The Cariboo Sentinel.

Vol. 4. Barkerville, Williams Creek, B. C., Monday, September 2, 1867. No. 35.

SOUTH AMERICA.

CHILI.

Latest dates from Valparaiso are to the 3rd July. Immense excitement was produced in Valparaiso by the news received by the French mail, of the Spanish squadron under Mendez Nunez, having left Cuba for Rio Janeiro, and of the reported intention of the Spanish government to renew hostilities against Chili and Peru. This news was confirmed in the main by despatches received through the overland mail from Buenos Ayres, which report the arrival at Rio of the Numancia and three other Spanish ironclads. This intelligence created quite a panic among the foreign merchants of Valparaiso, whose interests may again have to suffer. In the Chamber of Deputies, on the 28th of June, the ministry were pretty hard pressed by Matta, Lastarria and Santamaria, in reference to the real situation of Chili, and whether the government meant war or peace. The minister of war was forced to reply, and the following will convey the substance of his declaration: "the Chamber of Deputies and the country should understand that the government will wage a defensive war only, without running the risk of remote expeditions, however much it may be provoked thereto."

PERU.

Lima dates are to the 13th July. Great excitement prevailed in the capital and in Callao, in view of the probable return of the Spanish fleet. The government is vigorously pushing on the work of fortifications at Callao, so as to render it as impregnable as possible. Three new forts have been erected, mounting Rodman's and Dahlgren's 12 and 15-inch guns.

Admiral Tucker was not, as erroneously stated in several New York papers, "dismissed" from the Peruvian navy. He was merely, by his own request, relieved from the chief command, and still held the rank of vice-admiral. In the event of active operations, Tucker will again assume command of the allied fleet. He had gone with a large party from Lima on an exploring expedition to the head waters of the Amazon, but as soon as the threatening intelligence of Spanish intentions reached the government, a messenger was sent after the Admiral in hot haste, recalling him immediately.

The new constitution will be promulgated on the 28th of July, the anniversary of the independence of Peru, and a day of great rejoicing throughout the republic.

LATER FROM CHINA.

By the Dutch bark Japaba, arrived August 5th, from Hongkong, we (S. F. Bulletin) have later printed dates. The news is quite uninteresting, being of a local nature:

On the 31st May a Chinaman seen lurking around the Government buildings in a very suspicious manner was arrested by the sentry and handed over to the passing constable to take to the central police station. On their way to the station the Chinaman got away, and, as he was making off, was shot dead by the constable. The affair had caused a great deal of comment in Hongkong, and was severely criticised by the press.

Considerable excitement had been created by the robbery of the military powder magazine at Hongkong. The robbers were Chinese and they broke open the magazine on the night of June 1st, and stole a quantity of gunpowder, using common paper torches while doing so. As considerable powder lay scattered about the floor, the escape from a terrific explosion seems almost providential. The citizens of Hongkong demand that all powder belonging to the military shall in future be stored at the same distance from town as that belonging to the merchants.

It was reported that the French will make an attack on Corea in the spring.

CURE FOR NEURALGIA.—Take two large table spoonsfull of cologne, and two tea spoonsful of fine salt, mix them together in a small bottle; every time you have an acute affection of the nerves, or neuralgia, simply breathe the fumes in your nose, from the bottle, and you will be immediately relieved.

"DIDN'T you tell me you could hold the plough?" said a farmer to an Irishman he had taken on trial. "Be aisy, now," says Pat, "how could I hould it, an' two horses pullin' it away? Just stop the craytures, and I'll hould it for ye."

A JURY-BOX JOKE.—A New York paper says: "We often hear of the humors of the of the bench and bar, but the jests of the jury box if only collated, would be quite as amusing. The other day, in the Supreme Court here, a civil case was on trial. The suit was important, the lawyers labored, and a full day was occupied. The jury were faithful and attentive, and one Prussian juryman, of Bismarckian face, was observed to be specially sagacious and interested. At length the case being argued, the jury retired, but soon sent back the message that one of their number could not speak a word of English much less understand one. It was the intelligent jurymen, who had sat with the rapt expression of fidelity and interest all through the day, who had been the special object to which the counsel on both sides addressed their pleas, and who only revealed his misfortune when, being asked for his opinion in the jury room, he confessed he didn't verstchen."

A SLIP BETWEEN THE CUP AND THE LIP.—Some time ago a girl, whose parents reside at Fraserburgh, Scotland, engaged for a half year to serve as a domestic in a gentleman's family in a neighboring parish. During her six months' sojourn, she contrived to fascinate one of the gay swains of the district, whose devotion to the fair one was so sincere that, on the completion of her engagement, he followed her to Fraserburgh, and continued his attentions for another six months, during which, as her accepted lover and future husband, he received the hospitality and fraternal kindness of the girl's family. The banns were put in, the marriage day came about, the viands were laid on the groaning tables, the company assembled, and every footfall was listened for with eagerness, in the vain hope of its being that of the tardy bridegroom. After hours of lingering suspense, the information was brought that no marriage could take place, as the "mullart" had left for America.

THE woman who never interfered with her husband's affairs, arrived in town the other day. She is unmarried.

GROUSE CREEK DISPUTE AGAIN.

From the promise made by His Excellency the Governor on the occasion of his recent visit to this quarter, we were led to believe that the necessary measures would be adopted so as to ensure the trial de novo, of the dispute between the Grouse Creek Flume Company and the Canadian Company; and the haste which His Excellency evinced to return to the capital, with the view of expediting this arrangement by calling his Executive Council together, at the earliest moment, to pass the necessary Act, was considered sufficient proof of His Excellency's anxiety to see the difficulty settled without delay. We regret, however, to discover, from the correspondence which we publish below, that His Excellency has failed to carry out his original intentions, and proposes now, instead, that the case be settled by arbitration. If this determination is the result of the deliberations of the Executive Council, His Excellency cannot reasonably be censured for failing to comply with his promise; but if the nomination of arbitrator was left to his choice, as we are inclined to suppose it was, there cannot be the slightest doubt that His Excellency has committed a very serious mistake in his selection. We have no reason to call in question the ability of Mr. Trutch to perform the responsible duties that belong to the position which he holds under the government; and we do him no injustice when we state that he lacks the legal acumen which is necessary to unravel those knotted points of law that are inseparably involved in the settlement of the dispute in question. Had either of the judges of the Supreme Court, or even a barrister of good standing, been selected as the arbitrators, it is more than likely no reasonable objection could have been urged against the arrangement; but to entrust the settlement of an important case like the present, which requires the exercise of no small amount of legal skill, in the hands of a gentleman who has no pretensions to that knowledge, is simply preposterous, and we are confident that the answer returned by the Canadian Company, to the telegram of His Excellency, will remind him of the mistake into which he has unwittingly fallen.

[Copy.]

Richfield, August 29th, 1867.

SIR,—I have received a telegram from His Excellency the Governor, stating that the matter of the strip of ground in dispute between the Grouse Creek Flume co. and the Canadian co., will be submitted to arbitration, and that he has nominated Mr. Trutch as arbitrator.

The Flume co. have accepted His Excellency's terms with reference to the arbitration, and I have to request you will send me an answer, without delay, for transmission to the Governor, by telegraph.

I have the honor to be, sir,
Your obdt. servt.,
H. M. BALL,
Asst. Gold Com.

Mr. C. Booth, Grouse Creek.

[Copy.]

Grouse Creek, 29th August, 1867.

SIR,—I have the honor to acknowledge the receipt of your letter of this morning.

As I am not at present in possession of any written authority that would bind the Canadian Co. by any action of mine, beyond the course of law, I am unable to give a definite answer to your letter, until empowered by resolutions of the company to do so.

I shall, however, call them together at once, and then answer your letter definitely.

Respectfully yours, etc.,
CORNELIUS BOOTH.

H. M. Ball, Esq.

At a meeting of the members of the Canadian Mining Company, convened at Booth's Saloon, Grouse Creek, on the evening of the 30th August, 1867, C. Booth in the chair, it was moved by Dr. Wilkinson, seconded by G. L. Shepperd, and resolved—

"That as the matter in dispute between the Grouse Creek Flume Company and the Canadian Company, is not only a private, but also a public grievance, the Canadian Company beg most respectfully to decline submitting to arbitration any dispute as to their legal or equitable right to any mining property."

It was moved by Benj. Springer, seconded by Joseph Cunningham, and resolved—

"That the Canadian Company, in refusing to submit their case to arbitration, therein disclaim all sinister or dishonorable motives, and claim no protection or immunities other than what they are justly entitled to by law; and they will accept nothing less than the law allows them. They are willing at any time, and always have been ready to submit to, and be governed by such a trial as His Excellency guaranteed to them, through their agent, Mr. C. Booth, at his interview with him, namely, a trial de novo, before any judge of the Supreme Court."

Moved by T. H. Hall, seconded by William Fraser, and resolved—

"That Messrs. Murdoch, Wilkinson and Booth be appointed a committee to draft a reply to Mr. Ball's letter of the 29th inst., based upon the foregoing resolutions, and to make public this correspondence through the columns of the CARIBOO SENTINEL."

[Copy.]

Gold Commissioner's Court,
Richfield, Aug 10th, 1867.

Constable Sullivan is hereby empowered to take possession in the name of the Government, of a strip of mining ground on Grouse creek, extending from the west line of the Black Hawk Co.'s lines, a distance of 12ft. 2in towards the creek, and running 1200ft. from the north-east stake of the Grouse Creek Flume Co.'s line up stream and being 37ft. 10in. from the flume, easterly. This ground is to be held, and not worked by any parties, until such time as an amendment of the mining laws may enable the Canadian Co. and the Grouse Creek Flume Co. to prove their respective titles to it; the title to the same ground being in dispute at present between the two companies.

(Signed) H. M. BALL,
Asst. Gold Commissioner.

In compliance with the above order, I have taken possession of the ground mentioned in said order, and hereby warn all parties from working said strip of ground.

J. H. SULLIVAN,
Constable.

H. M. Ball, Esq.,

SIR,—Enclosed please find copies of resolutions passed at a meeting of the Canadian Co. last evening.

You will perceive that it is out of my power to accept any other terms for the Canadian Co. in this matter, than those volunteered and guaranteed by his Excellency the Governor, in my interview with him.

The resolutions will explain the motive of those terms.

Permit me to add that the Canadian Co. consider themselves entitled, as a matter of courtesy, to a copy of his Excellency's dispatch; but in the mean time have taken measures to communicate by telegraph with the Governor direct.

I have the honor to be
Your obedt servt.,
CORNELIUS BOOTH,
Chairman of Committee.

Grouse Creek, Aug. 31st, 1867.

To the Editor of the "Cariboo Sentinel,"

SIR,—Copies of documents herewith transmitted for your publication, will, I trust, be sufficient in some measure to enlighten an interested public, as to the position at present of the contending parties in this much vexed question.

I will not now trespass upon you by any further comments, than merely to observe that it appears to me passing strange that a case which has already, through the blundering of incompetent, or possibly interested officials, assumed an unpleasant and dangerous magnitude, should be proposed to be submitted to the decision of an individual in whom the Canadian Co. and the miners of Cariboo in general have no more confidence as to his ability to understand and administer British Law or British Justice than they would have in the ability of a dancing dervish to understand and expound the ten commandments.

Why, may I ask, is Mr. Begbie and Mr. Needham passed over in this matter?

CORNELIUS BOOTH.

NOTICE.

ALL PERSONS INDEBTED TO THE UNDERsigned, either by book account or by note, will please call and settle the same immediately, so as to avoid any further trouble or expense.

Sept. 2, 1867. G. L. SHEPHERD.

THE CARIBOO SENTINEL

MONDAY, SEPTEMBER 2, 1867.

ACCIDENT.—During the past twelve months, we have had to record several accidents caused by the overturning of wagons and drays, on the line of road running between the different towns on this creek, none of which fortunately were attended with any serious consequences to life or limb.—Last Friday another of these mishaps occurred, at the head of the canon, about 100 feet above the bridge that crosses Black Jack Gulch, where the road is scarcely wide enough for two drays to pass. It so happened that Wilmott and Hill's drays both loaded met at this point, and while endeavoring to pass each other, the vehicle of the latter party was forced too near the edge of the road and precipitated over the bank, falling a depth of some thirty feet, and, strange to say, although the driver and two children, who were riding on the dray at the time, were thrown headlong into the bed of the creek, neither of them suffered any serious injury; the driver received several contusions, but the children were unhurt. This but only adds another instance for urging the great necessity of having a few more turn-outs made along the road at intervals, and we trust the proper authorities will take the matter in hand at once and thus prevent the occurrence of any similar accident in future.

MR. HARNETT'S LECTURE.—Mr. Harnett delivered a very instructive and interesting lecture yesterday afternoon, which was listened to with marked attention, by a very respectable audience, in the course of which the lecturer pointed out in a very eloquent manner, the many advantages that the miners of this colony enjoyed over those in California; not merely in the superior richness of our mines, and their boundless extent, but in the facilities for working them. He also showed the great advantages to be gained by a more general use of the hydraulic process of mining, anticipating the difficulties too often urged as obstacles to its general introduction, by suggesting several feasible plans which it would be well for every one who has an interest at stake in the colony, to ponder on. As the lecturer threw out some useful hints that are worth treasuring up for future use, we shall give a brief summary of the lecture in our next issue.

FIRE.—Late on Saturday evening, the roof of the Hotel de France was discovered by the inmates to be on fire, caused by the close contact of the stovepipe with the shingles. The fire was luckily observed and instantly extinguished before it had gathered any strength, otherwise the consequences might have been disastrous. What are our firewardens about that they do not examine the stovepipes of the numerous new buildings that have lately been erected? Had it not been for the precautions adopted last year by the ● officers, in having defective pipes repaired, serious loss by fire could not have been averted.

THE streets of Barkerville presented quite a lively appearance yesterday, by the number of miners who had gathered in from the outlying creeks to await the arrival of the Express and mail; but from some unaccountable cause, they were miserably disappointed, and returned to their respective domiciles mattering curses loud and deep on Expressmen generally, and Barnard in particular. Up to the hour of our going to press, there was no sign of its appearance.

A TAX-RIDDEN STATE.—The New York Evening Post figures up the taxes in that State for the present year per capita-lly, and finds that they amount to $27 50 for every man, woman and child. Putting it upon the basis of votes, each elector would have to pay $146 66, which certainly is no small price to pay for the privilege of voting the Radical ticket. Assuming the number of land-owners in the State to be 400,000, the average tax upon each would be $275.

COURT OF ASSIZE.—An adjourned sitting of the Court of General Assize and Gaol Delivery will be held at Richfield on Monday next, the 9th inst., and at Quesnelmouth on Friday, the 27th inst. There are no criminal cases, so far as we understand, to be tried at either of the places named.

P. R.—The last deposit of $100 a-side on the $1000 stakes, for the match between Wilson and Eden, was to be made last night, and arrangements were to be entered into for increasing the amount to $1000 more.

THE new act of Parliament (30 and 31 Vic. c. 35) which has just been issued, provides that jurors in civil or criminal proceedings who object to be sworn are to be permitted to make a solemn declaration.

THREE large wagons drawn by oxen arrived on Saturday, loaded with iron and other heavy materials, for the merchants of this town.

MINING INTELLIGENCE.

WILLIAMS CREEK

Is not exempt from the universal stagnation to mining operations that begins to be felt on the various outlying creeks and gulches, in consequence of the scanty supply of water, arising from the excessive drought that has prevailed for the last eight or ten days. Mining prospects have never been so gloomy during any previous season on this creek, as they are at this moment, for while a scarcity of water prevents a large number of productive claims from working, at the upper portion of the creek, the continued obstruction to the bed rock drain renders those at the lower end equally as unprofitable. We are glad to learn, however, that the work on the drain progresses steadily, and there is every prospect of many of the claims being able to resume work by the end of the present week.

Cornish co. are taking out good pay.—Old California co. washed up for the week 40 oz.—Flume co. are doing great execution on the hard blue gravel with their hydraulic, which has just been erected.—Tontine co. are making over wages.—San Francisco co. washed up 14 oz. for the week, the result of two men's labor.—Black Jack co. made wages last week, with prospects of finding better pay for the future.—El Dorado co. are now in 128 ft. with their tunnel, and expect to reach the channel every day.—Barker co. got flooded out of their new shaft, in which they were taking out good pay, last Friday.—Hibernia co. washed up for the week 50 oz.—Davis co. cleaned up 51 oz. for the week.—Aurora co. had 190 oz. for the week.—Never Sweat co. are taking out wages.—Last Chance and Cameron companies are starting to wash.—Raby co. washed up last week 70 oz.—Prairie Flower co. took out for the week 50 oz.

STOUTS GULCH.

The Floyd co. will have removed enough tailings from their cut by the end of the present week to enable them to take out pay.—Alturas co. cleaned up for the week 243 oz.—Taft Vale co. washed out for the week 67 ounces.—Jenkins co. are still pushing forward the Mucho Oro co.'s drain tunnel, and are taking out a little pay.—Mucho Oro co. had for the week 60 ounces. Total for this gulch 370 ounces.

CONKLINS GULCH.

Although great hopes were entertained during the early part of the season that the lead of gold in this gulch had diverged into the north bank, near the Ericcson claim, as was evident by the big pay found by the United co., still, the recent discoveries made by the Renfrew co. have shown that the bed of the stream is not without its quota of the shining metal in paying quantities, and the consequence has been the enhancement in value of those claims located in that quarter, with a corresponding depreciation of those situated on the north bank; thus illustrating the great uncertainty that usually attends all mining speculations.

The United co., who continue to hunt for the lost lead, washed up for the week 37 oz.—The Ericcson co. expect to get into pay towards the end of the week.—Reid co. washed out for the week 55 oz.—Lone Star co. are engaged in cleaning out the old Hood tunnel, and intend extending it on until they reach bed rock in their own claim.—Hood co. has been laid over at present.—Renfrew co. washed out for the week about 75 oz.—Galour co. have run in their tunnel 360 feet, and find very good indications; they are not no bed rock yet.

MUSQUITO GULCH.

The claims on this gulch are doing better at present than at any time since the diggings were struck. We have been unable to learn the particular amounts taken from any claim, except the Holman, which yielded 70 oz. for the week.

RED GULCH.

There was another strike on this gulch on Saturday, in a claim located on the ridge dividing this gulch from Musquito, and nearly opposite the Willow co.—A company called the Job co. took out of their shaft 5 ounces of very coarse gold, some of the pieces weighing from $10 to $12. This shows conclusively that the lead in this gulch breaks through into Musquito Gulch at the upper end of the Minnehaha claim, which is now supposed to be the richest claim in that vicinity.

LOWHEE CREEK.

The water in this creek is diminishing rapidly, but has not reached so low a stage as to entirely suspend all mining operations. It is true the claims at the upper end had to stop work for the past eight days, but those further down the creek continue to work uninterruptedly, and with good results. The first of these claims is the Plumbago, which is yielding at the rate of from $8 to $10 a day to the hand.

The Flume co. are doing well, working over old tailings. Last week they found a small spot of solid ground from which they took out 35 oz.—Now-or-Never co. have started to sink a shaft about twenty feet beyond the end of their tunnel, so as to ascertain whether the channel extends further into the hill, before continuing their bed rock tunnel.—Chittenden, Moorhead and Sagemiller companies are making good wages.—First Chance co. did better last week than at any time during the season, having washed out 120 oz. for five days' work.—Calaveras co. have got everything ready, and will commence washing to-day.

GROUSE CREEK.

The various companies which we referred to in our last report as being engaged in sinking prospect shafts at the upper end of the creek, have not yet got down on bed rock, but claimholders generally, appear to be very sanguine of meeting with success, when that object is attained—The Hard-up co. bottomed a shaft in their tunnel at twelve feet, and are now busy drifting into the hill.—The Heron co. are still averaging about 80 ounces a week.—Short Bend co. are making about wages.—Full Rigg co. are taking out something over expenses.—Discovery co. have struck pay 30 feet farther in the hill than they ever before reached. They divided $200 to the share last week.—Ne'er do Weel co. divided $300 to the share as the result of last weeks proceeds.—Caroline co. are prevented from working for the want of water; their last clean up on the 25th ulto., was 420 oz.—Cascade co. are preparing to wash, having found very fair prospects.—Ontario co. are also ready to wash.—The Shy Robin and Rankin cos. have been laid over on account of the scarcity of water.—Salt Spring co. are taking out fair pay. Above this point, the greater number of the claims are busy prospecting.

MAURITIUS.

A correspondent of the San Francisco Bulletin thus describes this small but important colony of the British crown:—

Mauritius is a small island situate within the tropics, just in the centre of the Indian ocean. In form it is eliptical or rather pear-shaped, the northern part being the smallest. The greatest length is 35 miles from Cape Malhereux to Point Dorris, and its breadth 28 miles. The observatory at Port Louis, the chief city, is situated in 28 deg. 9 min. 56 sec. south latitude, and 57 deg. 26 min. 30 sec. east longitude. The area of the island is about 700 square miles, the exact measurement being given as 432,680 acres. As you approach the harbor of Port Louis, you become more and more impressed with the exceeding beauty of its position. It is the first in importance and the second in point of size on the island. It is a natural basin and considered one of the safest in the Indian ocean, is capable of admitting ships of the greatest burden, and is sufficiently specious to admit of 150 vessels of 300 tons and upwards to ride at anchor. The average depth of the channel, which is marked by a double line of buoys, between coral reefs, is 35 feet; the average within the harbor is 14 feet. As you pass from the bell buoy to the anchorage, a distance of nearly a mile and three-quarters, you see a long tongue of land on either side covered with trees, and at either extremity a massive fort (Forts George and William), having a splendid command of the entrance. Pilots are always on the spot to take vessels in, but ships are not permitted to enter the harbor until they have been visited by the Health Officer of the port. Port Louis possesses quays, docks and slips, constructed at immense expense, and I should imagine, would be of great importance to England with regard to her eastern possessions. It affords safe and ample anchorage, not only for ships regularly trading to the island, but for numbers of others compelled to put in for provisions or repairs.

A LIFETIME.—"Time is but a parenthesis in eternity," as somebody grandly says; if so what must each of our lives be? A parenthesis in a parenthesis and a very short parenthesis too. Our life is but as a very little boat tossed on the sea of infinity; it is a small breathing space between the tussel with life at the beginning and the tussel with death at the ending. Poor little lives! What immeasurable self-pity fills one, when one thinks of our poor little farthing rushlights; that often before they are half burnt, great Death blows out. And yet all our reflections and lamentations and moralizations on the brevity of our abiding here, does not do anything towards making one dull minute seem shorter or greasing the wheels of one tedious hour.

GOLD FOUND IN LAVA.—In the claims of Sol. Woods, at Monte Cristo, Sierra county, a few days since, there was found lying on the sluice boxes a piece of lava containing about $6 50 in gold. The piece had evidently got into the diggings from the surface, and had no appearance of having been washed,

HOW MEXICAN WARRIORS RAISE MONEY.—The Rio Grande Courier gives currency to the following:—

We learn the following additional of Marquez's doings in the capital: Soon after entering Mexico, when coming from Queretaro, Gen. Marquez imposed a prestamo of $80,000, committing several outrages. Mr. Benock, the Prussian consul, was thrown into jail because he refused to pay his share of the prestamo. He then marched out to the relief of Puebla, was met and defeated by Guadarama, and returned to Mexico with a few cavalry and no guns. He immediately imposed another prestamo of $1,200,000, and imprisoned the Prussian, French and Spanish ministers and charge d'affaires for non-payment of their quotas. Mr. Dano, the French minister, is married to Miss Benistequi; Marquez put another $80,000 loan on the lady, and imprisoned the husband because it was not paid. In another instance a very heavy amount was required by Marquez as a loan, from one of the leading foreign houses; the payment having been refused, the merchant's wife and children were thrown into prison and kept there until payment was made. Another prestamo was made at San Luis Potosi, on the 27th ult., only for $80,000. A special tax of one per cent. has been imposed upon all capital in the republic. It is not stated how often it is to be paid.

TRADE OF AUSTRALIA.—In the six Australian colonies, viz., New South Wales, Victoria New Zealand, South Australia, Queensland and Tasmania, in 1865 the imports amounted to £34,976,639, and the exports to £30,219,411. The exports of wool amounted to £9,612,305; of gold, to £11,165,811; of coal, to £274,303; of copper ore, to £618,472; and of grain, to £1,335,748. The tonnage inward amounted to 1,969,091 tons; and the outward tonnage to 2,018,224 tons. Excluding New Zealand, the number of horses in Australia was in that year, 550,874; of horned cattle, 3,719,175; and of sheep, 29,293,744. In the year 1825, there were in Australia 6,142 horses, 134,519 horned cattle, and 237,622 sheep.

THE transit of Venus over the sun's disc, which last took place on the 3rd June 1769, will again happen on the 8th December, 1874, and is already engaging the thoughts of the astronomers. It affords a direct observation of the planet's node, or points where its orbit cuts the ecliptic, an element which is of great value for the correction of astronomical tables; but it is chiefly important for the determination of the sun's parallax (or angle under which an observer, situated in the centre of the sun, might see the earth's radius.)

A FRENCH GIANT.—A new giant, born in department of the Vosges, and measuring eight feet and a half in height, visited the Exhibition, having made the journey to Paris principally with the object of measuring himself with the Chinese giant. He at once proceeded to the establishment which the latter shares with a dwarf, and challenged him, measure in hand; the result of the trial was that the Chinaman had to acknowledge himself vanquished in stature.

A CANADIAN at Hamilton suggests a new flag for the New Dominion. He proposes the Union Jack in the corner and the rest of the bunting filled in with four colors—red, white, blue and green. On the shield it is proposed that the beaver take the place of the three lions passant, and that the maple leaf should be entwined with the rose, the shamrock and the thistle.

IN Kentucky lives a man, the head of a very respectable and intelligent family, who, during one week in each month, imagines himself a woman, dons the hoops and balmoral, and sits in his parlor waiting for his beau. This strange conduct was first noticed in him when he was about 17 years of age. He is now 51.

THE marriage of Lord Gilford, eldest son of the Earl of Clanwilliam, with Miss E. H. Kennedy, daughter of Mr. Arthur E. Kennedy, C. B., late Governor and Commander-in-Chief of Vancouver Island, took place on the 17th June, at St. George's Church, Hanover-square.

BISMARCK somewhat eclipsed his royal master during his stay in Paris. The portrait of King William was hawked about for one halfpenny apiece, whilst the effigy of the premier fetched 2d.

THE Marquis of Bute has purchased Louden Castle in Ayrshire, the seat of the Marquis of Hastings, for $1,750,000. Losses by horse-racing compelled the Marquis of Hastings to sell.

EDMOND About says, "there are two things in this world which a man does not often find away from home, the first is good soup, the second is disinterested love."

WHAT is the difference between a town and its people? It is laid out at the beginning of its existence, and they at the end of theirs.

OUR COUNTRY AND OUR GOVERNMENT.

AIR—NATIONAL ANTHEM.

God bless our country free—
The young confed'racy,
God bless our land.
May it in strength increase,
And long remain in peace;
In wisdom ne'er decrease,
God bless our land.

Our union, Lord preserve,
Ne'er may our people swerve
From loyalty.
Protect from foreign foes,
And all those ills and woes
Which from rebellion flows,
We ask of Thee.

Bless our sovereign head,
By Thee may she be led
Wisely to rule.
And may her counsel be
Famed for integrity—
From base corruption free,
God bless her rule.

Great Governor above,
Who rul'st with power and love,
Descend and bless.
For nations that would be
Great, glorious and free,
Must ever reverence Thee—
This we confess.

SHEFFIELD TRADE UNION COMMISSION.

A very horrible thing are the Sheffield disclosures just brought before the public by the judicial Trades Union inquiry in that city. Now that the tailors' strike in London has assumed a legal shape, and that in one instance twenty summonses have been taken out against the president, secretary, and other officers of the Operative Tailors' Association, on a charge of conspiracy to impoverish certain master tailors, by inducing men not to work for them, these disclosures may lead to definite action. The investigation in court, at Sheffield, was for the purpose of ascertaining the connection between the murder of one Linley, a grinder, and the trades union of grinders in that city. It turned out that a Mr. Broadhead, the secretary of the trades union, had actually paid for two attempts on the life of Linley, as well as for attempts to blow up a factory opposed to the union, and to do other dreadful things; and the trades union thought it quite right to act in this manner. Broadhead, a man of education and influence, according to his own admissions, entered into an agreement with his tools for taking the life of the murdered man Linley, on payment of a given sum, and bargained with the murderers deliberately, and with as much coolness, as a butcher would biggle with a cattle dealer about the price of so many lambs or calves that he desired to purchase and slaughter. No discovery could be made of the authors of these outrages, and no rewards induced a betrayal of the culprits, until the commissions invited revelations by a promise of pardon. The fear of punishment prevented disclosure; but when immunity was proclaimed, on the sole condition of telling the truth, the tale of blood came out, and the cowardly creatures who could waylay and shoot a fellow-workman in cold blood, for a sum of money previously agreed upon, purchased the preservation of their infamous lives by laying all the facts bare. Broadhead confessed, and so did his tools. Linley was to be killed because he refused to belong to the union, and employed half a dozen lads. The trades union must be sustained at all hazards, said Broadhead, and his current price for blowing up a house with gunpowder, or assassinating a fellow creature, was from fifteen to twenty pounds. Sheffield will have reason to be proud of a society that could so cooly propose to sustain itself by such outrages, and the unions generally will have to submit to much odium that may be undeserved, in consequence.

A COUNTRYMAN going to market with a load of pork, was met by a young girl who very genteelly made him a low courtesy, when he exclaimed—

"What! do you make a courtesy to dead hogs?"

"No, sir," answered the girl, "to a live one."

A HIBERNIAN gallanting with a married lady, hearing her unexpected husband coming up stairs, exclaimed—

"Oh, hide me, my dear darling, for if I'm found, I'm lost."

IN an advertisement for a young gentleman who left his parents, it is stated: "if Master Jacky will return to his disconsolate parents, he shall not be sent to school, and shall sweeten his own tea."
