NICKEL PLATE NOW DEEP MINE

Some of the Changes Which Have Taken Place

ROSY FUTURE IS ASSURED

Day of Surface Working is left Behind—No 4 Tunnel Now Busy Thoroughfare—Mine Buildings Moving Down to Accommodate Lower Level—The Dickson Incline

About ten days ago the editor paid a visit to the Nickel Plate mine for the first time since the spring of 1912, and was permitted to enjoy the treat of an inspection of the lower workings in company with the mine superintendent, W. Sampson, who was making his round of inspection of the various working faces where development work is proceeding or ore being stoped.

When we state that no ore is now being taken from any of the workings on the Sunnysides, and that only two or three trains a week are being hauled out of No. 3 tunnel on the Nickel Plate, while both electric motors are busy hauling the usual daily quota of train loads to keep the mill supplied out of No. 4 tunnel, those who were most familiar with the Nickel Plate of three or four years ago and have not seen it since, will begin to realize how completely the mine has changed in that time. Were it not for the presence of the company's store and the cook house and bunk houses along the track running to No 3 tunnel, and also the blacksmith shop and machine shop at the mouth of No. 3 tunnel, that upper track would be almost deserted. And when these will have been removed to the lower track a few months hence, all the old prints and views descriptive of the Nickel Plate will begin to look like ancient history.

The shelter that was formerly in use to which householders and all others had to repair when blasting or bulldozing was in progress in any of the glory holes a few years ago, is still there in somewhat demantled shape, and a climb up the hill-side to the main Nickel Plate glory-hole itself, is greeted with neither sight nor sound of mining activity, and there is nothing to see but the huge yawning gaps from bottom and sides leading to apparently interminable darkness in regions far below.

Between this old Nicket Plate glory hole and the workings served by No. 3 tunnel there is now little or nothing in the way of mining in progress, and one or two machines stoping is about the sum of it; but the big caverns out of which past dividends were hewn and in which some of the largest car barns in Vancouver might be stowed away and look in comparison little bigger than tool boxes in an adit or station, will give some evidence of how large the Nickel Plate ore bodies are and have been. A few pillars and walls of ore here and there are still left standing for the support of the mine, but these in time will be taken out and this portion of the mine allowed to cave in.

Below No. 3 tunnel stoping is under way and there is here also an enormous reserve of ore broken down ready for transportation by the electric ore trains to the head of the gravity tram. This amount of reserve of ore broken down is all the time increasing and is now estimated at fully 23000 tons. It is in this zone and at what now looks to be an exalted portion of it that we were shown a point which was the bottom of the mine when Mr. Beam first came to examine it in 1909, and from what we happen to know of the views of the then manager, it was not only the bottom but in his opinion the last bottom. All around it and below, there are now quarried out enormous chambers that are beginning to resemble those which we have before referred to above No. 3, and leading from some of the lower of these chambers are large circular ore chutes cut out of the solid rock leading down to the level of No. 4 tunnel. One of these is 110 feet deep and 12 or more feet in diameter so there is little or no danger of the ore ever choking up in its descent to the traps from which it is leaded by gravity into the cars on the level of No. 4 tunnel. Complete connection was made between the workings from No. 3 and No. 4 tunnels some time ago and the whole mine may now be traversed underground from the lowest incline below No. 4 to the glory hole which marks the point of the earliest discovery.

Below No. 4 tunnel one incline has been driven over four hundred feet on a huge new ore body of which nothing was known by the old company, and from this incline, drifts and stopes have been opened until there are now mine faces in all directions from which an enormous daily tonnage of ore could be furnished to almost any capacity of plant they might see fit to instal. Nor is this the only new ore body they know of below this level, and this is evidenced by the new Dickson incline begun last October which is a three compartment shaft for double trackage and manway and already down over 200 feet. While the first incline from which the extent of this new ore body is being proven, runs at the comparatively flat angle of 24 degrees to conform with the general dip of the ore bodies, the Dickson incline is being driven at the steeper pitch of 30 degrees which will cause it to dip under the huge lenticular deposit upon which it was started and will dip either into or under other new similar deposits to be encountered lower down. It is to be driven straight as an arrow at this regular grade regardless of what may or may not be encountered in the way of ore bodies until it reaches a depth of 3000 feet. It will be the great Appian way of transit for the ores of the Nickel Plate for a decade to come, and he would be a faint-hearted seer who will not prophesy that in that time it will not have carried out millions of tons of ore dropped to it from ore chutes 1000 feet or more above.

Down on No. 4 track near the entrance to the tunnel a large blacksmith and machine shop is nearing completion while surface men were excavating a foundation for a new cook-house and also a new store and other buildings.

MADE IN CANADA

„Buy Canadian-made goods. It will mean the employment of many additional thousands of men and women in the factories of Canada. It will mean greater activity and more independence of indusrial life of the country. It will mean new factories for the cities and towns of Canada. It will mean a more profitable home market than the present one for the farmers of Canada. It will result in fucher inspiring the confidence of British investors in the stability of the business of Canada." — Fredericton Gleaner.

METEOROLOGICAL.

The following are the readings showing temperature, etc., for the week ending June 7, 1913:

AT THE MINE.

	Maximum	Minimum
Jun 1	70	42
2	68	40
3	57	39
4	58	31
5	61	34
6	71	41
7	63	36

Average maximum temperature 64.
Average minimum do 37.57
Mean temperature 50.78
Rainfall for the week 5.00 inches.
Snowfall " " 0.00 "

CORRESPONDING WEEK OF LAST YEAR

Highest maximum temperature 58.
Average maximum do 49.57
Lowest minimum do 28.
Average minimum do 30.71
Mean do 40.14

Highest maximum temperature 74.
Average do do 67.
Lowest minimum do 38.
Average do do 42.42
Mean do 54.71

A WIERD SOMERSAULT

Flying Machine Executes this Daring Acrobatic Stunt in Mid-Air

An occurrence which seems incredible, but which is vouched for by three prominent French officers, is recounted in Aeronautics. This is nothing more or less than a somersault in the air which befell Capt. Aubry when flying a Deperdussin for the purpose of effecting a reconnaissance over the region of Villerupt. "I was returning after a 35-minute flight," the Captain assures us, "facing a wind of about twenty-two miles per hour. My altitude was about 2,500 feet. At the moment of descent a series of violent gusts struck the machine, and on the throttling down and switching off, I was obliged to dive in order to make the controls effective. As I dipped the nose of the machine, a couple of quick, successive gusts struck the top of the main planes and placed me in a vertical position. While endeavoring to manipulate the elevator, I found the machine had taken me in a perfectly vertical chute to less than 1,500 feet. It here adopted a horizontal attitude upside down and proceeded to effect a tail-first vol plane." Somehow the pilot retained his seat. Continuing, he says, "The machine then gradually took up the vertical position again, describing a gigantic 'S' while doing so. Flattening out, I flew to a spot about two miles distant."

A VERNON JURY AGAIN

At the assizes in Vernon last week a Vernon jury failed to agree in the case of the Indian Spinthum who shot Constable Kindness. Murder after murder has been committed right in Vernon in the presence of witnesses who testified to the court what they had seen and heard, and yet the culprit would invariably get off. So often has this occurred that counsel for the worst criminals elsewhere in the province make application for change of venue to Vernon and this affair of the Indian Spinthum is another case of that.

In view of what has so often occurred there in turning assassins loose, the Attorney General assumes a very grave responsibility in allowing a change of venue from other parts of province to Vernon.

JAP HEROES NOT ALL IN JAPAN

It is seldom just or fair to reflect on the want of courage or nerve of men who do not risk their lives to save others. No man knows exactly what he will do in a critical moment until he has been tested, and even then he is not sure how he would behave the next time. But it is just to commend the man who does rise to a serious occasion to do the heroic thing.

The Japanese hero who dived under the market wharf in the effort to rescue a drowning child gave proof of the qualities which have made his nation great He showed courage, initiative, and resource. If he had perished his name would be on the lips of us all, but his deed would have been no finer than it was.—News-Avertiser

SUBSIDY FOR KETTLE VALLEY

Railway subsidies tabled by Hon. Frank Cochrane in the Dominion house last week provide that the Kettle Valley will receive subsidies on its line from Midway to Penticton, a distance of 135 miles; from Penticton to Merritt, 145; and from Penticton wharf to Hope station, 55 miles. These subsidies, calculated on a minimum of $3,200 per mile, will total over a million dollars which the Kettle Valley will receive from the Dominion government.

British Columbia gets $27,000 of the Federal grant for agriculture this year.

The Finance Minster says that conditions will be studied between now and next session of parliament with a view to revision of the tariff.

Canadian Senators are becoming alarmed as to the result of their action on the Naval Bill. The proper time to be sorry would have been before the fault was committed.

TEN YEAR'S RECORD

What Has Been Accomplished in British Columbia Since Premier McBride Took Office.

Last week a notable gathering at New Westminster celebrated a notable event. That event was the inauguration of party government in the conduct of British Columbia's provincial affairs. The public business of the province had got into interminable confusion under previous governments and the finances were in a fearful mess. It took a high degree of courage on the part of the administration to inaugurate the reforms necessary to rehabilitate the credit of the province and to put matters on a proper business basis without unduly stinting the outlay required in a young growing province.

Under the McBride administration the provincial revenue has inceased from three million dollars to ten and a half million dollars a year and a bank overdraft of one million has been changed into a cash balance of nine millions.

Ten thousand nine hundred and fifty six (10956) miles of roads and trails have been increased to eighteen thousand three hundred and fifty five miles (18355), nearly all of which is in roads.

The University has been established and endowed.

Normal schools and night schools have been created and the whole curriculum amplified.

Three thousand miles of railway will have been added by 1915 and complete provincial control guaranteed over three hundred miles.

An area of 260,000 acres of surveyed lands in 1903 has been increased to 5,450,000 in 1911.

The mineral output of the province which in 1902 was only $17,486,550 and the mining industry of the province altogether in a bad way because of the lack of a stable and sane mining policy has increased to $32,000,000 in 1912 and confidence has been restored among mining investors.

The agricultural, lumbering and fishing industries have enjoyed a like return of prosperity under the present regime.

To give thanks for these achievements was the object of the celebration in New Westminster and it was a most laudable object.

BASEBALL GAME

Hedley Base-ball Team Score Second Victory of Season from Up the River Teams

On Sunday the Hedley base-ball team went up to play with Princeton club a return match for the one played down here a few weeks ago, but when they got up there they found that their opponents were not to be the Princeton team but one from Copper Mountain. However, as it was a game they went up for it did not make any particular difference to them what team they were to play against. The Copper Mountain aggregation were able to give them a good game, and but for the grounds which were unsatisfactory on account of the outfield being cut across by a deep ditch and a sidewalk several feet high which interfered with play, they would have enjoyed it. There was the usual difficulty in getting the full team of regular players to go away from home to play and the places of those who could not go had to be filled by others.

Billy Corrigan pitched the first six innings for Hedley and put up effective work until relieved for the 7th and 8th by Fink after which he went back and pitched the ninth. Copper Mountain used several pitchers, and with the exception of the first inning when Petrie fanned out three Hedley batters with none out and three men on bases they were not mysterious. After that Hedley had little difficulty in solving all offerings.

A full score with names and positions of the players on either side is not available and we give only the score by innings:

Copper Mountain 1.0.0.2.1.4.0.1.1—10
Hedley 0.5.2.3.1.0.0.1.1—13

Ontario and Quebec have been visited by June frosts and much damage has been done.

A BAS BOSTOCK

One thing is very sure and that is that if any measure which may be contemplated for reform of the Senate should involve sending these old chaps back to the people, a certain senator named Hewit Bostock will hear something from the electors of Yale-Cariboo. This would enable them to understand that in a country like Canada where the representative principle of government is supposed to be supreme they must not take the liberty of setting themselves above the people by thwarting the will of the electors who have spoken through their responsible representatives that Canada should no longer sponge upon Great Britain for naval protection but should grant immediate and effective aid.

The miserable subterfuge of that old arch-humbug Sir George Ross in killing the Naval Bill and thwarting the will of the people of Canada under the pretense of deferring to them, is in itself trial enough to the patience of the electors of Yale-Cariboo, but the act of senator Hewit Bostock who claims to represent Yale-Cariboo in the upper chamber in seconding the Ross amendment, is the last straw. The Ross amendment which nullified the bill pending reference to the people, instead of being a deference to Canadian public opinion is an insult to it. The Borden administration had as clear a mandate from the people of Canada to pass the Naval Bill as they had to do anything else upon which they have formulated legislation since they took office in 1911. This fact has been made plain on various occasions by Mr. Borden who has been able to show both from the records of the House and from public speeches made by him at various times and places during the campaign of 1911, that the Naval Bill which he and his supporters put through the House was merely a faithful discharge of the promises he had made to the public on the subject of Canadian aid to naval defence.

Sir George Ross has for years posed as a great Imperialist with perfervid utterances at irregular intervals of his devotion to the mother country across the seas and the common bond of Empire, which it now appears was not to be understood by him as implying a common burden for that empire's defence. Sir George in addition to being a good Briton in his own estimation, wanted at all times to be considered an out and out Canadian. Mr. Bostock on the other hand is an Englishman with more than the average Englishman's avidity to precipitate himself into Canadian politics and he cared not what the stripe of politics should be as long as it carried him into the Canadian Parliament. He at all events should be conversant with the burden borne by the British taxpayer in the maintenance of a navy for the protection of the Empire of which no part received more real benefit than Canada which has never been asked to pay a cent towards the upkeep.

It is a well known fact that when he first offered himself as a candidate for the Canadian Parliament in the waning days of the old Conservative regime he was so blissfully indifferent to Canadian political dogma and shibboleth that he first sought the Conservative nomination in Yale-Cariboo which at that time included Kootenay as well, but the sitting member, Mr. J. A. Mara, was not possessed of the virtue of resignation, even in favor of so eminent and opulent an aspirant as Mr. Bostock who was heralded by the Canadian press as the possessor of an income of $50,000 per annum. It was an argument sufficiently strong to obtain for him the Liberal nomination against Mr. Mara and he entered the arena for one of the most extravagant campaigns ever witnessed in the province. The election took place in June 1896. Mr. B.'s first move after receiving the nomination was to engage the services of Mr. Mara's former election agent and he was in the market for anything from a thoroughbred collie pup to a newspaper or a stock ranch. The result of this together with the tide which had set in all over the Dominion against the government which had taken its political life in its own hands in obedience to a mandate of the highest court in the Empire in the matter of the Remedial Bill, of course landed him in Ottawa, and then began a pitch-in for his pile. How much of it went to the general campaign fund and how much to greedy political camp followers we are not prepared to say. At all events it is a matter of history that by the end of his first parliament in the Commons he was advised by his solicitor to make an assignment for certain financial reasons, and at the end of the parliamentary term he was relieved of the necessity of another campaign for the Commons and was given a seat in the Senate instead by Mr. Laurier, while Mr. Gallagher took up the task. Ever since then he has been Senator Bostock, and it was only a little while afterwards when we had so prominent a Liberal as the late H. H. Cook or some such such name as that, from Muskoka, make a charge that senatorial appointments in Canada about that time required a cash payment to the campaign fund of $10,000, said demand being made of himself for a seat in the upper chamber by emissaries of the "powers that were," presided over by Sir Wilfrid.

Nevertheless the people of Yale-Cariboo had all along a rather friendly feeling towards Senator Hewitt Bostock whom they regarded as more sinned against than sinning, in the various little matters where partisanship was shown in his actions, but they draw the line at condoning the offence of seconding Sir George's motion to kill the Naval Bill, and in no part of the Dominion will the demand for senate reform be more urgent than in Yale-Cariboo where a senatorial election campaign would be greeted with the shouts of "A Bas Bostock."

GUARDING PAPER MONEY.

Checks Against Thefts While In the Process of Printing.

The paper money of the Government is brought in iron bound chests, locked and sealed, from the bureau of engraving and printing to the cash room of the treasury and there delivered upon receipt to the chief of the division of issue in sheets of four bills each. They are complete, with signature and numbers, except for the seal, which is printed upon them with power presses in a small apartment under the cash room.

These presses are worked by two people, usually a man pressman and a woman feeder or assistant. When the seal has been imprinted upon the bills they ar counted automatically, bound in packages of equal numbers by bands of paper, marked, signed by the persons who have handled them, and passed into the adjoining room, where the sheets are cut and the bills are recounted and inspected, so that the imperfect ones may be thrown out. They are then bound into packages of equal amounts and taken to the drying vault, where they lie upon the shelves for several weeks until the ink has become perfectly dry.

Every safeguard that ingenuity can contrive is placed around these transactions, and the chief of division can tell which of his hundred or more subordinates have touched the different bills in the vaults. He knows who received them, who printed the seal, who wrapped and cut them, for every package is numbered and its history is recorded in an enormous book.

The combination of checks is so complete that the chief of division would know within twenty minutes if a single bill was missing, but he has never had occasion to test this knowledge except twice within fifteen years. Only two attempts have ever been made to steal the money of the Government while it is in this stage of its history.

OUTWARD DISPLAY.

It Characterizes the Social Life All Over Italy.

Social life among the Italians is really not so different from social life in other countries, although certain national peculiarities must be remarked, says Harry Quimby in Leslie's Weekly. Italians even in the most elaborate homes do not wear evening dress for dinner unless there is a party. The particularly fashionable wear a smoking coat and a black tie, but the plain black coat is more universally used. All over Italy social life is characterized by great love of outward display. In Naples particularly the afternoon drive or promenade is important to reputation and happiness. The following will illustrate the prevailing feeling: An American who had taken a flat in a palazio, the first floor of which was occupied by a noble family in reduced circumstances, noticed every day a servant going up the steps carrying a pair of carriage doors. Upon investigating he found that the noble family shared a carriage with other families and that each had its coat of arms upon its own doors.

Fewer Italians go to the famous watering places than people of any other country. The popular annual tonic of the Italians consists of eating grapes. The treatment includes grape juice and grapes, as much as can be taken, in the morning and at noon a rare beefsteak. In the afternoon more grapes and grape juice are partaken of, and at 7 in the evening another rare beefsteak. This is continued for three weeks, when the patient is said to look and feel like a different person. The grapes purify the system, and the beef acts as a tonic and keeps up the strength, according to the Italian physicians.

Praise For the Bishop.

The bishop of an English see, being a newcomer and somewhat troubled with a neglected diocese, thought to inspire his clergy to take occasional services during the week by periodically visiting out of the way parishes and taking one himself.

On one of these occasions, having formed quite a good congregation and having been moved to much eloquence in his sermon, he felt a little not unnatural desire to know if he had made any impression on the usually unimpressionable yokels, and put some leading questions to the old clerk, who was helping him to unrobe in the vestry. "Well, I hope they've been pleased with yer," said the old man patronizingly, "and I'm sure we tuk it werry kind o' yer worship to come down and preach to us, but, yer knaw, a worsser one would ha' done for the likes o' we, if so be," he added with [illegible] humility, "one could ha' bin found."

Innocence.

"Why," he asked, "do girls like so much to display diamond rings on their engagement fingers?"

"Well," she replied as she [illegible] twirled the jewel on her [illegible] finger, "you know there is [illegible] like a shining example to stir [illegible] one when he has a purpose in [illegible]"

When she had time to [illegible] again she cried.

"Oh, Fred, I hope you [illegible] I was trying to throw out a [illegible] never suspected that you cared [illegible] me at all!"

WATER NOTICE

For a Licence to store or pen back water

NOTICE is hereby given that The Daly Reduction Co., Limited, of Hedley B. C. will apply for a licence to store or pen back 13.8 acres by 5 ft. deep acre-feet of water from the Similkameen River, a stream flowing in a southerly direction and emptying into to Okanagan River near Oroville, Wash. The water will be stored in a reservoir of 3,000,000 cubic ft capacity, built or to be built at Hedley, B.C. and will be used for power for mining purposes as authorized by Water Record No. , Water License No. , or under a notice of application for a license to take and use water, posted herewith, on the land described as being near the northwest corner of Reserve No. 2.

This notice was posted on the ground on the 19th day of May, 1913. The application will be filed in the office of the Water Recorder at Fairview.

Objections may be filed with the said Water Recorder or with the Controller of Water Rights, Parliament Buildings, Victoria, B. C.

The Daly Reduction Co. Limited

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for. 2-6m

WATER NOTICE

For a Licence to Take and Use Water

NOTICE is hereby given that Barbara McCurdy of Similkameen will apply for a licence to take and use 100 inches of water out of Deer creek which flows in a southerly direction through S. E. corner of Lot 2092 and empties into Trout Creek near south boundary of Lot 2092. The water will be diverted about 500 yards east of east boundary of Lot 2092 and will be used for irrigation purposes on the land described as Lot 2092.

This notice was posted on the ground on the 17th day of May 1913. The application will be filed in the office of the Water Recorder at Fairview.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

20-4 Barbara McCurdy

COUNTY COURT, YALE

A sitting of the County Court of Yale will be held at the Court House, Princeton, Thursday 26th day of June, 1913, at the hour of 2 o'clock in the afternoon.

HUGH HUNTER,
20-6 Registrar County Court.

WATER NOTICE

For a Licence to Take and Use Water

NOTICE is hereby given that Barbara McCurdy of Similkameen will apply for a licence to take and use 100 inches of water out of Camp Creek which flows in a southerly direction through Lot 2091 and empties in Trout creek on Lot 2091. The water will be diverted at 100 yards north of north of boundary of Lot 2091 and will be used for irrigation purposes on the land described as Lot 2091.

This notice was posted on the ground on the 17th day of May, 1913. The application will be filed in the office of the Water Recorder at Fairview.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C.

20-4 Barbara McCurdy

Armstrong—May 29th, 10 a.m.
Vernon—May 30th and 31st, 10 a.m.
Kelowna—June 2nd and 3rd, 10 a.m.
Summerland—June 4th, 10 a.m.
Penticton—June 5th, 10 a.m.
Keremeos—June 6th, 11 a.m.
Rock Creek—June 7th, 9.30 a.m.
Midway—June 7th, 2.30 p.m.
Grand Forks—June 9th, 2.30 p.m.

The Commission will hear evidence on all matter affecting agricultural conditions in the Province. All persons interested are invited to be present.

W. H. Hayward, M.L.A.
Chairman
C. B. Christensen,
Secretary. 20-4

Town and District.

The cement works at East Princeton are expected to begin operations this week.

Mrs. Frank Logsdon is reported to be dangerously ill of pneumonia in Princeton.

J. A. Schubert came down from Tulameen last week and was in town over Sunday.

"Vaccinate" will now be the watchword in the valley and Dr. McEwen is prepared with a fresh supply of vaccine points.

A locust tree in full bloom at the corner of J. Wirth's lot, has been an object of beauty and rare fragrance during the past week.

I. H. Hallet of Greenwood, accompanied by one of his boys was in town for a couple of days last week on their way to Copper Mountain.

A local cricket game was to have been played between picked teams but the accident to the captain of the club caused it to be called off for a while.

As we go to press we learn that Tommy Corrigan has had another serious turn. The other spell which he had since the operation was performed was traceable to violent exercise.

NOTICE—All accounts due to Schubert's supply stores will in the future be paid into the Bank of B. N. A. instead of to Mr. Lyall who was authorized to collect up to the present time.

Dr. McEwen came back from Lytton last week and was accompanied by Mrs. McEwen and the baby. It was Mrs. McEwen's intention to stay a while but the baby became ill and she concluded to bring him back home.

George. B. Lyon went to Spokane last week and on Saturday he returned bringing with him Mrs. Lyon and Wesley, who will spend three months' vacation in Hedley before Mrs. Lyon returns to resume her violin studies to which she has given her full attention under tutors for the past two years.

G. P. Jones returned from the coast on Monday, coming in by way of Merritt where he spent Sunday. While on the coast he divided his time between Vancouver and Victoria and in both places met many old Hedleyites, most of whom appear to be doing well.

Mr. T. Walter Beam rsturned on Tuesday from his home in Denver, bringing back with him his wife and daughter, who will holiday for a couple of months or more in Hedley and vicinity. Miss Beam has just graduated from the college she was attending and Mr. Beam managed to get back in time for the event.

Rumor was current for a few days of smallpox in Oroville, but the circumstance is now thoroughly vouched for and the health authorities have been notified with a view to taking steps to prevent the spread. That train from Oroville has been blamed for the spread of numerous maladies in this valley and too great care cannot be exercised in this case.

The moving pictures in Fraternity Hall continue to draw good houses and most of the people in town manage to see them on some one of the two nights. Last week the pictures were very plain and steady and the subjects entertaining. Most of the films were simple melodrama with a little comic interlarded. This week there will be an exhibition on Saturday night only as the hall will be engaged for Friday.

A large blue grouse was raised out of the bushes near the school tap one evening last week, and when disturbed it flew up on the roof of the school house and remained there for some time. It is not often these birds show this amount of tameness or indifference to civilization, and if the woods are so full of them that this one had to wander off into town for a change of society, it does not look as if the species would very soon become extinct.

As soon as the Customs reported to Dr. McEwen that there was small-pox in Oroville the doctor wired to the provincial health department advising them of the representations that had been made to him and also for a supply of fresh vaccine points which came to hand this week and he is in a position to vaccinate all. Very few of the kiddies in the valley have ever been vaccinated and it is quite possible that the Indians are in a like position. It is true there are some who either do not believe in vaccination, or pretend not to believe in it, but nevertheless it has been on trial since the days of Dr. Jenner and Benjamin Jesty nearly a century and a half, and the medical profession ought to know by this time whether there is anything in it or not.

An accident happened Jack Howe, captain of the cricket team, on Saturday evening, but not in playing cricket. He was working as electrician's helper on a pole down near the Rodgers residence and was up at the top of the pole when he received a shock from a 110 volt wire which made him lose his balance, and having no belt to support him at the time, he fell from the pole a distance of about 25 feet and lit on the back of his neck. The shock from the fall was a great deal more severe than the electric one which preceded it and it was feared at first that there were internal injuries. He was taken to the hospital and a later examination by the doctor showed that no bones were broken and the extent of the injury only a severe shaking up from which he was expected to recover in a few days.

Tommy Daly is certainly making good in the Northwestern League in pitching for Spokane. In a swatfest with Seattle, which is leading the league, Spokane had the short end of a 13 to 5 score; but when it is seen how the runs were put together it is very clear that the fault was not Tommy's. Spokane used four pitchers, three of whom preceded Tommy, and off them Seattle garnered their whole 13 runs in three innings before he was called to the mound. Tommy pitched the next five innings in which he struck out five men while Fullerton the Seattle pitcher who won the game, only struck out two men in the whole nine innings. Seattle didn't bat out their ninth innings and they only got five hits and one pass off Daly who didn't allow them to score on any one of the five.

Deer have been giving trouble on Jackson's ranch near Sterling Creek. They have been browsing the fruit trees and did considerable harm. This has been going on for quite a while and a few days ago 12 were seen. There used to be provision in the Game laws to enable farmers to shoot deer destroying crops at any season of the year, but whether that obtains now in British Columbia or not we are not in position to say, as we are no longer receiving statutes of each session as formerly and amendments are being made almost every year. The editor of the Gazette has been in the publishing business nearly all of the time since 1883 and has had experience of various governments in various provinces from all of which we have invariably received each year a copy of the statutes for the year which were sent to papers regardless of their party affiliations. Why it should be different in British Columbia at the present time is something we are not prepared to explain. If it should be on grounds of economy there is absolutely nothing in it and the public will be slow to applaud the species of economy which will masquerade in the garb of picayunish cheese-paring, for it is they who must suffer in this case through witholding information they have a right to get in the public prints.

LOST, STRAYED OR STOLEN

FROM the range on Sterling Creek on Friday June 6th, two colts, three years old: one is dark brown with white star on forehead and C N on left shoulder; the other light brown with white stripe on forehead and also branded C N. Information leading to the recovery will be received by the owner.

23-3 Charles Nelson

THE KEREMEOS PAGE

KEREMEOS, the Centre of Lower Similkameen----Famed for Fruit Growing

Town and Lower Valley.

The river has dropped five feet with in the past week.

Potatoes were in blossom on Sunday the 8th at H. A. Goldbecks.

Next week will see the Keremeos strawberries on the market.

Oh you great, big, beautiful rain. More money and less work in sight for the fruit ranchers.

Mrs. Ezra Mills we are pleased to report is nicely recovering from a very bad attack of la grippe.

Dr. Jermyn, late of Coalmont, has accepted the position of Veterinary Inspector at Osoyoos.

Mr. and Mrs. E. M. Crooker drove up from Similkameen on the 9th and spent the day in town.

Buster Thomas has started to school and is already beginning to feel himself quite a young man.

The badges given out for the B.C. gun license look like a premium for a condensed milk company.

A card from Rev. A. H. Cameron shows that he has reached Toronto safely and is enjoying the Conference.

Carl Keeler is back at work with Mr. J. A. Brown, customs broker, and the typewriter is humming a merry tune.

"Beautiful and Best", a horse owned by Mrs. Daly, gets the government bonus of two hundred dollars again this season.

Mrs. (Rev.) McKenzie has been laid up with a rather severe attack of bronchitis, but we are now pleased to say is progressing favorably.

Word has come from Oroville that Billy Cohen had been killed there on Tuesday night by falling off a horse. No particulars are to hand.

Mr. McKenzie was called away to Princeton on Saturday to conduct the funeral service of Mr. and Mrs. Osborne's little boy, who passed away last week.

Time and tide waits for no man; neither does the case of Rex vs. McCauley cut any figure, for on Sunday June 1st, the news should read, at Kelowna, to Mr. and Mrs. Malcolm McCauley a son, and a ten pound one at that.

Mr. S F. Tolmie, chief veterinary inspector of B. C., came in on Monday's train having just completed an inspection trip through the Kootenay country. He stayed the day in Keremeos and while here inspected the horse, "Beautiful and Best."

The trustees of the Keremeos school board have secured the services of Miss Margaret J. Scott as teacher of the local school. Miss Scott is at present teaching at Princeton where she has proved very successful in the past. She will be greatly missed by her many friends at Princeton who will be pleased to hear that she is not moving out of the valley but only to a sister town not far away.

The boys were ready, but not the weather. We are now referring to the cleaning up stunt which was to have taken place in the park. The cakes were made, the ice cream (friz), the ladies of course knowing the boys would not like very well to work out in the rain thought it would be best to feed the hungry so getting together the nifty dishes joined forces with Mrs. Keeler and the spread was on at the restaurant. Everything was lovely and everything went well: so there you are. Thanks to the ladies.

On Monday a little Ford automobile almost hit town on the fly. There were three occupants who wished to pass the customs on the double shuffle. Billy got through his ham and eggs on the jump and had the papers fixed up as speedily as possible. After they were gone we found that these parties had news to the effect that a large piece of land had been thrown open to settlement somewhere near Douglas Lake, hence the rush to get in on the opening. We immediately got in touch with Nicola only to find that that town knew nothing about such an interesting item.

The case Rex vs. McCauley called for hearing at Vernon assizes is adjourned until the fall assizes. We have been able to get in touch with three of the witnesses for the defence and they claim to be disgusted with the whole proceedings. The Grand Jury returned a true bill so naturally witnesses thought the case would be tried but the reverse happened. It appears the charge in the first place was that of stealing and it seemed at the last moment the prosecution wanted the charge changed to that of receiving stolen goods knowing them to be stolen.

Six Russians came into town Friday enroute for the states. They boarded the train safe and sound but on its arrival at Chopaka were held as they had not enough spondulix between them to enable them to meet Uncle Sam's requirements so they were shipped back to Keremeos where they put in a couple of days sojourning in the town and taking the cure by sleeping in the open. Very little could be done with these men as none of them could speak English and it was hard to make them understand anything. Monday morning arrived with these husky immigrants, who had been in the country only two weeks, looking a little gaunt. Luckily for them Mr. Werdenhoff, of Werdenhoff, Jacobson & Co., was on the train and sent them up to work on the construction.

SIMILKAMEEN

Beautiful showers Saturday evening and night; warm sunshine after; crops are growing very quickly.

A few of the residents of this part of the valley turned out thinking there would be service in the School house on Sunday but were disappointed.

E. M. Crooker and Dan McCurdy came through from Penticton on Friday night reaching Keremeos at 2.30 a.m., after spending the best part of two weeks at Vernon where they were expected to give evidence in the Rex vs. McCauley case; but at the last moment the Crown prosecutor wished the trial postponed until the Fall Assizes. A vigorous protest was entered against this, but the presiding Judge allowed it.

Mrs. Dan McCurdy took the train from Keremeos to Oroville and Midway on Victoria Day and spent a very pleasant week visiting friends there, returning the following Saturday accompanied by her daughter, Lillian, and Mr. Paul Shurson, wife and child, who will stay for a couple of weeks with D. McCurdy.

The trustees of the Similkameen School Board are advertising for a teacher.

William Haining called at Similkameen on Sunday and reports everything all right at his end of the valley, especially the taters.

J. J. Currie, engineer, is busy pumping water on to the bench on W. H. Armstrong's property.

It's the CLEANEST, SIMPLEST, and BEST HOME DYE, one can buy--Why you don't even have to know what KIND of Cloth your Goods are made of.--So Mistakes are Impossible.
Send for Free Color Card, Story Booklet, and Booklet giving results of Dyeing over other colors.
The JOHNSON-RICHARDSON CO., Limited, Montreal, Canada

WATER NOTICE

Notice of Application for the Approval of Plans and Petition for Approval of Undertaking

TAKE NOTICE that Ashnola Power Company, Ltd., will apply to the Comptroller of Water Rights for the approval of the plans of the works to be constructed for the utilization of the water from Similkameen river, which the applicant is, by Water Permit No. 28 authorized to take and use for power purposes.

Petition for the approval of the undertaking will also be made to the Honourable the Minister of Lands.

The plans and particulars required by subsection (1) of section 70 of the "Water Act" as amended and the petition and plans for approval of undertaking as required by Section 89, have been filed with the Comptroller of Water Rights at Victoria and with the Water Recorder at Fairview and Nicola.

Objections to the application may be filed with the Comptroller of Water Rights, Parliament Buildings, Victoria.

YOU WANT THE BEST
IT ALWAYS PAYS BEST
There are Two Kinds of Printing
The one is turned out by the man who believes that anything goes, but the other by the one who values the reputation of his establishment too highly to allow any work to go out which will not do him credit.
There is just as good work being done in country offices as in the cities, and often as poor work in the cities as in the worst country shops
In Prices the country office can do just as well for you and you save the express. The city printer may get his stock a trifle cheaper by saving the local freight, but his rent and other overhead expenses are higher, and in the end he is obliged to charge as much or more than the country printer will charge for the same class of work.
THE HEDLEY GAZETTE
is prepared to do any kind of work that may come along. No order too small and none too large.
