VICTORIA NEWS.

BUILDING PERMITS.

OAK BAY—Building permits have been granted by the municipal council of Oak Bay to the following: To Frank Ingram for a dwelling house on Florence st, for which the architect is F. Morris, and the estimated cost $2000; also to Walter Gaskell, for a house on Orchard ave, to be built at a cost of $1800; and to Jno. Hutchings, for a house on Mowat st at a cost of $1200.

COMMITTEE REPORTS ON INSPECTION TRIP SOUTH—ASPHALT CONCRETE BEST

VICTORIA—Asphalt concrete pavement is the choice of the several different kinds seen by the committee of the city council in the trip south and the report prepared by Ald. Stewart, and referred Thursday night at the council to the streets committee, tells of several examples of asphalt concrete paving in California that have shown first-class wear, while the Hassam pavement was reported as not durable, the opinion being given on evidences observed at Portland. Bitulithic pavement is mentioned in the report as seen in Portland, but no opinion expressed as to its lasting qualities. Instead the committee contents itself with a recapitulation of the method of laying this pavement, and a description of its component parts.

A test of eighteen years of asphalt concrete pavement is reported upon at Visalia, Cal., where the pavement was found to be similar to that used on Linden ave. In other cities the same class of paving was found in good condition after being in use shorter lengths of time.

The committee visited Portland, Ore., and San Francisco, Los Angeles, Coalinga, San Jose, Pasadena in California, and inspected thoroughly the sewer, street cleaning and boulevard systems of all cities visited.

The opinion of the committee concerning the different problems of street improvement to be met with in Victoria is as follows:

Width of Streets.

Streets in California are very wide, the road bed being made in all instances as wide as possible. We very seldom saw a boulevard wider than 2 feet, but sometimes as much as 6 feet. The keeping up of boulevards in this country seems to be left to the property owners, and are sadly neglected, and in our opinion, Victoria had adopted the right course for upkeep.

Street Cleaning.

We have taken particular notice of the cleanliness of the streets in the different cities that we have visited, but find that Victoria is as up to date in this department as any city we visited, and also that Victorians have no reason to complain in this respect, as in our opinion our own city is the cleanest we have seen. Cluster lights of many shapes and sizes have been seen, and we would be pleased to meet the electric light committee at any time to discuss same.

Cement Pipe.

In each place we have been we have made enquiries in regard to the merits of vitrified and concrete pipe. In no place have we found concrete pipe being used for sanitary sewers. In San Jose a 33-inch pipe of reinforced concrete was put in for a storm sewer. After completion J. Watson, superintendent of streets, was instructed to inspect same and crawled through the pipe and found that the weight of dirt on this pipe had pressed it out of shape, making it in some instances triangular, and concrete arches had to be built over the pipe to protect it from the weight of dirt—depth of sewer is 18 feet.

KASLO SCHOOL BOARD PLANS NEW BUILDING

NELSON—Kaslo's school board is planning a $30,000 brick and stone school building of eight rooms.

The provincial government has made a grant of $12,000 toward the new building, which will house the pupils of both high and public schools.

BUILDING OUTLOOK BRIGHT.

NEW WESTMINSTER—The outlook for building permits for this week is most favorable, as up to last night about $8000 worth have already been taken out. It is expected that two large permits, one for $30,000 and another for $100,000, will be issued. Last week's permits amounted to only $14,950, and included twelve permits.

BEST BUILDING BRICK

THE process of manufacturing brick is a very important matter. Every brick turned out of our latest improved Berg press is made under a pressure of 400 TONS. They are also cured in cylinder under 120 pounds steam pressure.

ABSORPTION of moisture is only from 8 to 10 per cent. This is a very important feature in this climate. Our brick is being used in many important buildings.

WE can supply brick of all kinds and colors. Our prices are right. Be sure to get our figure before closing order. You will save money.
