THE EVENING SUN

VOL. 1 GRAND FORKS AND COLUMBIA, B. C. SATURDAY, MARCH 1, 1908. NO. 99

TELEGRAPHIC NEWS

COL. PRIOR NOW MINISTER.

Victoria, Feb. 28,—Col. Prior was sworn in at 1 o'clock yesterday as minister of mines, and will run in Victoria as the government candidate in the bye-elections against E. V. Bodwell.

THE CHINESE COMMISSION.

Ottawa, Feb. 28.—The report of the Chinese commission was tabled yesterday. The Commission is unanimous in reporting that the capitation tax of $100 is insufficient and that the further immigration of Chinese laborers ought to be prohibited by increasing the tax to $500. The recommendation is made by two of the commision that the tax should be raised to $500 at once, while the third suggests that $300 be imposed for two years, pending the enactment of a prohibitive treaty, failing which in that time a tax of $500 be imposed.

BOARDS OF TRADE.

Kaslo, Feb. 28.—The Associated Boards of Trade yesterday passed a resolution that supreme court sittings be held in Kaslo.

The resolution was passed asking that a resident postoffice inspector be appointed, with a view to having the mail service under control of an official who would have some personal knowledge of the conditions of Kootenay and Yale.

The question of amending the shop regulations act in the matter of the closing of stores on legal holidays was laid over for six months.

A resolution was passed asking that Rossland riding be at once cut in two, giving the Boundary district a representative of its own in the present provincial house.

It was resolved that the Dominion government be requested to adjust the duties on lead products so that a home market for Canadian lead should be encouraged. President G O. Buchanan, W. H. Aldridge and James Cronin were appointed to go to Ottawa to place this resolution before the government and the house.

A resolution was passed regarding the bounty of $5 per ton on pig lead produced in Canada, asking that the Dominion government be requested to modify its bounty for the first year so that the full bounty, amounting to $100,000, be disbursed, providing 15,000 tons of pig lead be produced during the first year. Should there be less than 15,000 tons produced during such year, then it is asked that the rate allowed during the first year should be $7 per ton instead of $5, as at present; provided furthermore, that the bounty for each of the succeeding years shall be at the rate of $5 per ton, but such bounty shall not exceed $100,000 per year, as at present.

CHANCES FOR BOERS.

London, Feb. 27.—The colonial secretary, Joseph Chamberlain, made an interesting statement in the house of commons today, to the effect that the proclamation providing for the banishment of the Boer leaders did not preclude Lord Kitchener or Lord Milner from accepting the surrender of the Boer leaders on modified conditions. Lord Kitchener, on his own authority, has already accepted the surrender of some of the minor leaders on the understanding that the provision of the banishment proclamation would not be enforced.

FOREIGN MISSION BOARDS.

Toronto, Feb 27.— A conference of secretaries of foreign mission boards of the United States and Canada passed a resolution yesterday deprecating the legislation in both countries for the exclusion of Chinese. The resolution described the agitation as uncalled for and in violation of the golden rule. Rev. Dr. Wilbur Crafts of Washington, secured endorsation for a very remarkable movement, to obtain the prohibition of the sale of distilled liquors and opium to all aboriginal tribes of the world.

THE BURRELL LECTURE

The lecture last night delivered by Martin Burrell, in a large storeroom in the Folger block on Government avenue was very well attended. Mr. Burrell is a man of wide information, high and ideal conceptions, a fluent and most attractive speaker, and throughout his talk was listened to with rapt attention. Mr. Burrell has a humorous inclination, and though pursuing a scientific or abstract line of thought. can inject enough of humor into his discourse to keep his audience's attention firmly fixed on the strong points brought out, and so lofty are his premises, those seeking closer communion with all that is beautiful in nature—and all nature is beautiful—are imperceptibly, almost, led into her wonderful art gallery, and into the profound depths of her ways with most pleasing effect upon the listener. We are sure all who heard Mr. Burrell last night would like to hear him again on the same subject, and we are also sure his hearers were inspired with determination to beautify their homes with lawns, trees and flowers.

Attorney W. H. P. Clement occupied the chair, Mr. I. A. Dinsmore having called the meeting to order, and placed that gentleman in nomination for the position, his election was unanimous. At the close of the lecture a vote of thanks was moved by Mr. Chas. Hay in a few well-chosen and hearty words, which was adopted by the audience.

Following this the meeting spent a few moments in considering methods of procedure by citizens in carrying out in some measure the valuable advice offered by Mr. Burrell.

A committee was appointed to interview the city council in regard to aid in planting street trees, and a committee was also formed to accompany a like committee from the council to further advise with Mr. Burrell. Let the good work go on.

SATURDAY, MARCH 1, 1902

It is reported that the Mother Lode mine was compelled to shut down for the want of coke and coal. This would indicate the need of more railway facilities in this section.

A Columbian now sojourning at Victoria, writes a friend in this city as follows, under date of Feb. 25:

"After careful inquiry into the political situation here for three or four days and watching the proceedings yesterday and today I have been firmly convinced that Joseph Martin holds the balance of power. The Government and the McBride opposition are so equally divided that Joe, with his few followers, can overthrow the Government on an hour's notice, or bolster and hold it together for a session. Consequently, I should not be surprised if the Government, weak as it is, lasts throughout the session, especially if its action is in accord with Mr. Martin's views.

"Yesterday the whole day was spent in deciding whether Martin or McBride was entitled to the seat of honor on the opposition side. Joe came out one length ahead. The scene that took place was one of deep affection and long to be remembered. Curtis and Martin and McBride were hugging each other like newly married couples. All of today was spent in trying to find out who was to blame yesterday. They couldn't decide so adjourned till Monday, when some similar business of vast importance to the country will probably be disposed of."

CITY SUNBEAMS

The skating season having passed, the high board fence and the dressing rooms building have been removed.

John Earle, of Russell, Wash., was in town this morning. He says the Washington & Northern will have its rails laid to that town in about ten days. A large depot is to be erected there with a customs office in one end of the building. Three tracks will be laid through the town, two in front of the depot building and one to the rear of it. The Canadian customs office is also to be moved from Cascade down to the line at that point.

The delegates to the Associated Boards of Trade session at Kaslo, returned today, among them The Sun reporter noticed: C. Scott Galloway, of Greenwood, W. B. Wilcox, of Phoenix and J. A. Smith and E. Doberer of Grand Forks. The next session of the board will be held at Fernie.

The city authorities of Grand Forks having no other present recourse, have been compelled to insist that the Granby company carry out its contract to furnish lights for the city for the present, or until such time as the city may be able to make other suitable arrangements.

Grand Forks Aldermen feel very proud of the team they purchased the other day, and well they may, for the likes are not to be found in this vicinity. A new freight wagon has been purchased, and Alderman Harvy has assumed the role of Jehu and was doing the teaming today for the city. Lumber is being hauled with which to erect a stable for the horses in the rear of the fire hall.

At the Methodist church tomorrow morning the subject of Rev. J. F. Betts' sermon will be "The Green Tree and the Dry." In the evening the subject of his discourse will be "The Evidence of Prophecy," the second of a series on Christian Evidence.

Joe McDonald the well-known drayman, who has been putting in his time the past six months in Seattle and other coast cities, returned to Grand Forks this week looking as happy and natural as ever.

J. R. Hall of Bossburg, is paying his sons, E. D. and Emery Hall, of the News, a visit of a few days.

The Dominion Express Co. has instituted a free delivery system, which was set in motion today, Manly & Rutherford having been engaged by the company for this purpose. A pick up service will be arranged later.

Today a C. P. R. order took effect which means much to many of its employees, who are enjoined from smoking while on duty. Say, Alex, how would a good cigar strike you?

The primary department of the Grand Forks public school will open in the new building Monday.

Mrs. M. M. Kern, recently from Spokane, has opened Dressmaking rooms in the Wastell cottage, on Church street, Columbia, where she is prepared to do Dressmaking in all its branches. Ladies' Tailoring a specialty. All work guarenteed *

COLUMBIA, B. C.

Situation, Environments and General Resources.

The City of Columbia is situated near the junction of the North Forks of the Kettle river with the main Kettle river, and is distant about 300 miles east of Vancouver.

The natural situation of the city for beauty is not excelled in Ameriea. A verdure-clad and flower-bespangled rolling prairie, traversed by a river of bright, sparkling waier, fringed with forest trees and surrounded by mountains, forffling a charming combination of picturesquesness and grandeur

The Columbia & Western railway, which was constructed by the Canadian Pacific Railway company, has its station, freight warehouse and yards in the center of Columbia, and the Vancouve r, Victora & Eastern Railway company, has located its depot, freight sheds and yards along the east line of the corporation, thus giving the city connections with two transcontinental lines.

The Canadian Pacifie railway company has large interests in the city, having selected the site on account of the superior natural advantages as a railway centre,

The climate, taken all the year around, is the best in Canadn--part of the summer is rather hot and dry, but the rest of the year is enjoyable.

Throughout the Kettle River valley there is an extent of fertile agricultural land, part of which is now being cultivated.

Apples, plums, pears, prunes, cherries and all the small fruits grow abundantly. The valley surrounding Columbia, divided into small fruit and vegetable farms, will sustain a large population.

Building material is plentiful in the district. Lumber can be procured at fair prices, and brick lime and stone of good quality can always be obtained when required.

The mining interests are of the first importance to this country, and will do much to build up Columbia. Large mineral lodes have been discovered through the mountains adjacent to the city, and what were mere prospects a short time since are now large paying mines.

Water is supplied the city by pumping from a beautiful spring of exceptional purity, capable of supplying a city of 50,000 inhabitants.

The Granby smelter and converter —the most modern and perfect plant of the kind in America—employing hundreds of men, is contiguous to the city,

Owing to the fine climate, the central situation, the beautible environments, the bright prospects for future growth and prosperity, Columbia will be an educational centre, a city of homes, as well as a wholesale distributing point; and when finally allied and wedded to her sister sister, will be the best and largest city in the interior.
