A SPLENDID OPPORTUNITY

The Panama Pacific Exhibition an Excellent Chance for B. C. Mining Camps

This week the people of Hedley are having presented to them one of the best and most legitimate advertising schemes that could possibly be devised.

The Dominion Government in its exhibition at the Panama-Pacific Exposition is to make a special feature of a complete mineral collection comprising the ores and specimens found in Canada. With a view to making the collection complete and thoroughly representative Mr. Wm. Thomlinson, late of the Provincial Bureau of Mines, has been appointed official collector for the commission placed by the Dominion Government in charge of the forestry, fishery and mineral exhibits.

In pursuit of his duties Mr. Thomlinson has made an extensive canvas of the province. He has already covered the northern and central sections. Last week he toured the Boundary country and this week is being devoted to the Similkameen Valley.

In conversation with the Gazette Mr. Thomlinson particularly emphasized the point as all exspense even to local haulage was assumed by the government it was a golden opportunity for the people of B. C. in each locality to make sure that their locality was adequately represented.

According to Mr. Thomlinson instructions specimen's which may be of any reasonable size should be packed in cases as sacks permit too much and movement and shipped C. O. D. to the collecting warehouse at 324 Water St., Vancouver. However, any of our local claim owners who contemplate contributing to the collection had better first consult P. H. French whom Mr. Thomlinson has instructed to receive specimens for crating in large quantities. In this way the government will be saved expense and the sender will not only be spared the trouble of packing but will have the greater assurance of his specimens reaching their destination in safety. Printed labels, further information etc., may be obtained from Mr. French.

Let us repeat that the entire expense of this project is being borne by the government, and, as the specimens are to be sent to the Panama-Pacific Exsposition and retained thereafter by the government for purposes of exhibition, it offers the best opportunity to advertise the camp that we have had in many years. Everyone who has a dollar invested in the town is directly interested. Let Hedley do its part in making the collection from this locality a thoroughly representative one.

STATUS OF GERMANS

In an extra issue of the Canada Gazette the status of all Germans resident in the Dominion is fixed and provision is made for the arrest and conviction of any and all German army reservists or officers who shall attempt to leave Canada via any port in the Atlantic or the Pacific.

All German immigrants quietly pursuing their usual avocations in various parts, shall be unmolested unless there be reasonable ground to suspect them of disloyalty to the Empire.

Widows, orphans, wooden legs—"made in Germany."

GEOLOGICAL SURVEY WORK

Report of Charles Camsell for 1912 of Certain Portions of Yale District

(Continued from last week.)

Copper Mountain

INTRODUCTION

Copper Mountain is a mineralized district on the east side of the Similkameen river about 10 miles south of the town of Princeton. A brief preliminary examination of this field was made in the summer of 1906 and a report of it is contained in the Report No. 986 of the Geological Survey, Preliminary Report on a Part of the Similkameen District.

For several years previous to 1906, prospecting and development work in this district were actively carried on, but since that time it has remained dormant and because most of the claims are Grown-granted, owners have not been obliged to do even the annual assesment work. In 1911, however, interest was revived by the entry into the district of the British Columbia Copper Company who took options on and have been exploring a large group of claims situated on both sides of Wolf creek. This work has been actively carried on by a large staff of men both by sinking and drifting on the ore bodies and by the use of diamond drills.

The Copper Mountain district lies in, and has the characteristic topographic features of, the Interior Plateau region. It is round-topped, wooded mountain sloping steeply westward to the deep canyon-like valley of Similkameen river and cut into on the east by the broad flaring valley of Wolf creek. At the north end is Smelter lake, a deep, narrow lake about 1½ miles long and a few hundred feet in width. The highest point in the district is Copper mountain itself which has an altitude of nearly 4,500 feet above sea-level. Points immediately to the east, however, reach greater elevations. The lowest point is the bed of Similkameen river to the west of the mountain, which has an altidude of 2,600 feet. The vertical relief is, therefore, about 1,900 feet. The whole district is covered by an open forest growth of fir, spruce, and pine, and a great part of it is drift-covered so that much of the surface prospecting has to be done by trenching and sinking pits.

Voigt's Camp, which is situated on Wolf Creek and is the central point of the district, is connected with Princeton by a good wagon road 12 miles in length.

GEOLOGY

The country rock of Copper Mountain is a stock of monzonite which has been intruded into Palaeozoic sedimentary rocks, remnants of which are now found as highly altered inclusions in the monzonite. Overlying the monozite in a series of volcanic flows of Tertiary age which are found on the northern slope of the mountain.

The monzonite is a fine to medium-grained, tough rock of very variable composition and colour. It includes at least two types of rocks which were irrupted at quite different though not widely separated periods. The prevailing type is the more basic one and contains both plagioclase and orthoclase, augite and some biotite. Hornblende is also present but probably as an alteration from augite. Pyrite and magnetite are present as accessory constituents, and chalcoprite and bornite are primary constituents of some of the pegmatitic phases of the rock. Variants of this rock contain the augite without any biotite. The texture is granitic but a porphyritic habit is occasionally developed. The more acid type is lighter in colour and contains more orthoclase and biotite in proportion to the other

The monzonite is traversed by a number of pegmatite veins, apparently emanations from the same magma, which contain large crystals of pink feldspar, biotite, and calcite. In some veins the calcite is absent but in others it is the only mineral present. Chalcopyrite is often present in these veins when it appears intergrown with the feldspar, and bornite had also been noted in the same relationship. The presence of the sulphides in the pegmatites suggests that the monzonite magma was comparatively

THE NICKEL PLATE DANCE

Cookhouse Opened by An Enjoyable Hop

Last Friday evening the opening of the new cook and mess house at the Nickel Plate was celebrated by one of the most successful dances ever held on the hill. Those who have not been up at the mine for some time were met with a genuinely pleasant surprise in the large, roomy electric-lighted hall with a dancing floor equal if not superior to anything we have in Hedley. The one drawback, if any, was that the hall seemed almost too large for the size of the assembly, not a very serious fault, so long as the musicians were equal to the occasion, which they proved themselves to be. A piano had been taken up from town and the services of the Hedley Band Orchestra secured—in fact everything possible had been done to insure good music, with most gratifying results.

The dancing began at nine o'clock and continued, with a short intermission for supper, until four in the morning. The supper itself was quite in keeping with the high order of entertainment which the boys always try to provide for their guests, and the dance was voted a thoroughly enjoyable affair by those who were present.

K. V. R. CLOSES DOWN

We have it on good authority that orders have gone out for work on the K. V. line to cease. The alleged reason for suspension of operations is the hesitation of the company to tie up funds in a concern which must be unproductive for some time.

Constructive operations on the Canadian Northern are also pretty well suspended, Sir Wm. McKenzie being unable to raise funds in London.

NOTICE

Notice is hereby given to the public that they are prohibited from hunting or shooting over the property on Nickel Plate Mountain known as Camp Rest Ranch and comprising the lots hereinafter specified: Lot No. 3794; Lot No. 3468; Lot No. 376s; Lot No. 48s; and Pre-emption No. 9.

Disregard of this warning be followed by prosecution.

Geo. Cahill.

Orchardists around Groville are arranging a trip to Penticton for the purpose of studying the fruit blight in the Canadian Okanagan. The damage done by the blight in the Yakima and Spokane districts is estimated this year at nearly two million dollars. The Wenatchee country is still immune, but in the 17,000 acres of orchard around Penticton it has played havoc for two yearr and has become a real menace to the success of the fruit industry in that locality.

PROTECT THE FORESTS

Value of Wooded Slopes in Equalizing the Flow of Streams

The destructive fires raging in the Similkameen and Nicola Valleys do not seem to be causing much worry outside of their immmediate vicinities simply because the timber is not of much value. But there is another consideration which directly concerns everyone interested in irrigation or the development of water power along our streams.

Science and general experience agree in saying that when a country is covered by forests the water runs off it more slowly and regularly than it does after the forest has been removed. This is due principally to the fact that the forest stems and ground cover offer a mechanical obstruction to the surface run-off while the deep roots of the trees keep the soil loose, thus permitting the surface water to percolate into the sub-soil.

In Western Canada, forest surveys conducted by the Dominion forestry branch have furnished considerable evidence of the evil results attending forest destruction by repeated fires.

In the older settled regions of Eastern Canada the relation between floods and indiscriminate deforestation is even more clearly evident. "Now with deforestation stream-flow in the Ontario peninsula has greatly changed. Spring floods are very much higher and there are floods on heavy rains, while during the season of minimum flow many streams which were formerly considerable throughout the year practically disappear.

Similar deforested conditions likewise prevail on many of the watersheds in Quebec and the Maritime Provinces, and, by causing extremes of high and low water, have a detrimental influence on navigation and the development of electric power. It cannot be too strongly urged that the Dominion government should assist the province in the reforestation of denuded areas and in their protection from forest fires.

GENERAL JOTTINGS

The Canadian Marble works at Lardo have closed down on account of the war. They have orders for large shipments of marble, but owing to the outbreak in Europe the orders were cancelled.

Government agents throughout the province are receiving orders from the Provincial Government forbidding the issuance of gun licenses to Austrians and Germans.

Turkey has issued a warning to shipping companies that merchant vessels passing through the Dardanelles must dismantle their wireless installations and leave their apparatus behind.

The present government of Merico has decided to repudiate notes to the amount of $10,000,000, issued by the Provisional Government of President Carbajal.

Germany has decided to disregard Japan's ultimatum to evacuate Kiaochau and the Japanese are preparing to enforce their demands.

The export of sugar from Jamaica has been forbidden by Royal Proclamation, the entire crop being required for Imperial purposes.

The statement is made that there is but four months' supply of tea in London and only three weeks' supply in Canada.

The Kaiser is said to be longing for an opportunity to congratulate his troops. He might felicitate those who got back from Liege with whole skins.

Big Surprise to Many in Hedley

Local people are surprised at the QUICK results received from simple buckthorn bark, glycerine, etc., as mixed in Adler-i-ka, the German appendicitis remedy. F. M. Gillespie, druggist, states that this simple remedy antisepticizes the digestive system and draws off the impurities so thoroughly that A SINGLE DOSE removes sour stomach, gas on the stomach and constipation Instantly.

THE KEREMEOS FLOWER SHOW

By this time not only the official news of the Keremeos Flower Show has got through to us; but also reports brought back to Hedley by the local fanciers, who were present. Judging by both reports the event was an unqualified success; and unbounded credit is due to those by whom the scheme was projected and carried into effect.

This year the show was only an experiment, though a highly successful experiment. With experience, the exhibitors will not only improve the quality of their display but take care that exhibits are better balanced and the enteries in each class numerous enough to insure real competition.

The real use of the flower show is hardly apparent yet. The idea is capable of almost indefinite extension. If it could be made to include the entire valley it would perform a very real service for us all. The spirit of rivalry is healthy; but the spirit of rivalry between our towns is often unkind and sometimes unsportsmanlike If a committee, representing the flower fanciers of the entire valley, could be got together, there is no reason why the show, when extended to its fullest possibilities, should not become a big annual event in which we could all meet in genuine friendly rivalry.

THE WAR OF OVERSIGHTS

This bids fair to be known in history the war of oversights. Had Germany realized the unhesitating fidelity of Britain to the obligations of the Triple Entente she would have thought twice before declaring hostilities. Had she realized the intrinsic solidity of the British Empire, she would have recognized Britain as one having authority. Had she fully understood the significance of England's overwhelming superiority in the matter of light cruisers, the voice of German commerce would have been unanimous against war. Had she been able to foresee that the vaunted Prussian machine was to break down before the valour of a little nation, that every strategic advantage gained by rapid mobilization, every ounce of prestige gained through strenous years of advertising was to be wiped out in one week she might have stopped to consider. Had she looked back to see what a weak and fickle sister her ally has always been in aggression and defence and looked for to see that Russia is a new and rejuvenated Russia, capable of mobilizing the first line of her colossal army in three weeks, counsels of peace must have prevailed. Had she considered the forced position of Italy in the Triple Alliance, the ancient freindship of Japan for England, not forgetting the fate of a certain Napoleon Bonaparte who sought to bend Europe to his will—had she considered these things, the war would not have looked to her so much to her like a Prussian holiday.

It needed but the trumpet's clarion to make Carson and Redmond shake hands and their followers to plead for a chance "to walk shoulder to shoulder through the Germans as the Divil walked through Athlone". The labor agitators dropped their greivances; the suffragettes dropped their bricks, and the colonies, even to South Africa have offered their best. The Prussian war machine has so sadly wobbled on the Meuse that the story of its invincibility has gone the way of other pipe dreams. The whole German marine is bottled up. Her main waterways the Elbe and the Weser, are closed The land is full of smokeless chimneys and silent mills. The North Sea is in the hands of Jellicoe and his fleet; and Germany's industrial loss is estimated at $5,000,000 daily.

The preparedness of France was another surprise which forced Germany to that dastardly blow that has cost her the sympathy of her last freinds and morally bankrupted her forever. The crushing momentum of the Russian forces begins to be felt. In a smashing attack the German army has been weighed in the balances and found wanting. With the passing of every day she loses some strategic advantage. Meanwhile these smokeless chimneys pointing upward from the silent factories are the Mene Tekel—the warning} finger of impending disaster.

Valiant Captain Haun of the Leipzic announces that he will first take the Rainbow, then the Algerine and Shearwater, then the Montcalm and so on. So far he has taken a cargo of coal at Frisco.

GEOLODICAL SURVEY WORK

Continued from Page One

rich in copper and was very probably the source of the copper of the ore deposits.

Because of its tough close-grained character the monzonite frequently shows no well-defined system or fracture. The best defined joint planes are those which strike N. 60 degrees E. and S. 10 degrees E. Fracturing has taken place in two major directions, namely S. 80 degrees E. and S. 10 degrees W. Both of these directions coincide with the strike of some of the ore bodies, while the latter is the direction of strike of most of the dykes which cut the monzonite. Faulting has taken place to a considerable extent throughout the whole district but the displacement is usually not great. In appears to have both preceded and followed ore deposition, so that some of the ore bodies follow the lines of fracturing and faulting while others are cut off and displaced by them.

Dykes of granite porphyry, syenite porphyry, quartz porphyry, and diabase traverse the modzonite, striking in a direction almost north and south. A majority of the granite porphyry dykes outcrop on the east side of Wolf creek and many have been encountered underground that do not reach the surface. Some are as much as 150 feet in width. They show chilling and flow structure on their border and are porphyritic or almost granitic in the centre. The diabase is fine grained and soft, and later in date than the intrusion of the porphories.

The monzonite is overlaid to the north by extrusive rocks of Tertiary age consisting of andesites, basalts, and some rhyolite. These rocks are associated with and somewhat younger than the coal-bearing Oligocene rocks centreing about Princeton. They appear to have covered a great part of Copper mountain previous to the Glacial period, and it is due to the protecting cover of these lavas that there is such a depth of decomposed monzonite now remaining on parts of the mountain.

Continued next week

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

Town and District.

Game Warden Schissler was in town on Tuesday.

Mrs. Edmonds is home again after a month's holiday at the ranch.

Hans Richter was in town last week having an injured hand treated by Dr. McEwen.

Homer McLean, Bert Russell, and Tom Kellog are prospecting along Sterling Creek.

Leonard Innis spent the last week end visiting his uncle and aunt, Mr. and Mrs. Forbes.

Mrs. Daly spent afew days in Hedley last week, the guest of Mrs. Wallis Knowles.

Wm. Forbes who went to Penticton on Saturday on business returned home on Tuesday.

Eddie Johnson passed through town, en route to Oroville where he intended spending the week end.

All the editor's social calls are cancelled this week; he was smitten on the beak with a hammer.

On Saturday Mrs. Lyall arrived home from Princeton where she has been visiting for a few days.

Rich Cawston, manager of the Similkameen Fruit Lands Co., passed through Hedley last Saturday.

Father Conant who has been in Hedley at intervals for the last fortnight returned to Kamloops Saturday by way of Penticton.

Miss Ella Linton, sister of Mrs. Holland of Nickel Plate Camp returned to Nighthawk Saturday accompanied by Miss Ruth Bowerman who will spend a short time with her.

Wm. Thomlinson, mineral collector for the Canadian Government Exhibition Commission was in town Tuesday and Wednesday. Turn to the first page and see what he says; it is worth while.

FOR SALE—Lot 7, block 2, townsite of Hedley. This property is a good location as it is situated on Scott Avenue, three lots north of the Hedley Trading Company's store. Good house on property. Will sell for $900.00 cash or $950.00 half down and the balance in eight monts at 6 per cent. M. C. Kent, Prince Rupert, B. C.

Last week the Star Theatre opened under very favorable auspices for a successful season's run. The house was good, all things considered, and the show quite up to the usual standard. One unique feature was the films furnished by the Provincial Government for the futherance of the forest campaign. From an artistic standpoint the plates were decidedly creditable and from their educative value can hardly be over estimated.

Last Thursday evening the local members of the Orange Order met in their Lodge room for the purpose of tendering a fitting farewell to Bro. Wm. Henderson on the eve of his departure for the front. The function took the form of a banquet and presentation. After the traditions of the army and the empire were fittingly celebrated in toast and song, Bro. Henderson received a beautiful gold watch and charm, suitably engraved.

The question of the game reservation is being mooted again. Last Saturday Joe Marcel of Keremeos was in town securing signatures to a petition to annul the former document praying for a reservation whose boundaries should be respectively; Twenty-Mile Creek wagon road to its junction with the Nickel Plate-Penticton road, and along the said road to its junction with the Keremeos-Penticton road which line it will follow to the Similkameen River and from thence along the river to the starting point at Hedley.

Large tract of good valley farming land just thrown open for free settlement in Oregon. Over 200,000 acres in all. Good climate, rich soil, and does not require irrigation to raise finest crops of grain, fruit and garden truck. For large map, full instructions and information, and a plat of several sections of exceptionally good claims, send $3.40 to John Keefe, Oregon City, Oregon. Three years a U. S. surveyor and timberman. An opportunity to get a good fertile free homestead near town and market. 28-5

Two more of our local boys left for the front Monday in the person of George Boxall and Fred Beck. George, as was stated last week, is a regular and Fred a reservist. Both entrained for Quebec amid more enthusiasm than the old G. N. station has seen in many a day. Leaving the Similkameen Hotel in the bus, decorated with flags and already crowded with admirers, the boys drove to the depot gathering new enthusiasts en route. When the train pulled in they were chaired across the platform into the coach where we left them, bidding them an revoir but not good-bye.

PROSPERITY

Advertisements Are the Guideposts Showing Way

By HOLLAND.

WOULD you travel the road that leads to Prosperity? Then read the advertisements. They are the guideposts pointing the way. Disregard the advertisements and you are likely to go wrong, and even if you finally reach your destination you do so only after needless delays and unnecessary traveling.

The traveler who would disregard guideposts, who would not examine them at every opportunity, would be called foolish. He would get little sympathy when he complained of time lost going the wrong direction.

The man who neglects to read the advertisements is disregarding guideposts and is taking unnecessary chances and is delaying his own progress.

ADVERTISEMENTS OFFER WAYS TO SAVE DOLLARS.

If you fail to read and profit by the advertisements you are giving your neighbor who does read them an advantage.

Grates are extra durable. Coal grate is duplex. Wood grate is the most modern type.

McClary's Kootenay Range 60 will take extra large pieces of wood---just remove back end lining. Ask the McClary dealer to show you.

KEREMEOS, the Centre of Lower Similkameen---Famed for Fruit Growing

Town and Lower Valley.

Mrs. Tweddle was a visitor at Oroville Wednesday and Thursday of last week.

Victor Quaedvlieg shot a five pound horned owl last Thursday on the ranch.

W. H. Cameron and L. Barlow are building a cement reservoir for the convenience of the School's water supply.

Dr. Thomson is now on a well earned vacation for a couple of weeks. Dr. Acres of Grand Forks, B. C. will be the veterinary inspector in charge during his absence.

Mrs. Keeler returned from Seattle last Wednesday after spending a very enjoyable time with Mrs. A. C. Kennedy, late of the Spring Brook Ranch on the Penticton road.

Last week Fraser, the son of Mr. Joe Marcel of Ollala, had the misfortune to put his elbow out of joint, and sustain a slight fracture, while trying to evade some cattle he had just helped corral.

Church of England services will be held in the school house on Sunday next the 30th. by the Rev. J. A. Cleland of Penticton, full choral, Harvest Thanksviving. A cordial invitation is extended to all.

Once more the school is in full swing and the pupils are tickled to death. Pretty hard to beleive, but if one had seen their cheerful faces when they were let out early on the first day of the term. Conviction followed.

What about that hardware you were thinking of getting? You know you will need a new stove board this fall, maybe some new pipe lengths. Come and see me at the hardware store. Ezra Mills is the name over the door.

Mr. Angus Munn of New Westminster, B. C., Inspector of Customs was in town Monday the 24th. He spent the day with the local customs officers instructing them in new details which he has received from the department at Ottawa.

Misses Elizabeth and Freida Richter left on Monday evening for Victoria, B. C., Miss Freida to continue her studies at the St. Anne's Academy and Miss Bessie to take three months probation in the St. Joseph's Hospital. We join with their many friends in

We often hear, "some chicken" but this time it was "some bear", when George Christy arose Monday to do his morning chores, he was surprised to find some bear standing in front of the stable door, we do not exactly know what George looked like when his lamps lit on this intruding stranger who not satisfied with his usual bill of fare, had plentiously been helping himself to peaches and plums, breaking down many limbs in his eagerness to appease his appetite. We hope to publish later the death notice of Bruin. This is beleived to be the same bear that had the audacity to stand up and face the section men as they were going to work on their car on Saturday. But the noise of the car and the number of men on it made him move before it was upon him.

Joe Marcel was around town Monday getting signatures to a petition to annul the one sent in to the government asking for a game reserve to be made with the boundaries of Twenty-Mile Creek wagon road to its junction with the Nickel Plate-Penticton road, and along the said road to its junction with the Keremeos Penticton road which line it will follow to the Similkameen River and from thence along the river to the starting point at Hedley. When the writer saw the list it contained ninety-six signatures. Although the writer signed the previous petition after looking into the other side of the question more thoroughly, he will venture to say after seeing the signatures contained in the last petition that there will not be a reserve contained in the above boundaries.

Let the Buyer Beware

FOR centuries the principle of "Let the Buyer Beware"—"Caveat Emptor"—ruled the world of business. In fact, it was not a principle—but rather a lack of principle—yet it held sway everywhere until a decade or two ago.

When a merchant quoted a price, he made it high enough to stand almost unlimited whittling, and yet be profitable—to him. When he spoke of quality, his fingers were crossed, and you were not expected to believe him—unless you wanted to very badly.

Buying was a haggle—unless you were a hardened haggler you came out second best in every deal. *"Caveat Emptor"*—it was up to you. There was no confidence between buyer and seller.

Business—once an aggregation of deals—has become the living embodiment of ideals.

Advertising has helped, because Advertising creates confidence in the buyer and proves the seller's confidence in his wares. Confidence has eliminated the haggle.

You see business confidence is a good deal like capital, in that it accumulates like savings. The grocery-consumer's confidence in a town will be on deposit chiefly with a few capable square grocers; and dry-goods confidence, jewelry confidence, and so forth, are massed in the same way.

The retail merchant doesn't lock this confidence in his safe. He deposits it in turn with the wholesaler, who passes it on to the manufacturer. And the manufacturer, to make the circle complete, must give confidence to the consumer.

The manufacturer with goods to sell must draw upon all these reserves of confidence. He must demonstrate his own fairness in dealing, his integrity in maintaining quality, his willingness to put principle before profit.

Advertising is the means through which the manufacturer makes this demonstration to you.

Advertising has given personality to commodities, so that you now recognize your "friends" among soap, tea, or collars, as readily as you recognize your human acquaintances.

Advertising fathered the "money back" principle, and has made buying a pleasure instead of a duel of wits.

Advertising has spread the one-price policy—erased "Caveat Emptor" from the language of business, and made buying safe to entrust to a child.

Advice regarding your advertising problems is available through any recognized Canadian advertising agency, or through the Secretary of the Canadian Press Association, Room 503 Lumsden Bldg., Toronto. Enquiry involves no obligation on your part—write if interested.
