinion upon the subject at present, but if, as has been alleged, the Ericson company have worked their neighbor's ground (as we understand they partially admit) such an example should be made of them as will deter the unscrupulous from attempting such infamous practices in future. To allow a serious matter of this description to pass with impunity would go far to destroy all confidence in mining property, and bring disastrous consequences upon the country.

Just as we were going to press we learned that the Saw Mill company have instituted proceedings in Court for $50,000, and the matter will come up before W. G. Cox, Esq., on Monday morning next.

VICTORIA NEWS.—The Hon. Schuylor Colfax arrived in Victoria on Thursday, and met with a warm reception. He was accompanied by Lt. Governor Bross, of Illinois, Saml. Bowles, Esq., (Editor of the Springfield Republic), A. D. Richardson, Esq., special correspondent of the New York Tribune, Hon. E. Evans, Lt. Governor of Washington Territory, and was received at the wharf by the American Consul and a deputation representing American residents. The I. O. of O. F., of which order Mr. Colfax is an illustrious member, waited upon him by deputation. The city Council also presented an address of welcome. The illustrious party paid a visit to Admiral Denman on board the Sutlej, where every attention was shown, and a salute fired, &c. A complimentary dinner was given in the evening, at which 150 gentlemen sat down, amongst whom were his Excellency Gov. Kennedy, and many prominent citizens.

GEOLOGICAL SPECIMENS.—We would call the attention of miners to the letter of Mr. Alston, the indefatigable Secretary of the Victoria Mechanics' Institute, which appears in this day's supplement. There are few persons in this neighborhood who cannot aid in the work of forming Geological Museum for these colonies, and when it can be done with little expense and trouble we think all should afford assistance towards so desirable a work.

FIGHTS IN BARKERVILLE.—With reference to the item which appears elsewhere on this subject we are informed by the very efficient Chief Constable of this district, Mr. Fitzgerald, that his exceedingly limited force were engaged on special duty on Sunday last, which prevented their visiting this town during the day.

RUMOR.—The Victoria 'Chronicle' states that it was reported Gold Commissioner O'Reilly had been shot at in Kootenay. The rumor could not be traced to an authentic source.

SUN STROKE.—A miner named Wm. Cruphy received a sun stroke at Antler creek a short time since, which has necessitated his going in to the hospital here. He is suffering from facial paralysis.

DIVINE SERVICE.—It will be seen by advertisement that the Rev. Father Gendre, who has lately arrived here, will celebrate Divine service in Cameronton tomorrow morning at eleven o'clock.

FROM PORTLAND.—July 26.—To-day's boat from the Upper Columbia brings an account of a brutal murder which occurred at Warm Springs, near Idaho City, on Sunday last. Ex-Sheriff Pinkham was shot in the back by one Fred. Patterson, and instantly killed. The cause is reported to have been an old political grudge. Fred. Patterson is the man who some years ago killed Capt. Staples in this place on account of a political difference.—The negro, Green, who attacked and seriously wounded a Mr. Wells, near Walla Walla, on the 20th was captured and hanged by the Vigilants.

Very rich Placer discoveries are reported on the middle fork of John Day's River. Prospects ranging from 25 cents to $3 to the pan were obtained.

# THE CARIBOO SENTINEL

BARKERVILLE, SATURDAY, AUG. 5, '65

## THE GOVERNOR'S VISIT.

To the Editor of the "Cariboo Sentinel."

Sir,—I am glad to find that his Excellency Governor Seymour has changed his mind and is about to visit this important section of country, to witness with his own eyes the effects of the policy which he has inaugurated in this country. It is only twelve months since his Excellency's former visit, and what a falling off is perceptible in the population since then? At that time there was a large population and comparative prosperity to every interest; now all is changed, the great mass of the people are gone, and there is nothing left but discontent and dissatisfaction amongst the miners and traders who remain, and all through one false step on the part of the Government. On Governor Seymour's arrival in this country he gave universal satisfaction by following out the system inaugurated by his eminent predecessor, whose vast experience and knowledge, as evidenced by his policy, were the only sure road to lead the country to prosperity, but no sooner did Governor Seymour in an evil hour listen to the few evil geniuses in New Westminster, who have but one idea—the raising of that embryo city at the expense of the whole colony—than from that moment the flat went forth that the mining interests of Cariboo were slaughtered. There is no part of this or any other community who are more generally reckless of their money when they make it than the miners, but as a class they are the last to submit to extortion, injustice, or unequal laws. They will sacrifice anything and everything rather than allow themselves to be made the victims of imposition by either the Government or individuals. I have known a body of miners in going down country to stop all night at a wayside house where perhaps the landlord felt he could fleece them when they were in his power, by charging even a trifle more than the proper tariff, and rather than submit to pay one quarter of a dollar beyond what they considered fair I have seen twenty men leave in a body in the morning and travel eighteen miles before breakfast to the next house where they would not be victimised. This was not becaused they cared for the twenty-five cents, but simply to mark their condemnation of the unjust conduct of the silly landlord. It is just the same when oppression and injustice are dealt out by the Government. The hundreds of old Cariboo-ites who are now perhaps half starving in Idaho, are not there because they believed that country to be richer than Cariboo, but simply to escape from the unequal laws of the silly Government of British Columbia. Had Governor Seymour acted like Sir James Douglas, and declined to accept the hostile Tariff and Gold Export Bills when presented by Mr. Homer, he would have acted like a wise and prudent ruler in following the example set him by so experienced a predecessor. But no! Governor Seymour became smitten with that sectionalism which prevails among the lot owners of his so-called capital, and the result is a depopulated country. If the necessities of the colony demanded more revenue why did not Governor Seymour tell Mr. Homer to lay a Bill before the Council that would tax the traders and officials of New Westminster on an equality with miners? then not a word could be said, or would be said, by any of us. But did his Excellency do this? By no means; he allowed it all to be pressed on the "goose that was laying the golden egg," and the end is ruin to the land his Excellency was sent to govern equitably and justly for the good of all. On what principle of political economy did Governor Seymour base his reason for taxing me because I have labored hard and spent thousands of dollars in the far interior of this country in developing its mineral resources, and allow Mr. Homer, the Legislative Councillor and mill owner of New Westminster, to escape Scot free from his just share of taxes at his Excellency's own door? Is his Excellency an Englishman? Does he rejoice in being a native of that noble country which is the synonym for justice, and where labor is not made to bear the burdens of the State? Are the working miners of England taxed and the capitalists let off? No! because justice and equity are at the foundation of the legislation of Great Britain. I have been five years in this colony, four of which I have spent in Cariboo. During that time I have sunk $28,000 in labor and money in opening up the mines; at present I am almost penniless, my only hope is in a claim in which myself and partners have sunk $45,000, without ever receiving one cent in dividends; we have sanguine hopes of getting back some of our money, but before we ever get one cent of profit (if ever we do) we must pay the Government the Gold Tax upon the money we have actually expended in the hazardous experiment of developing the claim. Now, sir, Mr. Homer has invested money in a mill at New Westminster, and I ask does he pay one dollar upon what he has either expended upon it, or receives out of it in profit, towards the revenue of the colony? Not a dollar! And yet our once popular Governor recommended the Council to adopt this same Mr. Homer's iniquitous, unjust, and unequal Gold Export Tax Bill, that exempted himself, and the high Tariff Bill to drive the 'working bees' out of the colony. Sir, as an Englishman, as a true, loyal and devoted subject of our honored Queen, I would be ashamed to look Governor Seymour in the face and recognise him as a brother Englishman after his perpetration of so foul a wrong upon me and hundreds like me who have borne all the hardships and trials of this country. Is it any wonder that when men make a little money here they turn their backs upon the country like the Ericson company? It is not, and there is not one man in Cariboo who will remain another year in it if he only can get as much as will take him out of it. Let the Government turn to New Westminster when the miners are gone and see what revenue they can raise out of that artificially stimulated place. Now, sir, that Governor Seymour has ventured to face us whom he has so deeply injured, I trust that every honest miner will treat him with due and becoming respect, but let no man shrink from fear from expressing honestly, firmly and plainly his true sentiments and feelings on the grievances and oppressions under which the miners labor. Let every man's motto be, "just, equal, and moderate taxation," and "no class Legislation" for the people of this colony.

A Miner.

## Saw Mill for Sale.

THE UNDERSIGNED being desirous of erecting a Flouring Mill at Quesnelmouth, offer for sale the Machinery of a STEAM SAW MILL, for the purpose of getting more powerful engines. The Mill is complete, and capable of sawing 8000 feet in 12 hours; it has an extra 60 inch circular Saw. Favorable terms will be given to any persons desirous of purchasing. The Machinery is offered either with or without the buildings.

SUPPLEMENT TO

# THE CARIBOO SENTINEL.

Barkerville, Williams Creek, British Columbia, Saturday, August 5, 1865.

## THE CARIBOO SENTINEL

BARKERVILLE, SATURDAY, AUG. 5, '65

### CARIBOO POLICE COURT.

(Before W. G. Cox, Esq., J. P.)

Monday, 31st July.

FORCIBLE ENTRY.

John B. Reviere vs. James Loring.—Mr. Walker appeared for the plaintiff and briefly stated the case which afterwards came out in evidence.

John B. Reviere testified as follows: I have lived twelve months in Barkerville in the Go-at-them Saloon; yesterday Mr. Loring came to the door and demanded admittance; I refused to admit him; he then went away and subsequently came back with a false key, which he applied to the lock of the door; Mr. Hill, who occupies the house with me, arrived at the time with some goods; I opened the door and Mr. Loring forced himself in and a crowd followed him; I then went to Mr. Cox and got a summons.

Cross-examined by Mr. Loring—I slept in the house last night, in the back room; the house was mine, as I bought the lot from the Government; I did not pay for it with defendants whisky money; I sold the lot to Mr. Elsasser, and Mr. Hill derives his title from that gentleman.

Mr. Loring, addressing the Court—Your honor I have been swindled of all the money I had on this creek, and all I have for it are the shells of some houses.

Court—Mr. Loring, I sympathise with you, but you neglected to apply to Judge Begbie when he was here and I can do nothing for you now. Will you give up the house, as you had no right to take forcible possession?

Mr. Loring—Your honor, I will not give up the house.

Mr. Cox—Well, I must put you under bonds and send a constable to protect the plaintiff in possession of the house; I will not be trifled with; you had no right to do as you have done, you might have asserted your title to the premises when the Supreme Court was here.

Mr. Loring—I was instructed by my lawyer that I could not avail myself of the Supreme Court when it was here to have the case tried.

Mr. Cox—Well, I give you your choice, you must enter into substantial security or give up the house peaceably. If I have to bind you over, and you attempt to take possession afterwards, remember I will estreat the bonds.

Mr. Loring, thinking prudence the better part of valor, surrendered the house and he was discharged.

### GOLD COMMISSIONER'S COURT.

(Before W. G. Cox, Esq.)

Monday, 31st July, 1865.

The Point claim, D. Wattelet, foreman, vs. P. McEntee.—This was an action for $345, amount of assessment on a full interest in the above claim. The defendant resisted the payment on the ground that part of the assessment accrued during the season when the claims were laid over. Mr. Cox gave judgment for plaintiff for $110, amount of assessments since the 1st June, intimating at the same time that he had no power by law to give more. He said if he (Mr. Cox) were in the defendant's place he would pay the whole amount demanded.

Red Rock Flume co'y, W. J. Miller, foreman, vs. Grier co'y, by D. B. Lewis, foreman. This was a suit for damages to the flume by the defendants running large rocks and boulders into it. Mr. Cox gave a decree for $25.

☞ A report on the gold fields of Canada has been before the Canadian Parliament. The Gold Mining Inspector, Major de Belleville, states the whole quantity of gold produced during the past season in the Chaudiere Gold Mining Division to be $116,000, and this, considering the small number of hands employed, must be regarded as a very handsome return, the average throughout the season being no less than four dollars per day per man.

☞ The famous Winnebago chief, Decora, died recently in Wisconsin, aged 133 years. He fought on the side of the United States in the Black Hawk war, and was rewarded by General Jackson with a small flag, which now waves over his grave.

VICTORIA MECHANICS' INSTITUTE,
24th July, 1865.

TO THE EDITOR OF THE "CARIBOO SENTINEL."

SIR,—Will you allow me, through the medium of your valuable paper, to remind the miners of Cariboo that the committee of the Mechanics' Institute will be glad to receive auriferous and other geological specimens to be placed in the Museum. We hope to see our glass case well filled before the winter, and have already made a good commencement.

Very truly yours,
E. GRAHAM ALSTON,
Hon. Sec'y.

N. B.—All specimens should be marked with the locality, &c., where found.

TO THE EDITOR OF THE "CARIBOO SENTINEL."

SIR,—Some time since attention was called through your columns to the necessity of having a police officer stationed in Barkerville to preserve the peace. From the numerous and disgraceful rows which took place last Sunday, I think it highly desirable that something should be done to stop their repetition. Surely the Government can afford the inhabitants protection, which the limited staff at present at the Magistrates disposal cannot give to us. Should not some representation be made to the Governor for an extra police force, and also for an augmentation of the miserably small pay of the constabulary which is far from being adequate in this part of the country. Yours, &c..

AN INHABITANT OF BARKERVILLE.

### EASTERN NEWS.

New York, July 14.—The 'Herald's' Richmond correspondent says the work of confiscating the property of leading rebels was inaugurated in Richmond on Monday last. Much consternation among the people was caused by the seizure of the famous Tredgar Iron Works by Government agents. A description of a large amount of other property liable to be confiscated has been taken, and the tenants thereof notified to pay no more rent to rebel proprietors. 'Herald's' correspondent, who has been through northern Alabama, says that region is almost one continuous field of cotton. The planters are giving attention to the business again this year almost as much as before free labor times. Negroes are now working for their former masters for wages. The new labor system appears to progress well.

### MEXICO.

New Orleans, July 14.—Mexican advices of July 8th have been received. Gens. Lopez and Oliver returned from pursuit of the remnants of Negrette's forces, which are generally disbanded, some being on the Texas side. Cortinas lately captured two steamers.

The 'Commerce' says, Cortinas has officially established his headquarters on the Texas side. American authorities had been constrained by a protest of the Imperial Government to order Cortinas to keep on his own side. The 'Monitor' says, the commander of the French fleet had an interview with Gen. Steel on the subject of steamboats captured, but could not give the result. News from the interior shows that the Empire is peaceful. Maximillian is striving to improve the country and encourage education. Guerrillas continue to swarm about Matamoras in great force.

### EUROPEAN

NEW YORK, JULY 12.—The Persia, from Liverpool July first, and Queenstown second, has arrived. An outer lake has been discovered in central Africa from whence the Nile issues. The total amount of coin in the bank of France is larger than for several years. The Bourse is unsettled. The failure of negotiations between Italy and the Pope is the leading topic in Italy The negtiations were absolutely broken off. The Austrian minster at Rome is charged with activity in producing the misunderstanding. There is a report that negotiations between Rome Mexico are still progressing The cholera in Alexandria is represented as rather less alarming. Final arrangements on the Great Eastern were being pushed forward at the Nore with the utmost energy. She will be ready for sea in a few days, but not expected to leave the Nore till 9th or 10th July. The shore end of the cable will be laid at Valencia July 10th. Absolutely none but those connected with the laying of the cable will be allowed to sail on the Great Eastern. Signals were daily sent through the entire cable. The insulation is pronounced almost perfect. A message of four words occupied a minute and a quarter, but double this speed is expected from the use of new instruments.

THE NEW ROADS.—We understand the contractors for the Alexandria-Quesnel and Cottonwood roads are prosecuting their work with commendable despatch. Mr. Munro has his contract completed to within a short distance of Mr. Edward' house.

THE QUARTZ LEDGE.—A few days since we visited the quartz ledge to which allusion was made in our last. It is situated on the mountain about two miles from Williams creek, east side. The ground has been taken up by a company of ten persons, who have recorded 2250 feet on the lead. About fifteen feet of the ledge has been stripped and it presents indications which are most encouraging. At a depth of eight feet there is a well defined vein in the quartz, running south-east by north-west, from fifteen to twenty inches wide, and we were informed by the workmen that according as they sink down the vein increases in width and fineness of grain. The company consider that the mine will be comparatively inexpensive to work, the only thing necessary at present being furnaces for extracting the ore. The quartz ledge is encased in slate rock, and it has been traced for a very considerable distance.

A MODERN NIMROD.—The 'Colonist' announces that although its principal has gone on a hunting tour he has not skedaddled. The distinguished man, having carefully placed his anatomy on the outside of a quadruped, departed for the wilderness on Thursday evening. He took as provender a plate of hasty pudding, two soda biscuits, and a barrel of sour beer. On his back he carried two fowling-pieces and across his saddle swung a small howitzer, while the traditional bowie knife with which he scalped Nova Scotia Indians when a child was carried between his teeth. He may be said to have been literally "armed to the teeth." We expect to hear of his exploits among the bears and wolves of Cowichan rivaling those of Don Quixote among the fair dames of Spain. Amor is such a dead shot that the game will serve him as the racoons used to serve a celebrated Virginia hunter who, when he pointed at one of them, would sing out, "Don't shoot, Colonel, I'll come down!" and down they came.—'Victoria Chronicle.'

ABRAHAM LINCOLN A TEETOTALLER FOR MORE THAN FIFTY YEARS.—It is due alike to the cause of temperance and to the sacred memory of that illustrious man, the late President of the United States, to let it be widely known that for more than fifty years he had been a rigid abstainer from all intoxicating liquors—neither using them himself, keeping them in his house, nor on any occasion providing them for his friends or visitors. On one occasion, Mr. Lincoln, seeing that strong drink was producing most pernicious and demoralising effects in the Federal armies, both among officers and privates, sent a telegram to Mr. E. C. Delavan, of Albany, to come up to Washington to confer with the War Department and himself in respect to some steps to be taken to put a stop to the frightful and growing evil. The result was that various measures were devised to prevent alcholic liquors being sold or supplied to the soldiers. Mr. Delevan prepared an excellent address to the army, setting forth the evils of drinking, and the benefits of abstinence; and copies of the document were sent through the department to the soldiers in all the regiments throughout the various encampments. The result of the combined agencies, with other similar efforts by the American Temperance Union, was the formation of temperance societies among the soldiers, and the arresting of the evil, to a very great extent of late. General Grant wisely and nobly gave his countenance and practical example in favor of temperance of the strictest kind.—'Alliance News.'

☞ There is an immense sensation among the pretty girls in Chicago. A lady's dressing case has been shipped from London to the Western Sanitary Fair. It is for the prettiest girl in Chicago. Its value is $1,000 in gold, but the generous donor proposes to have the "prettiest" voted for, ballots $1. The party receiving the most to have the dressing-case.

The farmers, late planters, of several counties of Virginia, have decided the question of remuneration for the labor of negroes. They have fixed the wages of able-bodied field hands at $5 per month, the recipients of this magnificent remuneration to pay for his own clothing and doctor's bills! The Freedman will be loath to admit that this is what he has been fighting for. The New York 'Tribune,' however, advises him to accept it, on the principle that half a loaf is better than none, and to keep his eye open for something better by and by.

In Georgia the newsboys are selling one newspaper for three eggs, on the barter system, there being no funds in the market.

THE PRISONER AND THE JUDGE.—The following little scene is authentic, and might, if necessary, be described with all due particulars of name and place. A prisoner at one of our criminal courts was convicted of an outrageous crime. The judge began to sentence him with the usual sermon, in manner and form following:—Judge—"Prisoner at the bar, you stand convicted of a most abominable crime, one equally brutal and cowardly; you——" Prisoner—"'Ow much?" Judge—"Eight." Whereupon without more ado the prisoner was removed, and the officer of the court recorded the sentence of eight years' penal servitude. The small tale which we have related shows, first, the judge had a decorous sense of what was demanded of him; then, that the prisoner had a sort of contempt for conventionalities, and felt an impulse to make the judge sensible of his being rather a humbug, and of the propriety of coming to the point at once; and, lastly, that the judge, on being reminded of his duties, instantly fell into the same view of them, and acted on it with admirable promptitude.—'Pall Mall Gazette.'

FIGHTS IN BARKERVILLE.—On Sunday last there were six encounters between inebriated persons in Barkerville, without a single constable making his appearance to preserve the peace of the town.

☞ The hills of McKean, Pa., are covered with a plant claimed to be a successful competitor of the Chinese tea. A quantity of it will be in the market the coming autumn.

Important to Miners!

The undersigned is prepared to
CLEAN BLACK SAND, BLOWINGS AND PANNINGS,
On Commission, or will purchase any quantity on the MOST LIBERAL TERMS, at the
Reading Room, Cameronton,
Subscriber is now well known on Williams Creek, and from the confidence reposed in him last Fall in the above business, he hopes to receive the patronage of the Mining community the ensuing season.
