BEST BUILDING BRICK
THE process of manufacturing brick is a very important matter. Every brick turned out of our latest improved Berg press is made under a pressure of 400 TONS. They are also cured in cylinder under 120 pounds steam pressure.
ABSORPTION of moisture is only from 8 to 10 per cent. This is a very important feature in this climate. Our brick is being used in many important buildings.
WE can supply brick of all kinds and colors. Our prices are right. Be sure to get our figure before closing order. You will save money.

START WORK ON BIG ICE RINK AND STORAGE PLANT

SEATTLE — Actual construction work will be started in about a month on the proposed new ice skating rink and cold storage plant to be erected at the corner of 10th ave and Madison st, according to the statement of L. H. Griffith, bsmt, Alaska bldg, who returned Saturday night from Vancouver and Victoria, where he has been inspecting the rinks at those places and conferring with Frank and Lester Patrick, owners of the British Columbia rinks, who will be financially interested in the Seattle proposition. The rink will be ready for business by Oct. 1.

Plans were completed last spring by Archts White & Warren, who are no longer associated, but construction was delayed for financial reasons.

The building will be of reinf concrete, brick and steel const, 350 ft long by 156 ft wide, and will seat 5000 persons. The ice surface will be 85 x 210 ft. The bldg proper will cost about $125,000 and the ice-making plant about $75,000. The Madison Square Bldg Co, owning the property, will const the bldgs and lease it on a 10-year lease to the Ice Pavilion Co, which will be composed of Mr. Griffiths, Frank and Lester Patrick and others. Each company will be capitalized at $100,000. The various contracts will be let to contractors who have mostly been selected, and the Hofius Steel & Eqpt Co will erect the steel. Much of the const work will be done under the direction of Mr. Griffith himself.

The Vancouver and Victoria rinks, although opened less than two months, have already proven to be big money makers.

TWO MILE TUNNEL VARIES ONLY ONE INCH

TACOMA, Wash, Jan. 31.—With but the variance of an inch, the two crews boring the two-mile tunnel at the headwaters of the Tacoma municipal power plant at the Nisqually Canyon between Alder and Lagrande, thirty miles south of Tacoma, came together in the center of the bore after working eighteen months.
