THE CRESTON REVIEW

VOL. XXV. CRESTON, B. C., FRIDAY, JANUARY 25, 1935 No. 39

Junior Basketball Going Strong

Made up of School Talent Entirely—Canyon Squads Lead in Both Divisions—Erickson Playing Under Handicap.

The junior basketball league, which has been operating since October, has now completed 60 per cen , of the games scheduled, the greater number of games in which have been played at Park pavilion, Creston. Teams entered come from Canyon, which supplies both a oys and girls team; there is a girls' team from Erickson, and Creston has a girls' team and two boys' teams from the High School. Creston public school also has a boys' and girls' squad.

Up to the middle of January, when the last games were played this month, Canyon is leading in both divisions, the boys having won five out of six games and the girls with a sho ing of four out of six. The Canyon hoopsters are being trained by Principal Hunden of the public school at that point. The Canyon talent is divided as follows: Girls—Ethel VanAckeren, Pearl Gillespie, Flo rence Spencer, Anne Gartland, Grace Bond, June Browell, Minnie and Margaret Huscroft. Boys—Frank Clayton, Bert Huscroft, Douglas Sinclair, Charlie Kol hammer, Bud and Earl Browell, Bruce Niblow, John Spencer.

Erickson is playing basketball for the first time and the girls' quintette, with a little more experience, should give a good accou t of themselves. These players are handicapped in having to practice and play their games at Creston, as there is no building suitable for the sport in Erickson The team is handled by Principal Cobus of Erickson public school. So far they have not been able to chalk up a win, but they invariably make the play interesting for all opponents. The team is selected from Bertha Fraser, Stella Tompkins, Margared Bundy, Anita and Leona Heric, Gwen. Putnam, Margaret Bale.

In Creston public school squads there is a talent that will surely provide first-class senior material shortly, especially in the girls' section where the ladies are tied with the high girls for second place. The boys have not fared so well but, at that, have managed to nose out the High School B team, and are in third place in the league. The good coaching the public school material has receive can be readily gauged by the showing made, as most of these people are beginners, and their fine standing has been made possible by the excellent handling by Principal Marriott and vice-principal Adam Robertson.

The high school teams are not as strong as last season, due the fact that some of the best playe s have graduated Mrs. Levirs and Nell Payne have handled the girls' teams with much success. In this section, with the exception of Hazel Sinclair and Hughena McCreath, all the players are last year's public school talent. Principal Levirs, coaching the boys, has produced a high school A team holding seco d place and a high school B in fourth place. In the A's there are Chester Goplin, Clifford York Harold and Lloyd McLaren from last years squad, and Wilf. LaBelle from the public school. The players on the other teams are:

High school B—Desmond Truscott Sam Nastasi, Billy Weir, August Morabito, Gordon Martin.

High School Girls—Hazel Sinclair, Hughena McCreath, Marion Cooper, Beryl Palmer, Helen Staples, Maisie Ferguson.

Public School Girls—Edith Johnston, Doris Hendy, Helen McCreath, Ruby Palmer, Thelma Erickson, Goldie Walker, Thelma Lowther, Evelyn, Nastasi, Arthena LaBelle.

Public School Boys—Frank Bourdon, Irwin Nickel, Ariel Schade, Glen Clark Russell Gabelhei, Ronald Cooper, Norman Phillips, Bud Lowther Clayton Sinclair, Bud Wightman.

Canyon

Birth—At Creston hospital, January 20th, to Mr. and Mrs. Barnhardt of Glenlilly, a daughter.

Mrs. M. L. Craig and daughter, Shirley, are back from a ten-day visit with Mrs. Arvid Samuelson, at Hazel Creek.

Mrs. McRobb and her daughter, Mrs. Davis, are leaving today for Rossland, where the former will be a guest at the Davis home for a couple of weeks.

Andy Hogland, who is working at the C.P.R. portable tie mill east of Yahk, was home at the weekend, and reports fully ten feet of snow in that section.

John Lloyd, the Creston-Canyon-Lister mail carrier, is having the toughest traveling in the three years he has had the contract. At present he makes the trip with horse and cutter.

The services at the United Church on Sunday afternoon was taken by Manfred Sameulson, who also officiated at Wynndel the same morning. Pastor Walker was able to take charge at Creston.

Godfrey Samuelson, who, wi h his brother, Arvid and John Johnson, are taking out cedar posts at Hazel Creek, was home at the weekend. He reports operations slow due to the very heavy snowfall.

Godfrey Vigne got through here with the government snowplough on Saturday and has opened up a regular tunnel for traffic. Between the Martin Nelson and Dad Browell places drifts four feet deep most of the way had to be coped with.

The coldest weather of the winter was registered on Sunday morning when the mercury went down to 19 below zero, and was never higher than two below all day. It was five below on Monday, but Tuesday was real mild with the mercury standing at 16 aboue.

Canyon Christmas tree entertainment committee submit the financial statement as follows: First whist and bridge, $15.25; dance, $29.50; donation $2.50; whist $11 40. Total $58.65. Expenses: Presents for 102 children. $34 51; candies, nuts and oranges. $15.80. Total $50.31. After buying a new Santa Claus suit what is left of the balance of $8.34 will be donated the Can on Hall Association who gave the hall re t f ee for the entertainments for raising money for the tree.

Okanagan Centre news in Vernon News: Mr. and Mrs. VanAcker n, who have just returned from their hon ymoon in the Kootenays, were g ests of honor at a surprise party last Monday evening, when a number of young people gathered at the home of Mr. and Mrs. Allen to congratulate the bride and bridegroom. Games were the order of the evening. Mr. VanAckeren is the bookkeeper at the Okanagan Valley Land Co., and the bride was M ss Gwen Wilson of Sirdar, B.C.

Kitchener

Kitchener experien ed the coldest weather of the winter Sunday morning when the mercury hit 32 below zero.

B. Johnson, A. Lepage and Harry Redmile are busy cutting their winter supply of ice. Z. Geroux and team ha e the hauling contract.

The weather continues to be cold and with increased snowfall it is almost impossible to travel even a short distance. The busses have not been through for at least a week.

Mrs. Tom Foisy, and daughter, Beth, of Victoria, arrived on Saturday from Spokane where she has been the past two months on a visit with her son and daughter-in-law, Mr. and Mrs. T. C Foisy.

Oldtimers claim the snowfall of late December and so far in January is the worst they can recal The snowplough has not been able to get through and travel is out of the question between here and Creston as well as to Yahk

A bridge to raise funds for the baseball club on Wednesday evening last, in the Paulson store building, realized $3.20 clear. A good crowd attended. These bridges will be repeated every Wednesday and prizes given out at the end of every four weeks to the high and low scores.

Alice Siding

Notwithstanding the gales that prevailed Friday Alice Siding school was open as usual. From reports most other schoo s were closed.

The contract for the school wood has just been let to George Willis and Billy Mather. The former is in the fuel business with Joe Miller.

The Dyking Company bulldozer made a good job of opening up the road through here to Creston. The ordinary snowplough was to light for the job.

This section now has had a total snowfall of almost 60 inches, but notwithstanding the deep snow, Mr. Husband is getting through regularly with the mail.

The Serenaders orchestra dance at Compton's Hall tonight should attract a large crowd as their music is the best heard in the valley for a long time. The admission is 50 and 35 cents, which includes supper.

What is claimed to be a B.C. record for dressed hog production has just been established at the Peltzer ranch where, last week, an animal not quite ten months old was butchered and showed a dressed weight of 440 pounds. Almost 60 pounds of lard was secured.

A marriage of interest here was solemnized at Holy Cross Church, Creston, on Tuesday morning, when Father Choinel united in wedlock Joseph S. Schmidt and Miss Annie V. Jorgenson of Creston. The bridesmaid was the groom's sister, Miss Florentina Schmidt, and the groom was supported by Adrian Kromhout. A reception followed at the home of the groom's mother in Creston. The young couple are to live on the groom's propert here.

Hospital Ladies' Session Brief

Install Electric Bell System on Top Floor—Co-Operating in a Hospital District Public Meeting Early Next Month.

The January meeting of Creston Hospital Women's Auxiliary was held Thursday afternoon, and despite the blustery weather that prevailed there was an attendance of 18 members. Mrs. F. V. Staples, vice-president, occupied the chair in the absence of the president. Mrs. R. Stevens.

Mrs. Jas. Cook reported for the buy ing committee that electric bells have been installed on the upper floor of the hospital, at a cost of $28, and asked that the Auxiliary fit up a cupboard at the hospital in which to keep the reserve of linen. This was authorized.

Donations acknowledged were three colored curtains from Mrs Maxwell, and feathers from Mrs. Ferguson. Miss Irene LaBelle and Miss Liphardt were named visiting committee for the next month. It was left to the executive to make arrangements about refreshments and a committee to take charge of the kitchen for the dance on February 15th.

Subject to the approval of Creston Board of Trade, which will provide speakers, a public meeting on the subject of Hospital Districts will be held in the United Church hall on Tuesdry, February 5th. at 8 p.m Mrs. C H. Ha e appointed to represent the auxiliary at the annual meeting of Creston Valley Hospital Association.

Tea was served by Mrs. Axel Anderson Mrs. Canute Anderson and Mrs. J. A. Avery.

Wynndel Institute Plan Fall Fair

Date Will be Set at the February Meeting and Needlework List Issued Shortly—Year's Standing Committees Struck.

The January meeting of Wynndel Women's Institute was held at the church on Thursday afternoon last 19 members and two visitors were present with the president, Mrs. T. E Slingsby, in the chair.

The matter of sending a donation for Garden of Peace was left over until February. Letters re needy family dealt with. Fall fair discuss d and it was decided a fair on a moderate scale be held this year and W J. Cooper be asked to assist with the flower exhibits. Date will be set at the February meeting. Lists of exhibits in embroidery work to be issued as soon as possible.

The institute standing committees for 1935 were named as follows: Child Welfare and Public Health, Mrs. Packman. Education and Better Schools, Mrs. Davidge. Ways and Means, Mrs. Hagen Hospital committee, Mrs J. G. Abbott and Mrs. M. Wigen. Neighborhood Needs, Mrs. C. Ogilvie. Sick visiting, Mrs. Vic. Johnson and helpers.

Friday, F bruary 1st, was suggested as a date for ratepayers meeting to discuss organizing hospital district. A bridge tea was arranged f r January 24th. at the home of Mrs. M. Hagen. The admission will be cup and saucer or spoon. There will another bridge drive in February, also at the home of Mrs. M Hagen.

Two new members were voted in. Mrs. Abbott donated ice cream, the same bringing in one dollar. Tea hostesses were Mrs. Towson, Mrs. V. Johnson, Mrs. M. Hagen and Mrs. P. Hagen.

Lister

Vernon Donaldson, who is an appendicitis patient at Creston hospital, continues to make a very satisfactory recovery.

If the weather is suitable it is just possible the new schoolhouse at Huscroft will be used for the first time on Monday next.

The severe weather and excessive snows has cut the school attendance both here and at Huscroft, considerably the past week.

Despite the sub-zero temperatures that prevailed on Saturday, Huscroft's new schoolhouse was housewarmed with a novelty dance that was well attended by local residents and passed off splendidly although the music arranged for was unable to get through and local musicians were conscripted for the affair. The prize for waltz was won by Miss Agnes Sinclair and Fred Huscroft, and the spotlight dance prize went o Mr. and Mrs. Bert Hobden, with Miss Leah Cannady and Clyde Huscroft winning in the balloon dance. A fine supper was served and everyone is complimenting Gordon Hurry and Alex Demchuk who were the committee of management for the affair.

The weather on Sunday morning was about the coldest ever experienced at Lister. The official thermometer at Creston registered 23 below zero

The continued snowfall has forced John Lloyd, mail carrier to depend on horse and cutter for transport. Notwithstanding bad travel conditions he is making good time.

The Community Society are having a bridge at the schoolhouse on Saturday night, with Mr. and Mrs. Bird in charge. An interesting feature will be a talk by Col. Lister on his experiences in South Africa

A party of friends from Lister-Huscroft treated Harry Helme to a surprise party at his home on Tuesday evening of last week. The feature of the evening was cards, with an exc llent lunch at the close of an evening that all enjoyed.

Wynndel

Mrs. R. S. Smith of West Creston was a visitor last week with Mrs. Nathorst.

Miss Dorothy Smith of West Creston is at present on a visit with her aunt, Mrs Nathorst.

The vote of thanks given at annual meeting for Christmas tree should have read Mrs M. Hagen.

O. M. Samuelson of Canyon had charge of the service at the United Church on Sunday morning.

A bridge drive was held on Saturday evening at the home of Mrs. P. Hagen by the basketball club. High score prizes went to Miss O. Hagen and C. Wilson. Consolation honors to Mrs. M. Hagen and J. G. Abbott.

The bulldozer, which is used by the Dyking Company clearing the right of way for the dykes, was pressed into service opening up the highway from Wynndel to Erickson on Saturday It made good time, 2½ hours from Wynndel to town.

A ratepayers meeting has been called for Friday, January 25th, to discuss the proposed consolidated high school at Creston. Trustees Sixsmith and Glasier and J. G. Abbott attended the conference at Creston on this matter a couple of weeks ago.

An hilarious basketball game between the Dynamiters and a picked team of girls was the main feature of the K.K. Klub meeting Wednesday evening last. The boys won by a 31-27 margin in spite of the fact they were playing against seven players and the referee. After lunch dancing was enjoyed to music by the Ness-Goplin orchestra.

On Thursday a heavy blizzard struck this section and made travel almost impossible. Hay haulers found it out of the question to find the road on the slough so bad was the snow drifted. A real cold spell set in on Saturday with the temperature reaching 26 below Sunday morning. Snow on Monday and Tuesday has eased things off, and th thermometer has since gone well above zero.

Sirdar

Chas. Wilson is a business visitor to Nelson this week.

The C.P.R snowplow passed through here Saturday, its destination being Nelson.

Mrs. T. Rogers, who has been a patient in Nelson hospital, returned home Friday.

Mrs. Martin was a visitor to Creston last week attending the consolidated school conference.

Chas. Wilson, accompanied by Joe Mannarino, took the latter's father to Creston hospital, Saturday.

James Mannarino had to be taken to Creston Hospital on Saturday suffering with a severe attack of rheumatics. He is reported much better.

Fred Martello was a visitor to Creston Hospital on Saturday where Mrs Martello is a patient. The latter and baby are coming along nicely.

The bridge crew under G. McLean has arrived at Atbara and will be here for some time putting in extra braces on the bridge crossing the slough.

Owing to the heavy snowfall and snow drifting the Greyhound stage did not get through on Frid y. The cold snap that deconded here about the middle of last week is very trying to those whose duties are outside.

Mr. Stevens, district road engineer, from Nelson, was a business vititor Thursday inspecting the progress of work at Atbara. Despite the inclement weather experienced the past week much headway has been made and crews are operating from both ends of the work.

A very large covey of Hungarian partridge has been observed several times the past week in the vicinity of Atbara, and though wild seem to be in good condition. In former years these interesting little game birds were quite numerous in this locality, and it is hoped that they will settle down in their old habitat.

Six Weeks Will Complete Dykes

Less than Two Miles to Build—Severe Cold Causes Temporary Shutdown—Duck Creek is Turned Into New Channel.

The decidedly cold weather that set in on Saturday morning and the badly drifted state of the highways are a combination that has called a halt in dyke construction on the Creston Reclamation Company, Limited, area on the flats. 13 below zero on Saturday was a trifle too much for the drivers of the big wheel scrapers, while about the same time the public works department conscripted the bulldozer to cope with road opening operations in the area between Wynndel and Kitchener, it being the only machine powerful enough to make headway in the well packed drifts at many points on the roads.

At the end of the week it was stated that 10½ miles of the 13 miles of dyke that has to be built is now fully completed, and with reasonably good weather another six weeks will finish the whole job. Of the uncompleted portion about 1000 feet at the Wynndel end is dragline work—the balance can be handled by the big scrapers that have been doing such fast work along the Kootenay River bank.

At the middle of January the Duck Creek diversion was successfully com pleted. A flume 150 feet long, 12 feet wide and 5 feet high carries the water from the C P.R. right of way over the old channel into its new course, passing down through the properties of Mrs. Paul Hagen, Carl Carlson and Matt. Hagen, ending on some property the Reclamation Company has purchased from the estate of the late Chas. Faas.

The Duck Creek diversion is 16 feet wide and 2600 feet long. The excavation work on this was done by the dragline. On th s piece of construction it was necessary to use about ten thous. and feet of timber for foundations and cribbing in various places in the new channel.

The Imperial Oil Company has recently unloaded a car of gasoline in drums which will be stored at stragetic points along the route of the dyke to assure of no interruption in operations should the weather break up, as dyke work must be proceeded with.

It is announced that more than 3000 acres of the dyked lands will be cropped in 1935. Much of the acreage will be sown to coarse grains. Some experim ental work is expected to be tried out in growing peas and soft wheat.

While operations at the south end were somewhat slower than anticipated, due to breaking in machine operators, much of the time lost has been made up by the scrapers which have put up dyke along the Kootenay River bank somewhat faster than was expected, and there is no doubt now but that the work will be completed almost at the date originally estimated.

Erickson

Mrs. H. Langston was a Cranbrook visitor a few days last week

Mrs. J. Fisher of Cranbrook is a visitor here, guest of her sister, Mrs. McMillan

There will be Anglican Church service at the schoolhouse on Sunday afternoon at 3 o'clock

Sandy Telford, who has been holidaying at his home here, returned on Monday to resume his studies at Campion College, Regina, Sask.

Mrs. T. Wilson and children, who have been visiting her parents, Mr. and Mrs. Healey, left for their home in Nelson at the first of he week.

Travel over local roads was just about out of the question until Monday, when the bulldozer, used on dyking operations on the flats, was put through.

Some idea of how badly the roads were filled in by the weekend snow and blow will be gleaned from the fact that it took 8½ hours to get through from Creston to Erickson via the lower road with the bullbozer. Up to Wednesday morning the snowfall at Erickson is placed at almost five feet.

The annual meeting of Erickson Ladies' Hospital Auxiliary was held at Mrs. Palfreyman's on Wednesday last. All the former officers were elected by acclamation for another year, as follows: President, Mrs. F. Putnam; vice-president, Mrs. A. McKelvey; secretary-treasurer, Miss Edith Palfreymad. It was decided to hold a series of bridges at member's homes twice a month during the winter, with Mrs. Palfreyman and Mrs McKelvey as hostesses at the first of these at the home of the latter.

84.21% INCREASE

84.21% more Salada Tea was sold in Western Canada in 1934 than in 1933. Public preference for finest quality tea made this huge increase possible.

'SALADA' TEA

Putting the World Together Again

A new book recently issued under the title "Courage For To-day" begins with a little story that has a lot of meaning in it. A man gave his small son a very elaborate jig-saw puzzle. It had been made by tearing a map of the world into little pieces. In a short time the child reported that the picture of he world was all put together. "How could you have done it so fast?" asked the father in amazement. "Oh, it was easy," answered the child. "You see, there was a picture of a man on the other side. When I put him together, the world was put together, too."

Men, and parties, and governments are all trying to put this old world together again. The number of plans and theories and policies advocated as the only way in which this gigantic task can be accomplished are beyond computation or classification. Speeches teem with suggestions of all kinds, newspaper and magazine articles flow in an uninterrupted stream from the printing presses, books are piled upon books, all presenting the speaker's or writer's idea of the particular thing that must be done. To-day's brilliant suggestion is completely destroyed by to-morrow's conribution until practically all of us are in a fog.

Men of prominence, leaders of their fellow men, change their views over night and to-day are found denouncing that which they vigorously upheld and championed yesterday; whole nations almost in the twinkling of an eye abandon policies and forms of government which for scores of years, even centuries, have been accepted as traditionally sound and wise. One group declares that mankind must retrace its steps backward to the tribal communal state and so they declare for Communism. Another group says man must be deprived of those personal liberties won by him through centuries of struggle and must be regimented, controlled and ordered like privates in an army and be made to surrender all hope or right to profit above a standard form of living which may result from his individual initiative and efforts, and this group declares for State Socialism. A third group holds these other groups to be all wrong and adheres to the view that man is incapable of self-government, that democracy is an abject failure, and that only a selected few are wise enough, strong enough, capable enough to govern and that they should take full control into their hands, and retain it by force if and when necessary, and impose their will and ideas upon all others. They declare for Fascism and dictatorship.

Each and all of these groups fail to recognize and learn the simple lesson which the small boy with his jig-saw puzzle so quickly demonstrated, namely, that if man himself is made right the world itself will be righted. Business in the hands of dishonest men will be dishonest business, and its mere transfer from private to governmental control, whether Democratic, Communist, Socialist or Fascist, will not make business honest. There has been as much, if not more, graft and corruption, and just as many mistakes made, if, indeed, not more, under governments as there have been in public business. Private business has corrupted and bedevilled governments, but, so too, have governments corrupted, bedevilled and destroyed private business and made huge and costly blunders. In fact, governments, supported, even driven by their people, are more responsible for the present ills of the world than is private business as now constituted.

And who is responsible? Many an honest business man has been forced to adopt unethical, even dishonest practices, because his customers have demanded it of him. The same is true of high principalled men entrusted with the duties and responsibilities of government. A government adopts a policy in the general public interest, it imposes a tax for the necessary purposes of government, and the average man and woman cudgel their brains to devise ways and means of evading the tax and escaping their responsibilities. One person smuggles to escape paying Customs duties, another swears to a false affidavit to avoid paying a gasoline tax, still another "doctors" an income tax return, and so it goes.

Completely changing the system will not effect a cure; it is man himself who must change. It is the human factor that is wrong, and until it is made right there will continue to be dishonesty and wrongs no matter what the system may be, and the larger the degree of power placed in the hands of a few the greater the wrongs will be because the greater the power the greater the opportunity for evil, and because the possession of power always leads to the grasping for more power regardless of the methods whereby it may be obtained.

Governments are created to govern a country; not to usurp the rights and destroy the liberties of the people. People should control and direct their governments; not the government control and direct the people. It is the duty and responsibility of governments to check and control the dishonest and eliminate wrongs and abuses imposed by individuals or groups of individuals upon others. That is the function of governments acting in the interests of all, but it is not a proper government function to interfere with or usurp the rights of individuals in the proper ordering of their own lives and in the carrying on of their legitimate occupations.

The inalienable rights of man are life, liberty and the pursuit of happiness. Life is more than money and business; liberty is much more than a regimented mode of existence and a stated standard of living; the pursuit of happiness must be left to the individual otherwise he cannot be happy. God conferred on man a mind and will of his own, and man must work out his own salvation, and, aided by such institutions as he may himself devise and set up to assist him, through education and otherwise, rise to higher things and nobler conceptions.

Politicians, financiers, economists, social workers,—all must come to a realization and acceptance of the fact demonstrated by the small boy's jigsaw puzzle, namely, that the speediest way to put this old world together again is to put man himself together as a Divine Creator intended him to be.

Helium gas, hitherto believed to be a monopoly of North America, has been found in Bulgaria.

The man who is honest with himself cannot help being that way with others.

A Resourceful Man

Forgetful Husband (to friend)—I want you to help me. I promised to meet my wife at one o'clock for luncheon and I can't remember where. Would you mind ringing her up at our house and asking her where I am likely to be about that time?

Killed Mountain Lion

Alberta Man Had Narrow Escape When Beast Charged

What is presumed to be a mountain lion was killed the other day by Napoleon Whitford near McRae, 20 miles north of Ashmont, Alta.

The animal has short hair and of a light reddish brown color. The body measures close to five feet in length with a tail about two and a half feet long. The skin when stretched measured eight feet from tip to tip.

The animal was killed with a .22 calibre rifle, five shots being fired before the lion was stopped. The first four shots merely glanced off the beast's head, partly stunning it. It had turned on Mr. Whitford and was charging down on him when it was dropped by a bullet in a vital spot just behind the ear.

A three-year-old steer which was killed in the vicinity the previous night is believed to have been slaughtered by the lion. Tracks of four other animals, similar to the ones made by this one, have been seen in the same locality.

According to the oldest Indian in Ashmont, a mountain lion has never before been known to visit this part of the country.

SHE PLAYS ORGAN AT 75 YEARS

Takes Kruschen To Keep Rheumatism Away

Writing to tell how she keeps her activity, this wonderful old woman states:—

"My hands were becoming so crippled that I had to give up piano and organ playing—and almost entirely gave up knitting. I have been using Kruschen Salts for nearly two years, and am very pleased with the result. Last August I played two church services on the organ, and hope to do so again this August. My fingers are nearly straight, and quite supple, and I am 75. I have recommended Kruschen Salts to many people."—A. A. C.

The six mineral salts of Kruschen have a direct effect upon the whole bloodstream, neutralizing uric acid, which is the recognised cause of rheumatism. They also restore the eliminating organs to proper working order, and so prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

Chemists have succeeded in coloring wallpaper so that it will not be faded by light.

INFANTS' COLDS Relieved!

Young children easily catch cold. So Mrs. Russel Ward, of Hilton Beach, Ont., wisely says: "If I notice that there is any sign of a cold I give Baby's Own Tablets and find they are a great help." Thousands of mothers do the same not only for colds but for fretfulness, indigestion, constipation, teething troubles, colic, upset stomach and so on. Baby's Own Tablets are *safe* and sure in relieving childhood's common ailments. Price 25c.

Dr. Williams' 13G

BABY'S OWN TABLETS

Color Does Not Matter

The color of honey which varies from water-white to a very dark brown does not affect its food value in any way. The difference in color is caused by the absorption of light in varying degrees by certain substances in the nectar of the different flowers.

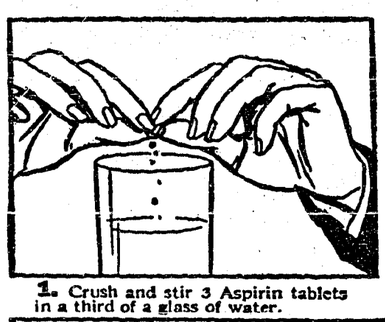
BUSINESS ON THE UPTURN

A definite indication that conditions are improving and that business is on the upturn is shown by the fact that the Salada Tea Company sold over 84% more tea in Western Canada in 1934 than in 1933. This is especially significant since Salada is a quality tea.

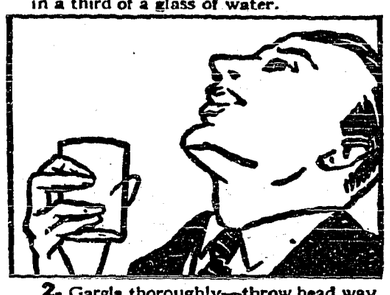
The Black Forest, or Schwarzwald, of southwestern Germany, has an area of 1,800 square miles. It is a favorite spot for tourists, and derives its name from the dark hue of the firs that grow in the region.

The head and tail of the Australian stump-tailed lizard are so nearly alike that it is difficult to tell them apart.

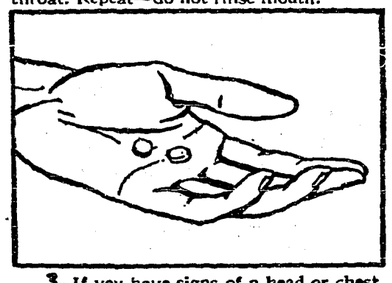
NOW SORE THROAT EASED IN LESS THAN 3 MINUTES!



1. Crush and stir 3 Aspirin tablets in a third of a glass of water.



2. Gargle thoroughly—throw head way back, allowing a little to trickle down throat. Repeat—do not rinse mouth.



3. If you have signs of a head or chest cold take 2 Aspirin tablets—drink a full glass of water. Repeat in 2 hours.

Rawness, Irritation Go at Once Note Directions for New instant Treatment

Incredible as it may seem, doctors are now prescribing a way that relieves raw, painful sore throat in as little as 2 to 3 minutes!

All you do is crush and stir 3 *Aspirin* tablets in ½ glass of water and gargle with it twice.

Aspirin tablets disintegrate so *completely* no irritating particles are left. Results are immediate. At once soreness is eased—discomfort allayed.

Everywhere throat specialists urge this *fundamental treatment* instead of less effective old-time "washes" and "antiseptics." Remember this. And when you buy, see that you *get* ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer on every *Aspirin* tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

The Hero's Reward

Did Not Even Get Thanks For Brave Deed

Heroes are born not made. There was one of them on a street at Baltimore, Md., the other day. He was dawdling on the sidewalk when he saw some children in a parked motor car release the brake and the car started rolling down a hill, while their mother stood distractedly on the sidewalk.

In an instant he took in the situation and the frightful tragedy that might ensue. He rushed after the car, caught up, leaped in and put on the brake but not before the car had gone careening upon the sidewalk. Medals have been awarded for less, but in this case a policeman rushed up and the hero had great difficulty escaping arrest for reckless driving.

And when the distracted mother arrived, her only comment was: "Please will you put the car back where you got it from as quickly as possible? If the children's father discover it's gone, he will be simply furious."—Brandon Sun.

There Is Another

The Border Cities Star says: "Every man on the street," City Solicitor Bruce J. S. Macdonald tells the Lions Club, "thinks he could step into public office and handle the job better than the man who is in. It is the only business I know where that attitude exists." Ah, but there is another one, Mr. Macdonald. It is the newspaper business.

Western North America's dark crow is mostly white.

Weird Happenings

Strange Phenomena Attracts Attention At Home Of Ontario Farmer

Weird and unearthly happenings at the home of Joseph Quinn, farmer, residing in North Burgess township, about 14 miles from Perth, Ont., have aroused the countryside for miles around. Stones flying through the windows, thrown apparently by no human hand; irons used for pressing clothes walking downstairs of their own volition; a teapot which jumped off the stove into the woodbox; pictures tumbling from the walls without cause, and other mysterious happenings, have focused the attention of the neighborhood.

So serious has the matter become that Ontario provincial police visited the home to investigate. Many persons in the neighborhood vouched for the truth of the happenings.

Not Due To Luck

The victory of Wolfe at Quebec was not due to luck in finding the path up the steep surrounding cliffs, but to the thorough work of a British spy known as "This Intelligent Gentleman." This spy furnished Wolfe with complete plans of every detail of the city. Wolfe died with the map in his hands.

An anti-peritonitis vaccine has been called a 100 per cent. success after 1,000 tests. It assembles the whole corpuscles where infection may set in.

Sign in a San Francisco cafe: We know that your check is good, but we don't trust the banks.

Guard against Rickets with Cod Liver Oil

PLUS ADDED DIGESTIBILITY

All babies need the anti-rachitic value of Vitamins A and D, found in pure cod liver oil. Scott's Emulsion is rich in these Vitamins, PLUS the easy digestibility that results from Emulsification. PLUS the body-building aid of hypophosphites of lime and soda. Pleasant to take, Scott's Emulsion is tremendously more effective.

SCOTT'S EMULSION

THE COD LIVER OIL WITH THE **PLUS** VALUE

SAAR TERRITORY PASSES INTO THE HANDS OF NAZIS

Saarbruecken, Saar Basin Territory.—Adolf Hitler's Saar opposition crumbled completely and the Saar, in effect, passed into Nazi hands.

The League of Nations government was still in nominal authority, but it was evident the league commissioners, bowing to the will of the people expressed in the plebiscite's 90 per cent. pro-German vote, meant to stand to one side.

As unconfirmed reports reached this capital that five persons had been killed and several wounded in post-plebiscite fighting, the demoralized anti-Nazi Common Front moved its headquarters across the border to French soil.

Despatches from Forbach, France, said several hundred Saar refugees arrived on French soil. Four of them reported they had been fired upon as they started to turn back to the Saar. French authorities were anicipating many thousands of self-exiles, the despatches said.

Bluecoat police, controlled by Nazis, moved into the Socialist welfare centre from which the anti-Nazi plebliscite campaign had been directed, swept out several hundred Hitler opponents refuged there and occupied the building.

Berlin.—Appeals to buy Saar goods flooded Germany further to prove the Nazis meant business when they promised Saarlanders they would be made to feel at home in the fatherland.

Low Interest Rates

Ontario Government Secures Lowest Rates In Province's History

Toronto.—Sale by the Ontario government of treasury notes at the lowest rate in the province's history was announced by Premier Mitchell F. Hepburn. The premier said a $20,000,000 issue has been disposed of at an interest rate of 2.25 per cent.

The notes are reported to be for a two-year term, and will take care of the six per cent. issue of some $5,000,000 which matures on Feb. 1, and will be used also to refund short term indebtedness and for certain capital expenditures.

France Is Anxious

Fear Saar Plebiscite Not Enough To Pacify Hitler

Paris.—A hope his victory in the Saar plebiscite would satisfy and pacify Adolf Hitler is widely held in France, but there is an undercurrent of anxiety lest he become more dangerous.

Officials were startled by the feeble showing of the status quo adherents, but they took the outcome with the best grace possible, reminding the world that France maintained neutrality and the vote, after all, was purely an affair between Hitler's friends and his foes.

Deal With Hitch-Hikers

Lansing, Mich.—Upon the thumber and the thumbee alike will the heavy hand of the law descend if the Michigan legislature acts favorably upon a bill introduced in the house to end the era of the hitch-hiker. The proposed act would make it a misdemeanor for one to stand at a roadside and solicit a ride and a misdemeanor for an automobile driver to pick up a hitch-hiker.

Reconciliation Is Sought

London.—A reconciliation between former King Alfonso of Spain and Queen Victoria will be sought by their eldest daughter, now Princess Alessandro Torlonia, when she brings her husband here in the next few days for presentation to the former queen.

Prefers Newspaper Advertising

Hamilton, Ont. — Candidates for municipal offices get their best publicity in newspapers and should dispense with other means of advertising, Mayor H. E. Wilson declared during a discussion at a Hamilton hydro meeting.

W. N. U. 2082

Farm Board Appeals

Board Of Review For Alberta Sitting At Edmonton

Edmonton.—Faced with a list of 36 appeals from farmers in this district, the board of review for Alberta, appointed under the federal Farmers' Ceditors' Arrangement Act, has begun its sittings here.

The board, composed of Mr. Justice Ewing, chairman, with S. H. McCuaig, K.C., representing the creditors, and H. B. Macleod, High River, for the debtors, will hear three cases daily for the next three weeks.

After the sittings here the board will leave for the north country and hear cases at Peace River and Grande Prairie. After three weeks in the north, the board will return to Edmonton, when annouucement will be made of further sittings.

General reduction of two per cent. in the rate of interest was shown by the board's first batch of awards. In some cases, rates on mortgages were cut from eight to five per cent.

Cheers For Brownlee

United Farm Women Of Alberta Applaud Ex-Premier

Calgary.—Mrs. Richard Price, of Stettler, was re-elected president of the United Farm Women of Alberta, at the annual convention here. It was her third term.

The women heard addresses by J. E. Brownlee, Dr. M. R. Bow, deputy minister of public health; Hon. J. S. Grisdale, minister of agriculture, and Mrs. Zella H. Spencer, Edmonton.

Rousing cheers were given by the 100 women delegates and many visitors when Mr. Brownlee, former premier, took the platform to speak, Mrs. Price, extending the thanks of the convention, said she hoped Mr. Brownlee would soon be back in his rightful post as "head of the Alberta government."

War On Timber Wolves

Edmonton Chamber Of Commerce Asks Government To Offer Bounty

Edmonton.—War was declared on timber wolves and cougars in Alberta by the Edmonton Chamber of Commerce, which will ask the provincial government to place a bounty on their heads.

Attention was drawn to the timber wolf crisis by the St. Paul Board of Trade which complained that deer in that district are being killed off by increasing numbers of wolves.

From the area west of Edmonton a report was received by the chamber that cougars were causing similar damage to big game.

Fox Fur Farming

Canadian National Fox Breeding Association Meet At Saskatoon

Saskatoon.—Fox fur farming in 1934 was reviewed by 40 delegates representing every province in Canada at the 15th annual meeting of the Canadian National Silver Fox Breeders' Association here—the first annual meeting in the history of the industry to be held in a city west of Toronto.

Technical changes in the constitution came up for discussion, with George Callbeck, of Summerside, P.E.I., president, in the chair.

The last annual meeting was held in Quebec city.

Celebrates Birthday

Veteran Of Riel Rebellion Still In Good Health

Thistletown, Ont.—Edward C. T. Doole, veteran of the Riel rebellion and one of the rebel's guards pending the latter's removal to Regina, has started on his 78th year of life, still in good health and of youthful appearance for his years. Doole celebrated his 77th birthday at his home here on Jan. 14. He came to Canada from Northern Ireland more than 60 years ago.

Urge Trade Treaty

Ottawa.—Negotiations of a trade treaty with the United States will again be urged in the House of Commons this season by William Duff, Liberal member for Antigonish-Guysboro.

VICEROY BUYS NEW PLANE

LORD WILLINGDON

So satisfactory have been the journeys made by air to various parts of India in the past two years by the Viceroy of India that Lord Willingdon has purchased a large four-engined plane for regular use in travel about the sub-continent.

Would Revise Plan

Alberta Member Advocates Superannuation For All Over 55

Calgary.—George C. Coote, M.P. for MacLeod, has urged superannuation of all persons over 55 years of age, guarantee of employment to persons under that age, stabilized farm prices at the 1926 level and a financial system controlled by the public.

Addressing the annual convention of the United Farmers of Alberta, Mr. Coote declared farmers would be included in the superannuation plan, which would pay about $50 monthly. It would not be compulsory. Under the plan thousands of younger men would replace those getting pensions.

Study Drouth Problems

Want Federal Commission To Investigate Conditions In West

Winnipeg.—Creation of a permanent federal commission to study the drouth problem in Manitoba, Saskatchewan and Alberta and direct corrective measures, was approved at the annual meeting of the Association of Manitoba Land Surveyors here.

It was suggested the entire area might be divided into zones suitable for grazing, cultivation, or eliminated from cultivation, according to the nature of the soil and available water supply.

Radio For Fire Chiefs

Winnipeg. — Equipping the automobiles of district fire chiefs with radio is proposed here by Fire Chief D. A. Boulden, who says much wasted time would be saved by transmitting calls through the police short wave equipment.

French Cabin Seaplane

Designed To Carry 70 Passengers On Trans-Oceanic Service

Bordeaux, France.—A huge French cabin seaplane designed for trans-oceanic service and capable of carrying 70 passengers made its first trip into the air recently.

The 37-ton ship, christened the "Lieutenant de Vaisseau Paris" and called here the largest aircraft in the world, sailed gracefully over lake Biscarosse in its trial flight. The crew numbered seven.

Trial trips to North and South America are planned soon after the preliminary tests here are completed.

The seaplane, propelled by six motors of 850 horsepower each, is 104 feet long, has a wingspread of 162 feet and stands 30 feet high.

Housed in its duraluminum and stainless steel fuselage, arranged with two decks, are 12 de luxe cabins, as large as those on trans-Atlantic liners, each of which has two beds and a private bathroom. There are accommodation for 10 other first class, and 42 second class, passengers.

Favors World Court

President Roosevelt Asks Senate To Ratify American Adherence

Washington.—In the interests of "world peace," President Roosevelt asked the United States senate in a special message to ratify American adherence to the world court.

The brief presidential message also urged that ratification "be given in such form as not to defeat or to delay the objective of adherence."

This was interpreted in senatorial circles as representing opposition to any new reservations.

Mr. Roosevelt asserted that for years both Republicans and Democrats in party platforms had favored adherence.

"The sovereignty of the United States," he said, "will be in no way diminished or jeopardized by such action. At this period in international relationships, when every act is of moment to the future of world peace, the United States has an opportunity once more to throw its weight into the scale in favor of peace."

Shark Is Stranded

Vancouver.—Ten feet six inches of live shark was found fighting for life on the shore of Stanley park in Coal harbor, where it had apparently been trapped by the ebbing tide. The giant fish, one of the shovel-nosed sharks, was almost dead when discovered by three men cutting wood on the beach.

Gets Bank Appointment

Ottawa.—Appointment of K. A. Henderson, of Toronto, to be chief of the securities division of the Bank of Canada has been announced here. Mr. Henderson was born in Ontario 31 years ago and was educated at the Gale collegiate institute and at McGill University, Montreal.

BRITISH LORD CHIEF JUSTICE WEDS

Here we see Lord Hewart, Lord Chief Justice of England, leaving the Parish Church of Totteridge, Hertfordshire, with his bride, the former Miss Jean Stewart, after the wedding ceremony. Lady Hewart formerly resided at Wanganui, New Zealand, and is a cousin of Sir William Peat, the Accountant and Lord of the Manor of Totteridge.

LEAGUE LIFTS ARMS EMBARGO AGAINST BOLIVIA

Geneva.—For the first time in its history the League of Nations took punitive action against a war-making member.

Because Paraguay has failed to accept the league's plan for peace in the Chaco, the league's Chaco advisory committee voted to reinforce the arms embargo against Paraguay and lift the embargo against Bolivia, which has accepted the plan.

Bolivia henceforth will be free to buy, and nations adhering to the league's embargo will be free to sell, armaments and munitions.

An unprecedented step, it creates delicate problems for the United States, inasmuch as the American congress, in authorizing the embargo, stipulated that it should be operated against both the warring nations.

Paraguay is given a further chance to accept the peace plan, since the resolution specifies that Feb. 24 is the date of expiration of the three months Paraguay has to decide finally concerning the detailed plan for ending the war.

Bandits Captured

Running Gun Fight In Illinois Results In Loss Of Lives

La Salle, Ill.—A gallant sheriff, a bank cashier and a bank robber died and three men and a boy were wounded in a series of gun battles that raged through three counties.

Three pitched engagements with 65 participating, took place along a 30-mile line as a quartette of gangsters sought to blast their way to freedom after they had been beaten back in an attempt to loot the Leonore (Ill.) State bank.

Charles Bundy, 54, the bank official, and Sheriff Glenn Axline, of Marshall county, were killed by the gunmen's bullets. Melvine Leis committed suicide a moment before his confederates were captured by a sharp-shooting posse on a bloodstained farm near McNabb, Ill.

Would Amend Company Laws

Former Minister Of Trade And Commerce Urges Action

Montreal.—A drastic amendment of company laws and practices, with the establishment of a Dominion commission of industry and commerce to administer all laws relating to these matters, was urged before the Canadian Club here by Hon. H. H. Stevens, former minister of trade and commerce and former chairman of the House of Commons committee investigating mass buying and price spreads.

Fire Destroys Mail

Edmonton.—Fire in the second mail and baggage car of a Northern Alberta Railways train to Waterways on Jan. 15 destroyed a quantity of mail, baggage and express. Loss is believed to be small. Salvaged mail was returned by motor truck to the post office here by Postal Inspector Riley who happened to be a passenger.

Cruisers Powerfully Armed

London.—Germany's new 10,000-ton "Deutschland" type cruisers are so powerfully armed no cruiser could stand up to them and so fast no existing battleship could bring action against them, according to "Brassey's Naval and Shipping Annual," for 1935, published here.

May Enter House Of Lords

Derby, Eng.—Possibility that J. H. Thomas, secretary for the dominions, might be going into the house of lords was suggested by the Duke of Devonshire, presiding at a meeting in honor of the cabinet minister.

President Of Surveyors

Ottawa.—Colin S. Macdonald, Dominion department of the interior, was recently named president of the Canadian Institute of Surveying, succeeding J. L. Rannie, Ottawa.

C. F. HAYES, Editor and Owner

CRESTON, B.C., FRIDAY, JAN. 25

HOME BREW

Recalling that the B.C. apple crop for the past three years has been fairly uniform. as to quantity, it too would look as if consumption over that period has been pretty much on on a necessity basis as the quantity in storage at the end of 1932, 1933 and 1934 shows little fluctuation, according to the figures supplied by the provincial fruit branch. At the end of 1934 unsold apples were placed at 805,032 boxes, as compared with 898,232 at the end of 1933, and 838,240 boxes at the end of 1932. Of the tonnage on hand at the end of 1934 about 30 per cent. was shown as being in common storage. The fruit es timates that at January 1st the Okanagan had 5646 tons of potatoie; and 2068 tons of onions still te be marketed.

Tree Fruit Board figures released as at January 4th through the Apple Cartel provide informative reading as to marketing. The 1934 crop has been placed at 4,278,243 boxes, and sales to that date were 39 per cent. to export and 37 per cent. to domestic markets. On the domestic market the preference has been for Wagners on which 67 per cent. has been sold. along with 55 per cent. of the McIntosh Reds. 71 per cent. of the Johathans have gone overseas, along with 55 per cent. of the Winesap and Newtowns, and 25 per cent. of the Romes. These percentages have to do with the total sales to that date, which accounted for but 43 per cent. of the total of the latter variety. In the matter of keeping qualities the Cartel figures would indicate that the Wagener is making the poorest showing. The dump on that variety to date has been 2.5 per cent., as compared with 1.2 per cent of McIntosh, .7 per cent. of Jonathan anb Romes, and .5 on Winesap and Newtown.

Investigations that have just been completed by Roger F. Borrett, chairman of the grades committee of the B.C.F.G.A., seem likely to make an end to the jumbo crate, the new container that figured somewhat prominently in 1934 apple marketing. It will be replaced by what is known as the Quebec crate, a container which can be used in the orchard, sells fruit and gives the fruit to the consumer as he wants it," according to Mr. Borrett, who points out that its use would do away with a tremendous carry over of boxes by the orchardist. The Quebec crate is most suitable for shipping poor varieties in as orchard run. It it 17½ inches long, 13 5-8 inches wide, with 11 inch sides and 12¼ inch ends. The ends being 1¼ inches higher prevent the fruit from being crushed when the other crates are being piled on top. The crate has a crepe liner both aronnd the end and the sides and the fruit is simply jumbo pack. The liner has been costing about two cents per crate but is said to be worth it as it keeps the fruit in much better condition and makes an attractive looking package when the crate is opened to show the fruit.

Cranbrook Courier: A general tightening up of the whole liquor situation must be faced by the provincial government sooner or later, particularly with regard to the number of young people, both male and female, who cannot attend a dance without a fla k of whiskey. The spectacle here Christmas and New Year's was worse than in Cranbrook's wide-open days. Prohibition did not prohibit and government control does not control. Many supporters of government control are "fed up" with the present system and may circulate a petition asking for a return to the old saloon system, which gave the younger people the gate. Operators of beer parlors are not anxious for the trade of young people and a number have openly expressed themselves on the question. Thirty years ago, when Cranbrook was considered "wild and woolley," no person would think of going to a dance with a bottle on their hip. whereas today we have the spectacle of a young man being considered a "sissy" and old fogey because he went to a dance to enjoy himself rather than to have his brain muddled. Unless there is a tightening up of conditions locally the city council will have to enforce more rigidly regulations for the guidance of dances and similar functions.

Annual Meeting

Letters to the Editor

Correction

Editor Review:

Sir,—In the report of the growers meeting, published last issue, you made an error in printing that a motion was passed asking that Creston district have a member ON the Tree Fruit Board. What was actually requested, was a representative OF the board, in this valley, as was stated in the report I gave you. The growers committee, and I think a majority, if not all the Creston growers realize that for this district to actually have a member on the board would be of little value and would increase the expense and inconvenience of the board's operating.

May I also point out that the meeting did not express itself as being against a connection with the B.C.F.G.A., should it be revived in other districts. This was implied by your heading. The decision of the meeting was to adopt, locally, a less expensive, and possibly more practical form of organization, but it was recognized that the necessity of co-operation with other sections still exists. This I trust will correct any misconception which may have resulted.

J. F. MURRELL.

That "Electric Sewer"

Editor Review:

Sir,—In the January 11th issue of your paper appeared a letter advocating the construction of what was termed an electric sewer.

It is obvious that the writer is unacquainted with the facts concerning his theory or he would not have made such sweeping statements without basis.

The "few watts" mentioned by Mr. Edmondson as the power of a toaster, are, as you know, a few hundred, which is a trifle different.

By definition in Webster's dictionary a sewer is "An artificial conduit to carry off household waste, such as slops, waste water from sinks, baths, etc., and the excreta consisting of urine and faeces." This proposed device is not a sewer, because it would dispose only of bodily wastes—not tap water or similiar substances.

Also hydrogen sulphide driven out of solution would rise up the chimney by convection currents and descend on the town to, sooner or later, blanket it with its noxious fumes.

Mr. Edmondson states that "Quicker than it takes to burn your toast the excrement is reduced to ashes." Taking the time for this oxidation as 1½ minutes the requir d power would be at least 10,000 watts, which would necessitate the construction of special transformers of high wattage on the power line of West Kootenay Power & Light Company. This is scarcely feasible.

The cost per operation would be about four cents, therefore the average family cost would be 16 cents per day, almost $5 per month. Added to all this would be the cost of heating the cement block with a volume of about 2500 cubic inches, which would double the cost. Then, including the loss due to inefficiency the cost per family per year would be $150, or $30,000 per year for the village. which would easily pay for an efficient sewer system in two years.

Assuming that by an "electric torch," generally acknowledged to be an illuminating device, Mr. Edmondson means an electric furnace, the cost for construction alone would be considerable.

Added to all these disadvantages is the disagreeable task of removing the residue. Maybe, "The man who settled our former greivance" is prepared to invent an automatic ash distributor.

The purpose of this letter is not to maliciously criticize Mr. Edmondson's inventive genius, nor to advocate the present lamentable system of sewage disposal, but to enlighten the worthy citizens of our fair town of the impracticability of Mr. Edmondson's "electric sewer."

EDWARD ARGYLE.
LLOYD McLAREN.
GEORGE DODD.

Meetings Discuss Hospital Districts

Valley Points to Hear Speakers on New Plan of Financing Hospitals—Legislature May be Asked Make Plan Law.

A series of meetings are being planned by the Womens' Hospital Auxiliaries of this district, at the request of the hospital directors, at which members of the Creston Board of Trade will provide the speakers, who will explain the working of the proposed Hospital District Plan. It is planned to ask the provincial government to pass legislation at the forthcoming session to enable the creation of such districts and F. Putnam, M.P.P., has promised to do all in his power to obtain what we want but he insists that he must have the support of the district. Petitions will be circulated so that everyone will have an opportunity of supporting th'a splendid co-operative effort.

Though these districts will be permanent once they are created by the vote of the property owners of the district affected, it is intended that the act will not become operative until such time as a plebiscite has been held and that a substantial majority of the taxpayers of such a district have declared themselves in favor of the plan.

The committee that investigated this matter for the board of trade satisfied themselves that under such a co-operative plan the benefits obtained will cost the individual but a small sum per annum and that hospitalization and possibly medical benefits can be obtained for a fraction of the cost that anybody is to-day called on to pay should sickness overtake any member of the family.

The members of the Creston Hospital Women's Auxiliary enthusiastically endorsed the idea and hav arranged to hold a meeting on Tuesday, February 5th. in the United Church basement so that everyone should have an opportunity of endorsing this plan which should be of untold benefit to this district.

Meetings are also being arranged at other points it being planned to hold one in Wynndel on the 25th of this month. This meeting is being sponsered by the Women,s Institute and J. G. Abbott has undertaken to make the necessary arrangements.

It is hoped that as many as possible will avail themselves of the opportunity to learn how it is proposed to solve the hospital and medical problems of this district and that they will be prepared to give unqualified support to the request for the enactment of the necessary legislation.—Com.

Kimberley had so few needy to look after at Christmas that the United Church in that town donated clothing, canned goods, foodstuffs and toys for distribution in Cranbrook.

Nelson Assessment District

NOTICE is hereby given that a Court of Revision and Appeal. under the provisions of the "Taxation Act" and the "Public Schools Act" for the Nelson Assessment District, respecting the assessment roll for the year 1935, will be held in the Assessor's Office at the Court house in the City of Nelson on Wednesday, 13th February, 1935, at the hour of 10.30 o'clock in the forenoon.

Dated at Nelson, B C this 16th. day of January, 1935.

Local and Personal

Eight rinks of players have been lined up for the 1935 curling season, and play got under way at the end of the week. A halt, however, is in prospect as the weather Thursday morning is much milder, with some rain.

Dyking work is now completed to a point about 1½ miles past the false mouth of Goat River, leaving but 2½ miles to complete. Operations were halted with the excessive cold weather at the end of the week.

Rev. A. Walker, who has been off duty for the past five Sundays, was able to take the evening service at Trinity United Church on Sunday, but the weather was too severe to permit him officiating at Wynndel and Canyon.

F. V. Staples was a business visitor at Bonners Ferry on Tuesday. He reports the snowfall in that locality as heavier than around Creston. Up to January 17th Bonners had recorded a snowfall of 77 inches.

Creston Weather Severe, Weekend

Usual Blow and Cold Dip Latter Part of Week—Windstorm is More Prolonged—Third Coldest Touch Ever Recorded.

Thursday sees much progress being made in Creston and district at digging out after the blizzard that prevailed from shortly after noon on Thursday last until almost noon on Satu day. While the wind did not attain the velocity of the blow of the year previous, nor was it anywhere near in the class of the all-time blow, of December, 1924, this year's storm was the more uncomfortable due the fact that there was much light snow available and the wind made good use of the white mantle to fill up highways and sidewalks to depths previously unrecorded. And to still further aggrevate matters daily snowfalls have been in evidence almost every day since the wind died down.

In town the sidewalks were piled so high that they had to be dug out by hand, while on some of the roads the snow was packed so deep and tight that the bulldozer and 75 h.p. caterpillar used on right of way clearing work on the dykes had to be put to work to open up stretches of the road. All the available snowploughs have been in action 24 hours daily, and by the end of the week travel conditions will be back to normal.

The snow has been so deep and drifted so badly that the busses have been withdrawn since last Thursday and the auto truck freight service has also been crippled. In town the snow was so troublesome that at least one of the transfer companies had to resort to team and sleigh to make deliveries.

The wind was so strong and bitter that Creston school was closed all day Friday, and some of the rural schools were also uuable to operate. The temperatures for the period were 4 below Friday morning, 11 below Saturday, 23 below Sunday, 10 below Monday, 2 below Tuesday, and 16 above Wednesday, while Thurseay a rain was in evidence. Some alarm is felt for the peach crop as this fruit will hardly survive 20 below, but there is no occasion to griev eon berries as they are well covered with snow and the other tree fruits can withstand much sub zero weather particularly when the drop in temperatures are not sudden.

Of great interest at this time will be the official weather records for Creston for the 1919-1933 period as kindly supplied the Review by Dr. Henderson, official weather recorder, which show the coldest ever known here January 3rd, 1924, when the mercury got down to 27 below zero, and it was on December 15 of the same year that the big blizzard was encountered. Since then 24 below in the winter of 1933 and 23 below on Sunday last were the most severe climatic touches In the matter of snowfall the all time record is in the winter of 1915-16 with a showing of 109 inches, while 1931-32 ran it close second with 107 inches. Here are the figures:

YEAR	Inches		Degrees
1919-20	48½	1919	14b
1920-21	58	1920	1a
1921-22	49½	1921	4b
1922-23	58¾	1922	15b
1923-24	63¼	1923	21b
1924-25	58½	1924	27b
1925 26	27	1925	4a
1926-27	45	1926	4b
1927-28	53¾	1927	19b
1928-29	34	1928	6b
1929-30	55	1929	13b
1930-31	28	1930	10b
1931-32	107	1931	1b
1932-33	69¾	1932	5b
1933 34	76	1933	24b

a—Above. b—Below.

The feature of this winter's snowfall is that it has come steadily and is still here, although the total is still less than last winter which had a showing of 76 inches, as compared with 60 inches for 1934-35.

Curlers Choose Skips

For the 1935 season Creston Curling Club announces the registration of over 30 players, and at the meeting on Friday night skips were elected and the talent has been allocated as follows:

F. V. Staples, skip; R. M. Chandler, J. P. Ross, W. Heath.

M. J. Boyd, skip; S. Hendren, Cam. MacDonald, A. Dickenson.

M. R. Joyce, skip; A. Robertson, H. Beninger, A. Speers

Sirdar Captures Shuttle Honors

Have Best of Wynndel Clash by 10-6 Margin — Honors Now Even—Losers' Show the Best Form in Men's Doubles.

Sirdar badminton club revealed what is hoped is their true form when they met the Wynndel club at the community hall here and inflicted a signal defeat upon the visitors. The score was 10-6. The losers were best in the men's doubles, taking three out of seven games played. Following the games lunch was served and a pleasant evening concluded with a dance in which many participated.

Following are the scores in order played with visiting players names first.

LADIES' DOUBLES.

E. Towson and F. Wood lost to A. Pascuzzo and D. Rogers 5-15.

B. Hulme and O. Hagen won from C. Pascuzzo and M. Rogers, 15-13.

R. Joy and E. Hagen lost to Mrs. Proctor and R. Pascuzzo, 5-15.

MIXED DOUBLES.

E Towson and E. Hulme won from C. Lombardo and D. Rogers, 15-11.

F. Wood and L. Benedetti lost to C. Pascuzzo and S. Rogers, 6-15.

B Hulme and A. E. Towson lost to Mrs. Proctor and F. Martello, 7-15.

E. Hagen and Clarence Wilson won from A. Pascuzzo and D. Pascuzzo, 15-11

J. Hulme and O. Hagen lost to A. Lombardo and M. Rogers, 6-15.

G. Hulme and R. Joy lost to R. Pascuzzo and B. Cam, 2-15.

MEN'S DOUBLES.

G.Benedetti and L.Benedetti lost to F. Martello and A Lombardo, 1-15.

A. E. Towson and E. Hulm lost to S. Rogers and C. Lombardo, 5 15.

Cl rence Wilson and D. Taylor won from D. Pascuzzo and J. Rogers, 15-3.

G Hulme and J. Hulme won from J. Audino and A. Lombardo, 15-5.

R. Cooper and W. Abbott won from P. Cherbo and J. Audino, 15-10.

W. Abbott and G. Benedetti lost to B. Cam and P. Cherbo, 14-17.

R. Benedetti and D. Taylor lost to C. Lombardo and J. Rogers, 12-15.

Our K. B. O. Broadcast

Bonners Ferry had a 50-inch snowfall in December.

Up to January 3rd, Rossland has had 79 inches of snow.

Bonners Ferry had 23 inches of moisture in 1934. 27 inches was the record for 1933.

The output of the Trail smelter for 1934 is placed at $8,246,157. 33 per cent. of this was zinc

The 1935 Selkirk bonspiel will be held at Kimberley, January 24, 25 and 26—weather permitting.

Commencing at the first of the year the provincial police are in charge of police work at Armstrong.

Despite the depression, Fernie curling club starts the season with more members than last winter.

Shareholders of the First National Bank at Bonners Ferry are getting a dividend of $6 per share on 1934 operations.

The Observer believes Salmon Arm consumed more turkeys at Chrestmas uhan any place of its six in the province.

Auto licenses fees paid at Bonners Ferry are $1500 in excess of the amount received in 1933. 854 passenger cars bought plates.

For the first half of 1934 county officials at Bonners Ferry have $43,545 of unpaid taxes. The period a year ago the total was $78,233.

Over a five year period the Herald states the householders at Penticton are using 47 per cent. more "juice," 70 per cent. more energy is being sold than in 1929

Kimberley had so few needy to look after at Christmas that the United Church in that town donated clothing, canned goods, foodstuffs and toys for distribution in Cranbrook.

Harry King of Porthill is one of the six of the unemployed who will get in a couple of months trapping predatory animals in Boundary country. They will specialize in cougar, coyotes, lynx and bobcats..

Courier: Sales at the Cranbrook liquor store for 1934 are roughly estimated to be at least 12% better than for 1933. Pre-Christmas sales were at least $1000 higher than the year before, and were well up to those of four and five years ago.

WORLD HAPPENINGS BRIEFLY TOLD

Hon. Iyeman Tokugawa, retiring Japanese minister to Canada, left Ottawa recently for his new post as Japanese minister to Turkey.

George Jihlavec, 50, Dugald, Man., farmer was instantly killed when the truck he was driving crashed into a 60-foot pole protruding from the rear of another truck.

Stephen Leacock, Canadian humorist, was presented the Mark Twain medal, awarded annually by the Mark Twain Society. Leacock is professor of economics at McGill University.

Under the farm-help relief plan, 4,400 single unemployed men have already been placed on Manitoba farms this winter and the relief commission expected last winter's total of 5,140 placements would be exceeded.

Some form of agricultural output restriction was an imperative need to benefit the next growing season, E. D. Barrow, M.L.A., provisional president of the new British Columbia Chamber of Commerce, said in an address to the advertising and sales bureau of the Vancouver Board of Trade.

Total forest fires damage in British Columbia during 1934 was $993,481, highest on record with the exception of 1925, Hon. A. Wells Gray, minister of lands, reported. The damage was three times greater than the previous year, and the area burned over, 649,611 acres, was more than double that of 1933.

William Gillespie, Thessalon, Ontario, farmer, revealed he was investigating a report a white woman who might be his sister had been found among Indians of Link Lake, near the Ontario-Manitoba boundary, almost half a century after she disappeared on a berry-picking expedition. Maud Gillespie, the sister, disappeared 46 years ago at the age of 12.

Trying Out Welded Rails

Experiment Being Made In Germany By State Railway

Welded rails are being used in tests being made by the German State Railway to determine whether they can be used at high rates of speed and whether they cause any bad effects to the trains. A trial railroad line has been constructed of welded rails, each approximately 98 feet long and so connected that there are practically no joints. An express train, without passengers, will be driven over this line until a mileage of about 62,500 is attained. These tests are to last about three months with 10 trips being made each day at a speed of from 75 to 95 miles an hour.

Experiments conducted in the Catholic University of America, Washington, D.C., tend to prove that smoking dulls man's sense of taste.

Tests Were Successful

Novel Diving Suit Easily Handled And Quickly Put On

Tests of a novel diving suit for saving drowning persons, just completed in the lake at Geneva, Switzerland, are reported to have been successful. The suit was invented by Commander Prieur of the French Navy. The essential point about it is that the diver wears a breastplate which is really a steel bottle of compressed air. The whole suit is easily handled and can be put on in 30 seconds. The diver can remain below the surface for about 25 minutes. He is quite free of the ropes or air tubes which usually connected divers with a boat overhead. At the public demonstration three men remained under water for a long period.

"Cheap Flying For Masses"

Aviation Club In England Has Over 400 Members

With the slogan, "Cheap Flying For The Masses," the Northamptonshire Aviation Club reported at the opening of its clubhouse recently at Sywell, England, that its plan is a success. It has more than 400 members, the majority being small merchants and artizans. The subscription is $6.25 a year and the club finance instructions to the extent of $5 an hour, providing the student gets his flying license within eight hours. The club is expected to become the largest civil aviation organization in the country.

FASHION FANCIES

DESIGNED ESPECIALLY FOR MATURE FIGURE TO DISGUISE OVERWEIGHT — AND IT DOES IT BEAUTIFULLY

By Ellen Worth

This charming dress of black satin back crepe expresses simple dignity for the mature figure. The vestee is white starched lace. The rever collor is outlined by shiny surface of the crepe, which makes a very effective trim. There is slight fulness toward the hem of the length-giving paneled skirt, which gives nice freedom for walking.

You'll be astonished how quickly you can make this dress—and for a very nominal sum.

Pebbly crepe silk, lightweight woolens, velvet, etc., are equally lovely to carry it out.

Style No. 993 is designed for sizes 36, 38, 40, 42, 44, 46 and 48-inches bust. Size 36 requires 4¼ yards of 39-inch material with ¼ yard of 18-inch or wider contrasting.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Enclose 20c extra if you wish a copy of our Fall and Winter Fashion Magazine. Pattern and magazines are mailed post paid.

"How to Make Better Dresses" booklet, a helpful guide to sewing, is obtainable for 20c. Whether you are a beginner or quite adept with the needle, we think it would pay you to obtain a copy.

Little Journeys In Science

THE ELECTRON

(By Gordon H. Guest, M.A.)

Electricity is one of man's most useful servants and has added much to our bodily comforts. Some years ago scientists began to wonder as to the nature of electricity. It is only within the last thirty years that the electron theory has been developed. In 1891, a scientist, G. Johnstone Stoney, suggested the name electron for the natural unit of electricity. The modern scientist believes that negative electricity consists of electrons and it has been shown that it takes 1845 electrons to weigh as much as one hydrogen atom. It is usually considered by scientists that matter is granular and electrical in nature. There is very convincing evidence to prove that the hydrogen atom is made up of one positive electron called a proton and one negative electron, which is usually called the electron.

What is called an electric current is now believed to be simply a flow of electrons through a wire; and it is considered that good conductors of electricity such as gold, silver and copper, have a good many electrons loosely held. In the case of non-conductors, it seems that there are few free electrons.

When a glass rod is rubbed with silk, the negative charge taken on by the silk is due to the fact that some free electrons are rubbed off the glass; while the glass, having lost electrons, takes on a positive charge. In general, it is assumed that a neutral body takes on a positive charge when it loses electrons, and a negative charge when it gains electrons.

Lightning can also be explained by means of the electron theory. Electrons, or charged molecules of air, serve as nuclei around which moisture of the air may condense. In time the droplets grow in size until they fall as rain-drops, and it appears that they carry down large numbers of stray electrons, the final result being that a very great potential is developed, followed by the passage or a "bolt" between the cloud and the earth.

Will Use Autogyros

British Admiralty Adding Them To Naval Aviation Units

The British admiralty has decided to add autogyros to its naval aviation units, the Daily Telegraph reported.

Commenting on the reported decision, the newspaper's naval expert, Hector Bywater, declared:

"Under the present circumstances airplane carriers are indispensable. The admiralty, however, would welcome a perfected autogyro or airplane able to land in a small area, rendering unnecessary large airplane carriers, which are burdensome and vulnerable.

RUN DOWN? TAKE WINCARNIS

If work and worry have got the better of you and you are feeling weak and listless, follow the recommendation of more than 20,000 medic men. Take Wincarnis three times da... .
To thousands who once felt as you feel now, this advice has proved invaluable. Wincarnis brings to you all the valuable elements of grapes (2½ lbs. in each bottle), and the strength building content of beef and malt extract. It is not a drug, but a delicious, blood and tissue building wine which quickly soothes tired nerves and builds new wells of energy.
From the time you start taking Wincarnis you will sleep better, wake more cheerfully, and feel more nearly as you should. You will know, then, how wonderful it is to be on the road to sustained, vigorous health.
For those who are run-down, or who suffer from ragged nerves, insomnia, anaemia or debility, Wincarnis is a marvelous tonic. Get Wincarnis from your druggist today.—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

SUNDAY SCHOOL LESSON

JANUARY 27

PETER'S DENIAL

Golden text: "Wherefore let him that thinketh he standeth take heed lest he fall." I. Corinthians 10:12.

Lessons: Mark 14:12-27.

Devotional reading: Psalm 51:1-9.

Explanations And Comments

Peter's Over-confidence in His Loyalty to His Lord, verses 27-31. Jesus said to the disciples, "You will all be disconcerted [Moffatt's translation] for it is written [a free adaptation of Zechariah 13:7], I will smite the shepherd and the sheep shall be scattered abroad." "The quotation is intended to alleviate the scandal of the disciples' conduct, by showing that it was foretold" (Dummelow). The Shepherd was smitten, and the sheep were scattered—all the disciples fled. Peter and John (Jn. 18:15) followed afar off.

Confidently and boastfully Peter exclaimed, "Although all shall be offended, yet will not I." "Peter sinned in three ways at once," explains the ancient writer Euthymius: "(1) in contradicting the prophet and the Christ, (2) in placing himself above the rest, (3) in trusting in himself alone, and not in the help of God."

"Verily I say unto thee, that thou, to-day, even this night," solemnly Jesus told him, "before the cock crow twice, shalt deny me thrice."

Peter's Denial of His Lord, verses 51-54, 66-72. After the agony in Gethsemane, the betrayal and arrest of Jesus (verses 32-50), Peter followed him at a distance to the palace of the high priest. Peter was warming himself by the fire which glowed in an open charcoal brazier. Nights are cold in Jerusalem in the spring, and the fire must have been welcome.

One of the maids of the high priest approached him and said, "Thou also wast with the Nazarene, even Jesus."

"I neither know nor understand what thou sayest," Peter said, utterly bewildered by the happenings of the night.

Peter went out into the porch and the cock crew. Turning to the men near by, the maid said, "This is one of them," and he denied it. A little later, after Peter had been talking and had betrayed by his speech that he came from Galilee (Mt. 26:27) his companions declared, "Of a truth thou art one of them; for thou art a Galilean."

Then Peter began to curse and to swear. He invoked a curse upon himself if what he were telling were not true when he said, "I know not this Man of whom ye speak."

An Outstanding Tragedy

World Remembers Collapse Of Tay Bridge In 1879

There have been a few outstanding tragedies in the world's history which have photographed themselves on men's minds so that neither time nor circumstances seem able to obliterate them. The Lisbon earthquake, the last day of Pompeii, the loss of the Titanic, these are instances of them. What happened this night in 1879 is yet another.

It is one of those stories which are quickly told yet leave much to the imagination. The necessary facts to bring it to the mind, to conjure up the horror of it, are few indeed. We need only to know that in 1878 the first great bridge over the River Tay, in Scotland, was built. It was nearly two miles long, had 84 spans, and was 90 feet high. One of the wonders of the world at that time, it was destined to stand but a few months. As this night in 1879 the sun went down in a wreck of scattered clouds. There was a high wind which increased in velocity till it blew with tremendous force, sweeping up the river at incredible speed.

In the blackness of that terrible night a train with its human freight rushed across the bridge, but never reached the other end. In an instant 13 of the great spans were lifted bodily, swayed a moment over the black waters of the river, and then crashed with the train and all who were in it.

Out of time into eternity they went. The world shuddered. So, at that great price, was bought the knowledge whereby a stronger bridge was built.—Ottawa Journal, Dec. 28.

Carried Hot Meal

Baked beans, codfish and potatoes, a typical New England meal, were cooked at Portland, Maine, and, still hot, served for supper in Portland, Oregon, the same night. It was the start of the new air express transportation service between northern New England and the Pacific coast.

FALSE TEETH DR. WERNET'S POWDER HOLDS FAST

When this dentist's grand prescription for holding plates firmly, snugly and comfortably in place has the largest sale in the world—there's a reason—ask your dentist—he prescribes it—never causes soreness—inexpensive.

YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT
(Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: Have you had your handwritnig analysed by this well-known graphologist? Join the throng of those who have done so, and learn what your writing tells about you).

* * *

Another batch of extracts from replies mailed this week shows the scope of the interest aroused by this series of articles. Letters are coming in from coast to coast, and in practically every case, a graphological analysis is able to reveal the help that is needed.

Miss "Nellie": The outstanding characteristic in your nature is your procrastination. You put off doing things that demand immediate attention. This is one of the worst of the minor traits of character, and I strongly advise you to cultivate more promptitude and decisiveness.

Miss J—, Toronto: Have nothing to do with your married man friend. He is not quite the innocent sufferer he pretends to be. I imagine that if you were to have a talk to his wife you would find that he has chronically neglected her, and that he has always had a passion for other women. Leave him alone, or the day will come when you will be sorry you ever met him. His handwriting is strongly unfavourable.

H—, Winnipeg: By all means take up a course in advertising make-up. You certainly have a talent for this kind of thing, and you will not go far wrong in working hard at it. This is one of the most lucrative vocations that a young man can embrace.

Mrs. —, Sarnia: The only thing to do with your husband is to show him that he is merely alienating your daughter by treating her as a schoolchild. He, like many other fathers, forgets that he was once young himself, and that it is too much to expect that young people will see eye to eye with maturity. His writing indicates that he is somewhat domineering, and that he likes to 'rule'. But he must understand that he cannot rule the lives of his children for ever. And, judging by your daughter's handwriting, she is well able to look after herself.

Mrs. "Woeful": The trouble with you is that you are giving in to your worries too easily. You should be cultivating outside interests, providing as much variety for yourself as is possible. To nurse your troubles, and, not only that, but to imagine worries that are non-existent, is merely to create a neurotic condition, and, after all, it is so needless. Take hold of yourself and shake off those nervous cobwebs that are gradually encircling your mind. I have written you, suggesting a regimen for you to follow.

Miss E—: You are at an age when you are inclined to exaggerate these lovers' tiffs. At 19 it is hard to feel complacent when things go wrong in one's love affairs, but time will show that you had nothing to fear, because I am convinced that the young man was sincere when he told you that he loved you, and before long, things will turn out alright again. In any case, you are rather young to feel that your life is blighted, whatever the outcome.

* * *

Have you any problems that are worrying you? Do you want to know what your handwriting reveals? You may be surprised at the revelations. And an analysis often tells you things about your friends that you did not know. Send specimens of the writing you want analysed, stating birthdate in each case. Send 10c coin for each specimen, and enclose with 3c stamped addressed envelope, to: Lawrence Hibbert, Graphologist, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. All letters are strictly confidential. Replies will be mailed out as quickly as possible but please allow at least two weeks for a reply.

Parent, concluding the recital of his exploits—"And that, my boy, is what I did in the Great War."

Son—"But, Daddy, why did they want so many men beside you?"

A Law Every Mother Should Know and Observe

Never Give Your Child An Unknown Remedy without Asking Your Doctor First

According to any doctor you ask, the only safe way is *never* to give your child a remedy you don't know *all* about, *without asking him first.*

When it comes to "milk of magnesia," that you know everywhere, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—*always* say *Phillips'* when you buy. And, for your own peace of mind, see that your child gets this; *the finest men know.* Made in Canada.

Safety for You and Yours

You can assist others by refusing to accept a substitute for the genuine Phillips' Milk of Magnesia. Do this in the interest of yourself and your children — and in the interest of the public in general.

PHILLIPS' *Milk of Magnesia*

THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

CHAPTER IX.—Continued

"I thought he was lyin' about havin' lost that notebook," he muttered disgustedly. "It's just barely possible that Corse or Gray may have found it. I'll have to find out that. Anyhow Peyotl will never tell what took place up here. . . ."

He knew that he was perfectly safe. Though old Kane was fairly well known in Seco yet at times he had been gone more than two years without exciting comment.

"I'm the only one who knows about this find," muttered Dustin. "And it's a cinch now that no one will tell about Corse and Gray rustlin' the Hour-glass stuff. Come on here, Peyotl," he shouted. "Give a hand here."

Together they carried the limp figure to the narrow trench and laid him at rest under the desert stars. Afar a coyote on a distant, wind-bitten ridge sent up a wailing howl as Peyotl slunk off to the fire and shivered over the flames. Two hours later they got their ponies and headed slowly back for the yellowing flatlands under the rising sun.

CHAPTER X.

That telegram from Gerald Keene caused hot debate at the Hour-glass. Old Joe Carr was lifted to the Seventh Heaven of anticipation. The nephew of his old partner, himself half-owner in the ranch, could do no less than help.

He held conference after conference with Crewe, and Stone, because of his alleged intimacy with Gerald Keene, was called into those meetings. Plan after plan was disputed by the fierce-eyed old cattle-man.

"I know Dustin's got his knife out for me," he said. "I know his gang of thieves has been stealin' me deaf, dumb an' blind but I got no proof."

"Stone has," said Crewe. "Tell him what you told me about seein' Corse and Gray ear-markin' that calf," he said.

Stone told and Carr's face was a study. Finally he rose and shook his finger menacingly under Stone's nose.

"You been drawin' our pay," he said. "You been eatin' Hour-glass grub an' when you find two Broken Spur men stealin' cattle you say not a word about it. You tell only my manager and even he keeps it from me. I can't sabe it a-tall."

"I had a darned good reason for only tellin' Crewe," said Stone evenly; "and Crewe's got a good reason for not tellin' you. I saw 'em—yes. The word of one witness will not convict any one. There would be two of them against me. You'd never get anywhere on my evidence alone. We need more than that. . . ."

Crewe nodded agreement and that angered Carr still more. He snatched a decanter from the shelf and poured him a gargantuan drink.

"Dog-gone you," he snarled. "Between you, you're goin' to bust me. . . ."

"Listen to me, Joe Carr. . . " Crewe went into action suddenly. "You an' me's been friends for twenty years. You been tryin' to run your business against a bunch o' crooks. You might have done it but for that." . . . He jerked a hand at the decanter. . . . "Stone is playin' as square as he knows. Of course he's green to the cow-country and he don't know a hell of a lot. He brung you in some good dope. We know now that Dustin was keepin' a wagon in the hills with a bunch of men stealin' everything they could find. We know that he was grub-stakin' old man Kane. Why? That's what I want to know? That notebook that Gray flogged out of Corse's pocket looks funny to me. . . ."

At that moment Edith came in, flushed from riding, and stood watching them. Her gaze took in the red notebook that Carr had laid on the table; then it went to Stone. She found herself wondering about Stone. There was no question of his eternal greenness! The very cows would eat him—yet . . . ? On every occasion when he had been tested he had come out successful. Her puzzled gaze went past Stone to where, on the porch, Red Thom was flicking bits of adobe at a lizard. Then she heard her father speak:

"Now about that notebook we were talkin' of . . . I'll get it."

He got it from his desk and studied it wordlessly for a full minute.

"Of course old Shammy-skin Kane's a fool," he said. "He's been wonderin' foot-loose over the ranges for so long that his brains are addled. They get that way sometimes. But I don't believe he's big fool enough to tie himself up with Dustin unless he's got a stranglehold on him. I'd like to find the old fool and find out what he thinks he's found. Let's see. . ." And again he fell to studying the book.

"'One half to Dustin. . .' Huh! That means of course that Dustin's been grub-stakin' him. Why would Dustin grub-stake him? The answer is that Dustin knows Shammy-skin's on the trail of somethin' good. . ."

Stone snatched the book.

"There's more to it than you've guessed yet," he said curtly. "The man gives rather plain directions here. . . . If we've got sense enough to read 'em He hasn't given this book to Dustin, probably because he doesn't trust Dustin. Evidently he lost the book and those men Gray and Corse, up in that part of the range stealin' your cattle, happened to find it. Corse and Gray may or may not know what Kane knows. The main thing is . . . Find Kane and also find out, before we find him, what it is he thinks he's got. Let's see the directions again. . . ." And he read:

"'Red Water canon seven to one to white birch. Up Stinking Water three two to sunk can'."

". . . By God, Frank! . . ." Carr sprang into life. "That sounds like whatever it is, is on Hour-glass land. . . ."

"Those are distances," said Stone sharply. "But what's he usin' as a unit? That's the question. It can't be a hundred-foot tape. I doubt if a prospector carries a watch. . ."

They sat and stared at each other and Edith saw their faces change. From time to time her father and Crewe eyed each other but always their gaze came back to Stone. It was pretty clear that for some reason they were depending on this stranger to the Hour-glass. The mere fact that he and he alone had been able to put Carr in touch with Gerald Keene made him of prime importance just now. Stone broke the silence with a sharp exclamation that was half oath.

"Well," said Crewe. "Spit it out. What's hit you now?"

"How far is it up to that place would you say?"

"Huh. You've been there. I'd say it's about twelve miles. Why?"

"Give me that book and you and Mr. Carr wait here. I want to try a notion of mine. It may not work. I'll be back by night."

Edith rose to her feet with a quick little exclamation.

"I'm going with you," she said quickly. "You don't want to take one of the men of course. Anyhow, they're all out. But I mean to go."

His eyes sought and found hers. He knew instantly that no distrust underlay her words. There was a lightness in her eyes and a quick smile on her lips that forbade any thought of guile. His own quick smile replied to hers:

"I'll sure take good care of you if you care to come," he said. "I'll get your pony, Miss Edith."

In ten minutes he was back with his big Isabella horse and her pony and they clattered out of the enclosure, past the corrals and turned into the open trail that led westward toward the foothills. Crewe and Carr sood watching them till their figures were swallowed up by the red dust.

"There's somethin' damn funny about that man Stone," quoth Crewe. "I'm satisfied he's as straight as they make 'em but he's sure somthing different from what he give out."

"He hasn't given out anything," growled Carr. "All I get is a notion of a husky fellow. He's never been range-trained. Anybody can see that but he's willing and he wants to learn. Of course he's a fool if he goes into the cattle business. To do that a man's got to have money to start it and if he's got money he's a double-dyed damned fool to put his money in any game that he don't know thoroughly. See?"

Crew "saw." He saw more than Carr said and he stood staring out over the flat at Edith and Stone as they turned westward and followed the tortuous line of wire-fence toward the hills.

Edith, too, wondered a great deal about her companion. He could ride. She knew that he was not afraid of any one or, as far as she saw, of anything, but that might be the result of ignorance, but his lamentable ignorance of all ranch matters was almost laughable at times. She half-turned in her saddle as his horse nosed up alongside the girth of her mount.

"You've been with us at the Hour-glass long enough for me to ask you some questions, haven't you?" she asked. A look in her gray eyes might have told him that those questions were not altogether prompted by idle curiosity.

"Sure. Go ahead," he said cheerfully.

"Where did you come from and how did you happen to land on the Hour-glass? You know Mr. Keene pretty well, don't you? You must know him well for him to have given you the letter that he did."

"He owns a big garage in Cato," he said non-committally. "That's where I saw him last. I've known him a good many years. When I learned about the ranch, I got him to give me the letter but when I got here the Hour-glass happened to need a man and I didn't need to use the letter."

"Did you work for Mr. Keene at the garage?"

"For a while, yes'm. . . ."

"Don't say 'Ma'am' to me," she said sharply.

"What'll I say then?"

"You might try 'Edith,'" she laughed. "Most of the others do."

"All right M' . . . I mean Edith . . ." They both pocketlaughed and let it go at that and they let their horses out over the level. That long, treeless mesa swept away in mile after mile of pleasant grass-land dotted here and there with stunted mesquite and fire-tipped ocatilla and it pitched slightly up till its hedge was cut by a deep canon. Red Water canon that took its name from the discoloration of the stream due to some iron deposit.

"Up Red Water to Stinkin' Water . . . Funny names they gave the places," muttered Stone.

"Yes. . . ." Edith knew them well and was versed in the legends of the land. "They call the next deep valley Stinking Water because of its sulphur springs. The Indians named it many years ago. Even sheep won't drink the water there. . . . Here we are in Red Water canon . . . Now what?"

Their ponies pawed at the yellowed soil and scornfully nosed aside the water in the shallow pools.

"Up the valley seven one . . ." he said reflectively, "to a white birch. . . . Then up Stinkin' Water three two to a sunk can. . . ."

(To Be Continued)

ARE YOU WEAK?

Mrs. W. Bowman of 10 Wheeler Ave., Guelph, Ont., said: "I had lost weight through poor appetite, I had backaches and headaches and felt miserable. I took Dr. Pierce's Golden Medical Discovery and was soon enjoying splendid health."

All druggists. New size, tablets 50 cts., liquid $1.00. Large size, tabs. or liquid, $1.35. Write Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

DON'T RISK BAKING FAILURES....

THE FARMER'S MAGAZINE TESTED AND APPROVED

"DON'T TAKE CHANCES WITH INFERIOR BAKING POWDER. LESS THAN 1¢ WORTH OF MAGIC MAKES A FINE, BIG CAKE. AND MAGIC ALWAYS GIVES GOOD RESULTS."

says MISS ETHEL CHAPMAN, *popular cookery editor of The Farmer.*

Leading Canadian Cookery Experts warn against trusting good ingredients to inferior baking powder. They advise MAGIC Baking Powder for perfect cakes!

CONTAINS NO ALUM—This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient. Made in Canada

Wax Grown On Trees

Wax is grown on trees by Chinese farmers, who have utilized the wax-making properties of a small Chinese insect. This insect spins cocoons of pure wax, and its masters have learned how to make it produce enormous quantities of the material.

Little Helps For This Week

"Fear none of those things which thou shalt suffer . . . Ye shall have tribulation ten days; be thou faithful unto death and I will give thee a crown of life." Revelations 2:10.

Then O my soul be not afraid,
On Him who thee and all things made
Do thou all calmly rest;
Whate'er may come, whate'er may go,
Our Father in the heavens must know
In all things what is best.

Guide me O Lord in all changes and varieties of the world, that in all things that shall happen I may have an evenness and tranquility of spirit, that my soul may be wholly resigned to Thy divinest will and pleasure, never murmurming at Thy gentle chastisements and fatherly correction.

Thou are never at any time nearer to God than when under tribulation which he permits for the purification and beautifying of thy soul.

Recalls Hard Journey

Calgary Man Walked To West Sixty Years Ago

C. J. "Con" Duggan, at 90, recalls how he walked to western Canada from northern Ontario 60 years ago.

Wading through creeks and muskeg, tormented by blackflies and mosquitoes and practically without food, he arrived at Fort Garry, now Winnipeg, 29 days after leaving Thunder Bay, at the head of the lakes.

He travelled the "Dawson route," made famous by Col. Wolseley's journey to quell the Red river rebellion in 1870, and used only once after Duggan's historic journey. He still has the ticket for which he paid $10. On it is inscribed:

"Red river route, No. 241, department of public works, Canada. Depot: Thunder Bay, L.S., June 17, 1874.

"Good to C. J. Duggan for one passage from Thunder Bay to Fort Garry. (Signed) M. J. Carpenter and Co."

The party, consisting of 26 persons, had two teams and wagons, but this means of transportation was only sufficient for their baggage.

Blondes Score Again

Both gentlemen and the weather prefer blondes. Researchers at Massachusetts Institute of Technology proved by experiment that blonde hairs were the best for use in an instrument designed to test the humidity in the atmosphere.

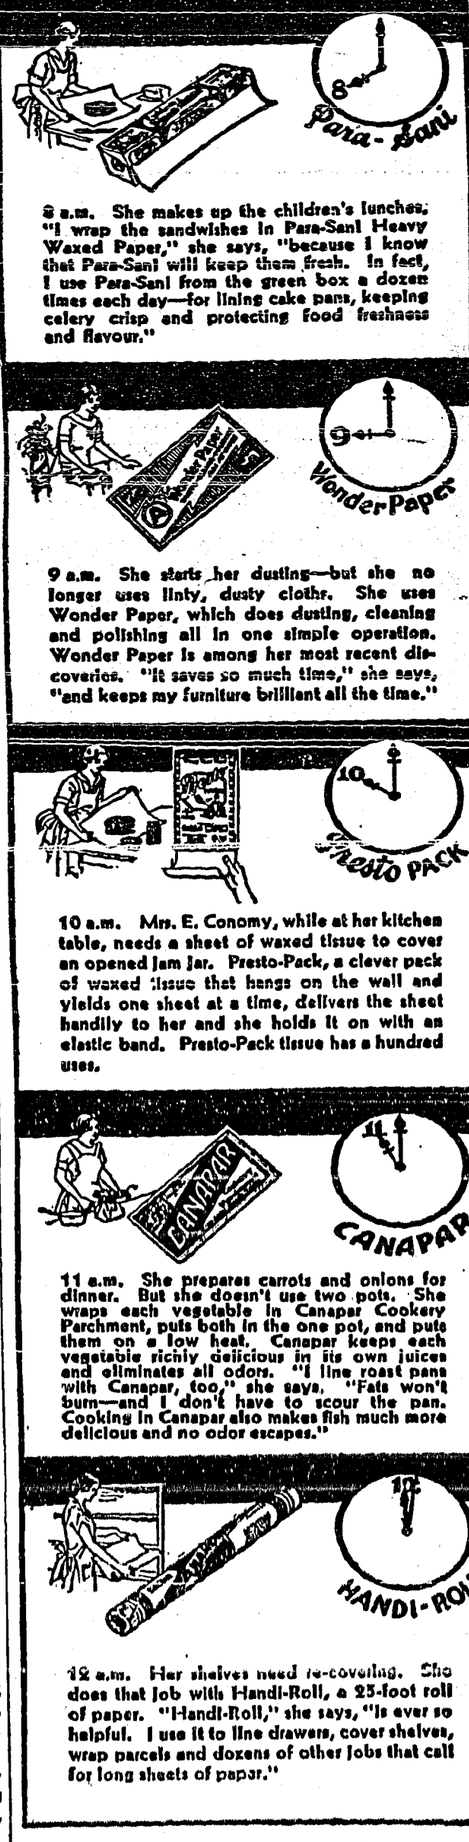
A MORNING WITH Mrs. ECONOMY



8 a.m. She makes up the children's lunches. "I wrap the sandwiches in Para-Sani Heavy Waxed Paper," she says, "because I know that Para-Sani will keep them fresh. In fact, I use Para-Sani from the green box a dozen times each day—for lining cake pans, keeping celery crisp and protecting food freshness and flavour."

9 a.m. She starts her dusting—but she no longer uses linty, dusty cloths. She uses Wonder Paper, which does dusting, cleaning and polishing all in one simple operation. Wonder Paper is among her most recent discoveries. "It saves so much time," she says, "and keeps my furniture brilliant all the time."

10 a.m. Mrs. E. Conomy, while at her kitchen table, needs a sheet of waxed tissue to cover an opened jam jar. Presto-Pack, a clever pack of waxed tissue that hangs on the wall and yields one sheet at a time, delivers the sheet handily to her and she holds it on with an elastic band. Presto-Pack tissue has a hundred uses.

11 a.m. She prepares carrots and onions for dinner. But she doesn't use two pots. She wraps each vegetable in Canapar Cookery Parchment, puts both in the one pot, and puts them on a low heat. Canapar keeps each vegetable richly delicious in its own juices and eliminates all odors. "I line roast pans with Canapar, too," she says. "Fats won't burn—and I don't have to scour the pan. Cooking in Canapar also makes fish much more delicious and no odor escapes."

12 a.m. Her shelves need re-covering. She does that job with Handi-Roll, a 25-foot roll of paper. "Handi-Roll," she says, "is ever so helpful. I use it to line drawers, cover shelves, wrap parcels and dozens of other jobs that call for long sheets of paper."

J. H. Doyle is renewing acquaintances in Nelson this week, leaving on Wednesday.

For funeral nd wedding flowers, Moores' Greenhouse, Creston. 24 hours' notice necessary.

RADIO FOR SALE—Bosch two volt six tube battery radia, in good shape. E. E. Bothamley, Canyon.

Miss Eva LaBelle left on Tuesday for Blake, where she is a visitor witn her sister, Mrs. Frank Garrett.

On account of the badly drifted high ways east and west the bus service has been discontinued since Thursday last.

Mr. and Mrs S. A. Speers returned on Monday from their short visit with friends at Toronto and other Ontario point.

Teachers and trustees of Creston school are arranging for education week, which will be held from February 3rd to 9th this year.

Gymnasium work has been resumed in the basement of Trinity United Church. V. Phillips, an experienced physical director, is in charge.

FOR SALE—At the Variety Shop, Girls' Bonnets, 25c. Curtain Butterflies, 2 for 35c. Sewnom re, 29c. Also Ladies' Dresses, etc.

Due to the stormy weather that prevailed on Friday night the usual league basketball games scheduled for that even ing had to be postponed.

The storm at the first of the week crippled the train service from both directions. Tuesday's westbound train reaching Creston 24 hours late.

Creston Board of Trade is having its annual meeting and dinner this (Thursday) evening at the King George Hotel, and a large turnout is looked for.

In the municipal elections at Rossland on Thursday last Wm. Arrowsmith was elected mayor by a substantial majority. He was elected a public school trustee.

A. Walde spent the fore part of the week at Cranbroob, where he was playing on his old Fernie rink in the Crow Nest curling bonspiel in the divisional city.

The cold weather of the past week will enable Creston to secure its ice supply locally, and it should be of excellent thickness with the below zero weather of the past week.

To-night's social attraction is the dance at Compton's Hall with music by Creston Serenad rs orchestra, and an admission of 50 and 35 cents, which includes supper.

HAY FOR SALE—About 9 tons timothy and 25 tons slough hay and quantity of rushes. Will sell in any quantity and deliver if desired. See Lazarus Louie at Royal Cafe or leave word there.

At their meeting on Thursday last the Hospital Women's Auxiliary completed pla s for the dance on February 15th at which the drawing takes place for the ten acres of land or $750 cash prize.

Badly drifted roads and temperature that was around 15 below zero were responsible for the cancellation of the basketball games the men's and ladies' teams were scheduled to play at Bonners Ferry on Saturday evening.

The fairly regular daily snowfalls that have been in evidence since just before Christmas came to an end Thursday morning, when a light rain commenced to fall. Up to Wednesday the total snowfall has been about 60 inches.

The bulldozer, used in clearing the right of way on Creston Reclamation Company, Limited, dyking operations was pressed into service on Saturday, to help plough out the badly drifted roads following the gales on Thursday and Friday.

Creston had its annual blizzard commencing Thursday afternoon last and continuing till almost Saturday noon. The wind was not as strong as in the big blow last winter, but lasted much longer. The wind was so severe Friday morning that it was necessary to close the school.

The coldest weather of the winter, and one of the three coldest touches Creston has ever known, was encountered on Sunday morning when the mercury went down to 23 below zero. It was 11 below Saturday a.m., 13 below Monday, two below on Tuesday, and 16 above Wednesday.

An Ottawa despatch appearing in Thursday's Nelson News states that the Dominion government has made an appropriation of $30,000 for the erecti n of a public building at Creston. As the postal service is the only federal service here it is presumed the sum must be for a new postoffice building, which would certainly be welcomed

Reports indicating a year of successful effort were submitted at the annual meeting of the W.M.S. of Trinity United Church on Tuesday afternoon last at which the following officers were elected: President, Mrs W. J. Avery; vice-president, Mrs. R. C. Phillips; secretary, Mrs. F. Bunt; treasurer, Mrs. Bale; temperance secretary, Mrs. P. Boffey; stewardship secretary, Mrs Phillips; suppy secretary, Mrs. Bunt; associate helpers' secretary, Mrs. R. A. Comfort; strangers' secretary, Mrs. A. H. Walker.

The annual meeting of Creston Valley Hospital Association will be held in Trinity United Church hall, at 8 p.m., Tuesday, January 29th. Reports will be presented by the president and secretary of the hospital board and by the Ladies' Hospital Auxiliaries of Creston Valley. Directors will be elected to replace seven who automatically retire. The following are eligible to vote at the meeting: Life members of the association, annual members who have paid the annual fee of one dollar during 1934, and those who have purchased tickets on the present membership drive. Members of the association are asked to turn out and bring their tickets with them.

The January meeting of the Women's Auxiliary to Creston Post Canadian Legion was held on Tuesday evening last. The president, Mrs. W. V. Jackson was in the chair, with members from Lister, Canyon and Erickson in attendance regardless of the bad weather. Various reports were submitted. Correspondence was light. Mrs. Putnam reported for sick committee on visits at the hospital and in the homes. She will also have a bridge at her home and donate the prizes, proceeds for auxiliary work. Mrs. Vigne reported for committee on ways and means, and had a couple of plans to raise funds. The tea hostesses were Mrs. W. V. Jackson, Mrs. Bird and Mrs. Bateman.
