THE CRESTON REVIEW

Vol. XV. CRESTON, B. C., FRIDAY, JUNE 29, 1923 No. 22

Erickson

Mrs. Holder and Mrs. L. T. Leveque were visitors with friends at Kingsgate a few days last week.

Miss Helen Hunter, teacher at Kitchener, was a week-end guest of Mrs. G. P. Smith.

Geo. Kelly arrived from Manitoba about the middle of the month and will help with the season's operations on the W. G. Harrison ranch this season.

Edith Palfreyman and Dick Penson are Erickson's representatives at Creston at the departmental high school examinations, which commenced on Monday.

Hard surfacing road work will be completed here in a few days and the rock crusher and other equipment, will we hear, be shifted into the Alice Siding country for the balance of the season's work.

Mrs. Kyle Kelly was a visitor with her mother at Kingsgate a few day last week.

A carload of cement is on the siding here which means that the work of putting in Erickson's new C.P.R. depot will be under way shortly as the Kosmer station is now pretty well dismantled and ready for coming here to be rebuilt.

Mrs. Barker and family, who have been visitors with Mr. and Mrs. Palfreyman, left at the end of the week or a visit at coast points. Miss Cotterill accompanying them.

Erickson school has the largest ever class of candidates trying the Entrance examinations at Creston this week, as follows: Floyd Celli, Jean Craigie, John Hall, d'Warrene Harrison, Effie Littlejohn, Robert Long, Winnie Palfreyman, Beth Putnam and Molly Kemp.

Lister

Ernest Stephens was a guest of Mr. and Mrs. James Adlard of Creston during the week, while writing his high school exams.

Mr. and Mrs. Frank Bunton were at Lister for a brief visit on Friday, returning on Saturday to the flume camp at Klockman.

R. Robson of Kimberley was a visitor with Jos. W. Bell for a short time last week.

Miss Ruby Lister is at Creston this week, where she is writing on the Entrance examinations.

Charles Frampton has just completed a standard chicken house for Mrs. W. Millington, who will specialize in White Wyandottes.

Miss Murielle Millington and Miss Irene Huscroft returned on Friday from Crahbrook, where they have been attending high school. Both of them passed the first year tests most creditably.

Bert Hobden of Creston is the latest to appreciate the merits of this end of the Valley. He has just purchased the Fraser ranch at Huscroft from O. O. Rodgers, and has commenced to move here to reside. The Fraser place has a fine residence and a splendid barn and some wonderful alfalfa is growing there.

The Lister strawberry crop has been a splendid one, and although a very small portion of land has been planted to berries it is estimated that at least eighty crates formed the local berry crop. The Weston ranch leads with 30 crates, Peter McKay will have 20, and several others a few each.

On Monday, July 2nd, a joint celebration by Lister and Huscroft will be held to fittingly observe Dominion Day. Everyone is requested to be there by 2 p.m., the ladies to bring refreshments. Ice cream will be served, baseball games played, races run and it is expected that the Creston band will be in attendance.

A delegation of Lister and Huscroft residents waited on Hon. W. J. Bowser Tuesday, regarding the purchase of five acres of land from the Bowser estate at Huscroft, the ground to be used for picnic purposes and community hall site. The delegation consisted of Miss Ruby Lister and Messrs. C. Frampton, H. Helme and Charles Huscroft, who were given a very attentive hearing, and assured the matter would have immediate and serious consideration.

Kitchener

G. A. Hunt was a business visitor at Cranbrook on Monday.

There will be a dance in Hunt's Hall on Saturday night.

Road boss Geroux has a number of men at work this week burning the slashings that were cut while clearing the right of way for the new road from Goat River into Kitchener.

Paulso-Mason also have some extra men employed this week making repairs to their bridge across the river at the mill.

Kitchener was quite well represented at Creston for the Bowser meeting at Creston, Mr. and Mrs. Hunt, W. C. Forrester and B. Johnson being amongst those who listened to the opposition leader.

The mill at the Kitchener Timber Company closed down at the end of the week but it is expected to resume operations shortly. Sash & Door Company teams are busy hauling ties to Kitchener for shipment.

Mrs. N. K. Devlin has arrived from Toronto, Ontario, to join her husband, who is now permanently located in business here.

Kitchener real estate is on the move. The sale is reported this week of the W. C. Forrester residential property the buyer being O. Senseca1, who gets possession almost immediate.

Sad news reached Kitchener this week when announcement came that Charlie Crawford had passed away a few days previous at the Old Man's Home at Kamloops.

School will close for the year on Friday, with the principal, Miss Hunter, spending the last weekend with friends at Erickson. Miss Schmidt, last year's teacher, now at Sirdar, was a weekend visitor with Mrs. Hunt.

End of the term promotions at Kitchener school are announced as follows by the principal, Miss Hunter: From Junior to Senior Fourth—Alice Molander. From Senior Third to Junior Fourth—Millie Andeen, Laura Andeen, Clara Hunt. From Junior to Senior Third—Beatrice Molander, John Belanger. Second Reader to Junior Third—Claude Simpron, Richard Molander, Lucinda Lloyd, Robert Dunn. First Reader to Second Reader—Wesley Blair, Dorothy Dunn, Annie Bejusley, Vivian Langlois, Vera McGonegal. Second Primer to First Reader—Willard Blair, Alice Cameron.

Enjoy a Shower Bath

To the person who has never heard of you you do not exist.

To the person who has never heard that the Exchange Barber Shop had installed a Shower Bath such a thing does not exist.

But those who have tried it say it is fine.

Come in and have a nice refreshing shower after your day's work- after a ball game or tennis.

Nothing so refreshing!

Exchange Billiard Hall
A. E. FRENCH, Proprietor

Wynndel

Miss Doreen Williams is here from Nelson for the summer vacation with her parents.

Mrs. Sheppard, who was taken seriously ill lait week, has been taken to the hospital at Cranbrook, her son and Mrs. Sadler and Mrs. Rosindale accompanying her.

Mesdames Sadler and Rosindale and Reg. Price arrived back from Cranbrook on Tuesday and state that Mrs. Sheppard's condition showed slight improvement before they left.

Berries are moving rather slowly, the first straight car not going out until Wednesday.

Saturday nights dance was quite good. There was a good local turnout as well as quite a number of visitors from Creston.

Wynndel had a visit on Tuesday from ex-Premier Bowser, who was accompanied by a number of Creston Conservatives as well as our former member Mr. Schofield of Trail, and J. W. Jones, M.P.P., of Kelowna. Speaking on Tuesday night at Creston the latter gentleman paid a well deserved tribute to the quality of Duck Creek berries.

Many Candidates Write on Exams.

The best possible evidence that school attendance at the various schools in the Valley continues to increase is furnished by the list of candidates who are this week writing on the Entrance and High School departmental examinations at Creston.

Entrance candidates total forty three and for the first time in history two presiding examiners are required, Miss Wade taking charge of 21 pupils from the rural schools, while Miss Creighton is looking after the twenty three candidates sent up by Messrs. Siddons and Principal Smith. Erickson school has the largest list ever, eight from that district being here to write, while Canyon has its usual quota of six, Wynndel three, and Lister its usual two. Huscrofts has one representative. Those writing are:

Huscroft School—Melva J. Huscroft.

Lister—Ruby Lister, Donald Brain.

Canyon City—Edythe Cleave, Lillian Cook, Glen Messenger, Stacia Messenger, Stella Speaker, Minnie Strong.

Erickson—Floyd Celli, Jean Craigie, John Hall, d'Warrenne Harrison, Effie Littlejohn, Robert Long, Winnifred Palfreyman, Elizabeth Putnam. Private study—Molly Kemp.

Wynndel—Margaret Eakin, Dorothy Penson, Clarence Wilson.

Creston—Evelyn Bevan, Marguerite Benny, James Cherrington, Ollie Christie, Ivin Compton, Benjamin Crawford, Edith Crawford, Charles Holmes, Marion Learmonth, Elson Lidgate, Keith Lidgate, Eric Lytle, Herbert Manuel, Helen Moore, Joyce Moore Anaretta McDonald Harold Payne Olaf Payne, Dean Pears, Louise Romano, Ivan Staples, Harry Webster, Donald Young.

Lister school also supplies one candidate on the High School tests in Ernest Stephens, a last year Entrance pass who has been taking up the Preliminary work with Miss Redpath, the public school principal there. The 1923 candidates are:

Preliminary — Edith Palfreyman, Richard Penson, Ernest Stephens, Lister.

Advanced, Junior—Robert Crawford, Agnes Hobden, Vera Lister.

Matriculation—Hazel Hobden Violet Morrow, Ethel West, Thelma West, Harry Compton (supplementary).

In addition to these fifteen other High School scholars have been granted pass standing by the principal in accordance with the departmental regulations in this respect With these fifteen added to the 54 shown above the Valley shows a total of 69 pupils who have qualified for the departmental tests—an increase of at least 25 per cent. over last year's showing.

The examinations close today and the papers immediately go on to Victoria for official examination, with announcement as to successful candidates expected in about five weeks.

REGULAR PRICES

Canyon City

C. B. Twigg, resident horticulturist, was here on an official visit at the first of the week, making an inspection of the Canyon raspberry crop.

John Miller of Pincher Creek, Alberta, an oldtime friend of John Anderson, was a Canyon visitor a few days, en route to Spokane.

The Vance boys are home from Coeur d'Alene, Idaho, helping with the berry harvest on the home place here.

Matt. Clayton left at the end of the week for Kimberley, where he will be employed for the next few weeks.

Ted Kemp is here from Dorr looking after things on the ranch at Canyon.

C. Blair has just made an exchange of his strip of pasture acreage next the Wood ranch to Alfred Spencer in exchange for the former Hickey ranch which adjoins the Blair place.

All are reminded of the community picnic on Monday, July 2nd, which will be held at the grounds at the extreme east end of the New Sweden road. Children's sports will be the feature, and there will also be free ice cream for the children.

Principal Kolthammer has six candidates trying the Entrance examinations at Creston this week in Edith Cleave, Lillian Cook, Glen Messenger, Stacia Messenger, Stella Speaker, Minnie Strong.

Alice Siding

Wednesday hung up the season's record so far for export trade at the Smith crossing, with 175 crates going east and of these 150 were strawberries.

The H. F. Wood ranch opened the cherry shipping season on Wednesday with three crates of the old reliable Early Richmonds.

Miss Alice Carr left on Tuesday for Fernie, in which town she has taken a position at the telephone central.

On the McMurtrie ranches the thistle nuisance is being expeditiously handled with a horse handled thistle cutting machine which was noticed at work last week.

Hard roads foreman Davies was visitor in this section on Sunday looking for a good rock deposit on which to locate the crusher for the good roads making work that will be done in this section this year.

Mr. and Mrs. Fred Taylor and children are back from Rossland and will likely spend the summer here. They have taken the Frank Simister cottage on the old Cavem place.

Alice Siding berries are making a name for themselves this year, Growers, Limited, reporting that the firm's customers are specifying the R. Stewart fruit in both mail and wire orders.

School is due to close today for the summer vacation. There are no pupils from here writing on the Entrance examinations this June.

Sirdar

There will be the usual 8 and 10.30 a.m. Church of England services in the schoolhouse on Sunday.

Miss Schmidt, principal of Sirdar school, was a weekend visitor with friends in Kitchenr.

Gus Kay, who is night operator here, is having a visit from his wife, who arrived from Cranbrook a few days ago.

Jack Cameron, who was on the sick list a few days last week, is able to be about again. Geo. Cam is also back at work.

Sunday evening motor parties to Kuskanook are becoming quite fashionable. Four auto loads of Creston young people were here last Sabbath.

A. North is quite a heavy shipper of both strawberries and gooseberries, getting out as many as 30 crates a day, some of it going as far as Brandon and Winnipeg, Manitoba.

W. D. Tuohey, Conductor Cameron and Mrs. Tuohey and Mrs. Loasby were motor visitors to Creston on Tuesday night, arriving in time to hear the address given by Mr. Bowser.

The Chinese extra gang will probably finish their work before the end of the week at which time the yard crew will again start day work, which will be appreciated by all, after three months of night duty.

Mrs. McKinley of California arrived on Saturday on a two month's visit with her cousin, Mrs. Jones at Kuskanook, the latter going through to Creston to meet her. Mrs. Perine will be here a little later.

The work train that has been operating on the fill at the Landing for about three months, completed the job on Thursday last. A gang of some twenty-five Chinamans are now here doing the finish up work on the fill.

Opposition leader Hon. W. J. Bowser was a Sirdar visitor on Tuesday, with his travelling partners Messrs. Jones and Schofield. He was met at Kuskanook by some of the party leaders from Creston who were introducing him to Sirdar people during the short stay made here after dinner.

Cranbrook Courier: An old time railway man of the district, Mr. C. M. Goodman, is about to locate in Cranbrook. He has recently purchased the dwelling of Miss M. A. Kimpton, formerly the Ira Manning property, on Garden Avenue. He will take possession about July 1st when he will move his family here.

Mr. and Mrs. A. F. McDonald of Winnipeg, Manitoba, are visitors with Mr. and Mrs. Loasby. They were residents of Sirdar in the early days, coming here twenty-three years ago, Mr. McDonald being on the switch crew at that time, and removed to Winnipeg about 1908. They are agreeably surprised at development in the Valley, particularly the orchards and the excellent roads that are now available.

Call A National Coal Conference

Addressing the Canadian Club at London, Ont., recently, Sir Henry Thornton, President of the Canadian National Railways, dealt with the problem of making Alberta coal available for use by the people of Ontario—a subject discussed in this column in recent issues and which, because of its importance to all Canada, we venture to refer to again even at the risk of being wearisome.

In his address, Sir Henry Thornton said that, while unable and unwilling to tender any definite promise, it was just possible that coal could be brought from Alberta to Ontario without loss to the Government railways at a price that would practically eliminate the United States mining interests as serious competitors for Canadian patronage. Sir Henry added: "This is a big problem and I speak with every hesitation. It is largely a matter of freight rates. It may be possible that we shall be able to fix the rates in order that the coal may be brought to Ontario with a small profit to ourselves. We cannot, or will not, undertake to handle it at a loss."

Having made the above statement as to the position of all Canadian National Railways, Sir Henry uttered a warning to all other interests concerned when he declared that, should the C.N.R. find it impossible to adjust freight rates in such a manner as to transport Alberta coal to Ontario to compete with United States coal, the mine owners of Alberta and the distributors of coal in Ontario must shoulder their share of the burden and not increase their rates.

Summed up, the position in relation to this vital national question of an adequate fuel supply for the Eastern Provinces is, briefly, this: Alberta has the coal, lots of it; Ontario has no coal, is forced to buy from the United States, thus draining millions of dollars out of the Dominion and forcinig up the adverse balance of trade against Canada, and in recent years Ontario has been unable to secure sufficient coal at any price from the United States to meet the needs of its people; the only obstacle in the way of replacing United States coal with Alberta coal is the long railway haul and consequent heavy freight.

The President of the C.N.R. says it is possible, but not probable, that the present freight rate can be reduced sufficiently to enable Alberta coal to compete with U.S. coal and still yield a small profit to the railway. Sir Henry distinctly says they will not haul coal at a loss—and, in view of C.N.R. finances, rightly so—but this does not imply that they would not haul at actual cost, assuming that the earning of even a small profit would operate to prevent the business altogether. If there was an existing coal traffic between Alberta and Ontario on which the railway was now making a profit, the C.N.R. might well hesitate to forego even this, but as no such traffic now exists, the railway would lose nothing by inaugurating a business which would entail no loss, even if it did not yield a profit.

The mine owners of Alberta should regard this question in the same light. They now have no business in Ontario; it is a new field for them, and, like most business men, they could well afford to supply coal to Ontario at a very small margin of profit, or even at cost for a period while developing that new market. Even so they would find it profitable because they would be able to so largely increase their output as to reduce all overhead expenses proportionately, and, by reason of providing steady, all-the-year-round employment for miners, greatly assist in solving one of their present big problems—labor, including hours of work and wages.

The Ontario coal distributors, too, must, as Sir Henry says, be prepared to do their part in this great national and economic development. Those now engaged in handling U.S. coal will probably be opposed to handling Alberta coal at a smaller commission or smaller margin of profit. If so, new agencies for the handling and distribution of Alberta coal in Ontario can assuredly be created, and arrangements made for the financing of such business on a small but safe margin.

It is not Ontario alone that is vitally concerned in finding a solution to this problem. The West is deeply interested, because anything that will lead to a partial solution of labor difficulties at the Alberta mines, that will reduce overhead costs of production and administration, and encourage larger production and further development must react favorably for all Western consumers of Alberta coal, both as to price, quality and quantity.

With the Canadian National Railways prepared to discharge its full duty in the inauguration of a truly national coal policy, surely the time is ripe for the holding of a representative national conference of Governments, both Federal and Provincial, railway executives, mine owners, coal distributors, representatives of the miners themselves, and bankers, at which each group should lay their cards on the table and say what they are prepared to do to make such a national policy possible and a success.

No time should be lost in having such a round table conference take place.

Business Policy

Farmer. I see you have reduced the fine for speeding from $10 to $5.

Country Judge.—Yes, the cusses were beginning to slow up.—Boston Transcript.

Big Threshing Bill

Estimates recently made of the cost of threshing Saskatchewan's 1922 crop placed the figure at $57,000,000, which is perhaps the biggest threshing bill on record.

Mother and Her Baby Are Relieved of Eczema

Mrs. Peter A. Palmer, Salt Burn, Sask., writes:

"Dr. Chase's Ointment has completely relieved me of eczema and piles. I also used this Ointment for my baby, who broke out in eczema. A few applications were all that was necessary in her case. Dr. Chase's Ointment has been worth a hundred dollars to me—before using it I had spent a great deal more than that in unsuccessful treatment from doctors. We have also used Dr. Chase's other medicines, the Nerve Food having restored my health after suffering from severe nerve trouble when a girl."

DR. CHASE'S OINTMENT

60 Cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto

Speed of Birds

Aeroplanes Can Now Travel Faster Than Any Living Creature

Man has beaten the birds at their own game, observers declare. Records of over 200 miles an hour recently attained by aviators at Dayton, Ohio, is declared to be speedier than any other living creature we know of. Some species of hawks have a speed of 200 feet a second, or about 136 miles an hour. The canvas-back duck can fly from 130 to 160 feet a second, but its usual rate of 60 to 70 miles an hour would be pretty slow to be enjoyable in an airplane making a pleasure trip. The crow is the least rapid of a list of 22 migratory birds, flying an insignificant average of 45 feet a second or 30 miles an hour. Curlews and jacksnipes can fly 55 to 65 feet a second, while quails, prairie chickens and ruffed grouse can make 75 feet. The dove can reach a speed of 100 feet a second, or 68 miles an hour, although its usual rate is less. Redheads, blue-winged teals, green-winged teals, Canada geese and different varieties of brant can fly over 100 feet a second, ranging in speed from 68 to 98 miles an hour, but usually fly at a much slower rate.

Painful Sprains, Bruises Restored By Nerviline

There is soothing power in Nerviline that has made it famous for nearly fifty years past. It sinks in deeply, it penetrates quickly, it takes away the pain from a sprain and brings grateful relief to bruised, aching muscles. If your joints are stiff and you are suffering from Rheumatism or Lumbago; if Neuralgia bothers you now and again, use trusty old "Nerviline." It works wonders, whether the pain is internal or external. Get a large 35 cent bottle from your dealer today.

Crushed egg shells are excellent for cleaning pans, enamelled saucepans, and the like, and will remove every speck.

SATISFIED MOTHERS

No other medicine gives the same satisfaction to mothers as do Baby's Own Tablets. They are equally good for the newborn babe or the growing child and are absolutely guaranteed to be free from opiates or other harmful drugs. They are a mild but thorough laxative and cannot possible do harm—they always do good. Concerning them Mrs. Jos. Ache, Coteau Road, N.B., writes:—"I think that Baby's Own Tablets are a marvellous medicine for little ones. I gave them to my little girl with such good results that I now strongly recommend them to all mothers." The Tablets are sold by medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

It is never too early to begin looking on the bright side of life. Do it now.

Requisite on the Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Eclectric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

Increase In B.C. Mining

Output Last Year $7,092,202 Over Previous Twelve Months

British Columbia mining production for the last year with a total output valued at $35,158,843 shows an increase of 25 per cent. over the previous year, according to the report of the Hon. Wm. Sloan, Minister of Mines. The actual increase was $7,092,202.

This year's production, it is estimated, will run over forty million dollars, and close to fifty million.

The final returns for the year bear out the prediction of Mr. Sloan some time ago that the mining tide had turned and everything pointed to greater and more permanent business development than ever before, with a large increase in the number of properties working.

Conditions in British Columbia are now such, Mr. Sloan says, that they have reached a point "where a margin of profit for the miner is visible. It is extremely gratifying to note that the output for the year has only been exceeded three times in the history of mining in the province and that was in 1916, when production reached $42,290,462, in 1918 when it was $41,782,474, and in 1920 when the value was $35,543,048."

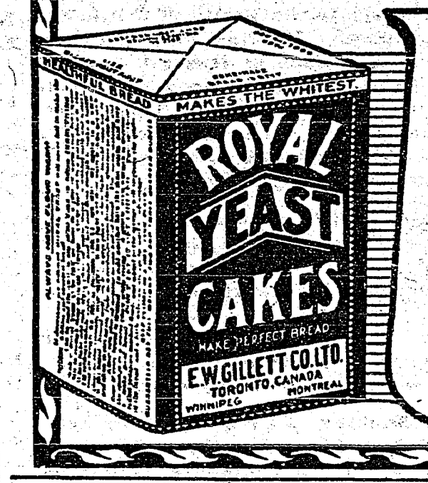
ROYAL YEAST CAKES
MAKE PERFECT BREAD
AN IMPORTANT PRODUCT OF CANADA



Bread is the finest food on earth—the one food that everybody eats—that everybody likes, and that agrees with everybody.

Bread made in the home with Royal Yeast Cakes tastes better, keeps fresh longer, and is more nourishing than any other.

Penalties for Defeat

How Failures Have Been Rewarded In Some Countries

Two hundred years ago the British executed Admiral Byng, of the same stock as our Governor-General, for getting beaten in a naval fight. We have got more sportsman-like ideas since then. For instance, Jellicoe, in his first Jutland despatch, seemed to consider that who won the battle was a mere detail, and that the great thing was the fine fight everyone had put up, especially the boy Cornwall. But in the Balkans they do things differently. Bulgaria has just sentenced six Cabinet Ministers to life imprisonment for having drawn her into the world war in 1916. Six generals also got prison and fines. This is in line with Greece, which recently executed the official responsible for the defeat in Asia. It is one way also of solving the expense difficulty about pensions for ex-Cabinet Ministers.

Apartment Hotel for Victoria

Plans are under way at Victoria for the erection of a modern apartment hotel to cost in the neighborhood of $600,000. The proposed building is of a type that is being erected in large centres of population and is particularly adapted to the tourist trade. There has been a large increase in tourist traffic to Victoria and the Island during the past few year, many people coming from the Western States and the prairies.

Frogs that bark like dogs were discovered in the wilds of Santo Domingo by an exploration party.

Heaven helps those who help others to help themselves.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

BAYER M.D.

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Successful Cultivation Of Variety Of Small Fruits By Farmers Of Prairies

Compared with 1921, the year 1922 at the Morden Station, Manitoba, sow an increase of two hundred per cent. in the number of letters received, which made enquiry as to culture of fruits, says W. R. Leslie, Superintendent of the Experimental Station. There is a decided tendency for farmers and others, on the prairies, to think about being more self-dependent in regard to foodstuffs and a pleasing tendency towards the improving of their home surroundings. In the light of the experiences at the different prairie experimental stations in growing fruits, it is evident that fruit plantations may successfully be established and maintained. Because of present economic conditions, and in the welfare of homemakers, the establishment of home fruit plantations may well be generally encouraged.

Any good wheat soil is suitable for most of the commercial hardy fruits. The sail is to be well worked, comparatively free from weed seeds, free from alkali, and is to have good natural drainage. If there are several exposure available, choose the northerly or north-easterly slope.

The next considerations are a substantial windbreak and selection of hardy varieties.

It is not necessary to delay setting out the fruits until the shelter develops. But the shelter belt should be planted, at the latest, the same year the fruit bushes, trees, etc., are set out. As temporary protection from the winds in summer, and to serve as a snow trap in winter, two or more rows of sunflowers may be planted about the fruit garden area. The sunflowers may be supported with a couple of rows of hemp. Hemp stands up through the winter and tends to grow taller than the sunflowers. The sunflowers are to be decapitated as soon as flower heads form, otherwise they will probably blow over. When the heads are cut off the stalks ripen up and most of them remain standing the following spring. The hemp is allowed to develop uninterrupted by any pruning. Hemp seed is sometimes difficult to secure and good results are more likely from home-grown seed, as the seed rapidly loses its vitality.

The permanent shelter belt may well include a closely planted hedge of caragana. For further advice in regard to the composition of the shelter, the recommendation is that enquiry be made to the chief of tree planting division, Dominion Forestry Station, Indian Head, Sask., or to your nearest experimental station or agricultural college.

Best results are secured from a shelter belt which extends on all four sides of the fruit area. On the north and west have the windbreak sufficiently removed so that space is allowed for snows drifts to accumulate. If the shelter is immediately against the fruit trees, grievous losses may be expected from crushing by snow.

Select those suited to your conditions. It is well to make direct enquiry of your nearest experimental station, as there are a number of different climatic zones on the prairies.

By way of general suggestion, set out raspberries, currants and plums.

There are varieties of each of these types that are hardier than is necessary for success in any normal year. Black currants are not so hardy as some red currants, but there are a number of varieties of sufficient hardiness.

Strawberries are worthy of continuous trial. The supply of moisture in May and June is apparently the chief limiting factor?

Crab apples may well be attempted in all localities and large apples are already successfully grown in Southern Manitoba and to a lesser degree at Indian Head, Saskatchewan.

Plums are the most attractive prospect in tree fruits. There are improved native varieties for the north, and there are very excellent varieties, some of which carry a large proportion of Japanese plum character, in their constitution, for the south. Sand cherry hybrids, grown in bush form, are a valuable possession.

HUSBAND DIDN'T DARE LEAVE HER ALONE HEART WAS SO BAD

Those feelings of faintness, those dizzy spells, the all-gone sinking sensations which come on from time to time indicate a weakened condition of the heart and a disordered state of the nerves.

MILBURN'S HEART AND NERVE PILLS

have no equal as a remedy to strengthen the heart, invigorate the nerves and build up the run-down system.

Mrs. C. Vanhorn, Eckville, Alta., writes:—"About a year ago I had heart trouble. My husband didn't dare leave me alone, and often had to stay up at night with me. I would just feel kind of faint and my heart would seem to stop beating. I would just faint away, and it would sometimes be an hour before they could bring me back to life. Someone told me about Milburn's Heart and Nerve Pills. I got three boxes; I took them and felt much better, so continued all Winter, and now I never feel any such faintness. I surely do appreciate the good they have done for me."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Would Make Chicago Good

Morgan Collins, new police chief, has announced a determination to make Chicago a "one o'clock town." Collins asked Corporation Counsel Busch for an opinion on legality of closing all cabarets and cafes at that hour. The move is aimed at notorious resorts and "black and tan" cabarets which now run all night.

Search For David's Tomb

Sacred Sites Will Not Be Upset By Excavations

The recent announcement that excavations are to be made at Jerusalem in a search for David's tomb has aroused anxiety in some religious circles in London, where it was feared that the work would devastate sacred sites.

The colonial office, however, has issued a reassuring statement asserting that the actual location of the ancient City of David was not on the spot mentioned by tradition. Archaeologists long ago established, the statement says, that the city stood on a little triangular square of ground called Mount Ophel, south of the present Jerusalem. It is on this site, which has heretofore been of no religious interest to Christians, Jews or Mohammedans, that the excavations in the search for David's tomb are to be made.

Electricity From the Air

Apparatus Extracts Juice From Ozone to Light Houses

Joseph Dezsoffy, a young Hungarian engineer, he is only twenty-two years old, is reported to have invented an apparatus for extracting electric current from the air without the least expense. The chief feature of his device is a mast similar to those which are used for wireless telegraphy, and the electric energy gained from the air varies according to the height of the mast. He claims that he would be able to reach forty thousand volts at an altitude of nine hundred feet. The inventor has filled several houses with his apparatus, supplying electric current for their lighting. It has been observed that the current is strongest at noon and weakest at about midnight.

Paris newspaper started by janitors is bankrupt. It cleaned up no better than janitors do.

Dual Shorthorns In Manitoba

Foundation of Herd Imported From England Twenty Years Ago

Special attention is paid at the Brandon, Manitoba, Experimental Farm, to the dual Shorthorn, and as a great many farmers in the province are taking to the strain, it is found impossible to supply the demand for good bull calves. The superintendent of the farm, in his report of the work accomplished in 1922, says that the foundation of the herd, which is now fully accredited, was a small importation from England twenty years ago, and that the herd was transferred from Ottawa twelve years ago. Since then, the milk producing ability of the herd has been developed and uniformity of type greatly improved. Bulls of good milk producing ancestry, in themselves good individuals both in regard to beef type and milk production, are used. Poor females are rigidly culled. At present the herd numbers seventy animals of excellent quality.

Further Irrigation Plans

Farmers in the district of Raymond and Magrath are forming an irrigation district to bring 60,000 acres under irrigation. They will apply to the government for enabling legislation, and for the guaranteeing of the bonds of the district. Work on the Lethbridge Northern irrigation district is rapidly nearing completion, and it is expected that water will be turned into some of the ditches this year.

She Received Great Benefit From Them

THAT'S WHY NOVA SCOTIAN LADY RECOMMENDS DODD'S KIDNEY PILLS

Mrs. Leo Gaudett Found Relief and Tells All Sufferers to Use Dodd's Kidney Pills.

Saulnierville Sta., N.S.—(Special).—The value of Dodd's Kidney Pills as a household remedy is shown by the following statement of Mrs. Leo Gaudett, a well known resident here.

"I suffered with kidney trouble," Mrs. Gaudett states, "I took Dodd's Kidney Pills and have received great benefit from them. I think they are very good."

What Mrs. Gaudett states is all that has ever been claimed for Dodd's Kidney Pills—that they are good for sick kidneys. The road to good health lies through the kidneys. If they are kept strong and well, all the impurities are strained out of the blood. If they are weak and out of order the impurities stay in the blood and disease is the sure result. Dodd's Kidney Pills keep the kidneys in good condition to do their work of cleansing and purifying the blood.

Ask your neighbors if Dodd's Kidney Pills do not make sound, healthy kidneys.

Okanagan Valley Fruit

Over two and a half million boxes of apples were shipped out of the Okanagan Valley in 1922, an increase of eighty thousand boxes over the previous year. In addition there was shipped in 1922, 251,820 boxes of crab apples; 86,354 boxes of pears; 111,006 crates of plums; 155,309 crates of apricots; 109,091 crates of cherries; 9,638 crates of raspberries; 9,135 crates of strawberries; other fruits, 12,471 crates.

Heavy Grain Production For Last Year On The Western Indian Reserves

That the Indians on the western reserves are advancing and are adapting themselves to the new conditions where they are not dependent alone on hunting and fishing, is told by Dr. Duncan C. Scott, Deputy Superintendent of Indian Affairs, in a recent number of Natural Resources."

"When the bison disappeared from the western plains of Canada, the Indians, about thirty thousand in number, became a charge on the people of Canada. There were some persons who held that nothing better was to be expected than that the red men would have to be rationed and cared for by the Government as long as any of them remained. The Department of Indian Affairs, however, believed that, given opportunity and training, the Indians would in time become self-supporting, and thus an asset instead of a liability of the Dominion.

"In the nearly forty years that have passed since the Indians of the prairie provinces had to change their mode of living, the officers of the department have steadily labored to bring this about, often in the face of misunderstanding and discouargement. However, the efforts of the Indian industrial schools and the training given by the farm superintendents on the reserve have had their effect and today the outlook is most encouraging.

"The Indians in the west are not dying out, but are very gradually increasing in numbers and the results of their farming operations in 1922 show how far they have advanced in the way of self-support and independence. In the three prairie provinces of Manitoba, Saskatchewan and Alberta, Indian farmers harvested 745,569 bushels equally divided between wheat and oats. In addition to this total of well up to threequarters of a million bushels of grain, the Indians produced more than 70,000 bushels of potatoes and 47,280 tons of hay. They also summerfallowed so much old land and 'broke' so much new land that it is expected that they will have a larger area under crop this year than last. In the way of livestock, they own 18,000 horses and have over 28,000 head of cattle. They leased 200,000 acres of land for grazing purposes.

"Large as these figures are in the aggregate, they are all the more important when it is remembered how short is the time which the Indians have been farming. These gratifying results are both a reward of the faith of those who planned and carried out the training system and also a promise of still greater things in the future.

"When Hon. Charles Stewart, Minister of the Interior, who is also head of the Department of Indian Affairs, and Mr. Duncan C. Scott, the Deputy Superintendent General, visited a number of the western reserves on a tour of inspection last autumn, harvesting was in progress and they were struck with the big crops being garnered and also with the efficient farming methods used by many of the Indians, especially those who had been trained in industrial schools. They felt sure that the final returns would show good results for the season's operations, and the figures given above amply confirm their expectations."

It's awfully hard to find your confidence after it has been misplaced.

Be a reformer if you will, but begin on yourself.

Migrating to Canadian Prairies

Romance in the Game of Settling Farm Lands

(By G. C. Porter of Winnipeg).

St. Paul, Minn.—There is romance in the game of settling farm lands from the viewpoint of this section of the United States. It was through this gateway that the Dakotas, Montana, Minnesota and Wisconsin received their crowds of homeseekers, the majority from abroad, Central Europe and Scandinavian countries supplying unusual quotas, and it comes natural for the second generation of these pioneer people to migrate to the Canadian prairies and repeat the experiment in cheap lands. In other years these states have supplied the cream of the movement northward and there are many indications that the movement from this section will be heavy this year toward the Canadian prairies.

R. A. Garrett, a veteran of the service and a keen mentality, is in charge of the St. Paul immigration station for the Dominion Government, while George Cook is the agent at Watertown, S.D., and W. E. Black is handling the Canadian Government's immigration business at Fargo, N.D. A. H. Davis is in charge of the Natural Resources Branch of the Canadian National Railways at St. Paul, and J. N. K. Macalister performs a similar duty for the Canadian Pacific Railway here. These gentlemen are very optimistic over the prospects of immigrants and land buyers going north this spring. Their estimates of increased prospects vary from fifteen to thirty per cent. Mr. Davis went so far as to tell me that his inquiries and prospects are better today than they have been during the past seven years and all agreed that the inquiries for land to buy, rent and homestead on the prairies and British Columbia were of a volume to be most promising.

Independent dealers in Canadian farm lands, of which there are many in these three centres of activity, are not so enthusiastic though they admit that prospects of doing business north of the line this season are better than for some years. I have been told by these independent salesmen, who represent a very considerable element of the speculators, that the wild land tax on the prairies has made many of the American investers shy. They claim they can't interest the man who wants to buy large blocks of farm lands on the prairies or in British Columbia for purely speculative purposes on this account. Their business today is confined more to that class of people who want to buy improved farms on which to live in Canada.

Every dollar spent in your home town is a boost for the community.

THE CRESTON REVIEW

Issued every Friday at Creston, B.C. Subscription: $2.50 a year in advance. $3.00 to U.S. points.

C. F. HAYES, Editor and Owner.

CRESTON, B.C., FRIDAY, JUNE 29

School Meeting

This year's annual meeting of Creston School District will be held at the schoolhouse on the evening of Saturday, July 14th. We are asked to make this announcement in good time in order that all the ratepayers may so arrange things to be able to attend.

With the possibility of $10,000 being required to carry on school affairs with the next twelve months the trustees are quite anxious that the taxpayers should be on hand to ascertain directly just why such a large sum should be required, as well as to inform themselves on the other phases of Creston's school life.

By getting thoroughly acquainted with affairs this year will simply matters a year hence, at which time, if the present increase in population is maintained, it will most likely be needful to add an other room to the existing public school accommodation.

The trustees are most anxious to conduct school affairs, insofar as it is possible, in accord with the wishes of the majority of the ratepayers, and the best possible time for all concerned to exchange views and absorb information is at the annual school meeting.

This annual session will be your best opportunity to get all the firsthand information you may desire and the fair thing to do is to be present and give the incoming trustees the benefit of anything you may have for the good and welfare of local education. Street talk after the annual meeting is seldom relished and less often beneficial.

And don't overlook the fact that these observations are as applicable to the rural school meetings as they are to Creston.

Forgetful Electors

When it comes to getting names on the provincial voters list there are a whole lot of people in the same category as the Hibernian who on arriving at the wharf about a minute after the boat had pulled out, and on being remonstrated with for not running fast enough to catch the steamer, retorted that he ran fast enough, but did not start soon enough.

Although legal notice had been given by advertisement in the Review every week for at least a month previous that the final day for adding names would be June 19th, it was remarkable the number that landed along on Wednesday to have their names recorded and had to go home disappointed.

Under ordinary circumstances there would be no need to comment on the incident, but at this particular time every name from Creston Valley showing on the new list will help some, possibly, in the creation of a new Creston constituency when the province is redistributed for election purposes at this fall's session of the legislature.

Just at present it looks as if the Kaslo end of the riding may be merged with Slocan, and with a heavy voting strength at this end there is a possibility of a new riding with Creston as the centre being created. In the absence of this considerable body of voters Creston may be forced into some other constituency; Trail having already been suggested as our new electoral abode.

Church Figures

A feature to discussion on the United Church, which have been many before and since the three to one vote in favor of union by the Presbyterian General Assembly early this month, was the entire absence of consideration of the Congregational side of the merger—this denomination being a third party to the union.

The recent issue of the Canadian census bulletin giving the religions of the people probably explains why the Congregationlists got hardly even passing notice.

According to this document the total membership in the Congregational Church in Canada is only 30,574. The Presbyterians lay claim to 1,408,812, and the Methodists number 1,158,744.

Should these threedenominations when fused in the United Church number the membership shown in the 1921 census it would mean a showing of almost 30 per cent. of Canada's population, which is given at slightly over 8,000,000.

In Canada's religious census the Roman Catholic Church leads with a total of 3,383,000 members and adherents, the Anglicans having third place 1,407,950. The Methodists are fourth, and then came the Baptists with a total of 421,000.

Following up Canada's population, denominationally considered, on a percentage basis the heaviest gains were made by the Church of England, the figures being sixteen per cent., as compared with twelve and one half per cent. in the census of 1901. On the other hand the heaviest losers were the Methodists, as in 1901 seventeen per cent. of the people belonged to that faith, while in the last census the figures are shown to be just a trifle over thirteen per cent. According to this bulletin there are in Canada 13,826 members of the Christian Science church, of whom over a third are in Ontario. Of Jews there are 125,000 enumerated, 47,000 being credited to Ontario and another 47,000 to Quebec, the remainder being pretty evenly divided among the other Provinces.

The Mormons appear to be holding their own but no more, there being less than one-quarter of one per cent. of the population members of this church, while it is to be noted that the Holy Rollers are down to a membership of 58. Many sects are mentioned in the bulletin of which most people never heard. For instance the Big Church Daniel's Band, First Christ Church, Followers of Jesus, Church of First Born, Holy Worker, Lot of Jesus, Saved by Grace, Solomon Reformists, and so on through a long list, all of which have trifling memberships.

Advertised Creston

To judge by the amount of publicity of one sort and another that Creston has got this season in connection with the organization of the Associated Growers of B.C., Limited, one could hardly help coming to the conclusion that the Valley occupied a strategetic position that gives the local tonnage an importance very much out of proportion to its bulk.

And the end of the advertising is not yet. Early this month Manager Pratt found it necessary to give out a carefully worded statement to all the papers in the Okanagan denying that he had, while at Creston, told the growers here that Jonathans would not be shipped this year.

In this connection Mr. Pratt assures that much of the McIntosh Red crop will be shipped into the United States so as to relieve the Canadian market of an over supply and thus leave the road open for British Columbia Jonathans.

Whether Mr. Pratt actually said Jonathans would not be shipped is not material, but certainly that is the impression his remaaks left with those with whom he was in conference—and he is not the only one to come out of the Okanagan carrying the same tale.

Everyone will be glad to know that Jonathans are not blacklisted as well as to hear of the special selling policy that is to be inaugurated to assure them of a place on the Canadian market.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may pool for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivating 5 acres, before receiving Crown Grant.

Where pre-emptor is prevented not less than 1 years, and has made proportionate improvements he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 3 years, and improvements of $10.40 per acre, including 5 acres cleared and cultivated, and residence of at least 5 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial plant on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons living on lands qualifying with his Majesty's forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as compared with one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 12, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and paid since June 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied forces on active service, acquired direct from private vendors, reduced to 5 per cent. [illegible]

SUB-PURCHASERS OF CROWN LANDS.

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, securing rights from purchasers who failed to complete purchase, involving forfeiture, on fulfilment of conditions of purchase, interest and taxes. [illegible] over whole [illegible]. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of British Columbia's ranges provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers owned; priority for established owners. Stock-owners may form Associations for range management. Fees, or partially free, permits for personal use of settlers, up to ten head.

Creston Hears of Govt. Mistakes

The Grand Theatre was comfortably filled on Tuesday night for the Conservative Association meeting, which was addressed by Hon. W. J. Bowser, leader of the opposition; J. W. Jones of Kelowna, member for South Okanagan; J. H. Schofield, M.P.P., Trail, and Col. Fred Lister, the local representative in the provincial legislature; with Major Mallandaine presiding.

Col. Lister complained that in the house no attention was paid him when he tried to do something for his constituents, and likewise the different ministers ignored him on their visits to Creston, and for these reasons he felt he was not doing as much for the Kaslo riding as he might under more favorable circumstances. Col. Lister admitted some credit was coming the Oliver administration for its hard surface road making and for the building of the new bridge at Canyon, but the colonel was most emphatic in saying that the Valley roads were fifty per cent. worse than when he came here in 1919, and he was quite certain that in 1919 local highways were fifty per cent. worse than they were in 1916.

J. H. Schofield, whom many will recall as representing Creston when this district was in the Ymir riding, opened in pleasing fashion by recalling the kindly reception and big vote he got here at the start of his legislative career. He still appreciated that consideration and observed that Creston now really had two members at Victoria as he was always active in supporting Col. Lister in his efforts to safeguard the interests of the Valley electors. Mr. Schofield directed attention to the fact that the Oliver administration was notorious for not keeping its promises and that General McRae would be equally unreliable, therefore in the unsatisfactory state of affairs that existed the member for Trail urged all to support the Conservative party that had never yet made a promise that had not been kept.

Mr. Jones' opening remarks paid tribute to the creditable showing the Valley had already made in the realm of horticulture, and after his motor trip from Sirdar to Lister, with stops at various points he was convinced that the future would prove equally bright.

He very much regretted the serious depression that existed in the fruit industry; better things surely might be looked for when it is remembered that the province has a farmer premier and a farmer minister of agriculture. With men of foresight and greater business ability the agricultural industry of British Columbia should be more flourishing, and certainly of sufficient dimensions to supply the home market which last year imported over ten million dollars worth of butter, pork and mutton alone.

Mr. Jones condemned the premier for not making the 50 per cent. reduction on the fruit tree assessments effective on this year's taxes. This, Mr. Jones, stated had been promised in the legislature last December.

Confining his remarks almost wholly to the agriculturists present Mr. Jones produced an array of figures to show why it had been necessary to raise taxes. Five million dollars was required to meet the interest on the province's debt. Another three million was required to pay civil servants. The land project in South Okanagan that was to cost hardly more than a million had taken three millions and the end was not yet.

In 1916 the debt of the province was about nineteen millions, today he asserted it was almost sixty two millions. But little more than a million dollars were spent on roads and Mr. Jones claimed that practically the whole of this sum was taken in in motor licenses. Bankruptcy stares British Columbia in the face, according to Mr. Jones, unless an end is made of the carnival of extravagance, and the remedy must be applied at the next election by replacing the Oliver government by one headed by W. J. Bowser.

Mr. Bowser opened with a reference to the evidences of progress and prosperity that he noted in Creston since his visit two years ago, which was strikingly reflected in the Grand Theatre which he assured equalled the best halls he had yet spoken in, and was certainly a credit to the town and very eloquently bespoke the confidence the owner of the Grand had in the future of Creston.

He also paid tribute to the usefulness of Col. Fred Lister, whom he described as one of the most useful members on the Conservative side of the house.

He dealt with the freight rates question at some length, commending the premier for laboring in a good cause, though Mr. Oliver is not the original champion of the cause of lower freight rates. The good work was started in 1901 by the Dunsmuir administration, whilst no one had labored more unceasingly or effectively in this effort than the McBride government of which he had been a member.

Mr. Bowser paid tribute to the services rendered by the C.P.R. in develeping the province and claimed that some of the harsh criticism Mr. Oliver was according the Canadian Pacific Railway was not justified. Mr. Bowser strongly advised Premier Oliver to have his Liberal friends at Ottawa lower the rates on the Canadian National and the C.P.R. would have to follow suit.

Mr. Bowser was humorous in dealing with the Liquor Act, describing the processes used in making some of the brands of so called Scotch whiskey handled by the Liquor Control Board, the system of putting the "kick" into it with electricity rather than by the usual ageing process evoked the laughter of the crowd.

Mr. Bowser pointed out that while there were not more than a dozen brands of really good Scotch whiskey the Liquor Control Board was retailing 64, and that in the making of these half hundred inferior brands government friends were making enormous profits that liquor store patrons were paying.

Mr. Bowser had some figures to show that in road expenditures the Kaslo riding was not getting justice. Delta constituency, he pointed out, with 39 miles of road had a grant of $343,000 last year, whilst Kaslo with 256 miles got about $54,000.

Mr. Bowser believed that all were convinced that it was not safe to let the present administration continue in office much longer. He believed that from the experience he had had in previous governments along with the lessons he had learned while in opposition fitted him to again assume the responsibilities of office.

(Continued)

"Yes," he nodded. "I believe it is."

"Somebody was here with Race?" Her voice was a blend of attempted confidence with distressing doubt.

"My dear, I have painful news for you. . . ."

"With Gordon?" The question was almost a sob. "Who, father? Dorothy Purnell?"

Helen dropped into a chair, and going to her, the Senator placed his hands on her shoulders. She looked shrunken, years older, with the bloom of youth blighted as frost strikes a flower, but even in the first and worst moments of her grief there was dignity in it. In a measure Race Moran had prepared her for the blow; he, and what she herself had seen of the partisanship between Dorothy and Gordon.

"You must be brave, my dear," her father soothed, "because it is necessary that you should know. Race came upon them here last night, in each other's embrace, I believe, and with the girl's help, Wade got the upper hand."

"Are you sure it was Gordon?" Her cold fingers held to his warm ones as in her childhood days, when she had run to him for protection.

"His quirt is there on the desk."

"But why should they have come here, father—here of all places? Doesn't that seem very improbable to you? That is what I can't understand. Why didn't he go to her house?"

"For fear of arrest, I suppose. Their reason for coming here, you have half expressed, Helen, because it offered them the safest refuge, at that time of night, in Crawling Water. The office has not been used at night since we rented it, and besides Moran has been doubly busy with me at the hotel. But I don't say that was their sole reason for coming here. The safe had been opened, and doubtless their chief motive was robbery."

She sprang to her feet and stood facing him with flaming cheeks, grieved still but aroused to passionate indignation.

"Father, do you stand there and tell me that Gordon Wade has not only been untrue to me, but that he came here at night to steal from you; broke in here like a common thief?" Her breast heaved violently, and in her eyes shone a veritable fury of scorn.

The Senator met her outburst gravely as became a man in his position. He spoke with judicial gravity, which could leave no doubt of his own convictions, while conveying a sense of dignified restraint, tempered with regret.

"He not only did so, my dear, but he succeeded in escaping with documents of the greatest value to us, which, if prematurely published, may work us incalculable harm and subject our motives to the most grievous misconception."

She lifted her head with so fine a gesture of pride that the Senator was thrilled by his own paternity. Before him, in his child, he seemed to see the best of himself, purified and exalted.

"Then, if that is true, you may do with him what you will. I am through."

He knew her too well to doubt that her renunciation of Wade had been torn from the very roots of her nature, but for all that, when she had spoken, she was not above her moment of deep grief.

"My little girl, I know—I know!" Putting his arms around her, he held her while she wept on his shoulder. "But isn't it better to find out these things now, in time, before they have had a chance to really wreck your happiness?"

"Yes, of course." She dried her eyes and managed to smile a little. "I—I'll write to Maxwell to-day and tell him that I'll marry him. That will please mother."

It pleased the Senator, too, for it meant that no matter what happened to him, the women of his family would be provided for. He knew that young Frayne was too much in love to be turned from his purpose by any misfortune that might occur to Helen's father.

CHAPTER XIV.

A Dastard's Blow

At about the time when Rexhill was freeing Moran from his bonds, Wade and Santry, with rifles slung across their backs, were tramping the banks of Piah Creek. In the rocky canyon, which they finally reached, the placid little stream narrowed into a roaring torrent, which rushed between the steep banks and the huge, water-worn bowlders, with fury uncontrolled.

Neither of the cattle men greatly feared the coming of a second posse, at least immediately, but for the sake of prudence, they went armed and kept a careful watch. Wade mounted guard while Santry, who in his younger days had prospected in California, squatted over a sandy, rock-rimmed pool and deftly "washed out" a pan of gravel. One glance at the fine, yellow residue in the bottom of the pan decided him. With a triumphant yell that echoed and re-echoed through the gorge, he sprang to his feet.

"Whoop-e-e-e! I've struck it!" he shouted excitedly, as Wade ran up to him. "Look here!" The old man held out a small handful of the yellow dust.

Wade drew a long breath.

"Gold! It's true, then!"

"You betcher, and it's the richest pay-dirt I ever met up with. No wonder Moran has been willin' to do murder to get a-holt of this land. You're a rich man, boy; millionaire, I reckon."

"You mean that we are rich, Bill." The younger man spoke slowly and emphatically. "Whatever comes out of here"—he waved his hand toward the creek—"is one-half yours. I decided on that long ago. Never mind asking me why." He clapped Santry on the back. "It's because we're partners in fact, if not in name. Because you've stuck with me through all the lean years. That's reason enough."

The old plainsman carefully emptied the dust back into the pan before he said anything.

"Have you gone clean crazy?" he finally demanded. "Givin' away a fortune like it was the makin's of a cigaroet? "If you have, I ain't. This stuff's yourn. I'm not sayin' that I won't take a ounce or two, maybe, of this here dust, for old times' sake, if you offer it to me, but that's all." His wrinkled face twisted into a grin. "You'll be needin' it all one o' these days to pay for your honeymoonin', if I read the signs right. Ain't that so, son?" He laughed softly as Wade flushed. "Shake, boy! Put 'er there! I wish you all the luck that's comin' to any white man, by the great horned toad, I do."

During the whole of the morning they examined the creek bed and they found signs of the yellow metal almost everywhere. At one point, Wade broke a knob of rock from the face of the cliff, the under surface of which was seamed and streaked with golden veins. Santry could scarcely restrain himself; usually taciturn, he was for once as light-hearted and joyous as a boy. But on the way back to the ranch-house he became serious.

"Say, ain't the bulk of that lode on that forty-acre tract that you took up as a timber claim?" he asked.

"Yes," Wade answered. "That is, I think so. We can run over the lines this afternoon and make sure."

"I reckon we'd better make sure, and if it is, you'll have to lay low until you get your deed. Your homestead rights might be hard to claim now that there's mineral in the ground. Moran'll most likely keep his mouth shut for reasons of his own, and he may not know about your not havin' proved up yet, but some other jasper might get wise."

"I don't think any one around here would contest my right to the land, Bill," Wade replied thoughtfully. "Still, as you say, we'd better be careful. The gold will keep. We haven't heard the last of Moran and his crowd yet, not by a jugful." He chuckled grimly. "I wonder if anybody's cut him loose yet."

"I reckon they have, boy. He'll keep monkeyin' around this territory until he meets up with some feller like me, with a bad temper and a quick gun hand, who'll make him good the same way we useter make good Injuns. Hullo, steady!"

Although they were now in sight of the house and the men hanging about it for the noon-day meal, Santry had not relaxed his caution and his eyes had picked out two moving dots in the distance, which presently developed into galloping horses. He smiled instantly.

"Can't be nobody lookin' for trouble," he observed, and preesntly his eyes twinkled. "Take a good look, boy. I reckon you know one of 'em, anyhow."

The horses came on rapidly, until upon the foremost of them Wade could see the fluttering skirt of a woman, while the other he recognized as belonging to Lem Trowbridge even before he could clearly make out the rider.

"Tell the cook we'll have company to dinner," Wade called to Santry as he untied a horse from the hitching rack near the barn and rode off to meet the newcomers.

With fine prescience, Trowbridge, when he saw him ride toward them, drew his horse down to a walk, and so was directly in the rear when Dorothy and Wade met.

"Mighty glad to see you," he greeted her, "but that goes without saying."

"Thanks," she responded, hoping that he would attribute the heightened color of her cheeks to the exertion of the ride. "We thought we'd ride out to see how you were getting along."

Despite her blush, that had come at the recollection of his kiss the night before, she still looked him straight in the eyes, but with a sweet humility, an attitude of surrender, which he understood and which touched him. There was nothing bold about her look, but an engaging womanliness, which would have appealed to any decent man, even while it stirred his pulse. She wore a wide felt hat, from beneath the brim of which her hair floated, shaken out of its moorings by the jolting of her gallop. A flannel blouse, which was most becoming, and a divided skirt completed a sensible costume, which seemed to Wade more attractive than any he had ever seen in the East. She rode with the straight stirrups of the cattle country, and sat her mount with the grace of a born horsewoman.

"What's happened to Moran?" he asked, waving his hat to Trowbridge, as the latter rode toward them.

"He's out and around again. I saw him this morning. He was an awful sight. You must keep your eyes open, Gordon, really you must. He'll be more dangerous than ever now."

"Oh, I guess we've clipped his claws for a while," he said lightly, unwilling that she should be anxious for his safety, sweet though he found her sympathy to be. "Hello, Lem!"

"Hello, yourself!" They shook hands, the firm handclasp of strong men, and then all three rode on together to the house.

After dinner, the plainness of which meant nothing to such appetites as their outdoor living had aroused, they sat on the porch, the men over their cigarettes and Dorothy quite content in the contemplation of the sweetness which her heart had found.

"How are things going on your place, Lem?" asked Wade.

"Badly, Gordon. That's one reason I rode over to see you. Have you heard about the fight on my range? You haven't?"

(To be continued)

WOMAN SUFFERED FOR MONTHS

Weak and Nervous. Made Well by Lydia E. Pinkham's Vegetable Compound

Webbwood, Ont.—"I was in a very weak and run-down nervous condition, always tired from the time I got up until I went to bed. Sleep did not rest me at all. My sister recommended Lydia E. Pinkham's Vegetable Compound to me and others told me about it, but it was from my sister's advice that I took it. It did not take long until I felt stronger, headaches left me and my appetite came back to me. I am a farmer's wife and have many things to do outside the house, such as milking, looking after the poultry, and other chores. I heartily recommend the Vegetable Compound to all who have the same trouble I had, for it is a fine medicine for women."—Mrs. Louis F. Elsasser, Hillcrest Farm, Webbwood, Ont.

Another Nervous Woman Finds Relief

Port Huron, Michigan.—"I suffered for two years with pains in my side, and if I worked very much I was nervous and just as tired in the morning as when I went to bed. I was sleepy all the day and didn't feel like doing anything, and was so nervous I would bite my finger nails. One of my friends told me about Lydia E. Pinkham's Vegetable Compound, and it helped me so much that I soon felt fine."—Mrs. Charles Beeler, 501-14th St., Port Huron, Mich.

Women who suffer from any feminine ailment should try Lydia E. Pinkham's Vegetable Compound.

An Oil that is Famous.—Though Canada was not the birthplace of Dr. Thomas' Eclectric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

Million Dollar Bank Structure

Announcement has been made that a banking syndicate of Cleveland, Ohio, has planned to erect a 14-storey building in the downtown section of Toronto. The structure will cost $1,000,000, and the ground floor will be occupied by a bank, while the upper section will contain clubs, banking interests, etc.

Britain Buys Canadian Cars

According to reliable information Canada supplied 1,534 of the 2,025 automobiles imported by Great Britain during the month of January, as compared with 216 furnished by the United States. 205 by France and 49 by Italy.

Praises this Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

A strong white fibre, of greatest importance to textile industries, is now obtainable from the beans of pineapples.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

The deposits of nickel near Sudbury, Ont., were discovered in 1885 by Mr. McConnell, while looking for tie-lumber for the Canadian Pacific Railway, then in course of construction.

A Feed Test

Experiment With Corn and Sunflower Silage For Growing Heifers

Among other experiments with cattle at the Dominion Experimental Farm, Brandon, Man., one was conducted to ascertain the relative value of corn and sunflower silage as a feed for growing heifers. Fourteen heifers were divided into two equal lots. At the end of the first four weeks, the heifers fed sunflower silage with their ration were given corn silage, and the lot having been given corn silage were given sunflower silage. It was noted that when this change was made the heifers fed sunflower silage took more readily to the corn silage than the corn lot did to the sunflower silage. Both lots when on sunflowers failed to consume all roughage. In the first period of four weeks, the heifers on corn silage made an average daily gain of .31 pounds over those on sunflower silage, and in the second period of three weeks, the lot on corn silage made an average of .38 pounds gain over the lot on sunflower silage. A similar test on the Brandon Farm the previous year, over a period of twelve weeks, gave an average increased daily gain of .46 pounds for corn over sunflower silage.

Children Cry for Fletcher's
CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS
Bears the Signature of
Chas. H. Fletcher
In Use For Over 30 Years
THE CENTAUR COMPANY, NEW YORK CITY

Colds Stopped In Ten Minutes

There is a new remedy that is very pleasant—it fills the nose, throat and lungs with a healing balsam from the pine woods, and utilizes that marvelous antiseptic of the Blue Gum Tree of Australia.

The remedy is "CATARRHOZONE"—and you can't find its equal for colds, coughs or catarrh.

Composed of medicinal pine essences—a remedy of nature, that's what CATARRHOZONE is, and you'll find it mighty quick to act and certain to stop your cold.

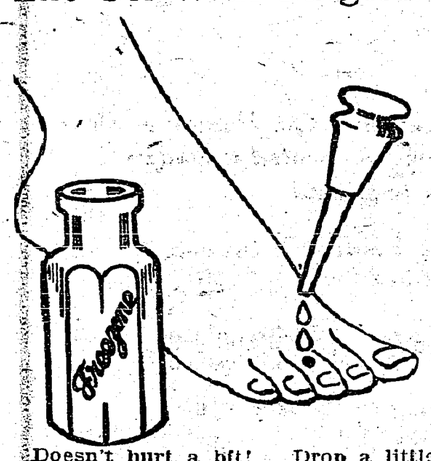
Don't dope your stomach with cough mixtures — use CATARRHOZONE, which is scientific and certain; it will act quickly. Two months' treatment guaranteed, costs $1.00; small (trial) size 50c. Sold by druggists everywhere. By mail from The Catarrhozone Co., Montreal.

Burglar Alarm Takes Photos

An instrument designed especially for jewelry establishments has been invented that will not only raise the alarm in case of burglars but will photograph the intruders as well. Experiments have been conducted successfully both by day and night.

CORNS

Lift Off with Fingers



Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn betwen the toes, and the calluses, without soreness or irritation.

New Passenger Service to Ireland

Inauguration of a new passenger service from Canada to Ireland, with weekly calls at Belfast by the Canadian Pacific liners, is announced for the opening of the St. Lawrence navigation. Westbound calls at Belfast will be made as in the past, which service is stated to have proven very successful.

MRS. ERNEST MORRIS

Canadian Mothers Have Healthy Children

WHY? READ THIS!

London, Ont.—"Dr. Pierce's Favorite Prescription was so beneficial to me that I feel it my duty to send this statement for publication, so that it may be of help to other young mothers. During my last expectant period I felt just miserable, nauseated so that I could not retain my food, my back ached and I just seemed to ache and pain all over. Doctor Pierce's Favorite Prescription put me in perfect physical condition. I was able to eat my meals without that awful sick feeling and I kept well and strong right up to the last. My baby seemed to be benefited, too—was as strong and healthy as a baby could be. I think so much of Dr. Pierce's Favorite Prescription as an aid to nature in motherhood that I would not go thru expectancy without its help."—Mrs. Ernest Morris, 3 Webb St.

Go to your neighborhood drug store at once and obtain this Prescription of Doctor Pierce's, in tablets or liquid, or send 10 cents to Dr. Pierce's Laboratory, Bridgeburg, Ont., for trial pkg. tablets.

Supplies Microbes to Scientists

Doctor in England Cares for 1,500 Different Varieties

The largest collection of microbes in the world is housed in the Lister Institute, Chelsea Bridge, where Dr. St. John Brooks, nurses them with the care of a mother for her children. He has 1,500 different varieties growing in little glass tubes. They are sent all over the world to scientific investigators, and during the past year 300 new species have been added to the collection.

To one species, the bacillus tularense—so dangerous that its culture had to be discontinued—the curator, Dr. Brooks, with his assistant, Miss M. Rhodes, and Dr. Schultz all fell victims recently. The disease is unknown in this country, but in the United States all laboratory workers who tried to cultivate the microbe suffered from the disease of tularaemia, which is very protracted, but rarely fatal to man. It is a form of blood poisoning, due to multiplication of the tularense microbe in the blood.

NERVOUS TORTURES

Irritation by Day and Sleeplessness at Night the Result

There is no torture more intolerable than nervousness. The sufferer starts at every noise, is shaky and depressed. The least thing produces a feeling of irritation, and nights are often sleepless. Often although in a completely exhausted condition, the patient is unable to sit or lie still. The nerves are in this jaded condition because they are being starved by poor, watery blood and to restore them to a normal condition the blood must be made rich, red and pure. For this purpose no other medicine can equal Dr. Williams' Pink Pills. They act directly upon the blood; they bring to it the elements necessary to enrich and purify it, thus bringing new health and strength to run-down, nerve-worn people. There is no doubt about this; thousands have testified to the blood-improving, nerve-restoring qualities of these pills, among these is Mrs. Aubrey Coldwell, Melanson, N.S., who says:—"I was badly run down and my nerves were in a terrible condition. I would start at the least sound and often faint away. I could not sleep at night, and only those who have been in a similar condition can tell what I suffered. At my mother's request I began taking Dr. Williams' Pink Pills, and after taking them for several months I am surprised at my present condition of good health. My nerves are as sound as ever; I can sleep well and eat well, and have no more fainting spells. I can only say that I cannot praise Dr. Williams' Pink Pills too much for what they have done for me."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Double Freight On Weed Seed

Where the Farmer Loses at Every Point of the Game

During the winter, it is claimed, Alberta farmers brought in from Ft. William nearly sixteen million pounds of screenings, say 230 carloads, to use as feed for stock. There could hardly be a more striking illustration of the loss that is involved in shipping uncleaned grain out of the province and bringing back the refuse from the distant elevators. It is a safe estimate that as many carloads of screenings were shipped from Alberta to Ft. William—mixed with the marketable grain—as were imported from that point. The farmer paid for the eastward haul of this feed-stuff clear across the prairies in the dockage that was charged against him because his grain was not cleaned. He paid for the return haul when he later on brought back a carload of screenings from his own or some other farmer's grain, and he paid for the screenings a price sufficient to cover the cost of cleaning the grain. That is to say; the farmer first gave away the weed seed and inferior kernels in the grain that he delivered to the local elevator, paid the railways to haul them to Ft. William and back again, and paid the terminal elevators for them. That looks like losing money at about every possible point of the game. If Alberta grain were cleaned in Alberta the farmers of the province would secure the refuse at the cost of the elevator charges, and would be in pocket the freight charges to Ft. William and back. Incidentally, we would in that case be keeping Alberta weed seeds at home, instead of shipping them abroad and importing carloads of other—and perhaps worse—weed seeds from Saskatchewan and Manitoba.—Edmonton Bulletin.

Minard's Liniment for Distemper

Don't Neglect Your Skin

Ladies—A few days' treatment with CARTER'S LITTLE LIVER PILLS will do more to clean up the skin than all the beauty treatments in creation. An imperfect complexion is caused by a sluggish liver.

CARTER'S LITTLE LIVER PILLS

Millions of people, old, young and middle age, take them for Biliousness, Dizziness, Sick Headache, Upset Stomach and for Sallow, Pimply and Blotchy Skin. They end the misery of Constipation.

Small Pill—Small Dose—Small Price

Household Hints

Valuable Recipes For the Busy Housewife.

Excellent Lemon Mincemeat

½ cup shortening, 2 large lemons.

1 teaspoon powdered cinnamon, 4 apples.

1 teaspoon powdered ginger, 2 cups currants.

1 teaspoon salt, ½ cup chopped nut meats.

¼ pound chopped and candied lemon peel.

½ teaspoon powdered all-spice.

½ teaspoon grated nutmeg, 1¾ cups sugar.

¼ teaspoon powdered cloves.

¼ cup Sun-Maid seeded raisins.

Extract juice from lemons and remove pips. Now put lemons into saucepan, cover with cold water, and boil until lemon feels quite tender. Change water at least twice, drain and peel to a paste, add apples, cored, peeled and chopped, lemon peel, shortening, currants, raisins, salt, spices, lemon juice, nut meats and sugar. Put into a jar and cover. This mincemeat is excellent for pies and tarts. Sufficient for four pies. All measurements are level.

"Down Town Veal Stew"

1½ pounds lean veal.

4 tablespoons vinegar, ⅛ teaspoon ground cloves.

2 teaspoons horse radish.

⅛ teaspoon ground cinnamon seasoning of salt and pepper, buttered bread crumbs.

½ cup Sun-Maid seeded raisins.

Place the veal, which has been cut into inch pieces, in a casserole and stew slowly so that it will cook in its own juice without burning. When it is nearly done, add the vinegar, raisins, cloves, cinnamon, horse radish and seasoning of salt and pepper. Thicken the sauce with the buttered bread crumbs.

A Divorce Granted

After many years of patient suffering, you can be divorced from corns, you can get rid of them completely by applying Putnam's Corn Extractor. This wonderful old remedy acts in 24 hours and never fails. Refuse a substitute and remember "Putnam's" is the only Painless remedy. 25c everywhere.

The Cautious Scot

A Highland ferryman, whose boat, ladened with passengers, was caught in a sudden squall the other day when only halfway across the loch, turned to his "fares" and said:

"It looks bad, and we dinna ken what micht come over us. So we'll just take your twopences noo."

Cuticura Beautifies Skin Hair and Hands

Make Cuticura Soap, Ointment and Talcum your every-day toilet preparations and watch your skin, hair and hands improve. The Soap to cleanse and purify, the Ointment to soothe and heal and the Talcum to powder and perfume.

Soap 25c. Ointment 25 and 50c. Talcum 25c. Sold throughout the Dominion. Canadian Depot: Lymans, Limited, 344 St. Paul St., W., Montreal. Cuticura Soap shaves without mug.

WORLD HAPPENINGS BRIEFLY TOLD

Construction of a provincial highway linking Yorkton and Canora will be commenced this summer.

The Winnipeg City Council voted down, 11 to 6, a motion to introduce daylight saving there.

Dr. F. D. Banting, of Toronto, discoverer of insulin treatment for diabetes received the honorary degree of LL.D. at Queen's University, May 9th.

Hidden under a haystack at Vonda, Sask., an Oldsmobile car owned by Earl S. Farewell, of Saskatoon, which was stolen last October, was found by police.

The Roman Catholic Church at Boston, England, claims the youngest organist in the world. He's Norbert Rouse, aged 10. He has been studying the organ only three years.

Sergt. Bury, Lebourget, France, has broken the world's aeroplane altitude record for a machine carrying 550 pounds cargo. He reached an altitude of 8,250 meters.

Dr. Hendrik Loentz, the Dutch phychist has officially accepted membership on the commission of intellectual co-operation of the League of Nations. He will replace Prof. Albert Einstein, who resigned some time ago.

A Medical Companion To Women Folks

A Healthy System Is Assured Because Regularity is Established

DR. HAMILTON'S PILLS

They Bring the Stomach, Liver and Bowels Into Fine Working Order

Nowadays, Dr. Hamilton's Pills are considered indispensable to every lady's boudoir. They positively remove constipation, and in consequence prevent headache. Best of all, Women who use Dr. Hamilton's Pills can boast of their fine complexion, and certainly do enjoy good spirits and buoyant health. Dryden Sulphate Plant

Extensions to the plant of the Dryden Paper Company have been completed, including a power development at Wainwright Falls. The capacity of the plant will now be 75 tons of sulphate pulp a day. Two-thirds of the production will go into wrapping paper and sulphate building paper.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence, who is infested with worms, can take this preparation without a qualm of the stomach, and will find in it a sure relief and a full protection from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

England has a travelling tailor's shop, something like the auto grocery truck, which goes through the country and stops at the villages on market days and measures customers for suits to be made and delivered later.

Minard's Liniment for Aches and Pains

SAYS IT'S WORTH WEIGHT IN GOLD

Mrs. Matthews Pays High Tribute To Tanlac For Ending Stomach Trouble

"I am so thankful for the wonderful benefits I have received from the Tanlac treatment I just want to tell everybody in Toronto about it," declared Mrs. Ellen Matthews, 104 Eastern Ave., Toronto, Ontario.

"I suffered so terribly with stomach trouble and a run-down condition that I feared nervous collapse. My appetite almost deserted me and even the little I did manage to eat disagreed with me, and I bloated with gas till my heart palpitated and I was dreadfully short of breath. I couldn't get a good night's sleep and was so worn out I couldn't even do my errands to the store.

"I heard so much praise of Tanlac I finally bought a bottle, and it was worth its weight in gold. Six bottles have made me perfectly well, without a sign of the old troubles I had suffered with for seven years, and my weight has been increased, too. I consider it a duty to recommend Tanlac."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37-million bottles sold.

Synthetic Coal

High Grade Anthracite is Produced From Stone Quarries

German science, it is reported, has actually succeeded in manufacturing synthetic coal. The achievement is credited to a Munich pharmacist, Prueckner by name, who is reported to have produced a high grade anthracite from stone quarries. The production of synthetic coal equal in every respect to anthracite, is said to have been established beyond doubt by a number of official practical tests. The process of making synthetic coal is simple, according to the inventor of the method, who is quoted as saying that two different kinds of soft stone are crushed and ground into fine sand and mixed with certain chemicals.

ECZEMA You are not experimenting when you use Dr. Chase's Ointment for Eczema and Skin Irritations. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Ointment free if you mention this paper and send 2c. stamp for postage. 60c. a box; all dealers or Edmanson, Bates & Co., Limited, Toronto.

Clothes pressing, cleaning and repairing promptly done at reasonable prices. Mrs. M. Cannady in the Pearis barber shop, Fourth street.

Certo concentrated fruit pectin, which assures 50 per cent. more jam and jelly at less cost than the oldtime system of jam making, for sale by Mawson Brothers.

Monday will be observed as Dominion Day, and all places of business in town will be closed, with the general delivery wicket at the postoffice open from 5 to 6 p.m. only.

Mrs. M. G. Jones of Kuskanook was here on Saturday coming this far to meet her cousin, Mrs. McKinley of Palo Alta, Calif., who is to spend the summer at Kuskanook.

FOR SALE—Ten 10 frame Langstroth beehives, complete with frames, bottom boards., etc.; some of them have foundations. Practically new. Price $4 each. D. S. Timmons.

C. B. Garland is moving his law office this week from the old stand in the F. H. Jackson building to the chambers on the second floor of the new Imperial Bank block.

Boys, girls and parents who intend going into camp with the Atletic Club next month are asked to at once enroll with Fred Benham, from whom particulars may be obtained.

Mrs. Art. Atkinson and young daughter returned on Thursday from an extended visit at her home in Cranbrook, her mother, Mrs. Doris, coming with her for a few days stay.

Local road fuperintendent Harris has men at work this week extending the sidewalk on Canyon street east to the Grand Theatre, an improvement theatregoers will very much appreciate.

J. D. Siddons, B.A., of the High School staff, left on Monday to spend the summer vacation at coast points. It is expected he will be back in September to resume his old position here.

E. H. Small of the Creston Hotel left on Wednesday for Cranbrook where he joined A. C. Bowness and ethers on a motor trip to Lethbridge, Alberta, and will be gone about a week.

Mr. and Mrs. G. Davidson Mead left at the first of the week for Fernie where George has taken a position and they will make their home in future. Their Creston ranch has been leased by Mr. Bush.

FOR SALE, A SNAP—Lots 12, 13, 14 Block 28, corner Fourth Street, Creston. Price, half of assessed value; small cash payment, balance to suit purchaser. Investigate this. Apply Review Office.

Earl Swanson arrived Sunday and will be in charge of telegraphic work at the C.P.R. depot for at least the next two months. He has been on the despatching staff at Cranbrook the past three months.

The showery weather that prevailed all day Friday and into the evening necessiated the postponement of the ice cream social the Methodists Ladies' Aid had advertised for that night at the R. B. McLeod home.

Carload shipping of strawberries commenced on Wednesday, when the Co Operative Growers at Wynndel shipped their first car east, and will probably have a carload out every other day for the next ten days.

Now that the rain has let up haying operations were resumed on Tuesday, and from all points in the Valley the report comes of the biggest ever crops of both alfalfa and clover—three tons to the acre being common with the latter.

Alex. Mirabelli directs attention to the fact that whilst he is most anxious to keep down the cost of living yet it is quite impossible for him to half sole ladies shoes at 15 cents as in error shown in his advt. this week. The figure should be 75c.

The work train that has been operating between Canyon bridge and Kootenay Landing the past two months making a fill at the latter point completed the job last week. About 1500 feet of new track is provided by the fill.

The showery weather that prevailed nearly all last week came to an end on Monday, since when the temperature has mounted steadily and the Valley is now enjoying regulation end of June weather. Heavy shipments of berries to the jam factory were in evidence on Sunday, but since then the local berry export is mostly to prairie points.

Major Mallandaine got back on Tuesday from New Westminster, where he was last week attending Masonic Grand Lodge. He was defeated on the final ballot for grand junior warden, but was again successful in getting re elected grand senior deacon. W. Bro. W. F. Attridge of Cranbrook, is the new D.D.G.M. for District No 8.

Forty-four candidates are writing on the Entrance examinations at Creston school this week, and of this number twenty-three are from town.

Deer are reported to be unusually numerous. George Mawson and Fred Smith, who were in the Summit Creek country in quest of bear last week, saw several large herds of them, and also report seeing a few caribou. The 1923 game regulations confine the kill of venison to bucks, with a season limit of three, opening September 15th and closing the middle of December.

Due to a late and unexpected arrival of the Wycliffe baseball team on Sunday afternoon a number of the Creston nine thinking the trip had been cancelled were at Kuskanook on motor trips and in consequence the best that could be done was to play the visitors a five-inning match against a mixed team of Creston talent, the Wycliffe aggregation winning by a score of 10 to 4.

John Tait of Nelson, auditor for the the C.P.R. telegraph, was here on an official visit Saturday. Unless there is a let up to the damage boys are doing to the glass insulators on the poles the company will protect themselves by prosecuting all who use their tracks for a highway. In addition to the financial loss sustained damaged insulators are responsible for poor telegraphic transmission.

There was a large and enthusiastic turnout of the tennis fraternity on Monday night for the meeting at the fair grounds at which the formation of a public tennis club was discussed. All present very much favored the move and a committee with Corp. Smith as chairman, assisted by Messrs. Cherrington and Argue and Mesdames McLaren, Cherrington and Bennett were selected to make a thorough canvass of all likely tennis talent and report at a meeting to be held early in July. The meeting favored securing an acre of land to be owned by the club and fitted out for a permanent tennis ground and if the necessary financial support is forthcoming this will be done.

Provincial police McLaren got back from Nelson on Thursday last at which point he had been for a couple of days attending the preliminary hearing of Albin White, a local Indian, who had been arrested here at the first of the week on a charge of being mixed up with the robbery of the Evans house at Proctor in August, 1922. It appears that the Nelson police suspected White of having a hand in the robbery due to his having sold some of the goods at a secondhand store in Nelson last week, and when McLaren searched the White house here more of the stolen property was discovered. The Nelson magistrate sent White up for trial, and he appeared before Judge Forin on Tuesday who allowed him to go on suspended sentence.

BUGGY FOR SALE—McLaughlin top buggy, in good shape, cheap for quick cash sale. Geo. Cartwright, Erickson.
