Fifth Year---No. 46 | Grand Forks, B. C., Tuesday, April 10, 1906 | Issued Twice a Week

KILLED BY CAVE-IN

John Jacks Meets Death in the Tiger Mine Near Burke, Ida.

Norman McLellan Seriously Injured at Strathcona, Alta.

Mrs. Lottie Jacks, who resides on Second street, near Winnipeg avenue, received a telegram from Wallace, Idaho, last Sunday morning, which brought the sad intelligence that her son John, who was employed in the Tiger mine at Burke, had been killed by a cave-in in the mine on Saturday. Another man, Clarence Ebney, was also seriously injured. The men were working about 1600 feet underground in a tunnel, when a mass of rock about eight feet in length and thickness fell without warning, burying both miners beneath. The mine is said to be well timbered, and the cause ot the cave-in is a mystery. The accident happened at 11 o'clock, and at 2 o'clock Ebney was rescued alive, with his left shoulder and leg broken and crushed, besides serious internal injuries. He is a mass of bruises and may die. Jacks was not found till about 7 o'clock Saturday night. He was lying dead beneath tons of rock. He was taken to Wallace. Deceased was 24 years of age, and leaves a wife of two years in Wallace. His mother resides in this city, and his father, David Jacks, is at present in Goldfield, Nev. The remains will be shipped to this city for interment.

The news reached here this morning that Norman McLellan, who left this city for Strathcona, Alta., a couple of weeks ago, had met with a serious accident shortly after his arrival. Details of the mishap are rather meagre, but the facts as stated to The Sun are substantially as follows: An alarm of fire was given, and Mr. McLellan in rushing out of the house ran against a trap door, and in falling he struck his head against a stone wall with such force as to render him unconscious. Although this accident occurred about a week ago, our informant, who arrived in the city last night from Stratncona, states that Mr. McLellan has not yet regained consciousness. The physicians appear to be puzzled over the case, and are apparently unable to render any assistance.

Mr. McLellan, who was a pioneer business of Grand Forks, left here with his family a couple of weeks for Strathcona, were he had purchased some business property, with the intention of re-engaging in business. His humerous friends here will join The Sun in hoping that the report as to the seriousness of the accident is greatly exaggerated.

Will Enlarge Smelter

Manager Thomas R. Drummond states that the Dominion Copper company has placed an order for the third blast furnace for the company's smelter at Boundary Falls. This furnace will be much larger than the two now in use, which have a capacity together of smelting some 600 tons or more daily, and when it it is installed will give the company a daily output of about 1200 tons of ore, just about doubling the present output. The order for the new furnace was placed with the Traylor Engineering Works, of Allentown, Pa., Mr. Traylor, of the firm, visiting the Boundary last week, and settling up matters in connection with the contract. It will probably require four or five months for delivery of the machinery, so that by early fall the Dominion smelter should be smelting twice as much ore as is now handled by those reduction works. By that time it is expected to have the matter of electrical power settled, so that the entire works may be operated in this manner, instead of with steam as at present. The success thus far attending the smelting operations of the Dominion Copper company at Boundary Falls under Superintendent W. C. Thomas has been such that, coupled with the high price of copper, it has been finally decided to double the capacity of the smelting works as soon as possible. By that me the company's mines will also be prepared to produce the increased tonnage of ore required to keep the enlarged smelter in operation.

Grand Forks Union No. 180 will give a benefit ball in the opera house on Tuesday, May 8th.

The Ladies' Aid of the Methodist church will give an Easter tea in the church on Saturday, the 14th inst., afternoon and evening.

Frank Sherwood, of Ferry, Wash., was a visitor in the city yesterday.

Thousands Die of Constipation

No condition causes so many incurable diseases as constipation. It not only prevents the kidneys from eliminating the poisonous wastes, but causes anaemia, stomach trouble and indigestion. Why won't you use Dr. Hamilton's Pills and get cured? This excellent medicine restores normal bowel action in one night. Thousands say so. Your system will be pure and clean, you'll be free from headaches, no more sour stomachs—in short, you'll have jovial spirits and perfect good health. Dr. Hamilton's Pills are sold everywhere, 25c a box. Get the genuine.

NEWS OF THE CITY

Greenwood and Midway Baseball Clubs Invited to Meet Here

Incorporation of the Franklin Townsite Company, Ltd.

The Greenwood and Midway baseball clubs appear to be anxious to meet on the diamond; but neither town can be reached without the visiting team losing two days. This being the case, a Grand Forks sport has come to their rescue. He suggests that the clubs be invited to pull off the game in this city. The scheme possesses many advantages. Trains leave here for all points of compass every fifteen minutes; the rooters would treat both equal impartiality, and last, but not least, the players and visitors would be afforded an opportunity to enjoy our tropical climate.

The last number of the British Columbia Gazette contains a notice of the incorporation of the Franklin Townsite Company, Limited. The purpose of the company is to buy and sell lands at Franklin City on the North Fork of Kettle river. The new town is near Fraaklin camp, and will be brought into direct communication with this city by the North Fork extension of the Kettle River Valley railway. The Kettle Valley Irrigation Fruit Lands Company, Limited, has also been incorporated, with a capital of $100,000. This company will deal in fruit lands in the Kettle river valley.

Geo. Hill, recently employed in the Granby smelter, but who severed his connection with that institution several week ago on account of ill health, has purchased a large furniture store in Saskatoon, Assa., and will make his future home in that city.

Rev. T. G. McLeod, who has received a call from Knox Presbyterian church, has accepted the same. He is expected to arrive here with his family next Thursday.

A. J. McMillan, managing director of the LeRoi, arrived in Rossland last Friday night from London. He arrived in New York about a month since, but stopped off at St. Paul and other places en route. He has been in England for about eight months, and now that he has returned he so very busy that he is not yet ready to say anything concerning the mine until he has had an opportunity of looking it over.

Mr and Mrs. Geo. A. MacLeod returned yesterday from a short visit to Nelson.

W. L. Wells and H. A. Sheads have opened an insurance, real estate and employment office on Bridge street.

Information comes from Montreal that H. Mortimer Lamb, the founder of the Boundary Creek Times, and later editor of the British Columbia Mining Record, has been dangerously ill with typhoid fever in an hospital. Mr. Lamb is now editor of the Canadian Mining Review.

It is reported that R. T. Lowery, of Nelson, is contemplating the publication of a weekly paper in Greenwood.

It is expected that another diamond drilling contract will be let at the Betts & Hesperus mine, near this city, on the return of Manager Rea from Chicago.

Special services are being held this week in Holy Trinity church on Monday, Tuesday, Wednesday and Thnrsday. Good Friday services at 9 a.m., 4 p.m. and 8 p.m.

A meeting of the Farmers' Institute will be held in the city hall, this city next Thursday evening at 8 o'clock. Everybody is invited to attend. No Admission.

W. C. Thomas, superintendent of the Boundary Falls smelter, was a visitor in the city last Saturday.

Work has been started on the O. K. claim, recently bonded from Sig Dilsheimer, of Colville, by Greenwood parties for $30,000. This property is located near the Humming Bird, on the North Fork.

A boarding house has been started at the Pathfinder mine by W. S. Macy. About twenty men are now employed at the mine, which was recently bonded to the Granby company for $110,000.

P. D. McDonald, the electrician, left today for Revelstoke and the coast cities.

The Greenwood city council has decided to extend the water system so as to tap Providence creek, and also to install the Gamewell fire alarm system. There is also talk of taking hold of a project to utilize the water power at Boundary Falls for lighting and power purposes.

Greenwood Miners' Union No. 22 will give a benefit at the Auditorium on the 12th inst. for Wm. A. Nicholson, who lost his eyesight in an explosion in the Providence mine a few weeks ago.

Mrs. A. B. W. Hodges and her sister, Mrs. Smith, went up to Phoenix last Wednesday, and spent the latter part of last week in that camp.

Midway is making great preparations to celebrate the 24th of May, and would like to have a baseball tournament for that occasion.

Stock Certificates printed at The Sun job office.

A small air compressor is to be installed at the Emma mine, with five drills capacity.

The Annoying Blackheads

External applications will never remove pimples or blackheads. Only by stimulating circulation and purifying the blood can it be done. For quick, sure release from these pests use Ferrozone; it drives all humors from the blood, makes the skin healthy, tones up the system. With the pure nutritious blood made by Ferrozone it's impossible to suffer from any skin disease. You'll have a smooth, delightful skin, healthy color and beautiful complexion by using Ferrozone—and you'll feel immensely better as well. Fifty cents buys a box containing fifty chocolate coated tablets at any drug store.

REVIEW OF MINING

Forty Per Cent Increase During First Quarter of 1906

Big Boundary Companies Push Prospecting and Development Work

During the first quarter of 1906 Boundary mines shipped ore valued at $1,612,425, based on an average valuation of $5 a ton. In the three months 322,495 tons of ore were shipped from these mines. The shipments, by months, were: January, 104,378 tons; February, 105,429 tons; March, 112,688 tons; total, 322,495 tons.

In January, February and March, 1905, Boundsry mines shipped 230,000 tons. The increase this year is, therefore, about 40 per cent over a year ago.

So far in 1906 the Boundary ontput has grown with each succeeding month, and smelting facilities are gradually increasing at the three district reduction works. Without an increase from now on the yearly total would run over 1,250,000 tons of ore, or an increase of 25 per cent over the output of 1905. Each of the smelters, however, has plans for immediate enlargement. The fall increase should be from 1000 to 1500 tons daily.

The Granby Consolidated since January has done more than 2764 feet of sinking, raising, crosscutting and drifting, as follows: Main Granby properties, 1908 feet; Gold Drop, 534 feet, and Monarch, 322 feet. Extensive prospecting and development also continues in the mines of the British Columbia Copper and Dominion Copper companies in Phoenix, Deadwood and Summit camps.

The last three months has shown that the importance of high grade mines is gradually increasing in many instances.

The chief of the high grade mines continues to be the Providence, near Greenwood, which is showing increasingly good results. It is the largest shipper in the high grade belt, having sent out 300 tons of ore this year.

The Skylark, two or three miles from Phoenix, stands second in the high grade list. It is shipping steadily, having sent out over 150 tons this year; has paid $21,000 on the bond held from the ore shipments, and is said to have more ore in sight today than ever before. It has recently completed a new working shaft, with new shaft-house and other houses.

Of the three Boundary smelters, that of the British Columbia Copper company at Greenwood is already making extensive preparations for increasing its capacity, the excavating now going on with a large force of men. When the company has spent the $300,000 in enlargements and new electrical and other machinery it will be in a position to handle from 1500 to 1800 tons of ore daily and in a much more economical manner—the output being trebled nearly. This is expected to be done by early fall.

TUESDAY, APRIL 10, 1906

It will be good news for the mining men of fhe province to learn that the report of the minister of mines will be issued this year many weeks earlier than usual. This is a concession to the popular demand, and one which will be highly appreciated.

The residents of Columbia take umbrage at the stories circulated last week to the effect that they intended to vote solidly against the by-laws. The result of the vote showed that the people of the West end were a unit in favor of progress and expansion.

According to the annual statistical report of Mr. E. D. Ingall, mining engineer to the geological survey of Canada, just issued, the gold producing industry of all the provinces show an encouraging increase in comparison with previous years. The largest contributor, as for several years past, has been the Yukon Territory, which is to be credited with over 57 per cent, British Columbia coming next with nearly 40 per cent. Nova Scotia and Ontario, together with a li tle from Quebec and Alberta, completed the remainder of a little under 3 per cent necessary to make up the total.

What Causes Snoring

When asleep people that snore breathe through the mouth instead of the nostrils, which are choked with catarrh. Just use Catarrhozone before retiring and you'll quickly cure the snoring habit. By destroying the cause of catarrh and healing the membranes, Catarrhozone makes a complete cure in every case; it cleans the nostrils, stops the discharge and prevents dropping in the throat in a few minutes. Nothing so pleasant or certain to cure snoring, catarrh or colds as Catarrhozone—that's worth remembering. Sold by all druggists.

Wanted—Two men in each county to represent and advertise Hardware department, put out samples of our goods, etc. Traveling position or office manager. Salary $90.00 per month, cash weekly, with all expenses paid in advance. We furnish everything. The Columbia House, Dept. 610, 234 5th Ave., Chicago, Ill.

Read The Sun—$1.00 per year.

CITY NEWS

As the Grand Forks correspondent for the out-of-town papers has already named the Liberal candidate for Grand Forks riding in the next provincial election, will he kindly fix a date for the election. The Sun may be exhibiting undue impatience about this matter, but it is anxious to see a Liberal government at Victoria.

Improvements already started at he British Columbia Copper company's smelter are said to mean the expenditure of some $300,000 in new machinery, equipment, etc.

At the Granby company's Gold Drop, the new tramway is working and the new ore bunkers are being filled.

Read The Sun—The only twice-a-week paper in the Boundary. $1.00 per year.

There are still a few cheery, well furnished rooms, with heating stoves, vacant at the Province hotel.

For a nice hair cut or shave go to the City Barber Shop on Bridge street. Baths 50c, three for $1.00.

A Revival of Roque.

An outdoor game for old men has showed a marked revival in popularity this year in the United States. Roque is its name, and it is interesting and gentle. Croquet is the parent of the word roque. Take away from the term croquet its first letter and its last, and the term roque remains. In like manner, take away from the game of croquet its foolishness and its inaccuracies, and the game of roque is left, say the roque experts.

Roque is a game as scientific as billiards, but its rules resemble croquet's rules. There is a peg, like a croquet peg, at each end of the court; there are nine wickets, like croquet wickets, set in a regular croquetlike pattern; there are balls to shoot through the wickets; just as in croquet, and there are mallets; like croquet mallets, where with to hit these balls. But the roque court is as firm and smooth as a billiard table, and its boundaries are of rubber, so that balls may carom from them as from a billiard-table's cushions. The balls themselves are solid rubber. The wickets, of bright steel, are only one-quarter of an inch broader at their base than the balls that must be shot through them. The short mallets are tipped with rubber and bound with brass or silver, and the material used in their making is rosewood or Turkish boxwood or lignum vitae or amaranth.

Roque, in a word, is croquet, but croquet perfected, croquet made scientific. Rare is the skill that its disciples acquire, and admirable are the improvements that the game makes in their health.

It is interesting to consider the care with which a roque court is made. The soil first is dug out to a level about two feet below the one which the court will ultimately have. A base is then made of big stones and cinders, and on this base layers of smaller and smaller stones are set, until finally there is a top layer of fine gravel. The gravel is covered with a four-inch coat of richest, purest clay, and after this has been mathematically levelled, and rolled to a bricklike firmness, it is sanded with a tiny sifting of white sea sand. The court's dimensions are seventy-two by thirty-six feet, and its boundaries of wood have rubber cushions, shaped like pool or billiard table cushions, which present to the ball a sharp edge, so that it will rebound from them briskly. The court is rolled daily, first with a heavy, and afterward with a light, roller. It is daily watered and sanded, and after every game the ground about the wickets is levelled with a ninewood levelling board.

A BARGAIN---$550

Ten-acre tract of fine land two and one-half miles southeast of town; two-thirds under cultivation; suitable for orchard or market gardening. Call on J. D. Sears, or at Sun office.

Who steps up after [illegible]?

What two letters [illegible] pepper? K N.

When is a bottle sick? When it is blue.

What is it that we should never ask for? What we can't have.

Why is a beggar like a baker? They both need bread.

When anyone falls down, what is the first thing to do? Get up.

As I was going up the church steeple I *met three living people*; they were not three men, they were not three women or three children. A. One man, one woman and one child.

Why ought fishermen to be wealthy? Because theirs is all net profit.

What is that which a cart cannot move without, but yet is of no use to it? Noise.

What is the difference between a farmer and a dressmaker? One sews what she gathers and the other gathers what he sows.

Which is the debtor's favorite tree? The willow (will owe).

When was paper money first mentioned in the Bible? When the dove brought the green back to Noah.

What fish is the most valued by a loving wife? Her-ring.

What did Adam first set in the Garden of Eden? His foot.

What is the hardest thing to deal with? An old pack of cards.

How do bees dispose of their honey? They cell it, of course.

Why is death like the letter E? It is the end of life.—New York "World."

Unnecessary Stupidity.

"I noticed," said the druggist to his assistant, "that a gentleman came in with a prescription, and that you took it and gave him the stuff in about three minutes. What do you mean by that? When a prescription for salt and water or peppermint and cough syrup is handed to you, you must look at it doubtfully, as if it were very hard to make up. Then you must bring it to me, and we will both read it and shake our heads. After that you go back to the customer and ask him if he wants it to-day. When he says he does, you answer that you'll make a special effort. A patient appreciates a prescription that there has been so much trouble over, and when he takes it he derives some benefit from it. But don't you do any more of that three minute prescription business, my boy, if you want to become a first-class druggist."

How to Cure Toothache

Any aching tooth can be relieved instantly with Nerviline. Fill the cavity with badting dipped in Nerviline and rub the gums with Nerviline also. If the face is swollen and sore bathe the painful parts with Nerviline and cover with a flannel. This can't fail, because Nerviline kills the pain outright and prevents it from returning. Stronger, quicker, more satisfactory than any other liniment, Polson's Nerviline has been the largest seller for nearly fifty years; try it yourself. Sold by all druggists.

The Sun

PRINTS all the news of the Boundary, and prints it while it is news. It is the only twice-a-week paper published in Southern British Columbia. It is not owned or controlled by a clique of politicians, to further their own ambitious aims; nor by a combination of merchants to be used as a means of lauding their own wares, to the detriment of their rivals.

THE SUN is the sole property of its publisher, and no one else has any right to dictate its policy. It is printed in the interest of Grand Forks and surrounding district. When its editor believes he is right, he speaks right out. He does not have to consult half-a-dozen different parties about what he intends to say.

Everybody in Grand Forks reads THE SUN twice a week. Its out-of-town circulation is large, and is rapidly increasing. It is therefore the best advertising medium in the Boundary.

Synopsis of Regulations Governing the Disposal of Dominion Lands within the Railway Belt in the Province of British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths, excepting those situated West of Yale, for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—

Sawn lumber, 50 cents per thousand feet B.M.

Railway ties, eight and nine feet long, 1½ and 1¾ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent. on the sales.

A license is issued so soon as a berth is granted, but in unsurveyed *territory no* timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at *public competition*, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B.M., for square timber and sawlogs of any wood except oak; from 1½ to 1½ cents *per lineal foot for building logs*; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of twenty-one years at a rental of two cents an acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the district within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a *homestead, is required to perform* the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land to each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock: and 20 head of cattle, *to be actually* his own property, with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of the Act, resides upon a farm in the vicinity of the land entered for by such persons as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence *upon the said land*.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

COPPER The new edition of the COPPER BOOK lists and describes 3311 copper mines and copper mining properties, in all parts of the world, covering the globe, these descriptions ranging from two lines to 12 pages in length, according to importance of the mines. The descriptions are not padded, but give facts in the most concise form. There are also fifteen miscellaneous chapters, devoted to the History, Uses, Terminology, Geography, Geology, Chemistry, Mineralogy, Metallurgy, Finances and Statistics of Copper, rendering the volum, a veritable encyclopedia of the subject of copper and everything pertaining to the metal. It is the world's standard Reference Book on Copper.

Every Miner, Prospector, Investor, Banker and Broker needs t book. Price is $5 in Buckram binding with gilt top, or $7.50 in full library morocco, and the book, in either binding, will be sent on approval, to any address in the world, to be paid for if found satisfactory, or may be returned within a week of receipt and the charge cancelled. Address the Author and Publisher.

A Woman Who Could Shoot

A story told by the wife of a factor of the Hudson Bay Fur Trading Company shows that ability to do a thing well sometimes makes the actual doing unnecessary. The woman had been brought up in the post, where her father was chief factor, and, like all the children and women, had learned to use firearms with ease and accuracy.

My father and the men had gone away to a conference with the Indians, who had been hostile for some time, she says. They had left orders not to open the gates of the fort.

It was a blistering day and the water in the stockade grew warm. So it was *suggested that someone go to the river* and get a fresh pailful. My aunt agreed to go, and marched out alone with a pail in one hand and a rifle in the other.

We stood behind the loopholes of the closed gate, saw her disappear down the bank, come up again with a dripping pail of fresh water, and set it down again as if to rest. She had barely picked it up again when she stopped abruptly, gazing straight at the high grasses on the right of the path between herself and the fort. All eyes at the loopholes turned in that direction, too; and there, stealing through the grasses with their war feathers and war paint on, we saw two young marauding warriors plainly bent on mischief. They evidently knew that the men were all out and only women in the fort.

We could not possibly shoot in my aunt's defence without great risk of hitting her. If we unfastened the gate, one of the Indians could easily have forced an entrance while the other stopped her.

But my aunt, instead of rushing in, set down the pail. She looked again where the Indians had now risen boldly up directly under a solitary tree.

On the topmost branch of that tree sat a "whisky-jack"—a bird of the jay family which is common round camps in the Northern woods. Quick as a flash she aimed her rifle, "picked off" that jay as coolly as if she had been at target practice, and then, as calmly lifting the pail of water, came slowly to the gate, where we received her with open arms.

As for the Indians—well, there was a flourish of greasy shoulders through the long grass, and the two braves had disappeared.

Feminine Figures

"No," said the woman in the case, "I cannot marry you; the disparity in our ages is an insurmountable barrier." "But," answered the man who would a hubby be, "you admit to having celebrated twenty-two birthday anniversaries, and I am only ten years your senior." "True," said the fair one; "but think of the difference twenty years hence; you will be fifty-two and I will be twenty-seven." And, being a wise man, he said never a word, but let it go at that.—Chicago "Daily News."
