ALL SORTS OF NEWS.

[FROM ALL SORTS OF SOURCES AND PLACES.]

A Belgian chemist has invented a machine for the manufacture of spurious champagne, and ninety-three houses have already subscribed for the use of the patent.

Mr. George Peabody, the celebrated American banker, has left London for the United States, where he now intends to reside permanently.

Great Britain imports more wheat from Russia than from the United States. During February last the importations from Russian ports amounted to £469,090, or $2,845,436.

At the co-operative Congress in England a few weeks ago it was stated that 677 societies existed in 1867, numbering 171,807 members, and doing a business of £6,001,153 at an average cost of a little more than 5 per cent.

W. H. Kelly, a Big river merchant, Mendocino, has a cow that has given birth to an elk calf. He obtained the cow from a hunter in that vicinity. Several persons have seen the funny stranger, and report it elkish in manner, but calfish in taste.

A special postage agent on the Central Pacific railway lately commenced a lucrative vegetable and fruit traffic between Sacramento and Promontory. The trade increased and he forwarded 12 bags. This rapid accumulation of mail matter excited suspicion, and upon investigation it was discovered that said bags were filled with cabbages, potatoes, onions and cherries.

The Charleston Courier sarcastically says that South Carolina is rapidly becoming civilized. The first divorce ever allowed by the courts of that State was a few weeks ago granted by Judge Orr. It must be gratifying, says the Courier, to our down-East friends to witness this giant stride in the race of civilization. It is reconstruction in its most practical sense.

The Bulletin thinks that had we a Chinaman for Mayor of this city there would not be special occasion for regret, in view of the present condition of our municipal affairs. We are inclined to think that if that paper had a Chinaman for editor it would be vastly improved, and there would be special occasion for rejoicing; a decent regard for the proprieties might then sometimes be observed in its columns.—[San Francisco Examiner.

The Republican party in Spain have had their cause greatly injured by the blasphemy and irreligion of their leaders. Dr. Sumer, for example, expressed his desire in parliament that there should be no religion at all in Spain. He denied the existence of God, the divinity of Christ, insulted the purity of the Virgin, and denounced as an absurdity the doctrine of the Trinity. He was stopped in his discourse, and the republican party left the house.

British Columbian exchanges, of the date 8th of May, arrived in Toronto on the 28th, just twenty days on their journey. They previously took about two months to make the voyage by way of the Isthmus. The change is attributable to the completion of the Pacific railway. By a singular coincidence, the Vancouver Colonist and the Red River Nor' Wester, both dated May 8, arrived in Toronto on the same day. When the roads are built in the Territory our Red River contemporary will gain some days on his brethren of the Pacific coast.

George Francis Train having announced his intention to visit Stockton, California, the Stockton Gazette comments thereon as follows: "Stockton has escaped the small-pox scourge, the plague and destruction by earthquake, but is soon to be afflicted with what is worse than all—George Francis Train. This living, breathing specimen of a successful humbug has announced his intention of paying this city a visit at an early day. He comes, ostensibly to recruit an army for British Columbia, but really to make a raid on the pockets of the people."

One of the most remarkable recent inventions is the telephone. It is a German invention, and was recently exhibited by Dr. Van der Weyde at the Polytechnic Association of the American Institute. It is an instrument which transmits directly the pitch of a sound by means of a telegraphic wire, so that when the operator at one end of the wire sings, or plays on an instrument, Yankee Doodle or God save the Queen, it will be heard and distinguished at the other end. So far this curious invention has not been put to any practical use, but who can say that it does not contain the germ of a new method of working the telegraph?

Emigrants are sometimes brutally treated while on board ships crossing the Atlantic. James Glynn, the carpenter of the ship James Foster, jr., was tried in New York on the 11th ult. for the murder of John Stokes, an emigrant passenger. From the evidence it appeared that the passengers were beaten with hammers and belaying pins, and were kicked and cuffed, and nearly starved. Many died during the voyage, many after reaching New York, and nearly all the survivors were broken down and physically ruined. One witness saw Glynn pull Stokes by the hair of his head out of the water closet of the vessel, tear him along the deck, strike him on the head with a belaying pin until the blood ran down his face and over his clothes, and hurl him down backwards on the anchor-chain. The first mate stood above him in the rigging, and looked down on the scene. He urged Glynn on, and said what was equivalent to "That's right; beat the dog again!" Glynn then pulled him up from the chains and forced him to go to work in the condition he was in. At another time this same Glynn struck this same man on the back of the head with a heavy carpenter's hammer, knocking him to the deck; the blood gushed from his nose and ears. The Captain looked on, and said, "Rip the dog open!" From suffering and ill-treatment fever broke out, and this gallant captain and his brother, the first mate died of the malady. When witness was asked what did the boatswain and carpenter do, meaning what work, he replied, "Why, they went around the deck, knocking down every one they met." In reply to a question as to what time of the day, how long after dinner it was that Glynn struck Stokes with the hammer, he said, "Shure, and how can I tell, whin we didn't have dinner for three days." When asked what was the cause of Stokes being knocked down, he said it was a blow from the hammer.—[New York Sun.

All advertisements (not inserted for any definite period) will be continued until ordered out, and charged for accordingly.

TO CORRESPONDENTS.

All communications must be accompanied by the real name and address of the writer; not necessarily with a view of publishing the same, but as security or its good faith.

PUBLIC SCHOOLS.

Our acting governor would appear to be an active governor. An ordinance relating to schools was passed by the Legislative Council last winter, and became law on the 13th March. It repealed the common school act of Vancouver Island, and was intended to establish a uniform system of education throughout the colony. But it was especially intended to give facilities for establishing schools in those parts of the colony where there is a small number of children, and where public schools are most necessary because of the total absence of any other kind of schools. Nothing, however, seems to have been done towards putting the ordinance into operation until a week ago, when the acting governor announced in the Government Gazette that several places in which there were schools, and in others where they were asked for, were to become school districts under the new ordinance. Among the places named are Clinton, Lytton, Langley, Burrard Inlet and Cedar Hill. In none of these places is there a greater number of children than is to be found in Barkerville and Richfield, and none of those places contribute half as much to the public revenue as we do here. It may seem strange that Barkerville and Richfield have been overlooked by the acting governor. It is not, however, that officer's fault that such oversight appears from the list of places declared to be school districts. It is the fault of the people of Barkerville and Richfield themselves. Had they petitioned for the establishment of a school here they might have had their prayer granted. The new ordinance does not propose to create a school district except after the people have petitioned for the same. Now, there is just as much reason for establishing a school in this district as there is any of the places above-named, and if the parents of children here wish to take advantage of the new law they ought to forward a petition to the acting governor, who will no doubt be glad of the opportunity to distinguish his administration by doing a good action for Cariboo. The provisions of the new ordinance are liberal, but not so much so as when the bill was first introduced into the Council. The senior member for Victoria succeeded in mangling the provisions of the bill so that greater difficulty in its operation would tend to prevent the establishment of schools in the districts where none existed, and probably with a view to concentrate as much as possible all the educational facilities within the limits of Victoria. The law provides that the school teacher's salary from government shall not exceed $500, and fixes the tuition fee at not more than $2 per month. It also provides for the election of a local board, who have such powers confided to them as to enable them to dispense entirely with the tuition fee by levying a tax upon all resident householders and male residents of the district, said tax not to exceed $2 per head per annum. By this provision a free school can be established if the local board so wish, and if the amount so levied shall be sufficient, together with the $500 for the teacher, to pay all expenses. Upon the receipt of an application from the inhabitants of any district, the governor in council may appropriate out of the public school fund a sum to aid in defraying the expense of erecting a school house, or of renting a building for the purpose of a school. This, however, is conditional upon the local board satisfying the governor that the amount to be contributed by the local board for the payment of teacher and all other expenses has been collected or reasonably secured. In the petition asking for the establishment of a school district it must be set forth that the number of children between the ages of 5 and 18 years who will be able to attend the proposed school, and also the number of children below the age of 5 years, together with the number and names of the residents in the district above the age of 21 years, and the amount to be contributed by them towards the support of a school-teacher and school-house. The governor may refuse to create any school district where the number of children likely to attend school does not exceed twelve in number, or where the amount likely to be collected shall not exceed $300 per annum for the school teacher. Such are the main provisions of the law as respects the establishment of a school in this or any district of the colony. It will be seen that there will be no difficulty in complying with them. There are considerably more than twelve children here of the ages mentioned, and we think that it would be an easy matter to comply with the pecuniary condition, especially as the local board will have power to levy a tax upon every male resident above the age of 21 years. There are about 25 or 30 children in Barkerville, Richfield and vicinity, and a considerable number are at school in other parts of the colony whose parents reside here. Parents complain, and justly too, of the great expense they are put to in sending their children to school in other parts of the colony, and would gladly bring them here if a school were established. Others again would bring their families here if there were a school established. Now, why should not these persons immediately set so work and petition the governor for the establishment of a school? They are justly entitled to the same privileges as parents in those places now declared to be school districts under the new law. Ten thousand dollars were voted by the Council for school purposes for the year. Perhaps the schools already in existence will require all of this, but if nothing could in consequence be done to establish a school from that sum this year, the petition would at least be taken into consideration upon the vote for next year's school item.

TELEGRAPHIC NEWS.

Surveyor-General Babcock, of Kansas, says that more than 30 persons had been killed by Indians at the time of the late outbreak from different surveying parties in the field.

Another civil war has been commenced in Japan.

The laying of the French-American telegraphic cable by the Great Eastern is going on well.

Heavy rains have done great damage in Canada and the United States. A tornado visited Philadelphia. Twenty-five persons are reported to have been drowned in Kansas.

It is stated that it will cost the English government £612,000,000 to purchase the telegraph lines as contemplated.

Hon. John Young has left Montreal for England to organize a Canadian and European telegraph company.

A New York despatch says that a secret society has been formed to carry the United States into Imperialism. A Consul is to be at the head of government for life, and as soon as public sentiment is ripe for the change the Consul is to be made an Emperor.

☞ FELL'S COFFEE has now stood the test of the last eight years, has superseded entirely thei mported Chartres Coffee, and is now kept and sold by all respectable dealers

THE CARIBOO SENTINEL

WEDNESDAY, JULY 14, 1869.

MINING INTELLIGENCE.

WILLIAM CREEK.

The San Juan co. cleaned up 27 oz. last week—three men working. The Bradley-Nicholson co. made wages, and the Downie co., for one day's shovelling, took out 7 oz. Cleaning up continues on the Flume co.'s ground, and with about the same result as during the week before last—150 oz. Good pay continues in the Wilson co.'s ground, and 49 oz. for four days' cleaning up were obtained last week. Water having become more plentiful, work has been resumed on the Six-Toed-Pete co.'s ground. For three days' run the Cornish co. got 31 oz. The Brouse and Tyack cos. continue at work, and the California co. have commenced ground-sluicing on the right of the flume. The Chinese cos. are said to be doing well. The San Francisco co. made about $10 a day to the hand, for the week. The Black Jack co. are running an incline above the canyon, and getting a little coarse gold.

Below the canyon—the Diller co. are running over old ground, and have washed up 10½ oz. from four sets of timbers. The Foster-Campbell co. washed up 87 oz. for the week, less three shifts. The Barker co. washed up 61½ oz., but did not work all the week. The Canadian co. are rocking in the diggings. For four days' work the Baldhead co. washed up 18 oz. They have staked off some hill ground, having found the bed-rock pitching in that direction. The Caledonia co. washed up 50 oz. Two or three other companies are working, but taking out very little gold.

MINK GULCH.

The Perseverance co. say the appearance of the diggings improves and they are getting a little gold.

STOUT GULCH.

Here the yield has been light, as compared with that of the few preceding weeks. The Taffvale co. washed up 100 oz.; the Coombs co., 51 oz.; and the Floyd co. 49 oz. The other companies are taking out small quantities of gold.

CONKLIN GULCH.

The strike in the Lone Star co.'s ground has not been followed up, in consequence of a cave at the face. The prospect was obtained on slide rock, and the channel had not been reached.

The Renfrew, Indian Queen, Eclipse and McDowell cos. are working, but are only getting small quantities of gold. The Felix co. kept in pay ground last week and washed up 67 oz., while the White Pine co. scarcely made expenses.

LOWHEE CREEK.

The Victoria and Black Bull cos. are running their tunnels by contract, and the Calaveras co. are driving away for a drain. Outside of these companies very little work was done last week, and with corresponding results.

MOSQUITO CREEK.

The Minnehaha co. washed up 120 oz. for the week. A small dividend was declared by the Hocking co. from the week's work; and the Tabb co. washed up 20 oz. A dividend of 3½ oz. to the interest was declared by the Holman co. The Discovery co. made wages, and the Jeffree co. good wages for the week. The Willow co. also made wages.

RED GULCH.

The Butcher co. are still working, but only making small wages. A company are ground-sluicing at the head of the creek. Results private. Another company are sinking a shaft to prospect a piece of ground near the old United co.'s ground. The Tom and Jerry co. only got a little gold last week.

WHIPSAW GULCH.

On this gulch the companies have struck nothing new, and continue making $3 to $6 a day to the hand.

COULTER CREEK.

The company who lately started work on this creek report that they have ground-sluiced a cut 80 or 90 feet long, and found some fine gold, but not having reached the bed-rock, they cannot yet say whether it will pay.

Very little work is being done on Sugar, Mustang and other neighboring creeks.

GROUSE CREEK.

A more plentiful supply of water from the late rains has given this creek a livelier aspect than it has worn of late. The Idaho co. have got to bed-rock on the hillside and are getting small prospects. The Rocky Point co., after piping a little, have commenced ground-sluicing. As the diggings become opened in this claim the indications of a channel running in the hill increase. Salt Spring co. are still prospecting, as are also the Ontario co. Ground-sluicing has been resumed by the Cascade co. The Ne'er-do-well and Union cos. are also ground-sluicing. The Waverly tunnel has been run to within 90 feet of the shaft.

HARVEY CREEK.

The Minnehaha and Point cos. are getting a little gold, but have not yet got on to the channel, and it will require two or three weeks to ascertain whether it will equal expectations. We gave a full report of what was doing on this creek last week, and there is no change to report.

ANTLER CREEK.

Nothing new on this creek. Companies all ground-sluicing as before, and the Hocking and Ridley cos. the only ones who are taking out gold.

TERPSICHOREAN DECADENCE.—One of the popular institutions of Barkerville is about to disappear. Sterling's terpsichorean academy will shortly lose its principal attraction by the departure of its lady professors, who contemplate returning to their wonted homes, and these are not in British Columbia. Cariboo toes are not so light and fantastic as they used to be, neither is there quite so many of them. The filthy lucre becomes more precious with its scarcity, and the dance now most appreciated is that which is induced by the monotonous music of the water as it runs over a glittering dump-box. The temples of Apollo and Terpsichore are losing their devotees, who now evince an increasing disposition to frequent those of Mammon. In the meantime, subscriptions for the proposed building of a church are small and few. "Whither are we drifting?"

A SWEET CREATURE—A young black bear which has been a great pet in official quarters at Richfield for several weeks past, was missed the other day. It was supposed that the animal could not bear the torpitude of official life and had betaken himself to the more exciting vicissitudes of his native forest. Regret mingled with disdain for the animal's democratic instincts was freely expressed at his supposed departure, when, lo! the Celestial menial discovered the vulgar brute sleeping soundly in a barrel after having devoured nearly the whole of the sugar which it had contained. As economy is the order of the day in official quarters, it was found difficult to bear this extravagance with patience, and the result is that the luxuriant monster has found a new master who does not buy sugar by the barrel.

JUST RECEIVED.—C. McCallum wishes to announce that he has just received a large assortment of ready-made Clothing, which will be sold for cash at CHEAPER RATES than have ever been known in Barkerville. Thankful for past favors, and respectfully soliciting a continuance of custom, Mr. McC. would intimate that an inspection of these goods and enquiry as to the price will convince all as to their unprecedented cheapness. All parties wishing to have their clothing made by A. Gilmore, Victoria, may have their measure taken by C. McCallum, so as to ensure a good fit. *

WELL DONE.—Messrs. Oppenheimer and Briggs yesterday concluded their collections on behalf of the Cariboo Hospital, and the total amount obtained was $521. If the outlying creeks would contribute in proportion, that indispensable institution would be placed in such a position as would ensure its continuance under the present well-regulated conditions. Funds have been very scarce of late, and it cannot be expected that a qualified physician will superintend and carry it on merely for the respect which attaches to philanthropy and benevolence.

QUARTZ.—Mr. Cameron, the expressman, who returned on Monday, brought in some specimens of quartz. He declines stating where he obtained them, and furthermore declines saying what was the result of the assay made at the Government Office. They appeared, however, to be very rich in gold, and some parties offered to co-operate in forming a company to work the lead. Cameron evidently thinks he has found a "good thing," or there would be no reason for keeping it a secret.

EXPRESS—Barnard's Express arrived on Saturday morning and left on Monday. Messrs. Munroe, Lenning and McCann arrived, and Mr Graham (of H. B. Co.) and Rev. Mr Derrick departed. Mr Munroe has been on a visit to Canada. Mr Derrick has recovered from the effects of the late accident and goes to Quesnelmouth. Mr Lenning has been prospecting on Fraser river, near the mouth of Chilcoaten river. He intends to return again and commence bringing in a ditch for the purpose of mining a bench on Fraser river.

GOOD.—A copious rain fell at Soda creek and the 150-mile post, on Thursday and Friday last. It came just in time to assist the grain crop, which without rain could not have ripened.

THE APPROACHING BALL.—The Amateur Theatricals have been the subject of some sarcastic comments with respect to the disposal of the proceeds of their entertainments. A statement as to the financial condition of the Dramatic Association will soon be submitted to the public, who will be satisfied therefrom that every dollar obtained by their performances has been legitimately and judiciously expended. With the exception of the lumber bill, everything has been liquidated. A considerable amount of money had to be paid on account of labor and material, other than lumber, required for the building, which, from its size, was something larger than is usual in Barkerville. No inconsiderable expense has also and necessarily been incurred in getting up and purchasing dresses and scenery for use on the stage. We trust that the ball, while it will amply repay those who attend, will also receive the consideration which is due to the efforts of those who undertake and carry on a most desirable institution, and take the shape of a large attendance on Tuesday next. We refer our readers to a communication in this issue on the subject.

THE WEATHER.—Rain fell fast and heavy on Friday last, and we have had frequent showers since that time. Everybody here of course knows this, and it would seem unnecessary to mention the fact, but every-everybody interested in the welfare of Cariboo may not know it, and hence the necessity for alluding to the fall of rain. While we write rain is falling fast, and judging from appearances we may have rain for a considerable time yet. A good many men had been thrown out of work in consequence of the drought, who will now be enabled to resume their occupation. Piping and ground-sluicing, which had been almost altogether discontinued, has been resumed in many claims, and the prospects for a good yield of gold, through the increase of water, are now very encouraging.

FIRE BRIGADE, ATTENTION!—Drill will take place this evening, and you are all requested to attend to test the new hose which arrived yesterday. Immediately on receipt of the hose, Capt. Oppenheimer ordered it to be made ready for use, and yesterday afternoon a squad of the Brigade were actively engaged in oiling and greasing it, to counteract the rotting which its use in a dry condition would cause.

DONATIONS.—Mr. R. J. Claridge has given $20 in aid of the General Fund for the maintenance of the Anglican Church Mission in Cariboo. Robert H. Brown has also given $20 for the same purpose; and a sum of $21 50 has been collected by children, for a church harmonium. Messrs. Fellows, Roscoe & Co. have given $10, and Wm. Fraser $10, towards building a church.

THE BEST COFFEE.—In order to obtain a first-class coffee, it is necessary to secure the very best berries, and to roast them according to the most approved method. This is done by WILSON & RICKMAN, Fort Street Victoria, who are prepared to furnish, for cash, Coffee that never fails to elicit the approbation of those who use it. *

BED-ROCK DRAIN.—In the upper part of the drain work goes on and it is expected to be cleared some time this week. The late Raby co.'s part of the drain will be cleared in two or three weeks. The company paid over $500 to the Gold Commissioner, and the work of clearing the drain was given to Jas. Evans.

SLOW EXPRESS.—Barnard's slow express is not very slow. It left Yale on the 1st inst. and arrived here yesterday, with a full load of freight. Messrs. DeNouvion & Kurtz received a lot of fresh butter from the farms, and W. Davison received some goods. The hose for the Fire Brigade also came by this express.

NEW BRIDGE—We understand that the enterprising inhabitants of Quesnelmouth have in contemplation the formation of a joint stock company for the purpose of building a bridge across Quesnelle river, so as to give every facility for the passage of teams and trains to their well-situated town.

A BOARDING HOUSE is about to be established on Lightning creek, near the new Discovery claim. It will be superintended by Mrs. Allan.

MORE BUILDING. — Another building is going up in Barkerville. Barnard's express office building is approaching completion.

FROM WHITE PINE.—Messrs. J. Adair and T. Pattullo are on the way to Cariboo, having left White Pine and its rich leads.

SUDDEN DEATH—Julius Mitchell, formerly a storekeeper in Yale, died suddenly at Seattle, on the 24th ult.

BARNES & Brinck's pack train, from Yale, arrived on Sunday.

MAIL.—Only a small Eastern mail came by the last express.

FROM THE OTHER SIDE.—John Brenniman and John Carey arrived at Quesnelmouth a few days ago, with a boat load of furs from Fort Dunvegan, in Rupert's Land. A commercial point for the sale of their furs is more easily reached by crossing over to this side, owing to the greater length of navigable water than by going to Fort Vermillion, on the other side.

THE BALL IN AID OF THE THEATRE BUILDING FUND.

EDITOR SENTINEL:—I noticed with pleasure the appropriate remarks in your issue of the 7th inst., referring to the approaching ball in aid of the Amateur Dramatic Association building fund, to be given by the corps on Friday next.

The Amateurs as a body—and, in fact, individually as amateurs—are a great boon to our small community. As a proof of this, during the winter previous to the disastrous fire which destroyed the little theatre, it was noticeable and often remarked that our population was larger. I, for one, know several parties who, if no amusement had been offered, would have spent their winter out of Cariboo. I am of your opinion decidedly, that it is a great advantage to all parties resident on William creek and vicinity. Men in staying here on account of such pastime would have at the same time a great advantage in being on the spot should any new mining discovery occur.

Although the present time is badly suited for a ball, not only on account of our late holidays, but on account of the numerous subscription lists our residents have of late had to fill up, I am glad to see that not a few are taking a lively interest in the arrangements, short as the time is, and that principally by members of the "Fire Brigade," under whose friendly patronage the ball is gotten up.

Unanimity like this will do more in such a community as ours for the furtherance of any good object than any effort I know of. Let us therefore join hand in hand and endeavor to do something for our self-denying, hard-working Amateurs, who have so long tried, and succeeded too, in doing us good by their public performances.

But for the public necessity in upholding a public institution like the "Corps," I would not have occupied so much of your space, so pardon me. CITIZEN.

William Creek, July 13, 1869.

CALIFORNIA.

The French wine manufacturers are becoming jealous of the increasing popularity of California wines, and the Moniteur Vinicole, the great organ of the wine interests of France, has been misrepresenting the quality of California wines and also the climate of California as one unsuitable to viniculture. A Franco-Californian publishes a letter in the Sacramento Union disproving the statements of the French journal.

The election for judges of the Supreme Court and other judges is approaching, and the Taxpayers' Union of San Francisco have proposed a plan to secure the election of honest men by making the nominations without regard to political parties so that the primary elections will not be controlled by the "frauds of tricksters and unscrupulous office seekers."

The body of John Wilson, mate of the schooner Clelia, was recently found in San Francisco bay. It is supposed that he had been murdered.

A special agent has been sent from Washington to superintend the introduction of the letter-carrier system.

A miners' union exists at Grass Valley, and there is trouble between the miners and the owners of the mines. Wages the cause.

For the first time since wheat has become a staple crop in California, we hear, says the Union, complaints of rust.

Sleeping and dining railway cars are being manufactured in Sacramento. The dining car has a kitchen with a range, cellar for provisions and ice-box, and on each side of the kitchen are dining rooms, with six tables, and seating for 48 persons.

California flour is now shipped to Salt Lake per railway.

Some early choice peaches sold in San Francisco for $2 per pound.

Mr Motley, Minister to London, intends to use none but American wines in all his entertainments at the Court of St. James. California could easily furnish a large supply of wine which would very nearly suit the English taste.

Small-pox has nearly disappeared from San Francisco. The latest report shows only one death for the week and only one case.

H. W. Carpentier offers to give his real estate in Oakland, valued at $60,000, for the founding of some charitable institution, if other citizens or all the people of Oakland contribute to make up the total of five such subscriptions—$300,000.

MISCELLANEOUS.

Horace Greeley says there are only two honest Senators in the New York Legislature.

EQUALLY.—Taxation is said to bear equally on all classes, from the fact that it hardly presses on the rich, and presses hardly on the poor.

LIBEL SUITS.—In 756 libel suits now pending against American editors, the aggregate damages to character are estimated at $47,500,000.

BREAD PIPES.—Smoking pipes made of bread are the latest invention in that line. They are said to harden and color beautifully, and closely resemble colored meerschaum.

NEW RULES.—A Topeka (Kansas) court has announced two new rules of practice; that the lawyer shall stand up when questioning a witness, and that if too drunk to stand he cannot practice.

TOO COMMON.—A down East girl being bantered one day by some of her female friends, in regard to her lover, who had the misfortune to have but one leg, replied:—"Pooh, I wouldn't have a man with two legs—they're too common."

LEGALLY DRUNK.—The Wilkenson (Minnesota) Superior Court has decided when a man is "legally drunk." Said the Judge—"It is not necessary that a man should be wallowing in a ditch, or bumping his head against your doors, that you may know him to be drunk, but whenever he begins to tell the same thing over twice, then he's drunk!"

IMPROVEMENTS IN MUMMIFICATION.—An odd discovery has just been made by a man of Grenoble, by which it is calculated that cemeteries and graveyards will become superfluous. At the decease of an individual the body is plunged into a liquid invented by the man of Grenoble, and in about five years the individual is turned into stone. The secret of the petrifaction is known only to the discoverer. He says that in a thousand years' time, if persons will only preserve their relatives and friends, they will be able to build houses with them, and thus live in residences surrounded by their ancestors! Altogether an absurdity, says the Builder.

A FISH STORY.—Six Scotchmen, fishing near the coast, recently caught 50,000 herring in two hours. The sea literally boiled with fish and the men simply scooped them into their boats. They were paid only $225 for the whole 50,000 by London buyers.

The Alaska Times says: Alaska can beat this hollow. In our waters salmon and trout are so numerous as to impede small boats and canoes in their passage; they bite at the oars, as they dip in the water. As for herrings, six Alaska fishermen could catch 500,000 of them in a few hours, but like the Elephant in the China-ware shop they would not know what to do with them; you can buy 5,000,000 herring in Alaska for $225; what a contrast, Scotland and Alaska.

A NOVEL SCENE.—A novel and yet rather lively scene for most of the parties concerned recently took place on a Canada railroad. Some one had freighted the bees to a town some distance off; and, during the journey, the wire gauze, placed over the entrance of the hive, to allow the bees air, and at the same time to prevent their escaping, became somewhat displaced. The bees made the discovery first, and resolved to "swarm," and make the rest of the journey in their own way. And swarm they did and about the ears of officials, who for some time made ineffectual efforts to induce the saucy little creatures to go back into the hive and be good. A dozen or more passengers, who ran to the spot to learn the excitement, got their eyes bunged up as the price for their curiosity. But the train started on; and the refractory little creatures, who had refused to return to the hive, were observed on the wing a few rods behind the train, doing their best to keep up, generally coming in, as the train stopped at the different stations, in time to sting the brakemen.

STEAMERS, EXPRESS, FORWARDING, &c.

STEAMER ENTERPRISE.

THIS steamer is now making regular trips between Soda Creek and Quesnelmouth, connecting with Barnard's Express.

☞ The steamer is not responsible for leakage of Oils, or other liquids shipped in tins.

Danielson's Bridge, Quesnel River.

MR. CHARLES DANIELSON desires to inform Traders, Packers, Travellers and others that the Road from Dog Prairie to the 16-Mile Post beyond Quesnelmouth is now open and in good condition for Pack Trains and Stock, and that there is abundance of good feed throughout. There is a house of entertainment at the bridge. jc12

Barnard's Express.

ON and after July 3d, and until further notice, the Regular Weekly Express will arrive at Barkerville on SATURDAY MORNING, and return at 6 a.m. the following Monday. The Express will close every Sunday night at 9 o'clock.

For rates of Freight and passage, apply to

S. ORMANDY,
June 30. Agent, Barkerville.

EXPRESS NOTICE.

ON THE FIRST DAY OF JUNE AND ON THE FIRST and 15th day of each month thereafter

Barnard's Express

Will despatch

A FAST FREIGHT TEAM FROM YALE,

Making the trip to Barkerville in about 14 days.

Until further notice,

RATES OF FREIGHT

By these teams, on all parcels of 50 lbs. and upwards will be

25 Cents per lb.,

exclusive of Road Tolls.

Parties shipping by these teams must order goods to be marked "Per Barnard's Express. SLOW"—otherwise they will be sent by regular Express and charged accordingly.

Shippers may depend on the regularity of these teams, for whether with full freight or not they will come through.

May 14, 1869. F. J. BARNARD.

Important to Traders!!

ALL FREIGHT CONSIGNED TO J. C. BEEDY, Yale, B. C., will be forwarded to any part of the Colony, on the most reasonable terms, free of commission. AGENTS:

Millard & Beedy, Victoria. } Denouvion & Kurtz, Barkerville.
