LOCAL TAXATION.

Although no candidates for legislative honors have as yet formally announced their intentions in connection with this district it seems to be pretty well understood that at least two well-known politicians will offer themselves for election, and their respective merits are sharply discussed when politics are the topic. The merits of the probable candidates and not their principles engrosses too much of the discussion, and local and general matters are too lightly dwelt on. It should be borne in mind that apart from the questions of the day relating to the entire colony which ought to influence our choice at the election, there are a few things of great importance to the district which ought to be pressed upon the notice of the candidates with a view to having our local grievances brought before the Legislative Council. The postage and mining fees, etc. While duly appreciating the extraordinary importance of the next election, important as regards the constitutional changes it contemplates, do not forget our local grievances. Talk more of the measures which should govern the vote and less of the men. Let the record fees, about which there is so much complaint, be made a question at the election, and let the candidates be pledged to their reduction. And although the Governor does not think it advisable to meddle with the postage rates pending the settlement of the subject of Confederation it would be well to have the differential rates brought before the Council for amendment, if only for the purpose of showing our wants. But what of the record fees? In what respect are they oppressive, and how should they be altered? The charge of $2 50 for recording or laying over a claim seems reasonable enough, yet miners complain that what with license, and recording and laying over charges they frequently pay as much as $50 per head per year! This is too much, or even half of that amount, and something should be done to diminish the charges. It may be said that the privilege of holding more than one claim is an advantage which should be paid for in the same proportion as if only one claim were permitted to be held, and it is because miners hold a number of claims that the charges accumulate in the course of a year. But as it is clearly to the advantage of the colony that the mines should be worked as much as possible it follows that any impediment against working them should be made as light as possible. And the charges for recording and laying over are an impediment, and in many instances they are very oppressive. Take, for instance, the case of a company who have spent $15,000 by labor and cash to prospect a thousand feet of ground. They do not find the lead in that ground, they think it is in the ground adjoining, in the hill if they are working in the creek, or in the creek if they are working in the hill. In order to secure the fruits of their labors they are compelled to take up another thousand feet. Then comes the expense of recording ten claims at $2 50 each and laying over at the same rate, in all $50, at a time when the company have not fifty cents on hand, and they must pay these charges, for there is no "jawbone" taken for fees at the record office. Thus, a company of enterprising miners are compelled to pay $50 to be allowed to work for the good of the country, for upon the result of their labors the opening of a new lead may depend. It is in these cases where the shoe pinches. When the $50 are paid for the extra ground perhaps on the following day the original record expires and a re-record is required. It will be seen by this illustration, which is taken from actual experience, that the cost of re-recording and laying over during the preliminary stages of development, when the ground does not yield a cent, falls most oppressively on the company. To abolish the law requiring a re-record and to reduce the charge for laying over to $1 or less should be asked for by our next representative. The present rates were fixed entirely with a view to creating a source of revenue, and why the miner should be compelled to pay so frequently for the privilege of working ground of no use whatever except for mining it is difficult to see. It is not difficult to see, however, that the miner is exceptionally taxed, and injudiciously so because a considerable amount of money is yearly drawn from the working capital of the district and the development of the mines thereby retarded. We may not have pointed out the proper method of dealing with this matter, but we invite attention to it for the purpose of impressing the electors with the advisability of keeping our local wants in view at the next election.

NEW ADVERTISEMENTS.

To the Electors of Lytton-Yale District.

GENTLEMEN,—

In reply to a request of many of the Electors that I would accept the nomination as candidate for the representation of Lytton and Yale District in the Legislative Council of British Columbia, and rest on their support at the coming election, I accept and declare myself on the situation.

As my political opinions are known throughout this colony, particularly as regards the question of Confederation, it will suffice for me to say that for years I have been and am to-day one of its warmest and faithful supporters, provided that the fundamental and express terms of our Union contract were equitable with other Provinces within the Dominion. The conditions which form the basis of the political, admits of two important issues to be submitted to the wisdom and intelligence of the country, to be decided by the ballot box—Customs Tariff and Responsible Government.

Clause 7 of the Terms:—"It is agreed that the existing tariff and excise duties shall continue in force in British Columbia until the railway from the Pacific connects with that of Canada, unless the Legislature of British Columbia should decide sooner to accept the Tariff and excise laws of Canada.

I am in favor of the Dominion Tariff on these grounds:—That it is equitable; that it will save at least $130,000 per annum to the Colony; whereas with the continuation of the existing tariff that amount and more would yearly slip into the Dominion treasury in support of a false political plea, called protection, whereas there is nothing to protect, and that in order to save not only the sum of $130,000 to the colony, but also that it will serve as a preventive to any unnecessary political agitation hereafter.

Clause 14 of Terms:—"The conditions of the Executive authority and of the Legislature of British Columbia shall, subject to the provisions of the British North American Act, 1867, continue as existing at the time of union until altered by the authority of the said Act, it being at the same time understood that the Government of the Dominion will readily consent to the introduction of Responsible Government when desired by the inhabitants of British Columbia. It being also understood that it is the intention of the Governor to amend the existing constitution in order to have the majority of the members of the Legislative Council elective."

I am not in favor of any such amendment as referred to in the latter part of Clause 14; but I will support as one of the conditions of union the introduction of a free form of government on a responsible basis, giving to the people, with union, the management of their own local affairs.

Our popular local parliament to constitute one chamber, composed of twenty members; six of whom having the confidence of the people, will represent the Government, their tenure of office depending on their having a majority in the House. Any form of government for British Columbia, whose institutions is not free and responsible, I will oppose.

In respect to inter-oceanic communication by rail, this great enterprise has always found in me one of its earliest and most faithful advocates; and as the Dominion Government, as a condition, undertake to secure the commencement simultaneously, within two years from the date of union, of the construction of a railway from the Pacific towards the Rocky Mountains, and the completion of such road within ten years from date of union, I believe it to be the duty of the country to observe that this stipulation in the union contract is faithfully fulfilled.

I will make no remark at present as regards the other terms of our political contract, believing that they will be unobjectionable to the country.

The abolition of Road Tolls on flour of colonial manufacture, if not the entire removal of the gate at Clinton, I will most willingly support, other local issues to be dealt with through local legislation.

In conclusion, I pledge myself to support the political principles above mentioned, study the interests and requirements of my constituents, and endeavor to promote the general welfare and prosperity of British Columbia; and in order to more fully explain those principles, I hope to meet you at an early day.

I am, Gentlemen,
Yours faithfully,
ROBT. SMITH.

THE CARIBOO SENTINEL

SATURDAY, OCT. 15. 1870.

LATEST TELEGRAMS.

London, Sept. 30—The French were reinforced on Monday by Trochu, and advanced on the German position at Versailles on Tuesday. The battle began at Viroflay, the Germans contesting the position with desperate energy, until they were assailed with fresh troops from beneath the guns of Mont Valerien and St. Cloud, where a number of Baden troops mutinied. One hundred of them were shot by order of the German commander, but the rest still held back, throwing down their arms and dispersing. The Crown Prince was finally compelled to order a retreat upon Langival, abandoning Versailles to the victorious French. The Germans lost 5000 prisoners, amongst whom were many officers of the staff of the Crown Prince.

The reported movement of the Prussians on Lyons is untrue.

The Duke of Nassau is reported to have been killed by an ambuscade party of French while riding with the King of Prussia near Rheims. The fifth carriage, containing the King, was hit by several bullets, but no one was hurt.

The Pope declines leaving Rome.

London, Oct. 4—A Paris correspondent says that judging from present appearances the Prussians will walk into Paris after the first serious attack. No works constructed of stone can stand against Krupp cannon within range at which besiegers, owing to recent advances, can place them. It is understood that the garrison of Paris consists of 350,000 National Guards, 300,000 Regulars and 200,000 Gardes Mobile, while the German force now before Paris numbers 350,000. It is confidentially believed in Paris that the city will soon be able to assume the offensive.

London, Oct. 5—A serious engagement occurred in front of Fontainebleau, near Paris, yesterday. The Telegraph this morning has a number of dispatches relating to the rumored death of Gen. Von Moltke. A lead coffin passed through Chalons and Toul, which was supposed to contain the remains of the great Prussian general. Despatches from Chartres, dated to-day, say that the Prussians gained some advantage near Epernan, which opens that place to their arms. They bombarded that place for a time. The French fought courageously, but were unable to contend against the vigorous artillery fire of the enemy.

Tours, Oct. 5—Reports here to-day state that fighting is going on near Orleans. The garrison at Metz make sorties every day, but without important results, the French being always driven back with loss. Bazaine adheres to the Emperor.

Tours, Oct. 6—A battle near Paris the day before yesterday has been productive of important results. The Prussians were defeated and forced to retreat. The position taken by the French necessitated the evacuation of Pithiviers by the enemy. The Prussians abandoned the position with so much precipitation that many cattle and a large amount of forage was left behind, all of which fell into the hands of the French. Latest advices from Paris state that there is much plundering going on there. All the bridges on the railways and highways west of Parss have been mined, and are to be blown up as the Prussians advance. The Prussian preparations for bombarding Paris are nearly completed.

London, Oct. 6—The Garde Mobile has no artillery, and are discouraged.

Versailles, Oct. 7, via Berlin—Nothing important transpired before Paris yesterday or to-day. During the entire siege of Strasburg the Germans lost 900 killed and wounded, including 113 officers. Besieging force is now moving towards Paris.

London, Oct. 7—The Masonic fraternity of England have contributed £70,000 for the relief of families of German soldiers.

The great gun for Fort D'Ivry, on the south side of Paris is nearly ready to be placed in position; its range is eight kilometres, and it requires thirty-five kilogrammes of powder for each discharge. The Prussian guns are nearly all in position before Paris, and the bombardment will be commenced from all the batteries simultaneously the moment arrangements are perfected.

It is asserted that there is complete underground communications to Paris and Tours from Cologne. The Independence Belge intimates that the Prussians are alarmed at the approach of winter, and are disposed to press the siege of Paris.

BARNARD'S express stage arrived last night, with a small Eastern mail and the rev. Father McGuigan and a Kwong Lee agent, as passengers.

ALEX. BURNETT'S train brought a lot of new grain to the creek on Thursday, which was sold at 7c. per pound.

MR H. G. Hartnell, of the Kelly co., Lowhee creek, arrived here yesterday from a prospecting tour up the North Fork of Thompson river. He started out last May and commenced work in the beginning of August, but without meeting with much success. He says that there is a section of country intersected by the North river which very nearly resembles Cariboo in its rock formation and abounds in quartz. All the gold, however, yet known to have been found there is very fine and too scattered to pay well.

THE down express of last Saturday took the following passengers:—Robt. Patterson, late of the Wake-up Restaurant, en route for Scotland; J. H. Turner and W. Evans, for Victoria; and R. A. Brown, for Quesnelmouth. We inadvertently omitted notice of Mr Thos. Harding's arrival on the 7th inst.

FIRST-PRIZE HAMS—Messrs. Evans & Williams, of Victoria, were awarded the first prize for the best hams at the Agricultural Exhibition lately held in Victoria. Mr C. Strouss has a supply of these celebrated hams on hand.

THE CARIBOO SENTINEL

SATURDAY, OCT. 15, 1870.

MINING INTELLIGENCE.

WILLIAM CREEK.

The Flume co. cleaned up 40 oz. for the week from the Forward ground, and 30 oz. from the flume. The Cariboo co. washed up 202 oz. for the week, and the St. George co. 30 oz. The Ballarat co. washed up 65 oz. for two days' run last week. The Cornish co. cleaned up over 50 oz. last Thursday.

STOUT GULCH.

The Mucho Oro co. got 30 oz. for the week and the Taffvale 38 oz.

CONKLIN GULCH.

The White Pine co. washed up 25 oz. for the week, and the Felix co. 14 oz., with one shift at work.

VALLEY MOUNTAIN.

The Discovery co. cleaned up about 25 oz. last week.

FRENCH CREEK.

The Cosmopolitan co. are sinking a blind shaft. In our last number we credited the North American claim with good pay. The company only got 5 oz. for the week. This week the ground looks better.

CANADIAN CREEK.

The Miller co. have not got into the channel recently discovered on the eastern side of the creek, but are cutting down the rock to get drainage into the tunnel.

LOWHEE CREEK.

The Victoria co. washed up 43 oz. for the week. During the present week this company have been engaged in running a drain, which will be completed in a few days. The Russell-Robertson co. made a little under wages.

MOSQUITO CREEK.

The Willow co. are taking out good pay. The dividend for the week amounted to $100 to the interest. The Little Minnie co. are getting small pay. The Discovery and Tabb companies are making about wages. The Holman co. have sunk a new shaft and are preparing to breast out.

RED GULCH.

The Railway co. are running a tunnel. The other companies are taking out small pay.

COULTER CREEK.

The companies on this creek have stopped for want of water.

WHIPSAW GULCH.

The Cornubia co. are getting small pay. A few Chinamen are making from $3 to $4 per day.

LIGHTNING CREEK.

The South Wales co. have got their machinery finished and are now prepared to resume drifting for the channel. The Spruce co. commenced washing on Tuesday last. The Lightning co. have got through the rock and past the caved ground.

CHISHOLM CREEK.

The Good Hope co. are making wages more or less, and Sangster & co., in the adjoining ground, have got down about 70 feet with their shaft. The Avonia co. are in with their tunnel 200 feet, with gravel in the face. The Ben Nevis co., in conjunction with the Snowden and Bruce companies, are running a tunnel through the Bruce ground, and are in 400 feet.

DEGGS GULCH.

The Trust-to-Luck co. are running ahead with their tunnel, which now shows gravel in the face.

PINE CREEK.

The Empire co. have sunk their shaft 16 ft. lower and are putting in elevators. The Discovery co. are doing very well.

BLACK BEAR CREEK.

The company working on this creek have got down with their shaft 51 feet.

WINTER.—Yesterday snow covered the ground and remained all day. It is now thought that there will be no "fall freshet" on this creek, as the regular period of its visitation has passed and the weather is too cold for moisture in the shape of rain. It is all the better for mining operations on this creek. Last season the freshet choked the bedrock drain, and the consequence was that the companies were engaged during the winter in repairing the damage. A great deal of old ground will probably be worked this winter on William creek, and as a number of miners are expected from Omineca, times will be livelier than during last winter.

THE Cariboo co. washed up 35 oz. on Wednesday. The White Pine co. are doing pretty well this week. The Caledonia washed up 16 oz. on Wednesday, and the Ballarat co. 35 oz., one shaft working. The Dutch Bill company cleaned up about 100 oz. this week, and over 40 oz. were taken out of the Forward ground

PUBLIC MEETING.

A meeting was held in the Theatre last Monday evening to hear the Hon. R. W. W. Carrall's address to the electors. The building was well filled. Mr W. Rennie was called to the chair.

Hon. Carrall, after the chairman had made a few remarks stating the object of the meeting, was introduced He commenced by referring to his election without opposition two years ago, and to the fact that then the electors had sent him to the Council wholly untrammeled with pledges, placing their confidence in him without denoting what course he should follow, except to support Confederation. He had done his best for the interests of the district and for the colony. He had attended to the wants of the district, and aside from these he had devoted his whole time and ability to forwarding Confederation. Some of his friends seemed to think he had pursued an illegitimate course, but his politics being frank, fair and outspoken, he would give a full statement of what he had done. He said he had intended to have abandoned politics last year because the colony was a Crown colony, but having been assured by the Governor that Confederation would become a leading question in the Council, he decided to retain his seat for the purpose of assisting in the completion of union with Canada. Now that all the measures of the Executive Council had become public, he had no delicacy in speaking upon them. The Estimates had been prepared and passed when he was summoned to the Executive Council. He found the officials and Dr. Helmcken bitterly opposed to Confederation. They said the colony was not prepared for it. Lord Granville's dispatch was not imperative, and therefore they were not bound to propose Confederation. But the Governor and himself favored the measure, and they proposed to bring it into the Legislative Council as a Government measure. It was found necessary in order to secure unity of action on the part of the Executive Council, to leave responsible government an open question. He (Hon. C.) was a responsible government man. He (Hon. C.) believed with Macaulay that a people who are not fit to govern themselves were not fit to be governed. Responsible Government did well in large, populous countries. It required for its success to have population, wealth and intelligence. British Columbia had little of the first two, but abundance of the last. He had been accused of saying that the people of British Columbia were not fit for self government. He denied having said so. If, however, British Columbia remained out of Confederation he would oppose responsible government. He had opposed responsible government, and he would do so still without Confederation. He believed that all the circumstances necessary to make responsible government work well would be forthcoming under Confederation, but at present, and as a separate colony with only 10000 white inhabitants, it was premature to demand responsible government. The present system of government, however, was objectionable—abominable. He had told the Governor so, who agreed with him, and said that he had written for authority to set up a new Constitution. He then referred to the terms of Confederation, and read over the clause which states that British Columbia, after Confederation, would be granted responsible government whenever asked for, and he asked whether that clause did not prove he favored responsible government. He then reviewed the Dominion terms and explained their advantageous character. He had felt disposed to give a fee simple of the colony to Canada for the sake of the railway alone, but we had obtained the most favorable conditions by which we would have a large revenue for local purposes, and would have a railway without any sacrifice on our part. He had private assurances from the highest sources that the construction of the railway is assured in England. The tariff was left an open question by the terms, because some entertained the idea that the farmers would be benefitted by retaining the existing tariff, but as there were no farmers on Vancouver Island and only a few on the lower Fraser, and as the Nanaimo coal miners and the Burrard Inlet lumbermen had to pay $1 50 duty on a barrel of flour, he should favor the Canadian tariff. Vancouver Island was a grazing and not an agricultural country, and would be benefitted by the high duty on cattle. He had done all that was possible for him to do. He had attended to the wants of the Fire Brigade, the Hospital and Reading Room, and to the matter of trails. He had been blamed because he had voted against the resolution for an examination into the affairs of the Lands and Works Department, but he believed Trutch to be an honest, upright man, and he thought that the resolution was only dictated by picayune, contemptible spite. He concluded by appealing for judgment on his conduct as a representative, and sat down amid cheers.

Loud calls were made for Mr Booth, who said he would probably take another opportunity to explain his views in connection with the forthcoming election.

Mr Thompson was then called upon and made a few spirited remarks in appeal for an endorsement of Hon. Carrall's course. He concluded by offering a resolution expressing the confidence of the meeting in Dr. Carrall, which was seconded by Mr T. Pattullo and carried.

The meeting, after a vote of thanks to the chairman, then adjourned.

GONE FROM OUR GAZE—During the past five months there has been a great deal of small business done between the inhabitants of William and Lightning creeks, owing to the large number of miners who have located on the latter creek this year. An opportunity was thereby presented to any intelligent young man to commence an express business between the two creeks, for the convenience of both places. A young man who had experienced the mischance of the "rush" to Omineca in the spring, and who gives his name as "Angelo Balmanno," undertook to supply the want. He did quite a good business for a time, and showed himself to be just the man for it, being active, intelligent and hardy. He had the art of acquiring the confidence of his customers and seemed to have made a great many friends in a short time. For some reason or other best known to himself, he has left for parts unknown, though it is a current report that the Sandwich Islands are his destination. His numerous friends keenly regret his departure, and some of them are very angry with him because he has gone away without first personally taking leave of them. The Sandwich Islands are a favorite resort of persons in ill health, but "Angelo," as he was familiarly termed, was a strong and vigorous biped and did not need the balmy air of Hawaii to maintain his health. He is about six feet in height, wears a moustache of a sandy color, has intelligent blue eyes, and speaks with the accent of a man who had lived in the United States. When last heard of he was endeavoring to cross the Quesnel river, and offered, in the absence of the ferryman, a double douceur to an Indian to ferry him across. In Barkerville he had many friends who had kindly offered him pecuniary accommodation, and not a few of them plainly say that he has skedaddled. We hope they are mistaken, and we also hope he will find himself mistaken if that is really his intention.

THE Spruce company, Lightning creek, have struck a prospect in the lower drive. Last year great expectations were entertained in connection with the ground, which was then held by the Davis company, who had incurred great expense in sinking and driving toward the deep channel in the creek, from which they were driven out by water and abandoned the ground. In the early part of this year the Spruce company took hold of the ground, and, putting up machinery and powerful pumps, they succeeded in getting the water out of the diggings about a fortnight ago. Before the Davis co. were driven out by the water last season they had obtained a prospect of four bits to the pan. The prospect now obtained by the Spruce company, which is said to be $2 50 to the pan, was taken from the same or near the same point in the diggings where the Davis co. sank and got a prospect. The experience of the latter company in attempting to work the ground has enabled the Spruce co. to direct their operations with greater certainty, and it is thought that they can now master the water and thoroughly test the ground. The Spruce is one of the many companies who have spent all the season in opening Lightning creek, and if they succeed in their object it will tend to encourage the other companies in prosecuting their work with renewed energy. Lightning creek will be a lively camp if the lead is found in the present bed of the creek, as the works of the various companies are fixed so as to enable them to work during the winter.

ANOTHER ACCIDENT IN THE CANYON.—On Wednesday last Mr. John Baker, of Barkerville, lost a fine horse, which fell into the canyon from the road. Baker, with horse and wagon, was ascending the steep ground beyond the bridge over Stout gulch, when Meacham & Nason's lumber team came in sight, and Baker having got to the narrow point where it is impossible for teams to pass each other, he got from off his wagon for the purpose of unhitching his horse. While going to the head of the horse, the animal backed with the wagon, which curved toward the creek, and fell from the road pulling the horse along with it down the precipitous bank to the bed of the creek. The horse was instantly killed, one of the shafts of the wagon having entered its neck and pierced through its head. The animal was worth about $200. The wagon received very little damage.

CLAIMS FOR SALE—A full interest in the Victoria co., who have struck it "big," is offered for sale. Also a full interest in the Bradley-Nicholson co., William creek. See advertisements.

WEIGHTS AND MEASURES—The "Ordinance to establish a Standard of Weights and Measures" provides that the English standard of weights and measures shall be the standard in this colony, and no goods or commodities shall be sold except by such standard. To avoid the inconvenience which the practical effect of this would cause of re-packing and re-measuring imported goods or commodities—as, for instance, coal oil, which is put up by the American gallon—it is further provided that articles in any vessel, or bale, or by bulk, may be sold when represented to be not of the standard weight or measure. All articles sold by weight shall be sold by avoirdupois weight, except precious metals and stones and drugs, which when sold by retail shall be sold by apothecaries' weight. The Governor may appoint inspectors of weights and measures, and direct them to stamp all weights and measures, and for every weight and measure stamped the inspector shall receive 20 cents. The inspector may enter any shop, store, warehouse or place of business and examine and prove all weights and measures, and if found untrue may seize and forfeit them. Any person having false weights or measures, or refusing to produce weights and measures for inspection, shall be fined $100. For using false weights and measures with intent to defraud, the fine is $1000 or imprisonment, for six months. Mr George Byrnes has been appointed Inspector of Weights and Measures for the district of Cariboo.

A LIBERAL RESPONSE—The appeal of the committee for aid on behalf of the widows and orphans of the French soldiers killed in the war has been liberally responded to. On Saturday last the total amount realised from subscriptions was $958 which was forwarded to the Consul-General at San Francisco by Capt. Jules Fery, who is the authorised "correspondant" of the Consulate for this part of the colony. Both of the Bank agents here offered to transmit the money free of charge.

MEMORY presides over the past: FELL'S COFFEE over the present. The first lives in a rich temple hung with glorious trophies, and lined with tombs; but FELL'S COFFEE has but one shrine, and that is every breakfast table. Its aroma walks the earth like a spirit, and can be found for sale at every respectable dealer's in British Columbia. Beware of spurious imitations.

THE Mexican who was brought from Quesnelmouth and placed in the Cariboo Hospital a short time ago, died on Saturday last. His name was Hosea Ramme; he was a native of San Belle, Mexico, and aged 27 years. He was buried in the Cameronton cemetery.

THEATRE—The Amateurs have withdrawn from their programme for to-night the farce of "A Decided Case," in consequence of the length of the comedy of "All the World's a Stage," the representation of which will constitute the entertainment for this evening.

QUARTZ—We understand that some very rich quartz was taken out of the ledge on Island Mountain last week by M. Sadoux. It is intended to continue prospecting the ledge during the ensuing winter.

ONE of the workmen, Ogden Wilson, engaged in opening the new trail to Lowhee creek, cut his foot with an axe a few days since. Dr. Bell is of opinion that the mishap will not produce permanent lameness.

EDUCATION—It will be seen by advertisement that Mrs Roper has opened a Boarding and Day School at Lac la Hache. Mrs Roper is an accomplished teacher, and the school will be a boon to the settlers in the district.

THE BALL—Don't fail to attend the ball on Thursday evening next. Invitations to about thirty ladies have been given, and the committee will spare no pains to make the ball unusually attractive.

THE drawing for the numbers of the tickets and for the prize of $100 will take place at the Theatre on Thursday evening next, commencing at 8 o'clock.

CARIBOOITES visiting Victoria will remember that GILMORE, Merchant Tailor, has removed his place of business to the store adjoining the Colonial Hotel, Government street.

LOWHEE SLEIGH TRAIL—Work for this trail goes on well. Judging from what was done up to last Wednesday, the workmen would probably reach Forestville to-day.

THE Annual Meeting of the Pioneer Quartz Mill Company will take place at Mr Todd's store on Tuesday evening next.

Catillane's pack train, from Yale, with an assorted cargo of merchandise, arrived here yesterday.

COFFEE—The Coffee prepared by WILLSON & RICKMAN, Fort street, Victoria, has superseded all other Coffee in the lower country. It is manufactured from the very best raw coffee, and its superiority is attested by the fact that wherever introduced it has become the favorite beverage.

MINING RECORDS.

GROUSE CREEK.

Wilson co.—Sept. 30—John Triplett, two full interests. Re-record.

Cascade co.—Oct. 4—C. P. O'Neil and H. Phair, two creek claims, commencing at the lower line of the Cascade co.'s hill claims and running up stream 200 feet. To form part of Cascade co.

BEGGS GULCH.

Trust to Luck co.—Oct. 4.—Henry Christie, three interests; Jas. Amm, D. Williams, D. Grunnow, F. McLennan, each one interest, and G. Ferguson, one-half interest. Re-record.

Lothair co.—Oct. 6—Wm. Kemp, Geo. Atkinson, Alex. Grant, Samuel Price, F. W. Harte, John Dun, John Brodie, James Patterson, John Love, Chas. Vaillancour, ten creek claims adjoining the upper line of the Tudor co., and running up stream 1000 feet and across from base to base. To be known as the Lothair co.

LOWHEE CREEK.

Victoria co.—Oct. 7—Stephen Fellows, Jos. James and A. J. McIntosh, three hill claims on the east bank, commencing at the Victoria co.'s lower line and running up stream 300 ft. To be held in trust for the Victoria co.

BUSINESS NOTICE.

PAIN KILLER

PROP.S

PERRY DAVIS & SON PROVIDENCE R.I.

1840 1870

This celebrated Medicine has won a deservedly high reputation as an alleviator of pain and a preserver of health. It has become a household remedy from the fact that it gives immediate and permanent relief. It is a purely vegetable preparation, made from the best and purest materials, safe to keep and to use in every family. It is recommended by physicians and persons of all classes, and to-day, after a public trial of thirty years—the average life of man—it stands unrivalled and unexcelled, spreading its usefulness over the entire world. Its large and increasing sale affords positive evidence of its enduring fame. We do not deem it necessary to say much in its favor, as one bottle will do more to convince you of its efficacy than all the advertisements in the world. Give it one fair trial and you would not be without it for ten times its cost.

Directions accompany each bottle.

Sold by all Druggists and Merchants. ac1 1m
