THE CRESTON REVIEW

Vol. XVII. CRESTON, B. C., FRIDAY, JULY 10, 1925 No. 21

Lister

BIRTH—On July 2nd, to Mr. and Mrs. H. Yerbury, a daughter.

H. Sparrow returned a few days ago from a trip to Yakima, and left again at the first of the week for points south in quest of a steady job. Yakima labor market is well supplied at present.

Ed. Smith is down from Klockmann and expects to spend the balance of July on his ranch here.

Friends of Miss Vera Lister will be pleased to hear of her appointment as teacher of the junior room of Canyon City school when it opens on September 1st. She graduated this year at the Normal at Victoria.

Frand Baker left on Monday for Calgary, Alberta, where he expects to remain for the next few months.

Jas. Duncan is another visitor from Klockmann to his Lister ranch, and will be remaining for a few weeks.

A couple of auto loads of Creston young people invaded Lister on Friday night, when they favored Miss Vera Lister with a surprise party that was largely given over to dancing and an excellent supper

The Horoon and Jennings families of Porthill went through on Friday on a camping trip to Kuskanook, and are accompanied by the Misses Muriel, Hazel and Agnes Hobden.

J. C. Rykert, former customs collector at Rykerts, went through on Saturday, enroute for Calgary Alta., where he is attending a big reunion of members of the old R.N.W.P., of which he was a member in 1873, helping to build the fort at Calgary fifty years ago, which latter event is being royally celebrated at this year's exhibition and stampede.

The annual meeting of the school district will be held at the schoolhouse at 7 p.m. on Saturday, when it will be needful to elect a trustee to replace E. J. Malthouse and an auditor, as F. N. Thompson's term has also expired. The school district is now regularly organized and gazetted and the $200 that will be required for next year will be secured by the ordinary tax levy on local lands.

Wynndel

Bass are plentiful in local waters and all the fishermen report good catches.

Miss Florence Bathie left on Sunday for Cranbrook, where she will visit friends for a while.

Miss Edna Sheppard left on Monday for Winnipeg, Man., to join her father, and expects to make her permanent home with him in that city.

Miss Alice Allan, who has been a guest of Mrs. R. Uri, and helping pack the strawberrp crop, left for her home at Yahk on Sunday.

Quite a number of Wynndel folks took advantage of the first free Sunday since the berry season opened to invade Kuskanook on July 5th, when picnic parties were the order of the day, and this place was quite a deserted village last Sabbath.

Mr. and Mrs. Sparkes of Nelson were visitors here on Tuesday, looking up old friends. They made the trip in a new Studebaker car and left early on Wednesday morning en route for Banff, where they figure to spend the holidays. While here they were guests of Mr. and Mrs. J. J. Grady.

Henry Frasch pulled out on Sunday for North Dakota, where they will make their home in future. Fred Frasch moved his family to Cranbrook on Sunday, where he figures to work until fall, and will probably return here for the winter months.

The Co-Operative Fruit Growers Association rolled their last straight car of strawberries on Sunday, making a total of sixteen cars for 1925. This is a record for Wynndel, thirteen carloads being the largest previous shipment in any one year. Monday's rain helped the berries out a little and there are still a few crates moving, and quite a lot of jam berries yet to be picked.

Two auto loads took in the Fourth of July celebration at Bonners Ferry and afterwards motored on to Sandpoint, Idaho, returning here early Sunday morning thoroughly tired out but reporting one of the finest times ever.

The berry season being practically at an end most of the Doukhobor pickers have returned to their homes at Brilliant. Almost 100 of these were here to help with the berry harvest, besides a big company of white pickers.

H. J. Irving met with a nasty accident one day last week. While riding on a wagon to the skidway to locate some logs the team shied at a car, and their unexpected jump ahead threw him off and one of the wheels went over his wrist breaking some of the small bones. He has gone to Nelson for medical treatment.

Monday, July 6th, witnessed a quiet wedding at Christ Church, Creston, when Miss Norah, fifth daughter of Mr. and Mrs. M. Hagen, was united in marriage with Mr. Reginald Price, also of Wynndel, by the rector, Rev. H. Varley. The bride was supported by her sister, Mrs. D. Butterfield, while Douglas Butterfield supported the groom. Mr. and Mrs. Price left on the afternoon train for Nelson, and at Duck Creek they were greeted by their large company of friends who very generously showered them with rice, confetti and a wondrous variety of discarded footwear.

Sirdar

Mrs. Roy Proctor was a weekend visitor with her parents at Cranbrook.

Although the mosquito nuisance has far from abated there was quite a good turnout at the morning Church of England services at the schoolhouse on Sunday.

Mrs. G. S. Moore and children arrived on Saturday from Cranbrook, and are spending the week with Mrs. Lossby.

W. D. Touhey and son, Billy, left on Monday morning for Vancouver, travelling in their Chevrolet. Mrs. Touhey and son, Bob, left the same afternoon by train. The Touhey's have resided here since 1910 and will be much missed.

The work trains, which have been hauling fill for the trestle at the Landing for the past three months, finished the job on Friday and Saturday and are now on a similar job at Kimberley.

Fishermen are still having a little luck with the sturgeon, Alex. Anderson getting a 35 pounder at the trestle on Friday afternoon last.

Pastor Herdman of Creston United Church is planning to start services at Sirdar shortly, coming the alternate Sunday mornings that do not conflict with the Church of England worship.

Auto tourist traffic is very heavy again. On Sunday ten eastbound cars were unloaded at Kuskanook.

Dick Dennes is the latest Sirdarite to join up with the auto owning brigade, coming in from Creston on Dominion Day with a 1925 model Ford, which he purchased from R. S. Bevan. Although he had had little previous experience at driving he made the trip handily.

Yardmaster Lossby got away on Sunday to Calgary where he is taking in the fair and stampede. 1925 marks the fiftieth anniversary of the R.N.W.M. building the fort and starting what is now the city of Calgary, and very large numbers of the red coats are making that city headquarters this week.

At New Denver the girl guides are willing to do mending, darning, take care of children or other odd jobs in order to earn some money for their summer camp outing.

Trail board of trade has just been advised that $5000 has been provided in the supplementary estimates to secure a site and draw plans for a new postoffice and federal building in that town which will be erected next year.

Alice Siding

There was a round up of the young cattle owned locally on Friday last, and the animals taken out beyond Lister to graze until the high water subsides.

The shipping station at the Smith crossing was closed on Thursday last, after being open for barely four weeks. Raspberry shippers are now compelled to go to Creston.

Miss Tallon of Kellogg, Idaho, was a weekend visitor with Mrs. E. W. Payne, and with her hostess made the trip to Kitchener on Saturday night for the Amusement Club dance.

Mrs. Stace Smith and Miss Ruth and Ronald, are motor visitors to Cranbrook this week, Mrs. Gilletz going on to Banff for a holiday stay.

A splendid surprise party was in evidence at the Webster home on Friday night, when about three dozen friends turned up to enjoy an evening prior to the departure on Sunday of Miss Gladys Webster to Calgary, where she will visit with her sister for a couple of months.

Ratepayers are reminded of the annual school meeting on Saturday night, which is set for 7 o'clock. Mr. Mather is the retiring trustee, and Guy Constable has served out his term as auditor.

Cupid has been active in this section of late, and the 15th should hear the sound of the wedding bells.

A westbound Alberta prairie schooner, with a family of four young children amongst the passengers, has been camped here the past week.

Erickson Wins Sunday's Game

Erickson took Creston's measure measure rather handily at baseball on Sunday afternoon, with the final count standing 9 to 6 in the visitors favor. It was anybody's game up till the eighth inning, Erickson taking the lead in the second frame, only to drop one behind when the fourth stanza was finished, and the three runs the visitors were permitted to gather in the fifth only served to equalize as Creston picked up a couple in the same round to even matters up. Both went scoreless in the sixth, but the seventh was the lucky one for Erickson who by putting Romano in the box after Boffey had forced in one run and still had the bases filled and none out, the relief hurler fanned O. Christie; had I. Staples pop fly to the infield, while Burns took Ogilvie's roller to third and touching the sack forced Joyce to make the third out. Creston had its one bad innings in the field in the eighth when timely hitting and some untimely fielding yielded the visitors four runs, one of which Creston got back in the ninth, Erickson going out in order in the final frame. The feature of the game was some long distance hitting, Telford, Goodwin, Ted Staples and Burns each registering three-ply clouts.

Despite the somewhat uneven score the two teams were very evenly matched; Erickson being the more prominent with the bat, and Creston making the better showing in the field. For the winners Alf. Boffey had a great day at first base. At the shortfield Romado covered plenty of ground faultlessly, and as relief hurler had much to do with saving the game when L. Boffey faltered in the seventh. McKelvey shapes up fine at second, being particularly efficient at getting under the high ones anywhere in the territory, and batting with equal ability. Telford hits well and steadies the aggregation throughout. Stolen bases on him were not numerous either.

On the defensive Creston's infield play was the outstanding feature of the slash. Ted Staples had a very busy day of it at short and handled them all without a slip. At third base Fred Christie, while not quite so busy, was equally reliable, and the second base work of Joe Goodwin deserves honorable mention. Joyce was the busiest man on the field and was particularly effective grabbing hits around the initial corner and getting over to the sack in time to make the out. Holmes, who replaced Ogilvie in the sixth, started off in big league fashion, returing the side on six pitched balls on making his debut, and had his support not wobbled in the eighth it is more than likely the game would have gone into extra innings. Ollie Christie made his first appearance behind the bat and he certainly has no reason to be ashamed of his first day's work. With a little seasoning he should make a real backstop. Ivan Staples was the pick of the outer defence, his work in left field being quite up to the standard of that position on the Creston diamond. The score:

ERICKSON.		CRESTON.	
McKelvey, 2b	1	Goodwin, 2b	0
Romano, ss	1	Joyce, 1b	1
Telford, c	2	E.Staples, ss	1
Dodds, cf	1	O.Christie, c	2
Burns, 3b	1	I.Staples, lf	1
Hall, rf	1	Ogilvie, p	0
Hardy, lf	1	F.Christie, 3b	0
A. Boffey, 1b	0	Crawford, cf	0
L. Boffey, p	1	Holmes, rf	1
	9		6

Erickson	0	1	0	0	3	0	1	4	0	—9
Creston	0	0	0	2	2	0	1	0	1	—6

The attendance was fair, and the freewill offering was most generous. Frank Staples umpired to the general satisfaction of both teams.

Erickson

The Girls Guild of Christ Church had a splendid attendance at their Dominion Day garden fete at W. H. Kemp's, which included dancing in the evening, the cash intake being about $45.

The annual school meeting is scheduled for tonight at the schoolhouse at 7 o'clock. At least $1600 will be required to finance for the next twelve months. W. W. Hall's term as trustee has expired as well as E. J. C. Richardson's year as auditor.

Mr. and Mrs. E. W. Klingensmith left by motor on Saturday for Yahk, where they will be joined by Mr. and Msr. Herrick on a week's visit to Calgary for the stampede and exhibition.

Mrs. B. Dew and son, Arthur, from Priest River, Idaho, were renewing acquaintances at Erickson at the end of the week, having made the trip by auto, arriving on Saturday.

Mr. and Mrs. J. M. Craigie and Mr. and Mrs. Dolf Weir got away on Saturday for a three weeks' motor trip, which will take them as far as Portland, Ore. They are travelling in the Overland Mr. Craigie recently purchased from P. Truscott.

At the annual meeting of the directors of the Associated Growers of B.C. at Vernon last week, R. J. Long was named representative of the Creston Valley on the board.

Mr. and Mrs. Armstrong of Stavely, Alberta, were visitors here a few days last week, guests of Mr. and Mrs. Roy Telford.

W. R. Long was a business visitor at Nelson at the end of the week getting back on Sunday in a 1925 Ford coupe, having traded in his McLaughlin for the new car.

Erickson has this year carried off the B.C. honors for being the first point to ship cabbage in carlots. A minimum car of these was loaded out early Monday morning by Creston Growers, being the sole product of the Sam Fraser ranch. It rolled to Regina, Sask., and was of the Copenhagen Market variety, some of the heads weighing as high as eleven pounds, and averaging about six pounds.

Miss Maude Botterill, an Erickson July bride was thoughtfully remembered by a host of friends at a "shower" at the home of Mrs. Putnam on Friday night at which she was the recipient of large and practically chosen lot of gifts for her new home. A very fine line of hospitality was dispensed by the hostess and her assistants, the music and other amusements and refreshments being thoroughly enjoyed by the large company.

Canyon City

Canyon Epworth League at this week's meeting made arrangements for the first annual picnic, which will be held at Kuskanook at the end of the month.

W. Abbott has gone to Kimberley where he is handling the sale of fruit for Creston Valley Produce Company.

Otto Johnson has gone to Kitchener where he has a log hauling contract with the Continental Lumber & Pole Company.

A. Bond arrived home from Kimberley at the end of the week. Things are quieting off in the building line, plastering work being particularly shy.

W. Wetherhead was home from Yahk for the weekend. Low water in the creeks in that section is holding up log fluming, and will likely be fall before the winter's cut is all out. Mr. and Mrs. Wetherhead are planning to leave for Nelson about the end of the month where they will reside in future.

In a popular voteing contest to secure a queen to preside over children's day activities at Kimberley on August 4th, Miss Annie McRobb is now standing in third place in the field of contestants.

The trustees have been fortunate in securing the services of Miss Vera Lister of Lister to succeed Miss Sadie Wood in charge of the junior room of Canyon school which reopens on September 1st.

At the annual school meeting on Saturday night the ratepayers will be asked to vote at least $1600, and it may be slightly more as the heating system is in need of attention. The meeting is billed to start at 7 o'clock.

Mrs. Guy Browell and daughter, Ellen, left at the first of the week for Nelson, where they will spend the next two months, Guy now being employed in a garage in that city.

Canyon School Report

Principal Kolthammer reports the following as winners of honor rolls for the term just ended: Proficiency—Ruth Clayton. Deportment—Elsie Clayton. Regularity and punctuality Helen Nouguier, John McPherson.

Miss Wood, teacher of Division II. of Canyon school, has issued the term end report as follows: Winners of Honor Rolls. Proficiency—Bessie Hurl. Deportment—Helen Johnson. Punctuality and regularity—John Spencer.

Promoted from Grade 1 Junior to Grade 1 Senior—Annie Berggren, Grace Bond, Evelyn Speaker, Raymond Humble, Stella Zachodnik, Eric Olsen (Sandmone), Cyril Abbott.

From Grade 1 Senior to Grade 2—Clarence Burns, George Foreman, John Spencer, Walter Johnson.

From Grade 2 Junior to Grade 2 Senior—Jane Browell. Remaining in Grade 2 Senior—Franklin Clark.

From Grade 2 to Grade 3—Naida Barnhardt, Dorothy Palmer, Lillian Nelson, Leonard Bond. On Trial—Jack Clayton.

From Grade 3 to Grade 4—Annie Garland, Agnes Johnson, Mildred Zachodnick. On Trial—Marjorie McPherson.

From Grade 4 Junior to Grade 4 Senior—Helen Johnson, Alice Wesling, Lester Pochin, R. J. Speaker.

From Grade 4 Senior to Grade 5—Annie Zachodnik, Holly Bond, Bessie Hurl, Bobby Hale, William Ridd, Sidney Abbott, Joe Clayton, Bertha Burns, Cecil Burns, Evon Berggren, Alberta Robinson, Helen Browell. Remaining in Grade 4 Senior—Beryl Taplin, Ellen Browell.

Winners of MacLean Writing Certificates—John Spencer Clarence Burns, George Foreman, Walter Johnson, Grace Bond, Annie Berggren, Stella Zachodnik, Evelyn Speaker, Lillian Nelson, Naida Barnnardt, Agnes Johnson, Annie Gartland, Mildred Zachodnik, Helen Johnson, Alice Wesling, Robert Speaker, Holly Bond, Annie Zachodnik, Beryl Taplin, Bessie Hurl, Bertha Burns, Sidney Abbott, Evon Berggren.

You have been intending to try "Red Rose." Why not now before you forget.

RED ROSE TEA "is good tea"

The ORANGE PEKOE is extra good. Try it!

World Conditions Steadily Improve

Announcement of the return of Great Britain to the gold standard on April 28 is the most significant event in world economics since the signing of the Armistice. Simultaneous with Great Britain identical action was taken by Australia and New Zealand, Holland and the Dutch East Indies. Canada is already on a gold standard basis and South Africa will revert to the gold standard on July 1.

The effects of this momentous decision was at once seen in the rise of the pound sterling on the New York market to the highest point in ten years and only less than four cents from full par value. Reversion to the gold standard means greater stability in trade and commerce the world over, which, from the standpoint of Canada, is of vital importance because the chief difficulty confronting the producers and manufacturers of this country since the close of the war has been the unstable, fluctuating and at times chaotic condition of European markets.

In making the announcement in his budget speech, Mr. Churchill, Chancellor of the Exchequer, said: "We have entered on a period on both sides of the Atlantic when political and economic stability seems more assured than it has been for some years."

Return to the gold standard means an end to the enormous loss resulting from the adverse rate of exchange on the English pound sterling in the United States, Canada and other countries. It removes the uncertainty formerly existing in world money markets, and likewise removes what was a severe handicap on all international business.

Now that Canada is becoming more and more an exporting country, the importance of the action of the British Government can hardly be over-estimated. As already noted, the chief difficulty confronting the producers of Canada for some years past has been in the marketing of our products abroad, and every step taken to re-establish world confidence and stability in trade and commerce means an enormous gain to Canada

Mr. Churchill also announced the re-imposition of the old preferences and the McKenna duties which were abrogated by the Ramsay MacDonald Government, and although this action does not affect food products, because Mr. Churchill remained faithful to Premier Baldwin's promise to abstain from any taxation of food, it will nevertheless prove beneficial to certain Canadian industries, as, for example, tobacco, sugar and automobiles.

Of particular interest to the whole British people is the reduction provided in the budget in the Income Tax, which is reduced by sixpence in the pound, thus lightening to that extent the handicap now imposed on British industry by the enormous weight of taxation which must be borne in order to meet the huge interest payments on the war debt and provide for its gradual liquidation. As in the case of the return to a gold standard, every step taken to reduce the burden of taxation and revive industry throughout the British Isles, thereby lessening unemployment and increasing the purchasing power of the people, means a larger and more stable market for Canadian products.

In a recent interview Sir John Aird, President and General Manager of the Canadian Bank of Commerce, stated that while basic financial conditions in both the United States and Canada were sound, the return of international prosperity was dependent on two things, the settlement of present European financial difficulties and the adoption by the world of a gold basis. "After these two things occur," said Sir John, "progress must be rapid."

With the entire English-speaking world on a gold basis a long step forward has been taken toward the realization of these two essentials to world-wide business development and prosperity.

Canadian Cheese

One-third of Cheese Imported by Britain Supplied by Canada

Canada supplied one-third of the cheese imported into Great Britain during the last three years. In that period, of 939,383,200 lbs. of cheese imported by Great Britain, Canada supplied 331,113,588 lbs. Canada's exports of cheese to the Mother Country are increasing yearly, although prices for the best Canadian cheese actually run from four to eight shillings per long hundredweight higher than for New Zealand cheese.

A dollar in the bank's worth two in the pocket.

Would Have Baron Byng Remain

Governor-General Is Invited To Accept A Second Term of Office

It is understood on good authority that Baron Byng will be invited to serve a second term as governor-general of Canada. His five-year term expires in July, 1926, and it now appears very possible that he will remain for a further term. There has been much speculation as to who will succeed Baron Byng. Whether or not he will succeed himself now seems to be a matter for his own choice.

The white races of the world are outnumbered by the dark nations by two to one.

CHILDREN CRY FOR

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Absolutely Harmless - No Opiates. Physicians everywhere recommend it.

Arab Idea Not Original

Wearing Mourning As Mark of Disapproval Has Been Done Before

The Arabs who wear mourning to signify their disapproval of Lord Balfour's visit to Palestine have not hit on any very new idea. In England the same plan has been tried by civil servants. In 1897, on April 1, the recommendations of the Tweedmouth committee were brought into force in the post office. On the day the scheme became operative the men attended the various offices wearing black ties, and the women operators wore crepe bands.

Wheezy Chest Colds Subdued Over Night

Trained Nurse Tells How Colds Are Quickly Broken Up

NERVILINE

A Home Necessity

Speaking of valuable home remedies that every mother should always keep on hand, Nurse Carrington says: "I haven't met any preparation more dependable than 'Nerviline.' It is the ideal liniment; every drop rubs in—it is absorbed quickly, eases and relieves congestion in a short time. For chest colds, pain in the side, stiff neck, earache and toothache, I have found Nerviline invaluable. In treating the minor ills that arise in every home, nothing is more efficient than Nerviline."

For nearly fifty years Nerviline has been a household article in thousands of Canadian homes. Get a 35c. bottle to-day.

Will March In U.S. Parade

A company of the Fifth Royal Black Watch Highlanders of Montreal will march in the Memorial Day parade of the American Legion at New York on May 30, the British Great War Veterans of America have announced. An official reception and entertainment has been arranged by the New York Veterans Asociation for the Canadian soldiers.

Marksmanship practice is obligatory on all Argentine male citizens between the ages of 18 and 45 and as a result that country has some of the best marksmen in the world.

HEART TROUBLE SHORTNESS OF BREATH

Mrs. Geo. E. Bowman, Morrisburg, Ont., writes:—"I am writing you a few lines to let you know of my experience with Milburn's Heart and Nerve Pills. "Two years ago I became very poorly with my heart and nerves and whenever I took the least little bit of exercise my heart would start to jump and flutter. I could not walk upstairs without having to sit down and rest before I was half-way up, on account of my breath becoming so short.

I commenced taking

MILBURN'S HEART AND NERVE PILLS

and in no time I felt a great improvement, and can now heartily recommend them to all those who are troubled with any affection of the heart."

H. & N. Pills are for sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Alberta Oil Fields

Will Drill For Oil From International Boundary Line to Arctic Circle

Oil drilling in a field which stretches from Fort Norman on the rim of the Arctic Circle, to the Alberta-Montana border, is to be undertaken this year by the Imperial Oil Company in its exploitation of the Alberta and North West Territories field. A drilling party will start for Fort Norman, in the north, as soon as navigation opens this spring.

Prospective Trade Agreement

The Canada-British West Indies conference, with a view to arranging a new trade and transportation agreement between these countries, will take place in Ottawa on June 19th, according to an official announcement. Representatives of the Canadian Government, Bermuda, Leeward Islands, Windward Islands, Barbadoes, Trinidad, British Guiana, Jamaica and British Honduras, will be in attendance.

Mihard's Liniment for Corns and Bunions

French Will Construct Huge Aeroplane Base

Machines Will Be Shot Into Air By Catapult System

A huge aeroplane base is to be constructed by the French Government at Cherbourg, sixty miles from the nearest point on the English coast and only 150 miles from London. It is being built with the idea that a European war cannot come within ten years, and it will have provisions to make it effective against inventions that may be developed during that time. Monster fighting machines carrying tons of gas bombs, which can kill off most of London's population within a few hours, will be housed underground, protected by steel embattlements that can resist any air attack. The difficulty of having a taking-off field to run aeroplanes up, will be obviated by arranging a catapult system by which machines will be shot into the air.

Gave Name to Douglas Fir

Tree Was Discovered In Oregon 100 Years Ago By David Douglas

One hundred years ago, April 7, 1825, David Douglas discovered Douglas Fir, the tree that bears his name. In 1825 Douglas was surveying the Oregon territory, now the state of Oregon, but at that time British territory, on behalf of the Royal Horticultural Society of England, and first came across samples of the famous tree that was to bear his name. Douglas was very much impressed at the time by the virtues of Douglas Fir and in his journal notations show that he measured specimens 48 feet in circumference and 227 feet high.

Miller's Worm Powders do not need the after help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

However the girl who looks good isn't necessarily good looking.

An Oil for All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Eclectric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

The man after a woman's heart may not want it.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so-called remedies have utterly failed.

St. Mawes, Eng., is known as the Mecca of the Methuselahs, one-fourth of the population being more than 70 years of age. One man is 100, living with his "boy" of 80.

Kept the Dollar

"At the house party I mistook a celebrated millionaire for the butler and tipped him a dollar. Afterward he had a good laugh over the affair."

"A whimsical episode to be sure."

"Yes, but he never handed back the dollar."

Of the 100,000 private houses in Belgium destroyed during the war, 95,000 have been rebuilt. More than 1,200 miles of roadway have been restored.

His System Was Absolutely Cleared

So Says Ontario Youth After Taking Dodd's Kidney Pills

Mr. Edward Dupuis Suffered From Kidney Ailments and Found Relief In Dodd's Kidney Pills.

Auld, Ontario.—(Special).—"I took one box of Dodd's Kidney Pills and it did me so much good that I got a second box and it absolutely cleared my system.

I suffered from rheumatism and back aches. I often had stiffness in my joints and was always tired and nervous. My head also used to ache. I am never bothered now."

This statement comes from Mr. E. Dupuis of this place.

Mr. Dupuis suffered from three of the various ills that accompany any kidney trouble. That's why he got prompt and permanent relief from Dodd's Kidney Pills. They act directly on the kidneys, strengthening them and enabling them to do their full work of straining all the impurities out of the blood. Impurities in the blood are the seeds of disease. Dodd's Kidney Pills make good health by removing the seeds of disease. Sound kidneys mean pure blood. Pure blood means good health.

So the British officers won't have to worry about keeping their spurs polished, the use of stainless steel has been approved by the British war office.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

Prisoners awaiting trial in French prisons are deprived of their bootlaces, collars and ties, in case they attempt to destroy themselves.

BAYER

Genuine ASPIRIN

Proved safe by millions and prescribed by physicians for

Headache	Neuralgia	Colds	Lumbago
Pain	Toothache	Neuritis	Rheumatism

Safe — Accept only "Bayer" package which contains proven directions.

Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetylsalicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

106

Excellent Market In Britain For Canadian Cattle Should Encourage Livestock Raising

"Stick to livestock raising, and increase the output of more cattle," is the advice to Ontario and western breeders and feeders offered by Col. H. A. Mullins, of Winnipeg, on his return from a trip to Great Britain and Ireland in connection with his business of exporting cattle to the British market.

A point stressed by Col. Mullins in reviewing conditions as he found them was that never, while he was in Scotland, did he hear a complaint against Canadian feeders. "Buyers of our cattle," he declared "found them satisfactory in every instance, and they repeatedly asked how soon they could expect a greater supply."

Canadian cattle, he pointed out, were preferred to Irish on account of their more thoroughly healthy condition and the added fact that they commenced to "do well" as soon as they were put on feed.

A point of great importance as affecting the marketing of Canadian stores in Great Britain was the time of year at which the cattle arrive. Col. Mullins strongly advised producers on this side of the Atlantic to arrange for shipment of their feeder cattle during the first six months of the year, so as to avoid their coming into competition with the Irish cattle off grass, which began to arrive at market after mid-summer.

While in London, Col. Mullins interviewed the British minister of agriculture, also the private secretary in Sir Auckland Geddes' office, and put forth a claim for the admission of Canadian cows to Britain on the same footing as Irish cows. While at St. John, N.B., he inspected the cattle shipping facilities at that port and found them all that could be desired as regarded convenience of loading, feeding, and, in fact, in every respect. St. John, he said, was the feasible shipping port for Canadian cattle, summer and winter.

Map of the Moon

One Prepared By English Astronomers Is the Most Reliable

Visible so much of the time under favorable conditions, the side of the moon toward the earth has been mapped more often, and more carefully than any like area under human observation. Following the invention of the telescope in 1610, crude charts were made by Galileo, Fontana and others, and in 1692, according to a historical review by Wm. Porthouse, F.R.A.S., the elder Cassini, of the Paris observatory, introduced the modern system of naming details for identification. Cassini's map recorded 78 objects, including eight of the maria or "seas."

The most reliable of the modern maps, published in 1910 and likely to remain the standard for many years, was prepared by a group of English astronomers directed by Walter Goodacre. The drawings, to which Mr. Goodacre gave nine years, were reduced in publication from an original diameter of 77 inches to 60 inches; it is based on 1,133 measures of position and visual and photographic observations extending over 30 years. Besides the drawn maps a number of photographic atlases have been prepared, the Paris atlas, in three volumes, containing 83 plates from photographs of 1894 to 1909. Some of the enlarged plates are on a scale of 9 feet to the moon's diameter.

Saskatchewan Lignite Coal

Briquetting Tests Being Made In Germany and Czecho-Slovakia

Commercial tests of briquetting Saskatchewan lignite coal are to be made in Germany, Czecho-Slovakia, according to report. It is expected that the test will take between six and eight weeks and that the results will be known in time to permit the remodelling of the Bienfait plant in June if the tests prove as successful as anticipated.

The Ananias Club

"Boss," said the clerk, "I have suffered on the job this week and as I do not want to be paid for what I didn't do, I think you should dock me for the time wasted."

What's Doing in Saskatchewan?

(Continued from Last Week)

By Walter P. Davisson, Author of "The Three Pools"

There are various matters of the first importance which are agitating and vitalizing Saskatchewan minds today, and, in connection with which, neither the yeas or naes are missing. Such problems as limiting the powers of the senate; the transfer of the natural resources from federal to provincial control; the blending of the various great agricultural organizations; the desirability of injecting into the Saskatchewan Legislature an adequate fighting opposition; the necessity of peopling the vast empty spaces in the provinces along existing lines of railway; the hope that a way may be found to balance the mighty farm tonnage with urban industry; the demand that the alcoholic appetite of the people be catered to, neither by the prohibitionists nor the liquor interests, but from the middle-ground of government stores; and, finally, the determination that co-operative marketing methods be widened to include livestock and the 150,000,000 bushels of the coarser grains! Here and there, throughout the province, there are those who look across our southern borders in a somewhat vague spirit of secession; but they are a small class in comparison to those who look away to the east, and beyond—to the Mother of Nations!

A Farmers' Parliament

Recently there was a convention of the Saskatchewan grain growers. It was significant to see this great gathering of the growers from all ends of the province. Their resolutions could compel respect, if not by the power of the ballot box, then by their sanity and wisdom. As one expressed his impression: "Here is the finest indication of the greater Saskatchewan to be." And that is not to say that the resolutions emanating from that agricultural parliament were all of a shell-pink peace. Not at all. I take the following ringing challenge from the presidential address of Geo. F. Edwards to the assembled delegates:

"We in the west believe that we have never been fairly treated by the Governments of Canada—irrespective of party—in regard to the fiscal policy of the country during the past forty years."

As to whether that viewpoint is accurate or not, does not come within the scope of this article; but there is clearly a firm faith behind those words.

And then, too, I find the following brace of political decisions unanimously passing through the Saskatchewan Legislature on the same day, i.e., January 8th, 1925:

1. "That the British preference should be increased to 50 per cent. of the general tariff";

2. "That negotiations should be entered into by the Government of Canada, with the Government of the United States, with a view to establishing a reciprocity on lines similar to those of 1911."

There will be many who see contradictory policies in these two resolutions, passing through the provincial legislature, on the same day, without a dissenting voice. Some will concur with President Edwards, and others will as emphatically oppose him. Still others will fear raising the reciprocal ghost of 1911; nor does the principle of the British preference lack earnest champions. Out of it all, however, one sterling fact emerges—Saskatchewan is awake!

During 1924, the cities, towns and villages of the province went onto the bond markets for something less than one million dollars. Of this borrowing, over $500,000 was taken by public and private investers in Saskatchewan. And here seems to be the proper point to note that the public debt of Saskatchewan today stands at $55,839,787, of which over $26,000,000 are invested in revenue-producing utilities. Perhaps the actual relation of this indebtedness, to the enormous potential wealth of the province, can be focussed to the layman's judgment in no better way than to say that the public debt of the city of Montreal stands at $100,000,000.

A Low Death Rate

During 1924, Saskatchewan celebrated 5,000 marriages; mourned for 6,728 of her people who passed over a well-worn trail to a "farther west"; and welcomed 20,426 "brand new" little strangers into this wonderful world.

There are 517 branch banks in the province.

Saskatchewan is the only province in the Dominion which still stands at zero in the matter of hydro electric development. However, the enormous lignite fuel resources merely await more people, and the touch of industrial necessity, and they will play their part—60,000,000,000 tons!

Enriching Rural Life!

Speaking of the solitudes of the prairie, Rudyard Kipling set down a word-picture some years ago. Notice the accuracy with which the poet's genius conveys a sense of the empty spaces:

"I see the long grass shake in the sun
for league on either hand;
I see a river loop and run about a treeless land;
I hear the summer storm outblown—
the drip of the grateful wheat;
I hear the hard-trail telephone a far-off horse's feet."

Indeed, it has been lonely in the past; and the Kipling solitudes are still very real conditions for those more than 20 miles back from the railways, and for those who are out on the frontier to the north. But things and times are changing. Today the fences of isolation are coming down, which, for generations, have divided the rural workers, making each an economic law unto himself. These barriers have narrowed the mental outlook from the farm, and in a hundred ways have sapped the elemental power of those who work on the land. It is that isolation, and lack of leisure, which combined to send Mr. and Mrs. Farmer occasionally to so low a rung in the economic ladder which they themselves construct.

In Saskatchewan the growers are broadening out, to the clear call of unity—plus the orderly merchandising of their products. Telephones, good roads, automobiles, agricultural fairs, and the miracle that is radio, are playing integral parts in the enrichment of rural life in Saskatchewan; keeping the people abreast of current affairs; making the farm increasingly attractive to the 'teen age boys and girls; and enabling the farmers to "tune in" on the information and culture afforded by lecturers, singers and musicians in a hundred cities. The loneliness of the pioneers is being forced out to the northern fringes of settlement. Even there may be seen the community radio set, as the centre of all ears, in touch with great centres of urban life—Portland, Los Angeles, Denver, Winnipeg, Chicago. It is genuinely thrilling, out on those empty frontiers, to hear the glad enquiring word from CKCK station located at Saskatchewan's capital—Regina—

"Howdydo North Saskatchewan,
Howdydo?
And farther North Saskatchewan, how are you?"

A Generous Exemptions Law

Being primarily an agricultural area, Saskatchewan legislators come mainly from the farm, or from urban constituencies intimately dependent upon rural prosperity. It is not surprising, therefore, to find provincial legislation framed with agricultural welfare as the central consideration. Saskatchewan has a generous "exemptions" law as a protective measure for the farmers. Certain fundamental properties (real and personal) are free from seizure. Even under a chattel mortgage these properties are exempt—always provided that the price of same does not form the consideration for which the mortgage was given; or does not form the subject matter of the judgment upon which the execution is based. In other words, a creditor can always seize the article for which the farmer cannot, or will not, pay, but must respect the following "exemptions" in realizing on a mortgage:

1. The necessary and ordinary clothing of the farmer and his family.

2. Furniture, household furnishings and dairy utensils, to the extent of five hundred dollars.

3. The necessary food for the farmer and his family, during six months, which may include grain, flour, vegetables and meat—either prepared for use, or on foot.

4. Four oxen, horses, or mules, or any four of them; 6 cows, 6 sheep, 4 pigs, 50 domestic fowls; besides the animals the farmer may choose for food purposes, together with food for the same, from November to April; or for such of these months as may follow the date of the seizure.

5. The harness necessary for four animals; 1 wagon or 2 carts; 1 mower or cradle and scythe; 1 breaking plow; 1 cross plow; 1 set of harrows; 1 horse rake; 1 sewing machine; 1 binder or reaper; 1 set of sleighs; 1 seed drill.

6. Seed grain sufficient to sow all his land under cultivation (not exceeding 160 acres), at the rate of 2 bushels per acre—the farmer to have choice of seed. Fourteen bushels of potatoes for planting.

7. The homestead—provided same be not more than 160 acres.

8. The house and buildings occupied by the farmer, to the extent of $3,000.

Urban Exemptions

In comparison with the foregoing, the city man's protection is grimly slim:

1. The books of a professional man, or the tools necessary for the practice of the man's trade or profession—to the extent of two hundred dollars.

An ingenious statistician has recently figured out that, while there are some 50,000 farms of less than 50 acres in Ontario, there are only 1,000 of these kind of farms in Saskatchewan. On the other hand, as against 16,000 Ontario farms of more than 200 acres, Saskatchewan has over 80,000 farms of that size. Therein lies the essential story behind "intensive" as opposed to "extensive" farming. The Ontario way is the better way. It is also the safer and more productive way. Nevertheless, no pen-picture of Saskatchewan would be in true focus, if it failed to indicate the change which is taking place in Saskatchewan in this respect.

The fertility of the soil, and the resourcefulness of the people of Saskatchewan, from April to October, need no reference here. They are known throughout the world. But it is gratifying to be able to record the fact, that the best minds in the province are being devoted to finding a way in which to make the November to March period productive and revenue-bearing. The people of Saskatchewan are realizing the economic handicap of their activities being limited to the spring and summer months. They are getting fretful at the idea of charging up twelve months' expenses against seven months' work. No industry can afford so long a shut-down. Saskatchewan farmers are learning to keep busy throughout the year. For instance, they are no longer illuminating the night-skies in the fall with a host of straw volcanoes. They are finding silos and winter feeding a more profitable practice. So warmly are they cultivating the amiable Mr. Cream-cheque, that Saskatchewan made more butter in December, 1924, than in August of 1914. So far as the winter months in this province are concerned, their one-time "masterly inactivity" is over.

600,000 Horsepower Undeveloped

In terms of agricultural population, even the mighty proportions of Saskatchewan have a very definite limit. There are 24,000,000 acres under cultivation today, and there are a further 75,000,000 "surveyed" idle acres, and a still further domain of 100,000,000 acres to the north empty and unsurveyed. Although you could easily pour the joint populations of Manitoba and Alberta (1,450,000) into the surveyed section of Saskatchewan, and there would be still room and to spare, the people are beginning to see the enormous potential wealth behind agricultural Saskatchewan growing in unison with the industrial development of her natural resources.

There are immense deposits of brick and tile clays, sodium sulphate, and soft coal in Southern Saskatchewan. In the north are the lumber and water-power resources; also great fish, fur and mineral wealth—all awaiting efficient exploitation.

Who ever dreams of Saskatchewan waterpowers? At this hour the turbine installation is nil. Yet the federal records show that there is a dependable yearly (minimum) flow of 600,000 horsepower in the rivers of the province. How can we measure what 600,000 horsepower of potential energy amounts to? As an example, the world-famous installation of the hydro electric commission at Niagara Falls today transmits a total of 650,000 h.p. energizing and illuminating the cities, towns, villages and farms of coalless Ontario. That is one of the world's finest instances where science is straightening out one of Nature's economic tangles.

A liquid fire thrower is the only weapon being taken into the African jungle by Dr W B Reid, student of gorilla life.

To Visit Canada

CAPTAIN ALEXANDER RAMSAY

who will command the flagship Calcutta upon the occasion of the visit to Canadian waters in June of the eighth British cruiser squadron. Captain Ramsay is the husband of Princess Patricia, daughter of the Duke of Connaught.

Expected Opportunities Did Not Materialize And Farmers Are Coming Back To Canada

Officers of the Canadian department of Immigration and Colonization in the United States continue to meet many persons who have found from experience that the expected opportunities in the United States have not materialized. These people are consequently returning to farm in Canada.

Among such examples the statement of Mr. P. O. Warner, of Blacklick, Ohio, to the Canadian immigration and colonization agent at Columbus, Ohio, is typical:

"In justice to Canada, I feel it my duty to tell you why we are going back. We lived in Southern Alberta fourteen years, and although we had some poor crops we also had some very good ones. The country was new, the soil was fertile, and with a reasonable amount of moisture we could grow anything we planted.

We grew cabbage that weighed 22 lbs. per head and oats 55 bushels per acre. Sixty-six bushels per acre of No. 1 Northern wheat was grown on our land the next year after we sold it, although we had never grown that much. We had lots of room to raise cattle and horses on a school section adjoining us, the rent of which cost us very little.

The school system of Western Canada is equal to, or better in some instances, than in the United States. Our children always learned better there anyway.

The climate is crisp and cold in winter and delightfully cool and pleasant in summer. The settler will find very little use for a physician there. Foggy, gloomy days are almost unknown. I believe the sun shines 350 days every year.

We were induced by our relatives to come back to Ohio as wages were good here and because farmers here always make a good living. From our experience here and in Western Canada, we, a family of eight persons, would a thousand times rather live in Canada. It is easier for a farmer to make a living there. The laboring man here has little chance to make a home as it takes all his wages to live. I earn eight dollars per day and I find it takes all I can save in summer to carry us over an idle time in winter, so at the end of a year I can usually balance my ledger with a zero; so we have our plans made and we are going to drive through in a motor truck. We will camp on the way and enjoy the scenery as it will be our last trip west, for we are never coming back.

I have two friends who lived neighbors to us in Canada who came back a few years ago. They are now in Saskatchewan trying to get a new start."

Fourteen years ago, Mr. Jacob Aadland, of Mapleton, North Dakota, went to Saskatchewan and located at Shaunavon. He went there with very little money; just enough to get a start on a homestead. He has done exceedingly well since moving to Western Canada. He now owns four sections of land, nearly all under cultivation and clear of encumbrance. His improvements, stock and machinery are valued at several thousand dollars. Mr. Aadland is but one of about fifteen or twenty families who left this portion of North Dakota for Western Canada, about the same year. All of them, according to Mr. Aadland, have done well.

Mr. Aadland says in a letter to his brother, Peter Aadland, of Horace, North Dakota, who is leaving shortly for Shaunavon, Saskatchewan, that he would not return to North Dakota to farm again if they gave him back his old farm for nothing. Mr. Peter Aadland is giving up a good position in North Dakota and going with his wife and three children to make his home in Western Canada. His brother, Jacob Aadland, has been trying for several years to induce him to move and has finally succeeded.

Dan Fisher, of Detroit, Michigan, who was born in Glengarry County, Ontario, and farmed in Bruce County, Ontario, went to Detroit two years ago and since then has been working in the factories there. He is now of the opinion that farming in Canada offers better opportunities and he has made arrangements to go to Alberta to take up land.

John A. Mitchell went to Detroit last year from Armstrong Corners, N.B. Things have not gone as well as expected by him and he has decided to return to his native country and is to farm at Grande Prairie, Alta.

John McCarthy, a native of Ontario, left a farm near Regina four years ago for Detroit. He has now decided that he likes Canada better and that farming offers more opportunities than factory work in a city. He is returning to take up land near Regina.

Eddie Sumerfield, with his parents, left a farm near Verdun, Manitoba, in 1911 to go to the United States. They settled at Otisville, Michigan. Mr. Summerfield is going back to Manitoba with a brother. He told the Canadian Government office at Detroit that his parents will follow him back to Canada in April. They are sorry they ever moved to the United States.

THE CRESTON REVIEW

C. F. HAYES, Editor and Owner

CRESTON, B.C., FRIDAY, JULY 10

Domestic Pack

Residents within the boundaries of Creston school district must admit that the village pound law has at least one redeeming feature. Now that it is being rigidly enforced it may be possible to get along without building the previously much needed fence around the extensive school grounds, thereby effecting a saving of a few hundred dollars of the ratepayers' money. With fencing costs eliminated surely the best may be hoped for, in the not too far distant future, to secure an appropriation sufficient to repaint the main school building. In addition to improving the appearance of the structure the paint manufacturer's pet phrase, "Save the surface and you save all," has much merit to it

Every so often highwry conditions in Cranbrook riding are referred to by way of demonstrating the none too kindly consideration this district is supposed to be receiving from the public works department. Before taking these comparisons too seriously it might be well to first acquaint oneself with the original road situation in the two areas. In the district east of us it is just possible when the first roads were put through they were built on the best possible locations. Just here in Creston Valley the putting in of the diversions at Washout Creek, Crawford hill, Goat River hill and the new road from Goat River Crossing into Kitchener has run away with not less than $40,000 a great deal of which might have been saved had these pieces of highway been put in originally on their new locations. And with, say, half of this amount available for additional work hereabouts, the Arrow Creek diversion and other improvements could easily have been accomplished with the same appropriations that we have been favored with the past eight years.

It was rather interesting to read in a recent issue of the Nelson Daily News an interview by the former West Kootenay member, Senator R. F. Green, in which he points out that the depression Canada suffers from at the present time would be entirely removed if a fiscal polivy of adequate protection prevailed. If protection really is the cureall the senator believes it to be it would be interesting to learn why the United States farmer, who is protected up to 42 cents a bushel on wheat, and as "adequately" looked after on other products, is today not one bit better off than the Canadian agriculturist. And if protection is the forerunner of prosperity how comes it that the ultra Conservative Baldwin administration has not run up a tariff and given the Old Country the good times it so badly needs, unemployment in England being almost more extensive now than at any period before or since the great war.

In connection with the application of the West Kootenay Power & Light Company for a water storage license below Nelson that some authorities figure (if granted) will raise the level of Kootenay Lake as much as thirteen feet, jeopardizing hay cutting on the flats and putting Kootenay Flats reclamation pretty much out of the question, our attention is drawn to a recent report of the government's water survey branch in which it is pointed out that there is still 109,000 horsepower running to waste between Nelson and the company's works at Bonnington. If these figures are correct surely by the time the company has harnessed this surplus along with their present supply they will be receiving adequate consideration. With the power now controlled and ready for harnessing Creston insists that Mr. Campbell and his associates have acquired all that is necessary to take care of the needs of Kootenay industrial interests, and until such time as the feasibility or otherwise of Kootenay Flats drainage is finally determined no storage works be permitted that will prejudicially affect existing conditions insofar as reclamation is concerned.

Statisticians have now figured it out that for 1925 there is one automobile in operation in the United States for every seven head of the human population. At first blush the comparison would seem to err in favor of the cars, but when one recollects that in Creston Valley, with an estimated citizenship of a little over 2000 of all ages, there will this year be issued very close to 200 motor licenses of one sort and another, it is not hard to conceive that the U.S., with its big urban population, may well have a Ford, or some other make, for every seventh mother, father, son or daughter. A unique feature to the local situation is that while cars have increased from year to year the town is shy one garage as compared with 1923, but on the other hand is supporting an additional smithy. With motors on the increase, both for passengers and haulage, it might be well not to look for too much in the way of freight rate reductions. And by the same token none should be actually disappointed if provincial taxes or assessments are revised upwards. Nothing short of a rock road will stand up under the main highway traffic of these days, and this class of roadmaking can hardly keep pace with the demand—on present-day revenues.

As the trustees have not met in final session to prepare the estimates for next term The Review is not aware whether the board will be asking for a grant in excess of last year or not, but as Creston was favored with the services of a teaching staff rather above the average and as salaries were below rather than above the maximum, it will be only fair to assume some modest salary increases will be in evidence and, maybe, additional revenue for other purposes. At school meetings in the past the antagonism some of the real economists have shown toward even minor increases in the annual vote would give the impression that the individual ratepayer might be temporarily possessed of the idea that he or she were being called upon to put up the whole increase personally, rather than having it spread over an area that has an assessed value of more than three-quarters of a million dollars. For the benefit of those who have never taken the time to figure it out no harm can come of pointing out that in the Creston school district with its over $800,000.00 of valuation, every time an additional $100 is required taxes go up approximately 12 cents on every $1000 of assessment, so that taking $2000 as the average assessment in the district if, say, an additional $600 over last year is requested the average ratepayer will next year have his taxes increased 75 cents. Creston has had the services of a fine staff of teachers the past twelve months, and should some of them be under the impression that araise in salary is justly due the Review submits that even this year Creston should not take chances on parting company with any of the staff for the sake of husbanding two bits extra required of each $2000 assessment to produce the increased $100 of salary or general upkeep cost.

FOR SALE—Jersey cow, $70. Also a one-horse mower. Mrs. Vaness (Alice Siding), Creston.

FOR SALE—One ton Ford truck, $225, or will trade for car. C. O. Lindbloom, Kitchener.

Trail Anglicans are so prosperous that they are helping pay the stipend of the minister looking after the church work at points between Trail and Slocan City.

Postmaster Kane of Kaslo found it necessary to bring in three workmen from Nelson to do the brickwork on the fireplace he is having built into his new residence in that town.

Chas. Elice, who operates a store and poolroom at Porthill, has just installed a 1500 watt electric light machine and will sell the surplus "juice" to other places in the town.

Liquor drinking at the ball games just outside Grand Forks has become so pronounced that the provincial police have warned the fans that it must stop or the drinkers will be arrested.

Copeland people are forming another drainage district and will reclaim 6000 acres of Kootenay Flats land in that neighborhood, it will be the biggest area to be brought under cultivation in the Kootenay valley.

FOR SALE OR TRADE—8 months old Jersey bull calf, purebred, $50, or will trade for milch cow. G. Nickel, Griffin Ranch, Creston.

GOVERNMENT LIQUOR ACT

Notice of Application for Beer License

Notice is hereby given that on or after the 7th day of August next the undersigned intends to apply to the Liquor Control Board for a license in respect of premises to be known as the Tourist Hotel, situated at South Slocan, B.C., upon the lands described as Lot 2088, Kootenay District, Nelson Land Registration District, in the Province of British Columbia, for the sale of beer by the glass or by the open bottle for consumption on the premises.

Dated this 30th day of June, 1925.

ANDREW WILLIAMSON, Applicant.

GOVERNMENT LIQUOR ACT

Notice of Application for Beer License

Notice is hereby given that on or after the 21st day of July next the undersigned intends to apply to the Liquor Control Board for a license in respect of premises being part of the building to be known as the Tourist Inn, situated at Sirdar, B.C., upon the lands described as Sub-Lot 13, Block 583, Group 1, Map 833, Sirdar Townsite, Kootenay District, Nelson Land Registration District, in the Province of British Columbia, for the sale of beer by the glass or by the open bottle for consumption on the premises.

Dated this 15th day of June, 1925.

ROBERT HEAP, Applicant.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

About two dozen customers of Goat Mountain Waterworks Company went on the meter system on July 1st, and at least one user is confident that for with only July and August to reckon with his water bill, will be less than a year ago, when he had the $5 sprinkling charge levied on him.

The hot wave that has had Creston Valley in its grip for at least three weeks, was broken for a spell on Monday when a dust storm that prevailed all afternoon was followed by a night's rain that accounted for at least a quarter of an inch of moisture, and will help out the raspberry crop some.

Mrs. R. Stephens left on Thursday last for a two months' holiday visit with friends at the coast, making short stops at Nelson and Nakusp en route west. The Stephens residence is taken by Geo. Kelly who is expecting his mother to arrive from New Westminster in a few days to spend the summer here.

Grand Forks Gazette: Two excellent species of Delphinium are to be seen in the garden of Mrs. (Rev.) P. C. Hayman. The plants have grown to a height of 9 ft. 6 inches, and the flowering portions are about 2 feet. Rev. Mr. Hayman would like to know if there are any floriculturists who can beat this.

Mrs. Bert Nelson and children left on Wednesday for New Denver, where they will visit friends for some weeks pending Bert being permanently stationed by the provincial police authorities. He joined the force about three months ago, and is at present located at Kimberley which has no residential quarters as yet.

Rev. J. A. and Mrs. James, who have been visiting at eastern points the past couple of weeks, following the sessions of the assembly of the continuing Presbyterian Church in Toronto the fore part of June, are expected home this week, and there will be the usual services in St. Stephen's Church Sunday morning and evening next.

Erickson had the best of the benefit baseball game with Creston at Exhibition Park on Sunday afternoon, winning out in the final innings by a 9 to 6 score. The attendance was not large but the freewill offering was most generous, totalling $30, which goes to Jim Dodds, catcher, who had his leg broken in a game at Kitchener about a month ago.

Creston Valley Produce Company have this week moved into their new quarters in the former Union feed warehouse, which have been fitted up for the purpose. Manager Nelson can use the extra space to good advantage for storing apples for the making up of mixed cars. He will have at least 15000 crates of tomatoes to go out in mixed cars this season.

Mr. and Mrs. Clark Moore and Robert Moore of Dover, Idaho, were visitors here for a few days at the end of the week with the former and the latter's mother, Mrs. H. H. Taylor Bob, who lost thumb and two fingers of his right hand in a mishap in the planing mill at that point, a couple of months ago, has almost recovered the use of the arm and will be back at work in a few days.

Bonners Ferry Herald: W. G. Swensden, commissioner of the department of drainage and irrigation, is expected in Bonners Ferry July 13. Commissioner Swendson will view the various drainage districts of the Kootenai Valley and will also attend to matters having to do with the cooperative drainage plans which include many thousands of acres of overflow lands in Canada.

NEWS OF KOOTENAYS

Kimberley has three beer parlors. The third one opened at the first of the month.

Rattlesnakes are more plentiful than usual in the Vernon district according to the News.

Prairie schooners, southbound, have been quite numerous on the streets of Fernie the past week.

Fernie miners are now averaging a coal output of some 3000 tons daily, and are working steady.

The White Cross Society of St. John has taken over the Halcyon hot springs hotel and santitarium on the Arrow Lakes.

P. Burns & Co. have just purchased the Armstrong creamery. A few weeks ago they also purchased the Vernon creamery.

Duchess, Wealthy and McIntosh apples at Salmon Arm are showing drouth spot, supposed to be due to root injury sustained last winter.

In spite of the long drawn out strike last year the Crows Nest Pass Coal Company has just authorized a dividend of 3 per cent.

John Manning, well known in the grocery store business at Cranbrook for 25 years, has sold out to the Cranbrook Trading Company.

The Hawks drugstore at Bonners Ferry has just put on an electric screen door, which effectually keeps out the mosquitoes, bugs, moths, etc.

It is estimated that at least 10,000 tourist cars will use the Banff-Windermere highway this season. 4500 autoists traversed it in 1924.

Up till the end of June the tourist camp at Cranbrook showed 70 more registrations than were recorded up till the same period a year ago.

Two more rooms are being added to the public school at Kimberley, and a staff of nine teachers will be necessary when school opens in September.

The Vernon-Edgewood road, which will give auto connection between the Okanagan and Arrow Lakes, will be opened for traffic next month.

According to the Herald with the exception of cricket all the outdoor sports are now played at Cranbrook. Lacrosse has made a comeback this year.

Skunk are altogether too plentiful at Yahk. Recently at the Herman ranch a couple of these animals disposed of 49 chickens, 7 turkeys and two geese.

Summer visitors at Kaslo are more numerous this year than was the case in 1924. Cranbrook is well represented amongst the tourists, with some from Lethbridge, Alta.

East Kootenay Telephone Company contemplates spending $25,000 on a central and new lines at Kimberley immediately. Equipment to handle 200 telephones will be installed.

The census shows 65 Anglican families at Kimberley and the erection of a church building is now being seriously considered Services were commenced there about the middle of June.

At a "shower" to furnish the community hall at Grand Forks one night last week, the Gazette states that 364 sets of cups, saucers, plates and spoons were brought along to equip the kitchen for social functions.

Miss MacDonald and Miss Edmunds of the Vernon public school staff have left for Dundee, Scotland, where they will teach until next midsummer, and two lady teachers from Dundee will replace them on the staff at Vernon.

School janitors are appreciated at Cranbrook. Just before the holidays the caretaker at the Central school was presented with a pair of gold cuff links, and the man in charge of the new wing of the same school got a silver flower basket.

Loyal Orange Lodge, No. 2095

Meets THIRD THURSDAY of each month at Mercantile Hall. Visiting brethren cordially invited.

ERIC OLSON, W.M.

Doing Business at the New Stand

WE ARE NOW LOCATED IN OUR NEW QUARTERS—the former Union feed warehouse—and are in better shape than ever to take care of our steadily increasing business. If inconvenient to visit us we can talk business over the telephone if you will call up No. 99: or our Residence phone No. 93.

RASPBERRIES

We have a big demand for these, and here are our prices to date: June 21 to July 2, $3.00 per crate; July 2 to July 7, $2.75; This week $2.50 per crate. Our other prices are GOOSEBERRIES, $1.50. BLACK CURRANTS, $2. RED CURRANTS, $1.50.

These prices are YOUR NETT CASH RETURN, with no selling bommissions, rebates, or othkr holdouts.

A Romance of the Spanish Main

CAPTAIN BLOOD

RAFAEL SABATINI

Copyrighted, 1922, by Rafael Sabatini.

"CAPTAIN BLOOD," a Vitagraph picture with J. Warren Kerrigan in the title role, is an adaptation of this thrilling novel.

CHAPTER XVIII.—Continued

"Nor will that serve you," Ogle warned him, still more fiercely. "The men are of my thinking, and they'll have their way."

"You come to give advice, then, do you?" quoth Blood, relenting nothing of his sterness.

"That's it, Captain: advice. That girl, there." He flung out a bare arm to point to her. "Bishop's girl; the Governor of Jamaica's niece . . . We want her as a hostage for our safety."

"Aye!" roared in chorus the buccaneers below.

"It's a providence having her aboard; a providence. Heave to, Captain, and signal them to send a boat, and assure themselves that Miss is here. Then let them know that if they attempt to hinder our sailing hence, we'll hang the doxy first and fight for it after. That'll cool Colonel Bishop's heat, maybe."

"And maybe it won't." Slow and mocking came Wolverstone's voice to answer the other's confident excitement, and as he spoke he advanced to Blood's side, an unexpected ally. "If ye're counting on pulling Bishop's heartstrings, ye're a bigger fool, Ogle, than I've always thought you was. We've got to fight, my lads . . ."

"How can we fight, man?" Ogle stormed at him.

Then louder than before roared a gun away to leeward.

"They are within range," cried Ogle.

"Wait!" Blood bade him, interrupting, and he set a restraining hand upon the gunner's arm. "There is, I think, a better way. Mine is the safe and easy way. Put the helm down," he bade Pitt. "Heave her to, and signal to them to send a boat."

A silence of astonishment fell upon the ship—of astonishment and suspicion at this sudden yielding. Captain Blood turned and beckoned Lord Julian forward. Briefly and clearly he announced to all the object of Lord Julian's voyage to the Caribbean, and he informed them of the offer which yesterday Lord Julian had made to him.

"That offer I rejected. But now, outsailed, and likely to be outfought, as Ogle has said, I am ready to take the way of Morgan: to accept the King's commission and shelter us all behind it."

The main body of them welcomed the announcement as only men who have been preparing to the can welcome a new lease of life.

"No man need follow me into the King's service who is reluctant," Blood went on. "That is not in the bargain. What is in the bargain is that I accept this service with such of you as may choose to follow me. And even those of you who do not choose to follow me shall share the immunity of all, and shall afterwards be free to depart. Those are the terms upon which I sell myself to the King. Let Lord Julian, the representative of the Secretary of State, say whether he agrees to them."

Prompt, eager and clear came his lordship's agreement. Meanwhile the bo'sun signalled to the Jamaica ships to send a boat, and the men in the waist broke their ranks and went noisily flocking to line the bulwarks and view the great stately vessels that were racing down toward them. As Ogle left the quarterdeck Blood turned, and came face to face with Miss Bishop. She set a hand lightly upon his arm.

"You have chosen wisely, sir," she commended him.

"You have chosen wisely, sir," she commended him, "however much against your inclinations."

"I owed it to you—or thought I did," he said.

"Your resolve delivered me from a horrible danger," she admitted. "But I do not understand why you should have hesitated when first it was proposed to you. It is an honorable service."

"King James's?" he sneered.

"England's," she corrected him in reproof. "The country is all, sir; the sovereign naught. King James will pass; others will come and pass; England remains to be honorably served by her sons, whatever rancour they may hold against the man who rules her in their time."

"Shrewd advocacy," he approved it. "You should have spoken to the crew. Do you suppose now that this honorable service might redeem one who was a pirate and a thief?"

"If he . . . needs redeeming. Perhaps . . . he has been judged too harshly."

"Why . . . if ye think that," he said, considering her, an odd hunger in his glance, "life might have its uses, after all, and even the service of King James might become tolerable. If you will go below, and get your gear and your woman, you shall presently be sent aboard one of the ships of the fleet."

She left him, and thereafter, with Wolverstone, leaning upon the rail, he watched the approach of that boat, manned by a dozen sailors, and commanded by a scarlet figure seated stiffly in the stern sheets. The deputy proved to be an officer named Calverley.

His air, as he stepped into the waist of the Arabella, was haughty, truculent, and disdainful.

Blood, the King's commission now in his pocket, and Lord Julian standing beside him, waited to receive him, and Captain Calverley was a little taken aback at finding himself confronted by two men so very different outwardly from anything that he had expected.

"Good-day to you, sir," Blood hailed him pleasantly. "I have the honor to give you welcome aboard the Arabella. My name is Blood—Captain Blood, at your service. You may have heard of me."

"I'm now surrender I require, my man, not your impudence," Calverley demanded. Captain Blood appeared surprised, pained. He turned in appeal to Lord Julian.

"D' ye hear that now? And did ye ever hear the like? But what did I tell ye? Ye see, the young gentleman's under a misapprehension entirely. Perhaps it'll save broken bones if your lordship explains just who and what I am."

"I have the honor to inform you, sir," he said stiffly, "that Captain Blood holds a commission in the King's service under the seal of my Lord Sunderland, His Majesty's Secretary of State."

"And who the devil may you be?"

"You're not very civil, sir, as I have already noticed. My name is Wade—Lord Julian Wade. I am His Majesty's envoy to these barbarous parts, and my Lord Sunderland's near kinsman. Colonel Bishop has been notified of my coming."

"I . . . I believe that he has," said Calverley, between doubt and suspicion. "That is: that he has been notified of the coming of Lord Julian Wade. But . . . but . . . aboard this ship . . .?"

"If Captain Blood will show you his commission, perhaps that will set all doubts at rest," concluded his Lordship.

Captain Blood thrust a parchment under Calverley's bulging eyes.

"I must return to Colonel Bishop for my orders," he informed them.

At that moment a lane was opened in the ranks of the men, and through this came Miss Bishop, followed by her octoroon woman. Over his shoulder Captain Blood observed her approach.

"Perhaps, since Colonel Bishop is with you, you will convey his niece to him. Miss Bishop was aboard the Royal Mary and I rescued her together with his lordship. She will be able to acquaint her uncle with the details of that and of the present state of affairs."

"As for me" said Lord Julian with intent to make Miss Bishop's departure free from all interference on the part of the buccaneers "I shall remain aboard the Arabella until we reach Port Royal. My compliments to Colonel Bishop. Say that I look forward to making his acquaintance there."

CHAPTER XIX.

Hostilities

In the great harbor of Port Royal the Arabella rode at anchor. Almost she had the air of a prisoner for a quarter of a mile ahead to starboard, rose the lofty, massive single round tower of the fort, whilst a couple of cables' length astern, and to larboard, rode the six men-of-war that composed the Jamaica squadron.

On a cane day-bed that had been set for him on the quarterdeck, sheltered from the dazzling, blistering sunshine by an improvised awning of brown sailcloth, lounged Peter Blood.

(To be continued)

Hubby (rushing in at the sound of screams): "Whatever is the matter, darling?"

Wife: "There's a horrid caterpillar in this lettuce. Oh, Herbert, supposing I had been in the house alone!"

PAINS IN LEFT SIDE AND BACK

Other Troubles Women Often Have Relieved by Lydia E. Pinkham's Vegetable Compound

Lachine, Quebec.—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my left side and back, and with weakness and other troubles women so often have. I was this way about six months. I saw the Vegetable Compound advertised in the 'Montreal Standard' and I have taken four bottles of it. I was a very sick woman and I feel so much better I would not be without it. I also use Lydia E. Pinkham's Sanative Wash. I recommend the medicines to my friends and I am willing for you to use my letter as a testimonial."—Mrs. M. W. Rose, 539 Notre Dame Street, Lachine, Quebec.

Doctor Said an Operation

Provost, Alberta.—"Perhaps you will remember sending me one of your books a year ago. I was in a bad condition and would suffer awful pains at times and could not do anything. The doctor said I could not have children unless I went under an operation. I read testimonials of Lydia E. Pinkham's Vegetable Compound in the papers and a friend recommended me to take it. After taking three bottles I became much better and now have a bonny baby girl four months old. I do my housework and help a little with the chores. I recommend the Vegetable Compound to my friends and am willing for you to use this testimonial letter."—Mrs. A. A. Adams, Box 61, Provost, Alberta.

Disappointed To Find He Was An Ex-Premier

Sir Robert Borden Was Sadly Disillusioned In His Own Home Riding of Halifax

Having represented the city of Halifax in the Commons for many years, Sir Robert Borden for a time believed he was no stranger to the good people of the eastern gateway to the Dominion. He was sadly undeceived, however, shortly after he laid down the onerous duties of premier, according to the Toronto Star Weekly.

Included among the large number who pressed forward to meet him at an informal reception in Halifax was a middle-aged lady well known for her interest in child welfare.

After the manner of so many other one-idea enthusiasts, this lady imagined everybody else must necessarily be particularly interested in her particular field, and when she got the chance to talk to the guest of honor launched forth into her favorite topic.

Sir Robert was bored, but did his best to simulate a polite interest, though listening with only half an ear.

Suddenly he became all attention when he realized the lady was thanking him profusely for what he had done to make the lives of little babes healthier and happier. He was particularly puzzled when he heard himself referred to as "the greatest benefactor of future generations this country has ever known."

Sir Wilfrid Laurier would have carried off such a situation with graceful ease. Hon. Arthur Meighen would have looked wise and maintained a discreet silence. Premier Mackenzie King would have tactfully changed the conversation.

But however great may have been his ability in other lines, Sir Robert Borden never was a nimble-witted politician.

Try as he would, the ex-premier could not recall any child legislation of his that deserved such extravagant praise, and said something to this effect to his fulsome admirer.

"Legislation? Legislation?" said the lady, with a look of extreme surprise. "What has legislation to do with your business?"

"As member of parliament and former premier, I am naturally supposed to have something to do with legislation," explained Sir Robert, his brows compressed in perplexity.

The lady gasped with dismay, then said: "Oh! Are you a member of parliament? I am so disappointed! I thought you were the man who condenses milk for babies!"

Denver Man Wants Western Canada Land

Looking For Tract of From 50,000 to 200,000 Acres

A tract of land from 50,000 to 200,000 acres is required by George Ollinger, of Denver, who stipulates that it must be adaptable to the production of wheat, have plenty of water easily accessible, and bear a reasonable quantity of good timber.

He stated in a letter to the Regina board of trade that he understands such tracts of lands exist in the Northwest and that the government is ready to dispose of them at a low price with reasonable terms. He was referred to the proper quarters.

London Secures Most Meat From Argentina

224,866 Tons Distributed Through Central Market Last Year

Argentina in 1921 again led the world in supplying London with meat. Statistics just issued show that 224,866 tons of Argentina meat were distributed through the central market at Smithfield, as compared with 104,843 from the British Isles; 90,972 from Australia and New Zealand; 8,961 from Canada and the United States; and 50,887 from other countries. The report shows that London's meat bill for the year was £36,500,000.

Alberta's Population

Alberta's population at the end of 1924 was approximately 640,000, according to an estimate by the provincial government. This is an increase of 52,000 as compared with 1921, when the last official census was taken. It is also estimated that some 60 per cent. of the province's population is of British origin.

Fills the Bill

"I've been trying to think of a word for two weeks."

"Well, there's fortnight."

A New Soup

When making vegetable Soup add two teaspoonfuls of Bovril per quart—It gives body and flavor and adds to the nourishment.

BOVRIL

Sold only in bottles.

New York's School De Luxe

Canadian Teacher Will Be Principal Of $3,000,000 Building

Hector Charlesworth, writing in Toronto Saturday Night on what he saw in New York, says: The scale of municipal spending is enormous. One day I went into the wilds of Harlem to see what is regarded as the "last word" in public schools the world over, just on the point of completion. Now Harlem today in appearance is a greatly enlarged edition of what the Bowery was 30 years ago; but this school edition on the bank of the East River, overlooking Hell Gate, is a marvel. It has 2,000 pupils, all of tender years, with room for nearly a thousand more; restaurants, rest rooms, several vast gymnasiums, an eye and ear hospital, a dental clinic, hundreds of shower baths, everything that the most fully equipped modern athletic club could boast, and most countless other things besides. It is interesting to note that the principal selected for this public school de luxe is a Canadian lady, Miss Claire Kleiser, who served her apprenticeship under James L. Hughes in Toronto. The cost will reach $3,000,000 when everything is in order. In all the vast array of dark-eyed little ones there was hardly one of English-speaking parents, or whose parents were born in America. That is what is being done for the proletariat of Europe in New York; but whether the proletariat is grateful it is hard to discover.

NEW HEALTH FOR SUFFERING WOMEN

Aching Backs and Tired Limbs Need Not be Endured

Too many women endure suffering that casts a shadow over half her existence. An aching back, tired limbs, attacks of faintness, splitting headaches need not be a part of woman's life. Such trials indicate plainly that the blood is thin and watery and that the sufferer needs the help of a real tonic such as Dr. Williams' Pink Pills. Suffering women who have used this medicine speak of it in the highest terms. Among those who have been thus helped is Mrs. Ada L. Harman, Virden, Man., who writes:—"Following the birth of a still-born child a few years ago, I had a very serious time. I was so weak for months that I could not walk across the room without a feeling of faintness. I had scarcely strength enough to stand up, and when dressing would have to sit down two or three times. My face and lips were colorless, I had no appetite, and life did not seem worth living. A friend urged me to try Dr. Williams' Pink Pills and I got six boxes. Before they were all gone I felt improved. My appetite was returning, and I was visibly stronger. I continued taking the pills and fully regained my former good health. I consider Dr. Williams' Pink Pills a blessing to weak women, and hope my experience will induce some other sufferer to try them."

You can get these pills from any medicine dealer, or by mail at 50 cents a box direct from The Dr. Williams Medicine Co., Brockville, Ont.

Seeks Ore In B.C.

With the hope of finding zinc, lead and copper available in good quantities in British Columbia for export to Dutch smelting plants, Roger R. Brunschwig, of Amsterdam, director of the N. V. Erts Mineral Company, is on his way to the coast. He has just returned from making contracts with South American miners and hopes to get the balance of his requirements in British Columbia.

Antiseptic
Soothing
Healing

Gives quick relief for sprains, bruises rheumatism and inflammation.

MINARD'S "KING OF PAIN" LINIMENT

WORLD HAPPENINGS BRIEFLY TOLD

Woodstock, Ont., heads the cities for citizens more than 65 years old, according to a bulletin just issued dealing with 1921 census statistics.

There was jubilation in the household of Former Kaiser Wellcim over the election of Field Marshal Von Hindenburg as president of Germany.

The Earl of Balfour has joined the British cabinet, being appointed president of the council, in succession to the Marquis Curzon, who died recently.

Field Marshal Von Hindenburg's election to the German presidency is regarded in Vienna as a serious blow to the idea of an Austrian union with Germany, and is deplored by the newspapers of all parties.

Daniel Christie, 86, pioneer railwayman, who was fireman on the "Countess of Dufferin," the first locomotive to reach Winnipeg, is dead. He was born at South Gouer, Ont., and came west in 1877.

Premier Bruce, in announcing today that Australia would return immediately to the policy of free export for gold, explained that the Commonwealth Government did not intend to substitute gold for notes as internal currency.

The Russian State Bank has issued orders against the acceptance of Canadian paper dollars by any of its branches. Thousands of dollars' worth of counterfeit Canadian notes, originating apparently from Montreal, have found their way into Soviet Russia during the last few weeks.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

A Queer Receiving Set

A radio receiving crystal set, mounted on an ordinary bone-back collar stud, and working a loud speaker, is reported from Newcastle, England, where J. J. Black, a post office employee, is described as the successful maker. The loud speaker, worked from the collar stud set, could be heard 20 feet away.

CHARACTER TELLS THE STORY!

People throughout this country are giving more thought to hygiene and to the purity of remedies on the market, but no one doubts the purity of Doctor Pierce's vegetable medicines, for they have been so favorably known for over fifty years that everyone knows they are just what they are claimed to be. These medicines are the result of long research by a well-known physician, R. V. Pierce, M. D., who compounded them from health-giving herbs and roots long used in sickness by the Indians. Dr. Pierce's reputation as a leading and honored citizen of Buffalo, is a sufficient guarantee for the purity of that splendid tonic and blood purifier, the Golden Medical Discovery, and the equally fine nerve tonic and system builder for women's ailments, Dr. Pierce's Favorite Prescription. Send 10c for trial pkg. tablets to Dr. Pierce's Laboratory in Bridgeburg, Ontario.

Receives New Appointment

GEORGE H. STEAD

recently appointed general superintendent of western territory, Canadian National Telegraphs, with headquarters in Winnipeg. Mr. Stead was formerly superintendent at Edmonton and has been in the continuous service of the old Great North Western Telegraph, Canadian Northern Company and subsequently with the Canadian National. His service has been entirely confined to Western Canada, he having commenced in 1888 as a messenger.

A cupful of common salt was a favorite method of suicide among Chinese, for in such large doses it acts as a violent irritant of the stomach.

ECLIPSE FASHIONS

Exclusive Patterns by Cecil Bayne

Modish and Practical Suspender Skirt

Nothing could be smarter than the suspender skirt, one of fashion's latest decrees. As here pictured, it is made of flannel in one of the ever-popular navy blue shades. The shoulder straps are so shaped that they fit well on the shoulders. One of the pockets displays a colored handkerchief, which adds a note of color contrast. This suspender skirt, No. 1022, comes in sizes 34 to 42 inches bust, size 38 requiring 2⅝ yards of 36 or 40-inch material. A suitable blouse to wear with this skirt is No. 1044, made of heavy crepe de chine. The blouse is in sizes 34 to 44 inches bust, and requires 2½ yards of 36 to 40-inch material for size 38.

Butter Via Panama Canal

Increasing Shipments Being Sent By Alberta Over Southern Route

Exports of Alberta butter via the Panama Canal continue to increase, according to the annual report of the provincial department of agriculture. The exports by this route in 1923 amounted to 4,000 packages of 56 lbs. each, while in 1924 the shipments by this route by three firms alone totalled 13,721 packages.

BEAUTIFY IT WITH "DIAMOND DYES"

Perfect home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

To Reach New Heights

Announcement was made of plans for a German expedition to ascend Mount Everest in the Himalayas, the world's highest peak, under the auspices of the German Alpine Association.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she will use nothing else and as long as there are babies in the home you will always find a box of Baby's Own Tablets on hand. Thousands of mothers have become convinced through the actual use of the Tablets that there is nothing to equal them in banishing constipation and indigestion; breaking up colds and simple fevers; expelling worms and promoting that healthful refreshing sleep so necessary to the welfare of little ones. Among the thousands of mothers who praise Baby's Own Tablets is Mrs. Alex. J. Perry, Atlantic, N.S., who says:—"I always keep Baby's Own Tablets in the house as I know of no other medicine that can equal them for the minor ills that come to young children." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

New Zealand Making Huge Cheese

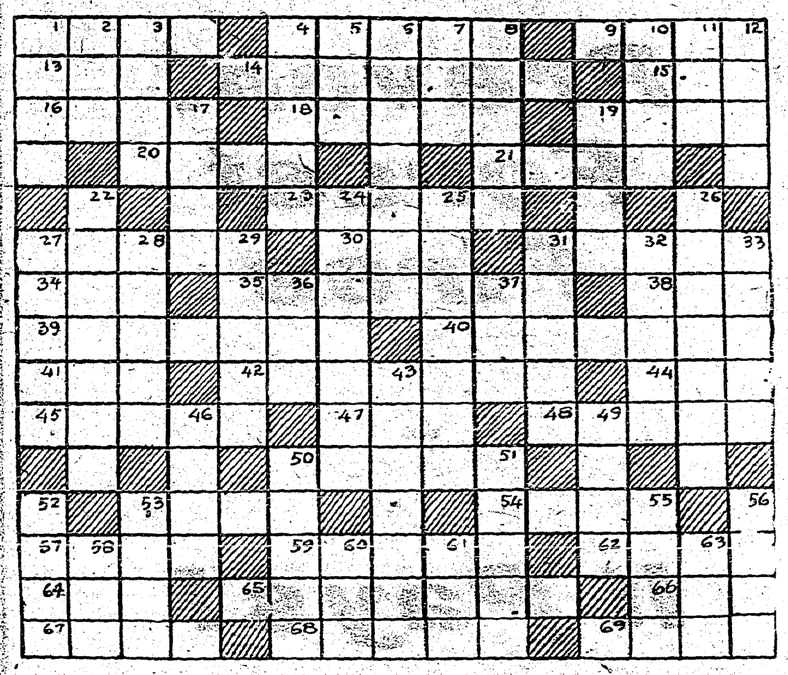
A monster cheese for Wembley is being made by the New Zealand Dairy Produce Board. It will eclipse the cheese shown at last year's exhibition, which weighed more than 16 cwt.

Cuticura Preparations

Unexcelled in purity, they are regarded by millions as unrivaled in the promotion of skin and hair health. The purifying, antiseptic, pore-cleansing properties of Cuticura Soap invigorate and preserve the skin; the Ointment soothes and helps to heal rashes and eruptions. The freely-lathering Shaving Stick causes no irritation but leaves the skin fresh and smooth. The Talcum is fragrant and refreshing.

Sample Each Free by Mail. Address: Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

OUR CROSSWORD PUZZLE



Horizontal

1—An aquatic animal.
4—Deep red carnelians.
9—Stockings.

60—Illuminated.
61—To cease to live.
63—The sheltered side of a boat.

Our Own Coin

Smile and the World Will Smile With You

The universe pays every man in his own coin; if you smile, it smiles upon you in return; if you frown, you will be frowned at; if you sing you will be invited into gay company; if you think, you will be entertained by thinkers; and if you love the world and earnestly seek for the good that is therein you will be surrounded by loving friends, and nature will pour into your lap the treasures of the earth. Censure, criticize and hate and you will be censored, criticized and hated by your own fellowmen.

Every seed brings forth after its kind. Mistrust begets mistrust, and confidence begets confidence, kindness begets kindness, love begets love. Resist and you will be resisted. To meet the aggressive assault every entity rises up rigid and impenetrable—while yonder mountain of granite melts and floats away on the river of love.—N. W. Zimmerman.

Civilization and Murder

The murder rate in this country has more than doubled in the last twenty years. Thanks to the motor, the death rate through accident has more than kept pace with the homicide increase. While science has made great progress in reducing the death rate from disease, the flivver and the automobile have been doing a rushing business—in the direction of the morgue. That is what we get for being civilized.—Los Angeles Times.

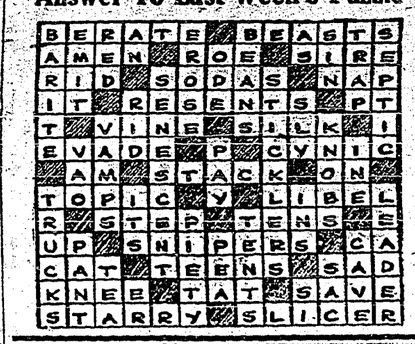
The United States army has a few soldiers who wear kilts. They are the Fita-Fitas, native soldiers of Samoa.

An Oil that is Prized Everywhere.—Dr. Thomas' Eclectric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Women's clubs have become numerous in Turkey. A few years ago they were unknown.

Minard's Liniment for Backache

Answer To Last Week's Puzzle



Co-operative Egg Production

It is conservatively estimated by the secretary of the New Alberta Co-operative Poultry Producers, Limited, that a million and a quarter eggs have been contracted for by the organization. These are the product of some 16,000 hens.

Balloon jumping is the newest sport in England. You attach a small balloon to yourself and it makes you so buoyant that you can jump over barns, haystacks and trees with ease. A push of the foot will send you up 50 feet in the air.

For Aches and Pains Use Minard's Liniment

Ninety-nine tons of human hair was exported from Hong Kong in 1923.

Residents in Kaslo Slocan do not appear to be enjoying really good health. In the past month Creston members of the Fifteen Hundred Club have had to liquidate three death claims.

Miss Mildred McDonald, who has been teaching near Ensign, Alberta, the past year, arrived home on Friday for the summer vacation with her parents, Mr. and Mrs. H. W. McDonald, Glencoe Ranch.

Revenues at Creston provincial police office for June were in the neighborhood of $500, motor licenses accounting for $290, and amusement tax totalling $136, thanks to the annual six-day Chautauqua.

Any falling off there may have been in June weddings will be fully made up this month. Three of these happy events are already announced, with Alice Siding, Creston and Erickson furnishing the brides.

Mrs. Cannaday has re opened her tailor shop and is prepared to do pressing, altering on men's suits and re-lining coats for ladies and gents. She is located in the old City Bakery building, next the Review.

Miss Edna Holmes, who has charge of Division IV. of the public school, left at the end of the week for Victoria, where she is attending the six-weeks session of the education department's summer school in that city.

The evening of Wednesday, July 29th, should be kept open for a lecture, which will likely be illustrated with moving pictures, on forest preservation. The speaker will be Col. Allen of Victoria, and the admission is free.

Creston orchestra was at Kitchener on Saturday night where they furnished music for a dance given by the Amusement Club of that town, and are booked for similar appearances fortnightly for the next two months.

Mrs. Ben Dew, a former well known resident of Creston, now residing at Priest River, Idaho, was a weekend visitor with Creston friends, the guest of Mrs. Boyd. She made the trip by motor, her son, Arthur, accompanying her.

Our former townsman, G. M. Argue, now resident at Nelson, is playing bateball on the senior team of that town, and from newspaper reports his hitting and fielding are quite the best seen in a Nelson uniform for some time past.

R. B. McLeod, who was on the sales staff of the Speers' store up till November last, but now located at Kellogg, Idaho, was renewing acquaintances in town at the weekend, leaving on Sunday to visit a sister at Kimberley.

Miss Rose Cherrington left on Saturday for Pincher Creek, Alberta, where she joins up with a party who are making a motor trip to the stampede at Calgary this week, and will also visit other prairie points on the outing.

The members of Creston L.O.L. and L.O.B.A. will march to the United Church on Sunday evening, July 12th, for service at 7.30. Members will meet at the lodgeroom, Mercantile Hall, at 6.45 promptly. Visiting brother and sisters welcome.

Wm. Ramsay of Nelson, public works department district engineer, was here on an inspection trip at the end of the week. Up till the end of the month he had received no word one way or the other as to the road diversion at Arrow Creek.

With the possible exception of Alice Siding every school in Creston Valley is on the lookout for at least one new teacher, and the secretaries of the various trustee boards are getting very heavy mails these days from applicants for the vacant positions.

The fill at Kootenay Landing is completed and the trains that have been hauling fill from the Canyon and Yahk were taken off at the end of the week. This work has been under way for the past four years and has necessitated an expenditure of at least $125,000.
