THE CRESTON REVIEW

V XXV. CRESTON, B. C., FRIDAY, MARCH 15, 1935 No. 46

Plan Improve Village Sanitation

Putting on Truck, Tank, Pump Handle Overflow Septic Tanks and Cess Pools—Money Scarce and Sidewalks Must Wait.

Sanitary matters were to the fore at the March meeting of the village council which was held Tuesday afternoon, the adjournment being taken to permit the councillors to attend the school district meeting Monday night. Reeve F. H. Jackson presided with Councillors Comfort and Murrell in attendance.

Correspondence was lighter than usual The Midland-Pacific Grain Company, of Calgary, Alberta, wrote thanking for information the village had supplied as to elevator sites, taxes and trade licenses. John Huscroft notified that due to a raise in wages it would be necessary for him to raise his lumber prices one dollar per thousand feet. There was a letter from the Legion asking the council to send two representatives to a meeting on March 15, at which it is hoped to arrange for a suitable celebration in connection with the king's coronation silver jubilee on May 6th. The reeve and Councillor Murrell will attend.

There was a petition from Messrr. Patrick, Bunt, Gardiner and Tebean asking for a new sidewalk from Park Road to the Alex. Matheson residence. It will be 960 feet long and estimated to cost $265. A two-board wide walk would cost $130. This will stand over and come up when the possibility of putting down a walk on Creston Avenue north to Hillside Road is looked into.

The council is moving slowly in the matter of expenditure and turned down a request from the band for a donation to buy music. It was also intimated little help, if any, would be forthcoming for the king's silver jubilee celebration. A resolution asking the federal government to assume all relief costs was unanimously approved. Action on sanitation was precipitated due a letter from the M.H.O., Dr. Olivier, which read.

"Until such time as a proper sewage system is installed in the village, I would suggest that you procure a suitable galvanized iron tank set up on a dray or truck and equipped with a good double action pump, and that men be sent around periodically to pump out all cess pools and septic tanks, which are found to be overflowing. No doubt the ratepayers affected will be only too glad to pay a reasonable amount of the expense incurred for the services rendered. And I would further strongly urge that these steps be taken immediately."

The letter was written on March 5th, and since its receipt Councillor Murrell has been on the lookout for epuipmen. He has located a 250-gallon galvanized tank that can be had at $35; a double action pump going at $10, and estimates 15 feet of suction hose will be required and will cost $35. What other hose may be required will be ordinary fire hose. All that is required now is a truck or dray on which to carry the tank. In discussing the matter it was poin'ed out that it would be well, in the centre of the town, to have the residents adopt the pail system iu their toilets.

On motion of Comfort—Murrell, Dr. Olivier was re-appointed health officer for the village for another six month period. Councillor Murrell was also authorized to at once proceed with acquiring the necessary equipment to start the new sanitation effort. He also gave notice of motion that at an early meeting he would introduce a by-law controlling the installation of sep ic tanks and cess pools. The size and design of such tanks will be r gulated and none can be put in without a permit from the village.

Accounts for payment totalled $483. In this amount was one of $200 from A H. Green & Co., Nelson, for the survey made for a sewer system. As the council was of the opinion all the information had not been supplied, as agreed upon before the survey was arranged for, this bill will be looked into. So far no report has been made concerning a disposal plant.

Myrtle Avenue will be looked over by the commissioners to ascertain if certain buildings are on the street allowance. Mr. Plumb is to be notified to clean up some property he has been using as a wood lot. Should he fail to do so the council will do tne work and collect from Mr. Plumb.

By-Law No. 53, known as the Early Closing and Half-Holiday By Law, was given three readings and passed. It amends the hours on beauty parlors and barber shops which now have to conform to the hours of other shops. Blacksmiths are permitted to remain open Wednesdav afternoons provided work has accumulated that cannot be let stand over until the following day.

Wyndel

Miss Chaplin left last week for a visit with friends at points in Alberta.

Miss Nell Payne of Creston was here for the weekend, a guest of Miss Agnes Crane.

Meeting of the Ladies' Aid was held at the home of Mrs Franklin on Thursday last.

Th Women's Institute March meeting is at the church on Thursday, 21st, at 2.30 p.m.

Mrs Baxter of Cranbrook is at present visiting her son-in-law and daughter, Mr. and Mrs. Birch.

Clarence Wilson is driving a new 1935 Ford truck, hauling gravel from Wash out Creek to the dyking operations at Duck Creek.

Anglican Church service is scheduled for Sunday, 17th, at the home of Mrs. Rumsey at 11 a.m. Holy Communion will be celebrated

Tom Mountford, who has been on a trip to Russia as a member of the Canadian Trade-Union delegation, has returned and is delivering addresses in East Kootenay on "What I saw in Soviet Union (Russia)." He is to speak at Creston Wednesday evening.

Workmen are busy this week putting in a temporary bridge across the Goat River channel out beyond the Winlaw sawmill, over which they are hauling gravel and cement for pipe line and pumping plant of Creston Reclamation Company, Limited. The bridge will also be used for hauling in earth by the big scrapers for dyke building in that vicinity.

Erickson

Rev. M C. Percival of Creston was here on Sunday afternoon for Anglican Church service at the schoolhouse.

Mrs. McKelvey was hostess to the members of Erickson Ladies' Hospital Auxiliary at the March meeting on Wednesday last, which was well attended.

Cranbrook Courier: The family of W. P. Percival has moved to Nelson, where Mr. Percival is engaged in ailway work Miss Patricia Dodd, sister of Mrs. Percival, who has been staying here with her and attending high school, has retur..ed to her home at Erickson.

A large number of friends of Miss Joan Kemp were present at a kitchen shower in her honor on Wednesday afternoun at the home of Mrs. John Hall. The bride-elect received a great variety of useful gifts and the afternoon of sociability was much enjoyed. Refreshments were served during proceedings.

Fernie Free Press: Word was received in own this week of the death of Wm. Currie, son of Mr. and Mrs. Wm. Currie, of Creston, until recently citizens of Fernie. The young man grew up here and was well known among the young people. A couple of years ado he was stricken with a lingering illnes and went over to Scotland where he has been living with relatives ever since. About three months ago his parents were called to his bedside and were with him up to the time of his death.

The report of Division 1 of Erickson school just issued by Principal Cobus shows 26 pupils enrolled, and an average atrendance of 25.3. Those taking the proficiency standings were: Grade 8—Gwen Putnam, Lawrence Leadbetter. Grade 7—Aileen MacDonald, James Carr. Grade 6—Mildred Fraser. Grade 5—Helen Goodwin, Norma Bundy.

In Division 2 Miss Sanford had an enrolment of 34, and the average attendance 32.72. The profi iency tandings were taken by: Grade 4—Annie Tomlinson, Elizabeth Gatzke Grade 3—Mabel Chernoff, Joan Langston. Grade 2—Hazel Botterill, Eddie Gatzke and Joan Bajo equal. Grade 1—Doreen Andrews, Jack Goodwin.

Growers' Meeting

Under the auspices of the B.C. Tree Fruit Board.

United Church Basement
CRESTON

Friday, Mar. 22

at 2.30 p.m.

W. E. Haskins and G. A. Barrat, members of the Board, will be present.

ALL GROWERS INVITED!

Review, Grocers Qualify for Finals

Trim Creston Motors and Loallo to Get into Championship Play Offs—Meet Moore's Garage and Cardinals for Honors.

No upsets occurred in the first round of the Creston Basketball League playoffs, when both second-place teams came through with impressive victories

Creston Motors made a game fight against Creston Review, but were never in the pictnre after the first few minutes. In the second half the Review played a nice stalling game in the front court, making little attempt to score. Dot. Palmer making her best performance of the season for the winners A rather amusing incident occurred in the last stanza when Motors took the ball down under their basket and passed to Kate Payne, who missed the finest set-up of the year. Kate, nevertheless, played a great game except for this one rather laughable error, as did Dot. Wightman and Liz. Armitage. The teams:

Creston Review—Levirs 6, Payne 3, Palmer 6, Lewis 1, Bourdon 4, Sinclair: Total 20.

Creston Motors—Avery 1, Payne 3, McCreath 2, Wightman E. Armitage 6: Total 12.

Imperial Groceteria doubled the score on the Loallos, but by no means had all the play. Loallos carried the game into enemy territory all the way but couldn't shoot when they got the ball down. Martello and Rogers were outstanding for the visitors, but to young Lance Maddess of the packers' squad go the real laurels of the evening. Lance has probably improved more this year than any other single player. Always good shot he has developed a very real sense of team play and team responsibility, making him a most valuable player to his mates. Buff Nastassi was excellent at guard. The teams:

Imperial Groceteria—Couling 2, Rogers, Payne, Bourdon 8, Downes, Martello 21: Total 31.

Loallos—Maddess 8, Truscott, Goplin 1, A. Nastasi, Bourdon 4, LaBelle 2, S. Nastasi: Total 15.

Basketball Finals Start To-Night

Great Games Looked for—Cardinals Meet Groceteria and Moore's Garage Take on Review—Best Two of Three.

The stage is now all set for the finals, to be played on a two ou of three basis. In the men's section Cardinals meet the Imperial Groceteria, and in the women's Cecil Moore's Garage meets Creston Review. Every time these teams have met this year there has been a battle royal, and when the curtain rings up on the opening games tonight (Friday) every local fan should be on hand to see the feud renewed.

Last year's champs, the Cardin ls, play a fast hard-passing game, every man on the team being dangerous and a potential shot. Doug. Corrie, captain and guard, is playing the best basketball of his career this year. Ben Crawford, former University of Alberta star, has not appeared on the local floor so often this year but is especially proficient in dribbling. Tony Cobus, the rangy centre, uses his height to great advantage both in taking the tip-offs and in scoring from rebounds Howard Corrie and Charlie Holmes, forwards, are two of the leadiug scoring threats in the league. Bus. Ross alternates at centre with Cobus and is another excellent shot. Harvey Gobbett plays a steady game as substitute guard.

Imperial Groceteria play a shorter-passing game than the Cardinals, but they, too, have a speedy forward line when the breaks occur. Sid Rogers, guard, has this year developed into a beautiful defensive player, especially good on breaking up dribbles Jim Downes takes the other guard position and figures in many scoring plays. Hunden, the centre, is probably the trickiest player on the local floor and couples a great shooting-eye with his basketball strategy. Fred Martello, coach and utility player, takes charge in the crises and has an excellent record for coming through in the pinches Herb Couling's chief forte is speed, coupled with deadly accuracy in shooting. Bill Bourdon is a pretty floor player with a dangerous long shot. Jack Payne is another young player who has developed a fine sense of team play.

Cecil Moore's Garage are a young team who have made a name for themselves this year. Their outstanding characteristics are speed, ability to shoot and a strong defense. Mary Abbott, guard, is one of the best defensive players in the league. Ruth Hare and Theo Tompkins, the other guards, are young players who have come to the fore this year Edith Swayne, centre, is a deadly shot and a fine strategist. Nell Payne is high in the scoring records of the league, but is even more valuable in floor play. Betty Speers is another dangerous shot, while Agnes Crane figures largely in attack plays.

Creston Review, last year's lady champs, are weak in shooting, this being their chief handicap, but are generally conceded to be the better team in floor play. Ada Lewis, captain and guard, has developed this year into a steady and strong defensive player. Marge Levirs, running guard, holds league scoring honors for the year ahd is dangerous on the dribble. Nora Payne, centre, is a dependable floor player and generally gets the tip-off. Dot Palmer and Irene Bourdon have been playing a bang-up game on the forward line. Hazel Sinclair, substitute guard, is a new recruit from the High School team and a very steady player.

Sirdar

Hans Hage of Kuskanook was in town at the first of the week.

Frank Lombardo of Drury spent the weekend t the home of his father.

Carl Lavezello was a business visitor to Nelson for a few days this week.

Constable Hassard of Creston was on a professional visit to Sirdar, Friday.

Birth—To Mr. and Mrs. Bert Inglis of Sirdar, a son, Tuesday, March 5th.

Mrs. Tcahuck was a visitor to Nelson for a short stay making the trip by train.

Mrs. Thos. Rogers, who was in Nelson for a few days, returned to her home on Monday

The water as indicated by guage at Slough bridge reads 1.25, a fall of 0.60 for the week.

Godfrey Vine was in Creston Saturday afternoon getting some repair parts for the caterpillar.

Several C.P.R. officials were here from Nelson on Thursday watching the effects of the rock blast.

Several people were here from Creston, and many from close in, to watch the blast go off on Thursday.

C. Kirk of Creston brought in a large number of men with his truck on Thursday for the large blast that day.

Mrs. George Cam has left for Trail where she will spend a few days with her husband, who i employed at that point.

Catherine Lombardo of Stettler, Alberta, is renewing old acquaintances, and will go on to Revelstoke .o visit her brother.

Mr. Vasseur and son of Creston were here with the truck at the end of the week and spent some time with Pete Longueville.

Mrs. John Harlow and little daughter of Nelson arrived on Monday and will make a two weeks stay at the home of her parents, Mr. and Mrs. James S. Wilson.

It is evidently the intention of the public works department to proceed with the widening of the highway east of Sirdar as engineers are at present engaged on surveying that part.

Dr. Henderson of Cresto was a professional visitor here and at points up the lake Tuesday. Lloyd Walde of Creston was a visitor to Sirdar and Athara at the beginning of the week.

The past few days has seen an increase in the number of cars passing here quite a few of which are from other provinces. With the fine weather the roads are improving. The busses, however, have not resumed running yet, only coming to Sanca with the mail.

The large rock bluff, the final major blast in the highway co struction near Athara, was successfully blown out Thursday morning. The operation was done on a definite schedule arranged by the superintendent, A. L. Palmer of Creston so that no hold up of railway traffic would ensue. The steel rails on the railway were lifted over a sector and logs placed over the ties to prevent injury to them. At the arranged time the blast was put off and was very effective in its results. Several large stones, weighing up to seven or eight ton, were hurled on the track demonstrating the need for the many precautions taken. A compressor was brought up and these stones drilled and shot in short order to a size that the caterpillers could handle them. Two of these machines were stationed on the track to assist in the removal of the debris that fell on the railway. By late afternoon the track was restored by a sec ion crew assisted by part of the road gang, and traffic was resumed. Several of the wires of the trans Canada telegraph were cut by flying stones but a linesman speedily fixed the trouble. This part of the road work has been the cause of great anxiety to the road officials, the closeness of the work to the railway track restricting operations and making it neccessary to take many precautions. The greatest of credit is due every one concerned for the splendid manner in which the work was carried out to schedule. Matt. Hagen is the general foreman in charge and upon him fell the shooting and removal of the rock A. L. Palmer was here for the day superintending operations It will take at least a week to remove sufficient materirl from the highway to permit traffic to pass, and, of course, there is much to do yet building walls, gravelling, etc., but operations will be carried out without interference to traffic.

Creston to Build 4-Room School

Will Cost $15,000 and be Ready September 1st—Stucco Finish—Will Mean Two-Mill Raise on Present Tax Levy.

Creston is to have a new four-room public school buildidg, available for use at September 3rd. It will be of stucco construction, and the trustees are authorized to spend up to $15,000 on its erection and furnishing.

This was the unanimous decision of the school district ratepayers assembled in special meeting at the schoolhouse on Monday night About 30 were present Rev. A. Walker occupied the chair.

In a brief but businesslike statement Jas. Cook, chairman of the board of trustees, reviewed the present education-ion facilities at Creston, claiming that both the high school as well as the public school were congested and operating at a disadvantage. At the high school the library space was totally inadequate and there was no room for physical culture with the boys, but that this work was carried on with the girls at added expense due to having to rent the basement of the United Chuch one day a week,

With the new four room structure it will be possible to utilize one of the present central school basement rooms for the larger library and a lunch room for the higt school students, fifteen of whom now bring their dinner. The other basement room would be used for a lunch room for public school children, 85 of whom pack their lunch and at present have no place to eat except in the halls or the classrooms.

The attendance at the public school is now 250, Division 5 having 49 pupils, and Division 6 about the same number. The worst feature, however, was the use of the basement rooms, one of which housed 42 pupils, and the air space of the room was about sufficient for the good health of 30.

The report on these basement rooms by Dr. Olivier, school officer of health, was that they were unsatisfactory from a health standpoint and must be discontinued at the present term. Public school inspector Manning, who was present, stated that when permission was given to use the basement it was understooe it was but a temporary permit. He pointed out that as at today the school was overcrowded and that at the start of the new term there would be possibly 40 new beginners and not more than 20 to pass out into the high school.

In reply to a question Inspector Manning made it quite plain that with two basement rooms now condemned they could not be used, so that either new quarters, or some other arrangement for housing would have to be made.

The new school will be built so that two additional rooms can be added at each end and heated to advantage. The estimated cost of a frame building was $14,000, but the meeting agreed to vote an additional $1000 and to have stucco construction.

Of this $15,000 there will be a grant from the department of $3000, and the board already has $3400 in a building fund, so that it will be only necessary to borrow $8600, which is is planned to secure at 5%. This will be repaid at not less than $1000 per year. To take care of the new school and the extra teacher it was announced a raise of two mills on the present school district assessment of $921.783 would be necessary

A plan of the proposed school was displayed showing each room 24 x 31 feet inside. It will be built on a six foot cement foundation The $15,000 will include the plumbing and heating, and it is expected the seats and blackboards will be supplied by the department. The board chairman also pointed out that the two-mill increase should not be permanent as with the flats lands now being dyked being added to the district, additional tax revenue would be forthcoming.

There was correspondence to show that the department would prepare plans and the public works department would tender for and supervise the work, but in this quarter the meeting was of the opinion local contractors and workmen hould get the preference, and that all possible material should be bought locally.

All leaders in their class 52

Man's Priceless Possessions

To keep one's head in times of emergency and crisis, remain cool, refrain from excess emotionalism, hysteria and panic, is a sign of strength, and men and women who display these characteristics prove to be the real leaders of their fellow citizens. That leadership may be demonstrated without uttering a word or doing anything spectacular, but merely by being unafraid, natural and unconcerned.

This truth was impressed upon us the other day by an incident reported in the daily press in connection with a fire which broke out on a railway car between Moose Jaw and Regina. There was a rush of frightened passengers to the rear door. One man urged calmness and an orderly exit, but little heed was paid to him. But another passenger remained quietly in his seat, looking with unconcern out of the car window. His attitude impressed others with the fact that there was little danger and no need for undue alarm. People quieted down and a near panic was averted.

The world is passing through the stress and emergency of an unprecedented economic depression. It is a time to try the calibre of men and nations. Under prevailing conditions the striking of a small spark might easily cause an explosion, and a small flame spread into a great conflagration. There are individuals in all countries striving to take advantage of the present situation to stir up trouble. They are playing on the emotions of their fellow citizens, emotions which have been stirred to the depths by the personal problems, difficulties, sufferings and loss with which they have been and still are confronted. Times are ripe for the demagogue and the stirer up of strife to ply their trade, reckless of what the final outcome might be.

In some countries peoples have so lost confidence in themselves and so given way to panic and become the victims of emotionalism, that they have sacrificed personal rights and liberties almost over night which it had taken generations of struggle by their forefathers to achieve for them. Thoughtlessly, in a spirit of panic, they surrendered some of the great fundamentals of life and living because they allowed others to unduly sway their emotions and neglected to keep cool and think for themselves rather than allow others to think and act for them.

Because this is so, the hands of the clock of progress have been turned back in such countries, and their future is dark and discouraging compared with those other nations where the people, and their leaders, have kept their feet firmly planted on the ground and their heads cool and minds clear.

To-day in Canada and throughout the British Empire all people still enjoy that great safeguard of their liberties which is represented by a free and uncensored press and the utmost freedom in expression. Every man and woman, no matter what his or her station in life, is absolutely free to express opinions, publicly or privately, in relation to any and all matters of public policy. They are just as free to criticise and condemn as they are to applaud and praise. If they are dissatisfied and opposed to those presently in positions of authority, they are free to express their dissatisfaction and to organize to give force to their opposition.

No government agent sits in any newspaper office in Canada, no file of censorship orders lies on any editor's desk which must be obeyed. The radio, the pulpit, the public platform, is just as free to opponents of present governmental policies as they are to supporters of those policies. This is not so in many of the countries of the world. Hundreds of millions of people are now denied free expression of their views, opposition to the powers-that-be is prohibited, even the news of the day is censored, suppressed altogether, or colored to suit the views and policies of the prevailing dictator.

The essential fact for all Canadians to ever keep in mind is that, even if a so-called economic security could be obtained by them through these autocratic methods, the price to be paid is altogether too great. A slave may enjoy security provided by his master, but the fact remains he is a slave and nothing more, and what Canadian citizen desires to become a slave?

What the whole world is in danger of losing, unless the very people who have most to lose keep their heads, are the very fundamentals of civilization, namely, the liberties of the individual citizen. Once those personal liberties are lost, and might rather than right occupies the place of power and authority, it will be the great masses of the people, deprived of their democratic institutions and liberties, who will be the sufferers. Once lost, the struggle to regain these priceless liberties will have to be re-commenced, because man was born to be free. The battle to restore civilization, liberty and equality will again have to be waged.

Liberty, freedom, personal rights are priceless possessions. They should never be surrendered for anything else, no matter how attractively that something else may be dressed up and presented. Nothing else, nor everything else, can repay man for the loss of freedom of expression and liberty of action.

New War On Grasshoppers

Menace Serious As Last Year Alberta Farmers Told

Just as relentless a war against grasshoppers will have to be waged this summer and fall as last year by Alberta farmers or tremendous financial loss will result, Lieut.-Col. E. H. Strickland, professor of entomology at the University of Alberta, who was a visitor in Calgary, stated.

It is known that millions of grasshoppers will be massed ready for action as soon as their feeding season begins, but the counter offensive is more highly organized than ever before, due to sad experience in the past, resulting in a greater appreciation by farmers of the seriousness of the menace.

Col. Strickland stated that the present outlook in regard to the grasshopper menace was as serious as it was this time last year. In 1934, he said, very considerable damage was done by the insects, but the damage was inconsiderable when compared with the grasshopper plague between 1919 and 1922, when crops on farms everywhere in the province were wiped out.

Efforts are still being carried on to discover new methods to fight grasshoppers, according to Col. Strickland, but, so far, the most practical and efficient method has been the systematic scattering of poison bait.

A BARBER WHO HAD RHEUMATISM

Tells How He Carried On

A barber who had been "a martyr to rheumatism" writes:—

"I have been a martyr to rheumatism for some ten years. For five years I was so affected that it was with the greatest difficulty I was able to carry on my business. I may say I am a barber by trade. After having tried numerous remedies. I was finally advised to try Kruschen. I am pleased to say that after having used Kruschen for some twelve months, I am now freer from aches and pains than I have been for some ten years. In fact, I consider I am rid of rheumatism, thanks to Kruschen Salts."—W. M.

Two of the ingredients of Kruschen Salts are the most effectual solvents of uric acid known to medical science. They swiftly dull the sharp edges of the painful crystals, then convert them into a harmless solution. Other ingredients of these Salts have a stimulating effect upon the kidneys, and assist them to expel the dissolved uratic needles through the natural channel.

Sir James H. Jeans, British astronomer, calculates that the sun is diminishing at approximately 250,000,000 tons a minute.

WOMAN'S AILMENTS

Mrs. Mary C. Kilby of 148 Main St., Woodstock, Ont., says: "I was in a rundown condition, I had no rest at night, felt completely exhausted most of the time and had frequent headaches. It required only one bottle of Dr. Pierce's Favorite Prescription to give me strength to carry on with my duties."
All druggists. New size, tablets 50 cts., liquid $1.00. Large size, tabs. or liquid, $1.35. Write Dr. Pierce's Clinic, Buffalo, N. Y.

Day Of Thanksgiving

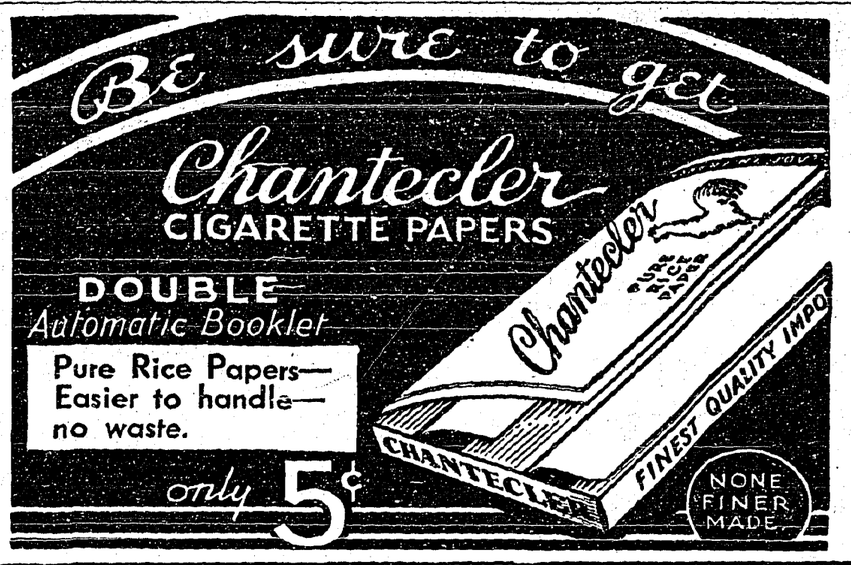
Special Services Requested In All Canadian Churches

The Canada Gazette carried a proclamation requesting special thanksgiving services in all Canadian churches May 5 and setting aside May 6, the 25th anniversary of King George's accession, as a day of general thanksgiving and rejoicing on the occasion of our silver jubilee.

The thanksgiving services on the Sunday before jubilee day were described as giving an opportunity for "appropriate expression of gratitude to Almighty God for the manifold bounties and great mercies which our loving subjects, the people of Canada, have enjoyed, during our reign."

Canadian cattle to the number of 13,592 head, in 27 shipments, were exported direct to Glasgow during the year 1934, as compared with 11,238 in 1933 and 4,016 in 1932. The quality was also greatly improved.

The more people become civilized, the more they increase their capacity for suffering 2089.



SUNDAY SCHOOL LESSON

MARCH 17

PETER DELIVERED FROM PRISON

Golden text: Prayer was made earnestly of the church unto God for him. Acts 12:5b.

Lesson: Acts 12:1-19.

Devotional reading: Psalm 34:1-8.

Explanations And Comments

James Killed; Peter Imprisoned, verses 1-4. Herod Agrippa I., grandson of Herod the Great, was now king, and he began at this time to persecute the leaders of the church at Jerusalem. He had James, the brother of John, beheaded, and this deed pleased the Jews. It was "the days of unleavened bread," as the Passover was called, because no leaven, or yeast, was allowed in Jewish homes while the festival lasted. It was a time when the Jews were especially hostile to those who differed from them, and Herod, as Josephus says of him, "rejoiced in living in good reputation." He sought to still further enhance his reputation by having Peter imprisoned to await his execution at the close of the Passover. Executions were not carried out during the Passover, as the festival must not be polluted by the shedding of blood, and Herod was nominally a Jew (his grandmother, Marianne, was a Jewess) and most scrupulous as to all Jewish observances.

Peter Delivered From Prison, verses 5-11. First of all in the record of Peter's escape, we are told that the church was earnestly praying for Peter. Peter was kept in prison, but earnest prayer was made for him. Notice the force of that little word but. It was the night before his trial and execution as planned by Herod that help came.

Peter was not troubled. He was calmly sleeping. The circumstances of his escape are minutely told, the coming of the angel [God's messenger], the light in the cell, the awakening of Peter, the brief words to make haste, the falling off of the chains, the girding and the putting on the sandals and outer cloak, the command to follow, the passing of the first and the second guard, the opening of the iron outer gate of the prison leading into the city, the going out and passing through one street, and then the being left alone.

All this time Peter was dazed and did not know whether he were waking or dreaming, until he "came to himself" at the opening of the iron gate; then he said, "Now I know of a truth, that the Lord hath sent his angel and delivered me out of the hand of Herod, and from all the expectation of the people of the Jews."

If the pot in which candy is boiled is buttered for an inch or two down the sides the liquid will not boil over.

Little Journeys In Science

PROTEINS

(By Gordon H. Guest, M.A.)

Proteins are very complex substances which always contain the element nitrogen. Protoplasm cannot be formed without proteins, and thus we see that life itself is dependent upon them. The word protein comes from a Greek word meaning "to take the first place", because the importance of this group of substance was early recognized.

Proteins occur in all living matter and are present in all natural food stuffs. Due to the fact that they are the chief constituents of living animal tissue, they are most plentiful in animal foods, such as meat, eggs and fish.

Scientists have found proteins to be the most complicated substances ever studied. They have found that all proteins contain carbon, hydrogen, nitrogen, oxygen and sulphur, while some also contain phosphorous. Small quantities of other elements are found in certain proteins.

Proteins are used by the body for building tissue, and also for producing energy. For providing the material for growth in children, and for repairing waste tissue in adults, they cannot be replaced by any other foods. The proteins obtained from animal foods, such as meat, milk and eggs are more valuable for these purposes than the proteins in vegetables. Milk is a valuable source of protein and is especially good for children.

Science has shown that there are thousands of different kinds of proteins varying in structure and quality. During the process of digestion, the proteins are decomposed into simpler substances, known as animo acid. These are absorbed and recombined in new proportions, forming other proteins which have different properties than those which were taken into the stomach. Thus the proteins in food are different than those actually used by the body.

WORLD WHEAT PACT ADMITTED A DEAD LETTER

London.—The 1933 world wheat pact admittedly became a dead document, five months before its normal expiration date, as the "big four" wheat nations gave up attempts to secure Argentine co-operation in controlling exports for the remainder of the crop year.

Little hope has been held that anything could be done at this late date, owing to Argentina's repudiation of the pact at Budapest last November on the grounds it was unfair to her, and the refusal of the Buenos Aires government to accept new proposals last month.

Until now, however, the other delegates have maintained Argentina was bound by the tentative quotas adopted late in 1933 for the current year, under which Argentina's 1934-35 shipments were restricted to 148,000,000 bushels.

Now the other delegates admit there will be no further enforcement of any provisions of the wheat pact or its subsidiary agreements by any of the 21 signatory countries. All the big four countries—Canada, the United States, Australia and Argentina—will begin planting in the next few months without any acreage limitations whatsoever so far as the world pact is concerned.

Argentina is now in a deadlock with the other three exporters, each side insisting it is up to the other to make new proposals. A scheme to base future quotas on the 1934 acreage, when all four countries made acreage reductions — Argentina least and Australia the most—was rejected by the South Americans. Then they rejected a proposal for allotting quotas on the basis of each country's percentage of world trade in the preceding year.

Argentina's last written reply to the other exporters, it was revealed, argued she does not feel it incumbent upon her to make a counter-proposal, especially as the proposals she rejected were combined offers of the other three powers.

Revolt In Greece

Whole Country Paralyzed With Fear And Misgivings

Ghevghelli, Greek-Yugoslav Frontier.—Despite the announcement of the Athens government that it has the situation in hand and expects soon to crush the revolution, neutral observers in Greece considered the situation highly dangerous.

Martial law prevails throughout Greece. The whole country appears paralyzed with fear and misgivings. Rail, telephone and telegraphic communications are cut off and normal activities are suspended.

While Greece proper apparently was free from military clashes, eastern Macedonia, Epirus and the Greek islands where the followers of former Premier Eleutherios Venizelos dominate, appeared to be in a state of ferment.

Heavy fighting with serious losses on both sides was reported between government troops and rebels in the Struma valley, which during the Great War was a most bitterly contested area between the allies and the central powers.

All telegraph and telephone service has been suspended, not only within Greece but to points abroad. Cinemas and other places of amusement have been closed. All steamer services to Greek and other islands as well as to Greek ports on the mainland are suspended.

The entire plant and stocks of the Standard Oil Company at Salonika have been impounded by the government. Motor trucks, horses and other equipment belonging to foreign companies have been commandeered for war purposes.

Arrest Spy Suspects

Copenhagen.—Ten supposed United States citizens and a Danish Communist, believed to be under suspicion of authorities of attempting to establish an espionage or terrorist centre in Denmark, were arrested here.

Foster Tourist Trade

Ottawa Members Discuss Possibilities Of Development

Ottawa.—Members had a field day in the House of Commons extolling the tourist attractions of Canada as a whole and their own parts of the country in particular. In their enthusiasm they could not find time in the three-hour session to pass a vote of $200,000 to be used to foster Canada's inter-provincial and international tourist trade.

Railway Minister R. J. Manion sponsored the $200,000 vote, an increase of $100,000 over last year. He listened to all sorts of suggestions on how to attract more tourists—national highways built and maintained by the Dominion, extending across the country; a campaign in the United States to convince Americans that Canadians are not Indians or Eskimos; cheap week-end tickets on the railways; passes on Canadian railways for American senators and congressmen so they could discover something about the country, and right down the line to courteous customs inspectors and hotel keepers.

The only opposition to the vote was when several members claimed it was too small, one suggested it be increased over the years to $20,000,000. The vote will be discussed another day.

Mr. Manion said that in 1929, $309,000,000 was estimated as the value of the country's tourist trade and in 1934, $140,000,000. Canada should have a tourist industry worth $500,000,000 when prosperity returned, the minister said.

Dr. Manion paid tribute to Canadian newspapers which had assisted in making Canadians tourist-conscious and aided the tourist bureaus.

Robbery Is A Mystery

Big Gold Shipment Removed From Croydon Airport

London.—Scotland Yard had another puzzling case on its hands—how and by whom three boxes containing gold worth £21,000 ($102,000 at par) were stolen from the administration building of the Croydon airport.

No keys were missing and an outside oak door to the strong room was locked, but the inner steel door was open and the boxes gone.

They were difficult to handle on account of their weight, and how they were removed from the administration building and the airport itself without attracting attention of half a dozen officials constantly on duty was a mystery to the investigating detectives.

No fingerprints were found and this was taken to indicate the robbers wore gloves.

Forced To Change Route

Imperial Airways Service Disturbed By Civil War In Greece

London. — Civil war in Greece has forced Imperial Airways to alter the route of its Empire service to and from Africa, India, Singapore and Australia.

Sidestepping Greece because of that government's temporary ban on the movement of commercial planes, the British ships, through the co-operation of the Italian government, will be routed via Malta, Bengazi, Tobruk and Alexandria.

Sask. Checker Association

Ninth Annual Tournament To Be Held In Saskatoon

Saskatoon. — The ninth annual checker tournament will be held at the Empire hotel, Saskatoon, beginning on Tuesday, March 19, at 9 a.m. The annual meeting will be held Monday evening the 18th at 8 p.m. A cordial invitation is extended to all checker players in the province to come and participate in this which promises to be an unusually interesting tournament.

In the "A" class, 1st prize, the Hon. J. G. Gardiner and Wes. Champ trophy and cash $10.00, and 2nd prize on down to ninth prize with cash and merchandise. "B" class, 1st prize, cash and merchandise $10.75, and on down to eighth prize. Veteran's class, 1st prize, the Hon. S. J. Latta trophy and cash $4.00, and on down to 4th prize. 2080.

PROMOTED

Group-Captain Frederick Sowrey, who, as a R.F.C. pilot, in 1916, brought down the Zeppelin L.32 in flames at Billericay, Essex, has been appointed to command the R.A.F. Middle East depot at Aboukir. He previously commanded the No. 3 armament training camp at Wisbech.

Life Insurance Figures

Insurance Written And Paid For In 1934 Reaches Huge Sum

Ottawa.—During the year 1934 the net amount of life insurance written and paid for in cash in Canada was $596,062,050, an increase of three per cent. over the corresponding amount written in 1933.

In making this announcement, the Dominion department of insurance states these are approximate figures compiled from annual statements submitted by the companies.

In 1934 ordinary insurance amounted to $43,098,908, industrial insurance to $144,041,679, and group insurance to $19,931,463. The total net business in force in Canada on Dec. 31, 1934, was $6,220,208,626, or a decrease of .4 per cent. under the corresponding amount at the end of 1933.

Expansion Of Radio

No Definite Decision Has Been Reached At Ottawa

Ottawa.—No definite decision has been reached as to an expansion of the facilities of the Canadian Radio Commission, Hon. Alfred Duranleau, minister of marine, told the House of Commons.

Hon. W. D. Euler (Lib., Waterloo North) said he had heard reports the commission proposed to spend $1,000,000 on the acquisition of new stations. Mr. Duranleau said he knew the commission had some scheme in mind but nothing definite had been decided regarding expansion.

Housing Plan

Would Revive Scheme To Construct Homes In Winnipeg

Winnipeg.—Winnipeg's civic house committee pressed for revival of the old housing scheme and expenditure of $2,000,000 in 1935-36 on construction of homes for rental, sale or for rental with option of purchasing without reference to ratepayers.

At present the city has the right from the Manitoba legislature to go ahead with a $1,500,000 program or rehabilitation and new construction if and when the voters give their approval, it was stated at a meeting of the committee.

The old housing scheme was in operaion during 1919-23 and was administered by an independent commission of which the city treasurer was chairman. It made 712 loans totalling $2,761,651 and arranged repayments so that borrowers made regular lump sum remittances for principal, interest and taxes.

Silver Jubilee Fund

Contributions Received From Persons Which Means Great Sacrifice

Ottawa.—The King George V. silver jubilee cancer fund management noted receipt of contributions from many persons for whom donations meant "not only hardship but actual sacrifice." It said such conditions were revealed by correspondence enclosed with subscriptions received and acknowledged by the Countess of Bessborough.

One Montreal woman wrote: "I am not complaining, but my husband has not earned one cent for three winters; but such as I have I share for a great purpose and with a good heart."

Her Excellency received from a Toronto home for the aged $1 and a note saying it was "from two Englishwomen over 70 years old."

Prepare Voters' Lists

No Decision Has Been Reached About The Revision

Ottawa.—Secretary of State C. H. Cahan told the House of Commons that no decision had been made about the revision of the election lists which ordinarily would be started April 15.

There had been some discussion, he said, of allowing the present lists, now being printed, to stand without revision but the government had made no decision.

Questioned by Liberal leader Mackenzie King, the state secretary said some 4,200,000 names on the election lists had been put in type by the government printing bureau and the rest would be ready by April 1. There are about 5,800,000 names on the lists.

LONDON'S SAFETY BEACONS INTRIGUE BAMBINO

The safety traffic beacons, which have been installed throughout London to aid pedestrians crossing busy thoroughfare, proved a great attraction for Babe Ruth when he arrived there recently. Here we see the "king" of baseball with his wife and daughter "sizing up" one of these Belisha monsters.

WHITE PAPER IS BLAMED FOR HITLER REFUSAL

London. — Preparing formally to accuse the National government of endangering the peace of Europe, the Labor opposition in the House of Commons laughed when Foreign Secretary Sir John Simon informed the house his visit to Berlin had been postponed on account of Adolf Hitler's cold.

Sir John imperturbably informed the house he was in communication with the German government as to when the talks over the far-reaching security plans envisaged in the Anglo-French communique might conveniently be held. He refused to link Berlin's postponement with the white paper on increased armaments. The government accepts Hitler's explanation.

This white paper, written by Prime Minister Ramsay MacDonald, one-time pacifist, pointed to "unabated and uncontrolled" re-armament in Germany as one of the factors necessitating strengthening of the British forces.

Bitter over the substantial increases in British defence estimates, completed with the naval budget, the opposition decided to move a motion of censure on the government charging the Berlin postponement is directly due to the white paper. The motion has no chance of success in face of the huge government majority, but it may provoke a stormy debate.

Sir John flatly turned down suggestions the white paper be withdrawn. Even among friends of the government the wisdom of its issuance on the eve of the Berlin meeting was sharply questioned.

The house laughed when Frederick Cocks, Laborite, asks: "Will the foreign secretary take this opportunity to visit Moscow, where they have not lost their voices?" Sir John did not reply.

Prime Minister MacDonald was confined to his room with a cold. Pending a fresh German reply, the cabinet was without official information on whether the German government intends to renew its invitation, indefinite postponement of which left the international situation very much up in the air.

Before the house opened the Labor members had a meeting at which, it is understood, Arthur Henderson, former Labor leader and now a private member of the house, rejected suggestions he resign the chairmanship of the world disarmament conference in protest against the British armament increases.

May Test Parachute Idea

Aviator Plans To Use One To Lower Aeroplane

Sacramento, Cal. — A spectacular attempt to lower a transport aeroplane, possibly filled with passengers, to earth with a giant parachute, will be made here, May 19, by Col. Roscoe Turner, noted speed flyer. The demonstration will seek to prove the feasibility of equipping transport planes with emergency parachutes.

Several years ago Col. Turner dropped in an open biplane to earth safely in such a manner.

Union Of Militia Units

Ottawa.—Another alliance between a Canadian militia unit and a regiment of the defence forces of an overseas Dominion was announced by Defence Minister Grote Stirling here. The Edmonton Regiment, with headquarters in the Alberta capital, has become allied with the Kimberley Regiment of South Africa.

Calgary Relief Qualifications

Calgary. — Twelve months' residence in the city will no longer constitute automatic qualification for receiving city relief here, it was announced at the close of a civic relief committee meeting. In future all cases will be judged on their merits in deciding whether they should be civic, provincial or dominion charges.

Chile is to raise a fund to combat fruit diseases and pests.

An Invitation

We issue this invitation in plenty of time because we are anxious that our customers, who know the value of Berger "CLOTHES OF QUALITY" Brand, have the benefit of head office representative's advice as to styles, colors and woollens. Mr. Geo. Mathison rates high in the tailoring craft. His knowledge of what is correct is based on years of experience.

C. F. HAYES, Editor and Owner

CRESTON, B.C., FRIDAY, MAR. 15

HOME BREW

In his "Log of the House," Bruce Hutchinson, in the Vancouver Province, amongst other things. has this to say of the speech of Frank Putnam, on the budget, delivered in the legislature on Wednesday last: "The long-promised bridge across Kootenay Lake at Nelson, battleground of by-elections innumerable, bobbed up again with Mr. Putnam, from those parts. He wanted the bridge built right away and he wanted it to carry no tolls. A capable member, a farmer and a mining operator, Mr. Putnam gave the house a graphic and vivid picture of the mining boom which has made the Kootenays believe that "old man depression has passed Tattenham corner and soon will be lost in the dust of a long, long nightmare."

And the building forthwith of the Nelson bridge wasn't the only suggestion the local member had for the works department to demonstrate that old man depression is well on the way out. Mr. Putnam made a persuasive plea for free ferry transportation across Kootenay Lake for residents from beyond Kuskanook. Our information is that this request was made at the instance of Boswell Farmers' Institute, and giving voice to it Mr. Putnam has demonstrated that he intends to give equal consideration to all sections of the Nelson-Creston riding. The request, we fear, will not even make first base. Just why free carriage should be given ranchers from Boswell, for instance, to enable them to get to Nelson is not even good business for those asking it. All the facilities that Nelson has to offer are available here, and the trip to and from Creston can be made in one and the same day, thus effecting some saving in money as well as time. And in the rush season what is the ferryman to do if he has too many customers. Will those who travel free be content to be left behind or must those who pay their way be forced to wait. A free ferry across the lake for ranchers would be a dangerous precedent to set. If Boswell farmers are to ride free, why not Creston ranchers who have occasion from time to time to visit Nelson.

Along with control of tree fruits, British Columbia is this year to also have similar control in connection with vegetables. Word to this effect was given out early last week at which time the provisional board of five directors was announced—all from the Okanagan. The control of the new scheme will be in charge of three trustees and a start is to be made at once registering producers, and later meetings will be held to elect the board of management. The province has been divided into nine districts. What is termed "the general Kootenay area" is one, and will have one delegate. The chief function and powers of the board, as set out in the scheme, are "to regulate the time and place at which and to designate the agency through which the regulated product shall be marketed. to determine the manner of distribution, the quantity and quality. grade or class." Authority is given to conduct a pool for the equalization of returns, and to alter. from time to time, the method of pooling.

In the country around Golden where the winter's snow has been more abundant or sunny weather scarcer than in these parts, irate ranchers are still writing letters to the Star protesting against the way favoritism has been shown autoists by ploughing off all the snow to the great inconvenience of those who are in the habit of doing their hauling by team and sleighs. One of these penmen wants the scrapers to do a 50-50 job of it—take the snow off only one half the width of the roadway. Locally there has been some considerable complaint of the same sort and if the department has any experts with a little time on their hands they might be delegated to get busy on ascertaining a set for snowploughs that will preserve sleighing on country highways for a somewhat longer period than prevailed in the past winter with its exceptional January snowfall.

Poll on Marketing Schemes

Notice is hereby given to all registered growers that a poll will be taken to determine the wishes of growers as to the continuation of the marketing schemes administered by the British Columbia Tree Fruit Board under the Natural Products Marketing Act, 1934, and under the Natural Products Marketing (British Colnmbia) Act.

Ballot forms have been sent by post to all registered growers and must be returned by post or delivered in a sealed envelope, addressed to "The Returning Officer, British Columbia Tree Fruit Board, Kelowna, B.C.", not later than March 30th, 1935.

Any registered grower who has not received a ballot form by post may obtain one on application to this Board.

BRITISH COLUMBIA TREE FRUIT BOARD.

GOAT RIVER CANYON DEVELOPMENT

By GORDON MARTIN

Awarded THIRD PRIZE for best essay on "West Kootenay Power & Light Company, Limited, Development" by pupils in Grade 8, Creston Public School, at the recent School Fair.

Recently Creston has had an ample supply of electricity by two engines. Soon the outlying districts wanted electricty, therefore the West Kootenay Power & Light Company, Limited, built a dam and power house on Goat River at the canyon, four miles east of Creston. In November, 1932, the work was begun. This construction work was finished in November, 1933. Over 100 men were employed. The dam is made of cement reinforced with steel.

The dam is 180 feet wide and 70 feet deep. It has a 12-foot base, with a four-foot crown. The water flows through the dam in a gate 5-foot square. The water is backed up in a deep pool to the railway bridge.

The penstock, six feet in diameter and 65 feet long, has a whirlpool twist that gives the water force to turn the turbines. At the head of the penstock are the screens which will not allow any sticks, mud, etc., to pass through. An automatic air compressor prevents the water from freezing during cold weather. There are two turbines. One generates 250 horse power, while the other will generate 800. These turbines, weighing 300 pounds each, travel at the rate of 600 revolutions per minute.

When in full operation 2400 horse power is used. The voltage is transformed from 2200 to 6600 volts. An underground cable runs from the power house to the step-up in Creston. The step-down ranges from 6600 to 2200 volts.

The electricity is distributed on poles by wire to Creston, Canyon, Erickson and Wynndel. Nearly all the buildings now have electricity to run machinery and it also makes irrigation easier.

Kelowna creamery claims that in 1934 it paid its patrons two cents per pound more for butterfat than any other B.C. creamery.

According to the last report of the Liquor Control Board the sales at Cranbrook last year were $104,981, Fernie $114,906, Trail $148,889, and Nelsan $186,816.

TENDERS will be received by the undersigned up to Noon, Wednesday, March 20th, 1935, for the purchase of eight round and three Rectangular Wooden Tanks, located at the zinc smelter, Nelson, B.C

For further particulars apply to H W. Stevens, Asst. District Engeneer, Nelson, B.C.

The highest or any tender not necessarily accepted.

A. V. HAMILTON,
Purchasing Agent.

Parliament Buildings,
Victoria, B.C.,
March 6th, 1935.

A few words by telephone brought quick results

Roger Bathurst had a business proposition to put to a man in another city. "I could say it better than I could write it," he said to himself, "but I haven't time to make the trip. Besides, the cost would be prohibitive."

Bathurst found a solution to his problem in the long-distance telephone. He placed a call to the man in the other city, and a few words over the telephone wires brought the desired results.

Kootenay Telephone Co., Ltd.

GOVERNMENT LIQUOR ACT

Notice of Application for Consent to Transfer of Beer Licence

NOTICE is hereby given that on the 18th day of March next, the undersigned intend to apply to the Liquor Control Board for consent to transfer of Beer Licence Number 3095, issued in respect of premises being part of a building known as Cosmopolitan Hotel, situate on Front Street, Ymir, British Columbia, upon the lands described as Lot No. 2, Block No. 26, Map No. 640, town of Ymir, Nelson Land Registration District, in the Province of British Columbia, from John Breau to Harry Olson, of Nelson, British Columbia, the Transferee.

DATED at Nelson, B.C., this 28th day of February, 1935.

HARRY OLSON.

The Natural Products' Marketing Act

British Columbia (Interior) Vegetable Marketing Board

A scheme has been approved under the Natural Products Marketing Act, 1934, for the regulation by the British Columbia (Interior) Vegetable Marketing Board of vegetables produced in British Columbia in the area described as follows:

Commencing at the point on the International Boundary being the 49th parallel of North Latitude where the same is intersected by the 121st Meridian of West Longitude; thence North along the 121st Meridian to the 50th parallel of North Latitude; thence West along the 50th parallel of Latitude to the 122nd Meridian of West Longitude; thence North along the 122nd Meridian to a line drawn due east and west through Barriere, British Columbia; thence East along the said line to the Easterly Boundary of the Province of British Columbia; thence following the said Easterly Boundary of British Columbia in a South Easterly direction to the said 49th parallel being the International Boundary; thence West along the said 49th parallel to the point of commencement.

All producers of vegetables on one-quarter acre or more of land are required to register with the Board on duly prescribed forms which are being mailed to all producers within the described area. Producers not receiving such forms should apply forthwith to the Secretary, British Columbia (Interior) Vegetable Marketing Board, P.O. Box 580, Kelowna, B.C. These forms duly completed must be returned to the Secretary before March 30th, 1935.

All producers within the described area are required to take notice that elections of delegates who will elect two members of the Local Board will be held for the districts as hereunder written on the dates and at the places mentioned

DISTRICT No.	No. of Delegates	DATE and PLACE of MEETING
No. 1 Nicola Valley, Main Line of the Canadian Pacific Railway, Lytton to Chase, Ashcroft, Lillooet, Clinton, North Thompson.	3	Kamloops, April 9th.
No. 2 Salmon Arm-Malakwa.	1	Salmon Arm, April 11th.
No. 3 Armstrong-Enderby.	1	Armstrong, April 8th.
No. 4 Vernon-Oyama.	2	Vernon, April 9th.
No. 5 Winfield-Okanagan Centre-Rutland Joe Rich Okanagan Mission-Kelowna-Westbank.	3	Kelowna, April 10th.
No. 6 Peachland-Summerland-Penticton-Naramata-Kaleden.	1	Summerland, April 11th.
No. 7 Oliver Osoyoos-Keremeos.	2	Oliver, April 8th.
No. 8 Grand Forks-Cascade	1	Grand Forks, April 10th.
No. 9 Kootenay—being all territory East of line drawn from point immediately South of territory tributary to Malakwa to a point immediately East of territory tributary to Cascade which Kootenay district shall include the Arrow Lakes.	1	Nelson, April 12th.

Only registered growers producing a product which is actually regulated by the Board are permitted to vote at the election of such delegates. Particulars of the exact time and place in each centre will be announced later.

A member of the Provisional Board will attend each of the above meetings and further information can be obtained on application to the Secretary. Copies of the scheme will be available for distribution shortly.

Dated at Kelowna, B.C. this 9th day of March 1935.

By Order of the BRITISH COLUMBIA (INTERIOR) VEGETABLE MARKETING BOARD,

J. H. THOMPSON,
Secretary.

Metro News

Canyon

Miss F. Knott was a weekend visitor with her sister, Mrs. Barnhardt, at Glen lilly.

Mr. and Mrs. Ingram and family from Arrow Creek are now residents of Canyon, having leased the former Hurl ranch.

The dam at the West Kootenay power plant is still full of slush ice which backs up for about 200 yards. It will likely remain until the water warms up considerably.

Mr. and Mrs. Norman Strong are now occupying their new residence. It is a two story home with particular attention given to the interior finish and comforts.

M ssrs. MacDonald and Tindale of the West Kootenay Power & Light Company, Limited, mechanical staff, of South Slocan, were visitors at the dam on Thursday last and gave instructions to do more rock removal work than was originally planned. With twelve men at work it is hoped to complete the job by the end of March. A dragline is being used to remove the blasted material.

Canyon basketball club sponsored a basketball exhibition and dance at the hall on Friday night which attracted a good turnout all of whom were taken with the three different basketball games. The opening game was between two junior teams. The second display was by Canyon senior girls and Pharmacy of Creston league. The local girls, with only one year's experience managed to keep the score fairly even against their more experienced rivals. Time after time the Canyon girls thrilled the crowd but the Creston squad was more than their match for speed and smoothness. Canyon senior boys played a combination team of Canyon boys and girls, winning a game which featured a fast combination attack and stonewall defence. After the games there was a well attended dance to music supplied by Mrs. Kolthammer, and Messrs. Kolthammer, A. Bond, L. Moberg, L. Bond, Jarvis, Bedry and Jarvis. A good time was reported by ll. The senior teams were: Girls—June Browell, Margaret Huscroft, Minnie Huscroft, Anue Gartland, Babs Spencer, Grace Bond, Pearl Gillespie, Ethel VanAckeren. Boys—Earl Browell, Bruce Niblow, Charlie Kolthammer, Bud Browell, John Spencer, Bert Huscroft, Frank Clayton, Tom Tedford.

The March attendance at Division 1 of Canyon school according to the report of Principal D. J. Hunden was 36, with an average attendance of 31.6. Those taking high standings were: Grade 5—Miriam Spencer. Grade 6—Kenneth Kolthammer. Grade 7—Jean Spencer. Grade 8—Tom Tedford. Perfect attendance—Grace Gardiner, Stanley Gardiner, Mike Huclack, Elva Osborn, Miriam Spencer, Alva Strong, Berti Tedford, Jerome Jarvis, Vivian Osborne, Kenneth Kolthammer, Jean Bateman, Carl Nygaard, Mary Nygaard, Borg Olson, Joyce Clayton, Beryl Gillespie, Helen Humble.

In Division 2 Miss Knott reports an enrolment of 31, with an average attendance of 28. The high standings were won by: Grade 1—Kathleen Tedford. Grade 2—Bill Bedry. Grade 3—John Blakey. Grade 4—Lloyd Bothamley. Perfect attendance Kenneth Bateman, Hazel arvis, Lloyd Bothamley, Leonard Nelson, Lawrence Tedford, Alex. Huclack, Ira Olson, Guy Browell, Rose Strong, Bill Bedry, Edwin Moberg, Esther Jarvis, Avis Osborne, Jim Spencer, Alfred Olson, Kathleen Tedford, Lloyd Strong, Phyllis Osborn.

Lister

Col. Fred Lister was a business visitor at Nelson a couple of days at the first of the week.

Rev. C. Baase of Creston took Lutheran Church service at the schoolhouse, Sunday afternoon.

Mr. and Mrs. C. J. Johnson, who have been in charge at the Lyon ranch for the past year, left last week for Calgary, Alberta.

Harry Helme has just completed stumping and clearing two acres on the A. R. Bernard place, which will shortly be planted to orchard.

The Lister-Huscroft district's 1934 cut of alfalfa is moving out steadily and if this sort of weather is maintained there should be no trouble disposing of the surplus.

The school population was enlarged by three pupils with the arrival from Wynndel of Mr. and Mrs. Henrickson and family, who are in the house formerly occupied by Mr. and Mrs. Jock Osborn.

Ed. Brudler, Ludwig Sommerfeld, Herman Sommerfeld and A. Daus were at Nelson during the week, making their appearance before Judge Nesbit in connection with securing naturalization papers.

Five tables were in play at the Community Society bridge drive at the schoolhouse, which was supervised b Mr. and Mrs. Chas. Huscroft. The high scores were made by Miss Curtis and Frank Yerbury. Lunch was served at the close of proceedings.

Growers' Meeting

Under the auspices of the B.C. Tree Fruit Board.

United Church Basement
CRESTON

Friday, Mar. 22

at 2.30 p.m.

W. E. Haskins and G. A. Barrat, members of the Board, will be present.

ALL GROWERS INVITED

Board Fears for Fire Blight Evil

Special Committee States Case in Letter to Deputy Minister of Agriculture—Fix Dues at $10 —Add Another Member.

Matters horticultural had the right of way at the March meeting of Creston Board of Trade on Tuesday night which was largely attended, and was in charge of President Mallandaine. A compromise was reached on the matter of increased yearly dues. Instead of a raise from $3 to $10 per annum, an amendment making the membership $5 was carried.

The chief talk was occasioned by a report from the committee on agriculture submitted by F. H. Jackson, who called for some move by the board to check fire blight in valley orchards. His solution was for spraying under supervision and tagging all the infested trees so treated. T. Wilson wanted compulsory spraying over a period of two or three years. C. W. Allan wanted more help for local horticulturist so the deperedations of the blight might be halted forthwith. John Murrell asked for a move to erect the infested area into a compulsory spray district. Mr. Murr ll also thonght it would be good business to have the orchardists advised that a likely remedy is to spray the trees when in full bloom with the Bordeaux mixture. The matter was left with a committee of Messrs. Jackson, Allan and Wilson to draft a strong resolution and forward the deputy minister of agriculture.

The matter of controlling the woolly aphis was also brought to the attention of the committee. Chas. Murrell pressed for information as to prospects for a cannery. He advised that the operators on the old Reclamation Farm were particularly anxious for news of this sort in regard to peas. The board will endeavour to get the desired information.

F. A. LaBelle was elected to membership. In response to an appeal for help from the band a donation of $4 was ordered. The annual fee of $10 to qualify for membership in the Eastern B.C. Associated Boards of Trade was ordered paid.

No action was taken on a letter from the Vancouver Sun asking that the board go after the B.C. government for funds for a province wide publicity campaign, and a letter from Roger Borrett of Kelowna regarding hospital financing and medical services generally was referred to the hospital committee. The Associated Boards of Trade of the Fraser Valley will be respectively advised that Creston board does not favor entering a B.C. Associated Boards of Trade at present. For the King's silver jubilee of coronation the executive will send two reprerentatives to the conference in connection with such a celebration at the town hall Friday night.

Suicide at Kitchener

KITCHENER, B.C., March 13—Andrew Hajduk, worker at the Kitchener airport committed suicide here this afternoon by shooting himself just below the heart after he had beaten Mrs. Reinze into insensibility with a stone tied up in his handkerchief. He died immediately

According to information obtained from Constable R. H. Hassard of the provincial police at Creston; Hajduk went to the home of Mrs. Reinze this morning and in a fit of jealousy, it is believed, attacked her, beating her about the head and inflicting cuts and bruises. Leaving the house, Hajduk went a distance of about 100 feet and shot himself with a rifle. The weapon had no stock.

When Mrs. Reinze was discovered help was immediately sent for and Dr. G. B. Henderson had her removed to the Creston hospital where she was reported to be doing nicely late Wednesday night. Her arms were badly bruised also, evidence it is belie ed, that she tried hard to defend herself. Her husband is a section man for the C.P.R. at Kitchener.

Hadjuk, according to Constable Hassard, was not reported to be irrational early in the morning and is stated to have had supper with Mr. and Mrs. Reinze Sunday evening. They had been good friends, and he is believed to have committed the assualt while in a jealous rage.

Hadjuk came originally from Jugo Slavia in 1926 and has been at Kitchener about two years. He was 36 years old and is thought to be survived by his mother. He was single

Constable Hassard arrived at the scene about 10.30 in the morning.—Nelson Daily News.

Enquiry at the hospital at noon on Thursday elicited the fact that Mrs. Reinze is recovering nicely.

The cannery is offering Oliver tomato growers $12.50 per ton. 75 per cent. will be the John Baer variety.

According to the Vernon News there is a patch of land to the south of Woods Lake already planted to onions.

At Kimberley the board of trade wants the government to have an auction sale of the lots it owns in order to provide needed home building sites.

Our K. B. O. Broadcast

Up to March 5th Rossland's total snowfall is almost 180 inches.

Kimberley hospital closed its year with a bank overdraft of $765.

D. P. Kane of Kaslo has a belaborous plant in full bloom in his garden.

The plant at Enderby has turned out its first kiln of brick tile for 1935.

At Oliver tomato growers are putting in enough seed to plant 175 acres.

The winter cut of ice this year at Invermere is said to be the purest in several years.

Shareholders in Kelowna creamery were paid a dividend of $5 per share on 1934 operations.

The Kelowna creamery claims its price for butterfat in 1934 was 15 per cent. higher than in 1933.

The snow is still too deep in the hills around Yahk to permit of portable sawmills being operated.

The News reports the arrival of the first flock of geese at Woods Lake, near Vernon, on March 3rd.

Penticton owes $342,000 on the municipal owned irrigation system. The rate is $14 per acre.

From October 15th to March 1st J. Van Antwerp, a Vernon amateur fisherman, claims to have caught a quarter ton of fish in Okanagan Lake.

They are looking for an early summer at Kaslo. The diving float at the bathing beach is being repaired and put in shape for summer use.

Although 1400 people signed a petition asking for the re-appointment of J. W. Reid as postmaster at Bonners Ferry, he was not favored with the job.

While their X-ray machine is being overhauled patients from hospital at Enderby are being taken to Salmon Arm.

Kaslo business houses are asking the council to oil the business section of the town as soon as weather will permit.

At Fernie the catch of grayling, or Rocky Mountain whitefish, is in full swing and some nice catches are being brought in.

According to the Bonners Ferry Herald all present indications are that there will be no excessive floods on the Kootenay River this year.

The Herald expresses great dissatisfaction with the size of the crowds that turnout for the town league basketball games this winter.

The Herald guesses the high water in the Kootenay River at Bonners Ferry will not exceed a rise of 30 feet. It went to 33 feet in 1933.

Local and Personal

At the school district ratepayers meeting on Monday night $15,000 was voted for the erection of a new four-room stucco public school building, to be ready for use at September 1st.

At the March meeting of the village council it was decided o improve sanitary conditions in the town by putting on a truck with tank and pump to take care of overflow septic tanks and cess pools

At their meeting on Tuesday night the board of trade compromised on the annual membership fee. Instead of a raise from $3 to $10, for 1935 the dues will be $5. There was a very large attendance.

The second series of home bridge parties in aid of the Hospital Women's Auxiliary was at Mrs. R. Stevens on Monday night last. The high score prize was won by Mrs. M J Beninger.

W. Donaldson announces that Geo. Matison, style expert ith Clothes of Quality, will be at the Donaldson store Monday, March 18th. If you want the the newest in tailored suits be suae and call at the store that day.

Growers are reminded of the meeting in the United Church basement next Friday afternoon, March 22nd, at 2.30 p.m. W. E. Haskins and G. A. Barrat of the B.C. Tree Fruit Board, who will be in the valley, will speak.

HORSES FOR SALE—I will offer for sale for a few days only, 11 head of work horses, weight from 1200 to 1300 lbs., four to seven years old. Can be seen at my farm, next the N. Schade ranch, just north of town. W. Armstrong.

The start in the final games of the basketball league will be made tonight Creston Review will take on Moore's Garage and the Cardinals meet Imperial Groceteria. First game is at 8 p.m. A two out-of-three series will be played.

Cranbrook Courier: According to the Courier's Moyie correspondent, Rev. Father Choinel expects to leave early in April for a visit to his old home in France. Father Choinel came to East Kootenay in 1904, his first charge being at Moyie.

About a mile of dyke remains to be built at the Wynndel end to complete the reclamation of the 8800 acres of Creston Reclamation Company, Limited, area on the flats. If weather is at all favorable the job should be completed this month.

The local British Israel organization announce a lecture on the topic, "Marks of Identification," will be given by Col. Wright of Vancouver in Trinity United Church Wednesday evening, March 20th, at 8 o'clock. All invited. Collection.

Thos. E. Mountford, workers' and farmers' delegate to the Soviet Union (Russia) will give his report in the United Church basement, Creston, on Wedaesday, March 20th, at 8 p.m. He will also speak at Canyon Community Hall, Tuesday, March 19th, at 8 p.m.

The retirement shortly, on superannuation is announced of Constable E. A. Vachon of the provincial police, now stationed at Kamloops. He was in charge of police work at Creston from 1918 to 1921, at which time he was transferred to Salmo, and later to Windermere.

Mr. and Mrs. T. Goodwin who have pent the past four months touring outhern California, with headquarters at Long Beach, arrived home on Friday and report a delightful vacation. A novelty was an over-two-inch rainfall in about three hours one day during their stay at Long Beach.

The attendance was rather small at the meeting Wednesday afternoon of members of Creston Valley Agriculturaf Association, but those present were quite optimistic and favored a fair for 1935 No definite action will be taken until the secretary has communicated with exhibitors to find out how much support can be counted upon.

Mr and Mrs. John Miller, jr., met with a severe setback on Sunday after noon when fire completely d stroyed their home and all its contents The residence is on a couple of acres he recently acquired from his father, J. R. Miller, located just across from the C. H Hester ranch at Alice Siding Mr. and Mrs. Miller and children were on a visit with his parents when the fire broke out and had gained such headway before it was noticed that it was impossible to save anything—clothing, furniture and even a small sum of money all going up in smoke. For the present they are living in the packing shed on the J. R Miller place, pending the erection of a new home.

The funeral took place this morning from Holy Cross Church of the late Joseph Drexler of Erickson, who passed away at his home on Monday evening after quite a lengthy illness. Deceased was over 90 years of age and had been a resident at Erickson for the past 25 years. On his arrival he had a place on what is kno n as the Leamy timber limit, but this he vacated about a dozen years ago and took up a ranch about opposite the present Jas. Murphy (Brownrigg) ranch. He is survived by a widow and one daughter, Annie, of Erickson. Deceased was thoroughly industrious but of a queit retiring disposition and very highly respected in the community, and those who survive will have the sympathy of all in their great loss.

Kitchener

Miss Rita Stratton of Nelson was a weekend visitor at Kitchener.

Richard Molander is combining business with pleasure on a visit at Trail.

Mrs. H. H. Redmile was a visitor at Cranbrook for a couple of days last week.

Miss Jessie White was at Erickson for the weekend, a guest of Mrs. McKelvey.

Little Miss Germaine Foisy was a weekend visitor at Erickson, a guest of Mrs. McKelvey.

Bill Wickholm, truck driver at the airport, and Dan McDonald, manager, eft on Monday for Wasa, for rails.

Mart. Nicholson of Cranbrook, public works department mechanic, made a call at the airport and Goatfell camps, Wednesday.

Mrs. B. Johnson and Master Ronald Lepage left on Saturday for Cranbrook and Kimberley on a visit with relatives and friends.

Pete Klyne, imekeeper at the airport, has resigned and left for Nelson on Saturday. He will be greatly missed on the baseball team this year. He played a great game for the locals last season.

The fill on the new road which is being built by the men from the airport, just east of town; has advanced so much that a detour had to be made alongside the road in front of Paulson's old store.

Col. D. W. B. Spry and Major Harcourt, chief engineer, Militia District No. 13, Calgary, Alberta, and F. A. Lazenby, supervising engineer, Yahk, made an inspection of the airport, Goatfell East and West camps, on Thursday.

The bridge and dance in aid of the baseball club in the Paulson store on Wednesday last was poorly attended, with but five tables in play. The high scorers for the month were Mrs. C. Senesael and Cliff. Foisy. Low score prizes were taken by Mrs. C. Foisy and A. Parslow Mrs. B. Johnson donated the high score trophies, and H.H. Redmile those for consolation winners. For these prizes the club extends thanks. At a meeting later it was decided to have bridge parties once every two weeks, instead of weekly as in the past.

Institute Favors '35 School Fair

Will be Open to All the Valley Schools—Will Exhibit Again at Vancouver—Give to Cancer Fund—Committee Heads.

The March meeting of Creston and District Women's Institute was held at the home of Mrs. Maxwell on Fr day afternoon. The president, Mrs H. W. McLaren, presided, with 16 members and two visitors present.

Correspondence dealt mostly with a resolution drawn by Creston institute in December. Local bodies and B.C. women's institutes endorsing same. The meeting was unanimous in a donation being made the King's Jubilee cancer fund.

Mrs. McLaren and Mrs. Fraser were named to represent the institute at a joint meeting to be held on March 15th to consider the valley wide celebration of the King's Jubilee on May 6th.

An interesting discussion was in evidence as to whether the institute should compete in the needlework at Vancouver exhibition, the local ladies having twice won the silver cup. The decision was in favor of entering this competition this year. Mrs. R. Stevens was named to look after this matter.

The matter of a school fair was taken up. The proposed fair would take exhibits from all valley schools. A majority of the members favored the fair but i the agricultural association have a fall fair the institute will team up with them and make the school fair a feature of the larger exhibiti n.

There was a letter from Mrs. Dockerill of Trail, the B.C. supervisor of Gir Guides who expressed disappointment in apparent lack of interest in the guide work. If a leader can be found it is proposed a Brownie pack be formed.

Mrs. Maxwell and Mrs. Ibbitson, visiting committee, reported an active month. For the ensuing month Mrs. McLaren and Mrs. Andrews will have charge of this work.

Standing committees for the year were approved as follows: Legislation, Mrs. Mallandaine. Public Health, Mrs. Ibbitson. Publicity, Mrs. J. E. Johnston. Agriculture, Mrs. McLaren. Home Industries, Mrs. Stevens, Mrs. Nastasi. Ways and Means, Mrs. Jas. Cook. Education, Mrs. W. Fraser, Mrs. F. V. Staples. Home Economics, Mrs. Maxwell, Mrs. Cherrington. Hospital, Mrs. Murrell, Mrs. W. H. Crawford. Memorial, Mrs. F. C Rodgers. Girl Guides, Mrs. R. Stevens.

The hostesses at the social hour were Mrs. Maxwell and Mrs. Cook. The collection was generous and goes to the Crippled Children's Fund. The April meeting will be at Mrs. Crawford's.

SCIENTISTS FIND FASTER WAY TO RELIEVE COLDS

1. Take 2 Aspirin Tablets.

2. Drink full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 3 Aspirin Tablets in a third of a glass of water and gargle. This eases the soreness in your throat almost instantly.

Ache and Discomfort Eased Almost Instantly Now

When you have a cold, remember the simple treatment pictured here . . . prescribed by doctors everywhere today as the *quick, safe way.*

Because of *Aspirin's* quick-disintegrating property, Aspirin "takes hold"— *almost instantly.*

Just take *Aspirin* and drink plenty of *water* . . . every 2 to 4 hours the first day—less often afterward . . . If throat is sore, use the *Aspirin* gargle.

But be *sure* you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every *Aspirin* Tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

WORLD HAPPENINGS BRIEFLY TOLD

The new university library at Cambridge, costing $2,500,000, will be officially opened by the King, Oct, 22.

An ancient monument built probably 4,000 years ago has been brought to light at Manghold, near Ramsey, Isle of Man, by archaeologists.

Another of the scientific world's "problems" dissolved with the announcement by a pair of Chicago scientists that they had perfected a method of producing liquid copper after eight years of private research.

In honor of the visit of the Canadian delegation to the fifth Imperial Press conference, an avenue of maple trees has been planted in Bloemfontein, South Africa, along the road leading to the memorial to Canadian victims of the Boer war.

Word was received from England of the selection of Dr. J. S. Foster, professor of physics at McGill University, Montreal, for election to the Royal Society of London, the highest honor that can be conferred on a British physicist.

INFANTS' COLDS Relieved!

Young children easily catch cold. So Mrs. Russel Ward, of Hilton Beach, Ont., wisely says: "If I notice that there is any sign of a cold I give Baby's Own Tablets and find they are a great help." Thousands of mothers do the same not only for colds but for fretfulness, indigestion, constipation, teething troubles, colic, upset stomach and so on. Baby's Own Tablets are *safe* and sure in relieving childhood's common ailments. Price 25c.

Dr. Williams' 136

BABY'S OWN TABLETS

The fire prevention expert for the United States Department of Agriculture in a recent address stated that fire loss on farms would be substantially reduced if a ladder were part of the equipment of every farm. A ladder kept in a convenient place makes any roof fire quickly accessible and provides the means for occasional inspection of chimneys and flues. 2089.

GET RID OF THE CROWS

(By JACK MINER)

(Continued From Last Week)

Dear reader, the above is only a flash of the cruel, wicked, murderous ways of the black nest robbers. Fortunately, in those days there were not many crows. Really, I don't believe there were ten per cent. as many of them as there are to-day. We must not blame the crows for their increase. This is man's fault. We have gone wrong. We have combined our force with the crow's and pointed all our attention at the game birds. Yes, and song birds, too, and left these organized nest robbers to multiply by leaps and bounds.

Thirty years ago no crows wintered in Ontario, but now they are with us the whole year around. In travelling from Windsor to Chatham, Ontario, a distance of less than 50 miles, I firmly believe I have seen over 100,000 crows in less than an hour. There is another reason for them multiplying so rapidly the last 20 years, their worst natural enemy is practically gone, the raven. Forty years ago, ravens were just about as numerous in this country as crows. The raven is nothing but a big, powerful, overgrown crow in habits, only he doesn't migrate. He will search for a crow's nest and rob it of its eggs and young, treating them just the same as the crows treat our robins, mourning doves and dozens of other species of lovely, desirable, song and insectiverous birds. The raven is an inhabitant of the more dense woods, but will scour the clearing for food and, up until the last few years, they fairly thronged in northern Ontario and Quebec.

Between 1895 and 1905, the very height of my sporting ambition was big game. I usually carried four ordinary two bushel, twine sacks and when I shot a moose I would bag the meat up, carry it a few rods and cover it with boughs to make it suspicious-looking to the wolves. Then, I would shoulder the head and go to camp. When the party of us would return the next day to carry out the meat I have often seen as high as a hundred ravens fly up from the running gear of one moose. But now going over the same ground, I haven't seen a single raven for two or three years.

You see, the price of furs started soaring in 1904 and kept right on going up, up. Think of it! Mink skins that sold for $1.00 each now sell for from 15 to 20 dollars. Fisher skins that sold for $3.50 now bring $100. And a great many other furs soared in proportion. The result is that in the last 15 years the woods have been overrun with trappers and although against the law, the majority of them used quantities of strychnine and, just as soon as the ice will carry a man, about every lake in northern Ontario, has poison bait or baits upon the ice. Some trappers will shoot dear and moose for no other purpose than to make poison bait of it. By injecting the poison into the meat while warm, I understand, they make a most deadly kind of bait. Putting bait on the lake gives the trapper the great advantage of finding the fox, wolf,, fisher, lynx, or whatever animal takes the least bite of it. You might say with so much poison in the woods why don't this reduce the number of wolves? The fact is that the wolves are very shy, and it is only the few experienced trappers that are able to get wolves to take poisoned bait.

In January, 1905, I was with a professional trapper. On going to his bait on a lake we saw that a raven had taken a few pecks of the bait, had flown about 50 yards and died. A fox had eaten part of the raven and lay stretched out within 20 feet of it. There was a fresh fall of snow and as the fox came from the direction we were going, tracked him back for fully one-half mile, and I am absolutely certain he did not get any other bait in that distance. Hence it is plain to see how the high price of furs has all but exterminated the raven. In fact, the crow's only enemy, now, are the fox, the great horned owl and red-tailed hawks, but these three combined aren't one, two, three, with the raven. I have been asked by a great many people "why didn't this poison kill all the wolves?" In reply to this, let me say, the wolf is the shrewdest animal to poison or trap on earth. So many inexperienced people, carelessly putting out this poison, caused the wolves to be shy of any cold bait they saw. In fact, it is only experienced trappers that knew what that means. The most experienced trapper gets them taking bait weeks before they put any poison in it.

Before I go furher, I want it distinctly understood that apparently all left me. But how can I call myself humane and stand and see these black highway murderers of the air continually robbing the more desirable birds of their eggs and young, and hear the mother screaming and crying, "Help, Help, Help!" How can I be humane and hold myself when I know he is coming back to repeat this cold-blooded, murderous deed. Moreover, I know that if one of these insectiverous or song birds were left to mature, it would do more good in ten minutes than a dirty, old crow would do in a day. Think of all the good descendants of this one insectivorous bird would do had it been allowed to mature and raise young. Oh, but you sigh and say, "Jack Miner, are you sure that you know what you are writing about?" Yes, I am. I have tested it out.

In 1910, I started reforesting near my home, in fact nearly all around my home. I secured the majority of the trees from the Ontario Forestry Department. The fifth year I had one nesting pair of mourning doves and now the doves nest and roost among these trees so thickly that they are actually breaking the limbs down. During May, June and July, I can take you to at least three hundred occupied doves' nests in that many minutes and, to-day, I would far sooner loan you my gun and permit you to go in there and shoot 100 pairs of doves than to allow one pair of crows to nest there and murder and terrorize this whole bird haven. Remember, here in southern Ontario doves nest fom four to five times a year. My intimate friend, Mr. W. E. Saunders, of London, Ontario, located a dove's nest here with young doves as large as sparrows on April 15th. Fully 90 per cent. of them cease nesting by September 1st. Why, bless your life, these doves have got so bold that last summer there were three pairs nesting at one time on the piles of drain tile at our drain tile factory adjoining this little sanctuary. And remember, there were from five to eight men working there all summer, piling out and shipping away tile. But one-half mile north of here is a ten-acre wood, equally as inviting for any desirable bird to nest in, but there are no doves there, for the simple reason that there is usually a crow's nest in that vicinity. Remember, these doves are only one variety of desirable birds that nest in there under our protection from the crows, coppers and sharp shinned hawks. Robins and catbirds are wise to this protected spot. Really, just isn't it lovely to think, yes, to know, that these sweet, lovable creatures are so ready and willing to come to us homely, human beings for protection? Doesn't it take us face to face with God's kind promise, "Let man have dominion over all."

THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

CHAPTER XIII.—Continued

When does this here man Kane git here?" asked Peyotl.

"To-morrow night; on the night train from the East. Why?"

"Huh"—Peyotl was trying to think—"just fer a question, Mist' Sam. . . . Suppose that 'ere man doesn't turn up at all . . . What then?"

Dustin eyed him covertly but sharply. The bait was squarely before him and he was nibbling at it. He sat back in his chair and opened a drawer of his desk.

"See there, Peyotl. . ." He pointed to an open pasteboard box in the desk drawer. In that box lay an old-fashioned wooden-handled Derringer pistol, double barreled, freshly oiled with no marks of use on it. Beside it lay a green box full of calibre forty-one cartridges; those old-fashioned copper cases green with verdigris such as even the Frontier has only occasionally seen in forty years.

"I can't imagine myself in your place, Peyotl," said Dustin. "But I know this: If I knew a man was comin' down here to find a man that I had killed . . . if I knew that a man was comin' down here to hang me . . . well . . . it'd be his life or mine. That's all. The law justifies a killing in self-defense. If it isn't self-defense to kill a man who's out to kill you, I'll be damned if I know what self-defense is."

It was just such a specious argument as would best appeal to a drug-sodden brain. Dustin stared at Peyotl till he was sure that he had read aright the murderous gleam in the sunken eyes. Then the big ranchman heaved himself up and moved toward the door.

"Of course, I'm not advisin' you to do anything, Peyotl. I can't. I can only tell you what I'd feel like doin'. I'd sure hate to see a stranger come into this country to hang me without my havin' a word to say about it. You stay here and pull yourself together. I'll be back in ten minutes."

"One minute, Mist' Sam. . . ." Peyotl clawed at his coat-sleeve. "When's this here man Kane or Keene due to git here?"

"On the night train at Seco to-morrow night. Wait here. I'll be back in a little bit."

Dustin was absent considerably more than ten minutes. The night air drew cold in his nostrils as he stood facing the desert stars. Like a specter of the night a vision of old Dad Kane faced him accusingly. He shivered a little and dully noted that his hands were wet, yet the night was cool. Little pulses beat in unsuspected places in his mouth that was hot and dry, and from time to time a dull roaring in his ears sounded like thunder. When he finally went back to the office he glanced at the desk. The drawer was open. The Derringer pistol and two cartridges were missing.

Spike Goddard found him huddled in his chair with his shaking head buried in his hands. He was shivering and his face was white and drawn . . . like the face of a very old man . . . and not a good man either.

"What the hell ails you?" demanded Spike. "Seen a ghost?"

"Two," said Dustin with a crackling oath. "One a week old and one that ain't dead yet . . . I think Peyotl will attend to it, Spike . . ." A long silence fell. . . . "Look here, Spike," he said suddenly. "Let's quit. Let's sell off the Broken Spur and get out of here. We can clean up. . . ."

"Sure thing," said Spike. "That red-heifer of Carr's be damned glad to see you go."

For just a second red murder gleamed in Dustin's eyes. Then he laughed.

"Just for that," he said, "six months from now you'll be sleepin' in the bunk-house. My wife and I will need this house."

"Yeah? Well, she won't be no red-headed girl named Edith Carr."

Dustin went on:

"When old Joe Carr learns that the Hour-glass has passed out of his hands he'll be worth listenin' to," he said. "Peyotl'll fix everything for us all right."

"I'm sorry you've got that half-wit in on any scheme," said Spike soberly. "If he ain't got sense enough to git himself out of any murder plan, how can you count on him? If you've sent him to work on that scheme . . ."

"I haven't," said Dustin eagerly. "I didn't outline any plan. I just suggested a line of thought to him and he jumped at it."

"Yeah! An' him a qualified sort o' fool at that," said Spike. "Well, we'll see what we'll see."

He stamped out into the night and Dustin turned to his decanter.

CHAPTER XIV.

When Stone drove up to the Hour-glass, Crewe was waiting for him and eyed him shrewdly in the dusk.

"Come down by the corrals," he said. "What did you discover?"

"Very little. It may help some, though. You talk first. Tell me what took pace when Dustin came to see Carr to-day."

Crewe laughed grimly.

"It was worth hearin'," he said. "Dustin rode in here about two o'clock and said he wanted to talk with Joe. I told him to go in. You see, I don't like Dustin anyhow and I knew Joe don't like him either. Of course, it bein' a private call, I stayed outside, but I heard Dustin tell him that he aimed to marry Edith. He told Carr that he'd always wanted to be friends with him and that if Joe was willin' for him to marry Edith, he'd call off the suit over Soda Springs and tie up the herds of the two ranches. . . ."

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and vitality. Clear skin attracts. The healthy active girl is both happy and popular.

Perhaps you are not really ill yet when the day's work is done you are too tired to enter into the good times that other women enjoy. For extra energy, try Lydia E. Pinkham's Vegetable Compound. It tones up your general health. Gives you more pep—more charm.

Remember that 98 out of 100 women report benefit. Let it help you too.

CHAPPED SKIN? NO!

CHEST COLDS — A MECCA OINTMENT AND MUSTARD POULTICE

Relieves Congestion — Does Not Blister

At first sign of a cold on the chest apply a Mecca Poultice with the addition of mustard. The warmth in combination with marvellous healing properties of Mecca Ointment will give quick relief. Full directions in each package. 38

"Yeah. Go on. . ."

"Well . . . old Joe sat there quite a spell sayin' nothin'. Then he says: 'Well, Mr. Dustin, then it narrows itself down to the fact that you want me for your father-in-law. Is that it?' That made Dustin mad.

"'You damned old fool,' he says, 'I don't want you for anything. If I take Edith, I got to take you just like a man gets the tail with the hide . . .' He got just that far. . . . You know what old Joe thinks of Edith . . . what we all think of her. . . . . Old Joe lifted himself up to spare his game leg and I could hear every word:

"'All right, Mr. Dustin,' he said. 'You've made yourself pretty clear. So will I. As I get it, you want to marry my daughter and tie up the herds of the Hour-glass and the Broken Spur in one. Is that it?'

"'That's right', said Dustin 'The two ranches workin' together can make money. Workin' singly they can't. You're losin' money and cattle on the Hour-glass. Ain't that right?'

"'I been losin' cattle ever since you and that man Goddard came to the Broken Spur,' said Joe. 'You'll have a clear sweep, Dustin. But my leg's gettin' a whole lot better lately. It'll all come out in the wash. You see, Mr. Dustin, a man named Colt invented a l'il tool that makes even a crippled cattle man the equal of a rustler. Don't you worry about the Springs,' he says. 'I'll tend to that in time. And when it comes to marryin' my daughter . . . well . . . I got a pretty good cook right now in the kitchen. . . .'

"Dustin kept his temper pretty damned good. I'll say that for him.

"'I don't want a cook,' he says. 'I want a wife.'

"'Yeah?' says Joe. 'Then why not stick to your own kind? Why don't you go down to the place where you keep your other women? My cook tells me there's been an old he-skunk under the barn for five years now. Come to think of it, that's just the same length of time you all've been at the Broken Spur stealin' Hour-glass cattle. I'm pretty sure that some day when that old skunk works his way into the kitchen, that cook's goin' to shoot him. Now, of course, Dustin, I can't say what Edith will say to you. I got my own ideas about it, though. I'm damned sure of one thing. When that old skunk gets into my kitchen the cook'll shoot him. If any other skunk, four- or two-legged, gets to hangin' his hat on my rack, sure as hell I'll shoot him. I'm sure you get me right, Dustin. . . .' That's what he said. . . ." Old Frank Crewe fairly crowed in his delight. . . . "Old Joe's in one hell of a mess but he'll charge hell with a dipper o' water if he gets hot and he's right mad at Dustin now. What ails you now?" he asked. For Stone's face was a study.

"Well . . . now you listen to me, Crewe. I've got something to tell you that you never guessed. . . ." Crewe stared as the newest employee of the Hour-glass called the foreman by his last name. Then, without haste, Stone told him all that had taken place that day and Crewe, hoisting himself to the corral-bars, gave himself up to thought.

"You mean to tell me," he demanded, "that you an' Edith actually found the place that ore came from?"

(To Be Continued)

Attempt Met With Failure

German Inventor's Rocket For Mail Delivery Did Not Work

The rocket mail delivery sponsored by Herr Zucker, the young German inventor, was recently attempted and failed. It was his intention to send a parcel of mails by rocket from the island of Scarpa to the mainland of Harris, half a mile distant. The first experiment failed. The firing apparatus, consisting of a slight wooden runway, with metal hoops to direct the rocket, was set up on the shore at Scarpa, and the rocket, which with its contents weighed 30 pounds, was placed upon it. Herr Zucker connected up the electric fuse, and pressed the button. Instead of the rocket shooting over the Sound of Scarpa, there was a dull explosion, and when the smoke cleared the wreckage of the runway and the rocket was seen on the shore, with the letters strewn about. Another attempt was made, but again there was an explosion, and the letters which have survived were handed to the Post Office for delivery in the ordinary way.

Trusts To Intuition

Women have a more efficient system of thinking than men, O. J. McClure, merchandising counsel, told delegates to the Retail Merchants Association of Canada convention in Toronto. "Woman thinks by intuition," he said. "She feels sure she is right, but can't tell why. Man reasons but often finds that woman by her simple system is more often right in her conclusions."

Gaitas, Spanish bagpipes, dating back to the ninth century, and other historic musical instruments from Spain are soon to be heard in broadcast.

An ounce of keeping your mouth shut is worth a pound of trying to square yourself. 2089.

Now Science Explains Why So Many People Past 40

Feel That They're Slipping Losing Their "Grip" on Things

Many people 'round 40 think they're "growing old." They feel tired a lot . . . "weak." Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an *acid condition* of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all!

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS'" or the convenient new Phillips' Milk of Magnesia *Tablets*. Made in Canada.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

PHILLIPS' *Milk of Magnesia*

Vicar: "I was grieved to hear your husband has gone at last."

Mrs. Black: "Yes, 'e 'as, sir, and only hope 'e's gone where I know 'e ain't.'

Tested Eczema Remedy

Is Prescription of Doctor

Your skin trouble—whether it is eczema, acne, hives, dandruff, ringworm infection or pimples and blotches—will be positively benefitted by D.D.D., because D.D.D. is a tried and tested Physician's Prescription. D.D.D. was developed originally for his own patients by Dr. D. D. Dennis. It is now manufactured by the makers of Campana's Italian Balm. In 35 years D.D.D. has brought clear, healthful skins to millions. At druggists. Trial size 35c. Guaranteed to give instant relief or money refunded. 4

"Dear, I'm sorry you're going to marry that scapegrace of a Sam Jones."

"He said you would be. He told me you ran after him for a year."

Rheumatism

is caused by failure of kidneys to remove uric acid poisons from the blood. Gin Pills relieve by neutralizing this acid and restoring the kidneys to normal action—50c a box at all druggists.
